To avoid going bankrupt during the past three years, New York has made major cuts in city services. Those cuts have, ironically, fallen most heavily on the middle class and have contributed to a continuing erosion of the middle-class population and the city's tax base. The cuts have not merely gotten rid of excess fat; they have sliced to the bone and muscle of ordinary working people. Only millionaires are unaffected by a budget crisis that has cut 50,000 jobs from the city workforce.

Let me tell you about the human reality behind the statistics. In 1975, I met a girl I will call Sharon Ambrose while I was doing a story on her high school in Queens. Sharon, now 18, is black, bright and beautiful. She lives in the South Bronx, a destitute area that has been accurately compared to bombed-out Dresden after World War II.

It has long been the custom in this city for bright kids to take the subway out of their neighborhoods when they enter high school. In this respect, the subway is not only an instrument of geographical mobility but a source of and a metaphor for the social mobility that is essential to any great city. Sharon did not want to go to the high school nearest her home: It was too full of junkies and kids who were, as she put it, "walking around more dead than alive." So she chose to attend a school with safer halls and a better academic reputation. In order to get to and from the school, she spent approximately 2½ hours a day on the subway.

Between the beginning of 1975 and the spring of 1977, subway service was cut back 22 percent—a statistic which means more crowded cars and longer waits between trains. For Sharon Ambrose, the subway cuts meant she had to spend an additional 45 minutes a day commuting. A small inconvenience? It might be a small matter if Sharon lived in a safe neighborhood, but she lives near a subway stop where extra time spent waiting for a train means frightening extra exposure to crime. Sharon was especially scared because the guard in her local subway station was no longer on duty in the afternoon.

This is not the sort of story that gets told at congressional hearings. A bright girl is working hard to get out of the South Bronx and into college, she has to spend extra time traveling to and from school; she is frightened by the loss of a subway guard. This is the "fat" that has been cut out of the subway system.

Then there are the cuts in the schools. Frank D'Amico is the principal of a junior high school in Chinatown, where more than half of the students are children of immigrant families. As a result of changes in the federal immigration laws, a new wave of Chinese immigrants has quadrupled the population of Chinatown—from about 30,000 to more than 120,000—during the past decade. The new Chinese immigrants live in the buildings that were occupied by immigrant Jews and Italians 75 years ago.

Frank D'Amico grew up in an immigrant home on the Lower East Side and he chose to work in the schools of his old neighborhood. When I interviewed him in the summer of 1976, he had lost all but one of his Chinese-speaking teachers. He was dispirited, because he had encouraged his former Chinese students to return to the neighborhood and work with the new immigrant children.

When layoffs began, the young Chinese-speaking teachers were the first to go. "We say to these kids, 'Fulfill the American Dream, get an education, go to college, become a professional,'" D'Amico observed sadly. "Then they do all that, and they're working at a job that desperately needs doing, and they get laid off."

The teacher layoffs cast a particularly interesting light on what the budget crisis has meant to many middle-class professionals in New York. Last year, new federal funds became available to hire back some of the teachers. Notice were sent to 9,000 who had been laid off but only 2,500 were interested in returning. The teachers' union did a survey and found that substantial numbers of those who were laid off had simply left the city—some of them for better-paying jobs in nearby suburban school systems.

Before I introduce you to another human casualty of the budget crisis, I must provide you with some facts about one of the greatest institutions this country has ever produced: the City University of New York.

Today it is difficult for us to imagine how revolutionary it must have seemed in 1847 for a city to establish a tuition-free college. Around the turn of the century, when immigrants were sending their children to school in unprecedented numbers, there was no other city in the world where children of a comparable economic class could obtain a free higher education. Throughout this century, the free colleges of New York City continued to take the children of the poor and give them a chance to become distinguished scientists, scholars and artists. In 1974, in spite of the fact that many of its entering freshmen were the graduates of a deteriorating elementary and secondary school system, the City University was still fulfilling its historic function.

The budget crisis has brought about an irreversible change. Tuition was imposed in the fall of 1976: $775 a year for freshmen and sophomores and $925 for juniors and seniors. Do those fees sound low? More than 74 percent of the students came from homes with incomes of under $12,000 a year. (Remember—that same year, the federal government set $18,000 a year as an "intermediate" budget for a family of four in New York.)

Since 1975, student enrollment has dropped by nearly 28 percent. During the same period, part-time enrollment has fallen by nearly 50 percent. This is an extremely significant figure because the City University has always had an unusually high proportion of part-time students who are working adults.

Although nearly two-thirds of the remaining City University students receive some tuition aid from the state, there is almost no money available for part-time students.

One victim of cutbacks and tuition is Alice Capraro, a 42-year-old mother of four. I have known Mrs. Capraro (not her real name) since 1973, when I was writing a story on the formation of a small feminist group in her neighborhood in Brooklyn.

Mrs. Capraro's husband, Joe, is a construction worker. When she told him she wanted to go to college and become a teacher, he was all for it. He was making about $20,000 a year with overtime, their children were growing up and he understood his wifes' desire for work of her own.

Then Joe Capraro got laid off. Unemployment in the construction industry—another product of the city's poor economic condition—is about 10 per cent. Joe Capraro has been out of work about half of the time during the past three years. Alice found a job as a typist with an insurance company to help pay the bills. She went on going to

school part-time because it was free, she loved her classes and she still wanted to be a teacher.

In 1976, when tuition was imposed, Alice Capraro had to quit college. The family income had dropped to $12,000 a year and there was no extra money for her tuition. Alice looked into the possibility of financial aid and found there was no money for a middle-aged woman.

"I feel sad all the time, just cheated," she says. "Joe was even talking about going to school part-time—he saw how interested I was. It's like we were reaching for opportunity but no matter how hard we were willing to work, we couldn't have it."

It does not take a financial genius to figure out that the destruction of such hopes erodes the initiative of people whose efforts are vital to any true economic restoration of this city.

At some point during the next month, Sen. Proxmire's committee will consider a proposal to provide long-term loan guarantees for the city. The city's unions, which have kept New York from going bankrupt during the past three years by massive investments in city notes from their pension funds, cannot continue to risk their money without the assurance that they will get it back. Millions of New York workers are worried not only about losing their jobs but about losing their future pensions.

The city is not asking for a handout—it is not asking for any money at all—but for a government backup while it puts its own house in order. A long-term guarantee for city notes would do what the city cannot do by itself: restore the confidence of private investors. I am sure there would be no controversy over this backing if Washington, not New York, were the economic capital of the nation. But historic circumstances have dictated that we have two capitals—Washington for government, New York for finance and culture. It should be as unthinkable for the federal government to let New York go bankrupt as it would for Congress to let the District of Columbia go bankrupt—as unthinkable as it would be for England to let London go bankrupt or for the Soviet Union to abandon Moscow.

The federal government has the right and the responsibility to demand strict financial accounting and better management in return for guaranteeing the city's notes. But I hope that legislators and federal officials will refrain from talking about "fat" in the city budget as though everyone in New York were a millionaire or a "welfare cheat."

Some of the budget cutting of the past few years has been nothing more than a new kind of bookkeeping gimmickry—this time, at the insistence of Congress and New York state officials. When you cut 50,000 jobs from the city payroll, it is obvious that both the state and federal governments are spending a good deal of money for social security, unemployment compensation and welfare to support the people who have, as they say in bureaucratic jargon, been "excessed." The city and federal government are, of course, losing substantial tax revenues when fewer people are working. It's a vicious circle: cut jobs and services to the middle class and you may balance the budget in the short run, but you speed up the loss of energy and money that is at the heart of the city's fiscal crisis.

I could go on, as bankers and city officials are prone to do, about the need to prevent New York from going broke because of the potentially disastrous impact on our image and our economic influence in the rest of the world. I could go on about the domestic economic consequences of collapse by a city that the rest of the country loves, hates and—above all—needs. I could go on about New York's past generosity to immigrants from the poorer areas of this country as well as from abroad.

All of these things are true, but they are not the main reasons why you should affirm the national government's stake in the survival of New York City.

You should do it because of Alice and Joe Capraro and Frank D'Amico and Sharon Ambrose. They are the kind of ambitious, hard-working people who built this city. They deserve better from you (and from their own city and state officials) than they have been getting. Give them something better and they will help restore the stability and economic vitality of this incomparable city.

Sincerely yours,

SUSAN JACOBY.●

## NATIONAL URBAN POLICY

### HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. FISHER. Mr. Speaker, the following is the text of a letter from one of my constituents, Mr. Thomas J. Healey, on the subject of President Carter's proposals calling for a comprehensive national urban policy. While Mr. Healey's comments do not necessarily reflect my thinking on the President's proposals, I did want to share his opinions with my colleagues:

The text of letter:

MARCH 28, 1978.

DEAR MR. FISHER: I just finished reading President Carter's "$8.3 Billion Plan to Aid U.S. Cities." Whatever happened to his promise to reduce government, etc.? Frankly, I believe there are more grounds for impeachment of President Carter than there were for President Nixon, but that's another story. For now I want to let you know—as logically as I can—why I'm opposed to this plan:

1. I quote from the Washington Post: "The plan is designed primarily to help financially troubled central cities, and second to promote rational growth and fiscal health in urban areas generally. Carter called it a 'tough, no-nonsense program based on efficiency, effectiveness and cooperation' with states and localities and the private sector." Let's examine this plan and see if it will accomplish these goals:

2. The key part of this plan is the development of a "National Development Bank" which will aid businesses willing to locate in depressed areas, both rural and urban. If I wanted to open a ski shop in Florida, no bank—no efficiently run bank—would loan me money for such a venture. Why? Because it wouldn't be profitable. Let's go back to paragraph 1 and ask ourselves is this a "no-nonsense program based on efficiency . . ."? Can you see the wide-spread corruption the plan will produce: Fast-buck artists opening pseudo businesses just to get loans. Don't tell me this will not happen. One has only to look at government-sponsored medical programs and we see doctors padding medical bills.

3. Let's look at the recommended $1.5 billion in tax credits for companies that hire long-term unemployed young people from 18 to 24 years old: When someone will not hire you for a job it is because you don't have skill enough to perform efficiently and productively enough to make a profit for the employer. The more efficiently and productively you perform, the higher your wages or reward. Now the government steps in and says to the employer I've got a man here who is a no-account so and so (and don't tell me he isn't or he would have a job) and if you hire him you'll get a tax break. That's "efficiency" (ref. paragraph 1). A country is only as good as its individual people. What kind of people do you have when you give them something they have not earned?

4. While I'm thinking about it, I'm not really sure that I want a "National Development Bank". I have to think about it some more, but the idea scares me. For example, what happens if the company to whom this bank loans money defaults? Does the "National Development Bank" foreclose and become the owner of the business? The thought scares me. I can see this bank growing more and more powerful. Not only control of money will be centralized at Federal Government level, but banks, businesses. I've made up my mind. I don't like it at all.

5. I could go on pointing out points of this plan that are unsound, but I think you can see my point. Just another quick one, though: Under the plan there would be increased procurement of goods and services from minority-owned businesses. In other words, government is not going to buy the best quality goods, but the minority produced goods. Again let's look at the corruption. Fast-buck artists will financially back minority owners, produce cheap second-rate goods, knowing that they have a ready market—the government—no matter what. What is this going to do to the honest businessman (producing quality goods) who has to compete?

I have a better plan. If the Federal Government didn't take the money from the people in taxes, then they wouldn't have to give it back. Not only that, they wouldn't have to hire people (like the "National Development Bank") to dispense it. You see, it's really very simple. When people have more money than they need, they save it (in banks). When banks have more money than they need, they loan it (to people who want to start or expand a business). When people start or expand businesses, they hire people to work. When people work they earn money. When they earn money, they spend some and save some (in banks), and so on. This is a natural law that works quite well (almost as well as the law of gravity). It's like a wheel that keeps turning, quite efficiently I might add. This wheel gets out of balance only when the Government thinks it can improve on it.

The final question I have is *who* will really control this National Development Bank?

Respectfully,

THOMAS J. HEALEY.

ANNANDALE, VA.●

## REGULATION OF LOBBYING

### HON. C. W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. YOUNG of Florida. Mr. Speaker, the House is scheduled to consider H.R. 8494 tomorrow. The original version of this bill was introduced on July 22, 1977. Prior to that time, on March 21, 1977, I introduced H.R. 5275, a similar bill to regulate lobbying and related activities.

The bill reported by the House Committee on the Judiciary contains many of the provisions of my bill, but there are important provisions which were omitted from the final version. Therefore, I will

submit several amendments to H.R. 8494 in an effort to strengthen the measure.

It is the opinion of a large segment of the public that lobbyists have a great deal of influence on legislation which affects their everyday lives. People are very much under the impression that as legistors, we are "sold", figuratively speaking, by those interests that can afford the best "hucksters" to present their point of view.

The right to petition Congress, by individuals or through professional lobbyists, is guaranteed by the Constitution; however, professional lobbying organizations have become very structured, organized, and well financed. So there is a definite need for an accounting proceddure for those lobbyists who make their living trying to influence Congress and to identify major contributors to these lobbying organizations.

In addition to the present provisions of H.R. 8494, I feel the Public Disclosure of Lobbying Act of 1978 should also include the following provisions:

First, inclusion within the registration requirements of the identification of any individual who has contributed $2,500 to a lobbying organization during any calendar year and who spends all or part of 13 days on lobbying communications in any quarterly filing period. This contributor would also be required to keep the necessary records associated with his contributions.

Second, imposition of a civil penalty against any former Member of the House, Parliamentarian, former elected officers and minority employees of the House, who, during consideration of a measure in which they have a direct interest, appear on the floor of the House or in adjacent rooms as a representative of an organization required to register under this bill.

Third, requirement of registration of the names of Federal officials or employees contacted by lobbyists or lobbyist organizations in an effort to influence any measure as contained in the bill.

The public is demanding some sensible accountability of lobbyists and their activities, and they have a right to it. Disclosure of the activities of these groups and their income and expenditures is justified. It is also justified that the privileged few who have access to these Chambers, by reason of their former association with it, should not be allowed to abuse that privilege by gaining entry with a "product to sell" or an "ax to grind" for personal or professional profit. Not only is the public entitled to full disclosure of the identity of professional lobbyists, lobbyist organizations, and major contributors, but they are also entitled to know the identity of the people the lobbyists try to influence.

The text of the three amendments follows:

On page 35, line 4, insert the following:

(3) An identification of any individual who has contributed $2,500 to the organization or an affiliate during any calendar year and who spends all or part of 13 days in any quarterly filing period engaged in lobbying activities described in Section 3(a) on behalf of that organization.

On page 39, line 8, insert the following:

LIMITATIONS OF LOBBYING IN AREAS PROXIMATE TO THE HOUSE OR SENATE CHAMBERS

SEC. 7. (a) No person who is—

(1) an ex-Member of the House of Representatives or the Senate;

(2) a former Parliamentarian of the House or Senate; or

(3) a former elected officer or minority employee of the House or Senate,

shall, in violation of rule XXXII of the Rules of the House of Representatives, appear in the Hall of the House or adjacent rooms as a representative of an organization which is required to register under this Act during the consideration of a measure in which they have a direct interest.

On page 39, after line 7, insert the following:

(8) A listing of the names of each Federal officer or employee whom such organization has sought to influence respecting any activities described in Section 3(a).●

## H.R. 12176, A BILL TO CLARIFY STANDARDS FOR DETERMINING THE STATUS OF INDIVIDUALS FOR EMPLOYMENT TAX PURPOSES

---

## HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. GEPHARDT. Mr. Speaker, today I am introducing a proposal directed at resolving what has been characterized by the Commissioner of Internal Revenue as one of the most vexing problems in Federal taxation; namely, the classification of individuals as independent contractors or employees for employment tax purposes. The taxes involved are payroll taxes for social security, Federal unemployment, and collection of income tax at the source on wages—sometimes referred to as "FICA," "FUTA" and "withholding." These provisions of the Internal Revenue Code and their attendant regulations define the term "employee" in terms of common-law rules.

You will recall that the conferees on the Tax Reform Act of 1976 were particularly concerned with the problem of clearly defining who constitutes an "employee" as opposed to an "independent contractor," and directed that a study be conducted by the staff of the Joint Committee on Taxation. At the same time the conferees urged the Internal Revenue Service not to apply any changed position or any newly stated position which is inconsistent with a prior general audit position in this general subject area until the requested staff study has been completed.

Several months ago, in conjunction with this study, the General Accounting Office submitted a report which testifies to the vast extent of the problem that currently exists in this important area of the tax law. As is evidenced by that report, in conducting employment tax audits, the Internal Revenue Service has in many instances retroactively changed its position, and in other instances used conflicting and inconsistent standards, in classifying individuals as employees or independent contractors. This process continues unabated, despite the specific request of the conference committee. The result has been that large segments of American industry, and particularly small businesses, are facing serious economic disruptions and in some cases extinction.

The GAO report recommends on a prospective basis that the status of individuals for employment tax purposes be clarified by adopting specific standards for distinguishing between "employees" and "independent contractors." Unfortunately, the report does not purport to make recommendations for relief from injustices which have already been caused by the Service's retroactive changes in position and use of conflicting and inconsistent standards.

In the recent case of Central Illinois *Public Service Co.* v. *United States* (46 U.S.L.W. 4163 (Feb. 28, 1978), the Supreme Court, in unanimously holding that reimbursements for lunch expenses incurred by employees did not constitute "wages" subject to withholding, recognized the inherent unfairness of retroactively imposing new interpretations of the employment tax laws. It also emphasized the importance of achieving certainty in the employment tax area. Moreover, the intrinsic inequity of permitting the Internal Revenue Service to assert deficiencies based upon its retroactive changes in interpretations of the employment tax laws was emphasized by Justice Powell in a concurring opinion with which Chief Justice Burger joined:

> It seems particularly inappropriate for the Commissioner, absent express statutory authority, to impose retroactively a tax with respect to years prior to the date on which taxpayers are clearly put on notice of the liability. In other areas of the law "notice", to be legally meaningful, must be sufficiently explicit to inform a reasonably prudent person of the legal consequences of failure to comply with a law or regulation. In view of the complexities of federal taxation, fundamental fairness should prompt the Commissioner to refrain from the retroactive assessment of a tax in the absence of such notice or of clear congressional authorization.

The Service's retroactive changes in position and utilization of conflicting and inconsistent standards for purposes of determining whether individuals should be classified as employees or independent contractors for employment tax purposes are no less inappropriate.

The proposal which I am introducing generally solves these problems both retroactively and prospectively. It provides much needed retroactive relief in instances where classification of an individual as an independent contractor meets well-defined standards and either (i) is not inconsistent with outstanding revenue rulings or (ii) has consistently been so reported by the person for whom he performs services and is in accordance with the longstanding practice of such person with respect to individuals performing such services.

Prospectively, an individual would be deemed to be an independent contractor if the following five conditions are met:

First, the individual's sole remuneration is by commissions (including prizes, awards, overrides or other economic benefits related to production or performance, but not including salary payments) which are reported to the Internal Revenue Service on a Form 1099;

Second, the service is performed pursuant to a written contract which provides that the service is performed by the individual as an independent contractor;

Third, the individual is not required to work during specified hours or to follow a prescribed daily or weekly work schedule;

Fourth, the individual provides his own principal place of business, or if it is provided by the person for whom he performs service, a fair rental is paid therefor; and

Fifth, the individual has an opportunity of making a profit or incurring a loss in that current operating income may or may not exceed current operating expenses.

These five conditions provide an easily understandable, objective test for determining an individual's status for employment tax purposes for all businesses. Moreover, they go to the heart of the traditional common-law rules, since an individual who meets the requirements of this test would qualify for independent contractor status under commonly accepted definitions of that term.

I am introducing this bill as a much needed step in the legislative process to resolve this issue.

It is my hope that the Ways and Means Committee can initiate hearings on this proposal as soon as possible in order to provide an appropriate forum for all interested and affected parties so that we can work together and provide proper comprehensive legislative relief.

I am pleased to be joined in this effort by my colleagues on the Committee on Ways and Means, Messrs. HOLLAND, STEIGER, FRENZEL, FORD, TUCKER, and DUNCAN.

It is my sincere hope that the committee will be able to give prompt consideration to this proposal.●

## ISAAC ASIMOV OFFERS OPTIMISM ABOUT THE FUTURE

### HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. FASCELL. Mr. Speaker, at the beginning of this month I had the privilege of introducing to my colleagues Dr. Isaac Asimov, well-known science fiction writer and scientist. He was one of our guests for "Dialogues on America's Future"—a series of dinners sponsored by the Congressional Clearinghouse on the Future.

Dr. Asimov brought a degree of lightness and profundity to our series that was both welcomed and challenging. His comments about our potential and our problems were exciting and perceptive. Mr. Speaker, I am sure our colleagues will enjoy the thought-provoking summary of his comments, even if they do not agree:

A POSITIVE LOOK TO THE FUTURE

Thank you very much for inviting me to be with you tonight. You have asked me to talk about the future, but I should tell you that my vision is suspect because I am a science fiction writer. I will not give you a recipe because I have none, but I do look into the future to see what it might be like, so that I can get a notion of what is coming.

Of course, there are all sorts of people predicting destruction, but if I talk about that, we have nowhere to go. So let's assume that we will survive. What can we expect?

In the first place, the population problem will have to be solved. Some people think we have gone too far already with this problem, but others think we can make it if we plan. In 460 years, we will have a world average of 100,000 people per square mile. This is roughly equivalent to New York City at lunch hour, but some people can't endure New York City lunch hours, and so we will have to stabilize. There are two ways to do this: either the birth rate will have to go down or the death rate will have to go up.

It is easy to get the death rate to go up. You don't have to pass any laws; you don't have to make any decisions or hold any hearings. Just let things go and nature will take care of things.

But if we want to try to stabilize our population by getting the birth rate to go down, then we are talking about something else. The problem with this method is that no one has ever done it over a long period of time, and we don't know if it can be done.

I have spent a lot of time thinking about how to control population with no unpleasantness. When the birth rate is high, the social status of women is low because it takes a lot of time to have a baby and raise a child. And in many societies women are considered domestic animals—higher than the ox, but lower than the horse. Yet, when women are considered reasonably equal to men, the birth rate falls.

EQUALITY FOR WOMEN STABILIZES POPULATION

If women are treated as human beings, they do things that other human beings do—such as run for Congress. This makes it impossible for them to have a dozen children. Therefore, granting women equality insures a lower birth rate.

Women are the bottleneck in the reproductive cycle. If males were cut to 10% of their present number and females stayed the same, the birth rate could be maintained at its present level. However, if women were reduced to 10% of the population and men stayed at their present level, the birth rate would fall. Therefore, equality for women is not a matter of abstract justice or generosity of those in power. It is a matter of self-protection and survival for both sexes.

Suppose the birth rate does drop, then, and technology continues to develop and life expectancy increases so that we have more older people. If we believe that only the young are daring and brave and creative and the old are stodgy and sick, we will be producing a heavy weight of old people in our society. Will we condemn old people to be conservative, worthless, lacking initiative, drive? And if we assume this, will it become a self-fulfilling prophecy. We restrict education to the young in our society so that our children see that leaving school is equated with being grown up. As soon as they are old enough, they get out. School is associated with childhood, and after students leave school, they rarely read, think, or have new ideas. The solution to having a mature, yet vital society, is to encourage education as a life-long force.

I see the possibility of teaching machines hooked up to world computerized libraries which are guided by teachers who will learn in turn from students. All learning is fun if you learn what you are interested in. In the future, we will be freed from menial tasks which will be done by machines. As a result, all of the things inherently human will be left for us—art, creativity, entertainment, ideas. This is not a feasible method of education now, but I am not talking about now. I am talking about the future.

THE IMPORTANCE OF COOPERATION

A by-product of this world-wide computerized learning will be a new understanding of the importance of cooperation. All of our problems today—resource depletion, weather, pollution, nuclear war—are global problems. We are one ecosphere, one land mass, one ocean. We live in a single unit world, biologically and socially. Only global solutions will solve our global problems. International cooperation, then, will have to be strong and effective, and may mean the development of a world government.

We can look forward to the necessity of more cooperation. We just cannot fight a nuclear war without destroying civilization. There are 1½ times more people on this planet now than there were at the end of World War II. To maintain a set of military machines which we say are deterrents to war is impossible when the deterrents are too expensive to keep up. We must look to a future in which there is no war. There is simply no other way to survive.

We also need a future in which we explore and exploit space. Space is a source of many resources in the future. We can use the material on the moon to build things in space. The price of our industrialization has been pollution, declining quality of life and other hazards which we have been willing to live with in exchange for the benefits. But if we can move our industrialization to space, we can get rid of what we don't want, and keep what we do want. Some people may think that space is a mad dream, but it could be the best mad dream we've ever had.

ADVANTAGES OF SPACE EXPLORATION

I often think of a Cyrano de Bergerac quote, "Let the universe perish so that I can get my revenge." It may seem that some nations want this, but I think that if they have something to work for, hope for, contribute to, they will decide to cooperate. The use of space could be the secret—provided we all cooperate and all nations are invited to participate. We need a project that is global in nature which will return profits that are global in nature so that individual nation-states will forego regional revenues.

An advantage of space is, of course, a source of energy. We can get enough energy by using space solar power satellites. In space, energy is freed of geography. Because there is no energy tie in any particular area, no nation can sell energy to another nation. Space energy sources are no less than the whole earth itself.

Another advantage of space exploration is that if we see ourselves colonizing the solar system, then we will also see ourselves spreading the human species into space. If we do this, we will develop a new breed of human being . . . one which will grow up in space. Space people will be used to close recycling of all goods; to living inside of structures instead of on the edges; to being surrounded by close space walls.

Secondary these people will make star voyages, making the human species a species which will have the universe as home and live as long as the universe does. They may meet other intelligent species which will expand our sense of our own species as we try to expand our sense of nationhood. There is no horizon beyond which we cannot travel except that which destroys civilization.

QUESTIONS AND ANSWERS

Q. Though Amory Lovins and the late E. F. Schumacher would probably agree with many of your premises, they tend to look at appropriate technologies rather than centralized technologies. Where is appropriate technology in your game plan and what are the advantages of centralization vs. decentralization?

A. To begin with, I cannot really see the future. I only see the past. And through history, we see cycling patterns of centralization and decentralization. Everytime we have had decentralization, it has been called a dark age. "Yours for less government" is the notion of decentralization, but there is no such thing as less government. If you reduce the federal government, you increase local government, and I have always felt safer with somebody distant. What is large and small changes with time. With technology, large systems can be more effectively run.

Q. I think what you have shared with us tonight is wonderful and exciting, but it seems to me that you are addressing the visionary part of people and not their practical side. And these two sides tend to fight each other. Won't the rational part of our minds say, "It's too big for me. I've got to be something I can recognize"?

A. You are right, of course, and you have put your finger on the major problem that futurists have, which is that we don't look at the practical side. Our lofty visions are not accessible to everyone. And so you say, "How do you do it?"

I ddn't know. But I think it has to be done within a circle of society, within a known environment. Governments have to be convinced and they will spread the word in their countries. There will always be malcontents who will mount revenge if they get a chance. And the more advanced the society gets, the more dangerous the malcontents are. If we can avoid the worst of this, particularly terrorism, we will survive. Again I think that opening up space would give some of these people a place to go. People who want danger and adventure can be some of the people who explore space for us.

Q. I don't think women and children in the third world will get the message if it is left up to governments, but satellite television has enormous potential. What is the impact of satellite television in the third world, and is it a logical way to build the notion of a global village?

A. Yes, I think so. The transistor radio is a good example of this. It put the voice of the world in everybody's vest pocket, and served as a great force for unification. But if we are to make the best use of satellite communication, we have to know the cultural as well as the literal language of each nation. And that is not easy to do.

TWO IMPORTANT QUESTIONS FOR CONGRESS

Q. If you were in Congress, what would you do?

A. Well, that is very difficult to answer. It's like asking a marriage counselor what he would do if he were married. In the first place, I guess I would be pretty sure that I wouldn't be reelected because I have no sense of the practical, and politics is, after all, the art of the possible. I guess I would aim to do the possible in the direction of the impossible.

And on every issue, I would ask two questions:

1. What value does this issue have on its own merit; and

2. How does this issue fit into the long-term survival of the human species?

If civilization slips and we move to a pre-industrial stage, we will never come out again because of the lack of energy. Our metals will be diluted and there will be no energy basis for industrialization. And so we are facing a time when the long-term survival of the human species is a very real question.

There is no issue in Congress that is so small that Congress cannot ask how it will affect the survival of the species. And if in your opinion, one side of the argument is pro-survival and the other is anti-survival, then, of course, you have to vote for the pro-survival side, regardless of the short-term unpleasantness of your decision. And if you don't know, then you have to vote what you think is right and hope you guessed right.

Q. The relation of men and women in your *Foundation Trilogy* was based on an aristocratic hierarchy. There was no democracy in that era. What is the future of democracy?

A. There are three things to tell you about *Foundation*. I started it when I was 21. I started it in the middle of World War II, and democracy was at a low ebb in my view. And I started it under an editor who had so much charisma that all of his writers were impelled to do what he wanted. And he was very fond of empires, knights, kings, etc. If I had to write it today it would be very different, but probably not as good.

FUTURE OF OCEANS

Q. You have not mentioned the oceans which cover 70 percent of our earth. What is their future in our future?

A. I tend to speak more about space than oceans for three reasons:

1. I am afraid of the water, and whenever I think about water, I get uncomfortable.

2. As a science fiction writer, space is second nature to me.

3. The ocean really is a limited resource. The food in it is not limitless. We are overfishing it now. And the biological makeup of the oceans is fragile. We are polluting it dangerously and we must understand how we can stop this. 80 percent of all life is in the oceans. If we destroy it, we will not be able to survive on the land.

Q. How do you deal with the new developments in genetic engineering and cloning?

A. With cloning, there is a tendency to emphasize the negative. Cloning has nothing to do with eliminating sex and is not a pathway to immortality. Each clone's lifestyle will be different so we should not fear cloning a bad person or be happy with cloning great persons like Einstein. I don't think we want 1000 Einsteins.

CLONING AND DNA RESEARCH

Clones are good for other reasons. One positive use is to develop organ banks. I had a heart attack last May and I have to make do now with this damaged heart. If someone had taken one of my cells when I was a young man and produced a cloned heart for me. I could use the heart for my own. Another use of clones is to save endangered species. If you happen to like Bengal tigers, clone 100 of them and keep them going.

About recombinant DNA. In theory it sounds good except it is human judgment that it is involved here. Who is going to decide what kind of human beings we want? We have been doing genetic engineering on animals for years. We make turkeys which are all breast, sheep that are all wool, breed dogs, and so on. But we don't know what we want in human beings. And my guess is that what we really need in human beings is variety. We need as many different genes as possible, and if we reduce the variety of genes, we will be in a dangerous spot.

But we can use recombinant DNA research to see how the body ticks. I am afraid of the dangers, but also I hate to give up the possibilities. So what do we do? One approach is to isolate the research in a contained space. And here again, I would point to another use of space. There are some people who would not oppose living with the risks of this research. What we need to do is not endanger those who do not want to deal with the risk, who don't choose it, and contain the risk area in space.

I have been involved in the Law of the Sea negotiations, and I am not encouraged that we have what it takes to cooperate in exploring space. The people who want to exploit the sea are basically out for profits. They don't seem to be overly concerned about cooperation. As we move towards exploitation of space, if we continue in our profit-oriented society and motivation through selfishness, I don't see how we can do it cooperatively. Besides, nationalism is becoming stronger, not weaker.

A. Yes, that is true, nationalism is becoming stronger. And as healthy strong nations break up into smaller weak nations, nationalized problems and war will probably occur. And you are right that to exploit the sea or space from a profit motivation will destroy the future I have described tonight.

NEED STRONG LEADERSHIP

We have to hope that eventually people will see that cooperation works. In 1789 at the Constitutional Convention of this country, the states chose to give the federal government funds and therefore surrendered much of their power for the greater good of the country. The immediate profit is not always the best long-term profit, and if our leaders, if you understand that, you can persuade others to believe it. Franklin D. Roosevelt was an effective leader in this way, and I think people will still follow a leader they sense is interested in their best good.

Q. Can we rely on the natural goodness and intelligence of human beings?

A. I'm not sure. We use humanism as Americanism. We must inculcate the habit of thinking of human beings as humans. Racism, sexism, agism are all bad. Likenesses are greater than differences in human beings. We need all the brain power we have and we need to use computers to maximize brain power. If we try to solve problems we will be further ahead than if we stood still.

Dr. Asimov, you have given us far more than a journey into space this evening. You have given us a journey into your life, into your brain and into your time. We are deeply grateful to you for coming.●

## CHROMIUM SHORTAGE?

### HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. SPENCE. Mr. Speaker, I wish to call to the attention of my colleagues the report of the Committee on Contingency Plans for Chromium Utilization. The report concluded that the United States "is strategically more vulnerable to a long-term chromium embargo than to an embargo of any other natural resource, including petroleum." This study found that the major chromium deposits which are known today will be exhausted or depleted within 20 to 75 years, except for those in Rhodesia and South Africa. I believe that this finding is a sobering one, and it underscores the need for a thorough analysis of the strategic significance of this material. The News Report of the National Academy of Sciences, National Academy of Engineering, Institute of Medicine, and National Research Council recently carried an

article which discusses this report. I ask that this statement be inserted at this point in the CONGRESSIONAL RECORD:

CHROMIUM, ESSENTIAL TO MANY STEELS, COULD BE IN SHORT SUPPLY

Fearing that reliance on chromium from foreign sources, chiefly in southern Africa, leaves the United States vulnerable to severe economic dislocation from a chromium cutoff, four U.S. Government agencies joined in seeking a National Research Council study of ways to minimize chromium use presently and in the event of a "worst case"—a total embargo or other break in the supply of chromite ore and ferrochromium. The study, begun in 1976, is completed, and the resulting report, now published, declares those fears well-warranted. The United States "is strategically more vulnerable to a long-term chromium embargo than to an embargo of any other natural resource, including petroleum," the report warns. Chromium is plentiful, but its known sources are mostly in Rhodesia and South Africa, and, according to this report, chromium is indispensable in tool, stainless, and other so-called "specialty" steels critically important to the U.S. industrial base.

The National Research Council committee that undertook this study found that the United States can cut its use of chromium by a third within five years, but the committee "could not identify any technological responses that would eliminate . . . U.S. vulnerability to a long-term disruption of chromium imports." Chromium is employed in metals that go into high-strength bolts, automobile engines, chemical-processing equipment, refineries, refractories, food-storage and food-transport tanks, machine tools, welding electrodes, jet engines, and newer, more exotic technologies, as well as in car-adornment. "The rate at which remaining chromium reserves are becoming concentrated in Rhodesia and South Africa" makes substantial impact of any chromium cutoff "a possibility that cannot be dismissed casually," the committee said.

In the committee's view:

Despite dependence of "important segments of U.S. industry" on chromium, there has been "insufficient effort . . . to develop substitutes for or to conserve, reclaim, or recycle chromium-containing materials," and "a drastic curtailment of chromium supply would have serious short- and long-term effects."

"U.S. chromium deposits are small and virtually no prospects exist for the discovery of any significant new U.S. deposits."

"No substitutes exist or are likely to be developed for chromium in the high-strength steels, high-temperature metals, and corrosion-resisting alloys that are essential in the manufacture of jet engines, petrochemical and power plant equipment, and various other critical products. It is highly unlikely that corrosion-resisting or high-strength alloy steels without chromium will be developed for such critical applications, although chromium-free substitutes could be used for decorative stainless steels, automotive trim, flatware, refractories, and some chemicals."

"Current U.S. chromium consumption could be reduced potentially up to one-third within about five years without creating major economic dislocations," if available technology is used "to substitute alternative materials or processes, to recover and recycle waste chromium, and to design for greater chromium efficiency."

A major, chromium-conservation research program could reduce U.S. chromium consumption by an additional third within 10 years "but could involve economic penalties (or disruptions) in some areas."

Even if both these measures are taken, "essential or unsubstitutable U.S. chromium consumption is expected to be at least 180,000 short tons per year (approximately 6 percent of 1975 world chromium production), on the average, in the foreseeable future." This is a bottom figure (estimates of irreplaceable chromium range up to 202,000 tons).

The study was conducted for the Department of Energy, Bureau of Mines, National Aeronautics and Space Administration, and Federal Preparedness Agency by an ad hoc Committee on Contingency Plans for Chromium Utilization—a committee of the National Research Council Commission on Sociotechnical Systems' National Materials Advisory Board. Earl R. Parker, of the Department of Mineral Technology of the University of California at Berkeley, chaired the committee. Members and panelists were selected from industry, universities, and government. The report—Contingency Plans for Chromium Utilization (NMAB–335)—examines technological measures only; the committee did not study "measures for coping with chromium contingencies by legal political, or financial means."

An "optimum response" to vulnerability to disruption of chromium supply "probably would involve a combination of three approaches . . .," the committee said, suggesting: (1) stockpiling, for about five years' protection; (2) conservation, perhaps extending protection by another five years; and (3) exploration for chromium deposits in the Americas. The committee spoke both of conventional stockpiling and of a possibly more economical floating stockpile provided by continued use of chromium in "easily collected functional products" such as hubcaps, flatware, and coins. Sudden, mandatory conservation programs, in the committee's opinion, "would result in severe economic dislocations"; the committee recommended conservation by changes in engineering and in industrial processes—starting now with use of substitute materials where practical and with research and development to get additional practical substitutes. Exploration for chromium deposits is proposed as a long-term step for which it is impossible to predict success or failure.

POTENTIAL SAVINGS OF CHROMIUM-CONTAINING MATERIALS

[In million pounds]

| Material designation | Total chromium used | Total chromium saved | Time required for substitution | | | | Irreplaceable Chromium [6] |
|---|---|---|---|---|---|---|---|
| | | | Immediately [1] | Within 5 yr [2] | 5 to 10 yr [3] | At least 10 yr [4] | |
| Stainless steel | 569 | 332 | 203 | | 129 | | 237 |
| Tool steel | 7 | | | | | | 7 |
| Wrought alloy steel | 123 | 103 | 22 | 35 | 46 | | 20 |
| Cast iron and steel | 82 | 54 | 5 | 10 | 35 | 4 | 28 |
| Nonferrous alloys | 29 | 2 | | | 2 | | 27 |
| Chromium electroplate | 21 | 17 | 14 | 3 | | | 4 |
| Refractories | [5] 249 | 225 | 110 | | 115 | | 24 |
| Chromium chemicals | 68 | 11 | 6 | | 5 | | 57 |
| Total | 1,148 | 744 | 360 | 48 | 332 | 4 | 404 |

[1] Amount saved by functionally acceptable chromium-free substitutes currently available. Direct or indirect cost penalties are incurred.

[2] Amount saved by functionally acceptable chromium-free substitutes provided after short development (less than 5 yr) with a high probability of success. Direct or indirect penalties are incurred.

[3] Amount saved by functionally acceptable chromium-free substitutes provided after intermediate-term (5 to 10 yr) research with a high probability of success. Direct or indirect cost penalties are incurred.

[4] Amount saved by functionally acceptable chromium-free substitutes provided after long-term (more than 10 yr) research with a high probability of success. Direct or indirect cost penalties are incurred.

[5] Amount considered irreplaceable. No functionally acceptable chromium-free substitutes are identifiable. Basic research and new technology are needed.

[6] Includes refractory types not reported by the Bureau of Mines.

Note: The assigned development times imply a reasonably well-funded and well-staffed investigation—a crash program supported by Government and industry might achieve desired results in much less time, while a poorly funded and understaffed program might drag indefinitely with no tangible results. The development times estimate only the time required to arrive at a viable technological solution to the substitutability problem involved. The time required to implement the technology depends on economic, political and social factors that are too complex to evaluate in any quantitative way and are beyond the scope of this study.

Source: "Contingency Plans for Chromium Utilization," Committee on Contingency Plans for Chromium Utilization, National Materials Advisory Board; Commission on Sociotechnical Systems, National Research Council (National Academy of Sciences, 1978).

"None of the three approaches . . . can protect the United States completely against the possibility of . . . disruption (or drastic shortage) of chromium supply," the report reiterates. Nevertheless, by the committee's estimates, the United States can cut its use of chromium substantially.

According to late-1976 figures used by the committee, 1,148,000,000 pounds of chromium a year have been going into U.S. production of steels, nonferrous alloys, chromium electroplate, refractories, and chromium chemicals. The committee found "functionally acceptable chromium-free substitutes currently available" to reduce that use by 360,000,000 pounds annually, although not without cost penalties. Aluminum, titanium, and plastics already compete with stainless steels in certain applications, the committee noted. Thin, chromium-containing coatings could be used to reduce the amount of stainless steel used in some products, but research and development in the improvement of fabrication and joining of composite materials are needed. Modified stainless steels could be used where other alloying elements could replace chromium.

The research-and-development program proposed by the committee is intended to cut U.S. chromium-use by an additional 384,000,000 pounds a year (beyond the 360,000,000 that could be saved by immediate use of substitute materials) over approximately 10 years. Most of the savings would be in stainless and wrought-alloy steels and in refractory materials.

Achievement of the research-development-substitution program projected by the com-

mittee still would leave many of these industries with a need for chromium—404,000,000 pounds of it, by the committee's reckoning, with more than half of that for stainless steels. By comparison, the need for chromium for tool steels is much lower; the committee said 7,000,000 pounds a year. Considering the cost of finding a substitute to supply the hardening qualities essential to tool steels, and considering their role in the national economy, the committee deemed chromium for tool steels irreplaceable.

"Economical chromium-free substitutes" for stainless steel "are unavailable" for use in chemical processing requiring resistance to corrosion or high-temperatures, the committee said. "In a chromium cut-off, these applications must be supplied by allocation or abandoned until new technology is developed." The committee asserted:

"A basic research program aimed at developing substitutes for chromium in stainless steels and high-temperature, oxidation-resisting alloys should be initiated. Although this is a long-term program with little chance of early success, it is the only technical possibility for eliminating U.S. vulnerability to a long-term chromium embargo."

Why, then, was chromium noted as strategically important but generally taken for granted in U.S. materials-policy reports in recent years? The committee surmised that "the five indicators generally used as tests of material criticality do not reveal the true nature of the chromium situation." Three indicators—criticality of applications, U.S. supplies, and availability of alternatives—"reveal that chromium is highly critical," but the other two indicators—size of reserves and geographic distribution of foreign sources—"deceptively reduce" the judgment of severity, according to the committee's report. First, chromium "is not in short supply in an absolute sense, and it will take several centuries to deplete current deposits at projected world consumption rates." Second, reliance on indication of which foreign sources previously supplied the United States with chromium "disguises the situation likely to evolve . . ." Here the committee elaborated:

"In the past, the United States imported chromium from more than six sources in widely separated regions. Within the next 20 to 75 years, however, all remaining known chromium deposits of substantial quantity will be in . . . Rhodesia and South Africa. The chromium deposits in other regions . . . either will be exhausted or insignificant."

That concentration "sets the stage for a natural monopoly," the committee said, yet "the unique role that chromium plays in a technological society and the geographic concentration of remaining reserves are not widely appreciated facts among the economists and market specialists who contribute to most reports on materials." Of known chromium ore reserves, 95.1 percent are in South Africa and Rhodesia, the committee recounted, and of known potential chromium ore reserves, 97.0 percent are in South Africa and Rhodesia. Remaining reserves, actual and potential, are mostly in the Philippines, Turkey, and the Union of Soviet Socialist Republics. According to the U.S. Department of Commerce, most recent U.S. chromium imports have been from South Africa, with imports from Rhodesia halted last year by a United Nations embargo.

Trade experts may say that where deposits are plentiful the needs of exporters and importers can be expected to come into balance, but "many severe problems can, and often do, occur" before that balance is achieved, the committee said. "Failure to appreciate the unique strategic characteristics of chromium . . . works against developing long lead-time technologies, stockpiles, or international agreements that may avoid dislocations."

GERALD S. SCHATZ.●

## NATIONAL HEALTH INSURANCE AND THE PRIVATE SECTOR

## HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. STEIGER. Mr. Speaker, I want to call my colleagues' attention to a recent article by James A. Attwood entitled "National Health Care is Everybody's Business!" The article reviews the current status of private sector and Government involvement in health care.

Mr. Attwood succinctly explains why our goal in the area of health care could be a national health insurance program, but not a nationalized health insurance program. While I do not endorse the bill which Mr. Attwood advocates, I do feel his comments should be heeded.

The article follows:

[From Pension World, January 1978]

### NATIONAL HEALTH CARE IS EVERYBODY'S BUSINESS!

If the private and public sector join together in a national program, each could do what it does best: Private enterprise providing the personal service and management, and government setting guidelines and standards.

On the average, Americans are spending about 10 per cent of their income on health care. National health expenditures in fiscal 1976 reached over $139 billion—8.6 per cent of the Gross National Product—of $638 per person. This was an increase of almost 14 per cent in one year.

Most people—some 183 million is the latest estimate—over 90 per cent of the population—have private health insurance to help them cope with rising costs. Just under 150 million have protection against the catastrophic costs of a serious and prolonged illness or disability. About 85 per cent are covered by group health arrangements.

Health care was and continues to be the fastest growing item in the Consumer Price Index—in fact, other items seem to have stabilized somewhat, but not medical care services.

There are various reasons for the rapid escalation of health care costs in the last several years. The modern hospital today operates intensive care, cardiac care, burn care, open-heart surgery, radium therapy, cobalt therapy, inhalation therapy, renal dialysis, organ transplants and many other units not available ten years ago. There is more and better trained medical personnel, and the increased ability of people to pay for services because they have private health insurance or are eligible for Medicare or Medicaid.

Advances in medicine, and wide publicity of the medical system, have created rising public expectations, even overexpectations, resulting in an almost limitless demand for health care services. Also, doctors too often practice defensive medicine, and order extra tests and procedures, because of the fear of a malpractice suit. As a result, the normal operations of supply and demand in the health care service area have been inhibited.

#### PROPOSED LEGISLATION

The Carter Administration has recently proposed its Hospital Cost Containment Program, introduced as H.R. 6575 in the House. This legislation would institute a cap on the increase in *acute-care* hospital revenues, limiting such increases to approximately nine per cent in the first year the statute is in effect, and to gradually declining amounts in subsequent years.

This proposal, to which the insurance industry has given qualified support, has many commendable features. It focuses on the largest single component of health costs, with perhaps the most manageable service units and where the influence of cost increase has been most extreme. Also, it applies to all revenues—not just government reimbursements, it recognizes both operating and capital expenditures, and, at first review, the program appears to be easy to administer.

There are drawbacks, however. It is difficult to apply the same revenue limits to all hospitals; it will be unfair to many hospitals and will be overgenerous to others. The most important drawback is that it is just an interim program at a time when a strong, permanent solution is needed.

Many businessmen—and most hospitals—are opposed to the Carter Hospital Cost Containment Program, believing that it is unfair to single out hospitals for cost control. Doctors dislike the program because they are concerned that they may be next. Drug companies and medical equipment suppliers see an adverse impact on their business. The program is now being discussed at hearings in both the House and Senate and its fate is unclear at this moment.

#### NEW PROGRAMS

What is the private sector doing about the pressing problem of spiraling health care costs? Concerned groups, which include employers, labor unions, private health insurers, hospitals, the medical profession, and consumers, are undertaking programs for slowing down the rate of inflation and for inhibiting the rapid escalation in health care costs without undue interference in our private system.

These include:

Programs to carefully review fees, charges, and the use of health services.

Incentives to encourage preventive care to help keep people well, and to encourage the use of less costly ambulatory care and to provide more services out of the hospital where this is medically acceptable.

Involvement in community health planning to bring health care needs and resources into a better balance.

Health education programs to motivate people to take better care of themselves.

As for employee benefit plans, employers, with the help of their insurers, are taking a variety of actions.

For example, companies are expanding their health benefit plans to put more stress on out-of-hospital care and they are coordinating their benefits with other plans.

There's a lot of experimenting going on such as:

Coverage of preventive care services.

Payment for second or even third opinions for elective surgery.

Payment for tests performed before going to the hospital.

Payment for organized home care and skilled nursing home facilities.

Use of models and profiles to measure care against diagnosis, medical history and standards of care.

Identifying obsolete medical procedures, no longer necessary, for which payment should not be made.

#### NEW LAWS

Of course, the private sector cannot do the job alone. Some governmental legislation and regulation in the health area is required, but there must be a strong, cooperative effort of both the private and public sectors.

Congress has passed a health planning law with potential for bringing about real change in the health care system. What's going to make this law work are the people who serve on the committees and councils of the health systems planning agencies (known as HSAs) created under this law: Businessmen, labor officials, doctors and other profession-

als, health insurance people and other consumer representatives.

Another important piece of Federal legislation is designed to make available more outpatient care centers known as HMOs—Health Maintenance Organizations. These generally provide walk-in walk-out care for a fixed fee paid in advance. Because they put great stress on keeping people well, or nipping illness in the bud, HMOs are believed by many to have real promise for improving the level of heath care and cutting costs.

But these HMOs are not going to be available because government waves a magic wand. They're going to expand because private groups—employers, community groups, health insurers, among others—are going to continue to develop and finance these outpatient care centers.

Another law has created medical review groups across the country called Professional Standards Review Organizations—PSROs. These PSROs will determine whether the health care services provided to patients under the government programs of Medicare and Medicaid are necessary, proper and of good quality. Who makes up the medical review groups? Not government workers, but doctors. It's the medical profession that has—and must have—the responsibility for judging medical treatment and the obligation to make this law work the way it is supposed to.

NATIONAL HEALTH INSURANCE

Government can remove financial barriers to needed health care through a program of national health insurance.

Such a program should do two basic things: It should set nationwide standards so that everyone can have adequate health insurance, and it should create a mechanism so that everyone—rich or poor, young or old, healthy or sick, working or not—can be protected.

There isn't much disagreement about either of these goals. The debate has centered around the question of who should pay for a national program, and who should run it.

Should government pay for national health insurance through taxes and administer the entire program? Or should there be a partnership of the private sector and government?

The answer to this question will bring us to the moment of truth as far as the issue of public-private responsibility in the health field is concerned. It will determine the direction of our health care system in the future.

If government takes over, eliminating private health insurance, it means either higher Social Security taxes or higher income taxes. It would put a further strain on the Federal budget and would lead to choices among various social needs—housing, the environment, nutrition, mass transportation and health care.

It would probably mean a more impersonal health care system, because government generally is more impersonal, less responsive to particular individual needs than the private sector.

On the other hand, if the private and public sector join together in a national program, we believe that each could do what it does best: Private enterprise providing the personal service and management, and government setting guidelines and standards. Flexibility would be preserved and individual needs would be better met.

Insurance companies have long advocated a phased-in program for universal health care insurance and its financing. There is need for a national health insurance program which combines, in a cooperative effort, the strengths of the private sector and the Federal government. Private health insurers should administer and underwrite the system, the Federal government should set guidelines and establish minimum standards of coverage for everyone. Tax dollars would only be used for the poor and near poor.

This partnership approach is embodied in a bill which has been introduced into every Congress since 1970. Currently it is named The National Health Care Act of 1977, and its sponsors since the beginning have been Senator Thomas McIntyre of New Hampshire and Congressman Omar Burleson of Texas. The private health insurance business supports this bill because we believe it is responsible to both social need and economic realities.

It provides a balance of public funds, governmental power, and the full involvement of all of us in the private sector. In a word, it is a national health insurance program, but not a *nationalized* health insurance program.

It is hoped that a program of this kind will be enacted to give our country what we must have—good quality care available to all of us, and all of us free of the fear of the cost of illness—but at a price the nation can afford.

There is no doubt that the provision of health care—and its financing—is one of the major issues of the day and one of the major measures upon which our economy, society and political system will be judged as the future develops.

HEALTH CARE TRENDS

The Carter Administration has made health cost containment its top health care priority, with the introduction of national health insurance contingent on the control of costs. A recent special study by the Arthur D. Little management consultant firm has projected that, despite governmental efforts to control costs, annual health cost expenditures will increase $100 billion by 1988, when they will reach $240 billion, compared to $139 billion in 1976—and this projection is on the basis of 1975 constant dollars. With continued high general inflation, the current dollar figure could be twice that amount.

Although the 1988 figure is staggering, it actually represents a leveling off of escalating health care costs in the 1980's, according to the study. They forecast a slowdown in rate of increase until the mid-1980's when costs will be stimulated by early phases of national health insurance. They see health costs reaching just under 10 per cent of GNP by the end of the 1980's. Factored into their projections is an interesting scenario of phased in implementation of various increments of a national health insurance program, once tighter cost controls become effective. They foresee catastrophic and maternal and child health coverage to be in place in the early 1980's, but believe that full health benefit coverage (i.e., first-dollar primary care coverage) for the general population to be unlikely during the 1980's.

Among the trends in health care delivery predicted by the study during the next decade are:

1. An eventual decline in the number of short-term hospital beds per thousand population;

2. One-third of all short-term hospitals (accounting for one-half of the short-term beds) will be participating under common management systems;

3. In-patient days of care per annum will slowly decline from the present 1234 per thousand population to 1100 in 1988;

4. A marked early reduction in some of the frequently performed operations, such as tonsillectomies, and a shift toward developments which do not require hospitalization or which help to prevent it;

5. Greater frequency of physician peer review;

6. Greater use of care outside the hospital (about 40 percent of health spending in 1988 rather than 33 percent today) with ambulatory services becoming more organized and regulated, with medical practice standards increasingly applied;

7. Half of all physicians in group practices, and ⅔ to ¾ under peer review by medical foundations;

8. Growth of HMO's, with up to 10 percent of the population enrolled by 1988.

Most of us would applaud these developments with the health care delivery system gradually becoming more cost conscious and more cost effective. Whether they will come soon enough—and in sufficient magnitude—to satisfy the American public without turning to a fully nationalized system of health benefits—remains the challenge.●

## SHOULD LOBBYING SOLICITATIONS BE REPORTED?

### HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. MAZZOLI. Mr. Speaker, on Wednesday, April 19, the House is scheduled to consider H.R. 8494, the Public Disclosure of Lobbying Act of 1978.

The following article which appeared in the April 17, 1978, New York Times provides excellent food-for-thought as we consider the appropriateness of requiring the reporting of lobbying solicitations—so-called grassroots lobbying activities—in a lobbying disclosure statute.

As the Times piece points out, it is at the grassroots level where substantial lobbying takes place today. I personally feel that in order for the public to have an accurate picture of the activities of lobbying organizations, lobbying solicitations should be disclosed, and although H.R. 8494 as reported by the Judiciary Committee does not cover such grassroots lobbying, I intend to join my committee colleague, the Honorable WALTER FLOWERS, in working on the House floor to obtain coverage of such activity.

[From the New York Times, Apr. 17, 1978]

GRASS-ROOTS LOBBY AIDS BUSINESS

(By Charles Mohr)

WASHINGTON, April 16.—"Congressmen first learn how to count and then to think," said Thomas J. Donohue, executive vice president of Citizen's Choice, a recently formed conservative political action organization.

Although some might not state it with such blunt cynicism, a widespread belief in that theory across the entire spectrum of special-interest groups in America has led to significant changes in the methods used to influence Congress.

Especially within the last two years and especially in the business and industrial community, there has been a major increase in the use—and apparent effectiveness—of so-called indirect or "grass roots" lobbying as opposed to conventional lobbying by paid agents. It mainly involves mobilizing constituents of Congressmen and the general public to write, telephone or buttonhole the Members of Congress on legislation.

"It's the growth area of lobbying," said Michael Cole, a lobbyist for Common Cause, the often successful "citizen's lobby" that refined many of the methods and techniques in quest of "good government" reforms.

Richard L. Lesher, president of the Chamber of Commerce of the United States has gone further, calling the indirect method "the only lobbying that counts."

The phenomenon is more than a mere curiosity or trend. It has given business a series of unexpected upset political victories that shook liberal blocs and the national Democratic Party leadership. But, more basically, the method seems both to reflect and to contribute to fundamental changes in how government now works, to shifts in power relationships and to a decline in the authority of the Presidency and Congressional leadership. It may also make it difficult to reverse any of these changes.

It also appears to reflect an aggressive and determined effort by industry and business to increase its direct political action, as well as a growing ability of business leaders to submerge their differences and agree on cooperative action under common tactics and strategy.

Stated simply, the shift in emphasis is this: What is called direct, or face-to-face lobbying by paid, professional lobbyists has by no means decreased in intensity. It has, in fact, increased. But in terms of perceived importance it has been supplanted on many "major" issues by indirect lobbying.

"The paid lobbyist is still important, particularly in providing legislative intelligence, and he may pull the trigger—but the ammunition is out in the Congressional districts," said a businessman who helped successfully to lead a coalition to block passage of a bill that would have created a consumer protection agency.

"ENORMOUS INCREASE" CITED

"There has been an enormous increase in direct lobbying and its importance is enormous," said Representative Benjamin S. Rosenthal, Democrat of Queens and chairman of the subcommittee on commerce, consumer and monetary affairs of the House Commitee on Government Operations, which is currently investigating the lobbying by 470 major corporations and trade associations. "These people are in the process of gaining control of the apparatus of government."

Peter S. Barash, staff director of Mr. Rosenthal's subcommittee, said that more than half of the 470 organizations engaged in substantial indirect lobbying and that most said they did little of it two or three years ago.

Indirect lobbying may mean many things. Interviews with some of its notable practitioners show they are in universal agreement that persuading a citizen, particularly a "community leader," to meet directly with his Congressman is the most effective lobbying tool. "Face-to-face meetings out in the districts are the best of all," one Congressman remarked.

Mobilizing telephone calls and individualized letters rank next. Mass mailing of postcards or coupons from advertisements is considered less effective but is widely used. Increasingly, corporations exhort their stockholders, employees and even their customers to put pressure on Congressmen, and through the use of computers huge lists of names can be matched to their legislators. Advertising meant to generate letters is widely used.

Praticularly in the business community, related techniques have come into increasing play. Ad hoc alliances of companies and associations have increasingly formed five- or six-man "lobby teams" to call on pivotal lawmakers as a group. Lobbying by the chief executive officers of the largest corporations is coordinated by the executives' own association, the Business Roundtable.

There seems to be little possibility that the trend will be reversed and many signs that it will, instead, accelerate.

GROUP IS BATTLING AFL–CIO

Currently, a "coalition" of about 500 corporations and trade associations calling itself the National Action Committee on Labor Law Reform is locked in relentless political conflict with the American Federation of Labor and Congress of Industrial Organizations over a labor law reform bill that would make union organization efforts somewhat easier and more speedy.

Such coalitions, a Washington representative of a major corporation remarked, began to emerge only about four years ago but now "they are constantly forming and dissolving." Harold P. Coxon, a labor attorney for the Chamber of Commerce and one of four vice presidents of the National Action Committee, calls the coalition one that "eclipses" those of the past and "the largest business group I've ever seen in action."

In part as a defensive move, the A.F.L.–C.I.O. has recently formed its own Task Force on Labor Law Reform to mobilize support for the bill, which has passed the House but faces a possible filibuster in the Senate that would require 60 votes to stop.

The labor task force director, Victor Kamber, estimates that in the last three and one-half months alone the contending factions have generated about 4.5 million pieces of mail to Senate offices.

Grass-roots lobbying organized by businesses is credited by both losers and winners with the defeat in February by the House of the consumer protection bill. Many skilled political activists also believe the technique was decisive in last year's defeat of a so-called common-site picketing bill that labor expected to see pass comfortably.

Many sources believe that it also played an important role in such cases as the Senate's virtual emasculation of President Carters' national energy program, the defeat of a cargo preference bill, Congressional distaste for "tax reform" and other issues.

There are varying explanations for the apparent effectiveness of indirect lobbying and its increased use. Ironically, one explanation offered is the package of Congressional "reforms" that in recent years have weakened the power of committee chairmen and the leadership generally.

"AN ABSOLUTELY DIFFERENT CITY"

Special interest groups from both left and right use remarkably similar language. "It's an absolutely different city these days," said Mark Green, director of Ralph Nadar's Congress Watch organization. "It is a new era," said Emmett W. Hines, Jr., the Washington Representative of the Armstrong Cork Corporation and the leader of the coalition that fought the consumer protection bill.

Slightly more than half the members of the House have been elected in the last six years, many of them "Watergate Democrats" who won in formerly Republican or marginal districts. While in one sense such members are seen as more "independent" of party leadership and White House influence, they are almost universally seen by interest groups as unusually susceptible to constituent pressure.

If such pressure accurately reflects opinion in the districts this might constitute a "purer form of democracy," as a business lobbyist said. However, most grass-roots lobbying is generated by the interest groups using increasingly sophisticated techniques and methods.

THE COMPUTERS LEND A HAND

Computer memory banks in Washington and elsewhere are programmed with data that match the names of lists of citizens with their Congressmen. Organizations as diverse as the Chamber of Commerce, the pro-Israel lobby and Common Cause have further "select" lists of especially influential or highly motivated supporters who can be mobilized to put pressure on a Member of Congress.

"We can target by district and we can even target by subcommittee," one lobbyist said.

The intensity of business use of indirect lobbying has alarmed many liberal "public interest groups," environmental organizations and consumer bodies that pioneered the techniques and from which many business lobbyists unashamedly say they have copied.

"Grass-roots lobbying is based on communication, which is based on money," said Mr. Green of Congress Watch. "Money is power," said a Congressional committee staff member.

O'NEILL'S BEWILDERMENT

With some bewilderment, House Speaker Thomas P. O'Neill, Jr., asked during the February debate on the consumer bill, "Why all of a sudden is there this tremendous change?" He later said, "I have never seen such intense lobbying."

Mr. O'Neill's political captain, President Carter, has an estimated 675 lobbyists in 32 Federal agencies spending an estimated $12 million to $15 million a year. Yet Mr. Carter, who often lashes out at "powerful lobbies," has suffered an embarrassing series of legislative setbacks during his 15 months in office.

One reason is that Mr. Carter is actually outgunned. Because there are so many loopholes in the 1946 lobby registration bill, it is not easy to assemble meaningful statistics on the number of private lobbyists and what they spend, but some Congressional staff members think the spending easily exceeds a billion dollars.

The Chamber of Commerce, the National Association of Manufacturers and many of the estimated 40,000 trade associations in the country have increased staffs and budgets, only one manifestation of a marked upsurge in business political action.

Hilton (Dixie) Davis, legislative director at the Chamber of Commerce, began in 1968 holding breakfast meetings for business Washington representatives on the first and third Thursdays of each month at a Washington hotel with about 100 people attending. By the first Thursday of this month the number had grown to 330 guests.

Indirect lobbying is apparently made more effective when it is used in conjunction with sophisticated and complementary techniques. One major technique involves the Business Roundtable, an organization that inspires considerable awe in Washington. The Roundtable, formed in 1974 as a manifestation of business' political offensive, consists of about 190 chief executive officers of major corporations.

EFFORTS HIGHLY REGARDED

Because of their prestige and the economic power they represent, the "C.E.O.'s" have unparalleled access to Congressmen, and they are increasingly willing to come to Washington for "one-on-one" lobbying sessions with members. Paid professional lobbyists hold their efforts in high regard, and so do liberal lawmakers who have seen cherished legislation altered or killed.

"The Busines Roundtable is the most powerful lobby in Washington," said Mr. Green, "and it is practically a secret society."

Representative Rosenthal called the group "among the most skilled operatives in the U.S. Talent that once was focused almost entirely on manufacturing and marketing is now increasingly focused on government intervention. It's a new world, and business is on a mental high about their successes."

He adds that if he wanted help on a bill, he would select Reginald H. Jones, chairman of General Electric and head of a Roundtable task force on taxation, "give him a two-month computer course and take him as my man."

EMULATING COMMON CAUSE

Another complementary technique is represented by Citizen's Choice, an offspring of the United States Chamber of Commerce

that unashamedly attempts to emulate Common Cause.

Beginning with a loan from the Chamber, but now operating in large part on annual $15 dues from about 20,000 members, Citizen's Choice is much smaller than Common Cause's 225,000-member size but hopes to grow to 40,000 by summer. It operates much the same way—with a monthly bulletin, a "hot line" toll free telephone message and "action alerts" to members. With its conservative, middle-class complexion, it is also like Common Cause in being able to produce relatively sophisticated, personalized letters from well-educated members.

Mr. Donohue, the executive director, said "we didn't start the process." He adds that it was the environmental movement, Ralph Nader's consumer groups and the anti-war movement that pioneered in efforts to "hold your Congressman accountable for what he does."

The real secret to indirect lobbying, said one Washington representative of a corporation, is planning and better cooperation. "The ad hoc coalitions that run these campaigns usually start with a few phone calls and an informal meeting. You usually see the same faces such as Walt Hasty and Forrest Rettger (lobbyists for the Business Roundtable and the National Association of Manufacturers) and others. Essentially, different organizations are mobilized to do their own thing at the grass roots, but to do it on one set of assumptions and with agreement on tactics and timing."

Mr. Green of Congress Watch, a Nader organization, is among those who deeply respect business lobbying ability. "You lose bills in the districts, not in Washington, and business is very good at what they do."●

---

## IDAHO STILL OPPOSED TO PANAMA CANAL TREATIES

---

### HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. HANSEN. Mr. Speaker, the American public remains overwhelmingly opposed to the proposed Panama Canal treaties.

Public opinion polls during the past few years have confirmed this public opposition to the treaties. For instance, scientific polls conducted by the Opinion Research Corp. for the past 3 years have shown that the public is overwhelmingly opposed to the transfer of ownership and control of the canal to Panama.

In a June 1975 Opinion Research Corp. survey, 66 percent of the public favored continued U.S. ownership and control over the canal. This figure jumped to 75 percent in April 1976, and by May 1977, 78 percent of the public favored U.S. ownership and control.

The Institute of American Relations sponsored another Opinion Research Corp. survey of 1,015 scientifically selected individuals from February 24–27, 1978. The Opinion Research Corp. asked the same question as it did in the 3 previous years:

Do you favor the United States continuing its ownership and control of the Panama Canal, or do you favor turning ownership and control of the Panama Canal over to the Republic of Panama?

The 1978 result was that 72 percent are for the United States continuing ownership and control of the Panama Canal, 19 percent were for turning ownership and control over to Panama, and 9 percent had no opinion.

Thus, Americans who expressed an opinion are over 3½-to-1 opposed to turning over ownership and control of the canal to Panama.

Several polls which were conducted by other polling firms confirm this high degree of public opposition to the proposed transfer of the canal in cases where the questions were straightforward and direct.

The Opinion Research Corp. polls, and others, show that official U.S. policies on the Panama Canal are opposed to the public consensus. Public opposition to the administration's proposal to transfer control of the Panama Canal to Panama has been strong and vocal. Despite a massive public relations effort by the administration to influence public opinion and to win Senate votes, the public has not altered its views significantly. Mail which Members of Congress have received from their constituents have shown an overwhelming opposition to the Panama Canal treaties.

Yet the Senate rejected the majority views of the general public and their constituents when they approved the Neutrality Treaty.

When a government adopts policies which run directly counter to the wishes of the people, that government fails to live up to its responsibilities under the Constitution. In so doing, it violates the basic principles of democracy and undermines our democratic system of government.

To further illustrate the mood of the American people regarding the proposed giveaway of the Panama Canal, I cite the results of the 1978 National Security Issues poll conducted by the American Security Council with 108,000 people across the nation responding, which has just been released. The question was asked:

"Should the United States Senate ratify the Panama Canal Treaties?"

Nationally: 6 percent yes; 85 percent no; 9 percent, undecided.

State of Idaho: 4 percent, yes; 89 percent, no; 7 percent, undecided.

Second congressional district; 4 percent, yes; 91 percent, no; 5 percent undecided.

I find it extremely satisfying to note that the results of the American Security Council poll in the Second District of Idaho bear out the results of my own poll conducted last fall which found that 95 percent oppose the President's proposed Panama Canal treaties.

Mr. Speaker, for the benefit of my colleagues I also include for the RECORD a copy of the poll conducted by Opinion Research Corp. for the Institute of American Relations. The article follows:

IAR POLL SHOWS PUBLIC OPPOSITION TO PANAMA CANAL TREATIES HOLDING FIRM

72 PERCENT REGISTER OPPOSITION TO TURNING CONTROL OF THE CANAL OVER TO PANAMA

In light of repeated pronouncements by treaty proponents that they have succeeded in turning public opinion around on the proposed Panama Canal treaties, the Institute of American Relations commissioned the highly respected Opinion Research Corporation to conduct a new poll testing American opinion on the treaties. The poll was conducted during the last week of February and is the fourth in a series of surveys IAM has conducted on this issue since June 1975. The results showed 72 percent of the American public continue to oppose the treaties. A comparison of these results with those of a similar poll conducted by IAR in May 1977 reveals only a very minimal shift in public opinion. At that time, 78 percent of those polled favored continued U.S. ownership and control of the Canal. There has, however, been a significant increase in the number of persons who support Panamanian ownership and control of the Canal—19 percent, up from 8 percent in May 1977.

When those who favor turning the Canal over to Panama are presented with an alternative proposal—namely, that the U.S. continue ownership but improve the Canal and provide economic benefits to Panama—the large majority continue to favor Panamanian ownership. However, 18 percent (or 3 percent of the total public) would favor continued U.S. ownership under this alternative plan.

There is considerable support (68 percent) for a treaty amendment that clearly guarantees the right of the U.S. to defend the Canal without the permission of Panama. Only 18 percent of the public believe that the present clarification (which states that the U.S. can defend the Canal but not interfere in the internal affairs or territory of Panama) is a satisfactory defense position.

The survey included a question on Galeta Island, the top secret U.S. military facility in the Zone reportedly used to track Russian and Cuban aircraft and submarines. Admiral Holloway, chairman of the Joint Chiefs of Staff, has testified that this facility would be extremely difficult to replace. Poll results indicate that three-fourths of the public believe that the facility of Galeta Island should continue under U.S. ownership, even if the rest of the Canal Zone is turned over to Panama.

When asked about treaty provisions which call for a U.S. government expenditure of $100 million a year until the year 2000 (most of which is in the form of payments to Panama), 55 percent felt that the U.S. Senate should oppose these provisions.

52 percent of the respondents were not aware that the treaties require the United States to have the consent of Panama before we can build a new Canal. When advised that the treaties, as they now stand, do indeed contain such a restriction, 47 percent favored an amendment removing the requirement for Panama's consent.

Seven persons in ten believe that the treaties should be sent to the House of Representatives for consideration under the terms of the Constitution that state that the Congress "shall have the power to dispose of . . . the territory or other property belonging to the United States." Even those who favor Panamanian ownership of the Canal are largely in favor (67 percent) of sending the treaties to the House.

Public opinion is rather evenly divided as to the relevance of Panamanian government involvement in drug trafficking to acceptance or rejection of the treaties, 43 percent expressed the view that the charges should have no bearing on the treaty, while 47 percent indicated that the treaties should be rejected if the charges are true.

POLL QUESTIONS AND TABULATIONS

Following are the questions as they were posed in the survey, together with a breakdown of the results:

1. As you may know the Panama Canal is the waterway in Central America that connects the Atlantic and Pacific Oceans.

The U.S. secured ownership and control of the Canal Zone by way of a treaty signed with the Republic of Panama in 1903. How much, if anything, have you heard or read about the negotiations on a new Panama Canal Treaty—a great deal, a fair amount, very little, or nothing at all?

| | Percent |
|---|---|
| Great Deal | 33 |
| Fair Amount | 36 |
| Very Little | 24 |
| Nothing At All | 7 |
| No Opinion | 0 |

2. Do you favor the U.S. continuing its ownership and control of the Panama Canal, or do you favor turning ownership and control of the Panama Canal over to the Republic of Panama?

| | Percent |
|---|---|
| U.S. Continuing Ownership & Control | 72 |
| Turning Ownership & Control Over to Panama | 19 |
| No Opinon | 9 |

3. Some Senators want to accept the treaties and some want to reject them. Some of the Senators who want to reject treaties and have the U.S. continue its ownership and control of the Canal have offered another proposal. This proposal would improve the Canal and provide economic benefits to Panama. Specifically, the proposal calls for the U.S. to modernize the Canal, at an estimated cost of one-and-a-half billion dollars over the next ten years—most of this money would be spent in Panama. Also, the proposal calls for hiring Panamanians rather than Americans to provide the services needed by the Canal. On the basis of this proposal, do you favor the U.S. continuing its ownership and control of the Panama Canal, or do you favor turning ownership and control of the Panama Canal over to the Republic of Panama?

| | Percent |
|---|---|
| U.S. Continuing Ownership & Control | 64 |
| Turning Ownership & Control Over to Panama | 24 |
| No Opinion | 12 |

4. As far as you know, do the treaties require the United States to have the consent of Panama before we can build a new canal connecting the Atlantic and Pacific Oceans?

| | Percent |
|---|---|
| Yes, Requires Consent of Panama | 31 |
| No | 17 |
| Don't Know | 52 |

5. As they now stand, the Panama Canal treaties prohibit the U.S. from building a new canal without the consent of Panama. An amendment has been proposed that would remove the requirement for Panama's consent. Do you favor or oppose this amendment?

| | Percent |
|---|---|
| Favor | 47 |
| Oppose | 36 |
| No opinion | 17 |

6. Some Senators have proposed that the Panama Canal treaties be amended to clarify that the U.S. can defend the Panama Canal, but cannot interfere in the internal affairs or territory of Panama. Some Senators say that this amendment provides a sufficient guarantee of the rights of the U.S. to defend the Canal. Other Senators say that this amendment gives Panama a veto over any U.S. military activities in the defense of the Canal. What is your opinon? Should the Senate accept the amendment as proposed, or should the Senate seek an amendment that specifically guarantees that the U.S. have the right to act by itself in defense of the Canal without the permission of Panama?

| | Percent |
|---|---|
| Accept Amendment as Proposed | 18 |
| Seek Amendment Guaranteeing Defense | 68 |
| No Opinion | 14 |

7. The U.S. has a top secret military facility in the Panama Canal Zone. This facility is reported to be used to track Russian and Cuban aircraft, surface ships and submarines, among other things. The military has said that this facility would be extremely difficult to replace. Some Senators who support the treaty say that it provides a sufficient guarantee of the rights of the U.S. to defend this military facility. Critics say that this military facility cannot be protected under the existing provisions of the treaty and that the U.S. should continue to own the facility even if the Panama Canal Zone surrounding it is turned over to Panama. Do you think the U.S. should rely on the defense rights as now provided in the treaty to protect this installation, or should the U.S. require that this facility continue under U.S. ownership even if the rest of the Canal Zone is turned over to Panama?

| | Percent |
|---|---|
| Rely on treaty | 13 |
| Require U.S. continued ownership | 75 |
| No opinion | 12 |

8. Certain provisions of the treaties would cost the U.S. government 100 million dollars a year until the year 2000, when ownership and control of the Canal would be turned over to Panama. Most of these costs involve payments to Panama. In your opinion, should the U.S. Senate support or oppose these treaty provisions?

| | Percent |
|---|---|
| Support | 25 |
| Oppose | 55 |
| No opinion | 20 |

9. The U.S. Constitution states that the Congress "shall have power to dispose of the territory or other property belonging to the U.S." A majority of members of the U.S. House of Representatives recently sponsored a resolution requesting the Senate to send the Panama Canal treaties to the House for its consideration under the terms of the Constitution just mentioned. The State Department and the supporters of the Panama Canal treaties do not wish to have the House of Representatives act on the treaties; those who oppose the treaties wish to have the House of Representatives act on the treaties. In your opinion, should the Senate send the treaties to the House of Representatives for consideration, or should the Senate not send the treaties to the House of Representatives for consideration?

| | Percent |
|---|---|
| Send to the House | 70 |
| Not Send to the House | 17 |
| No Opinion | 13 |

10. There have been charges in the media that high officials of the Panamanian government have engaged in smuggling heroin and other drugs into the U.S. A U.S. grand jury has indicted Moises Torrijos, brother of the head of Panama, for channeling $27 million or more in drugs into the U.S. Some Senators say that the existence of these charges should have no bearing on whether or not the U.S. Senate accepts or rejects the Panama Canal treaty. Other Senators say that, if these charges are true, the U.S. Senate should reject the Panama Canal treaty. Do you think the charges should have no bearing on the Senate's acceptance or rejection of the treaty, or do you think that the treaty should be rejected if the charges are true?

| | Percent |
|---|---|
| No Bearing | 43 |
| Rejected If True | 47 |
| No opinion | 10 |

●

## SUPPORT FOR HUMAN RIGHTS IN CYPRUS DEMONSTRATED AT MAJOR RALLY HELD LAST SUNDAY IN WASHINGTON

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BIAGGI. Mr. Speaker, this past Sunday, in an impressive and impassioned demonstration, some 15,000 Greek Americans gathered at Lafayette Park to protest against the administration's plan to seek an end of the arms embargo against Turkey, imposed by legislation which passed Congress in 1975.

The demonstrators came from all over the United States and assembled in Washington to express solidarity with the people on the occupied island of Cyprus. Of paramount concern to the gathering, were documented reports of human rights violations committed by Turkey against the Greek Cypriot people. The fate of the more than 2,000 Greek Cypriots still listed as missing since the Turkish invasion, was also of profound concern to the crowd.

Congress imposed the arms embargo on Turkey for violations of law stemming from her illegal use of U.S. arms to invade and occupy Cyprus. Turkey's illegal and immoral actions in Cyprus have not diminished and she still occupies more than 40 percent of the island. Without a cessation of the conditions which led to the embargo and without assurances from Turkey that she will respect human rights, any talk of lifting the arms embargo must be dismissed.

The rally was honored by the presence and moving words of His Eminence, Archbishop Iakovos of the Greek Orthodox Archdiocese of North and South America. He prayed for peace and justice for the people of Cyprus and, as always, preached moderation through prayer. At this point in the RECORD, I insert his eloquent remarks.

I was honored to have shared the speaker's podium with the archbishop. Among the other dignitaries who spoke, were Eugene Rossides, chairman of the American Hellenic Institute's public affairs committee; and Colonel Derzis, the supreme president of the Order of AHEPA.

Following the rally and speeches, a march ensued and an effort was made by protest organizers to present a petition to an official in the White House for the President's consideration. Much to the disappointment of the demonstrators, the petition got no further than a White House guard. The following, is the text of the petition which was drawn up by the Ad Hoc Committees of Greater New

York and the District of Columbia, Concerned Americans for Justice in Cyprus, who sponsored the rally.

Mr. Speaker, the views of the thousands who assembled here Sunday, and the thousands more who are writing and calling, show very clearly that the proposal to lift the arms embargo is premature. The rule of law must be upheld. The human rights of the people of Cyprus must be respected. That was the message conveyed. Finally, I wish to insert for the RECORD, the text of my remarks at the rally.

PRAYER DELIVERED BY ARCHBISHOP IAKOVOS AT HUMAN RIGHTS DEMONSTRATION

To Thee, O Lord and Saviour of mankind, we lift up our minds and souls at this solemn moment as we gather in our Nation's Capital, to demonstrate our faith in Thee, and our love for those deprived of liberty, justice and human rights.

We admit O Master, that our minds are confused with contemporary national and international logic, which is a logic of assertions and denials; of assurances and broken promises; of noble initiatives and unpardonable neglects. We also admit that our hearts are heavy with uncertainty and frustration; with anguish and disillusionment; with sorrow and despair; as we live the agony of the unknown and unpredictable future.

From the depths of our whole being we raise our prayers to Thee, O Jesus, Son of God and Son of Man, Who loves mankind; Who weeps with those who weep; Who rejoices with those who rejoice. Remember those of our brethren who agonize for justice, truth and humanity. Remember the homeless, the refugees, the persecuted and the oppressed.

Thou Who art the refuge of Refugees: we beseech Thee to hear the cry of their souls. Shield and protect them as they struggle for survival in lands where law and order and civil and human rights are suppressed and violated. Especially remember, O Lord, our refugees in Cyprus whose most basic rights are ignored and even denied.

In deep humility, O Lord, we genuflect as Thou has done in the Garden of Gethsemane, during the long and dark night of the ineffable agony Thou hast experienced. Pray to Thy Father that betrayal and inhumanity may never again occur in human relations, and that kindness and compassion may prevail over bias and injustice.

Illumine the mind and strengthen our President so that he may serve our nation and all freedom-loving nations in their quest for a permanent and a just peace. Grant him Thy peace and Thy love. Speak to his heart in favor of all who look towards our nation for safeguard and protection. Inspire his actions and thoughts so that he may respond to the demands of his high office and to the justified expectations of the people he leads.

In Thine infinite mercy, manifest Thyself to us. Walk with us as we march, and marshall our souls and hearts in our pursuit for dignity, self-respect and human rights. Restrain those who attempt to perpetuate injustice and disorder in the world. Cast down attempts of the expansionists who aim at dominating defenseless and the poor and plunge them into ignominy and servitude.

Receive us O Merciful One, into Thine protective care; transfigure us into children of light and freedom; grant us Thy peace and Thy love; Thou has given us every perfect gift. And grant us one voice and one heart so that we may glorify and extol the most Holy and Magnificent Name of The Father and of the Son and of the Holy Spirit, now and ever more and unto ages of ages. Amen!

PETITION

We, Citizens from all the States in the Union, have gathered here this 16th day of April 1978 before the White House to petition our President to:

Withdraw his proposal to Congress to lift the embargo of U.S. arms to Turkey as long as 200,000 Cypriot refugees are not repatriated; 40% of Cyprus is occupied by Turkish armed forces; U.N. resolutions condemning the Turkish actions are not implemented in full; our laws are being violated by the Turkish aggression which has even expanded to claims to the Aegean Archipelago; the Armenian, Greek and other minorities and the Orthodox Patriarchate in Turkey are being persecuted.

Correct the State Department's Human Rights reports on Cyprus, Greece and Turkey, which were submitted on February 3, 1978, to the International Relations Committee of the House of Representatives and the Foreign Relations Committee of the Senate because they are inaccurate and reflect the State Department's entrenched bias.

Implement his administration's enlightened pursuit of policies based on human rights and the Rule of Law in the case of Cyprus, particularly since he has committed himself, because these American ideals are the constitutional basis on which our Government is founded and represent our true national interests for which we will continue to struggle.

---

STATEMENT OF HON. MARIO BIAGGI, APRIL 16, 1978

It was almost four years ago when Turkey, in an act of immoral and illegal aggression invaded Cyprus. To this day Turkey continues to occupy more than 40 percent of Cyprus and control a much higher percentage of its key industries. Three years ago, the United States Congress in response to these ruthless actions voted to impose an embargo on further U.S. military arms and assistance to Turkey for it was some of this aid which was used to invade Cyprus. I was proud to have been one of the main advocates of the legislation and felt it demonstrated to the world the Congress' belief in the rule of law.

This Administration has proposed a lifting of the arms embargo due to fear that Turkey will make good on her threat to close all U.S. military bases. Yet the fact is the illegality and immorality which prompted the arms embargo has not diminished. Turkey continues to illegally control a sizable portion of Cyprus. Human rights violations are continuing—thousands of Greek Cypriots remain refugees on their home land living lives of despair—some 2000 Greek Cypriots remain missing having been that way since the invasion. Yet the United States, the new champion of human rights, has chosen to overlook this situation and instead take an action which will have the effect of sanctioning the status quo on Cyprus.

The question of human rights on Cyprus is of deep concern to me. A recent communication to the United Nations by Mr. Joseph J. Stephanides, Chargé d'Affaires of the Permanent Mission of Cyprus to the United Nations portrayed graphically the extent to which human rights of violations exist in Cyprus. Mr. Stephanides stated "the living conditions of the enslaved Greek Cypriot inhabitants in the areas of the Republic under Turkey's military occupation have recently become unbearable as a result of unthinkable inhuman practices which they systematically employ . . . These are medieval conditions of horror, torture and continuous harassment." Mr. Stephanides appealed to the world community when he states, "There can hardly be any justification for inaction and apathy of the face of the impartially documented and internationally verified gross violations of fundamental human rights by the Turkish arm of occupation against the people of Cyprus as a whole."

Turkey, if in good faith could have sought a resolution of this unlawful occupation and its consequences. They have had four years to demonstrate their good faith. In the continuing absence of such a commitment and the continuing presence of human rights violations it is intolerable that this Administration would even suggest a change in the embargo.

To lift the embargo at this time would thwart the will of the people as expressed by the Congress. It would endanger our favorable relations with the people of Cyprus and Greece. Can we not expect their friendship to turn to hostility because of our abandonment and betrayal?

America's credibility is at stake. We must insist that Turkey show its good faith by negotiating a lasting peace on Cyprus including a reunification for those thousands of Greek Cypriots who are refugees on their own land and a full accounting of all missing Greek Cypriots.

The role America plays with respect to Cyprus will be a barometer which other nations will use to gauge the integrity and viability of our foreign policy. Our respect for the rule of law must not waver. Our insistence of respect for human rights cannot be compromised. Our pursuit of a lasting and just peace on Cyprus must continue.●

## ALHAMBRA—DIAMOND ANNIVERSARY

---

### HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. ROUSSELOT. Mr. Speaker, this is a season of jubilant celebration in the city of Alhambra which is located in the beautiful valley of San Gabriel in the Golden State of California. The people of Alhambra are observing the 75th anniversary of their city's incorporation. It gives me great pride and joy as the elected Representative of California's 26th Congressional District which includes the city of Alhambra to offer this tribute to a sturdy city which has, through private enterprise, grown from a small community of 600 residents 75 years ago to a thriving, important municipality with a population of more than 62,000 people within the city limits. The mayor of Alhambra, the Honorable J. Parker Williams, and other civic leaders have set up the Alhambra Diamond Anniversary Committee under which several community activities are scheduled where the notable event of the incorporation of the city of Alhambra will be officially recognized. The members of the Alhambra Diamond Anniversary Committee are: Mayor Williams; former mayor and city councilman, Steve Ballreich; executive manager of the chamber of commerce, Jackson B. Kuehnle; Alhambra Community Hospital administrator, David Jacobson; Alhambra Post Advocate editor and publisher, Warner Jenkins; Alhambra central business district manager, Richard Nichols; and businessman Pete Letourneau. The first event will be on April 22 when the Alhambra Jaycees will sponsor the annual Hi Neighbor Day parade. Luis Brambila is chairman of this 34th annual parade,

and George Ramos is general chairman and international vice president of the Alhambra Jaycees. I am honored to participate in this event and on this occasion I will present this insert from the CONGRESSIONAL RECORD noting that I have made the celebration of this significant event a permanent part of the record of the U.S. Congress. On July 11 the Historical Society of Alhambra will have a mock period dress celebration on the date of this city's incorporation. On September 24 the city will hold a community picnic with fireworks.

Mr. Speaker, I would like to tell you and my colleagues in the House of Representatives a little about the history of Alhambra, the city called the "Gateway to the San Gabriel Valley," as it appears in a publication distributed by the Alhambra Chamber of Commerce.

The principal part of the land within Alhambra's present boundaries was included in the 1771 grant made to Mission San Gabriel, 5 years before the birth of our Nation. There were no orchards or vineyards in the San Gabriel Valley then, only dry, uncultivated fields broken by arroyos and low-lying hills from the Mission San Gabriel west to the small Indian village called "Yang-na," which later became Los Angeles. According to 1784 records of individual land grants made by the Spanish Government, at least a portion of the land on which Alhambra was built was once part of 300,000 acres granted to Manuel Nieto.

One of the early founders was Benjamin B. Wilson, a 29-year-old Tennessean. "Don Benito," as he was familiarly called, married Ramona Yorba. Don Benito's oldest daughter, Maria, married a young engineer from Baltimore, James de Barth Shorb, and they were given a section of land adjoining the Wilson property as a wedding present. Shorb called it "San Marino," the name of his boyhood home in Maryland. I mention this because the city of San Marino is my hometown. The Huntington Library Art Gallery stands on the side of the Shorb home. Don Benito's wife died and he later married a widow, Mrs. Margaret Hereford. This is significant because they had four children, one of which was Ruth Wilson who became Mrs. George Patton, mother of the famous General George Patton, Jr. In 1874 Don Benito bought the land between the Arroyo and the Old Mill Wash paying the State $2.50 an acre. He divided the tract into 5- and 10-acre lots. Mrs. Patton and Mrs. Shorb who had been reading "Alhambra," Washington Irving's book of the legend of the Moorish palace in Spain, suggested that Wilson name his venture "The Alhambra" because it was so romantic. There were several other subdivisions of property, some of which bear names from Don Benito's family, one is Mount Wilson where the observatory is located.

After California became a State, Wilson held several political offices. He was Los Angeles County's first clerk, then he became mayor of Los Angeles. He was appointed as an Indian agent for the southern district in 1852 and the next year he became a State senator. Wilson died in 1878. By 1910 the population of Alhambra grew to 5,000 and in 1915 Alhambra became a chartered city, one of only a few in California at that time. Today Alhambra is a city of lovely homes, dynamic business and growing industrial strength.

No better description has been given of Alhambra than that of Rufus Fiske Bishop who recalled on the 50th anniversary of his arrival in the 1880's that—

Within what are now the city limits, there was not a schoolhouse, a store or a blacksmith shop. We saw a valley, wide and open, yellow with stubble, shimmering in the summer haze to the eastward, stretching from the blue mountains to the brown hills, with here and there a green splotch of young orchards and vineyard toward Pasadena or the foothills. That first spring we marvelled to see the slope (Altadena) ablaze with poppies and were told that ships steered their course by the bright color.

Mr. Speaker, I ask that you and my other colleagues in the House of Representatives join with me to offer our congratulations to the city of Alhambra on the occasion of their 75th anniversary.●

## THE VIETNAM VETERAN FROM ANOTHER POINT OF VIEW

### HON. L. A. (SKIP) BAFALIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BAFALIS. Mr. Speaker, I submit for the RECORD today a copy of an article from the VFW magazine entitled "A Credit to Nation." This article, written by Mr. Jack Bolander of the 10th District of Florida, deals with the testing of Vietnam veterans conducted by Col. Peter B. Petersen. I commend the results of these tests to my colleagues. They will certainly do away with many of the "theories" about the Vietnam-era veterans others would have us believe.

The article follows:

A CREDIT TO NATION

If anyone knows the American soldier and the Vietnam veteran, it is Col. Peter B. Petersen, who spent 13 years in the field and six years interviewing and testing 4,000 men before, during and after the Vietnam War.

Magazine articles and books denigrating the performance of American troops in Vietnam are especially annoying to Petersen, now on the Army staff at the Pentagon.

He calls a recent magazine series "inadequate and unfair to GI Joe and the veteran."

"One of the articles indicated the Vietnam veteran 'has a hole in his soul,'" Petersen remarked. "Well, that's bull. He doesn't have a hole in his soul. If you're talking about his boots, maybe, but not spiritually."

Petersen's 4,000 interviews and tests and six years' study culminated in a recent book, "Against the Tide," which Petersen says is an overdue reply to works he finds offensive and project unfounded generalities.

Describing his research methods, Petersen said:

"I gave questionnaires to soldiers in combat and then again to many of these men as veterans. The questionnaire deals with attitudes and is published by the Educational Testing Service at Princeton. Through the questionnaires, I found that the Vietnam veteran is very sensitive to his friends. It turned out that talk about the violent veteran and the post-Vietnam syndrome, meaning the guy comes back as a bum, was just not the case."

Petersen contends that his study contradicts the impression cultivated by some writers and publications that Vietnam veterans are psychological walking wounded.

"A major misperception by critics of the U.S. Army is that Vietnam veterans are disoriented and tend to be a detriment to society," he said. "The findings of my research project strongly indicate that this is not correct.

"The American soldier and the Vietnam veteran are a credit to their country and are men we can be proud of."

He said he has found that many unfair arguments are based on four misperceptions that training turns a well-adjusted, normal person into a robot; combat twists soldiers into virtual enemies of society; career soldiers are incapable of making it in civilian life, and privates are oppressed pawns, junior officers are naive and senior officers use situations to enhance their careers.

The unit Petersen studied, the 3rd Battalion, 60th Infantry, 2nd Brigade, 9th Division, was one of the many probed also during World War II.

"Many of the findings concerning GI Joe in WWII and Vietnam were the same and we can be proud of the results," he said.

In the study, three companies of the 60th Infantry's 3rd Battalion fought a Viet Cong main force company in the Mekong Delta on Feb. 14, 1969, using helicopters, artillery and Air Force jet fighter planes.

"In many respects, the procedures that were followed by infantrymen during WWII have changed drastically," he explained.

Technological advances have helped the infantrymen, but at the same time create disadvantages in a reliance on radio communications rather than face-to-face discussion and an arrival by helicopter that requires the soldier to orient himself rapidly, he said.

Petersen found the infantrymen he studied tended to be more sensitive to the needs of their friends in combat.

"Perhaps the daily stress of combat and adverse environmental conditions encouraged a feeling of comradeship that was welcome in Vietnam, but no longer needed after these men returned to the United States," he said. "It seems ironic that it takes the horror of war to cause individuals to become more sensitive in their interactions with their friends."

Petersen, a battalion commander in Vietnam, has come up with five observations, which he considers the most significant and combat veterans of other wars may find familiar:

These infantrymen tended to place a high value on what their peers thought of them. In combat, the importance to them of acceptance by their peers was often reflected in their lack of self-assertiveness in situations when they were encouraged by their superiors or by the nature of events to compete with their peers.

While involved in combat operations, these men appeared to have a strong identification with their immediate superiors.

The unselfish nature of the infantrymen observed was apparent, particularly in their genuine concern for their friends. The dependence on one another for safety in combat may have been a factor in this comradeship. In addition, individuals seemed to place an extraordinary value on tasks involving interactions with their associates and especially in participating in social activities with their friends.

A common complaint by these infantrymen was the frequency of changes in their com-

bat operations. Typical complaints were "hurry up and wait" and "not another change in today's plans!" Sometimes these complaints were justifiable, while at other times a change in the situation required a change in plans.

While in Vietnam, the infantrymen represented in the study seemed to dislike being considered ambitious. In many cases, competent and highly productive individuals avoided receiving the traditional military rewards that pertain to high status and prestige. Perhaps this was due to their desire to be one of the "boys" rather than to be considered a "hero" or "showoff" by their companions. Also, motivation to some degree may have been missing because of the type of war in which they were engaged.●

## CARTER'S EFFORTS IN SOUTH AFRICA BEING RECOGNIZED

### HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. EDWARDS of California. Mr. Speaker, during his last visit to South Africa, William B. Gould, the distinguished professor of law, Stanford University Law School, met with South Africans, both black and white, who are leaders in the struggle against apartheid. Even though success is not at hand, these civil rights leaders emphasized that President Carter's stand against the repressive Vorster government has given them encouragement in their battle for the eventual attainment of black majority rule.

Professor Gould outlines his discussions with these individuals in the following Los Angeles Times article. I hope that my colleagues find his remarks as informative and enlightening as I did.

The article follows:

CARTER'S EFFORTS BEING RECOGNIZED

While in South Africa last summer, I spoke with a good many people, cutting across a fairly wide political spectrum—black and white ranging from banned trade unionists to government officials. Some of the most memorable meetings were with individuals who play very different roles in the struggle against the Vorster government policy of repression.

One was Dr. Nthato Motlana who is now in detention. He has been the leader of the Soweto Ten, which attempted unsuccessfully to negotiate with the Nationalist government on effective local government for the black residents of Soweto. Another was Chief Gatsha Butelezi, the controversial leader of five million Zulu peoples, as well as the main force in its "cultural" organization, Inkatha, the only remaining voice of black opposition which is not presently banned.

And perhaps most important of all was a discussion that I had with Mrs. Winnie Mandela, wife of African National Congress leader Nelson Mandela, who is imprisoned for life on Robben Island. Mrs. Mandela had become a civil rights leader in her own right in Soweto before being banned in May of this year. Despite the variety of views and personalities, there was one common thread to the remarks—a recognition of the critical role that America plays in effectuating change in South Africa and a hopefulness about the intentions of the Carter administration in this effort.

Soon after I lunched with Motlana in late August, I recall telling an American friend in Johannesburg how fortunate South Africa was to have such a moderate and sensible black leader in a society where every black is subjected to daily indignity. He spent much time speaking to me of the Soweto student boycott against Bantu education, a system which provides blacks with one-sixteenth the financial aid given to whites and deliberately attempts to cripple them by teaching a tribal vernacular which is ill-suited to the modern industrial centers where English is the prerequisite. Motlana did not speak of black majority rule—although I have no doubt that he supports this idea, but rather focused on local government as well as education.

Butelezi—so fiercely criticized by the Black Consciousness Movement, of which Steve Biko was a leader, primarily because he accepted leadership in the Kwazulu government, the "homeland" for Zulus in South Africa—told me that he would "never" accept independence under the government's separate development policy as others have done. He told me that he could not support disinvestment or other economic sanctions because he has a responsibility for employment opportunities for his people.

But Butelezi strongly advocated other forms of pressure. Now he alone retains a platform on which to speak out to South African blacks. Said Butelezi of the government's October bannings, "It is an admission that the government of this country is by jackboots as far as blacks are concerned."

My meeting with Mrs. Mandela dramatized more than all else the position of blacks who dare protest government policy. Mrs. Mandela is under house arrest in Brandfort, banished to this remote town deep in the flat and uninteresting countryside of the Orange Free State, the heartland of Africanerdom, where the ruling Nationalist Party is strongest. She lives under curfew in a black township where no one speaks her language i.e., English and Xosha.

I drove out to Brandfort alone in a rented car in the early afternoon of Aug. 17, and arrived just on time for our 2 p.m. meeting. I did not know what to expect that day in a country where government surveillance is commonplace, and in a part of the nation where English—particularly with an American accent—can attract attention. I stood waiting on the sidewalk of this two-horse town, which seemed out of wild west movie—but there was no Mrs. Mandela to meet me.

However, the Security Branch of the South African police were there—equipped with earphones, which I am advised can monitor any conversation within half a mile. A friendly Jewish woman, whose family had come to Brandfort from Lithuania in 1938, helped me in my search for Mrs. Mandela, as the police sat in their car across the street. "Are you a Carter man?" she said. "Yes," I responded. "Well, he doesn't understand our situation here." And later, when I thanked her for her help, she said, "I hope that you will tell Americans that we are civilized here in South Africa."

An hour or so later, I found Mrs. Mandela. She had received a message stating that our meeting had been postponed. Both of us suspected that the Security Branch, whose officers sat behind us in a parked car during our entire meeting, were responsible.

For a woman who is in such isolation—she had been jailed frequently, and like Motlana, was imprisoned last year after Soweto, and is now being charged with and tried for violations of her banning orders—she was in remarkably good spirits. She told me that the Africaaner did not believe that blacks "had evolved" and that a "clash" over black-white inequities was made more likely by the degradation of Soweto and similar black townships throughout the country, whose tiny homes are now the living quarters for blacks of any economic station.

These three individuals, Motlana, Butelezi, and Mandela, differ in temperament and approaches. But they seem in agreement on one point, i.e., that the Carter administration had provided some measure of confidence to South African blacks which was not there previously. "Does Carter really mean it?" said Mrs. Mandela hopefully. "He must keep the pressure up," said Butelezi of the Carter administration's call for full political participation. And I shall never forget Motlana's last comment as we parted, "You Americans must pick the winners for a change."●

## "DON'T BLAME ISRAEL"

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. DORNAN. Mr. Speaker, the State of Israel devotes enough energy and resources to prepare against attacks by its enemies, that it ought not have to worry about defending itself against attacks by its friends. Yet judging by some of the implications of President Carter's Middle East policy, it is almost as if the White House is forcing Israel to worry about a second flank in its defenses. This time, it is a flank to fend off friends.

It is hardly friendly, though, for us to deny Israel the sale of arms and planes previously promised by us. It is hardly a friend of Israel which encourages the terrorist PLO by issuing pabulum-like statements of diplomatic reprimand at times when the Palestine Liberation Organization is earning nearly universal censure and disapproval. It is difficult to contend that we are Israel's staunch supporter when our President joins an Arab chorusline dancing to the tune of, "What's mine is mine, and what's yours is negotiable."

Throughout all of the less than friendly times when the White House has done or said something which naturally offends our staunchest Middle East ally, Israel has been understanding. But history has shown that no nation is so patient that there does not eventually come a point of diminishing returns, a time when a nation declares, "So far, and no farther." Israel is beginning to approach this line of resolve. As a friend of Israel and as an American concerned about his Nation's foreign policy, I implore the Carter administration to cease and desist in the apparent effort to blame Israel for the continuing Middle East crisis.

Mr. William Safire cataloged the administration's actions and attitudes which have led to our present two-faced relationship with our great and true friend, the nation of Israel. I hope that my colleagues will take the time to read it, and I hope that we will do everything we can as the legislative partners in the foreign policymaking process to get the administration to alter its present course.

The column follows:

Immediately upon his return to Lebanon from a meeting and photo opportunity with Andrei Gromyko in Moscow, Yasir Arafat sent his assassins into Israel to begin a new series of murders of Jewish civilians.

World response was instructive. U.S. Hodding Carter III at first dithered behind a

pretense of not knowing who did it. The Soviet news agency covered it as a daring military operation. Saudi radio hailed the attack at first, but after the Saudi ambassador in Washington was told such an attitude doomed his government's purchase of U.S. bombers, he frowned at the killers. Sen. John Glenn of Ohio, with fine even-handedness, labeled in advance the likely Israeli retaliation as similar "terrorism." Anwar Sadat remained silent for four days and condemned the raid just in time to be able to denounce the Israel response.

In light of that less-than-spontaneous moral indignation, it seems to me the Israeli answer was not only understandable but sensible. Not only will the murder of its citizens not be tolerated, but no place from which such attacks are planned and staged can be inviolate. Just as the U.S. refuses to permit Cuba its sovereign right to stock missiles capable of destroying American cities, Israel refuses to grant Lebanon its sovereign right to provide terrorists the base from which to attack Israel.

The result will be a five mile strip along the Labanese-Israel border under Lebanese sovereignty but Israeli protection for the time being; to avoid provocation of Syria, this is short of the "red line" (the Litani River) which Israel last year warned Syrian peace-keeping troops not to cross.

In sum, the Israeli reaction to the terrorist killings was not eye-for-an-eye reprisal but a strategic move to increase security along its northern border, a move quietly welcomed by PLO-terrorized Lebanese Christians.

That's not the way it's going to play, of course; in today's blame-Israel atmosphere, the PLOs campaign will be interpreted in the United Nations as proof that no peace can be made without meeting Arafat's terms, and the Israeli response will be treated as an opportunity missed to turn the other cheek for peace.

Our only democratic ally in the Middle East, has been getting a raw deal lately from Carter, who once scored points with Jewish voters in his televised debate with President Ford by promising not to have Kissinger-style "reassessment" of U.S. support for Israel. For example, the White House is going back on the U.S. word, given in writing in 1975, to provide advanced aircraft to Israel in return for Israeli withdrawal from strategic passes in the Sinai. The Israelis withdrew, fulfilling their part of the deal; but now Carter has made delivery of some of the aircraft contingent on Congressional approval of sales of the same aircraft to Saudi Arabia.

In plain words, that is a double-cross; Israel would never have withdrawn from the Gidi and Mitla passes without some counterbalancing security. Carter's new "package" not only reneges on our promise, but opens the door to a new threat to Israeli survival; the potential use of the most advanced American arms by Arabs against Jews.

Nobody calls it that, in Carter's White House; much mumbling is heard about delivery years from now, restrictions on which bases the planes will fly from, etc. Nonsense. For a generation, guns and planes and tanks supplied to Arab nations have been used for one primary purpose: to kill Jews who were defending Israel. To say we remain committed to the security of Israel while selling bombers to Saudi Arabia is to take leave of common sense. The same turning of truth on its head can be heard in Carter's blast at what he terms Israel's "abandonment" of UN Resolution 242, calling for the return of "territories." In 1967—long before Carter knew the whereabouts of the Mideast, at a time when Israel had a friend in the White House . . . the U.S. and Israel forced the specific article "the" out of that resolution; all concerned knew that meant Israel agreed to return some, not all territories taken from Arab aggressors. Sadat demands, and Carter agrees, that Israel agree to relinquish all or part of the West Bank before negotiations begin. Begin quite rightly says to hell with that. Israelis differ about what should be done about the West Bank (differences are only permitted in democracies, as Saudi princesses now know), but all agree that the Israeli defense line is the Jordan River, which includes the West Bank. And why should Israelis not have an equal right to buy and settle land along with their neighbors in an area where sovereignty is unclear?

Israel wants to make a deal in negotiations, not before negotiations. Some hope exists that Sadat may be getting ready to proceed without the presence of King Hussein. The least that America's Arabist diplomats can do is to stop bad-mouthing a "separate peace" and to start encouraging Sadat to lead the Arab world into a succession of individual peace treaties with the survival-minded nation he dared to recognize.●

## TEACHING THE HOLOCAUST IN NEW YORK CITY'S PUBLIC SCHOOLS

### HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. SOLARZ. Mr. Speaker, the current 9-hour mini-series, "Holocaust" has brought this whole tragic period of human history vividly into the public's view. All those associated with this mini-series are to be commended for their efforts to retell the difficult and horrible story of what happened in Nazi Germany and how far man's inhumanity to man can proceed. It must never happen again.

Thus the New York City Board of Education and its president, Mr. Stephen Aiello, are to be commended for their outstanding work in developing a permanent course on the holocaust for public high school students.

The concepts of racism, genocide, and national resistance epitomized by the holocaust effect all peoples everywhere, but for many New Yorkers and their families they are first-hand memories and experiences.

Six million European Jews were killed by Nazi Germany prior to and during World War II, yet some of our history books make but a brief mention of this unprecedented mass murder and the monumental bigotry that produced the holocaust. It is important for all Americans, and particularly for our children, that by looking at this historical event we come to a better understanding of the present and future dangers of bigotry, and the importance of human rights for all peoples.

In order to share the story of how a black project chairman, an Italian school board president, and a group of Jewish teachers developed and won support for this course on the holocaust I am submitting the following excerpts from an article by Dr. Perry Davis for reprinting in the CONGRESSIONAL RECORD.

I hope that other school systems will follow New York City's example, and that my bill, H.R. 11536 will eventually make such materials on the holocaust available to all elementary and secondary schools.

The article follows:

TEACHING THE HOLOCAUST IN NEW YORK CITY'S PUBLIC SCHOOLS

(By Perry Davis)

On October 6, 1977, at a press conference at 110 Livingston Street—headquarters of the New York City public school system—[announced] a new course for high school students: "The Holocaust, A Study of Genocide."

Just when one might have supposed that the "market" for Holocaust studies was drying up, when a generation of newer and more dazzling horrors had been brought to our homes via television, as guilt for participation, guilt for ignorance, guilt for silence were winding down—just then, it happened Elie Wiesel, and Lucy Dawidowicz, and a course started by students at Hampshire College, and a dozen other courses, and as many national and international conferences, and even Ph.D. programs in Holocaust Studies. Anwar Sadat at Yad Vashem. Perhaps a time of silence and repression was required, perhap not. That time is now, in any case, done. And the best evidence is that in troubled New York City, whose public school system is beset by problems budgetary and ideological, racial and curricular, there is now every prospect that henceforward each and every high school student will be required to spend not less than two weeks—in many cases, much more time than that—studying the Holocaust.

Nor is that prospect the product of a Jewish cabal. Jews have, of course, been centrally involved, but the story of how the New York City public schools have come to initiate the proposed program is not, essentially, a story of Jewish power. It is a story of urban coalition—lower case letters, no fanfare—and of teachers working at their tasks, of skilled and enterprising professionalism working its way up through a system.

The press conference . . . was called by the President of the New York City Board of Education, its Chancellor and its Director of Educational Planning and Support—an Italo-American Catholic, a Jew, and a black. It was the occasion for the announcement of the program, and for distribution of a new 461-page curriculum guide for teachers, product of years of preparation and thousands of manhours of work. Board President Stephen Aiello expressed the hope that after extensive experimental use this year and a summer of revision, the study of the Holocaust would become a mandated part of every high school student's course of study. . . .

Here and there, teachers in the New York system—as also in other scattered school districts around the country—have tried, over the years, to convey some part of the story and meaning of the Holocaust to their students. In several cases, the efforts have been unusually imaginative, the results most impressive. But these have been chiefly the products of private initiative. In New York City, as elsewhere, the Second World War is given brief attention in the curriculum, and there is at best only passing reference to the special case of the Holocaust. In fact, Diane Roskies, in her "Teaching the Holocaust to Children," reviews the work of other scholars who have sought references to the Holocaust in public school textbooks, and finds that in twelve out of fifteen of the most commonly used world history texts, there is *no mention at all* of the Hitler genocide. And when there is a reference, it may well be no more than the following typical example: "A generation now living knows that *thousands* of people were killed in gas chambers because they were a minority group in Germany." (Emphasis added.)

New York has the largest Jewish population of any city in the world. But out of 1.1 million public school students, the overwhelming majority are not Jews. (More than 70 percent are members of black, Hispanic, or other minority groups.) Yet there has been almost no curricular effort to break through the conventional stereotypes of the Jews which so many public school students share—images of the Jew as slumlord, as exploitive businessman, as paternalistic liberal. The Jew as contributor to American culture, the Jew as poor and elderly, the Jew as survivor, the Jew as dedicated teacher—these images are ignored. . . .

But many central school board officials and other community leaders disagreed. More than a year earlier, efforts to develop a Holocaust curriculum for the New York Public Schools had begun. (Because the city's population includes many Holocaust survivors and families of victims, the subject was more than history—it had a highly personal impact.

But beyond that, the concepts of racism, genocide, and national resistance, epitomized in the Holocaust, manifestly affect all peoples.) Dr. Seymour Lachman, then president of the New York Board of Education, met with community and Jewish organization leaders to discuss the creation of a Holocaust curriculum. An Orthodox Jew who had lost family in Nazi Europe, Lachman further explored the idea with the chief school administrator, Irving Anker, who agreed to proceed. Some months later, Lachman announced his intention to leave the Board.

Prior to his departure, however, he testified before the New York State Assembly Education Committee, which was conducting hearings to determine the need for Holocaust studies in the public schools, statewide. Citing the Holocaust as "the essential trauma of the 20th century," Lachman said, "at the very least students must know that the Nazis murdered six million Jewish men, women, and children."

He urged that a special unit be integrated into the social studies, and suggested supplementary curriculum and textbook materials. In addition, he asked that the State Education Department fund summer institutes to train teachers in the subject. He concluded, "The entire human race has been diminished by the Holocaust. Let it never again happen to any other people anywhere in this earth."

Then-Assemblyman Stephen Solarz chaired the hearings, and announced the introduction of legislation mandating Holocaust studies. (The following year, as a U.S. Congressman, he introduced similar legislation—H.R. 1136—before the House of Representatives, describing it as "a bill to direct the National Institute of Education to develop curricula concerning the destruction of the European Jewish Community by Nazi Germany prior to and during WW II, for dissemination to elementary and secondary schools.") Despite Solarz's best efforts, neither the State of New York nor the U.S. Congress enacted the measures.

Independently, however, the New York City Board of Education continued its efforts. Lachman was succeeded by his former special assistant, Stephen Aiello, who was actively committed to ethnic studies and to the Holocaust curriculum in particular. As progress continued in both areas, the Board and the Chancellor sought to separate the Holocaust project from the growing clamor for ethnic studies. The Holocaust was not to be taught as a Jewish history subject, but rather as a case of monumental bigotry, thus a key topic in value education.

*The Holocaust: A Case Study of Genocide* was published by the Board of Education in September, 1975. The 66-page experimental teaching guide, which included five model lesson plans, was written by the head of the Board's Social Studies office, Albert Post, and produced by the American Association for Jewish Education. Copies were sent to every high school with requests for limited tryouts and reactions. The response was mixed, but mostly negative.

Given the disappointing reception of the new curriculum, and the objections the matter might well have been shelved at that point. * * *

But the people who cared deeply. And at about the same time that New York was addressing the matter, Holocaust studies programs had been instituted in Lawrence and Great Neck, in Chicago, San Francisco, and in Philadelphia * * *. While the introduction of Holocaust studies could hardly be viewed as a competitive race, New York has always, with good reason, perceived itself as an educational innovator. Yet here, despite its uniquely rich resources, New York had obviously fallen behind. The central administration had tried, and had produced a mediocre product. What to do?

Jay Schechter is a New York teacher who didn't wait for a curriculum to be handed down from above. He was already teaching his students about ghettoes and Chassidim, Nuremberg laws and concentration camps. It wasn't easy for the young social studies teacher to explain Chassidic culture to his non-Jewish and largely non-white high school students. The Chassidim they saw in their neighborhoods seemed strange and foreign. Schechter, a member of the Association of Orthodox Jewish Teachers, looked for points of access. He brought in music from "Fiddler on the Roof" and *nigunim* of the Modzhitzer Rebbe. Soon, his students were actually dancing in the classroom aisles.

And at a Queens high school, Nancy Boyman was teaching a course on the Holocaust to more than 200 students a year. One of her lesson plans was a game called "Survive," developed by a rabbi in Kansas City, Missouri. Students are told that they are Jews living in America. A huge wave of anti-Semitism sweeps the country. Ghettoes are set up. Deportations begin and Jews suddenly disappear. "What do you now? the students are asked. They are given a list of options ranging from "Go to the authorities; claim you are not Jewish; trust that this is all a mistake" to "organize acts of sabotage directed at those organizations responsible for the persecution." Rigorous time limits are set. Students are told to organize themselves into families and come up with quick joint decisions. As the exercise continues, squabbles break out and feelings of panic fill the classroom.

In Brooklyn, at John Dewey High School, another teacher, Ira Zornberg, established a Holocaust center with a special state grant used to purchase audio and video taping equipment. Students met and filmed Holocaust survivors in their own communities. The victims described their experiences in the ghettoes and death camps. The school library was remodeled to house a Holocaust photographic and bibliographic exhibit, including newspaper microfilms and other materials from the Nazi period. * * *

These and other similar projects were quietly happening at a handful of New York's public high schools. Al Zachter, chairman of a social studies department, was instructing colleagues on the teaching of the Holocaust at special seminars. And it soon became clear, as pressure for a city-wide curriculum continued, despite the initial disappointment, that the best job would be done by teachers and administrators who were already doing it.

Schechter, Zachter, Zornberg, Boyman, and other teachers, some of whom were excused from their classroom duties, were asked to collaborate on the project during the 1976–77 school year. And the Kansas City game of "survive" and the music of the Modzhitzer Rebbe made it into the city-wide curriculum.

The project team was directed by Charlotte Frank, Florence Jackson, and Albert Post. By September 1977, *The Holocaust: A Study of Genocide* was finished. It consists of two parts. The first, 90 pages long, outlines the scope and sequence of the guide. It includes an annotated bibliography, lists of audio-visual materials, and sources for more information. Part two is 371 pages of actual teaching material to be reproduced for use in the classroom, accompanied by suggested lesson plans. The complete guide is adaptable for a mini-section within the world history course or as a full semester elective on the Holocaust.

Materials were collected from hundreds of sources and from publications ranging from the German "Anti-Semites Petition" issued in 1880 to an article on children of survivors which appeared in *The New York Times Magazine* on June 19, 1977.

The guide begins with a section on genocide and racism and includes a specific reading on the massacre of the Armenians by the Turks in the early part of this century. It dramatizes the ways in which the study of the Holocaust can alert people to present and future dangers of bigotry.

Describing European Jewry prior to the Holocaust, one lesson is devoted to the historical position of the Jewish ghetto, a concept quite different from the "ghetto" as it is understood by New York's inner city students.

The section on the Nazi takeover shows how school children in Germany were barraged with propaganda. Actual sample lessons are reproduced from Nazi textbooks.

The rise of anti-Semitism, and the groundwork for genocide, are documented through reproductions of vicious anti-Jewish cartoons. A child's identification card stamped with a large "J" is shown.

The implementation of the "Final Solution" is then described, including information on the concentration and extermination camps. A special section focuses on the murder of non-Jews by the Nazis and on the violent resistance efforts of Jews and non-Jews. There are children's drawings and poems recovered from liberated concentration camps. Rescue work is discussed—that of Father Roncalli, for example, later Pope John XXIII. And the American response is described. Students are asked to react to the cover design of Arthur Morse's book, *While Six Million Died*, a reticent Statue of Liberty with lowered torch.

The final section is titled, "How can the study of the Holocaust contribute to a more humane world?" and lesson plans involve issues of Nazi fugitives, the Eichmann trial, the Calley trial and the Vietnam War.

Though they were publicly quiet, some Jewish leaders expressed reluctance about the curriculum. None would be quoted, but some felt that the Holocaust was too sacred to study in public schools, while others feared it might provoke new anti-Semitism. In the main, however, Jewish reaction was positive. Larry Lavinsky, chairman of the New York Chapter of the Anti-Defamation League of B'nai B'rith, congratulated the Board and called the project "a major step toward the introduction of teaching about the Holocaust . . . and for making it part of the body of knowledge of all students."

A.D.L. was, at the same time, conducting its own conference on the teaching of genocide and the Nazi Holocaust in American secondary schools. At that meeting, Deputy Health, Education, and Welfare Commissioner Thomas Minter pledged greater support on the part of the Carter Administration for Holocaust studies saying, "this promise is wholly consistent with President Carter's emphasis on human rights."

Requests for the curriculum came from scores of school districts throughout the

United States and Canada. Interestingly, many queries came from Jewish day schools in the process of developing their own Holocaust courses.

Lieutenant Abe Kushner of the New York Police Department said that the curriculum would ease tension and that "the work might be adapted for use in police sensitivity training courses."

The Catholic Tablet praised the curriculum editorially: "Holocaust studies are a breakthrough. Their success should encourage another look at ways to strengthen public education's ability to further the total growth . . . of the citizens of tomorrow, the next generation of our city." . . .

The introduction of the Holocaust curriculum in the 70 percent minority public school system threatened to tax whatever fragile bonds existed between blacks and Jews even further.

Reverend Timothy Mitchell, Chairman of the National Conference of Black Churchmen, and the leadership of the New York Association of Black Educators opposed the Holocaust curriculum and objected to efforts to make the unit mandatory. They claimed that a similar requirement should be instituted to teach about racism and slavery in America . . .

Board of Education officials responded that studies dealing with slavery and racism were already integral parts of the American history curriculum and a State Regents requirement. Time spent on these subjects far exceeds the proposal for a two week minimum requirement for Holocaust studies. At the same time, Horace W. Morris, the Executive Director of the New York Urban League, praised the project, as did the Urban Coalition. The entire Holocaust curriculum project was supervised by Dr. Arnold Webb, a respected and sensitive black educator. Webb wrote the introduction to the two-volume work. He cites several examples of genocide but notes that the specific case of the Holocaust was selected because "in this tragic chapter in human history, the intent and scope of mass murder are unprecedented." Further, he states, the subject "is almost too serious for classroom study. Yet the horror of genocide in the 20th century must be faced, and the story must be told so that students of all races and religions in our public schools can understand the danger confronting all peoples when human rights are denied to any one people."

In a curious way, then, the story of how the New York City public school system has come to this point in developing a mandatory curriculum for Holocaust studies provides a lesson almost as important as the materials themselves. Group pressures, trial and error, private initiative, the energy of decency—these are all aspects of a process that is its own insurance against a repetition of the horrors the curriculum describes. A city in which a black project chairman and an Italian school board president and a group of Jewish teachers can bring a project on the teaching of the Holocaust to fruition can scarcely be thought bankrupt.●

## INCREASED GOVERNMENT REGULATION OF SHIPPING INDUSTRY

### HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. McCLOSKEY. Mr. Speaker, the House Merchant Marine and Fisheries Committee is now considering legislation of far-reaching consequences for the American merchant marine, including measures to authorize closed conferences and shippers councils, limit the entry of the Soviet-flag merchant marine into our trades, and facilitate cargo reservation agreements between U.S. carriers and the flag carriers of our trading partners.

One, perhaps unintended, effect of all these bills is to expand the power of the Federal Maritime Commission and thus increase governmental regulation over a shipping industry whose creativity and efficiency is already being stifled by excessive regulation.

In order to consider another approach, I am introducing legislation today that will abolish the Federal Maritime Commission and transfer its primary functions to the Office of the Special Representative for Trade Negotiations. The bill will also create a Deputy Special Trade Representative for Maritime Affairs, transfer the Commission's existing authority over financial liability certification to the Department of Transportation, and transfer Commission authority over the domestic trades to the Interstate Commerce Commission.

In the big question presented in pending legislation of competition against stability in the liner trades, I tend to support the stability approach. Yet, I would like to see this happen, without at the same time, creating ever-greater regulation. I hope this bill's introduction will spark discussion of this fundamental question: Can we have a regulatory system which minimizes governmental regulation, permits a maximum of free competition, and permits business to adopt its own code of ethical conduct and self-regulation? I have already written many in the maritime industry to request their suggestions for a precise set of rules for ethical conduct, self-regulation, full disclosure, reasonable return on investment, and fair dealing with shippers councils.

This will make it practical to abolish the Federal Maritime Commission and rely primarily on self-regulation, with a strong maritime backup capacity in the Office of the Special Trade Representative to promote and protect U.S. carrier and shipper interests. I offer this as a part of the mix of maritime legislation being considered in the Merchant Marine and Fisheries Committee, and invite its consideration by my colleagues.●

## EMINENT MAYOR RETIRES

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. STARK. Mr. Speaker, I would like to take a moment to pay tribute to Jack Maltester on the occasion of his retirement as San Leandro, Calif.'s first mayor.

Mr. Maltester's dedication to the needs of San Leandro are legendary. During his 20-year tenure as mayor he truly watched this city come of age. His unselfish giving of time and attention has made San Leandro a better place to live and has been an inspiration both to those who served with him and to the whole city.

In addition to his 20 years as mayor of San Leandro, Jack Maltester has also given untiringly of himself to many other civic causes. This community service spans 36 years and ranges from neighborhood causes, to various civic organizations, to local, regional, State, and national governmental service. Some of the highlights of his career in public service include:

Presidential appointments by both Presidents Johnson and Nixon to the Commission on Intergovernmental Relations.

President of the United States Conference of Mayors.

President of the Bay Area Governments.

President of the League of California Cities.

Presidential appointment to the Board of Directors of the National Center for Voluntary Action.

Chairman of the East Bay Dischargers Authority.

This listing of only a few of the many and varied offices Jack Maltester has held is perhaps the finest tribute to an extraordinary man who has commanded the respect and confidence of Presidents, Governors, and his neighbors. Though he is retiring as mayor, we will continue to call on his wise counsel and leadership in the years to come.●

## RABBI MOSHE BOMZER

### HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BURKE of Florida. Mr. Speaker, Rabbi Moshe Bomzer gave the prayer to open today's House session. I am sure many of my colleagues were impressed with his words and inspired by his thoughts.

The people of south Florida have had the pleasure of Rabbi Bomzer's wise counsel for the past 3 years. Specifically he is the spiritual leader of Young Israel of Hollywood, Fla., a teacher at the Hebrew Academy of Greater Miami, and a student in Rabbi College School of Social Work in Miami. He has a master's degree in Jewish philosophy and is a graduate of Yeshiva University.

It is a pleasure for me to have Rabbi Bomzer visit our Nation's capital. He is an understanding leader of the Jewish community in south Florida, and an articulate voice in spiritual matters for all of the Jewish faith. Like his father before him, who is also a rabbi, but from Brooklyn, N.Y., Rabbi Bomzer is dedicated to serving his fellowman and seeing to his spiritual well-being.

The TV serial entitled "Holocaust" is being shown this week nationwide. It deals with the problems faced by the Jewish Community in Europe during the late 1930's and early 1940's. It is a harsh reminder of man's inhumanity to man, and of the particular cruelty to which

Jews have been subjected because of their faith.

Good people, and good leaders know that education and remembering the past are the only keys to preventing future calamities. The work of Rabbi Bomzer in south Florida may seem unrelated to the TV movie, but he is preserving and nurturing the faith that sustained the Jewish people for centuries.●

## OPPOSITION TO PANAMA CANAL TREATIES

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. GILMAN. Mr. Speaker, as the ranking minority member of the Subcommittee on Inter-American Affairs of the House Committee on International Relations I have had a long-standing interest and opposition to the proposed Panama Canal treaties. Through extensive hearings by our committee and as a result of first-hand experience gained during two study missions to Panama, I have had the opportunity to become fully acquainted with the important issues in this debate.

With regard to the merits of the canal treaties, I am convinced that our Nation will be committing a grievous error in giving up our interests in the canal. The canal is important to our Nation's commerce and to our national security.

But, in addition to the substantive issue there is also a significant procedural question for both proponents and opponents alike, relating to the constitutional authority of the House of Representatives in the disposal of U.S. property.

As proposed to the Senate, the Panama Canal treaties would provide for turning over of the canal and Canal Zone to the Republic of Panama through two self-executing treaties. This approach, which would evoke only formal ratification by the Senate, denies the House of Representatives its legitimate constitutional role in the disposition of U.S. property, as stated in article IV, section III, clause II:

> The Congress shall have the power to dispose of, make all needful rules and regulations respecting the territory or other property belonging to the United States.

The exclusive power of the Congress to dispose of U.S. property has on numerous occasions been affirmed by the Supreme Court. As held in a unanimous decision by the Court in *Utah Power and Light Co.* v. *the United States,* (1916, 243 US 389), "the power of Congress to dispose of U.S. territory is exclusive." More recently, the Supreme Court reaffirmed the congressional authority in the disposal of U.S. lands:

> Since the Constitution places the authority to dispose of public lands exclusively in Congress, the executive power to convey any interest in these lands must be traced to a Congressional delegation of its authority. *Sioux tribe of Indians* v. *United States,* 316 US 317 (1942).

In an era of increasing concern about the need for a proper balance of power between the legislative and executive branches of Government, the proposed canal treaties threaten to undermine the constitutional role of Congress in the transfer of U.S. property.

The executive has not only failed to seek full congressional authority, but has drafted the treaties to specifically avoid participation by the entire Congress (through the use of self-executing treaties). This decision, unless reversed, will create a dangerous precedent in the lawmaking process that excludes the House of Representatives from fulfilling its rightful constitutional role.

These serious threats to our representative form of government have caused a great deal of concern among other Members of the Congress. Some 237 members of the House, including myself, have cosponsored House Concurrent Resolution 347, a resolution by the gentleman from Idaho (Mr. HANSEN), which prevents any transfer of rights or property in the Panama Canal Zone without an act of Congress. These 237 Members represent a majority of the House of Representatives, including over 100 members from each party and supporters of both protreaty and antitreaty views. To these members, the issue at stake is separate from, and of greater concern than the proposed transfer of the Panama Canal.

A failure to protect the constitutional role of the House of Representatives will result in the establishment of a precedent that reaches far beyond the question of the canal. A noted authority on the Constitution, Prof. Raoul Berger of the Harvard Law School, remarked in his testimony before the House Subcommittee on the Panama Canal:

> . . . the Panama cession will constitute a landmark which . . . will be cited down thru the years for "concurrent" jurisdiction of the President in the disposition of of United States Property . . . Acquiescence in such claims spells progressive attrition of Congressional powers. Your insistence on respect for Constitutional boundaries will warn the Executive against encroachment on the power of Congress, it will alert foreign nations to the fact that treaties for the cession of United States property must be subject to the consent of the House as well as the Senate.

The consideration of the proposed Panama Canal treaties presents two significant questions: The first goes to the merits of the proposed transfer of the canal to Panama, the second concerns the delicate balance of power between the branches of Government as provided for in the Constitution and through historical precedent.

Accordingly, Mr. Speaker, regardless of our views on the merits of the proposed canal treaties themselves, I urge my colleagues in the Congress, both in the Senate and in the House to support all efforts to safeguard the historic, constitutional role of the House of Representatives as an equal partner in the Congress and to protect its proper role in the consideration of these important treaties.●

## COAL POLICY CONFERENCE

### HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. APPLEGATE. Mr. Speaker, this past weekend, I had the welcome opportunity to meet with various officials of the coal and steel industries, the Ohio State government, including Gov. James Rhodes and the general public in what was called a coal policy conference. The main theme of the meeting was the effect of present environmental standards on industry in Ohio and in turn, their effect on our economy. To say the least, it was most interesting.

About 3 weeks ago, I stood here and spoke to my colleagues about the loss of jobs and a declining economy that I directly related to exceedingly stringent environmental rules and regulations. While the emphasis of my statement was on my 18th Congressional District of Ohio, I am sure many of my colleagues experience the same problems, but perhaps to different degrees.

We, in Ohio, are at an extremely critical point in our history. Because of mandates from the Federal Government to comply to very strict standards in the area of air and water quality, we have suffered tremendous economic damage. The economy of the state will collapse if the present Federal policy is not changed, and changed soon.

A typical example of our problems are coal controls between mines and utility companies that are cancelled because the utility cannot burn the high sulfur content of coal we have in Ohio. When a contract is cancelled like this, which has just recently happened, hundreds of people lose their jobs. Further, it has a rippling effect throughout the area. If enough mines shut down, the effect will be felt statewide.

An additional side-effect from all of this is the higher utility prices we must all pay because of higher priced, lower sulfur content western coal. Utilities are going west to mine the coal, but the added costs for this are merely passed on to the consumer.

Mr. Speaker, the time has come for us to quit playing games with our economy. Therefore, I urge a three-year moratorium on the implementation of clean air standards. It is estimated that this will provide scientists enough time to develop an economic and practical way of cleaning Ohio coal. I join with my Governor in this plea and intend to make my thoughts on this known to President Carter and Mr. Douglas Costel, Director of the Environmental Protection Agency.

We all must realize what is at stake here. The future of coal, the power resource we must depend on in the foreseeable future, is very much in doubt. If we are to ever become more energy-independent. we must take steps now that will allow us to use all the coal that is available, regardless of sulfur content. This moratorium is the first step in that direction.●

"YVONNE EWELL, THE SUPEREDUCATOR"

## HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. MILFORD. Mr. Speaker, today, I am hosting a tea in honor of Ms. Yvonne Ewell, associate superintendent of the Dallas Independent School District, a leading Texas educator and one of national recognition.

This tea is part of the "1978 Education Tour of our Endeared Capitol" sponsored by the Theodore Lee Social Dynamics Club of the Oliver Wendell Holmes Middle School-Academy in Dallas.

A devoted educator, Yvonne has been a great achiever and has contributed much to the field of education. She began her teaching career in 1947 as an elementary school teacher in Ladonia, Tex. before moving to Dallas in 1954.

She has taught at the elementary, secondary, and college levels, and is experienced at curriculum development and supervision. Yvonne is a member of both the Texas Association for Supervision and Curriculum Development as well as the National Association for Supervision and Curriculum Development.

She has been a very active member in several professional organizations including the local Dallas School Administration Association, Texas State Teachers Association, National Education Association, National Black Educators Association, and the Association of American School Administrators.

Yvonne's interests are not limited to education. She is very active in civic and community activities. She has served on the national board of the YWCA, the board of directors of the Dallas Museum of Fine Arts, the Dallas Childcare Association, the American Heart Association, and the advisory board of the Shakespearean Festival of Dallas.

She is also a member of the NAACP, Delta Sigma Theta sorority, South Dallas B & PW club, and attends the Munger Avenue Baptist Church.

Accompanying her on her tour of the Nation's capitol, are the eight officers of the social dynamics club. They are Kathy Yeldell, president; Sherva Sanders, first vice president; Sarah Woods, second vice president; Jackie Teal, third vice president; Alicia Jimenez, secretary; Tammi Rowley, versatility; Carl Childs, transportation; and William Jones, transportation.

Student sponsors for the group are science teacher Ms. Eddie Williams and secretary Ms. Opal Jones both of the Oliver Wendell Holmes Middle School-Academy.

Recently organized, the club provides seventh and eighth grade students "experiences through living situations" through educational tours. Dr. Ralph Wootton, who created the club, said the group has enjoyed tours of Baylor University Hospital and Channel 4 TV station with a tour of Braniff International in the works.

Finally, Mr. Speaker, Ms. Ewell was chosen for the "1978 Education Tour of our Endeared Capitol" for her dedication to her job and the example she provides for the students she loves. She is truly an educator who puts the students' needs first.

We are seeing more and more women in the professional world. Yvonne Ewell is a woman on the move, and I believe she typifies what is happening in the United States today. Women are on the move, and this is one Congressman that is glad to see it.

For her enthusiasm and devotion to the 40,000 young people in the East Oak Cliff Subdistrict, Ms. Ewell is highly deserving of public recognition.●

MIKE RODAK RETIREMENT

## HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. APPLEGATE. Mr. Speaker, at the close of every school term, another one of which is nearly here, there are those teachers and school personnel who will not return the following September because of retirement; and in most respects this year will be no different. However, every so often, a particular retirement is noted and does make a difference. In this way, Mingo High School in Mingo Junction, Ohio, will never be the same again. After 28 gratifying and rewarding years, Mr. Mike Rodak is retiring.

A 1935 graduate of Weirton, West Virginia High School, Mike entered Western Reserve University where he was an outstanding athlete playing 3 years of varsity football at the right halfback position and holding the heavyweight wrestling and boxing championships. After college, he played pro football for the then Cleveland Rams, Detroit Lions and Pittsburgh Steelers.

After completing a stint in the service, Mike returned to the Upper Ohio Valley to coach for 2 years at Wellsville, Ohio High School before moving on to what was to be his home for the next 28 years. During this time he has watched several generations of students and athletes grow up.

Mike did more than just watch though. It was through his endeavors, that the counseling and guidance program was started at Mingo. He cared about the students he taught. He did not make decisions for them, but did what he could to see that they had all the facts needed to make the right decision for themselves. Mike Rodak is a complete teacher; one whose long experience with life serves him well in every area of instruction. Thanks to it, his students have gone on to become doctors, lawyers, clergy and even a superintendent of schools.

But more than that, they have—thanks to Mike Rodak—gone on to become something even more important—valuable human beings who care about life and those who share it with them.

Mr. Speaker, Mike Rodak will miss Mingo High School and those whom he taught and worked with, but not nearly as much as they will miss Mike Rodak.●

B–1 BOMBER

## HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. DORNAN. Mr. Speaker, the B–1 has been dead for several months now. The arguments and counterarguments have all been heard and will soon be gathering dust in archives as the B–1 plans themselves will be. Although, when Strategic Air Command planners turn to their giant computers for what a B–1 follow-on (B–2) should look like, their computers spit back "B–1." The giant cyber computers will give that answer through 1981.

Of all the arguments we have heard in support of the B–1 aircraft, none carries more weight than that of the renowned "Jane's All the World's Aircraft" and its editor, John W. R. Taylor. During the many months we debated the B–1 case, Mr. Taylor was more than generous with his valuable time and vast knowledge of aircraft and air defenses of all nations. His insight and analyses were invaluable to those of us who believe the B–1 to be the finest aircraft yet built.

After the final defeat, I wrote again to John Taylor, expressing my thanks for his help and long work. His response to me was gracious and included yet more information and rebuttal of the administration's latest claims for the cruise and assertions about manned penetrating bombers. As with his other analyses this rebuttal of the most recent Department of Defense claims, was clear and irrefutable.

Although the fight is over, I would like to thank John Taylor again here in the CONGRESSIONAL RECORD and to record his latest evaluation of the B–1 decision for congressional scholars who may read these pages in the future.

I insert in the RECORD Mr. Taylor's letter to me and his comments on the 1979 Department of Defense annual report published under the name of Secretary Harold Brown as part of my remarks:

Congressman ROBERT K. DORNAN,
*Congress of the United States, House of Representatives, Cannon House Office Building, Washington, D.C.*

DEAR BOB: I greatly appreciate your kindly comments in your letter of 13th March. As you say, it is hardly conceivable that the B–1 has gone forever. The alternatives appear to be so costly and so far away that they make no sense at all.

In view of what has happened during the past couple of months, most of America's friends in Europe tend to feel that the West's defences are crumbling to such a degree that we can never again feel secure as a result of balanced East/West power. Perhaps this is being excessively gloomy. Experience in the past has shown that the West is able to conceal new developments as fundamental as jet aircraft and the atomic bomb, and use them in action before the secret is out. However, if we have abandoned weapon systems like the B–1,

safe in the knowledge that we have far more effective weapons available, wrapped in tight security, I am afraid that this can only be viewed as a policy so dangerous as to be an invitation to disaster. A deterrent only deters if it is seen to exist. The more terrible weapons might only be revealed after they have been used, which would benefit nobody in the world.

For this and other reasons, I had decided that there was no point in pressing further with my transatlantic campaign on behalf of the B–1. However, you are at liberty to use the enclosed comment in any way you wish. It would be wonderful to believe that it is not all too late.

Keep in touch, and let me know if I can ever be of any further assistance. I feel that it is only by keeping up the pressure that we will avoid having to change the headings on our notepaper to a cyrillic type face.

Every good wish,

Sincerely,

——— ———.

Everything I read suggests that the cruise missile will continue to be regarded primarily as a weapon for use against undefended targets. I challenge anyone to tell me where and what such targets might be in the Soviet Union. The B–1 was designed to penetrate to *any* target, defended or not, and to destroy it.

There are many interesting statements in the FY 1979 Department of Defense Annual Report published under the name of Secretary Harold Brown:

Page 51: "We now expect to see the first prototype of a new modern (Soviet) heavy bomber in the near future".

How will this be dealt with in the SALT negotiations? Will the US suggest, as they have done with 'Backfire', that its flight refueling probe should not be fitted and that it should be used only tactically (Scouts' honour!). In this case, it might be added that the fuel tanks should never be more than half filled.

Of interest is that the Soviet Union clearly considers a new manned strategic bomber essential (as do the USAF Chief of Staff and Vice Chief of Staff). Your discarded advantage is that you already have such an aircraft, very largely developed (at very high cost), in the B–1.

As a side comment, we in Europe do not greatly admire the US definition of a 'strategic bomber' as one which can bomb the continental US from the USSR. We consider it strategic if it can attack us!

Page 51: "There is no current evidence that the Soviets have developed a cruise missile comparable to our ALCM, although we believe they could do so within the next five-to-ten years."

If, presumably, they wanted a weapon to attack the Grand Canyon. Being serious, most targets in the US are on the seaboards, or not too far inland. A weapon like the new (*very* high speed) Soviet AS–6 'Kingfish' would be much more effective than an ALCM of the US pattern. Ability to penetrate and destroy is more important than long range for Soviet air-launched missiles.

Page 65: "Our main insurance (against Minuteman force vulnerability) will come from the SLBM and heavy bomber forces . . . Later-model B–52s will give us the necessary platforms for both the ALCM and defense penetration in the near-term future."

"Near-term" is new; it was suggested earlier that the B–52s, already averaging 19 years old, would last out the century. How near is "near"? General George Brown's FY 1979 Posture Statement (page 14) states that already "the Warsaw Pact dominates NATO in a number of relevant capabilities, such as chemical warfare and *electronic warfare*". Could a B–52 *really* penetrate the present Soviet defences, bearing in mind that the SALT protocol has made the launch areas for ALCMs easy to determine, in view of their limited range and the distance of their targets from the Soviet borders.

Somebody seems already to be having second thoughts . . .

Page 65 again: "To hedge against longer-term needs, we now plan to continue RDT&E on the B–1 and also plan to explore a number of possible options for other penetrating bombers."

What's wrong with the one you have—the B–1, which represents the limit of current state of the art? Its development funding has already been spent; why start again, on something that could only be more expensive still?

The answer to that "why" is, of course, an election promise that should never have been made. Alternatively, the man who made it should admit that then he was wrong. According to AEROSPACE DAILY, in his first public comment after the House vote against building the fifth and sixth B–1 bombers, Defense Secretary Harold Brown told a House Budget Committee task force "we're not foreclosing" another manned penetrating bomber. "We're just saying it's not going to be the B–1."

We partners in NATO might well be excused for saying "God help us all" at such an attitude. The economical answer would be to buy one can of paint and a brush, and inscribe "B–2" on the nose of each of the four prototypes—*then* put the best bomber in the world into production as quickly as possible.●

## NATION'S PRIORITIES

### HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. CLAY. Mr. Speaker, there is an increasing awareness across the country of the impropriety of this Nation's priorities.

I wish to take this opportunity to share with my colleagues a resolution addressing this matter which was passed by the St. Louis Board of Aldermen on March 17, 1978.

RESOLUTION NUMBER 124

Whereas, the domestic needs of our nation will never receive the major attention they deserve, or the financing they require until there is a re-ordering of our national priorities; and

Whereas, President Carter, despite his campaign promise to reduce military spending, has requested a $10 million *increase* (3.4% real growth above inflation) for the Pentagon while allowing most employment, community development and social service programs to *lag behind* the rate of inflation; and

Whereas, a responsible policy requires that if we advocate increased spending for domestic human needs programs we must indicate where such funds must come from; and

Whereas, the need for increased government funding of programs to combat St. Louis' unusually high rate of unemployment, infant mortality, lead poisoning, etc. is all too well known;

Now therefore, be it resolved that, this Honorable Board of Aldermen calls upon Congress and the Administration to:

(1) redress the imbalance between domestic expenditures and expenditures for the Pentagon by transferring funds, such as is called for by the Congressional Transfer Amendment. The thrust of the transfer process is to move money from programs not necessary to our national defense to programs that address human needs in ways that are *accountable* and *responsive* to the problems of people in our communities, and

(2) establish a national conversion program that provides for retraining and employment guarantees to former defense workers and to provide for the economic revitalization of communities and industries affected by reductions in defense spending, and

Be it further resolved that copies of this resolution be sent, upon adoption, to the President and members of the Missouri Congressional Delegation.

Introduced this 14th day of March, 1978 by:

BRUCE T. SOMMER,
*6th Ward Alderman.*●

## RARE II—TOO LITTLE OR TOO MUCH EXPECTATION COULD BE FATAL

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BONKER. Mr. Speaker, roadless area review and evaluation (RARE) II is a fragile, but potent, creation.

Either indifference to its purposes or excessive expectations for its potential can bring failure that would leave the Nation with more problems than existed before RARE II came along.

Overall, the timber supply outlook in the West is not especially bright. Adequate timber management and reforestation money for the Forest Service continues to encounter budgetary resistance. Log experts are draining logs from the domestic timber supply. And the Federal Government should be doing more to help nonindustrial private timber land owners realize the vast potential productivity of their lands.

RARE II could compound these problems by leaving more roadless lands than ever tied up in a protracted and uncertain planning process. However, Assistant Secretary of Agriculture Rupert Cutler, who is directly responsible for RARE II, has suggested to the House Interior Appropriations Subcommittee that RARE II might produce 10 million acres of wilderness and return 20 million acres to multiple use management. The prospect of such an achievement makes RARE II worth the effort, especially in view of the alternative.

The wilderness issue must be settled as quickly as possible so that emphasis can shift to the business of managing the national forests to the maximum benefit of all. RARE II could help that process along.

RARE II cannot and will not settle—once and for all—more than a decade of controversy over national forest roadless areas. The overriding purpose of RARE II is to expedite decisions about the future use of some national forest roadless lands. Success depends solely upon the "areas of agreement" found among conservationists, the timber industry, and other interested user groups. The roadless issue will be laid to rest only on those lands that are mutually acceptable either for wilderness preservation or for multiple use management.

Emotional posturing over preservationist lock-up versus rape-of-the-land logging will not do the job. Neither will an attitude that RARE II is a process

not worth conscientious participation. The key to success lies in good-faith negotiating based on solid, site-specific analysis of resource tradeoffs.

If confrontation, rather than accommodation, characterizes RARE II through the rest of 1978, there will be more administrative appeals, more litigation, and more delay.

The genesis for RARE II came in June 1967, 3 years after passage of the Wilderness Act, when Forest Service Chief Ed Cliff ordered preparation of an inventory of all national forest roadless areas. Repeated prodding made the bureaucracy produce, late in 1972, the first inventory of 56 million acres scattered among 1,448 roadless areas.

This process was in trouble from the outset. The Wilderness Society and the Sierra Club raised 10 major objections. They were especially alarmed by Forest Service plans to declare summarily that the bulk of the identified roadless lands were unsuited for further wilderness consideration. They also contended that the inventory had missed many roadless areas. Court action commenced before the Forest Service agreed to prepare environmental impact statements on all identified roadless areas before opening them to development.

In January 1973, Chief John McGuire placed 274 roadless areas encompassing 12.3 million acres on the official chief's list of new wilderness study areas. In accord with the original Wilderness Act, McGuire predicted that 10 years of study would ensue before determinations on these outstanding candidates for wilderness designation are completed in 1983. All new study areas were wthdrawn from allowable cut calculations. In the meantime, of course, the other 43.7 million acres of inventoried roadless lands would remain in limbo for varying periods of time. Their allowable cut contributions were not withdrawn, but their wilderness qualities were insured interim protection.

Last year, President Carter concluded that these decisions need not take so long. He also agreed with critics who said the original roadless inventory was inadequate. RARE II was the result.

The roadless inventory is now up to 1,920 areas encompassing 66 million acres. The draft environmental impact statement on RARE II should be available June 15. One document will cover the national aspects of the program. Twenty-one others will be site specific statements—one for each of the 11 western states and Alaska and nine covering the rest of the United States. A final impact statement will be published around the end of the year, and legislative recommendations will go to the new Congress early in 1979.

The critical time comes during the summer and early fall when the Forest Service has pledged an active search for those crucial areas of agreement.

How much wilderness is enough? The first Resources Planning Act (RPA) plan in 1975 set a national forest wilderness system target of 25 million to 30 million acres. That target is now undergoing review for the 1980 RPA update.

Assistant Secretary Cutler told the Interior Appropriations Subcommittee that he does not expect the total to go beyond 35 million acres.

Senator FRANK CHURCH, one of the authors of the Wilderness Act, recently said:

> How much wilderness is enough? The better question, perhaps, is how much is feasible, given our need for wood products, minerals and other uses. I would guess about twice as much as the 40 million to 50 million acres anticipated in 1964 when Congress passed the Wilderness Act—which is about half as much as ardent wilderness proponents want. At the beginning of 1977, 62.5 million acres were either classified as wilderness, proposed to Congress for such classification or reserved for future wilderness study. If these areas are incorporated into the wilderness system, that would leave an additional 20 million to 30 million acres (excluding Alaska) to be taken from the remaining 145 million acres of roadless lands.

Yet, 35 million acres is a lot of land, and these statements belie cries of alarm from some quarters that all 66 million acres of the RARE II inventory will be locked up forever. This is especially true since millions of acres of officially designated wilderness already exist within the national forest system.

As a westerner, I have strong concerns about the local and regional impacts of wilderness. I have counseled those in my State who criticize wilderness designations to remember, however, that a solid, broad base of support for the wilderness principle exists nationwide.

The recent record makes that clear. Industry groups mounted major campaigns in the 95th Congress against three preservation bills: The Endangered American Wilderness Act, the Montana Wilderness Study Act, and Redwood National Park expansion.

The results: The Endangered Wilderness bill passed the House, 380–18, and the Senate, 89–3. Redwood National Park was expanded by unanimous consent in the Senate and by a 328–60 vote in the House. And the Montana Study Act cleared the Senate by a voice vote before the much-touted but very temporary "defeat" in the House. The so-called defeat was actually a 256–155 majority in favor of the bill but was not the two-thirds vote required by the parliamentary situation. This marked the first time in the history of the Wilderness Act that any wilderness bill had lost a floor vote in either House. Three weeks later, the bill passed the House on its second try, 305–103.

There is, of course, a point beyond which continued expansion of the national wilderness system will tip the national scales in opposition. Recent public opinion polls and those recent votes in Congress imply that such a point lies a long, long way in the future.

On one point, all concerned can agree: Regardless of the eventual impact of wilderness designations within the national forests, much more can and should be done to intensify the management, and ultimately the multiple use outputs, of nonwilderness lands. Creative new incentives for owners of nonindustrial private lands can also help us realize the enormous potential of neglected nonindustrial private lands that can and should be making major contributions to our timber supply. Finally, there are those like myself who are concerned about the continuing diversion of domestic timber supplies to log exports.

I am sponsoring a bill, H.R. 7972 that would phase out substitution of Federal logs in the Western United States outside Alaska and would write into permanent statute the Federal log export ban that has been part of the annual appropriations bill every year since 1973. Its passage will send an important message to Japan about the need to develop markets there for U.S. finished wood products.

Every member of the northwest congressional delegation strongly supports sufficient appropriations to permit the Forest Service to maximize its timber management and reforestation programs. Unfortunately, the executive branch continues to resist. Incredible as it may seem, socalled experts in the Office of Management and Budget still believe that timber management is not a wise investment of public funds.

This does not make the task easy. Last year, the administration ignored its own RPA goals for timber management Congress pumped another $240 million into the Forest Service budget to bring all programs up to 85 percent of the RPA goals. But the message did not get through.

Budget requests for the upcoming fiscal year dropped back to 60 to 70 percent of the RPA goals, which for timber meant an 11.5 billion board foot allowable cut during fiscal year 1979. House and Senate researchers have already recommended increases that would raise the cut to 12.2 billion or 12.5 billion board feet. With RPA showing a potential of 16 billion board feet, a big job remains to be done. But there has been a beginning.

The timber production potential of private, nonindustrial timber lands is well documented. This diverse group of owners of smaller land holdings needs new incentives to produce timber in ways consistent with their individual property ownership plans and goals.

The General Accounting Office Interjected disconcerting news into RARE II in January by casting considerable doubt on the realiability of Forest Service timber harvest projections.

In short, GAO said no one knows with confidence whether existing allowable cuts are too high or too low. Similarly, the report questions the reliability of Forest Service estimates of the impact on timber harvest of both wilderness withdrawals and renewed multiple use management of roadless lands. Such uncertainty complicates RARE II even more.

Congress is not ignoring the need of an adequate domestic supply of timber and wood products. There will be continued pressure to provide the funds to the Forest Service to intensify management of its commercial forest land base. The House Agriculture Committee quite likely will produce new legislation this year to help the nonindustrial private timber

grower. And the push is on for passage of a log export bill this year.

Because Congress alone can create new wilderness areas, RARE II will next year hit Capitol Hill with full force. The scope of the package of wilderness and multiple use tradeoffs that is presented at that time will be the measure of the worth of RARE II.

My advice to all on RARE II is simply this: Get involved and give it a chance to work.

Gus Kuehne rightly observed in a recent American Plywood Association management report that—

Regardless of what anyone might think of RARE II, the program is proceeding.

RARE II is where the action is now in settling the uncertainties surrounding completion of the national wilderness system. Until that job is done, no one can devote full attention to timber and all the other multiple uses of our national forests.●

## TRIBUTE TO DR. WILLIAM MARION MEBANE

### HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BROYHILL. Mr. Speaker, many times citizens who have been great contributors to our society in a very positive way go through life without being recognized for their efforts. Such is the case with Dr. William Marion Mebane, a native of Newton, which is located in the 10th Congressional District of North Carolina. Dr. Mebane, an eminent scientist and an enthusiastic citizen, died on March 17 at the age of 74.

Dr. Mebane was a pioneer in rocket research and development. During his illustrious career he gained national and international recognition as an expert in his field.

After earning a Ph. D. in chemistry from the University of North Carolina at Chapel Hill in 1929, Dr. Mebane began his career as a professor at Middle Tennessee State College. Called into the Navy during World War II, he was among the earliest developers of solid fuel propellants for rockets. After the war, he continued this work, joining the Thiokol Corp. as it entered the rocket field. As general manager of its rocket research program in Huntsville, Ala., he worked with such noted scientists as Dr. Werner Von Braun and others in the development of rockets which led to the development of this Nation's successful space program. In 1959 Dr. Mebane was appointed secretary of the Thiokol Corp. and served at its headquarters in Bristol, Pa., until his retirement to North Carolina in 1967.

Throughout his scientific career, Dr. Mebane never completely abandoned his role as an educator. As a Thiokol executive he made a practice of lecturing to civic groups about his work as often as possible. When he retired to his home town of Newton, he found even more time to devote to community affairs. For the last 10 years of his life he was extremely active in local civic, church, and educational groups, including Rotary, the American Legion, the Newton First Presbyterian Church, and the Uniform Air Pollution Control Board. Besides his local activities, he was a member of the American Chemical Society, American Rocket Society, and American Ordnance Association.

Dr. William Mebane has set an example of responsible citizenship which I am pleased to bring to the attention of my colleagues. He will be missed by all who knew him.●

## MR. C's MOUNTAIN

### HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. HOLLENBECK. Mr. Speaker, on Sunday, I had the honor to participate in the dedication ceremonies for Mount Cecchino in Mountain Reserve Park, Wayne, N.J., and Cecchino Drive in New Milford. The mountain and street are named after Mr. John D. Cecchino, who for over 20 years was a respected, admired, and loved teacher in the New Milford Community School system.

Very few teachers have had mountains named after them. Indeed, few teachers ever receive the recognition they deserve for educating our children. Perhaps this is because we are so used to schools and teachers that we really do not see the important job they do. We do not stop to realize that they are shaping our future in their classrooms. So, most teachers go on, year after year, quietly doing the job they are asked to do.

Every once in a great while, though, there is a teacher who is so outstanding, so gifted and so respected, and who so exemplifies and magnifies the traits of the profession that he or she cannot be overlooked. John Cecchino was just such a person. The influence he exerted on a generation of New Milford students will be felt for many years to come, as those students take their places in the community.

I do not need to recount Mr. C's achievements. Instead, let his students tell, in their own words, what John Cecchino meant to them.

He was the kind of person you couldn't help love because he was filled with love.

He was special because he cared for people in a world whose general tendency was apathy.

. . . the man to go to when you had something on your mind.

. . . considerate, self-giving, fun-loving, all together a nice, true person.

The poet and philosopher Kahlil Gibran, in his book "The Prophet," paints a beautiful portrait of the wise teacher. He tells us:

The teacher who walks in the shadow of the temple, among his followers, gives not of his wisdom but rather of his faith and his lovingness.

If he is indeed wise he does not bid you enter the house of his own wisdom, but rather leads you to the threshold of your own mind.

The astronomer may speak to you of his understanding of space, but he cannot give you his understanding.

The musician may sing to you of the rhythm which is in all space, but he cannot give you the ear which arrests the rhythm nor the voice that echoes it.

And he who is versed in the science of numbers can tell of the regions of weight and measure, but he cannot conduct you thither.

For the vision of one man lends not its to another man."

What I think Gibran is trying to tell us, Mr. Speaker, is that being a good teacher is more than merely giving information to one's students. Information, after all, is useless unless it is used correctly. The wise teacher, the good teacher, is the one who allows students to discover the knowledge that lies within themselves. He is one who inspires his students to seek their own truths, and to find the wings of their own visions. This is what made John Cecchino the great educator that he was. It is my hope that, when people stand on Mr. C's mountain, they will stop for just a moment to consider all that it stands for.●

## CUT TAXES AND MAKE THEM EASIER TO UNDERSTAND

### Hon. John E. "Jack" Cunningham

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. CUNNINGHAM. Mr. Speaker, people of the 7th Congressional District of Washington have been writing me since the day I arrived in Congress about the crushing burden of taxes that they face. When the Government decides that it knows better how to spend your money than you do, we are in trouble.

I have tried to be careful to vote against wasteful spending, and always against tax increases, such as the $227 billion social security increase which passed on December 15, 1977, by a vote of 198 to 163. I want to protect the recipient of social security benefits, but we need to do a better job than just to raise the taxes and hope for the best.

Mr. Jack Anderson, the syndicated columnist, has expressed many of my feelings in his column of April 18, 1978, which appeared in the Washington Post. People are tired of a tax system that takes too much of their income, now more than 40 percent. They also want a tax system that is fair and easy to understand. It is up to us to give it to them.

In the hopes that my colleagues will read and learn from Mr. Anderson, I submit his remarks for the RECORD:

A MIDDLE-CLASS TAX REVOLT IS GROWING

(By Jack Anderson)

Those silent Americans, who used to grit their teeth, pay their taxes and bear it, are beginning to make themselves heard. We have warned in past columns that a quiet tax revolt is gathering steam. It may gain enough momentum by November to sweep the big spenders out of Congress.

It's a revolt of the middle classes, who pay the greatest share of the nation's taxes.

They are not deprived people seething against an oppressive government, but they are frustrated by unfair taxes and increased living costs.

They will express their anger, if our soundings are correct, at the polls in November. This could be grim news for the Democrats who are associated in the public's mind with government spending. The public is angry at an income tax system that has become incomprehensible. The annual ritual of rendering unto Caesar has become so encumbered with regulations that it takes an attorney or an accountant to fill out the average tax form. Even the tax experts are apt to stumble over some unseen regulation submerged somewhere in the public prints.

The public is angry at an Internal Revenue Service that changes the rules arbitrarily and ignores the intent of Congress. The tax agency is supposed to enforce the tax laws, not write them. But if Congress won't change the laws to suit the enforcers, IRS simply writes new regulations and issues new directives to accomplish the same result. Agents are now hounding taxpayers whose tax practices used to be considered perfectly legal. The laws haven't been changed; the agents have merely been given new marching orders. The main result is that IRS is creating millions of dollars in new business for accountants, lawyers and itself.

The public is angry at a tax system that discriminates against the middle classes. The poor are granted exemptions and the rich are provided loopholes. It used to be that the inequities could be covered up by the sheer complexities of the tax laws. But the middle classes have caught on. If they are going to submit willingly to being plucked like a chicken, they want to be sure their fellow citizens get the same treatment.

Probably the best thing that could happen to the federal income tax system would be to scrap it altogether. The same amount of revenue could be raised, the experts tell us, by charging a simple, across-the-board 12 percent income tax, without exceptions, exemptions or loopholes, except for the genuinely poor. This would put the tax accountants, tax attorneys and three-fourths of the Internal Revenue force out of business. But it would save the average taxpayer a bundle and eliminate overnight the inequities in the tax laws.●

---

## THE PROPOSED COMPREHENSIVE TEST BAN TREATY: ISSUES AND CONTROVERSIES

### HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BEARD of Tennessee. Mr. Speaker, I am deeply concerned with the Carter administration's handling of national security matters.

The Carter administration has consistently ignored, overruled, or misrepresented the expert judgment of this country's senior military and technical community on all of the key national defense decisions made to date.

The decisions to cancel the B–1 bomber, and withdraw U.S. ground forces from Korea, were all made despite recommendations to the contrary by the Joint Chiefs of Staff. To date, the terms of the negotiated SALT II agreement would also indicate that the major recommendations by the Joint Chiefs of Staff were not accepted in the U.S. SALT negotiating posture.

While I am alarmed that the judgment of the expert Government officials is not having much impact on the administration's national security decision making process, I am equally alarmed by the administration's efforts to suppress the independent and dissenting viewpoints of senior Government officials. The administration's issuance of the so-called Aaron memorandum in October 1977 clearly illustrates the point. This memorandum, issued to all appropriate Government agencies, by David Aaron of the National Security Council staff stated:

> In order to assure that data and analyses provided to the Congress on strategic forces and programs of both the United States and the Soviet Union are consistent and represent the best judgment of the Executive Branch, all responses to requests from the Congress for such material should be cleared through the SALT working Group.

Why the Defense Intelligence Agency, the Central Intelligence Agency, the Department of Defense, or any other Government agency, should clear intelligence, military, or technical issues through the "SALT working group" before presenting their assessments to the Congress seems at best imprudent and at least improper. The Congress, in making informed decisions, needs to have the best technical, military, and intelligence judgments, and not the "politicized" judgments reflecting the party line.

Most recently, on February 23, 1978, Mr. Paul Warnke, Director of the U.S. Arms Control and Disarmament Agency, forwarded to the Congress a report confirming the verifiability of the terms of the proposed SALT II agreement.

The conclusions in the report were presented to the Congress as having been agreed to by all of the participating agencies. Yet the Secretary of Defense and the Joint Chiefs of Staff had not agreed to and signed off on the report's conclusions. Equally significant, the National Security Council was notified the day before the report was sent to the Congress that the Joint Chiefs of Staff had not signed off on the report, and that it should be identified as an ACDA study.

Despite the advance notification from the JCS the misrepresentation of the facts was allowed to occur.

Gen. David C. Jones, at that time Acting Chairman of the Joint Chiefs of Staff, wrote a letter to the Secretary of Defense, and Vice Adm. (USN) Patrick J. Hannifin, Director, Joint Staff, wrote a letter to the Arms Control and Disarmament Agency, requesting that the recipients of the report be informed that it was only an ACDA report.

Yet I know of no congressional committee which was so notified until after the issue had been made public in the form of a letter from me to President Carter. In fact, even after the issue became public, the House Armed Services Committee still had to request official notification.

If this incident can be explained away as a bureaucratic mistake or mishandling the following incident cannot.

The Intelligence and Military Application of Nuclear Energy Subcommittee of the House Armed Services Committee recently conducted a hearing on the status of the proposed comprehensive test ban treaty. Two days before the subcommittee's hearing, Mr. John Marcum of the staff of the National Security Council, called all of the scheduled witnesses to a White House meeting for a so-called "coordinating" session. While the witnesses testified that they had no restrictions imposed on them, the appearance of impropriety is indisputable. Of equal concern, after the subcommittee sent each of the agencies its portion of the transcript for editing purposes, the Arms Control and Disarmament Agency informed each agency that had testified before the subcommittee to send its portion of the transcript to ACDA so that ACDA could edit the transcripts before returning them to the subcommittee.

The administration is clearly concerned that Congress and the American public become aware of the ongoing controversy within the Executive branch of Government over the terms of the proposed comprehensive test ban treaty, and that the decision to proceed with the negotiations was undertaken, despite recommendations to the contrary by the Joint Chiefs of Staff.

This controversy centers on whether or not a future CTB agreement should consist of a zero yield test ban or permit some form of low level nuclear threshold testing. It is a critical issue because the present state of the art does not permit adequate verification of nuclear testing below certain levels. Thus, an agreement which consisted of a zero yield test ban would permit the Soviets to conduct a covert nuclear test program, at a level sufficient to maintain the reliability of the Soviet nuclear weapons stockpile, and evade U.S. national technical means of verification. At the same time, the United States, abiding by the agreement, would not be able to maintain a reliable nuclear weapons stockpile. Thus, dangerous military asymmetries would develop.

The U.S. defense and technical community has therefore recommended that some form of controlled nuclear testing must be permitted to prevent a military imbalance from developing. Despite this recommendation, the U.S. Arms Control and Disarmament Agency, the State Department, members of the National Security Council—and perhaps even the President himself—are pushing for a zero yield test ban agreement.

Because of my concern, and an apparent inconsistency in the testimony of ACDA before the subcommittee, I signed a letter with some colleagues to ACDA Director Paul Warnke, requesting an explanation of ACDA's position on this issue.

In a clear effort to suppress public knowledge of this issue, and to avoid political embarrassment, ACDA attempted to classify the letter sent to Mr. Warnke. ACDA stated that the fact that underground nuclear testing in the 3 to 10 kiloton range was not verifiable and was a classified figure. In point of fact these numbers are used widely in the open literature. More importantly, the Joint Committee of Atomic Energy report of October 28, 1971, states that although the "U.S. ability to detect seis-

mic events has improved by at least an order of magnitude, (this) still allows a determined evader to get by with 5 to 10 kiloton tests without detection."

ACDA also stated that the letter to Mr. Warnke was classified because it was not public knowledge that the Executive had not yet reached a decision on whether a future CTB treaty should consist of a zero yield test ban or permit some level of nuclear testing.

In fact, in unclassified testimony before the subcommittee, on February 22, 1978, the following question was raised by Representative DAN DANIEL:

What is the official position of the Department of Energy with respect to the types of testing which should be allowed during a comprehensive test ban treaty?

The response to that question was as follows:

That is still under discussion within the Administration. We have had several reviews of various levels of experimentation which would give us various levels of confidence with respect to existing and new developments.

Finally, ACDA stated the letter was classified because the fact that there might be a need to permit some level of nuclear testing in the future CTB agreement to avoid military asymmetries might be embarrassing to the Soviets. While I would prefer not to have to embarrass the Soviets, the right to classify material for national security reasons does not incorporate a provision that permits classification of information for that reason.

Quite clearly, then, the pattern of administration action illustrates not only that technical and military judgment is being ignored by the administration, but that the administration would also like to deny the Congress access to these judgments, and that the classification of information is being used not for national security reasons, but to cover up possible politically embarrassing information.

So that my colleagues are aware of the controversy, I enclose a copy of the letter to Mr. Warnke in the RECORD at this time:

U.S. HOUSE OF REPRESENTATIVES,
*Washington, D.C., April 4, 1978.*

The Hon. PAUL WARNKE,
*Director, U.S. Arms Control and Disarmament Agency, Department of State Building, Washington, D.C.*

DEAR MR. WARNKE: During the Intelligence and Military Application of Nuclear Energy Subcommittee's hearing on the status of the Comprehensive Test Ban Treaty there was some confusion about the definition of "comprehensive".

The witnesses from the various agencies testified that the U.S. government had not yet decided on whether a future treaty would consist of a zero yield test ban, or permit some form of low level nuclear testing.

We were most disturbed with this revelation because of the inherent contradiction in the policy of the Administration to be in the midst of negotiations with the Soviet Union, without first having defined the U.S. position on this most fundamental issue.

During the subcommittee's hearings Rear Admiral Thomas Davies, USN (Ret.), Assistant Director, Bureau of Multilateral Affairs, of the U.S. Arms Control and Disarmament Agency, testified that he could not say "there are no differences" within the interagency working group on the CTB. But Admiral Davies also stated that the "development of these (interagency) papers is such a continuing dialogue that it is awfully hard to make specific differences that would be true as of this moment."

During the course of the hearings it became quite evident that the view of the senior defense and scientific witnesses, testifying on behalf of their agencies, was that the Soviets could conduct low level nuclear threshold tests, (in the 3 to 10 KT range), and higher level tests if they wanted to mask such tests, and evade U.S. national technical means of verification. The testimony indicated that a zero yield Comprehensive Test Ban Treaty would permit the Soviets to maintain the reliability of their nuclear weapons stockpile, while escaping U.S. national means of verification if they wanted to do so. At the same time the United States, abiding by the agreement, would not be able to maintain the reliability of its nuclear weapons stockpile. Under those circumstances very dangerous military asymmetries would develop.

The testimony before the subcommittee leaves no question that the position of our technical and military community is that a CTB agreement that is not verifiable, and which would permit asymmetries to develop, would be inimical to U.S. national security. Similarly, these witnesses testified that a low threshold level nuclear test program is necessary to maintain the reliability of the U.S. weapons stockpile, and prevent asymmetries from occurring because, as mentioned earlier, such a program could be conducted by the Soviets within the constraints of a CTB treaty, while evading U.S. national technical means of verification.

Since the technical and defense witnesses all testified to this, we could not understand why the United States government has not yet defined its position on this issue.

A question was, therefore, specifically asked of Admiral Davies if ACDA had taken a position on whether a low threshold program is necessary to avoid asymmetry. Admiral Davies testified that "ACDA does not have a position on this for the simple reason that the facts are not all in, in the process that is going on."

We are now informed that at the latest Special Coordinating Committee meeting on the CTB on March 22, 1978, which you reportedly attended, ACDA recommended, and apparently has consistently recommended, that a future CTB consist of a zero yield test ban. The ACDA position reportedly is shared by the State Department and members of the National Security Council.

While we are greatly disturbed with ACDA's position, because of the adverse implications a zero yield test ban agreement would have on U.S. security, we are also disturbed about the apparent contradictions in Admiral Davies' testimony.

It would appear that ACDA and the State Department are actively opposing a CTB that would permit nuclear tests below the threshold level of verification, while the defense and scientific community believe some form of U.S. nuclear testing is necessary. Admiral Davies testified that it is not only difficult to define "specific differences" between the agencies, but that ACDA had not taken a position on whether a CTB should be a zero yield agreement, or permit testing at a level to maintain U.S. strategic stockpile reliability.

We request that you provide an explanation of the apparent inconsistency in Admiral Davies' testimony and an explanation as to why the ACDA continues to insist on a zero yield CTB when it is recognized we could not adequately verify Soviet compliance with such an agreement; when we recognize it would not permit the U.S. to maintain the reliability of its nuclear stockpile, and when, as a result, it could create dangerous asymmetries in U.S.-Soviet military capabilities.

We would appreciate a prompt response.

Sincerely,

ROBIN BEARD,
*Member of Congress.*
SAMUEL S. STRATTON,
*Member of Congress.*
ROBERT W. DANIEL, JR.,
*Member of Congress.*
DAN DANIEL,
*Member of Congress.*●

---

PERSONAL EXPLANATION

## HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. SARASIN. Mr. Speaker, on April 12, 1978, I was absent for part of the legislative session of the House of Representatives. Had I been present, I would have voted in the following fashion:

Rollcall No. 216: H.R. 3161: Federal firefighters. The House passed the measure to amend title 5, United States Code, to improve the basic workweek of firefighting personnel of executive agencies, "yea."

Mr. Speaker, on April 13, 1978, I was absent from the legislative session of the House of Representatives. Had I been present, I would have voted in the following fashion:

Rollcall No. 218: H.R. 11003: White House personnel authorization. The House agreed to the rule (H. Res. 1127) under which the bill was considered, "yes";

Rollcall No. 219: H.R. 11003: White House personnel authorization. The House rejected the Bauman amendment that sought to reduce the number of White House Office employees authorized to be compensated at rates above GS-16 from 100 to 75, "aye";

Rollcall No. 220: H.R. 11003: White House personnel authorization. The House rejected the Gilman amendment that sought to require the President to submit a new authorization request for executive office personnel and related expenses within 1 year of assuming office, "no";

Rollcall No. 221: H.R. 11003: White House personnel authorization. The House rejected the Symms amendment that sought to prohibit the use of authorized funds or personnel to be used in any official capacity to influence members of State legislatures with regard to ratification of proposed amendments to the Constitution, "no";

Rollcall No. 222: H.R. 11003: White House personnel authorization. The House passed the measure to clarify the authority for employment of personnel in the White House Office and the Executive rtsidence at the White House, and to clarify the authority for employment of personnel by the President to meet unanticipated needs, "no," and

Rollcall No. 223: H.R. 5289: Energy conference. The House rejected a motion that the conference committee meetings between the House and Senate on the

bill (relating to natural gas regulation) be closed to the public, but that any Member of Congress would have the right to attend any closed or open meeting, "no."

Mr. Speaker, on April 17, 1978, I was absent from the legislative session of the House of Representatives. Had I been present, I would have voted in the following fashion:

Rollcall No. 224: H.R. 3489: Merchant Marine Academy nomination. The House passed under suspensions the measure, amended, to amend section 216(b) of the Merchant Marine Act of 1936, to entitle the Delegates in Congress from Guam and the Virgin Islands to make nominations for appointments to the Merchant Marine Academy, "yes";

Rollcall No. 225: H.R. 10822: Sea-grant program. The House passed under suspension of the measure, amended, to improve the operations of the national sea-grant program, and to authorize appropriations to carry out such program for fiscal years 1979 and 1980, "yes";

Rollcall No. 226: H.R. 10823: Oceans and atmosphere. The House passed under suspensions the measure, amended, to amend the National Advisory Committee on Oceans and Atmosphere Act of 1977 to authorize appropriations to carry out the provisions of such act for fiscal years 1979 and 1980, "yes"; and

Rollcall No. 227: H.R. 11465: Coast Guard authorization. The House passed the measure under suspensions, amended, to authorize appropriations for the U.S. Coast Guard for fiscal year 1979, "yes."●

## ROBERT P. REEVES: 30 YEARS OF SERVICE

### HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. CHARLES H. WILSON of California. Mr. Speaker, this March marked the end of 30 years of public service to the people of Hawthorne, Calif., by Robert P. Reeves—a man that I have had the privilege of working with during my past 16 years as the Representative for the 31st District.

Over the years, Bob and I have had the opportunity to work together on a variety of Federal and local projects. What has always impressed me most about this local official, was his dedication to the community that elected him to serve on their City Council for 26 consecutive years. More than anything else, he has worked hard to improve the quality of services in Hawthorne. Obviously, his long term on the city council indicates the voters agree that Bob Reeves is a government official who cares and has the ability to get things done.

A native of Alabama, he moved to California in 1927, and eventually settled at his present address in Hawthorne in 1939. He started public service over 30 years ago when he served as the chief warden for civil defense in the Hawthorne area, after which he was elected to the city council, serving as Mayor in 1960–61 and 1972–73.

Since the Los Angeles area is so widespread and diversified, it is absolutely essential that local communities cooperate with each other. As a member of the South Bay Councilman's Association, the South Bay Regional Public Communications Authority, and the Centinela Valley Juvenile Diversion Project, Bob Reeves has helped develop long-range policies for a wide range of programs in the Los Angeles area. Judging from the variety of positions he has held in local government, Bob is a man with a good many interests and talents. He has been a commission member on the Emergency Preparedness Commission for the county and cities in Los Angeles County, director of the Los Angeles County Sanitation District since 1953, the city representative on the California Transportation Authority, a member of the National League of Cities and the American Municipal Association, as well as a member of the Academy Selection Committee for the 31st District which has the responsibility to evaluate young men and women who are interested in attending one of the U.S. military academies.

Such a list of governmental service should be enough to qualify Bob Reeves as one of the outstanding leaders in the South Bay area, but his community service does not stop there. He has been a charter member of the Hawthorne Toastmasters International Club, officer and charter member of the Centinela Bible Church, member of the Christian Business Committee International, Bodger Park Community Association, the Y.M.C.A. and the Hawthorne Chamber of Commerce. Education has also been one of Mr. Reeves' concerns. He has served on the Centinela Valley Child Guidance Clinic and is an honorary life member of the Hawthorne PTA. As board member, branch chairman and disaster chairman for the American Red Cross in the Hawthorne-Lawndale area, Bob was kept quite busy this past winter due the damage done by the excessive rainfall in the Los Angeles area. In each one of these jobs, he has performed his duties well and with an unselfish devotion.

Others have recognized the talents of Bob Reeves and have given him numerous awards and honors. In 1978, he was awarded the Continuing Service Award from the California Congress of Parents and Teachers and the Centinela Valley Council of PTA's for his outstanding service to children and young people. Both the California assembly and the State senate have passed resolutions in recognition of his record of dedicated and highly effective service on behalf of the city of Hawthorne. In addition, he has received the Award of Honor for Distinguished Public Service in 1968 from the county of Los Angeles, and Appreciation Award from the Friend of Youth Program of the Optimist Club of Hawthorne, the 1975 Public Service Award from the Hawthorne Chamber of Commerce, the Heart Services Recognition Award from the Los Angeles County Heart Association, and if that is not enough, the Outstanding Services to the city of Hawthorne from the Veterans of Foreign Wars.

I am pleased to join with Bob's many friends and coworkers and express my own appreciation for the outstanding job he has done for the city of Hawthorne. His devotion to civic, governmental, and community service is to be highly commended.●

## BIRTH DEFECTS AND ALCOHOL

### HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. WAXMAN. Mr. Speaker, I would like to bring to your attention recent scientific documentation that many children born to women who drink excessively while pregnant have a pattern of physical and mental birth defects. The March of Dimes has published an informative pamphlet on this subject which I am having reprinted in the CONGRESSIONAL RECORD to alert my colleagues to this public health hazard. If there is anything more heartbreaking than birth defects, it is the knowledge that they are preventable but ignorance prevents anything from being done. Alcoholism in pregnancy has been estimated as the third most common cause of mental retardation. This March of Dimes pamphlet is a call to action for all of us in Congress to assure adequate funding of alcohol treatment and prenatal care programs.

Pamphlet follows:

WHEN YOU DRINK, YOUR UNBORN BABY DOES, TOO

When you're pregnant your unborn baby receives nourishment from you. What you eat, he eats. What you drink, he drinks.

So if you have a drink—beer, wine or hard liquor—your unborn baby has a drink too. And because he is so small, he is affected twice as fast as you are.

That's the immediate effect. But alcohol can also have serious long-lasting effects on an unborn baby.

HOW ALCOHOL DAMAGES UNBORN BABIES

Scientists have found that many children born to women who drink excessively while pregnant have a pattern of physical and mental birth defects. They call the more severe problems the "fetal alcohol syndrome."

Growth deficiency is one of the most prominent symptoms. Affected babies are abnormally small at birth, especially in head size. Unlike many small newborns, these youngsters never catch up to normal growth.

Most affected youngsters have small brains and show degrees of mental deficiency. Many are jittery and poorly coordinated, and have short attention spans and behavioral problems. Evidence to date shows that their IQs do not improve with age.

Fetal alcohol syndrome babies usually have narrow eyes and low nasal bridges with short upturned noses. These facial features make them look more like one another than like their parents or brothers and sisters. Almost half of them have heart defects, which in some cases require heart surgery.

Not every fetal alcohol syndrome baby has all of these defects but there is a relationship between the severity of physical charac-

teristics and the degree of mental impairment. The more severely retarded youngsters are those with the most noticeable physical defects.

MANY BABIES ARE AT RISK

Fetal alcohol syndrome is a very real problem in the United States today. It is estimated that there are more than one million alcoholic women of childbearing age. And the number is growing—particularly among adolescents. In some regions, alcoholism in pregnancy has been estimated as the third most common cause of mental retardation.

Babies of teen-agers who drink heavily are in double jeopardy. They may be born too small or too soon because their mothers' bodies are not mature enough to meet the demands of pregnancy. If they also are subjected to excessive alcohol from their mothers, they may suffer some symptoms of fetal alcohol syndrome.

WE NEED TO KNOW MORE . . .

An occasional drink during pregnancy may not harm your baby. But *no one knows* how much alcohol is too much.

That is one of many questions surrounding fetal alcohol syndrome—questions for which researchers throughout the country are trying to find answers. Many of these investigators are aided by the March of Dimes whose aim is to protect the unborn and the newborn.

Scientists know that, as with other things pregnant women eat and drink, alcohol passes through the placenta, the organ which nourishes the unborn baby. The drink the baby gets is as strong as the one the mother takes.

It is believed that the alcohol adversely affects the baby's fast-growing tissues, either killing cells or slowing their growth. Because the brain develops throughout pregnancy, it stands to reason that it is the organ most affected by maternal drinking.

YOU CAN PREVENT THIS BIRTH DEFECT

Fetal alcohol syndrome is a tragedy. An even worse tragedy is that it *doesn't have to happen!*

If you are a woman of childbearing age, *you can prevent* birth defects caused by excessive use of alcohol.

If you're pregnant, don't drink. If you drink heavily, don't become pregnant.

If you can't stop drinking on your own, seek help before you become pregnant.

*Alcohol and pregnancy do not mix.*●

## BOOST FOR STEEL INDUSTRY

### HON. JOHN W. JENRETTE, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. JENRETTE. Mr. Speaker, on Thursday of last week, April 13, 1978, I had the pleasure of hearing Mr. Peter D. Ehrenhaft, Deputy Assistant Secretary for Tariff Affairs in the Treasury Department, announce to members of the Congressional Steel Caucus that the Department has decided to continue the trigger price mechanism for steel wire rod.

I would like to take this opportunity to applaud the Department's decision, particularly in light of the recent pressure and lawsuit by an independent producer of wire and wire products to get the trigger price on wire rod withdrawn.

By this decision, the administration has thwarted a serious challenge to the President's entire trigger price system and we have sent a clear signal to foreign nations who have been illegally dumping wire rod in this country that they must halt this action.

In his remarks, Mr. Ehrenhaft that the Treasury Department, in its response on April 13 to a lawsuit seeking to enjoin enactment of the trigger price on wire rod, had taken the position that wire rod is not a "semi-finished" product and that therefore is appropriately included under the trigger price system. He said that when the President first directed the Interagency Task Force to study the steel problem, he told the group to consider ways to aid the "basic" steel industry. Upon conclusion of hearings 2 weeks ago on whether wire rod should continue under the trigger price system, the Department has decided that wire rod is indeed a "basic" steel product and that it should enjoy the full protection of the trigger price mechanism.

To my constituents in the Sixth District of South Carolina, this decision will have a very significant long-range effect. We are proud to be the home of Georgetown Steel Corp., one of the world's most efficient producers of wire rod. However, this company has been severely hurt by foreign producers who have been illegally dumping wire rod in this country at prices considerably below their cost of production. In recent months, this situation had gotten so severe that layoffs among Georgetown's 1,000 employees were threatened.

I firmly believe that Treasury's commitment to stand by the system which it created 4 months ago will help turn the situation around for our domestic producers of wire rod. With this type of support that everyone can rely on, the wire rod industry in this country will no longer have to be at the mercy of unfair foreign competition. I compliment the administration for its help and I pledge to continue my own efforts on behalf of fair, as well as free, international trade.

Thank you.●

## IN SUNNY SOUTH AFRICA, A MURKY COURTROOM

### HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. DOWNEY. Mr. Speaker, on Thursday, April 20 the House Committee on Banking, Finance, and Urban Affairs will consider an amendment to the Export-Import Act of 1945 which would prohibit loan guarantees to U.S. companies doing business in South Africa until that country substantially modifies its discriminatory racial policies. I support that move.

Any doubt that South Africa is moving towards any sort of accommodation with its black majority should be cleared up by the thoughtful article published by a reporter of the respected Christian Science Monitor which I ask be included in the Record:

IN SUNNY SOUTH AFRICA A MURKY COURTROOM

(By June Goodwin)

Algoa Park seems a placid, sunny place—a typical, low-income Afrikaner suburb full of schoolchildren.

But in the middle of this Port Elizabeth suburb stands a police station in which a makeshift court appears to enact daily the same sort of questionable justice the world witnessed during the inquest into the death of imprisoned black leader Steve Biko late last year.

This time few whites know about the peremptory proceedings of this "court," even though dozens of blacks arrested in nearby townships have been streaming through it.

The local newspapers are reporting little of what is happening here. But a recent visit to the court by this correspondent suggests that events here lie at the very heart of black-white relations in South Africa today.

The court has been set up in what looks like a police lecture room, with a blackboard behind the table where the magistrate sits. On the front of the table is tacked some scruffy brown wrapping paper.

There is no public gallery. Blacks who want to be spectators are turned away at the entrance to the police station. Police in camouflage uniforms carrying automatic rifles walk around the station. Occasionally a policeman in camouflage comes and sits in the court for a while.

Outside one window of the courtroom stand four 15-foot-high riot vehicles, called "Hippos" locally. Blacks have been found guilty of stoning these impervious-looking monsters. One boy was sentenced to 18 months in prison for stoning a Land-Rover and causing 10 rand ($11.50) worth of damage.

Outside another window of the courtroom are kennels where at times police dogs can be heard barking. Further into the police compound is a helicopter landing pad, much in use recently and very noisy.

This then is the very uncourtlike setting.

At the center of the court's activities is an outspoken lawyer, John Jackson, a man who is famous among blacks in Port Elizabeth but almost unknown elsewhere.

Lawyers in Johannesburg say there is a legal vacuum in the eastern Cape. Mr. Jackson appears to be a lonely exception. He handles almost all of the cases where there is a lawyer here. Many blacks have no lawyers because they cannot afford them or get put through court so fast they cannot get one or get help in paying for one.

Almost every day for the past four months Mr. Jackson has defended hundreds of blacks scooped up in the continuing arrests in neighboring black townships. At first he won many acquittals and the police were apparently becoming embarrassed. Recently a new magistrate, moved in from Cape Town, has proved much tougher.

ARGUMENT FAILS

The day this reporter visited the Algoa Park court, Mr. Jackson argued his case with an incisiveness similar to that of Sidney Kentridge, the leading lawyer at the Biko inquest in Pretoria last year. But on this day (April 6), Mr. Jackson, too, argued to no avail, as the magistrate produced a finding reminiscent of that of the Biko inquest.

Four boys, age 14 through 16, were on trial for sabotage and arson. Three of them were physically very small and, as Mr. Jackson showed, had the education of nine-year-old white children. They were just beginning to learn to read.

"The worlds [of the courtroom] are floating away over their heads," Mr. Jackson said.

Two of the boys had no lawyer. They sometimes testified that they carried out the alleged stonings and burnings of buildings.

They sometimes denied they did anything like that. Two of the boys were barefoot. None of them understood English or Afrikaans, but the proceedings were translated into Xhosa.

MINIMUM SENTENCE . . .

The magistrate found the four boys guilty of sabotage and gave them the minimum sentence—five years in jail. No evidence was produced that proved the boys committed the alleged actions.

The magistrate, speaking of the deterrent effect of jail, said, essentially, that it had not been proved that the boys did not commit the acts for which the attorney general of the eastern Cape had charged them. In other words, it would appear that contrary to much of Western justice, they were guilty until they could prove themselves innocent.

Both boys who testified said they had been assaulted at the charge office by police and that after being beaten they signed statements of guilt before the magistrate. "I couldn't stick it," one boy said. The police who allegedly assaulted the boys were standing nearby as the statements were signed, the boys said.

In the Algoa Park Court sat an Afrikaner security police in a light blue safari suit. It was Lt. W. E. Wilkins, the security policeman who was with Mr. Biko the night before Mr. Biko was discovered to be suffering the injuries from which he later died.

Another man often in the Algoa Park Court is George Byron from the Eastern Province Herald. He has been the only newspaper reporter covering these trials for the past four months. The other English-language paper in town sent a man for one day. Because the Afrikaans press is not covering the trials, the residents of Algoa Park can say they do not know what is happening in their own neighborhood.●

## ESTABLISHING STANDARDS FOR REHABILITATION COUNSELORS

### HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. RICHMOND. Mr. Speaker, yesterday I introduced H.R. 12130 which, when enacted, would be a major step in insuring quality care for disabled individuals seeking rehabilitation counseling.

Rehabilitation counseling was created by Federal law to assist persons disabled as a result of wartime activities. Since the inception of the profession, thousands of people with widely varying physical ailments have been successfully treated.

Federal subsidies remain a primary source of support to the profession. A large number of rehabilitation counselors have been trained at the over 80 federally supported graduate programs in rehabilitation counseling. Many of these graduates are employed in the State-Federal vocational rehabilitation system.

In the early years of the profession, the supply of adequately trained counselors was insufficient. Today however, over 1,000 persons graduate each year from certified programs in rehabilitation counseling. At present, approximately 20,000 persons are employed as rehabilitation counselors. The turnover rate for this profession is extremely low. Thus, many recent graduates have been unable to find employment in their trained field.

Many employers continue to hire persons with no rehabilitation counseling experience to fill beginning positions. In far too many cases, nonprofessional criteria are used to make hiring decisions. Employers sometimes base the hiring decision on political or personal reasons rather than on professional standards.

The end result of this process is the inadequate delivery of services to the handicapped. This situation is not acceptable. A sufficient number of qualified counselors exists to ensure that disabled individuals receive the best possible care.

The legislation I have introduced would amend the Rehabilitation Act of 1973 to require that rehabilitation counselors hired under State plans approved under the act have certain minimum qualifications. Among the standards proposed are the requirements that an individual complete a course of study in rehabilitation counseling leading to an advanced degree at an accredited institution or completion of a course of study leading to a baccalaureate degree at an accredited institution and 4 years of acceptable experience in the field. Three other alternative requirements exist to ensure that persons hired previous to this legislation will not lose their positions.

This legislation would take effect 1 year after the date of enactment and would not apply to persons then employed as rehabilitation counselors under State plans approved under the Rehabilitation Act of 1973.

The Rehabilitation Act of 1973 as amended in 1974 includes strict standards for most professional practitioners in rehabilitation services. Yet, there are inadequate standards for those professionals most concerned in the rehabilitation process, the rehabilitation counselors. In order to guarantee that disabled individuals in this country receive the best possible treatment allowing them to return to active and productive lives, it is vital that guidelines be established for all those connected with the delivery of rehabilitation services.

I will be reintroducing this bill in one month and hope that my colleagues will join with me in this concern and agree to cosponsor this bill.●

## DEATH OF BISHOP MUSSIO OF STEUBENVILLE, OHIO

### HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. APPLEGATE. Mr. Speaker, late last year, I had the distinct honor and privilege to introduce to this House through the CONGRESSIONAL RECORD, a very dear friend of not only mine, but the entire Upper Ohio Valley, the Most Reverend John King Mussio, Bishop of the Diocese of Steubenville, Ohio. At that time, Bishop Mussio was retiring after 32 successful and fulfilling years of service. I believe it is only appropriate and fitting that I again address this Chamber to relay the sad and untimely death of the bishop this past Saturday, April 15, 1978.

The mark which Bishop Mussio made on his 13-county diocese probably will last as long as the diocese itself. He took over an ill-defined infant diocese which sprawled over most of southeastern Ohio. He started with nothing but the good will of the people of the area and the strength of personality which soon made him one of the most beloved community leaders in the 200-year history of the area.

Part of his accomplishments are written in stone. In 1946, in scattered downtown buildings, he established the College of Steubenville. The colleage now operates on a 200-acre campus dotted by modern buildings and draws students from around the country as well as from the tri-state area.

He established Catholic Central High School and it, too, was moved to a modern building. The school has been responsible for the education of thousands of area residents. Bishop Mussio saw a need for a hospital and, because of the strength of his vision, St. John Medical Center was established. That hospital continues to grow and fulfill an indispensable need in the health care of both Catholics and non-Catholics.

He built a seminary to train priests for the diocese. He established many of the Catholic elementary schools in the diocese. He brought sisters to the diocese to minister to the needs of the poor and downtrodden.

The list of his accomplishments is long and so varied that probably no one can remember all of them.

But the man who preferred to be seen as "a simple priest" most likely will be remembered and mourned not just because of his impressive accomplishments. For Bishop Mussio approached the people of this area as a friend and area residents of all faiths opened their arms to this quiet and obviously humble man.

The esteem in which he was held was nowhere more in evidence than when he announced his retirement. Early last year he said that he would step down as spiritual leader of the more than 54,000 Catholics when he reached 75 years of age. He reached that age on June 13, 1977 and, soon after, the Bishop Ottenweller was named to succeed him.

When the news of Bishop Mussio's retirement was made public last year, it was as though a signal were given to the community and from then until the moment of his death, accolades and public testimony never ceased. That praise came from the rich and the powerful and from the poor and the displaced. What soon amounted to a community hymn of thanks was sung by Catholics and non-Catholics, by the religious and the nonbelievers.

It will take a long time to assess the reasons for the extraordinary esteem in which this man was held by those among whom he worked, by those whom, he said again and again, he had come to serve.

But certainly, the key lies in the per-

sonality of the man. He once said that when he became a bishop, he was careful to make a distinction between the magnitude and power of the office and the man who filled it.

He said he never lost sight of the fact he was a simple man with failings. And so, he contended, when he met with respect and even, awe, he attributed that to the office of bishop and not to John King Mussio.

Bishop Mussio will be mourned and sadly missed by all who knew him and felt his presence.●

## PRESIDENT CARTER'S DECISION ON THE NEUTRON BOMB

### HON. DOUG BARNARD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BARNARD: Mr. Speaker, President Carter's decision to defer the production of the neutron bomb was of great disappointment and concern to me. In my opinion the controversial bomb is vastly misunderstood. Most media reports indicate that the bomb is an inhumane weapon which destroys people while sparing buildings.

If this were the case, I would have supported President Carter's decision. Contrary to these extravagant media assertions, the neutron bomb is capable of being very precisely targeted against enemy combatants—who are, under all laws of warfare, legitimate military targets while at the same time sparing the lives of our soldiers and innocent persons nearby.

At the center of the controversy is the neutron bomb itself. Actually, it is not a bomb but a small nuclear warhead for existing NATO missiles and artillery.

The nuclear weapons which exist in NATO countries today would actually kill and destroy over a much wider area than the neutron bomb. The use of the current-generation tactical nuclear weapons would frankly turn Europe into a scene of devastation.

These weapons are big, dirty and often inaccurate and would produce tremendous suffering among non-combatant civilians. If a conventional bomb were exploded over a military installation, it would not only wipe out the installation but its effects would most definitely spread into civilian areas whereas the kill-radius of the neutron bomb would be much less.

Certainly if we were invaded, we would be very reluctant to use a conventional nuclear weapon because of the effect it would have on civilians and even our troops. Our tactical nuclear weapons were not designed to oppose a Soviet force that is structured to fight a ground war in addition to a tactical nuclear war.

One must realize that the proposed neutron bomb would be used by NATO only under the most desperate circumstances—to stop a high speed armored blitzkreig across the North German plains by the Warsaw Pact forces. What will have to be stopped immediately and very convincingly will be a massive, armored spearhead of Russian and East European tanks and armored personnel carriers racing to the Rhine and enveloping outnumbered and grossly ill-equipped NATO forces. The West does not have the massive precision-guided conventional antitank weaponry that could stop this force. Its only recourse would be to use the tactical nuclear weapons of the current variety or go to strategic escalation.

Of course, this scenario would only occur if U.S. strategic credibility or disuasion had already evaporated but it is safe to say that the Soviets and their allies would, essentially, have an overwhelming upper hand in "escalation control." Under these circumstances a weapon that could target Soviet armored forces very precisely and provide NATO perhaps its last hope of stopping a massive incursion dead in its tracks, is what must be seriously considered by the Western iegislators.

Another consideration that many of us tend to overlook in favor of the production of the neutron bomb is that the economic implications are far-reaching. Today the Soviet Union needs more and better cars, trucks, roads, high technology pipelines, computers, tourist facilities, meat and other food, in addition to oil fields and other energy sources. Their population growth is changing so that economic advances must now come from machinery instead of additional workers in the labor force.

These projects require massive amounts of esoteric technology and since the Soviets have a very limited technological ability, they buy most of these domestic goods from the West. CIA reports indicate that 13–17 percent of their total GNP is spent on military technology—so the Soviets could easily be forced into a "guns and butter" situation.

Faced with this squeeze, the Soviet Union will have to conclude some sort of arms agreement or face severe domestic economic pressures. At such time the United States could conclude a fair and just agreement; however, if the President stops production of new weapons now without any concessions from the Soviets, then we will be forced into an arms agreement that would leave us, instead of the Soviets, vulnerable.●

## STUDENTS AND TEACHERS WORKING TO BUILD MODULAR HOUSE

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. ANDERSON of California. Mr. Speaker, I would like to commend a group of high school students and their teachers in the Long Beach Unified School District for their diligent work over the past 2 years in planning and constructing a modular house. This house, which consists of six modules, can now be shipped and assembled at any point where a homeowner would like to live: at the beach, in the mountains, in an urban or rural area.

It is through a flexible educational system such as this that the young people of our Nation can learn the basic trades that are the foundation of our country. Mr. Speaker, I would like to include for the record an article that was published in the Washington Post on Saturday, April 15, as reprinted from the Los Angeles Times, which outlines the commendable effort that was put into this project. And again, I would like to congratulate these students and their teachers for their outstanding achievement.

The article follows:

STUDENTS BUILD MODULAR HOUSE

(By Mary Barber)

LONG BEACH, CALIF.—A bunch of inexperienced high school students are building an unconventional house in a way that's never been tried before here.

Whoever buys it will have purchased the results of two years of labor and some of the best minds in the Long Beach unified school district.

It will be a house in six parts. Each part will be hoisted into a truck and deposited on a concrete foundation at the buyer's lot. All the connections for plumbing, electrical and other systems will be made then.

The separate parts, called modules, are now under construction at Jordan High School, where 18 students in the beginners' construction technology class are learning by doing.

The project originated with Glenn Warrick, district consultant in industrial education.

Warrick took his idea for a vacation house to drafting teacher Charles Copeland of Wilson High School, and then to architect Craig Wheeler.

They conceived modules with wood siding and sheetrock inner walls that could be hoisted by two forklifts into flatbed trucks, put together, they will form a house suitable for beach or mountains, Warrick said, or for a city dweller who can get by on 864 square feet.

The students are doing everything. They have erected the framework and are now attaching outer plywood that will eventually be covered by six-inch redwood siding.

They will put a roof over the modules, make and install the doors and windows and install the plumbing.

A Jordan High electrical class will do the electrical work.

Warrick says he doesn't know yet if the house will have some appliances installed, but the kitchen allows space for the usual refrigerator, stove, etc.●

## FIRST ANNUAL FREE ENTERPRISE AWARD

### HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. MOORE. Mr. Speaker, as I indicated in my remarks in the CONGRESSIONAL RECORD of December 15, 1977, the first annual Free Enterprise Week celebration took place in my congressional district during the week of January 8 through 14, 1978. As a most important

part of that celebration, we selected a businessman from the Sixth Congressional District of Louisiana to be the winner of the first annual Free Enterprise Award.

The selection process included requesting each chamber of commerce located in the congressional district to form a committee and consider all businesspersons located in the area served by that chamber. They were to select and forward to the Free Enterprise Week Selection Committee one nomination from that chamber. The Free Enterprise Week Committee then considered those nominations and selected the winner.

The qualifications for the award were general and flexible but included emphasis on the fact that we were looking for a small businessperson who had started with nothing and built the business into a success by hard work and the good fortune of being able to succeed as a result of the free enterprise system which exists in this country. In other words, we were looking for a prime example of the typical American success story to be able to hold out as an example to all others in our society that there is nothing wrong with profit, that you ought to be able to expect to keep a fair and significant share of the result of your work and that anyone can succeed in this country by hard work and the existence of the free enterprise system.

The first winner, and we hope the first in a long line of Free Enterprise winners, could not have been more perfect for this award if we had drawn the qualifications as specifically as possible. The first winner is Mr. Huey J. Wilson of Baton Rouge. La.

Mr. Wilson is founder and chairman of the board of the H. J. Wilson Company, Inc. which uses the trade name of "Wilson's." Beginning with a one-man, one-store operation, Wilson developed one of the Nation's leading catalog showroom chains until today 33 stores span the Sunbelt States from Texas to Florida. Huey J. Wilson personally directed this remarkable expansion, serving as president of the company until July 1977. Today the Wilson's stores employ approximately 3,500 employees, 2,500 of which are in Louisiana, on a full-time basis with an additional 1,500 persons hired on a seasonal basis.

Mr. Wilson was one of a family of 23 children and was a graduate of Baker High School, Baker, La. He served with distinction in World War II and following his service, completed training to master the art of jewelry design.

He then returned to Baton Rouge and started the company which had a modest beginning in 1950 when Wilson began operating a wholesale jewelry business which he started with $200 operating capital. The first years were very hard with little or no profit, but the whole family pitched in and worked hard to make it go. Several years later, he became one of the first retailers to develop the use of a catalog as a means of informing the customer of product brand names and prices for merchandise. This is a good example of innovation which can only exist in a free enterprise economy. In September 1957, Wilson opened his first showroom in Baton Rouge. This was followed by a Jackson, Miss., location in 1960. A decade later, when Wilson's was a four-store company, the great thrust of expansion began.

Because of Huey Wilson's extensive training and background in jewelry, the chain has been developed to offer one of the broadest selections of preassembled jewelry, together with a large selection of the highest quality loose diamonds of every color, size, shape, and price. Wilson's stores place a greater emphasis on jewelry than do other catalog showrooms and this, coupled with an elegance of store design and decor, have made the company unique.

In 1972, Wilson established a New York office for the purpose of importing diamonds from Israel, Belgium, and India. The majority of Wilson's gold jewelry manufacturing and diamond setting is performed by this facility.

The Wilson's stores also offer a wide selection of merchandise from abroad. A New Orleans-based importing company, Kimco, International, which is wholly owned by Wilson's was founded in 1975 to purchase gifts, housewares, toys, and other nonjewelry items from Europe and the Far East.

In addition to his business success, Huey J. Wilson has sought opportunities to serve his community through a number of civic and charitable activities. He helped to found the Federation of Louisianians for Hemophilia which is dedicated to fighting this very serious disease through medical research and increased public awareness and enlightenment. Through the years, Wilson has continued to support and serve the Hemophilia Federation and presently serves on the board of trustees.

He has been a supporter of a number of Baptist churches in the area—New Salem Baptist Church, Metropolitan Baptist Church and Sherwood Baptist Church. Additionally, Wilson serves on the board of directors of American Bank and is a member of the Salvation Army advisory board.

Wilson has also been a supporter and contributor of the "Here's Life, American" organization; the Jerry Falwell Ministries of Lynchburg, Va.; and the Wayout Help Clinic based in Houma, La. Recently, Wilson was invited, and agreed to serve, on the newly formed Governor's Conference on Economic Development.

Mr. Wilson has been married for 29 years to the former Angelina Mumphrey of Baton Rouge and they have three children; John, Dianne, and Denver. Mr. and Mrs. Wilson reside at 2764 Warwick Avenue in Baton Rouge.

Mr. Wilson is a perfect example of what has made America great as he has worked hard, starting with nothing but his God given talents and his desire to succeed. His story would not have been possible, however, without our economic system which allowed and encouraged his efforts and prosperity—Free Enterprise.●

## DEEP SEABED MINING LEGISLATION AND REVENUE SHARING—THE LAST REMAINING ISSUE

### HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. MURPHY of New York. Mr. Speaker, the Congress has been considering deep seabed mining legislation for more than 6 years and, for the first time such a measure now has the support of the administration. In fact, the President's Special Representative for the Law of the Sea Conference, Ambassador Elliot L. Richardson, recently requested that the House of Representatives move a deep seabed bill through the legislative process. This request was based on the premise that legislation would strengthen the Ambassador's bargaining position at the LOS conference. This is a premise which I have supported for years.

As you know, H.R. 3350, which Congressman JOHN BREAUX of Louisiana and I cosponsored was jointly referred to the Merchant Marine and Fisheries Committee and the Interior and Insular Affairs Committee. After both Committees had reported the bill, it was sequentially referred to the Committee on International Relations.

Despite over two dozen differences among the three versions, 19 of which were substantive, only one major issue separated the Committees from agreement on a compromise substitute bill.

The precise manner in which the sharing of some of the revenues with the international community should be handled was the subject of considerable negotiation among the three Committees and, quite frankly, was one on which we received little cooperation from the administration—an administration which had indicated that it wanted legislation passed.

Finally, when the impasse on revenue sharing among the committees could not be broken, I asked the chairman of the Ways and Means Committee to consider the issue with a view to reporting out a detailed provision. My colleague from Oregon, Mr. ULLMAN, graciously acceded to my request and the Ways and Means Committee held a hearing on deep seabed mining revenue sharing on April 13, 1978. The committee, although presently engaged in consideration of the President's tax reform package, will soon markup a revenue sharing provision for H.R. 3350.

For the protection of our national interest with respect to a secure supply of essential mineral resources, for the establishment of a legal framework for the American mining industry, and for international diplomatic reasons, it is essential that H.R. 3350 be passed as soon as possible. We will have settled one of the major issues delaying such passage when the Ways and Means Committee completes its action on revenue sharing.

For this reason, I would like to express my appreciation to my distinguished colleague from Oregon for expeditiously considering this matter in the midst of a very full committee schedule.

There are a number of critically important issues involved in the deep seabed mining debate in general and in the revenue sharing issue in particular. These are explicated in my testimony before the Ways and Means Committee and I would like to bring these to the attention of my colleagues by reprinting that statement below:

STATEMENT OF THE HON. JOHN M. MURPHY

APRIL 13, 1978.

Mr. CHAIRMAN. Thank you for the opportunity to appear before you this morning to speak on an issue vital to the national interest of our country—the mining of mineral nodules on the deep seabed.

I would also like to express my appreciation to Chairman Ullman and the members of this committee for scheduling this hearing today. This is a fulfillment of your commitment to me to consider the revenue sharing aspect of deep seabed mining legislation at the earliest possible date. Given the schedule of this committee and your pending consideration of the president's tax reform program, the members of the three committees of original jurisdiction—Merchant Marine & Fisheries, Interior, and International Relations—are indebted to you for the expeditious consideration of this matter.

Although your immediate concern this morning is focused on a rather narrow—although extremely important—provision of H.R. 3350, I think it is essential that the members of this committee be aware of some of the larger concerns within which this issue is included. I say this because what you do here today with respect to the provision on revenue sharing—an intricate piece which must be fit into this legislative puzzle—is critically important to achieve the many vital purposes for which the legislation has been developed.

The goals of H.R. 3350 have both domestic and international implications. Deep seabed mining legislation has been the subject of congressional consideration for over five years and we have finally reached the stage where a bill on this matter is very close to coming to the floor of the House.

The issue is extraordinarily complex and it would be impossible, in the brief time that we have here this morning, to fully develop all the premises and foundations on which the legislation has been fashioned to this point. It is essential, however, that certain universally agreed-upon facts be brought to your attention to assist you in your consideration of this issue.

As we all know, throughout our history and into the early part of this decade, the American people and their public officials have generally considered the United States a storehouse of low cost minerals that could be extracted and processed indefinitely to meet our growing demands. The OPEC action of 1973 brought that type of thinking to a screeching halt. We began to realize—slowly, at first—that our Nation is vulnerable to the actions of others with respect to supplies of critical sources of minerals and energy.

If our recent levels of imports of certain key minerals is any guide it is clear that this year the United States will import 100 percent of its manganese requirements; 100 percent of its cobalt requirements; and 72 percent of its nickel requirements.

The United States is the largest consumer of nickel in the world. However, we have only one small exploitable nickel deposit in our country—a source that is able to supply less than 10 percent of our total nickel needs.

The United States has no domestic supply of manganese. We import most of this critical metal from Ghana, South Africa, and Brazil. Brazil is beginning to put restrictions on the export of manganese ore suitable for steel making to conserve supplies for its own future use as it slowly moves into the category of a developed nation.

The United States produces no cobalt whatsoever. The bulk of our imports of this essential mineral comes from the African country of Zaire.

In 1976, the last year for which data are available, the balance of payments deficit from these three minerals, plus the 15 percent copper which we import, totaled approximately $1.8 billion dollars.

Will we be forced to continue our reliance on other nations—many of which are not the most politically stable in the world—for our continued supplies of essential raw materials? The answer to that will depend, in large measure, on what the Congress does with respect to deep seabed mining legislation—for three miles below the surface of the ocean lies the most significant untapped source of mineral raw materials known to man. Manganese nodules, containing quantities of manganese, cobalt, nickel and copper, cover millions of square kilometers on the ocean floor. The international aspect of this problem comes from the fact that this deep seabed area is beyond the jurisdiction of any nation, the control of which is subject to negotiations at the United Nations Law of the Sea (LOS) Conference.

Despite the past efforts of our State Department and the American L.O.S. delegation—and in some cases because of it—little real progress has been made in these international negotiations. It is my sincere hope that an international law of the sea can be developed. But it must be one which is reasonable, equitable, and does not discourage the exploration and development of the resources of the ocean by those with the capital and technological capability to tap such resources.

And the fact is that American-led mining consortia have spent approximately $200 million in developing the sophisticated technology required to mine the deep seabed. Our companies, along with their foreign partners, are ready and waiting to accelerate their development activities and to move toward the commercial recovery stage of deep ocean manganese nodules.

However, the boards of directors of these companies have reached a crucial stage in making decisions about future investments in this industry. The primary problem involves an enormously high degree of political uncertainty with respect to a future international regime established by the Law of the Sea Conference.

Although deep seabed mining has been the primary obstacle to a successful conclusion to this ten-year United Nations' effort, the international ground-rules for the management of the resources of the deep seabed will clearly be a provision in any L.O.S. treaty. The subject matter of the deep seabed committee at L.O.S. involves such aspects as the establishment of an international authority for the control of access to mine sites, production controls, quota systems, banking provisions, and revenue sharing. Consequently, the major purpose of ocean mining legislation in the Congress is to establish a stable legal framework within which our companies can operate pending the adoption of a treaty.

It is important to note that the costs involved in the exploration and development is in the range of $600 to $800 million. Obtaining large amounts of risk capital is being severely constrained because of the political uncertainty occasioned by the Law of the Sea Conference.

No one who supports deep seabed mining legislation opposes the negotiations going on in Geneva and we hope that a successful treaty can be finalized. But, in the absence of a treaty, and given the adamant inflexibility of the Third World bloc at that international conference, we can no longer afford to inhibit our technological advances by refusing to pass legislation.

In the absence of legislation, we will ultimately lose our technological lead in ocean mining and transfer our technology to other countries who will reap the benefits of a secure domestic supply of essential minerals and the opportunity to become worldwide exporters of such resources.

A second purpose of the legislation is the responsibility of the United States Government to regulate the conduct of its citizens in international waters and to establish regulatory and environmental controls over ocean mining activities.

Both purposes—a security of tenure for ocean mining companies and administrative control for the government are accomplished in H.R. 3350.

There is an important third reason why the legislation should pass—a reason not contained in the substance of the legislation but evolving from its impact on international negotiations. For years previous administrations have opposed the enactment of deep seabed mining legislation based on the argument that such a measure would have a negative effect on our negotiations at L.O.S.

During these same years, a number of my colleagues and I have consistently maintained that the establishment of a legal framework for the initial stages of an ocean mining program—one that is transitional, pending an international agreement on a regime for the deep seabed—would actually strengthen our negotiating position with respect to the Third World and pursuade all parties concerned to begin to bargain in good faith.

While I take little personal comfort from the fact that the executive branch has finally recognized the validity of my long-held view of the beneficial impact which this legislation would have on international negotiations, the truth of the matter is that the administration has now decided to support domestic seabed legislation. This change of mind has occurred because of the developments at the last session of the law of the sea conference in New York in which there was not only an appalling lack of progress in the negotiations but indeed, on the part of some, an outrageous retrogression.

Because of this situation, Ambassador Richardson requested that the House move ocean mining legislation as expeditiously as possible.

The situation is complicated by the multiple referrals of H.R. 3350 during this session of the Congress. The Committee on merchant marine and fisheries, which has been the only House Committee involved continuously in the consideration of the deep seabed mining issue from its inception as a legislative proposal in the 92nd Congress, reported H.R. 3350 on August 9, 1977. The interior and insular affairs committee, to which the Bill had been jointly referred, reported its version with amendments to the merchant marine and fisheries bill on November 7, 1977. The Committee on International Relations requested and received a sequential referral of the legislation and reported it. with amendments, on February 16, 1978.

Consequently, there were three different versions of H.R. 3350 and, pursuant to Ambassador Richardson's request, the chairmen of the committees and subcommittees of jurisdiction agreed to try to resolve those differences and move the legislation through the congressional process.

There were 19 issues of differences among the three versions. Of these, 17 were generally resolved subject to the refinement of language. One issue, the question of executive agency administration of the program, was to be left for a floor vote. The other issue, which could not be resolved and which prevented this legislation from reaching the floor weeks ago, is the issue which brings us together this morning—revenue sharing.

The versions reported by the Merchant Marine and Fisheries Committee and the Interior and Insular Affairs Committee called for the establishment of an international revenue sharing fund, the details of which were to be filled in by later legislation. The International Relations Committee, reported a provision which, in general, called for the structure of the fund to be established by the Secretary pursuant to regulation, subject to congressional veto. This provision caused some concern with the members of the Ways & Means Committee and although I agreed to remove certain tax-related provisions in another section of the merchant marine bill at the request of Chairman Ullman, this committee's concern about the revenue sharing fund continued.

The problem eventually focused on the question of whether there should be a moratorium on the issuance of permits for commercial recovery to mining companies pending the establishment of a revenue sharing fund by future legislation. Such a moratorium could have had disastrous effects on the opportunity for the mining industry to obtain capital to move toward commercial recovery activities. Given the uncertainty of the congressional process, no investment company in this country could risk providing such capital if permits for commercial recovery were dependent on the enactment of a subsequent revenue sharing bill. Consequently, because it violated the major premise of the legislation, my cosponsor on the bill, Congressman Breaux, and I adamantly opposed such a moratorium but promised to work strenuously for subsequent legislation dealing with revenue sharing.

However, despite the importance of the legislation to our industry and to Ambassador Richardson in his negotiations, the administration refused to support legislation that did not contain this provision. Consequently, negotiations resulted in an impasse which could not be resolved unless a full revenue sharing structure were written into our bill. This was the only viable solution because all members concerned agreed with revenue sharing in concept.

That is why I made my request to you, Mr. Chairman, for the expeditious consideration of this issue by your committee. Only through your efforts here can this matter be settled and allow us to continue to work toward a final compromise among the three committees.

Although our committee has been requesting guidance from the Treasury Department for over a year with respect to the structure of a revenue sharing program, nothing had come forward until recently. Only when this impasse was reached and it appeared no legislation would be forthcoming did the department finally send suggested language to the appropriate members. You have that language before you this morning. It has been carefully worked out within the administration and, as I understand it, with representatives of the industry and it reflects at least a conceptual consensus among the interested parties.

I would simply like to go on record as supporting this proposal and I believe that the chairman of the other committees and subcommittees will also support it. My only recommendation is that the financial contributions required of our industry be reasonable. Any tax or royalty which is unconscionably high and which discourages investment in this new and risky venture will undermine the major premise of the legislation.

Frankly, without expertise on intricate tax matters, I am unable to fully assess all the implications of the language before you. However, my staff, and that of the other two applicable committees, stand ready to work with you and your staff to draft acceptable language.

The concept of the establishment of a revenue sharing fund, the proceeds of which would be made available to the international community pursuant to a law of the sea treaty, is one which I have continually supported throughout the debate on deep seabed mining. Now the time has come for precision in and implementation of that concept and I stand ready to assist you in any way possible to develop a provision which is acceptable to the members of this committee and which can be integrated into H.R. 3350.

Mr. Chairman, in closing, I would like to emphasize my conviction that all the participants in the national debate on ocean mining's future—the administration, the industry, environmental and citizen organizations, and the Congress—have the same basic goals in view.

In the past, our strong differences on how best to proceed with this new endeavor may have confused and clouded these goals. However, today the events at the Law of the Sea Conference, and throughout the world on other resource questions, have considerably narrowed the range of effective steps the United States can take to promote its mineral's interest in the deep seabed.

With this reality in mind, a new political consensus has emerged in the administration and in the Congress—a consensus which will remove obstacles to the proper and environmentally sound development of the ocean. With your assistance today, we can eliminate one of the most serious differences among the committees and between the Congress and the administration on a proper revenue sharing structure. It is essential that deep seabed mining legislation proceed in an orderly and expeditious fashion and, if we can resolve our revenue sharing problem today, a giant step will be taken to move this critically important bill to the floor of the House.

I believe that we are all becoming aware of the realities of international economics—realities which indicate that to discourage those with the technological and financial capability from developing a resource will ultimately result in the nondevelopment of that resource. Neither the industrialized countries nor the third world can afford the danger inherent in that reality.

As each nation moves to become exporters—rather than importers—of the world's essential resources, the international arena will take on a new and uncertain dimension. Until and unless this uncertainty is clarified, we must not allow our nation to be placed in a position of weakness with respect to the international community.

Mr. Chairman, I once again commend you and the members of this committee for your expeditious consideration of the deep seabed mining revenue sharing issue and I appreciate your attention to my remarks this morning. I would be happy to answer any questions from the members. Thank you.●

## THE RELEASE OF JACOBO TIMMERMAN

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. GILMAN. Mr. Speaker, I am pleased to join with the gentleman from Massachusetts, Mr. CONTE, to inform our colleagues of the progress of the human rights issue in Argentina.

The terrible cost of the current political, economic, and social crisis in the Republic of Argentina can only be measured in human terms. Since the overthrow of the Isabel Peron government in March 1976, the military government has pursued a stern campaign against leftist guerrillas and terrorists. This action, along with the guerrilla activity, has resulted in the deaths, disappearances, imprisonment and exile of thousands of persons—the Argentine Government acknowledged over 3,600 political prisoners.

One such imprisoned individual, Mr. Jacobo Timmerman, the editor and publisher of the leading Argentine newspaper, La Opinion, has come to symbolize the plights of the many victims of this human rights crisis. Because of his internationally respected reputation as a journalist and defender of human rights, Timmerman's imprisonment for over a year without any charges has produced worldwide concern for the violation of human rights in Argentina. The Argentine Government's prior actions in this case have been an indication of the lack of concern for and commitment to the protection of human rights for all citizens of that troubled nation.

With this background in mind, I am highly encouraged by a report forwarded to me today by Ambassador Jorge A. Aja Espil of the Republic of Argentina, detailing the partial release of Mr. Timmerman, allowing his transfer from the federal police station to his home where he remains under "house custody." The government's decision is heartening to all of us concerned about human rights.

During our committee's study mission to Argentina last August, I met with Mr. Timmerman, with members of his family and with officials of the Argentine military junta in an effort to express my concern for his well-being. Since that time, I have made personal appeals for his release to President Videla and Foreign Minister Montes of Argentina and to President Carter and Secretary of State Vance. In all of those appeals, I urged that Mr. Timmerman not only be released, but be allowed to emigrate from Argentina if he so desires.

The recent action in releasing Mr. Timmerman under house arrest is encouraging as a symbol of the government's attitude. But it also poses a serious new threat to his life. Because of his steadfast opposition to terrorism, Mr. Timmerman has received death threats from forces outside the government on both the right and the left. The concern for his well-being under the present circumstances is well-founded in a recent series of attacks and killings of other recently released prisoners. The government's recognition of this concern was shown by their escort of Mr. Timmerman to his home, which was led by four police cars, two police motorcycles and a troop carrier filled with paramilitary police armed with machineguns. Even though this courageous man is now under heavy guard, I am still fearful that he could

be harmed and repeat my urging that he now be allowed to leave the country.

Mr. Timmerman's release comes during a significant government effort to identify and release several thousand political prisoners. It has been seen by some observers as a positive indication of the increased influence of the more moderate segments of the government over the more hard line elements. I would like to express my encouragement to President Videla to continue in these positive efforts as he seeks to bring extremists on both the right and the left under control. He should not let the progress that has been achieved to date slip away but should proceed with the full restoration of human rights for all citizens of Argentina and, hopefully, the eventual restoration of democracy to that nation.

The following is the full text of Ambassador Jorge A. Aja Espil's report of April 17, 1978:

APRIL 17, 1978.

Hon. BENJAMIN A. GILMAN,
*Congress of the United States,*
*Washington, D.C.*

DEAR BENJAMIN: Being aware of your constant concern for the welfare of publisher Jacobo Timmerman, which you expressed to me on several occasions, I am pleased to inform you that he has been released from prison and was escorted home where he was met by his wife and son. He will however, remain under house custody at the disposition of the Executive Branch.

I am sure you will be happy to hear that Mr. Timmerman is in the same perfect physical and mental condition you found him in when you visited him on your trip to Argentina. From his own comments, he is a little overweight, close to twenty pounds.

My very best regards,

Sincerely yours,

JORGE A. AJA ESPIL,
*Ambassador.*●

## TRIBUTE TO DR. VINCENT BONELLI

### HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. OTTINGER. Mr. Speaker, on Friday evening, April 21, members of the Heritage Lodge No. 2227, Order Sons of Italy in America, will gather to honor Dr. Vincent F. Bonelli.

Dr. Vincent F. Bonelli, son of the late Joseph and Carmella Bonelli, immigrants from the Province of Calabria, Italy, was born in New Rochelle. He attended New Rochelle public schools, then went on to New York University where he received both his bachelors and masters degrees.

In 1976, Dr. Bonelli received his Ph. D. from Fordham University in New York. At present Dr. Bonelli is professor of history and political science at City University. He also serves as adjunct professor of history at Westchester Community College, and is a member of the American Historical Association, the Organization of American Historians and the American-Italian Historical Association.

Dr. Bonelli is past president of the Calabria Mutual Aid Society in New Rochelle. His activities are many and varied in the field of academia. The general public will best recall the excellent Saturday morning radio program "Our Italian Heritage," presented on WVOX in New Rochelle—a presentation which Dr. Bonelli both hosted and produced. Each of these programs proved to be informative and inspiring—above all, they pointed out the significant contributions made by the Roman Empire to Western civilization as we know it today.

Dr. Bonelli is married to the former Maria Loschiavo. They have two fine sons, Joseph and Anthony.

Dr. Bonelli is a proud American who has contributed his knowledge and energies to promote better understanding of our great Italian heritage. He is one of the first citizens of New Rochelle, Westchester, indeed the county, and is most worthy of the honor he is receiving.●

## SOVIET THREAT TO THE PANAMA CANAL

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. DORNAN. Mr. Speaker, the following address by the late and distinguished Ambassador Spruille Braden says it all. The Ambassador delivered this still timely speech before the Bel-Air Council of Navy League of U.S.A. on February 28, 1977. His tragic passing over the Christmas holidays was during another trip to Los Angeles to alert U.S. citizens to the long-range dangers of giving the Panama Canal to an unstable dictator. On this fateful day the Senate votes on the major treaty. Let us hope as future researchers read Ambassador Braden's wise counsel they find his advice prevailed in the Senate:

It is an honor to be invited by Dr. David Gill Evans, President of the Bel-Air Council of the Navy League of U.S.A. to address this distinguished and knowledgeable audience. I am grateful indeed . . . just as I am proud of my life membership in the Bel-Air Council of the Navy League.

During many years of an active life throughout the Americas, I have accumulated many convictions and I hope perspicacity, in keeping with the old Spanish saying: "The devil knows more by reason of his age, than because he is a demon.

One of my strongest persuasions is that the greatest threat to "our civilization" is a world-wide breakdown in morality. This we witness in and out of government penetrating every strata of society.

I further believe that the most widely destructive of all immoralities is that centered in and emanating from Moscow. Vide:

One. The unending and outrageous cruelties perpetrated on the Russian people, as described by Solzhenitsyn;

Two. The so-called "liberation" movements propagated everywhere by Soviet agents, foreign communists and misguided dupes;

Three. Russian ambitions for world hegemony.

The Soviet already is progressing by strides in its plans to convert the American republics into a conglomeration of satellite and slave states.

Today I shall summarize only the four most critical areas in the Western Hemisphere.

First: Argentina exemplifies how a superior, educated, wealthy and religious nation, possessing virtue and great mental and physical assets for over three decades has suffered a deluge of evils as her government sank into the depths of degradation, corruption, venality and irresponsibility. Murder, torture, kidnapping, terrorism and guerrilla warfare ensued.

The cause of all this was the breakdown in morality and communist infiltration.

As far back as 1945, when I served as ambassador in Buenos Aires, the then vice president and dictator, Peron, while pretending opposition to communists, actually was intriguing closely with them; they had replaced the Nazis in his esteem.

Simultaneously, he, his mistress, later wife, Evita, and his henchmen, enriched themselves on a vast scale.

When Peron died, his third wife and heir, Isabelita (a former bar girl) suddenly found herself the nominal head of a government which had fulfilled 85 percent of the program laid down by Karl Marx and Friedrich Engels. Presently she is imprisoned for stealing public funds.

As Argentina was about to fall completely into communist hands, the armed forces, under General Jorge Rafael Videla (a man of highest character) seized power. They enlisted in their government some patriotic and experienced civilians, such as the new Minister of Economy, Martinez de Hoz. As a result of the military's firmness and courage, communism, terrorism and corruption gradually are being eradicated. Argentina at long last now may hope eventually to retrieve its old position as a responsible, respected and prosperous nation. Realistic reforms may recapture Argentina's idealism.

From 1922 through 1938 I knew Argentina at the apex of its prosperity, political and social well-being. But in 1945 when I returned as ambassador, I witnessed the beginnings of the decomposition. Communism and its twin, terrorism, later almost leading that pitiable nation into the jaws of destruction.

What I saw beginning 30 years ago in Argentina, I now observe starting in the U.S.A.—traditionally cherished ideals are attacked, while disintegrating corruption is tolerated and exotic ideologies are circulated through our schools, the media, and pretty much everywhere.

Second: The collapse of Chile into communism was more precipitous and complete than Argentina's; first came the election to power of the Social-Democrats (actually Socialists); four years later they helped the Marxist, Allende, to the presidency, with only a 35 percent constitutional vote.

This accession to power with his socialist-communist cohorts, was planned, incited and aided by the Soviet Union. Moscow was anxious to create another communist satellite in Latin America, and in so doing, to obtain a naval base at Talcahuano on Chile's South Pacific Coast, just as it had acquired its naval bases, underground submarine pens, missile sites, encampments and other facilities in Cuba.

Unfortunately the Chileans, overly confident in their dedication to democracy, credulously did not awaken to the threatening communization and loss of freedom until their backs were against the wall.

For more than a year the populace, deceived and helpless, allowed matters to drift. Finally they were awakened with a bang by the killings and tortures, imprisonments and property confiscations, plus the influx of trained commissaries and guerrillas from the Soviet Union, Cuba and elsewhere along with shiploads of arms and munitions for the Allendistas. Fierce fighting broke out be-

tween communists, both national and foreign, and patriotic Chileans.

The first mass protest was staged by women from all walks of life demonstrating in the streets and surrounding the presidential palace, banging pans and kitchenware. Some were arrested; others physically abused. There followed a paralyzing strike by truck drivers.

In the nick of time the military intelligence discovered that Allende and his coconspirators had developed a so-called "Z" plan to assassinate within one week all top military officers and leading citizens.

Immediate counter-action was imperative. It was taken and thousands of communists, guerrillas and criminals were arrested; Allende committed suicide.

The new military government had to fight fire with fire. Some ill-treatment even of innocent people, was unavoidable if Chile were to be saved from Moscow-controlled communism.

Please believe me when I assert that:

1. The only thing the communists respect or fear is physical force greater than their own.

2. A communist commitment or pledge is very rarely fulfilled. Chile is the only nation, with scant aid from abroad, which has been able, by the courage and sacrifice of its citizenry, to overthrow a firmly established communist dictatorship which had seized power nefariously and by trickery. Chile still has to defend her independence from armed communist bloc attacks from within and without her borders; it also must clear away the lies and deceit disseminated throughout the world, by communists and too often believed by the guileless.

Despite the catastrophic economic and social results of the Marxist regime, the Chilean people have tightened their belts and are repairing the damage. Their record on "human rights" is now better than the majority of countries in the United Nations who accuse them.

On reflection, we must see that Chile and Argentina are major battlegrounds between east and west, between the forces of communism and freedom.

Third: Cuba, as a full fledged Soviet satellite and Soviet-occupied fortress, is a major danger to the United States.

At Moscow's command, Havana dispatched 15,000 or more troops to fight for communism in Angola, Mozambique and elsewhere in Africa. The USSR maintains at least 10,000 of its own military, KGB and intelligence services in Cuba. It directs that island's forces, provocateurs and espionage services in and out of Cuba. It operates the missiles, naval and submarine bases I have mentioned.

Castro first attracted notice as a gangster and murderer. Under his regime thousands have been tortured and killed. 20,000 to 40,000 political prisoners are suffering or perishing in prisons today.

Yet, despite all of these horrors and the threat to the U.S.A. from only 90 miles off our shores, there are those high in government, even business, who advocate renewing diplomatic relations with Cuba. How blind or callous can they get?

Fourth: It suffices to say about Panama that our sovereignty and ownership of the Canal Zone in perpetuity twice has been reaffirmed by U.S. Supreme Court decisions, by many leading Panamanian statesmen, presidents and ministers, as well as by lower U.S. Courts. As recently as December 17, 1976, District Judge Guthrie F. Crowe stated that he believes the U.S.A. owns the Canal Zone: "I think the United States is the owner of this property by reason of the treaties with Panama and Colombia, payments to the French (Canal Co.) and the creation of the land commission in which people from Panama and the United States functioned as a court with thousands of claimants. (The land) was paid for with United States money."

Our title is every bit as secure legally as are our territorial acquisitions from France, Spain, Mexico, Denmark and Russia.

The total U.S. investment in Panama is estimated at nearly $7 billion.

The arguments by our State Department and its representatives as to why we should negotiate a new treaty ceding our full rights to the canal and the zone are largely fallacious in substance and logic.

The illegally constituted dictator, Torrijos, threatens that unless we deliver the Panama Canal Zone and operations of the canal to his government within a limited period, we will have to wage another Vietnam war in the area.

Castro reportedly has several thousand troops now in Panama, and, of course, could bring back his armies from Africa, already trained in Angola. The State Department and our negotiators supinely agree that Torrijos will precipitate guerrilla warfare and sabotage.

Actually Torrijos fears if we do not sign the new treaty, he will be thrown out of power. In this event he knows Moscow and Castro could not rescue him. On the other hand if, with the help of the latter two, he can deliver the canal, even indirectly to the comintern, he will be assured of his job for life, just as is Castro.

We have defended the canal for 70 odd years, through two world wars, countless riots and attempted sabotage. Are we so weak and timid that we must now run away from Torrijos' and Castro's Soviet-inspired threats and blackmail?

The real issue for the U.S.A. is not vis a vis Panama, but the USSR.

If we lost the Panama Canal Zone to the Soviets, even indirectly, this humiliation would be disastrous indeed. It might well cause our friends and allies, especially in Latin America, to lose all respect for and confidence in us and abandon our leadership, in order to play with the Soviet. Everybody wants to be with the winner.

The following bits of history are pertinent:

A. Phillip II of Spain declared that whoever controls the Caribbean will dominate the western hemisphere. President Jefferson expressed the same thought. Admiral Mahan, one of the greatest strategists, warned that any enemy of the USA controlling the Caribbean could invade our Gulf Coast and so proceed up the Mississippi Valley to capture the heartland of the United States.

B. Lenin listed in sequence the following "musts" for the Soviets to make effective their world dominion:

1. Secure USSR's western borders through absorption or Moscow rule;

2. Communize and control the Far East, especially Southeastern Asia;

3. Proceed similarly in Africa;

4. The same for Latin America;

5. The United States, thus surrounded, would fall like overripe fruit.

Lenin's successors raise point 6: To build their naval forces to overwhelming strength, accompanied by widely dispersed and fully equipped bases. Their objectives include the domination of all sea lanes, passages and routes; among these the Panama Canal is paramount.

Self-evidently the aforementioned six points are well on the way to successful fruition. The security of Russia's western frontier, including Latvia, Lithuania, Estonia, the Ukraine, and eastern European countries has been ratified by the Helsinki agreement signed August 1, 1975, by the United States and other western governments.

Moscow and Havana jointly have violated the Helsinki agreement in Angola, Mozambique and elsewhere, communists have ignored concessions obtained by the free world at Helsinki stipulating greater freedom of movement for western journalists and promises to insure human rights throughout the Warsaw Pact nations.

The Soviet Union's hankering to control the Panama Canal Zone was openly stated by Major Sergei Yuworov in an article published in the Soviet military organ "Red Star", reproduced by the Cuban magazine "Bohemea" on March 17, 1957, in respect of the canal:

"Due to its privileged location as the juncture between South America and rest of the continent, including the canal, which permits U.S.A. warships to operate simultaneously in the Atlantic and Pacific must for the Soviet Union be considered as a 'priority zone'."

He adds that Panama can be attacked from Central America, Colombia or from Cuba, Puerto Rico and other Caribbean Islands. He intimates that some or all of these can serve as Soviet naval bases.

It is essential for us to remember that for over a quarter of a century we have been beset by one humiliation after another, each of them contrived, usually financed, militarily aided and equipped by Moscow.

Our major blunders or defeats in policy and/or action were:

MacArthur prohibited from crossing the Yalu or bombing the bridge;

The inconclusive falsely labeled U.N. action in Korea;

Failure to lend help by air to the Hungarian uprising against Russian troops;

Non-resistance to the Berlin Wall;

No aerial help at the Bay of Pigs;

The Cuban Missile crises—tearing up the Monroe Doctrine;

Our shameful commitment to Khruschev neither to invade Cuba nor permit others to do so;

The "no-win" war in Vietnam;

The so-called "Paris Peace Treaty With Honor," with which North Vietnam never complied.

This series of surrenders only become explicable when one reads National Security Council Report Number 68 (NSC–68) of April 14, 1950, drafted after President Truman's orders as a statement of our basic policies with respect to the USSR.

The study, opinions and conclusions of NSC–68 were based on reports from the Secretaries of State and Defense; they also were considered in at least one council meeting by the Secretary of Treasury and the heads of the other three top economic agencies of the government.

The content and portent of this super "Top Secret" 65-page document has been kept completely unknown to the public, Congress, and even Senior Army, Navy and Air Corps Officers commanding at the time of the afore-listed humiliations.

This "Top Secret" classification, pursuant to law, terminated in April, 1975. On September 30, 1976, a brilliant journalist, Alice Widener, began publishing her expose and analysis of NSC–68. She sums up its principal aims as follows:

1. "To avoid nuclear war but to accept a Soviet nuclear first strike against us if necessary, hoping to ward it off by building up our own and our allies' military, economic, and social strength as a deterrent.

2. To confine U.S. military action to strictly limited counteractions.

3. To seek co-existence with the Soviet Union in the hope that democracy will win out eventually against dictatorship, that time would be on our side, and that the USSR would undergo changes eventually leading to abandonment of its goal of world domination.

4. To try to contain the expansion of the Soviet Union beyond its territory, but not to do anything directly challenging Soviet prestige.

In conceding Soviet prestige as untouchable, NSC–68 seeks to protect Soviets from any kind of effective attack—be it military, ideological, or psychological."

NSC–68 is a self-contradictory document, at times dove-ish and weak; at others hawk-ish and vigilant. On the one hand, it accurately sets forth the objectives of the U.S.A. for peace and freedom, as laid down by the Constitution and the founding fathers.

On the other hand, it describes the fundamental and unchangeable program of the USSR as follows:

"The design, therefore, calls for the complete subversion or forcible destruction of the machinery of government and structure of society in the countries of the non-Soviet world and their replacement by an apparatus and structure subservient to and controlled from the Kremlin. To that end Soviet efforts are now directed toward the domination of the Eurasian land mass. The United States, as the principal center of power in the non-Soviet world and the bulwark of opposition to Soviet expansion, is the principal enemy whose integrity and vitality must be subverted or destroyed by one means or another if the Kremlin is to achieve its fundamental design."

Later NSC–68 states:

"With particular reference to the United States, the Kremlin's strategic and tactical policy is affected by its estimate that we are not only the greatest immediate obstacle which stands between it and world domination, we are also the only power which could release forces in the free and Soviet worlds which could destroy it. The Kremlin's policy toward us is consequently animated by a peculiarly virulent blend of hatred and fear."

NSC–68 continues to characterize all the evils of totalitarian dictatorship and the latter's determination to dominate the world only limited by expediency. It says:

"It is estimated that, within the next four years (i.e., from 1950), the USSR will attain the capability of seriously damaging vital centers of the United States, provided it strikes a surprise blow and provided further that the blow is opposed by no more effective opposition than we now have programmed."

The first time I read NSC–68 I said:

"In each assumption the authors establish a series of ideals as definite possible objectives to be carried out, then turn around and prove that these ideals are utterly impossible of accomplishment. The ink on NSC–68 was no sooner dry than the outbreak of the Korean War made a mockery of this do-gooding optimism."

The comintern's leaders—perhaps due to blood and inheritance—possesses a strain of Oriental innate cruelty, dishonesty and shrewd depravity. They follow the precepts of Sun Tzu, who in China 600 to 500 years before Christ wrote the following in a military textbook:

"Undermine the enemy first, then his army will fall to you. Subvert him, attack his morale, strike at his economy, corrupt him: sow internal discord among his leaders; destroy him without fighting him."

This is precisely the formula Moscow successfully has pursued and is directing against the U.S.A.

As a result, we are drawing nigh to the finish line. Yet there has been no perceptible inclination by either Democratic or Republican administrations to get rid of the NSC–68 policy recommendations, which so often have imperilled and still are entrapping United States' security with an apparently endless chain of humiliations.

If, due to our innate kindness of spirit and our religions' teachings of peace, we endure and add to the list I have already given you one more humiliation, one more breach of a solemn agreement, one more surrender of our rights and sovereignty under the 1903 treaty with Panama, then indeed the Caribbean, adjoining waters and sea lanes will become part and parcel of a huge Soviet lake.

If this happens, we then may have three options:

1. If possible, to rebuild a definitive superiority in military power and defenses.

2. To await a Soviet blackmailing ultimatum for surrender.

3. Nuclear war.

May God save us from the last two alternatives! ●

## NEUTRON BOMB PRO AND CON

**HON. PAUL N. McCLOSKEY, JR.**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. McCLOSKEY. Mr. Speaker, as the neutron bomb debate develops, I thought the House should be aware of two scientists' views on the bomb's pluses and minuses. The attached articles from the San Francisco Chronicle of April 8 outlines the views of Edward Teller, one of the fathers of the hydrogen bomb, and Sidney Drell, a former consultant to the President's Science Advisory Committee.

I trust the articles will be as informative to our colleagues as they have been to me.

The articles follow:

A SCIENTIST'S EVALUATION—NEUTRON BOMB'S SPECIAL DANGER

(By Sidney D. Drell)

(NOTE.—Dr. Sidney D. Drell is an internationally known physicist and deputy director of the Stanford Linear Accelerator Center. He is also a consultant to the National Security Council, the Arms Control and Disarmament Agency, and the Los Alamos Scientific Laboratory.)

The furor in the American debate over the so-called neutron bomb stems from two causes:

One is the inaccurate public perception that the bomb is a radically new weapon designed to kill people but save buildings. The other is the fear that once such weapons are deployed they are more likely to be used than the current more indiscriminately devastating nuclear weapons.

On the technical side, the bombs under question are a refinement, but hardly a major change from existing nuclear weapons. Like all nuclear weapons, however, the neutron bomb is radically different from non-nuclear weapons, and like all nuclear weapons it kills through blast, heat, prompt nuclear radiation, and longer-term radioactive fallout.

Although designed to increase the "prompt" neutron radiation that kills people but does not destroy buildings, the neutron bomb—if it explodes near ground level—can still spread dirty radioactive debris that renders large areas uninhabitable for long periods of time.

Furthermore, it packs an awesome wallop. Today's debate, and President Carter's proposal, centers around a weapon called the "W–70 Mod 3 warhead." It has a yield of about one kiloton, and is at least a hundred times more destructive of both matter and man than the largest blockbusters dropped on Europe in World War II by the Allied bombers.

Technically, this warhead is being designed for long-range artillery and for the Army's Lance missile, which is deployed in Europe with the NATO forces. It is termed an "enhanced radiation" weapon. It produces an excess of high energy neutrons from the fusion reaction. This high energy radiation penetrates greater thicknesses of earth or metal, such as tank armor, and can thereby kill or incapacitate their crews of bunkers or heavily armored tanks.

In the so-called neutron bomb, its lethality due to immediate high energy radiation is increased compared to the lethality and destruction caused by the blast generated in current nuclear weapons. While the force of a W–70 Mod 3 weapon is only equal to about a kiloton bomb its radiation effects are approximately those of a current ten kiloton weapon. Hence, it would cause less collateral damage through blast, heat, and long-term radioactive fallout than the nuclear weapons it is designed to replace in the armed forces inventory.

However, the neutron bomb still yields a substantial component of fission products that result in long-lasting residual radioactivity. And the enhanced high-energy neutrons of its radiation, when ultimately absorbed, produce substantial radioactivity in most materials.

Although the neutron bomb's killing power from neutron radiation is much greater than its lethality due to blast, one kiloton of explosive energy at one-third of a mile can in fact be highly devastating to property, since it creates maximum wind velocities of greater than 200 miles per hour. Nor will this weapon be the smallest among the 7000 or so tactical nuclear weapons in our NATO arsenal.

Furthermore, in any discussion of the military uses of such weapons in close engagement of troops it should not be assumed that the weapon can be delivered with pinpoint accuracy. In fact, at maximum range the Lance missile system has an impact error not too different from the lethal range of the neutron bomb's radiation—which can mean extremely widespread blast damage when a salvo of missiles is fired.

The neutron bombs now being debated would have only a marginal effect on our military posture. The strongest arguments presented for their deployment are based on political factors and forces in the NATO alliance. However, there is a major political danger in a decision to continue the development and deployment of such "enhanced radiation" weapons.

Eventually and inevitably these refinements in weaponry, which require a continued program of underground nuclear bomb tests will lead to less destructive and less radioactively "dirty" nuclear weapons—that is, to more refined "mini-nukes"—and hence to a diminished gap between nonnuclear and nuclear war.

But is it in our interest—or anyone's—to diminish this gap? I think not, particularly since some may find such a transition to nuclear conflict more tempting. Once a conflict becomes nuclear, and amidst the confusion, the uncertainties, and the errors of actual battlefield information, what would keep it limited and prevent it from escalating to a devastating nuclear holocaust as the participants dig deeper into their vast nuclear arsenals?

It is precisely on the issue of creating the illusion that the neutron bomb is acceptable and distinct from other nuclear weapons that I see the danger of continuing the neutron bomb programs. The government's unclassified "Arms Control Impact Analysis" of this weapon prepared by the National Security Council and transmitted to the Senate last July 13, describes this issue very well:

"It can be argued that the improved warhead may make initial use of nuclear weapons in battle seem more credible, which might enhance deterrence. However, by the same token, it can be argued that it increases the likelihood that nuclear weapons would actually be used in combat. In any event, the escalating potential is the same for this weapon as for any other nuclear weapon."

The council's official statement recognizes

that "a decision to cross the nuclear threshold would be the most agonizing decision to be made by any president," and adds quite significantly: "Thus, the president would be faced with a decision of the same nature whether or not this class of weapons or other tactical nuclear weapons are used."

The development of the neutron bomb emphasizes the need for general qualitative constraints in weapons technology by both the U.S. and the Soviet Union. In particular, the neutron bomb issue focuses attention on the importance and need for a comprehensive test ban treaty that would stop all nuclear bomb testing.

The U.S., like the Soviet Union and other signatory nations, committed itself to working for such a treaty at the time of the atmospheric test ban treaty in 1963, and reaffirmed his commitment in the nuclear non-proliferation treaty of 1970. The U.S. is now engaged in negotiations with the Soviet Union and Great Britain towards a comprehensive test ban treaty.

The issues raised in the discussion of the neutron bomb demonstrate that the time for this treaty is now. It must come before further technological progress based on weapons testing leads to still smaller and less "dirty" nuclear weapons, and before society is deluded into accepting the dangerous notion that limited nuclear war—tactical or strategic—may stay limited to small nuclear bombs and to military targets alone and that we may cross the threshold to nuclear weapons and still survive as a functioning society as we now know it.

TELLER BACKS THE BOMB

Edward Teller, who played a key role in developing the hydrogen bomb said yesterday the neutron bomb could make a "great contribution" in preventing a Soviet takeover of Western Europe.

The neutron bomb said Teller in a statement, has "negligible effects of producing shocks, heat or fallout on the ground. Anyone at a distance of a mile or in a deep basement is safe."

The "collateral effects" of war are less in the case of neutron bombs than for other methods of defense, said Teller, who is now a senior research fellow at the Hoover Institution at Stanford University.

"Neutron bombs," he said, "are less destructive for the defended and more effective against the invader than an artillery barrage.

"A decision not to deploy the neutron bomb may seal the fate of Europe. To deploy the neutron bomb will give us hope and time. If time is used wisely, our most important objective, peace and freedom, may yet be attained." ●

## TRIBUTE TO SISTERS OF ST. FRANCIS OF ASSISI ROMAN CATHOLIC CHURCH, MINERSVILLE, PA.

### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. YATRON. Mr. Speaker, I would like to take a moment to pay tribute to the good Sisters of the St. Francis of Assisi Roman Catholic Church of Minersville, Pa.; 1978 marks the 50th year in which these dedicated sisters have taught the children of Minersville in the parish school.

During the past 50 years, the community of Minersville has watched as these nuns, the Sisters of St. Casimir out of the Chicago motherhouse, have brought Catholic education, inspiration, tradition, religion, and social activities into the lives of so many.

At a time when there are so many issues dividing the American people, religious communities such as the St. Francis of Assisi Parish, provide a bond of brotherhood, and instill those time-tested religious values, which we need so badly today.

It is only fitting, therefore, that the Members of Congress take this moment to give special recognition to the Sisters of St. Casimir. The selfless dedication and love which they have exhibited for the past 50 years is truly deserving of such an honor. I know that I speak for the entire Congress when I take this opportunity to wish these good Sisters every continued success on the occasion of the celebration of a half century of service.●

## THE IMPORTANCE OF THE AMERICAN BLOOD COMMISSION

### HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. WALSH. Mr. Speaker, recently, Dr. John B. Henry, professor of pathology and director of the clinical pathology program at the State University of New York, Upstate Medical Center, in Syracuse, N.Y., was installed as president of the American Blood Commission.

During his acceptance speech, he offered a critical look at the state of our Nation's blood program today. Following are his remarks:

I accept the challenge to serve as president of the American Blood Commission as the commission enters its fourth year of working to achieve the purposes of the national blood policy. These are laudable goals which embrace four topics: Supply, quality, and accessibility of the blood supply and the efficiency with which blood products and services are provided.

A review of the minutes of the commission, board of directors, executive committee, and several committee and task force reports clearly indicate that the ABC has already made great strides in the development of a coordinated national blood program. Since the national blood policy calls for "a pluralistic and evolutionary approach to the solution of blood collection and distribution problems," and the ABC has virtually unlimited talent in terms of dedicated professionals, and consumers and donors throughout the Nation, there is every reason to be optimistic about attainment of solutions to the problems of blood supply, processing, distribution, and use of blood.

There is not a single individual who has been involved in blood banking to any extent who does not appreciate both the involvement and the impact of the Federal Government in terms of blood bank regulations and research, and concurrently, the role of the private sector to attain optimal patient care needs of an increasingly sophisticated, and demanding nature. This is an interdependent relationship, and one that lends strength to the pursuit of the national blood policy's goals.

What do I project for the next year?

First and foremost, every effort must be made to achieve an adequate supply of blood and blood products to meet all patient care needs, including management and diagnostic requirements, for all Americans regardless of their location and economic status. Coordination and augmentation of voluntary donor recruitment efforts are crucial to increasing the number enlightened, responsible and responsive blood donors in our Nation.

Second, the identification and recognition of regional associations of blood service units in conjunction with efficiency studies are timely and crucial developments. Effective and efficient regional associations may well be the backbone or framework of a national blood program. Such regional associations of blood service units, which should emerge from the grass roots, can and should contribute to improved access to the national supply of blood as well as to improvements in collection, processing, storage and utilization of blood and blood products.

Third, the ABC's committee on utilization of blood and blood components should enhance efficiency through special efforts directed to physicians in terms of guidelines for ordering blood and blood components as well as utilization review data to correlate with optimal medical care. This coordinated strategy to enhance the education of medical professionals regarding appropriate transfusion practice has great potential significance both as a major contribution toward the management of the blood resource, and for better patient care. Such an educational strategy can and should be focused at the local level in every transfusion facility in our Nation.

Fourth, a national blood data center will provide crucial information requisite to meeting needs for a system of data collection, analysis, and dissemination that is non-existent today, and which urgently is needed if we are to have a rational basis for making improvements in our national blood program.

Fifth, a specific plan in terms of goals and objectives with priorities should be forthcoming from the ABC Long-Range Planning Committee within 9 months; hopefully there also will be recommendations for a mechanism by which the commission's progress in implementing plans and objectives can be evaluated as well as identification of a capability to evaluate the ABC's achievements of its goals and objectives over time.

Sixth, the Finance Committee must address a most important issue and develop proposals for solid fiscal support to the ABC. It will assess the present dues structures with a goal of developing a more consistent dues formula. The ABC membership dues structure, which is composed of two fee levels, one fixed and one characterized by negotiable membership dues, needs a critical reassessment in this new fiscal year.

Finally, more than financial contributions from its members and benefactors, the ABC needs a commitment from its membership, the American public, and their public servants in terms of support for the ABC itself to implement a national blood policy and indeed to provide the framework as well as an impetus for a coordinated national blood program.

When he took office as president in 1975, Mr. Corson remarked that the "regretted that the blood banking community had not yet reached an agreement to select one of its own as president" of the ABC. Hence, I have a special sense of obligation and commitment having emerged from the ranks of blood banking to serve as president of the American Blood Commission. With your support and understanding I will do my best to sustain the purposes of the ABC and serve all patients and all Americans through implementation of our national blood policy.

As a physician, I am, of course, most concerned with the patient. Indeed, I place the patient first and foremost in blood banking.

To provide all blood components and derivatives where and when needed by our patients is absolutely essential, of course I am concerned about supply of blood and its availability as well as cost and quality, but we must not lose sight of our ultimate objective "to transfuse our patients with what they need when they require it."

We cannot falter in this goal of implementing our national blood policy for if we do, legislation may be forthcoming with a concomitant expansion of Federal involvement and control in blood banking. Indeed, the ABC may represent a model to sustain private sector participation is not only blood banking, but health and medical care delivery.●

## OAS SECRETARY GENERAL ORFILA AIMS FOR PRACTICAL SOLUTIONS TO HEMISPHERIC PROBLEMS

### HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. FASCELL. Mr. Speaker, the dynamic Secretary General of the Organization of American States, Alejandro Orfila, has increasingly called attention to the fact that the United States, Latin America, and the Caribbean must find practical rather than theoretical solutions—through the forum of the OAS—to the major problems confronting the Western Hemisphere.

Under the Secretary General's leadership the OAS has now provided a concrete demonstration that practical solutions are not only available but can be used in even the difficult area of trade relations. This demonstration has taken the form of OAS cosponsorship, with the State of Florida, the city of Miami, and Metropolitan Dade County, of the Trade Fair of the Americas. This event—the first of its kind—was held between March 8 and 19 at the Miami Expo Center and was given strong support by the Carter administration which sent the First Lady, Mrs. Rosalynn Carter, to inaugurate the exhibition. Over 5,000 products from 600 Latin American exhibitors were displayed and the fair is projected as a continuing annual commercial and trade event, bringing Latin American and U.S. importers and exporters into close cooperation.

Ambassador Orfila, Governor Reuben Askew, Mayor Maurice Ferre, and Mayor Stephen D. Clark are all to be congratulated for bringing off this extraordinary and practical demonstration of hemispheric collaboration and friendship whose positive impact will be felt for years to come on the lives of millions of Americans in every part of our hemisphere. Because many members of Congress will be interested in this new channel of trade relations for the Americas, I am including at the end of my remarks the fine welcoming address to the Latin American exhibitors given on behalf of the President by Mrs. Carter.

Mr. Speaker, I would point out, moreover, that not only has Secretary General Orfila helped open a new door for hemispheric trade but he has also recently provided valuable insights on the major issues confronting the Americas beyond the immediate challenge of the new Panama Canal treaties. In recent articles in the Washington Sunday Star and in Americas magazine, Mr. Orfila has provided a comprehensive picture of the current development agenda facing our hemisphere. For the information of the Members of Congress I include these articles at this point.

INAUGURATION OF THE FIRST TRADE FAIR OF THE AMERICAS

I am delighted to be here to participate in the opening ceremonies of this first Trade Fair of the Americas. I've looked forward to this significant event for several reasons. I have many close friends who are hosting this Fair: Governor Reuben Askew, Mayor Maurice Ferre, Mayor Stephen Clark, and Secretary General of the OAS, Alejandro Orfila. I wanted to see the Trade Fair first hand and to come back to Miami.

Miami is the perfect site for this event. It is genuinely a bilingual and bicultural city. It has become one of the most important trade and commercial centers in the Western Hemisphere. Almost a fourth of all our exports to Latin American countries and one fifth of our imports pass through Miami every year.

But Miami is more than a center for the exchange of goods. It is a center where the people of this hemisphere meet. The people of Miami led the nation in understanding the importance of Hispanic and Caribbean societies to our own. More than a million foreign tourists—most of them from Latin America—came here last year. More passengers traveling between the United States and other nations of the hemisphere go through Miami than any other airport in the world. Miami is our gateway to Latin America and the Caribbean. We are proud of it.

And I wanted to come to this Trade Fair because of my long-time interest in, and love for, the Latin American and Caribbean countries. You all know of my interest. I have traveled in these countries with my family and have made many friends. I have studied, and am still studying, Spanish.

And since Jimmy has been President, I have had the privilege of traveling again, representing my country. On that trip I was able to discuss trade and economic development with all heads of state. I also visited Puerto Rico last year to make a speech about the economic development of the Caribbean. I have followed up these trips and these interests with regular briefings about Latin America and related activities. For instance, I attended a plenary session of the OAS a few weeks ago; and just last week I went to a reception at the State Department for Latin American officials. And now I am going back to South America with Jimmy at the end of this month.

In thinking about speaking here today at the Trade Fair, I realized that the interest of Jimmy and mine in Latin America, which is now being exhibited in the political realm, originated through his efforts as Governor to increase the trade in our state. We visited seven countries in Central and South America. It caused us to learn about the people. It aroused our interest in the language, and mutual benefits were derived from the commerce and trade that developed as a result of our trip.

Commerce and trade enhance friendships. They enhance a better understanding between peoples. They enhance a recognition of problems and opportunities that exist between countries. Through friendship and better understanding by working together, a mutual commitment to peace is enhanced. Commerce and trade are important to the economies of all our countries.

And I bring a message from Jimmy today about the commitment of the Carter Administration to freer trade and to increasing market access for exports from the developing countries to the United States. I am especially glad that the United States is host to a trade fair in which Latin American and Caribbean manufacturers have an opportunity to expand their trade with the United States.

In the past, we have been concerned only with selling our products to Latin America. But we must be prepared to buy if we want to sell. Too often we viewed Latin America only as exporters of raw materials and agricultural products, but this Fair demonstrates that your countries have become major exporters of important manufactured goods, too.

The policy of the U.S. Government is to try to encourage the expansion and diversification of exports of the southern nations of the world. In 1975 the United States initiated a new system—called "The Generalized System of Tariff Preferences" (GSP)—which permits 2,800 different products from the developing countries to enter the U.S. duty free. But the program has not been utilized as much as it could be. So we encourage you to seek advice from the State Department or the U.S. Department of Commerce to make better use of GSP.

Moreover, the Carter Administration is committed, despite strong pressure, to keeping the U.S. market open. There will be a few isolated cases in which we will have to make decisions that temporarily limit our imports. But our trade policy must be viewed in broader terms; and in those terms, we will keep the United States market open for your exports.

We intend also to work at the multilateral trade negotiations in Geneva to reduce existing barriers to trade. And we encourage you to take leadership positions in Geneva in assuring a freer trading system, too. The underlying theme of this conference is that responsibilities, like trade, must be two way to be successful. It is a very simple formula. The United States must accept certain obligations; Latin American and Caribbean nations must, too.

And if all of us work together to improve the rules of the world trading system, there will be many more Trade Fairs of the Americas like this first one in Miami.

AGENDA FOR THE AMERICAS

(By Alejandro Orfila)

Interdependence is increasingly a hallmark of the world and national communities. But the spirit of interdependence grows strong only as it prospers at all levels of our societies. It is the central ideal that must guide nations and peoples in every part of this globe. The signing of the two Panama Canal treaties between Panama and the United States in the OAS Hall of the Americas on September 7, 1977, was a demonstration that the member states of the OAS are committed firmly to the cause and ideal of regional interdependence in the Americas.

The event also allowed the American region to offer the world an impressive demonstration that peoples and nations can resolve even their strongest differences through discussion and negotiation rather than through armed combat. These OAS ceremonies further demonstrated the desire of the American nations to live together in peace and friendship.

One thing seems evident in the Western Hemisphere: whenever common Hemisphere-wide action rather than divisive rhetoric is required, the American nations invariably seek to solve their mutual problems first on a regional basis. They have built up a long and special relationship among themselves and have evolved—through the OAS forum—a way of doing business with each other that makes this region the most peaceful in interstate relations on a volatile planet.

With the OAS forum available for instant

use OAS members can, as happened this year with the Canal signing ceremonies and in the area of human rights. express their mutual interests or tackle serious regional problems in a friendly, nonthreatening manner. Because the members do not always get instant results from this forum, some dissatisfaction with it is inevitable. However, despite any difficulties in the relationships among our nations, the American region, when contrasted with other global regions, has made considerable advances in Hemisphere-wide peace and harmony.

It would be a serious mistake, though, to presume that the past is necessarily prologue and that the American region is bound to stay on an even keel in relations between states. There has been progress, however, in geopolitical, security, and human rights matters, and there have been solutions to difficult problems that have been potentially explosive. And this gives sound grounds to hope that outstanding geopolitical issues are resolvable without conflict.

But there are regional issues that, unless ways are found to resolve them, could cause broad Hemisphere setbacks and undermine regional friendship. These issues involve the large and growing regional development and trade agenda before the Americas. In this area regional common efforts are weak, laggard, and often unresponsive to needs. And there is a growing consensus in Latin America that unless there is concrete and specific action on this agenda, not only could pessimism and frustration set in to sour regional harmony but actual divisiveness could erupt to undermine progress already being achieved on geopolitical and human rights matters. There are difficult questions on this new Hemisphere development agenda. Some prefer to avoid looking at hard and potentially disruptive problems, but we must be aware of the following disturbing issues:

Venezuela and Ecuador continue to be excluded from tariff preferences accorded to exports from developing countries under the U.S. Trade Act of 1974. This law, meant as a retaliatory measure because of the 1973 Arab Oil embargo against the United States, was applied against all members of the Organization of Petroleum Exporting Countries (OPEC). Thus it also harms Ecuador and Venezuela, though neither country joined in the boycott. On the contrary, both helped maintain the flow of oil without which the U.S. economy would have been in peril. The U.S. attitude toward these two friendly countries is unanimously viewed in Latin America as particularly damaging to Hemisphere friendship. The Carter administration has taken positive steps to correct this situation through legislative means and it is vital for Hemisphere well-being that these initiatives be successful.

A double bind now confronts Latin America's oil-deficient countries—thirteen of the twenty-six OAS member states.

On the one hand, they must import large quantities of oil, but have few hopes of using much coal, and the find they face limited prospects of rapidly expanding their nuclear energy potential—despite their overwhelming need for nuclear power as a major source of fuel. Latin American countries share the U.S. preoccupation with the dangers of worldwide nuclear proliferation. However, they are worried that exaggerated emphasis on this may lead to a diminishing of cooperative efforts on nuclear development among the American nations.

On the other hand, Latin American oil-importing countries are paying a steady mounting bill for oil, primarily by relying on credit from *private* U.S. sources. Repayments will be bunched heavily during the 1978–1981 period, a situation that could lead to serious financial and energy problems for several Hemisphere countries. Until now only inadequate regional measures have been proposed to cope with the threatening situation.

Most of the developing countries of Latin America are now ranked among the world's middle-level income areas. However, international financial institutions are not giving priority emphasis to the needs of the middle-income countries. As a result, Latin America is hard pressed to find financing for much-needed infrastructure development—roads, ports, transportation, and communications. It is clear that new and imaginative solutions are needed. Yet Latin America feels that neither Europe nor the United States, regrettably, is making a creative response to the region's financial development problems.

A key step in the right direction would be in terms of basic human needs. Poverty and injustice must be confronted where they exist and not be dealt with through meaningless abstractions. In Latin America—just as in the United States and Europe—poverty, low incomes, and unemployment tend to congeal in specific areas. This means that even highly industrialized and substantially developed nations in the Americas have serious and often regionalized problems of underdevelopment. Until international development organizations begin to focus on this reality their efforts, however usefully intended, may be significantly misdirected.

CECON—the Special Committee for Consultation and Negotiation, set up as the forum for debating regional trade matters—was established in 1970 through U.S. initiatives as the instrument through which Latin America could be consulted in advance on U.S. trade policy. In practice CECON has been advised after the United States has taken action. Continued failure of the United States to use the CECON instrument it inspired means that Latin America will be doubly wary of any new U.S. trade recommendations. With U.S. export sales to Latin America almost doubling between 1973 and 1975—from $9.4 billion to $16.3 billion—self interest would seem to dictate that the United States solidify its support for CECON.

Ways to modernize Latin America's agricultural system must be found. Despite its extensive cultivable land and natural resources base, Latin America is only slowly beginning to develop its agricultural potential. It remains a net agricultural importer, 20 per cent of its population suffers from poor nutrition, and its share of world agricultural trade has sharply declined since 1960.

There are measures that the Latin American countries themselves must adopt to transform this situation. At the international level greater price stability for agricultural products, minerals, and raw materials, which make up 80 per cent of the value of regional exports. Yet they face continuously fluctuating markets. Despite its unprecedented postwar growth, Latin America still finds that unstable world markets continue to retard regional growth. And while the European Economic Community benefits forty-six African and Caribbean countries through the Lomé Convention, Latin America finds its products losing out in the world market. Whether Lomé should be globalized to include Latin America and other nations or whether the United States and Latin America—cooperating through the OAS—should seek greater access for Latin American exports to the European market is an urgent question for both Latin America and the United States.

The gap that exists in Latin America between technology and the productive system must be closed. In the postwar period Hemisphere nations stimulated development by giving priority to the volume of investment and to rates of economic growth. This resulted in downplaying the creation of technologies more suitable to conditions in Latin America. It is important that new technologies be related to natural resources availability and to the scale of production appropriate to the size of the Latin American markets. The United States has advanced proposals dealing with technological transfer. Yet these have hardly scratched the surface of Latin American needs and concerns, chiefly because they do not sufficiently affect the planning of foreign corporations that supply Latin America with large amounts of new technology.

It is evident, then, that the Panama Canal negotiations and treaties demonstrate the ability of the American nations to arrive at solutions to regional problems in a pacific and friendly manner. The Americas have found ways to put into practice the high principles contained in such documents as the OAS Charter.

But breakthroughs on political and security disputes are not seen by Latin American and Caribbean nations as the capstone of Hemisphere relations. To the contrary, the new development agenda before the Americas requires a transformaiton of both U.S. and Latin American policies. This transformation is not yet in sight.

The Western Hemisphere is at a crossroads, where nations can either hang together or they will hang separately. The energy crisis demonstrates that the United States must rediscover—as columnist James Reston and others point out—that it needs its best friends right on its borders—even for reasons of its own economic and social well-being.

Interdependence is more and more the only path ahead in this region. So far, though, the United States has yet to indicate what cooperative regional policies it believes essential to help expand and diversify Hemisphere trade, transfer technology, and create new regional financial mechanisms to assist Latin America.

Hemisphere nations agreed in 1976 to convoke a Special Assembly on Cooperation for Development for dealing with the new regional trade and development agenda. Until now there has not been much follow-up on this agreement. Perhaps this is the kind of idea that must be addressed now.

In any event, whether the United States and Latin America will respond to this new development agenda hinges, more than anything else, on their political will. The new Canal treaties indicate that, when needed, this substance is not always in short supply.

---

### Development Is the Key to Peace in the Western Hemisphere

(By Alejandro Orfila)

The American hemisphere has forged a region which—with the Organization of American States at its apex—is the most peaceful on this planet in relations between states. Our regional success can serve as a model for other world regions.

There are many observers, especially in the United Sttaes, who fail to recognize the reality of this achievement. As a result they ignore and downplay the inter-American system, preferring to direct their attention to the other world regions: the Middle East, Africa or Europe.

Is this not to substantially misconstrue reality? Ours is a region of peace in the sense that nations are not warring on each other. Still we continue to face a potentially dangerous situation. This arises because the primary agenda in our hemisphere now is not geopolitical challenges alone but development. By ignoring this reality, by pushing to consider regional trade and development mainly in a global context, theorists and policymakers may be undermining the continuing basis for peace itself in the American hemisphere.

Latin American countries have unanimously made this point in their recent controversy with the United States over unilateral U.S. actions raising sugar tariffs and fees. Within the OAS we have CECON, the Special Committee on Negotiation and Consultation, set up in 1970 on U.S. initiative as the forum for discussing and negotiating regional trade maters. For some time OAS member countries felt that CECON was not being used as a forum for consultation but as a means to notify Latin America of a unilateral U.S. trade action. Recently the Carter administration has sought to correct this impression by reaffirming its commitment to the multilateral forum, a reaffirmation Latin America views as a positive step.

Beyond the CECON situation, however, Latin America would also generally concur with the recent recommendations of the distinguished Atlantic Council of the United States. This council stated that we need "a major reconsideration of the division of labor between global and regional organizations. It is timely to decide afresh whether certain functions that have been automatically taken up at the global level should not rather be 'regionalized' and thus dealt with by only those directly affected."

A re-evaluation of regional approaches to hemispheric development seems under way not only in the United States but in Latin America and the Caribbean as well. The limited results of the North-South Economic Conference have stirred doubts about the limits to one-track globalist solutions to development dilemmas. And Venezuela's President Carlos Andres Perez, during his 1977 visit to the United States, noted that Latin Americans are partisans of multilateralism because the results of bilateralism are invariably precarious.

Some development challenges can only be confronted on a global basis. Others, however, can clearly best be handled first through regional approaches which might, in turn, serve as models for arriving at global solutions. What is required at present—at least in the Western Hemisphere—is agreement that specific trade and development issues will be handled regionally, perhaps giving emphasis to particular economic sectors or problem areas such as energy.

It appears that the deep and abiding personal interest of President Jimmy Carter in Latin America and the Caribbean has become the paramount driving force in U.S. policy towards the hemisphere. This is begetting a renewed and friendly response from Latin America and Caribbean nations.

One area of mutual concern among OAS members is that of protecting human rights in the Americas. In September 1976 at the National Press Club, I pointed out that our hemisphere needed a stronger juridical instrument to assist in protecting human rights and urged OAS member states to sign and ratify the long-stalled 1969 American Convention on Human Rights. We now have a a total of 16 countries that have affixed their signature. Six countries have so far deposited the instrument of ratification; four more than in September 1976. Another five countries must ratify the convention before it becomes effective. It is vital that all OAS member states sign this convention. The United States, of course, is deeply concerned with hemispheric human rights.

However, whether this U.S. concern for its neighbors—in geopolitical and human rights areas—can also be transformed into a new U.S. regional response to the current regional trade and development agenda remains as yet an open question. Finding an adequate answer to this question will be a deciding factor in determining the long-range contribution of the Carter administration to hemispheric solidarity. At present Latin America and the Caribbean are awaiting new U.S. development initiatives towards its neighbors.

The OAS has called for a Special General Assembly on Cooperation for Development. This will demand new thinking, new insights and new programs of common action.

Most of the developing countries of Latin America are now ranked among the world's middle-level income areas. As such, they are suffering a decline in their capacity to attract public international funding as investment and financial institutions are giving priority emphasis to the needs of the lower-income countries. As a result, Latin America is hard-pressed to find financing for much needed infrastructure development—roads, ports, transportation and communications. International agencies should consider Latin America's development needs not in terms of static per capita income levels but in terms of basic human needs.

Poverty and injustice must be confronted where they exist and not be dealt with through meaningless abstractions. Even highly industrialized and substantially developed nations in the Americas—including urban areas—have serious and often regionalized problems of underdevelopment. Until international agencies begin to focus on national realities then efforts, however, well intended, to help the poorest of the poor may be significantly misdirected.

To redirect development and international technical assistance towards a strategy of responding to basic human needs in the various countries, there must be emphasis on promoting greater income distribution, a higher level of savings, and improved access to education, health and housing opportunities are needed for millions of persons now at the edge of society.

To work out a regional strategy of basic needs would require defining minimum national living standards, identifying national target groups and setting up specific minimum objectves. Such a strategy—aimed at meeting both minimum requirements for family consumption, work and living and at providing essential public services—would also strengthen the pursuit of basic human rights. It seems apparent that this strategy would neither be effective nor realized unless people were involved in setting their own objectives—through their own labor, cooperative and community organizations.

It is also important that any redirection of Latin America's and the Caribbean's development strategy also reflect its support for the United Nations' "new international economic order."

Our region is now at another crossroads not in the area of geopolitics but in the field of hemispheric development. The real questions at hand are can the American nations modernize their traditional relationship to cooperate in responding to the transformed hemispheric development agenda? And can the international agencies find practical ways to break down the bureaucratic walls that threaten to isolate them from each other so as to systematically and organizationally coordinate their response to the needs of the Latin American countries?

The answers to these questions can be affirmative. What is needed now is to summon up our common will to act together. Whether we possess the will to do so is currently unclear.●

## A NEW MANDATE FOR THE PEACE CORPS

### HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BONKER. Mr. Speaker, very shortly a House International Relations Subcommittee will begin markup of H.R. 9774, the Peace Corps Reform Act, which I introduced jointly with Congressman HARRINGTON and several other colleagues. This legislation will establish the Peace Corps as an independent foundation and free it from political and bureaucratic manipulation. The act also provides a new congressional mandate and a renewed vision for the Peace Corps which is long overdue.

An article which appears in today's Washington Post serves as an articulate call for new leadership in ACTION, as well as the Peace Corps. I would like to insert this article in the RECORD. Clearly, it is crucial that Peace Corps be guided by leaders with competence and vision. But the present situation also demands that a new, independent framework for Peace Corps be established in which these leaders can effectively carry out the agency's unique purpose of voluntary humanitarian action around the world. This view has been supported in testimony by the first Peace Corps Director, Sargent Shriver, and by the previous Director, John Dellenback. On the basis of recent experience, new personnel alone will not prove equal to the forces of bureaucratization and politicization which have beset the Peace Corps since the time of its cooptation into ACTION. A new mandate for the Peace Corps is badly needed. I urge my colleagues to support us as we shape this mandate in the Peace Corps Reform Act.

[From the Washington Post, April 17, 1978]

DOES THE PEACE CORPS HAVE A FUTURE?

(By Roger Landrum)

Robert McNamara said in 1965, "I doubt very much that we [3¾ million people in the Defense Department] have influenced the peace of the world as much as the small handful of you [in the Peace Corps] have." Surely an exaggeration, but it reminds us in what high regard the country once held a government program. Sunk into obscurity since 1968 by a president who called it an "overseas junket," the Peace Corps might now be expected to regain its former luminance. After all, Jimmy Carter's mother, Miss Lillian, herself a former volunteer to India, says the only thing she has asked of her son is to help the Peace Corps.

Suddenly visible again, the Peace Corps is in reality caught up in a tug-of-war it may not survive. The late Sen. Hubert Humphrey introduced legislation proposing to fold the program into a foreign-aid superagency. A bill in the House proposes that the Peace Corps be made a public corporation. The American Enterprise Institute has recently issued an analysis by Richard Nixon's head of ACTION and the Peace Corps, Michael Balzano, that suggests that worldwide trends make the original mission of the corps irrelevant overseas. A new book by Kevin Lowther and C. Payne Lucas, "Keeping Kennedy's Promise," claims that most volunteers were never very effective and that the corps is little needed or wanted unless volunteers are expert technicians.

The Peace Corps is becoming visible this time not so much for what volunteers are doing in towns and villages around the world as in the cross-sights of heavy ideological artillery. Not only outside critics have taken aim at the tiny, once respected program. Sam Brown, the antiwar leader selected by Carter to head ACTION, now claims that the Peace Corps of the 1960s was misdirected, "a missionary band out to save the world" and the "vanguard of American cultural imperialism." Carolyn Payton, the new director

of the corps under Brown, calls it a "white, middle-class adventure."

This assault on the corps by Carter appointees is the most puzzling aspect of the new visibility. It can hardly be what Miss Lillian had in mind. If the outside critics are right, the corps is in jeopardy overseas; if they are not right, it is in jeopardy from the confusion and rhetoric of its Washington leadership.

Little of this is as new as it might seem. In the early 1960s ideologues were trying to squeeze the human contracts and work-years of volunteers into grand designs. It was said that volunteers would help rush new nations through Walt Rostow's stages of economic growth. Neo-Marxists called volunteers unwitting agents of the cold war. Arch-liberals said that volunteers were propping up dictatorships. Some State Department officials, military leaders and conservative senators predicted that volunteers, without a hierarchy of command and firm discipline, would create diplomatic disasters. Technocrats said that volunteers had no skills. From the perspective of many of us who actually became Peace Corps volunteers, such glib abstractions were soon seen for what they were—hopefully simplistic.

There is little grand strategy in being a Peace Corps volunteer. Volunteers are highly diverse citizens who agree, without conventional compensation, to work overseas for two years in a specific and difficult-to-accomplish job, the importance of which can usually be seen best within its small, human context. Sargent Shriver's stewardship of the Peace Corps was admirable precisely because he made no effort to force the contributions of volunteers scattered across three continents and various island nations into an ideological box.

Ideological waves are once again sweeping over the newly visible Peace Corps. They are the cant of the 1970s: "a white, middle-class adventure," "irrelevant to the Third World," "retargeting scarce resources for maximum impact." Payton's characterization of what the Peace Corps has been is not only smug racism; it is also profoundly undiscerning about the efforts of 70,000 volunteers who have worked in over 70 countries and innumerable human communities over 16 years. I hope she means that more non-white Americans should become volunteers. Sam Brown says that volunteers will no longer be welcomed with open arms, so they must no longer act like missionaries. Where has he been?

It has been 15 years since I was a Peace Corps volunteer, but I find myself burning with anger over this know-nothing revisionism. My assignment in 1961 was to teach at a new university, along with 25 other volunteers. We were greeted by student protest marches accompanied by an Ibo chant that translates, "The elephant tramples anything that gets in his way." The real message was "We will test your motives and competence." But we were also greeted by one of the great African independence leaders, Nnamdi Azikiwe, who explained that the university could not afford the demands of established professors, and that those same professors refused to adapt their courses to the African context.

Each of us lived in one-room apartments for two years. We were paid subsistence living expenses and about $1,500 severance pay. After those two years, we were praised by the same students for the care we put into our teaching. We helped keep the university financially solvent. The work was much like it would have been at home, but the context in which we worked was infinitely different. Most of us took pride in what we had done, and no price could be placed on the richness of the experience. Today, are we to believe we were adventurers who didn't understand what the world was becoming or that, because our project was not subordinated to a clear, ideological strategy, the contributions to Nigerian students and to the university budget were wasted? Bunk!

It is said that Peace Corps bureaucrats are resisting the will of Sam Brown. They should. He is wrong in his analysis of what the Peace Corps has been, and he is wrong in attempting to make it over in a radical-chic image of the Third World. The Peace Corps does not need to be born again ideologically pure or as a private, technical-aid agency. The corps needs more than anything else to be guided around those riding ideological hobby horses and passing out glib phrases.

The past and the future of the corps do need to be clarified for the American people. The specific tasks to be done, by diverse individuals absorbed into the lives of small circles of people in diverse localities, must be conveyed again with exceptional clarity to the many, many people in this country who consider becoming volunteers. As for the nations of the Third World, there is work almost everywhere to be done.

Certainly the world has changed. The university where I taught is now well established, after being destroyed during a civil war. But the world has not changed all that deeply. Volunteers can still help get some of the necessary work started or completed. The jobs need not fit any grand strategy or an ascetic standard of working only with the starving, or even ambitions of establishing diplomatic beachheads in Vietnam or Cuba. What is required is that the jobs address the human needs of specific localities overseas in the simplicity of purpose with which the Peace Corps began. Anyone who suggests that ordinary citizens of Third World nations cannot appreciate those terms of service is blinded by a fog of rhetoric.

Before anything can be done, the new leadership of the Peace Corps must shed simplistic views of its history and get a grip on its continuity of mission. If they can't, the president should change the guard. Miss Lillian, if you are listening, a thoughtful speech about the Peace Corps by your son, 17 years after John Kennedy first put the mission of the Corps into words, might help salvage the past and chart the future of the Peace Corps.●

## DAVIS-BACON MALADMINISTRATION

### HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. HAGEDORN. Mr. Speaker, in the on-going fight to encourage the Employment Standards Administration of the Department of Labor to administer the Davis-Bacon Act as it has been written by Congress, I would like to submit the following statements. The first is correspondence from the Associated General Contractors to the Department concerning ESA policy of setting current union wage rates as "prevailing" even though they are not and never have been paid in certain areas. The second is a letter from myself to the Comptroller General's Office with respect to new interpretations by ESA of their own jurisdiction. The third item is from a recent issue of Constructor magazine discussing the increased frequency with which ESA determinations are being overturned by the semi-independent Wage Appeals Board.

The Davis-Bacon Act suffers from enough inherent infirmities without having its meaning constantly corrupted by an agency seeking to use the act to achieve unintended objectives.

The material follows:

THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA,
*Washington, D.C., February 28, 1978.*

**Subject: Davis-Bacon Act Procedures.**

Mr. DONALD ELISBURG,
*Assistant Secretary, Office for Employment Standards, U.S. Department of Labor, Washington, D.C.*

DEAR MR. ELISBURG: Many of our chapters have called our attention to the fact that your assistant administrator of ESA in charge of your Davis-Bacon operations is predetermining prevailing rates in a manner that appears to us to be inconsistent with Regulations 29 CFR Part 1 and decisions of the Wage Appeals Board.

We make reference to the assistant administrator's policy of automatically predetermining the current union wage rate in an area regardless of whether it is in fact being paid or not, whenever he ascertains that the previous and lower wage rates paid in the area are substantially the union rates. AGC chapters have repeatedly protested against this practice to no avail.

We believe the mandate of the regulations in 29 CFR Part 1 Section 1.2(a)(1) is binding in the administration of the Act when it states that "the term prevailing wage rates . . . shall mean the rate of wages paid in the area . . ."

The Wage Appeals Board has criticized the assistant administrator repeatedly for violating this mandate. In Wage Appeals Board Case 77–3 the Board said "established practices in the application of Regulations Part 1 in finding prevailing wage rates . . . provides 'the term prevailing wage rate . . . meaning the rate of wages paid in the area'." The Board added in this case that "the administrator is instructed to review wage decision 77–GA–65 to assure that the wage data in the files of the Wage Hours Division do, in fact, show that the wages contained in the wage decision were based on wages paid. . . ." Later on January 9, 1978, in Wage Appeals Board Case 77–18, the Board stated that "for the third time in recent weeks, the Board is considering a case in which it appears that the assistant administrator is not giving sufficient consideration to the plain language of the Davis-Bacon Act to base wage rates for proposed projects upon 'the wages prevailing for the corresponding classes of laborers and mechanics. . . .' It appears here, as in two earlier decisions, that the Board is told . . . that certain wage rates have been determined that do not reflect wages paid on similar projects in the locality."

In Wage Appeals Board Case 77–19, the Board stated that "in this and other recent cases, it appears that the assistant administrator's attempts to standardize procedures have resulted in the introduction of new wage rates into the applicable area rather than reflecting those rates already there . . . all parties recognize that the wage rates now being issued by the assistant administrator do not reflect the wages now being paid in Texas on building construction."

We believe that Regulations Part 1 and the Wage Appeals Board decisions in the cited cases, among others, leave no doubt that the assistant administrator is exceeding authority over which you have charge. While the Wage Appeals Board appears to be a delegated agency of Secretary of Labor Marshall to review the decisions of the Davis-Bacon operation, we are appealing to you to investigate the inconsistencies that exist and advise us whether you can and will take any action to bring about a correction of this very serious discrepancy in the administration of the Davis-Bacon Act. We are directing this inquiry to you on behalf of a number of AGC

chapters who are extremely exercised at the unstabilizing effect in their area of this novel procedure noted above.

Sincerely,

ARTHUR F. HINTZE,
*Director,*
*Government Relations Services.*

---

HOUSE OF REPRESENTATIVES,
*Washington, D.C., March 27, 1978.*

Mr. ELMER B. STAATS,
*Comptroller General of the United States,*
*General Accounting Office,*
*Washington, D.C.*

DEAR MR. STAATS: A December 22, 1976, Decision of the Comptroller General of the United States (B–185020) held that wage rates prescribed under the Davis-Bacon Act do not apply to work performed off the construction site by the prime contractor, a subcontractor or a material supplier. The exact wording of the Decision is quoted as follows:

"After a detailed analysis of the terms in the Davis-Bacon Act and the applicable legislative history, it was the conclusion of this Office that the Act does not provide wage coverage for work off the site whether by contractors, subcontractors or materialmen even though performed in the immediate community."

This Decision, in addition to reversing the Davis-Bacon's Employment Standards Administration and the Department of Labor's Wage Appeals Board, also renders erroneous the definition of "site of work" as contained in Section 18–701(b)(2) of the Armed Services Procurement Regulations.

Despite the GAO Decision, no change has been made to ASPR Section 18–701(b)(2). As long as ASPR contains the existing language, contracting agencies bound by ASPR have no choice but to enforce it contrary to the fact that the GAO has ruled that there is no authority for such action and contrary to the fact that the GAO would reverse an agency taking any such action.

A representative of the Associated General Contractors of America, Inc. requested that the Armed Services Procurement Regulations Committee revise ASPR Section 18–701(b)(2) to comply with the Decision of the Comptroller General of the United States. A copy of the ASPR Committee response is attached. In short, the ASPR Committee has refused to change the Armed Services Procurement Regulations to comply with GAO Decision B–185020.

Consistent with the statutory obligation of the General Accounting Office to investigate the receipt, disbursement, and application of public funds, I request that your office undertake an immediate review of ASPR Section 18–701(b)(2) to assure its compliance with GAO Decision B–185020.

Sincerely yours,

TOM HAGEDORN,
*Member of Congress.*

---

THE WORK OF THE WAGE APPEALS BOARD

(By Arthur Hintze)

In recent months, the Wage Appeals Board, which has been serving as a deterrent to inaccurate wage determinations under the Davis-Bacon Act, has reversed Davis-Bacon wage predeterminations in an impressive series of decisions. These decisions include the following cases: Interstate 66 in Fairfax County, Virginia; water treatment plants in Cobb County, Georgia; water treatment projects in Texas; a highway bridge across Mobile Bay, Alabama; railroad installation at the National Radio Astronomy Observatory at Socorro, New Mexico; paving and utilities incidental to building construction in Texas.

Following is a summary of the issues and decisions in selected cases:

The water treatment plants in Cobb County Georgia involved underground utility construction and structures. The Davis-Bacon administrator predetermined building construction wage rates only for these projects and brushed aside area practice for using lower heavy-highway wage rates for the underground and utility portions of the contract. The effect would have added significant cost increases.

The Wage Appeals Board reversed the Davis-Bacon administrator on grounds that "there is no factual basis for issuing only a building wage schedule for the water and sewer treatment plant . . . which was not the subject of a Wage and Hour Division survey to determine the prevailing practice in the county."

Months later, the Davis-Bacon administrator backtracked to require building rates only on another Cobb County water treatment plant. The Wage Appeals Board again reversed the administrator stating that "the practice of issuing a separate schedule of water and sewer line wage rates where it is determined that sufficient wage information is available to support such a schedule has existed since the passage of the Federal Water Pollution Control Act in 1961." The Board said it finds no reason to deviate from this practice.

The Davis-Bacon administrator rejected the precedent laid down by the Board in the Cobb County cases when it recently attempted to destroy the longstanding practice of using a heavy-highway wage schedule on water treatment plants in Texas. The administrator made no field surveys of the facts but issued a policy statement "that building construction included all construction of structures . . . the building of utilities and equipment both above and below ground level, as well as excavation and foundations, site preparation and incidental paving and utilities outside the building."

The Wage Appeals Board reversed the Davis-Bacon administration on grounds that "it became abundantly clear at the hearings that there were kinds of machinery and structures at treatment plants that would unquestionably be classified as heavy construction if it were not for the fact that a shelter is placed over them."

The Davis-Bacon administrator attempted in another case to wipe out the separate wage schedules for paving and utility construction incidental to building construction that has long prevailed in Texas.

The Wage Appeals Board reversed the Davis-Bacon administrator on grounds that separate wage schedules on paving and utility construction incidental to buildings are as much a part of building construction as the regular building rates and should be recognized as part of the existing prevailing wage structure in the area. It stated that "the Davis-Bacon administrator in too many cases recently has attempted to standardize procedures by introducing new wage rates into the applicable area rather than reflecting those wage rates already there." It ruled that this is contrary to the requirements of the Davis-Bacon Act.

These examples of Wage Appeals Board reversals of wage determination improprieties are obviously only a handful of the cases involving potential waste of public funds. The bulk of the cases are handled without public notice.

The Secretary of Labor deserves public appreciation for having strengthened and made the Wage Appeals Board as effective as it now is but many are hopeful that he will likewise be mindful of the need, demonstrated by this record, to require a higher degree of accuracy in Davis-Bacon wage determinations when they are originally issued by the Davis-Bacon administrator.●

## THE FEDERAL BIOLOGICAL CONTROL ORGANISMS ACT OF 1978

---

### HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. WAMPLER. Mr. Speaker, for more than a century, Federal and State agricultural workers have been searching for beneficial organism, commonly referred to as biological control organisms, which could be utilized to control pests known to occur in the United States, particularly those introduced from foreign areas. These activities have included searching for species of biological control organisms known to occur in the United States, as well as exploring in foreign countries for beneficial organisms that might be introduced into this country.

One of the first successful biological control programs involved the utilization of Vedalia beetles to control the dreaded cottonycushion scale of citrus in California in the late 1800's. Such activities, however, are not without their own hazards since many beneficial biological control organisms are very similar in appearance to other species that are detrimental to agricultural interests. Furthermore, some such biological control organisms themselves may be attacked by or subjected to diseases or hyperparasites which would nullify or be extremely detrimental to agricultural interests.

Up until this time, this has not posed serious problems since Federal and State agricultural explorers have been knowledgeable of the hazards associated with bringing in or moving biological control organisms from one area to another. Therefore, there have been few problems associated with the utilization of these species over the years. Further, scientists knowing of the potential problems involved in introducing alleged beneficial organisms have voluntarily had them screened through quarantine stations established in this country and in certain foreign countries.

With the new emphasis on the environment and effort to increase integrated pest management programs, many concerned individuals, organizations, and scientists are becoming increasingly interested in the possible use of biological control techniques. Presently, many importers and others interested in utilizing biological control techniques are not aware of the hazards associated with introducing new species into the environment.

Additionally with the increased interest in biological or natural control of pest species, the demand for biological organisms is increasing. Homeowners and others concerned with the utilization of pesticides are purchasing biological organisms. This has resulted in more and more concerns going into business to exploit the potential market. Therefore, the public, agricultural community, and reputable business concerns need the benefit of regulations to assure that biological

control organisms, which are introduced from foreign areas are free of pests, and that quality material is shipped intrastate and interstate.

Until relatively recently, foreign explorations for new species involved primarily the introduction of parasites and predators that would prey on pest insects. More recently, there has been an expanded effort to bring in species that would attack weeds. There are many benefits to be obtained from such a program, but it is even more critical that proper safeguards be established since the beneficial organism must be adequately screened to assure it will feed only on unwanted weeds and not attack beneficial plant species. In addition, there has been a recent increase in the use of insect pathogens. The need for adequate controls over the use of such pathogens is urgent. These two latter cases indicate the increased complexity of problems associated with the installation of proper safeguards over the movement of biological control organisms to be assured there are no pest species inadvertently moved with the beneficial organisms.

The proper utilization of beneficial biological control organisms in integrated pest management programs will be in the best interest of agriculture and in the protection of the environment. It is urgent, however, that adequate safeguards be established to assure that those beneficial organisms introduced into the country from foreign areas are properly screened through quarantine stations to be sure that no detrimental species are included with the shipment and that the beneficial organisms are properly identified. It is equally important that the movement of beneficial organisms, both interstate and intrastate, be adequately safeguarded to be sure that the organisms are viable and will do the job for which they are intended or advertised, and that they are not carrying with them any unwanted pest species.

Such seems to be the intent of the Executive Order 11987 signed by President Carter on May 24, 1977. This order calls for the orderly control over the movement of beneficial organisms. There are no provisions in the Plant Pest Act that require scientists or the public to obtain a permit for the importation of beneficial organisms.

The need for Federal regulations to provide for adequate controls over the introduction and intrastate and interstate movement over biological control organisms has been recognized by Federal and State agricultural officials. State agricultural agencies have indicated an interest in invoking laws to control interstate movement. Many are awaiting Federal action so they could invoke similar supportive State laws. The State departments of agriculture have suggested that the U.S. Department of Agriculture (USDA) be the lead agency in such regulations since the expertise has over the years been located in State and Federal agricultural groups.

An analysis of the individual sections of the proposed act and regulations to be considered under each section follows:

ANALYSIS

Section 1. This section cites the title of the Act as "The Federal Biological Control Organisms Act of 1978."

Section 2. This section provides background information concerning the need for the proposed act.

Section 3. This section provides a series of definitions. Included is the definition of biological control organisms. It should be noted that the definition does not include vertebrates as they come under the jurisdiction of the U.S. Department of the Interior.

Section 4. Section 4 gives the authority to the Secretary of Agriculture to issue or prescribe regulations under which movement of organisms would be allowed. This section covers movement into the United States as well as intrastate and interstate movement. The regulations governing intrastate movement, however, would be effective only in those instances where the appropriate State agency has not adopted regulations to provide for the control over movement within the State. Imported biological control organisms from foreign areas would be moved under permit to assure that it would be routed through a quarantine station or other approved screening facility where adequate checks could be made. Regulations contemplated under the act covering interstate and intrastate movement, however, would provide for an agreement with the individuals, institutions, or firms engaged in the business of moving biological control organisms. This agreement would stipulate: Conditions under which the material would be produced to be assured that the product is viable and will be useful in controlling pest species against which it is advertised; that the methods of shipment would preclude packing the organisms with any other organisms that may be detrimental; and that the biological control organisms are properly identified. Such an agreement specifying the conditions under which the individuals, institutions, or organizations must operate would make individual shipping papers unnecessary. Adequate checks would be made to assure that they are operating in accordance with the agreement.

Section 5(a). This section authorizes an inspector to make checks of persons or means of conveyance which he has reason to believe are carrying organisms subject to the act. Such right of inspection without warrant is essential at ports of entry to be assured that anyone entering the country is not carrying such organisms in violation of the act. However, protective language, relating to arrests without a warrant, is added to insure against such arrests except in justified circumstances. Similar need for inspections without a warrant relate to both interstate and intrastate movements.

Section 5(b). Section 5b provides for the authority with a warrant to inspect premises in the United States for the purposes of enforcing provisions of the act.

Section 6. Simply provides for penalty provisions and is in line with other similar acts.

Section 7. Provides authority to the Secretary of Agriculture independently or in cooperation with other groups to control the movement of potentially harmful biological organisms and for the conduct of control or eradication programs when such activities are deemed necessary to agriculture and the public welfare. Control programs of this type are conducted in cooperation with State agencies and State agencies provide for the right of entry for control programs except on Federal properties.

Section 8. Provides authority for the Secretary to promulgate regulations as deemed necessary under the act.

Section 9. Covers the appropriation of funds from Congress as deemed necessary to administer the act.

Section 10. Points out that the act shall not invalidate provisions of State or other laws except that such States or other jurisdictional laws cannot permit action which is prohibited under the act.

Section 11. Provides for the act to remain valid other than any portion which may be found to be invalid.●

---

## DR. ROBERT E. STEWART—PROSTHETICS

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. TEAGUE. Mr. Speaker, I draw your attention, this morning, to Robert E. Stewart, D.D.S., and his fine record of distinguished service to this Nation's disabled veterans and other handicapped citizens. I was recently reminded of Dr. Stewart's outstanding contributions, when reading the "Veterans Administration Prosthetic and Sensory Aids Program Since World War II," a testamentary of this important VA program which Dr. Stewart coauthored, some 5 years after his retirement, with Mr. William M. Bernstock, one of his former colleagues in the Veterans Administration.

According to the Bulletin on Prosthetics Research, Dr. Stewart, the former VA Director of Prosthetic and Sensory Air Service, Department of Medicine and Surgery, retired on June 30, 1973, after 27 years of service. During the last 17 years, he was the Service Director, in charge of the clinical and research aspects of a unique nationwide program providing a steadily broadening range of replacements for human parts or functions.

Dr. Stewart was born in Sutton, Nebr., and graduated from Creighton University Dental School in 1929. After some years of private practice, he entered the Army in World War II. After early service in the Dental Corps, he joined a group of Army dentists in developing plastic artificial eyes and other maxillofacial restorations. Using agar and alginate molding techniques, waxes, dental stone models, and acrylics adopted from dentistry, and new polyvinyl chloride plastics, they replaced the former handblown, fragile glass eyes and developed new artificial noses, ears, and other facial parts. These methods and designs have since become widely used.

After the war, in January 1946, Dr. Stewart was assigned directly from the military to VA Central Office as Chief, Ophthalmoprosthetic Division, of the then-new Prosthetic Appliances Service.

Dr. Stewart's transfer to the Veterans Administration resulted in the establishment of VA plastic eye and restorations clinics in 13 cities throughout the country where veterans are still being served for their artificial eye, facial, and body restoration needs.

In September of 1953 he was promoted to Assistant Director, Prosthetic and Sensory Aids Service. Because Dr. Augustus Thorndike, a prominent Boston surgeon who was the Acting Director was

reluctant to move to Washington, Dr. Stewart essentially managed the entire central office prosthetics operation for several years. In July of 1955 he was appointed as Director of the Service.

Under Dr. Stewart's dynamic leadership, events unparalleled in the history of prosthetics began to take shape. These include the establishment of the VA Prosthetics Center, with results reported in detail in every issue of the Bulletin of Prosthetics Research; enthusiastic support of the postgraduate prosthetics medical school programs of New York University, Northwestern University, and the University of California at Los Angeles, which are the only institutions providing university-level training for physicians, therapists, prosthetist and orthotist practitioners, both in the private sector and in Government; and the development and establishment of VA prosthetics treatment centers which provide highly specialized prosthetics care on a referral basis for patients whose prosthetics needs cannot be cared for at their original VA hospital.

Among the countless other innovations developed during Dr. Stewart's tenure which directly and indirectly have beneficially affected the lives and rehabilitation of disabled veterans, while also generating savings, there are the centralized distribution of stump socks, hearing-aid batteries, aids for the blind, hydraulic knee mechanisms for above-knee amputees, elastic hose, lumbosacral belts, and a centralized method for hearing-aid repairs.

Dr. Stewart has continually demonstrated a keen perception of the needs of the Veterans Administration's research program, and an imaginative and resourceful capacity to develop programs to meet these needs. He has recognized the advantages accruing from a balanced intramural and contractual program involving integration of research, development, evaluation, and education. He has utilized effectively the specialized talents of the relatively small body of research personnel knowledgeable in the unique fields of prosthetics, orthotics, and sensory aid.

The concept of VA amputee management has been revolutionized largely as a result of Dr. Stewart's efforts. Recognizing promptly the tremendous advantages inherent in immediate postsurgical management, he arranged in 1964 for a research program in Seattle to refine and clinically demonstrate the techniques developed abroad and to disseminate information for use by clinicians in both the Veterans' Administration and the private sector. Three films have been produced; two monographs have been made available for thousands of clinicians; and courses have been given by three universities. The techniques of immediate postsurgical management, when properly used, have brought great benefit to the newly amputated individual. These techniques have been utilized in many parts of the world with much praise redounding to the Veterans Administration for refinement and clinical validation of the procedures and for their dissemination in the interests of amputees.

Dr. Stewart has been consistently zealous in assuring that the results of research not only aid veterans through VA medical policies and supply contracts but become available meaningfully and systematically to clinicians for use with disabled people in the nonveteran population. He has been an enthusiastic supporter of the educational programs in prosthetics and orthotics offered by three universities—New York University, Northwestern University, and University of California at Los Angeles. He has arranged for the production of training films and the design and construction of scientific exhibits. His authorization of a variety of clinical application studies has reflected an appreciation not only for the effectiveness of such procedures as the final step in systematic transition from research to clinical use, but for the critical role which clinic teams play in prosthetics and orthotics management. Under his leadership as chairman of the editorial board, the Bulletin of Prosthetics Research has become one of the most important journals in the field for effective dissemination to clinicians of the results of research. During this period, it has been selected for inclusion in the engineering index and index medicus.

His recognition of the importance of international exchange of information is exemplified by his service as a consultant in Laos and on the Scientific Program Committee to plan the First International Congress on Prosthetics Techniques and Functional Rehabilitation held in Vienna, Austria, in March 1973, under the auspices of the World Veterans Federation, the International Society for Prosthetics and Orthotics, and the Vienna Academy of Medicine. He has arranged numerous foreign lectureships for experts from VA projects, both intramural and contractural.

Dr. Stewart has received several awards and honors. In July 1958, he received the Chief Medical Director's Commendation. Some of his international efforts were recognized by a citation from the People-to-People Committee of the President's Committee on Employment of the Handicapped. He was a founder and the second president of the American Academy of Maxillofacial Prosthetics, a specialty group within the dental profession, which recently honored him by award of its life membership. Just before his retirement, he received at the Administrator's Staff Conference the VA Distinguished Career Award, consisting of a gold medal, an enameled gold lapel button, and a citation.

The chief medical director, in further recognition of Dr. Stewart's outstanding contributions to the Prosthetic and Sensory Aids Service programs, 5 years ago appointed him as his consultant so that his services would not be completely lost to the Veterans Administration efforts in behalf of the seriously disabled. He and Mr. William M. Bernstock, former editor of the Bulletin of Prosthetics Research, have just completed a history of the VA prosthetics program.

Mr. Speaker, I commend this outstanding publication, the "Veterans Administration Prosthetics and Sensory Aids Program Since World War II", to my colleagues and applaud Dr. Stewart for his longtime, illustrious service to this Nation's disabled veterans and handicapped citizens.●

---

## LOBBYING: A CONSTITUTIONALLY PROTECTED RIGHT

**HON. DON EDWARDS**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. EDWARDS of California. Mr. Speaker, tomorrow the House is scheduled to take up H.R. 8494, known as the Public Disclosure of Lobbying Act. The alleged purpose of this measure is to reveal to the Congress and the public just what evils have been perpetrated on the representative arm of government by those seeking to influence the political process. It is extremely important, however, that Congress, in its rush to pass "reform" legislation, does not restrict or burden the exercise of one of this Nation's most fundamental first amendment rights—the right of the people to petition the Government for a redress of grievances.

The fact that the present 1946 Lobbying Act is a failure is largely due to the overzealous approach of those who drafted the original measure. As a result of the 1946 act's interference with the free exercise of fundamental constitutional rights, the act was significantly narrowed in scope by the Supreme Court. in the 1954 decision of United States against Harriss, the Court construed the 1946 act in accordance with the first amendment to reach only direct communications with Members of Congress.

I am pleased that the House Judiciary Committee has adopted an amendment limiting the present lobbying disclosure bill to direct contacts with Congress, thus complying with the Supreme Court's mandate in the Harriss case. This action was one of several amendments adopted by the committee and the subcommittee which have significantly improved the constitutional soundness of the bill. The measure now meets minimal constitutional standards as laid out by the Supreme Court.

I understand, however, that several amendments will be offered on the floor. One which will bring indirect or grassroots lobbying within the scope of the bill and another requiring disclosure of the name and address of those who make large contributions to an organization covered by the act. I urge my colleagues to a vote against these amendments. If either of them are adopted the bill, in my opinion, will be unconstitutional and should be defeated entirely.

In light of the amendments which are expected to come up, I hope that the Members will take a moment to read a recent editorial on the lobby bill which appeared in the St. Louis Post-Dispatch of April 6, 1978:

HOW MUCH LOBBYING?

When the U.S. House of Representatives acts soon on a lobbying disclosure bill, it will be forced to decide questions on which there are compelling public policy arguments on

both sides. The House Judiciary Committee has reported for floor action a bill (H.R. 8494) that, on balance, is better than a bill currently before the Senate Judiciary Committee. But the House bill still contains provisions that conflict with First Amendment rights, although they advance the public interest purpose of letting citizens know who is trying to influence their lawmakers and how.

The tough questions that the House will have to decide are whether it is better to let some lobbying go unregulated or whether to impose restrictions that tend to interfere with the constitutional right of citizens to petition their government. In contrast to the Senate bill, the House bill is designed to intrude as little as possible on the legitimate rights of petition, free speech and association, while still seeking to improve on the almost totally ineffective 1946 Federal Regulation of Lobbying Act now on the books.

Under H.R. 8494, for example, registration as a lobbyist would be required of an organization if it spends $2,500 or more in a quarter to retain a lobbyist or if it employs an individual who lobbies on 13 days in a quarter or two individuals who each lobby for seven days quarterly, and the whole business costs $2,500 or more. This so-called threshold provision means that small, local organizations, relying heavily on volunteers, would not be forced to register and to incur the burdensome reporting requirements of the act. (The Senate bill's threshold is lower.) Any organization required to register under the House bill would have to file quarterly reports on its lobbying activities and gift-giving to members of Congress and their staffs.

Before reporting the House bill, the Judiciary Committee deleted a questionable requirement that so-called "lobbying solicitations" be disclosed. Under the lobbying solicitation provision, which is still in the Senate bill, a registered organization would have to disclose and register with the government its political literature and private communications with its own members if the literature or communication contained a request to write to Congress. This provision would seriously infringe on free speech and the right to privacy. Finally, the House bill was shorn of a contributor disclosure provision, which is still in the Senate bill, that would have had a chilling effect on freedom of association and the right to privacy by requiring the disclosure of the names of people who gave $3,000 or more to the organization.

Although the House bill is far superior to the Senate bill, the former measure still contains sanctions stiffer than are needed to achieve its objectives. One is a criminal sanction for a violation, whereas injunctive relief to compel disclosure should be sufficient. Another is a heavy civil penalty for a violation that was not willful but was committed under a misinterpretation or regulations.

Common Cause—a praiseworthy citizens lobbying organization with the laudable purpose of exposing special interest lobbying for private gain—is pushing for the stronger Senate bill. But we think the American Civil Liberties Union, which is alert to threats to the Bill of Rights, has taken a better position in criticizing provisions of both bills that might not only threaten rights but also hamper public interest lobbying by citizens groups.●

## "SUMMING UP CANAL DEBATE"

### HON. BARRY M. GOLDWATER, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. GOLDWATER. Mr. Speaker, as far as I'm concerned, an editorial from The Signal, Newhall, Calif., sums up the Panama Canal debate about as eloquently as anything I have heard to date. I understand a copy of this editorial has been sent to every U.S. Senator. We here in the House of Representatives, who have been disenfranchised from voting on this critical issue by President James Carter, can only hope the Senate has read this articulate piece:

ARE THE PANAMA TREATIES A $50 BILLION ICEBERG?

For months and months the American Congress and the American people have been bedevilled by a pair of patchwork diplomatic prose poems known popularly as the New Panama Canal Treaties.

In truth, these two remarkable, if wretched documents, are not even remotely "treaties" in the precise meaning of the term. The first of these two agreements is more properly a quitclaim in which the United States undertakes to abandon its historic title to the Panama Canal, the Canal Zone, the Panama railroad and the properties pertaining thereto.

In addition the second of the New Panama Canal treaties is, in effect a promisory note by virtue of which the United States agrees to pay Panama, for 20 years, substantial fees and revenue shares which will aggregate between $2 billion and $4 billion.

To millions of perplexed American citizens who are fortunate enough to live beyond cannonshot of the capricious environs of Washington, D.C., these two masterpieces of diplomatic lyric poetry make no sense whatsoever. It is impossible for an honest and curious man to explain to his barber or to the corner saloon barmaid in Laramie, Wyoming, why Jimmy Carter is in such a damnable rush to tear the Panama Canal away from the bosom of America and hand it over, locks, stocks and transit revenues, to a textbook-pure Latin dictator who swaggers around his own tropical hacienda wearing Castro-style army fatigues and toting six shooters at his hip.

Why are the illustrious literati of the American Senate, who normally pass their time playing games in Georgetown and Chevy Chase, devoting their waning and increasingly unpopular energies to ridding our country of this remarkable hydraulic engineering monument? Why does the cream of our West Coast intelligentsia, our gaunt Pericles from Los Angeles, Alan Cranston, and our somnolent Sam Hayakawa, the nationally-applauded connoisseur of Dixieland jazz, vote to give Teddy Roosevelt's famous hand-me-down to a tyrant whose secret police would shoot them down like wharf rats if they were caught climbing over the Canal Zone fence after dark?

This spectacular carnival of Capitol Hill lobbying for passage of the new Canal treaties has been a disgrace and an insult to the American people. For Jimmy Carter, in his passion to abandon the Canal Zone, has chosen to speak with a forked tongue to his own fellow citizens.

When Jimmy Carter marches to the TV cameras and looks humbly at his fellow Americans and tells them "We have never owned the Canal Zone," he is lying.

And when he finishes "We have never paid for it," this is the most damnable lie of all.

Well, these paragraphs are not intended as hopeless debate over the merits of the new Panama Canal treaties. For there is no merit to the miserable affair whatever. This country of ours has built and operated the Panama Canal for more than 60 accident-free years. But now, because of some un-admitted but obviously massive pressures, our Washington shogunate, using the most contumacious hip-hip-hurrah of hypocrisy, is at this moment preparing to give away this marvelous legacy from our greatest years of nation-building.

The Senate has been bought and paid for. The Panamanians have performed magnificently as blushing and reluctant brides. Generalissimo Omar Torrijos cleaned himself up and came hopping into Washington to sign the new treaties and give the kiss of peace to our forever grinning little President, Marse Jimmy Carter.

Skittish Senators have been flown to the palatial tropical Panama Bay resorts, wined, dined, petted by Isthmian bunnies and sent on fairlyland jungle cruises across the glassy waters of Lake Gatun.

The Passion Play of the Panama Canal has gone off so far without a hitch and the Perils of Pauline Panama have been a smashing success. The vote on the first treaty was a heart-stopper, with the outcome uncertain until the last breathless ballot had been counted. It was burlesque theatre on Capitol Hill just like a Texas tag-team wrestling match.

Howard Baker, the minority Republican Goliath from Tennessee, has prattled along in splendid voice, expressing statesmanlike reservations about the treaties, demanding occasional minor and nonsensical changes in wording here and there. But in the end, Baker, the champion of sound and sensible conservatism, has loyally collapsed and voted with the Capitol Hill establishment mob.

Yes, the fix is in. If all goes according to Jimmy Carter's scenario it will be ratified at the last moment by a breath-taking precious, wavering vote or two. What garbage this all is! Must our Washington, D.C. indolent Senators always treat the American voters as if they were a pack of sodbusters being warmed up at a tent show revival meeting outside Ponca City, Oklahoma?

So much for the original script. But what about the tip of the iceberg that seems to be floating around in Panama Bay? In these last final weeks in the great Panama Canal Treaty debate, has the meat in Jimmy Carter's coconut finally been found?

And so, on the front page of this issue of The Signal we are pleased to reproduce a handsome "tombstone" advertisement that appeared in the columns of the Wall Street Journal on March 17, 1978, exactly two days after the first of the two Panama Canal treaties was so excitingly ratified.

This advertisement is about as clear and confidence inspiring as an Agatha Christie murder novel. The Panama advertisement contains no clarifying information beyond the fact that it amounts to approximately $100 for every man woman and child in Panama. No term is stated, no interest rate divulged, no maturity dates reported. There is no First Chicago Limited known to the Chicago telephone information operations. Nor is there a First Chicago Panama SA listed. There is no prospectus available. Is the loan being collateralized by future Panama Canal revenues and tolls?

Actually this epic Panama loan ad makes about as much sense as the subtitles of an Alfred Hitchcock continental jewel robbery feature film. Or perhaps it is more reminiscent of the Thursday night dinner menu on board the old Orient Express, Vienna to Istanbul.

The trail of this Panama loan leads through the Wall Street Journal advertising department eventually to some obscure office in Paris. Reputable American financial firms have no detailed records of this transaction in their files. American citizens are not allowed to participate. What is Panama going to do with this loan? What has Omar Torrijos promised as security? What will the proceeds be used for? Will the money be paid to American institutions or individuals, and, if so, in what amounts and for what reasons?

In other words, is the weenie in Jimmy Carter's Panama hot dog simply a matter of good old money? Is he simply handing

Omar Torrijos $10 or $20 billion worth of assets, that can be used in future years to raise multi-billion dollar loans and government bond issues?

Do the American people realize that if and when the Canal goes to Panama, that they are giving away a fortune in real property and in revenue-producing facilities—and that we are not really giving it away at all. We, the American people, through the chivalrous generosity of our President and Senate, are actually paying the Republic of Panama and His Excellency Omar Torrijos billions of dollars to take the Canal Zone off our hands.

Well, enough has been said. The tip of the Panama Canal iceberg is beginning to show. And it is coming clear, that after all the oratory is over and all the patriotic anthems have been sung, the new Panama Canal Treaty chapter in our American history is just another stanza of the old cash-and-carry marching song that has embellished Washington, D.C. politics for two centuries.

It is almost unbelievable that the American Senate is prepared to work this fraud upon their constituents. And if the Senate dares ratify the final treaty without a thorough investigation of this extraordinary Panama advertisement they shall be guilty of the most glaring, careless behavior.

Ask your Senator to explain this fascinating Panama loan advertisement and explain how much hard financial credit and bond money the treaties will mean to Panama.

If he can look you straight in the eye and answer you fair and true, good enough. But if he looks over your shoulder and gazes into the distance and mumbles a lot of nonsense, tell him to mind his manners. Demand that he stop selling out, and order him back to the floor of his Senate chamber to vote "no".●

## UNIVERSITY TO INAUGURATE PRESIDENT, DEDICATE INSTITUTE THIS MONTH

### HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. QUILLEN. Mr. Speaker, the remainder of April is going to be especially noteworthy in the First District of Tennessee, particularly on the campus of East Tennessee State University.

Two events of vital importance to the growth and development of the university will occur within days of each other. One is the April 20 dedication of the Institute for Appalachian Affairs, a newly established entity that symbolizes the dedication of the university to providing educational opportunities for the people of Appalachia throughout its existence.

The second is the April 28 inauguration of the new president of East Tennessee State University, Dr. Arthur H. DeRosier, Jr.—a man who is the personification of energy, enthusiasm, and erudition.

East Tennessee State University enrolls over 10,000 undergraduate and graduate students annually, with admissions growing each fall. It was founded in 1911 as a normal school for training public schoolteachers to serve the Appalachian area.

It has grown steadily in scope and quality, until today it offers a wide variety of programs in the arts and sciences, business, technology, and education.

The East Tennessee State University College of Medicine, created with the help of Federal funds from the Teague-Cranston Act, will be admitting its first class of students this fall, and already is serving as a magnet attracting much needed family physicians to the Appalachian area.

Dr. Art DeRosier will be the fifth president to guide the university in its growth. He is a dynamic educator and administrator who has served on the faculties of The Citadel, Converse College, the University of Southern Mississippi, the University of Oklahoma, and East Tennessee State University. He has been the assistant dean of the graduate school of the University of Oklahoma, as well as dean of the graduate school and vice president for administration of East Tennessee State University. Prior to returning to the Johnson City campus last year, he served as vice chancellor of academic affairs and vice chancellor of the University of Mississippi.

Born in Norwich, Conn., on February 18, 1931, Dr. DeRosier served in the U.S. Air Force from 1948 to 1952. He earned his baccalaureate in history with high honors from the University of Southern Mississippi. His M.A. and Ph. D. in history are from the University of South Carolina.

Phi Beta Kappa, Dr. DeRosier has authored several scholarly works, including "The Removal of the Choctaw Indians," which was published by the University of Tennessee Press and Harper Torchbooks.

In the 9 months since he assumed the duties of the presidency, Dr. DeRosier already has begun a new development program emphasizing private giving, contracts, and grants. A new academic reorganization promises the university even greater potential for meeting the needs of the Appalachian region in coming years, under the leadership of Dr. Arthur H. DeRosier, Jr.

It is therefore fitting that his inauguration and the dedication of the Institute for Appalachian Affairs be conducted contiguously.

Though the university historically has worked with many agencies concerned with regional development, there has never been a single academic entity concerned with assisting the people of the region in solving their problems and preserving their culture.

The institute will endeavor to act as a clearinghouse, matching resources with development problems. From a cultural standpoint, the institute will strive to maintain and preserve cultural identity through the sponsorship of regionally oriented festivals and shows. Academically, the institute will take the lead in allaying various university offerings into a degree program in Appalachian studies. These pursuits will be broadened with the addition of conferences, workshops, and the encouragement of publications dealing with Appalachian affairs.

April traditionally is a month of awakening, revitalization, and increased awareness of the world around us.

Therefore, it is particularly fitting that the House pause to note the events taking place this month, for they are symbolic, not only of what is happening on the university campus, but in the Appalachian region as a whole.●

## ENFORCEMENT PROBLEMS WITH DNA RESEARCH

### HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. WAXMAN. Mr. Speaker, I would like to bring to the attention of my colleagues a recent article from the Boston Globe, written by Richard A. Knox, describing the problems of enforcing safety standards for recombinant DNA research Recombinant DNA research permits scientists to creat new combinations of hereditary material, and mix genetic material together from viruses, bacteria, plants, animals, and humans, in ways that do not occur in nature. The article documents a violation of safety standards promulgated by the National Institutes of Health at Harvard University, one of our very finest research centers respected not only in our country, but throughout the world. The Harvard experiment was conducted in a laboratory which was not safe enough. It involved experimentation with viruses that cause cancer in animals.

I bring this blatant violation of safety standards to the attention of Congress, because I am concerned that H.R. 11192, recently reported out of the Interstate and Foreign Commerce Committee, which will come to the floor of the House soon for a vote, may be inadequate to protect the health and safety of our people. Inadequate enforcement of recombinant DNA safety regulations raises potential risks not only for the environment and population in the community outside the laboratory, it also creates unnecessary risks for graduate students, faculty, and workers participating in recombinant DNA experiments inside the laboratory.

Mr. Knox's Boston Globe article points out the difficulty of securing researchers' compliance with Federal guidelines. It dramatically demonstrates that a Federal law premised on the cooperation and candor of scientists being regulated will not adequately protect the safety of employees and students in the laboratory.

H.R. 11192 must be strengthened with amendments which will protect the health and safety of graduate students, faculty, and workers employed in recombinant DNA laboratories. If, as the Boston Globe points out, the health and hospitals commissioner for the city of Boston thinks H.R. 11192 may not sufficiently protect communities where recombinant DNA experiments are taking place, we must strengthen the legislation.

We are living in a brave new world where American corporations and universities can now obtain patents on new forms of life created in their labora-

tories. I am impressed by the claims made that recombinant DNA research will develop microorganisms to eat oil spills, to enhance crop yields, and possibly even to arrest invasive cancer tumors.

History tells us that similar anticipated benefits led American scientists to rush into radiation research and commercial development without adequately safeguarding the workplace where experimentation and manufacturing of nuclear substance was done. Now years later, dramatic hearings before the Subcommittee on Health and the Environment convened by our able Chairman PAUL G. ROGERS documented that cancer in some of these workers today is related to their exposure years ago in their place of employment.

We must not doom another generation of workers to exposure to preventable risks. It is for this reason I will introduce an amendment to H.R. 11192 on the floor of the House to strengthen and protect the safety of students and employees in recombinant DNA labs:

THOMAS AFFAIR: A TEST CASE FOR DNA RESEARCH?

(By Richard A. Knox)

A molecular biologist at the Asilomar Conference on Recombinant DNA molecules, February, 1975: "You can't legislate Nature, but you could legislate playing God."

Three months ago the National Institutes of Health (NIH) took the unprecedented step of halting the research of Prof. Charles A. Thomas, Jr. because the Harvard Medical School scientist and the university had failed to comply with NIH guidelines governing controversial recombinant DNA research.

At the time and since then, Thomas and Harvard officials have characterized the violation as a minor technical or bureaucratic error with no great implications for regulation of the gene-splicing research.

"The nature of the violation," Thomas said in a telephone interview Friday night from La Jolla, Calif., where he has recently taken a research position, "was the technical one of continuing to do the research before the (Harvard) biohazards committee had certified my laboratory. But if that is a violation then almost everyone else I know did the same damn thing—it was standard operating procedure."

The NIH has concluded, however, that Thomas's violations were not merely technical. Following their investigation of "the Charlie Thomas affair," as the episode has come to be called among insiders, federal officials have concluded that the violations were more substantive and serious than anyone has publicly admitted thus far.

James Schriver, the NIH official who led the inquiry, acknowledged in a recent interview that the breach of the federal research guidelines at Harvard was the most serious in the 16 months they have been in effect.

The episode is the more significant, Schriver indicated, because Thomas was one of the scientists involved in writing the federal guidelines and thus cannot claim ignorance of their details or thrust. "I will point that out in my report," said Schriver, who is director of the NIH's office of management survey and review.

The Thomas episode, which is currently being investigated by an ad hoc Harvard committee, raises a number of issues about the integrity and workability of the regulatory system set up to govern recombinant DNA research. The four-year-old technology allows scientists to juggle genes, the hereditary chemical instructions within all living cells, among such divergent lifeforms as viruses, bacteria, plants, animals and humans.

Though some researchers claim to have discredited the initial "laboratory monsters" or flaring-epidemic scenarios of risk, there is still general consensus that the many unknowns involved in the powerful new technology require prudence, caution and some form of regulation.

The Thomas affair may yet create reverberations beyond the scientific community. Coincidentally, Congress is now debating legislation that would write the existing NIH guidelines into federal statute and make it very difficult for local governments to pass stringent laws regulating the controversial experiments.

When the NIH froze Thomas's research funds last December, Harvard officials immediately perceived the damage that the Thomas episode could do to their efforts to get Congress to pass a bill that would let the scientific community regulate itself under NIH standards.

"The timing just couldn't have been worse," Dean Daniel C. Tosteson of Harvard Medical School told The Globe.

From interviews and from examination of the minutes of the Harvard medical area committee designated to monitor recombinant DNA research, the issues fall into two areas:

The fact that Thomas and his coworkers did some experiments that the NIH guidelines classify as the most hazardous allowed in a university setting, using a laboratory that the Harvard committee considered unsafe for such research;

The fact that Thomas' research group continued a series of experiments at a medium level of biological hazard for eight months without any university authorization.

While Thomas was involved in helping the NIH write national guidelines governing the research, The Globe has learned, he and his co-workers were conducting research at Harvard Medical School in a laboratory that was later determined not secure enough, by federal or Harvard standards, to do the kind of experiment the group was performing.

That research involved manipulation of two viruses, SV–40 and "helper" SV–40, that cause cancer in monkeys. The scientists were able to take genes from a common bacterium known as E. coli and insert them into the cancer virus, then demonstrate that the "recombinant" virus could multiply when incubated with monkey cells in the laboratory dish.

Thomas and his co-workers asserted in a published report last May that the research was done "under conditions of P–3 containment as described in the NIH Guidelines for Research Involving Recombinant DNA Molecules."

Thomas reiterated on Friday that "in my opinion our lab actually met the spirit and the requirements of the NIH guidelines."

The Harvard committee, after months of wrangling with Thomas about safety specifications, disagreed. The committee decided that Thomas did not have a certificate P–3 laboratory at the time he did the SV–40 work or anytime after that.

A P–3 laboratory classification is the second most secure type of facility under the federal guidelines. Designed to minimize risk of escape of experimental organisms that might conceivably pose a risk to humans or ecosystems, a P–3 facility is the type that triggered a momentous public debate nearly two years ago when Harvard proposed to build one in Cambridge.

(There are currently 47 NIH-funded P–3 labs in the nation, according to NIH officials, and only one P–4 lab, the most secure type. Harvard is constructing its P–3 Cambridge facility, and the Harvard-affiliated Sidney Farber Cancer Center is planning one or two P–3 labs.)

Thomas' SV–40 research was carried out before the NIH guidelines formally took effect in November 1976, so technically it is not a violation of the guidelines, though some believe it was a violation of their spirit and intent.

After the guidelines took effect, however, the Thomas group carried out so-called P–2 recombinant DNA experiments for eight months before the official medical school committee granted his lab provisional clearance to do experiments at the P–2 biohazard level, according to Schriver and Thomas himself.

"It was common procedure to continue what you were doing while your (application for certification) was in progress," Thomas said. "The work can't just suddenly come to a halt. There was nothing secret about it."

It is not clear why the medical area committee, which deliberated on Thomas' applications at nearly every monthly meeting from November 1976 to December 1977, remained unaware of the fact that the P–2 research was continuing without its approval.

According to minutes of the monitoring committee and discussions with committee members and Harvard officials, there were serious misgivings about Thomas' lab because of ventilation problems, access from outside areas, isolation from the rest of the building and laboratory procedure. Thomas' lab was in Building C at the medical school in Roxbury, an older structure that is used for instruction of medical students as well as for research.

Thomas, who is described by admirers and detractors alike as a brilliant, but headstrong, scientist, asserted repeatedly that his laboratory met the stringent P–3 specifications. He complained bitterly, according to the committee minutes of last Dec. 8, that the committee was "too strict" and that it "has taken it upon (itself) to go beyond the guidelines of the NIH."

Thomas is still prohibited by the NIH from carrying out federally funded recombinant DNA research in his new, certified P–3 laboratory at the Scripps Clinic and Research Institute in La Jolla. He told The Globe that he thinks the Harvard committee was afraid to give his Harvard lab P–3 certification "because they would have been criticized by the radical left."

His decision to leave Harvard last June was not wholly determined by the committee's refusal to grant P–3 approval, he said, but that was the last straw.

Apart from the committee's specific difficulties with the Thomas proposals, its minutes also highlight the difficulty of securing researchers' compliance with the federal guidelines and underscore how the present regulatory effort is based fundamentally on the cooperation and candor of the scientists being regulated.

This has been an unbroken thread of concern among members of the committee during its 18 months of existence. At its very first meeting, on Nov. 23, 1976, the question was raised: "How do we know other experiments (than the approved ones) are not being done?"

Committee chairman Bernard N. Fields replied: "We have to accept the investigator's commitment that no experiments will be done that are not approved by the committee." Monitoring of compliance, Fields added, is "on an honor system."

A few days after the NIH suspended Thomas' work last December, a committee member, David Rosenbloom, who is the health and hospitals commissioner for the city of Boston, sharply asked what the consequences were for violating the NIH and university guidelines. According to the committee minutes:

Rosenbloom "stated that the city had deferred to this committee due to the fact that it was operating under the guidelines as the Cambridge committee. But Rosen-

bloom felt that the city would probably impose its own rules if the consequences for ignoring the Harvard Medical School committee's rules are not severe enough."

Rosenbloom confirmed on Friday that the minutes accurately reflect his concern, which he said he has amplified in a long letter to Prof. Conrad Bloch, chairman of Harvard's pending internal inquiry into the Thomas violations.

The Boston health commissioner added that he is "not very happy" with the Harvard-backed version of the proposed federal statute reported out of the House Commerce Committee week before last. "A federal law which says local governments can't regulate in this area is unfortunate," Rosenbloom said. "Even if the risk is really minimal—and I'm willing to believe some recent reports that suggest the risk is low—why take it for the convenience of an individual researcher?"

Robin Schmidt, Harvard's vice president for government and community affairs, acknowledged in an interview that self-regulation is the best solution since "all cities might not always be the model that Cambridge turned out to be." (In Cambridge, a citizens' panel last year recommended that the city set up a standing committee to monitor local universities' compliance with federal recombinant DNA activities.)

"The researchers I've met are individual entrepreneurs, impatient with regulations," Schmidt said. "But we can't lay too many regulations on them. I keep remembering that my wife and I never had polio because some crazy guys were off in a laboratory working on a vaccine."●

## TEXAS STEEL CO. COMMENTS ON OSHA

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. TEAGUE. Mr. Speaker, Mr. L. L. Highnote, vice president for Industrial Environment for the Texas Steel Co. in Fort Worth, Tex., has directed a letter to the Interagency Task Force on Workplace Safety and Health with respect to the Occupational Safety and Health Act which I believe will be of interest to the Members of this body. Accordingly, under leave to extend my remarks in the RECORD, I wish to include Mr. Highnote's letter.

FORT WORTH, TEX.,
*April 6, 1978.*

TASK GROUP A,
*Interagency Task Force on Workplace Safety and Health, Rosslyn, Va.*

GENTLEMEN: It is unfortunate, but true, that the Occupational Safety and Health Act was promulgated on a basic absurdity. The law was couched in antagonistic terms because Congress proceeded from the ludicrous assumption that the business managers of the United States do not want, and will not provide, workplace safety, unless forced to do so. Nothing is further from the truth. Even those managers who, for lack of compassion, are not moved in that direction, are immediately sold by the economics of good safety and health programs. Therefore, the way toward improvement of the act and its administration is clear: First, approach the program of improving health and safety on the premise that it's a common goal of management and government; second, use the tools that will get the job done: Education and financial help.

Fear and force should be available, but its use should be restrained and applied in the few cases where the management actually opposes improvement.

The act has been ineffective in improving workplace safety and health because it is counterproductive and its very concept is hostility while it should have been one of cooperation.

The benefits derived from a Federally mandated safety program are all but nil, when forced upon large corporations. Large companies have to have a workable safety and health program.

Federal Safety and Health Inspectors, from our experience, are inexperienced in our operations and are thus inept in telling us what and how to correct problems. They are only fault finders and this is not palatable to the majority of people.

Federal programs are not able, through fines, to increase the safety awareness of employees, (which is the groundwork of a good safety program) nor, can employers be expected to instigate safety programs through intimidation. The only purpose for using fines is fear, and fear does not breed continuity of efforts, it only breeds mistrust and contempt.

The Federal program should be changed to one of assistance, aimed at helping employers correct problems by providing expert advice, secured without fear of reprisals. Guidelines should be set and followed. Federally mandated expenditures for non-productive, but desirable safety equipment, should be credited against taxes in the year of expenditure, thus making expenditures for this equipment affordable, and equally important, retaining capital for productive uses. The same-year-tax credit will provide industry with the resources to improve workplace conditions on a voluntary basis and at the same time, continue growth and expansion programs, hence minimizing the need for Federal enforcement.

Industry has a great concern for the welfare of their employees, but it also must continue to expand and modernize. Industry cannot long survive with vast amounts of capital siphoned into non-productive equipment unless some way is provided to recover that capital quickly.

The Federal Bureaucracy by its astounding number of regulatory agencies has no choice but to overlap its control of business. The business community has been inundated with regulations conceived by individuals who are not safety specialists and cannot comprehend a program geared toward employee awareness instead of equipment awareness.

We have for years had an intensive training program in our workplace.

The most effective means of reducing workplace injuries and illnesses is through employee education. This program is three-phased:

1. Make employees aware of job related hazards and proper safety equipment needed for various jobs. Involve employees in improving safety.

2. Solicit employee suggestions for improvement of their individual work areas; investigate an act upon those ideas, and give the employees credit where due.

3. Have management promote the idea that all accidents are avoidable and be ready to make the necessary expenditures to achieve hazard-free workplaces.

There are three facets that make our Safety Program effective. They are:

1. Housekeeping—an orderly workplace prevents hazards and shows pride in your work.

2. All accidents are avoidable. Acceptance by management of the concept that through planning and proper training of workers in an orderly workplace, safety awareness and accident prevention will ensue.

3. CARE—Employees must care about their fellow employees' well being, their workplace, and their own welfare. If they are full of care, they will be careful and if they do not care, they will be careless. A careless attitude breeds injuries.

Our Company, in the last five years, has increased our workforce by 26% and we have reduced compensable losses by approximately 50% and total injuries by approximately 25%.

This has been accomplished by personal contact with all employees via daily safety contacts, monthly safety meetings, investigations of accidents conducted by employees involved in the accident, the Safety Department and management (including the president in serious cases) and regular hazard-hunting inspections by teams composed of the Safety Department, area management and area employees.

A safety program is workable only when all employees become involved, not when Government proposed regulations are forced upon industry. Government can help most by offering consultation and periodic inspections of industrial workplace with the idea of helping industry achieve superior workplace safety and offering tax credit incentives for the necessary expenditures.

Sincerely,

L. L. HIGHNOTE,
*Vice President, Industrial Environment.*
By: TONY W. SIMS,
*Superintendent, Industrial Safety & Environmental Control.*●

## GAS RATIONING: THE BETTER IMPORT REDUCER

### HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. STARK. Mr. Speaker, recently I came across an excellent letter to the editor of the New York Times. In it the author, Princeton's Carter Henderson, persuasively and succinctly demonstrates why—if we sincerely mean to reduce dependence on imported oil—gas rationing is a workable and more equitable alternative to the methods we are now considering. I commend this letter to my colleagues:

*To the Editor:*

Your March 27 editorial "Crude Alternatives to the Crude Oil Tax" perpetuates the myth that gasoline rationing would be an "extreme way" of reducing America's appetite for foreign oil, which, as you correctly state, "jeopardizes the nation's strategic independence and diminishes the value of the dollar."

Attempting to slow the growth of America's massive oil imports through cost-escalating taxes, fees, decontrols, or auctioned import quotas—i.e. "rationing by price"—would create a sudden surge of new inflation, discriminate against the poor, and fail to reduce demand by any predictable amount since people living in our automobile-dependent culture will understandably cut back on their consumption of other necessities in order to buy gasoline for their cars. Rationing, on the other hand, would enable us to reduce petroleum imports very gradually, with considerable precision, and in a way that's noninflationary and fair to all consumers—rich and poor alike.

The gradual reduction of gasoline consumption, plus the ability of motorists to buy or sell gasoline coupons on a "white market" similar to the one envisioned by the Department of Energy in its standby rationing program, should keep illegal activities to a min-

imum. Counterfeiting and the black market were not a problem at the beginning of World War II, for example, when gasoline consumption was cut back by less than 10 percent. They "developed into a serious menace," according to the O.P.A.'s Ninth Quarterly Report dated March 31, 1944, a military demands for fuel increased, and as civilian consumption was slashed by 40 percent in just two years.

It's also doubtful if a gasoline rationing program would create any more expensive or cumbersome bureaucracy than the one already being put into place by the Department of Energy—with its 20,000 employees and $10.4 billion annual budget—to administer all the "incentives," "penalties," "taxes," and "tax cuts" enumerated by President Carter in his April 20, 1977, speech on energy policy to a joint session of Congress.

The bureaucracy needed to administer a crude oil equalization tax, or import fee program, for example, would obviously have to be extensive as these charges are to be refunded to the public at large, including, I presume, the approximately 17 percent of all American families that do not own cars, along with great numbers of poor people of no fixed address who elude even the United States Census. To make matters worse, this public rebate money could quickly be diverted into vast new pork barrels so beloved by the Washington political establishment. COET, for instance, has already been discussed in Congress as a source of funds for the Department of Energy's emerging synthetic fuels program, estimated to cost between $20 billion and $40 billion.

Raising the price of domestic oil to world levels by removing controls would result in windfall profits for producers, as you point out, while restricting imports through a presidentially imposed quota-allocation program would invite manipulation by the powerful oil industry for its own financial advantage.

Gasoline rationing can cure our excessive appetite for foreign oil fairly and effectively. It can also educate the American people—as the Administration and Congress have so far utterly failed to do—that the United States has a serious energy problem, which must be solved if we are to remain militarily and economically secure.

CARTER HENDERSON,
*Co-Director, Princeton Center for Alternative Futures.*●

## NOTES ON PRIVACY LEGISLATION

### HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. PATTISON of New York. Mr. Speaker, I continue to be troubled by the lack of movement in the Congress toward enactment of new privacy protection legislation. Earlier this year I joined with BARRY GOLDWATER, JR., for a continuing effort to help promote the privacy bills he had developed with our former colleague, Ed Koch. But it sometimes feels like we are pushing against a wall of Jello.

In the 94th Congress I served on the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice. That panel held over 40 days of hearings and markup on the Bill of Rights Procedures Act and related measures. We developed what I think is a comprehensive and balanced bill, but it died in committee toward the end of the last Congress. The legislation was reintroduced at the start of this 95th Congress by several Members.

Last year the Privacy Protection Study Commission issued its final report, including extensive recommendations for legislative action, many closely paralleling the Bill of Rights Procedures Act. Congressmen GOLDWATER and KOCH, who served on the Commission, translated the recommendations into legislative language and introduced a series of bills last fall.

Also in the fall, the House Subcommittee on Financial Institutions held hearings on financial privacy and began consideration of bank record privacy legislation that was patterned after the Bill of Rights Procedures Act. However, that effort has gotten bogged down in unrelated controversies surrounding the proposed Safe Banking Act, to which the privacy provisions had been attached.

Mr. Speaker, it has been over 6 months now since the Privacy Protection Study Commission issued its final report. We are still waiting for the administration to issue its formal response to that report, in the form of their proposals for new legislation. In the meantime, we appear to be sitting on our hands up here on Capitol Hill. I am very disappointed.

Markup is scheduled to resume in the relatively near future on the Safe Banking Act. Hearings are scheduled for next month to discuss the financial privacy issue in the Senate Banking Committee. There are signs that the House Judiciary Committee may again take up the issue soon. These all present cause for hope, but I must say that it is distressing to me that we are more than two-thirds through this 95th Congress and we have yet to conclude any substantive action to safeguard the privacy rights of American citizens.

At this point in the RECORD, I wish to insert an article by BOB KASTENMEIER, the chairman of the Subcommittee on Courts, Civil Liberties and the Administration of Justice. The article appears in the current issue of Trial magazine, which is published by the Association of Trial Lawyers of America.

DEVELOPMENTS IN PRIVACY LEGISLATION

(By Representative ROBERT W. KASTENMEIER)

Four years ago in the broadening wake of repeated disclosures of illegitimate government spying, the House Judiciray Subcommittee on Courts, Civil Liberties and the Administration of Justice began the consideration of legislation designed to limit what Justice Oliver Wendell Holmes once called "this dirty business."

During the 93rd Congress, subcommittee hearings focused on the use of wiretapping and other forms of electronic surveillance by federal investigative authorities. The work of the subcommittee was temporarily delayed by the intervention of the Presidential Impeachment Inquiry in the latter half of 1974.

At the beginning of the 94th Congress in February 1975, work on legislation to control government surveillance of citizens' private lives resumed.

The Subcommittee began nine months of hearings, running to over 1300 pages, which explored the broad scope of the problem and considered a variety of legislative solutions. The bills before us ranged from a proposal to ban any investigation of American citizens for other than limited criminal law enforcement or job application purposes to a bill which would simply ban military surveillance of civilians.

As one of the most comprehensive and widely supported bills under consideration, H.R. 214, entitled the Bill of Rights Procedures Act, quickly became the focus of the Subcommittee's interest. By the conclusion of the 94th Congress the bill had accumulated a total of over 70 cosponsors, almost equally divided between the political parties.

H.R. 214, as introduced, prohibits federal agents from intelligence gathering and surveillance by wiretapping, mail opening, or inspection of bank, telephone, credit, or other personal records without a court order based on probable cause that a crime was about to be or had been committed.

As a result of its hearings, however, the Subcommittee decided to rewrite the legislation to focus with greater accuracy on those aspects of individual privacy most in need of statutory protection while recognizing the need of federal law enforcement authorities for greater flexibility in investigative techniques than that offered by the original bill's reliance on the search warrant.

The outcome of the Subcommittee's work, after more than 20 drafting sessions, was a bill regulating the inspection by federal agents of bank, telephone, and credit records, the conduct of mail covers by the US Postal Service; and amending certain sections of existing wiretap laws. The bill was reported favorably by the Subcommittee. However, after two days of debate before the full House Judiciary Committee in July 1976, H.R. 214 was re-referred to the Subcommittee and no further action was possible during the 94th Congress.

I re-introduced the bill at the beginning of the current Congress. The new bill, also numbered H.R. 214, has been jointly referred to the Committees on Banking, Finance and Urban Affairs and the Judiciary.

Meanwhile, on July 1, 1977, the Privacy Protection Study Commission, created by an act of Congress in 1974, issued its final report to the President and Congress. The report, entitled Personal Privacy in an Information Society, was distributed by the President to each of the Members of the Cabinet with a memorandum directing each department to prepare a plan for the implementation of the report. Chapter Nine of the report, "Government Access to Personal Records and 'Private Papers,'" makes seven recommendations for public and private policy on government access to such records.

These recommendations are embodied in a new piece of legislation, introduced by Representatives Koch and Goldwater, which is currently pending before the House Judiciary and Banking Committees. The recommendations of the Commission bear striking resemblance to the provision of H.R. 214 and give new impetus to the Congress to seriously consider this and similar legislation.

The heart of both H.R. 214 and the Chapter Nine recommendations of the Privacy Protection Study Commission Report is a series of limitations on government access to personal records held in the possession of third parties. The Commission recommends protection for all third-party held records, while H.R. 214 covers only financial records, telephone toll records, and credit records.

Under both the Commission Report and the Bill of Rights Procedures Act, no federal agent would be able to gain access to the protected records except by using one of four procedures:

(1) prior written consent of the subject of the record,

(2) service of an administrative subpoena or summons with concurrent notice to the subject and an opportunity for him to move to quash,

(3) service of a judicial subpoena, with the same notice and rights, or

(4) first obtaining a court authorized search warrant.

It is not surprising that the Privacy Protection Study Commission and the House Judiciary subcommittee have proposed substantial expansion of privacy rights in third-party held records.

In recent years direct cash payment for goods and services has given way to the use of checks and credit accounts. The newer forms of monetary exchange necessarily result in records about the intimate details of a citizen's personal life being kept by banks, credit card companies, and retail establishments.

Similarly, the telephone, once regarded as a luxury, has now become the common means of communication among rich and poor alike. Telephone billing records in the possession of communications common carriers can often give as detailed and accurate an account of an individual's personal friendships and political associations as were once available only by unsealing and examining private written correspondence.

However, unlike privately held account books and sealed letters which have long enjoyed the protections of the Fourth Amendment, third-party held financial records and telephone toll records have not been protected from uncontrolled search by government agents. Where banks, telephone companies, and retail credit establishments are willing, federal investigators may have direct access to customer records with no questions asked.

When a business refuses voluntarily to permit access to customer records, some investigative agencies are empowered by statute to issue summonses or subpoenas for the production of these documents.

These "administrative summonses" are enforceable in federal courts. However, under present law the customer about whose affairs the records relate has no right to be notified about the summons and subpoena and has no standing to challenge its enforcement.

This has placed the burden of protecting the privacy of many types of personal records solely on third-party recordkeepers.

It is not surprising, therefore, that banks, telephone companies, and credit organizations are among the strongest supporters of H.R. 214. These businesses greatly need legislative clarification of what obligations they have to protect their customers' privacy when governmental requests for information are made.

EXPANDING PRIVACY RIGHTS

In recent years there have been limited statutory and judicial attempts to expand the rights to privacy in third-party held records. The Fair Credit Reporting Act of 1970 requires a "court order" prior to the production of records of credit reporting agencies at the request of law enforcement authorities. However, the Fair Credit Reporting Act does not grant the subject of records standing before the courts to question the production of the records.

In the judicial arena the California Supreme Court has taken the lead in holding that third-party held business records are protected by a right to privacy. In *Burrows* v. *Superior Court*, (13 Cal. 3d 238.) it held that under a provision of the California Constitution equivalent to the Fourth Amendment, a bank customer has a reasonable expectation of privacy. Unless there is sufficient legal process, the California constitution is violated when records are obtained without notice to the customer of prior judicial authorization.

The United States Supreme Court, however, has not followed the reasoning of the *Burrows* case.

On April 21, 1976, the Supreme Court, in the case of *United States* v. *Miller*, 425 U.S. 435 (1976), held that a bank customer has no legitimate expectation of privacy in his bank records and no standing to challenge a subpoena for their production.

In concluding that there is no legitimate expectation of privacy in bank records, the Court observed that Congress in 1970 had enacted the Bank Secrecy Act, 12 U.S.C. b(a)(1), which specifically required that banks keep records for the benefit of federal investigative agencies. The Court concluded that "the lack of any legitimate expectation of privacy was assumed by enacting the Bank Secrecy Act. . . ."

H.R. 214, if enacted, would clearly signal the Court that Congress does recognize a legitimate expectation of privacy in such records while at the same time recognizing their value to legitimate governmental investigations.

The effect of the *Miller* decision is to leave third-party held records completely open to examination by anyone who can convince a bank official, credit company, or telephone company employee to permit them access. The *Miller* decision does not reflect accurately the thinking of the Congress, and legislation now beginning to move forward in the House Judiciary Committee will put the record straight.●

## THE ACADEMY AWARD TARNISHED BY VANESSA REDGRAVE

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 18, 1978*

● Mr. BIAGGI. Mr. Speaker, a justified crescendo of criticism has been directed to actress Vanessa Redgrave for her statements delivered during the 50th annual Academy Awards Ceremony. Her comments were indefensible and totally inappropriate. Once again the Academy Awards were cheapened by partisan political antics.

I offer for the observation of my colleagues an analysis of the Redgrave incident as written by William F. Buckley. In addition to lambasting Redgrave, Buckley directs praise at an ideological opposite, liberal Paddy Chayevsky, who denounced Ms. Redgrave's behavior. I believe Buckley presents a rational and totally correct assessment of the situation.

The imposition of one's political philosophies on captive audiences was a technique made popular and successful by Adolph Hitler. The parallel to how this statement was presented is clear. Let us work to have the comparison end with this isolated but unfortunate incident.

The Buckley article follows:

VANESSA AND THE USE OF OSCAR

(By William F. Buckley)

My new hero is Paddy Chayevsky, which datum will no doubt embarrass him inasmuch as politically he is a highly orthodox liberal. But as he put it the other night, he could not face himself in the morning if he did not express himself on the matter of Redgrave; by the same token, I must hail Chayevsky.

Here is the point to stress—that Vanessa Redgrave abused the occasion to say what she did. No lectures on the meaning of what she said are really appropriate. For the record, what she said was that "Zionist hoodlums" had picketed the Oscar awards and in doing so damaged the cause of world Jewry.

She went on to applaud those who had "stood firm and dealt the final blow against that period when Nixon and McCarthy launched a worldwide witch hunt against those who tried to express in their lives and their work the truths that they believed in."

And she finished by encouraging a continuing war against "oppression and fascism," not once mentioning the principal source of contemporary oppression, namely that communism which, among other things, Nixon and McCarthy fought.

But to undertake to teach elementary political history to Vanessa Redgrave requires faith in Pythagoras' contention that he could teach his theorem to an illiterate, and I have no such faith, so forget it.

Vanessa Redgrave is as unapproachable as Goebbels.

The point Chayevsky was making was a generic point. He said he was "sick and tired" of "people using the occasion . . . for the propagation of their own political propaganda." You remember, last year it was Jane Fonda who gave her views about the activities of the House Un-American Activities Committee in 1948, sparing us only her views of the Salem witch hunts three centuries earlier. The year before it was a surrogate of Marlon Brando, a Miss Rainwater or whoever, saying that Major Custer had it coming, or whatever.

Chayevsky said simply that it was inappropriate for someone going onstage to accept an Oscar to seize the mike for the purpose of vouchsafing one's political views to a captive audience What is truly strange is that anyone should defend Miss Redgrave's bad manners (never mind her views).

It is perhaps understandable that the emotionally incontinent of Hollywood should do so, people like Shirley MacLaine and Jane Fonda; but what about the others?

Easily the most preposterous defense of Miss Redgrave was done in the Los Angeles Herald Examiner by Denis Hamill, Pete's younger brother. His analysis suggests that cloning was achieved years ago.

What Hamill said is that Hollywood movies are politically tendentious. He went on at extraordinary length to make a point I shouldn't think anyone in the world would have disagreed with.

Of course the movies have praised the FBI, of course they whipped up fever against the Nazis and defended fellow travellers. So?

"Whether you agree with Vanessa Redgrave or not is not important." Yes, we know that. "What is important is that she had every right in the world to reach 100 million people across the world in any way she wanted."

Oh? Isn't a "right" to speak one's views defined by circumstance?

Would Miss Redgrave have had the "right" to pause during the filming of "Julia" to impart her latest observations on the doings of "Zionist hoodlums"? Would she have the right to stand up in a crowded theater and shout: "Fascist!"

Remember the chanteuse at the White House who went right from "Every Little Birdie Goes Tweet Tweet Tweet," to a denunciation of the Vietnam war in the East Room at a state dinner? Did she have a right to do that because, after all, the White House is also guilty of political tendentiousness?

The arguments in favor of Vanessa Redgrave's conduct reveal merely an intellectual flabbiness which America certainly ought to fear but which, try as one can, is difficult to blame on Joe McCarthy.●

# SENATE—*Wednesday, April 19, 1978*

*(Legislative day of Monday, February 6, 1978)*

The Senate met at 11:30 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. MURIEL HUMPHREY, a Senator from the State of Minnesota.

## PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O God, our Father, the searcher of men's hearts, help us to draw near to Thee in sincerity and truth. Make us to rejoice in Thy providential care over this Nation in prosperity and adversity, in success and in failure. Help us to live lives worthy of our vocation as the people's representatives. Give us grace to choose the harder right against the easier wrong and never to be content with a half truth when the whole can be won. Guard us against cynicism, flippancy, or irreverence in the sacred things of life. Strengthen and guide us all in the service of this Government and bring us at last to Thy higher kingdom.

We pray in the Redeemer's name. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., April 19, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3 of the Standing Rules of the Senate, I hereby appoint the Honorable MURIEL HUMPHREY, a Senator from the State of Minnesota, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mrs. HUMPHREY thereupon assumed the chair as Acting President pro tempore.

## LEGISLATIVE SESSION

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## THE JOURNAL

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Journal of proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETING

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the Armed Services Committee be authorized to meet during the sessions of the Senate today, April 19; Thursday, April 20; and Friday, April 21, 1978, to continue consideration of authorization bills pending with the committee, which must be reported to the Senate by May 15, 1978, under the Budget Act.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Madam President, under the time normally allotted to the majority leader, I would like to yield. I believe Mr. MORGAN has an order for 15 minutes. If he needs additional time, I shall yield to him the time normally allotted to me to use as he wishes.

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

## ALASKA'S D-2

Mr. STEVENS. Madam President, one of the most important issues facing Alaska during the 95th Congress is the final disposition of Alaska's d-2 lands. This legislation will have a profound effect on future generations of Americans as well as Alaskans. Congressman DON YOUNG and I believe that it is important that all Americans, particularly those who are to be most greatly affected by this decision, be aware of the various proposals pending before Congress. For this reason, I ask unanimous consent that a brief summary of the proposals be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

INDIVIDUAL PROPOSALS PENDING BEFORE CONGRESS

S. 1787, the "Alaska National Interest Lands Act", introduced by Senator Stevens on behalf of Governor Hammond and Congressman Young, was referred to the Senate Committee on Energy and Natural Resources. This legislation proposes the addition of approximately 25 million acres of national parks, wildlife refuges, wild and scenic rivers, and national forests in Alaska. Additionally, approximately 57 million acres of federal cooperative lands to be managed under the Cooperative Management system is proposed. The national park system would be increased by approximately 10½ million acres, approximately 8 million acres of wildlife refuges would be added. Nearly 6 million acres of new national forests would be created as well as 1 million acres of wild rivers. Upon the enactment of this legislation, the eight largest wildlife refuges would be located in Alaska, as well as eight of ten of the largest national parks in the country.

Senator Stevens' bill provides for the traditional four systems of management on the 25 million acres and for classification by the Federal-State Land Classification Commission of federal cooperative lands. Additionally, provision is made for dedication of state and private cooperative lands to be managed along with federal lands should the state and private land owners wish to be part of a cooperative management program. The Land Classification Commission would decide which lands would be open for mineral and other development activities. Agricultural development would be permitted under a long-term leasing plan to be developed by the Secretary of the Interior and the Secretary of Agriculture.

No "instant wilderness" is included in S. 1787, but all new conservation lands would be studied for wilderness potential over a five-year period. S. 1787 maintains the traditional role of the State of Alaska as manager of fish and game resources. In the event of limited resources, the subsistence activities of local residents would be granted priority over other competing consumptive uses. Additionally, S. 1787 guarantees "necessary public access" across d-2 lands, and provides that the Land Classification Commission shall determine the location and means of that access.

H.R. 39–S. 500–S. 1500: In early 1977, Congressman Morris Udall of Arizona introduced a d-2 lands bill which would create approximately 115 million acres of new parks and wildlife refuges in Alaska. This bill, which was drafted by an organization of environmental groups, was also introduced by request by Senator Jackson and by the late Senator Metcalf of Montana, in the Senate. In addition to the new parks, refuges, and wild rivers to be created, approximately 1.6 million acres of national forests would also be established by the legislation, and the new parks, refuges, and rivers along with the existing parks and refuges in Alaska would be declared "instant wilderness."

In the House of Representatives, H.R. 39 has undergone some changes during hearings and mark-up sessions. The House Committee on Interior and Insular Affairs has produced a revised version of H.R. 39 which would establish approximately 95 million acres of parks, refuges, and wild rivers along with approximately 2 million acres of national forests. "Instant wilderness" would be created on approximately 75 million acres with about 50 million acres placed in wilderness study.

Exploration and development of minerals would not be permitted in national parks, national monuments, national preserves, wildlife refuges, wildlife ranges, wild and scenic rivers, and wilderness areas in both versions. The revised version of H.R. 39 proposes a special process to allow the opening of some non-wilderness lands for mineral development following a recommendation by the Secretary of the Interior based on national need for a strategic mineral and its lack of availability from other sources. This

recommendation would be sent to Congress for its approval prior to any opening for mining.

The Carter administration proposal. On September 15, 1977, Secretary of the Interior Cecil Andrus announced the Carter Administration proposal which increased the "Morton bill" approximately 10 million acres and greatly reduced the number of acres allocated to forest lands. The Carter Administration proposes approximately 42 million acres as new national parks and 45 million acres as wildlife refuges, the remainder being allocated between forests and wild rivers. The proposal provides a subsistence priority including the definition of subsistence and a change in the traditional management roles of federal and state governments. Under the Carter Administration proposal, many of the state's traditional decisions would be delegated to the federal government with the state as the implementing agency once the policy decisions have been made.

The Administration bill proposes the designation of approximately 48 million acres of instant wilderness and provides that the remainder will be studied for wilderness potential. Except for two small minerals zones in the Wrangells-St. Elias National Park, the parks and refuges would be closed to mining although national preserve areas of parks and refuges would be open to sport hunting. The secretary's proposal addresses cooperative management by recommending the establishment of an advisory commission primarily made up of state and federal agency heads.

S. 499 In 1973, Secretary of the Interior Rogers C. B. Morton transmitted his recommendation for d–2 lands to the Congress. These recommendations, commonly known as the "Morton bill", proposed approximately 83 million acres to be added to the existing 4 systems, including 32 million acres of new national parks, 31 million acres of wildlife refuges, 19 million acres of national forests, and nearly 1 million acres of wild and scenic rivers. The "Morton bill" proposed that existing law would control most activities, including sport hunting, mineral exploration and development, and access. All d–2 lands would be placed in wilderness study for 3 years, and subsistence uses would be allowed up to the level in effect the date that the Alaska Native Claims Settlement Act was enacted.

H.R. 1652 and H.R. 2082 Congressman John Dingell of Michigan and Congressman Robert Leggett of California have each introduced legislation involving d–2 lands that would establish only wildlife refuges. The bills, entitled the Alaska Refuges Act and the National Wildlife Refuge System Organic Act, respectively, have been referred to the House Committee on Merchant Marine and Fisheries. The Alaska Refuges Act would place about 68 million acres in new refuges in Alaska. The National Wildlife Refuge System Organic Act would create approximately 86 million acres of refuges. For the most part, existing law would prevail on those refuges established by these bills, although sport hunting on refuges created by the Refuge System Organic Act would be allowed only by express provision of law or pursuant to regulation developed by the Secretary of the Interior.

The Federal-State Land Use Planning Commission for Alaska, an advisory body to Congress and the State of Alaska, was created by the Alaska Native Claims Settlement Act. The commission has transmitted a series of d–2 recommendations to Congress. These recommendations have not been introduced as legislation. The Commission proposal would create approximately 50 million acres of national parks, wildlife refuges, wild and scenic rivers, and forests in Alaska. An additional 40 million acres of land would be allocated to the Alaska National Land System which would be managed by designated federal agencies under the direction of the Alaska Land Classification Commission. The Commission would decide what lands would be available for specific uses and the agencies would manage the lands for those purposes.

Additionally, the Commission proposal provides for subsistence preference with management of fish and game species on a daily basis resting with the State of Alaska. All areas under the commission bill would be placed in a wilderness study category for a period of five to seven years.

## SOLAR ENERGY IN ALASKA

Mr. STEVENS. Madam President, the pages of the CONGRESSIONAL RECORD have reflected the accelerating interest in solar energy over the past couple of years, and especially in the past few months. Even in Alaska, which is far from the Sunbelt, attention is focusing on solar energy.

The March 12, 1978, issue of the Anchorage Times reported a study made by the University of Alaska into the economics of solar energy in Alaska. The study finds that solar water and space heating is now competitive with oil and electricity in some areas of the State. As fuel prices rise in the future, which is the only way they can go, solar energy will become competitive in other regions as well.

Often people in the south 48 States are surprised to learn that Alaska, with its vast oil and gas resources, is interested in solar energy. But petroleum products are as costly in Alaska as any place in the south 48. We are driven as much as anybody else to keep our energy bill down and to protect ourselves from higher energy prices in the future. Alaskans have been, by necessity, leaders in weatherization and insulation. Now we are looking to solar energy for the energy our homes and businesses need.

Madam President, I ask unanimous consent that the above-mentioned article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Anchorage Times, Mar. 12, 1978]

OUTLOOK FOR SOLAR ENERGY IS BRIGHT IN ALASKA

The northern latitudes receive more possible sunlight in a year than do the tropics—about 230 more hours of sunlight than at the equator.

A study of the economics of solar energy in Alaska by John Zarling of the University of Alaska shows that solar power in some cases is more economical than electricity or oil for heating water and homes.

Zarling's study says that a few citizens in the state have already begun building solar collectors, and others are designing or building solar homes and greenhouses.

Theoretically, a solar collector 1/500th the area of the United States, an area slightly smaller than Massachusetts, receives an amount of solar energy that, if converted at 20 percent efficiency, would provide all of this nation's present electrical requirements. However, technical and economic barriers stand in the way of immediate and widespread use of solar electricity.

Similarly, in total, the state of solar energy developments in Alaska is not significant to make any impact on energy use or public energy policy to date, a draft of Zarling's report said.

Technical barriers stem from two facts. First, the rays of the sun are spread diffusely over the surface of the earth so they must be collected from large areas to yield useful amounts of energy. Second, the rays are intermittent, which requires a means of storing the energy for use at night or on cloudy days.

The economic barriers involve the high initial costs of building solar energy facilities and developing a solar energy industry.

The federal Energy Research and Development Administration estimates that it may be the 1990s before solar electricity makes a substantial contribution to meeting the nation's energy needs.

Zarling's study shows that solar energy has potential in Alaska and he includes several analyses of various potential applications of solar energy including domestic water heating and active space heating systems.

The analysis was accomplished with the aid of computer simulations of solar energy systems using data available from five Alaska sites.

From his study, the following conclusions were made:

On Annette Island, one of the southernmost islands of the Alexander Archipelago in Southeast Alaska, solar energy is not currently competitive with low-cost, oil-fired hot water systems. Oil costs in the range of 43 to 52 cents per gallon are the rule in this area, however.

In Barrow where the highest electric cost of the study were found, solar energy was less expensive for heating water than electricity, however the North Slope Borough also has very inexpensive natural gas which could offset the advantage gained if solar energy were used.

In Bethel electricity costs are very high and oil is relatively inexpensive. Solar is not competitive with oil-fired hot water systems, but is quite competitive with electricity to heat water.

In Fairbanks electricity is fairly expensive, and oil is moderately priced. A solar hot water system is at the breakeven price with oil, and competitive with electrically heated hot water.

In the Matanuska area at the present cost of electricity, solar heating is competitive. In Anchorage, the economic situation is not yet favorable to solar energy systems, as electric rates are at about the breakeven point, the report said.

Don Markle and Patty Kirkwood, consultants to the Alaska Division of Energy and Power Development have been studying solar and geothermal energy for the past year.

"Solar in Alaska seems impractical because of the long dark winters," Ms. Kirkwood said. "But in the summer, solar energy can be useful for such things as heating water," she added.

"Hot water solar applications have practical applications all over the state," Markle said.

He explained that there are three types of solar energy: direct using such solar cells; active, using solar collectors; and passive, which can be as simple as how you orient your home in relation to the sun.

The state is also a member of the Solar Planning Office West which has received federal funds to promote commercialization of solar energy.

Clarissa Quinnlan, acting director of the Alaska Energy Office, said Friday that solar energy as well as other possible energy re-

sources provide us with an opportunity for the first time to survey what the potential applications are."

Ms. Quinnlan said Solar Planning Office West is planning to establish a permanent organization called Western Sun and that Alaska would most likely participate in activities with that group to help establish solar energy here.

"The state is involved in integrated planning, not an either or situation. We are looking at site specific evaluation for each area and what it has to offer. We like to think we are involved and know what is going on and avoid duplication of effort."

Mr. STEVENS. Madam President, I have no further requests for time on this side, and I yield back the remainder of my time.

## ORDER FOR RECOGNITION OF CERTAIN SENATORS ON THURSDAY, APRIL 27, 1978

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the four 15-minute speeches scheduled this morning for Messrs. JAVITS, PERCY, STAFFORD, and MATHIAS be vitiated and be transferred to the date of Thursday, April 27, 1978, immediately following the recognition of the two leaders or their designees under the standing order.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER FOR RECOGNITION OF SENATOR BARTLETT ON TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that on tomorrow, after the two leaders or their designees have been recognized under the standing order, Mr. BARTLETT be recognized for not to exceed 15 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that after Mr. MORGAN completes his statement this morning, I be recognized for 5 minutes under the time allotted previously to Mr. JAVITS.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from North Carolina is recognized for not to exceed 15 minutes.

## FARM POLICY: THE NEXT STEP

Mr. MORGAN. Madam President, there is no sector of our economy that is experiencing more hardship than agriculture. Unfortunately, action taken by the House of Representatives this past Wednesday indicates that the Congress has been unable to respond to the needs of our farmers in a reasonable and acceptable manner. The defeat by the House of the Emergency Agriculture Act of 1978 came as no surprise to me. As we know, demographic changes in recent years have made that body somewhat less oriented to the needs of agriculture.

The preceding does not mean that I think the President would have signed this bill into law if the House had passed it. The President, after all, has used unequivocal language in stating his opposition to this legislation. At this point, it seems as though our energy, in trying to pass out an acceptable farm bill, has been wasted. While this may seem to be the case now, only time will tell. This question will ultimately be answered by the ability of the Congress and the administration to work together to develop a farm package that can receive the necessary support at all steps in the legislative process.

At this juncture, I must indicate my disappointment at the inability of the Executive and the conferees to agree on improvements in the farm program. I do not want to point a finger. But clearly the results of the House vote on Wednesday might have been reversed if the Executive and the conferees had agreed upon a common program in early April.

In my time in this body I have yet to confront a body of public policy that is more complex than farm policy. We know that weather has more to do with the productivity of farmers than any other single factor. Weather, coupled with uncertainty in export markets, makes predicting the success of farming doubly difficult. And then, American agriculture is anything but monolithic. In fact, there is no sector of our economy more diverse than agriculture. To illustrate one only has to think of tobacco farmers in North Carolina, almond growers in California, wheat farmers in Kansas and sugar beet growers in Minnesota.

Indeed, it is easy to see why our agriculture policy is so complex.

The preceding merely sets a context for discussion. We remain with the general question of what, if anything, are we going to do to respond to the continued depressed situation that our farmers are experiencing. The Senate has discharged its conferees on the Emergency Farm Act, so we cannot go back to the conference room. This means that we must start anew, at the first stage of the legislative process. Fortunately, the Senate Committee on Agriculture, Nutrition, and Forestry has several weeks of hearings by which to establish a sound legislative history.

It is easy to understand why the Members of this body may not want to begin this process again. However, the defeat of the Emergency Farm Act by the House does not make the farm crisis go away. We must respond to this situation in an adequate and acceptable manner. If not, the political leaders of this country will have to pay a heavy price. The politics of this situation are very simple. The farm vote remains the crucial swing vote in several States in many regions of this country.

Much of the problem in our failure to pass the Emergency Farm Act lies in the lack of success of farm leaders to demonstrate the severity of the crisis. Apparently, many consumers believe that groceries do not originate on the farm. The public has yet to understand that food originates at a farm and that a dedicated individual, the farmer, has spent enormous sums of money and toiled long hours under very unpredictable conditions to produce the foodstuffs of this Nation and much of the world.

One of the cruel ironies in all of this is that agriculture, without Government support, will suffer because of its very productivity. Our farmers are the most productive in the world, by nearly a factor of two, yet they remain very much at the mercy of weather. If this small planet experiences favorable weather worldwide for a couple of years, then supply suddenly spurts past demand. Recent experience shows that it does not take much in the way of oversupply to send farm prices falling at a disastrous rate.

Our farmers have lived with boom and bust for decades, many economists have told me. These economists ask why Government must continue to act in support of farmers. Many economists suggest that a good share of our farmers are inefficient and that Government should get out of agriculture and let the inefficient be removed from the market place. I find this thinking unacceptable. First, the case for Government intervention has become stronger, not weaker, in recent years. This is largely because of the cost spiral that farmers have experienced and a lot also is due to other factors. Virtually every input in farming has escalated in price. The margins by which the Nation's farmers survive have become much more narrow. Further, it is becoming increasingly apparent that classical economies of scale do not necessarily apply to our system of agriculture. Indeed, many small farmers are more efficient than large farmers. Also, there is growing concern throughout this Nation over the control of land resources. In my opinion, we must, as a matter of sound public policy, not encourage the reduction of the number of farmers in this Nation. Indeed, the small family farm must be the centerpiece of our farm policy.

Since the December 14 strike deadline for 100 percent of parity, our Nation's farmers have taken their case to the public. As many as 60,000 farmers have visited Washington at one time. In every State capital, farmers have paraded on tractors and every rural county courthouse has been the location of farmer-led demonstrations.

Unfortunately, molding public opinion is a process that takes much time. While I believe that there is growing urban concern for our farmers, public opinion on this matter has yet to fully develop. I am encouraged by the mail I have received from many cities on this matter. There is growing concern by people of all income levels, in cities and suburbs, for our farmers.

I suppose much of my interest in our farmers has its roots in the fact that I, too, am a farmer. I have seen firsthand how the costs of farming have skyrocketed in recent years. For example,

the cost of a tractor in North Carolina has tripled in the past 6 years and the cost of fueling that tractor, since the Arab oil embargo, has quadrupled. The costs of other inputs—fertilizer, insecticide, taxes, insurance, and labor as well as others associated with farming—have risen dramatically.

Coupled with the sharply escalating cost of inputs is increased involvement by our Government under the guise of improving the welfare of the general public, rather than the farmer himself. For example, the Environmental Protection Agency (EPA) has promulgated regulations concerning the treatment and disposal of animal waste. Moreover, the Occupational Health and Safety Administration (OSHA) has become deeply involved in farm safety questions. These are only two examples. Many agencies at various levels of government have become involved in the past few years in agriculture. The result of these actions is that farmers have to spend more money and time to meet governmental edicts.

I am not trying to suggest that these actions are not needed. Everyone wants to reduce pollution and no one would argue that we should not be dedicated to the safety of farm workers. My point is that these actions by Government have been a part of the sharp increase in the cost of farming.

The total cost spiral has had a vicious impact on rural America. The results of this impact have altered the structure of our agriculture. In 1977, this Nation lost 26,000 farmers, according to the USDA. In the past three decades, nearly one-half of our farmers have left the farm. Perhaps more importantly, a majority of our farmers no longer make the major share of their income on the farm. Clearly, many farmers must take jobs in the city just to be able to stay on the farm.

Farming is no longer a young man's occupation. The average age of the American farmer is now 53. The reason for this is not that young people do not want to get into farming. Rather, it is because bankers do not believe farming to be a good investment unless one begins with sizable capital. It is reassuring to know that the Senate will soon take up legislation which will make farming more accessible to the young.

We cannot address the current farm depression through an improved credit program, as much as that is needed. While I believe we should make this effort, it is clear that the flexible parity concept cannot be implemented this crop year. As an alternative, I urge strengthening of target prices for feed grains and wheat, to bring these commodities more into line with the cost of production. Further, I believe that we should consider linking future target price increases to increases in the Consumer Price Index. This basic approach, coupled with legislation to address farm financing needs, should help speed the reversal of the farm depression.

I do not want to be misunderstood as to my position on farm economic policy. It is distressing to me to see Government payments to farmers. Rather, I would prefer to see our farmers receive adequate prices from the marketplace. However, when prices fall, Government must become involved. We need only to think back to the Great Depression to see this need.

Much of the future economic strength our farmers will have will be determined by their success in export markets. I am pleased to see that the Foreign Agricultural Policy Subcommittee will be holding hearings on agricultural exports later this month. I will testify at these hearings to outline my views on what I believe should be done in this important area. The simple fact that 1 out of every 3 acres in grain production is devoted for export should cause us to work hard on export policy.

Most troubling to me about the economies of food is the declining share of the food dollar that farmers receive. Recent U.S. Department of Agriculture statistics indicate that the farmer now receives only 37 cents of the food dollar. This figure stuck in my mind when opponents of the Emergency Farm Act argued their concern about the impact of flexible parity on inflation. I do not understand how this argument can be made when middlemen of various sorts are receiving 63 cents of the food dollar, with retailers alone receiving 26 cents. Processors receive 20 cents, transporters 6 cents, and wholesalers 11 cents. Recently, I read that a Washington-based food chain's profits had jumped 27 percent in just a short period of time. In fact, the profits of the food chains have increased while farm prices were falling.

The Democratic Party has traditionally been the party of the farmer. Virtually every progressive policy with which I am familiar had its origins in the Democratic Party. The crisis we face today has little to do with the current Secretary of Agriculture, Bob Bergland. The price depressing oversupply we have today is the direct consequence of Secretary Earl Butz' admonition to our farmers to plant fence row to fence row. One cannot blame this entire situation on Mr. Butz but I believe that history clearly shows his policy to have been defective.

Madam President, we are now at a crossroads in our farm policy. We simply cannot turn our backs on the farmers. We must not decrease our commitment because of our inability to enact the Emergency Farm Act. Our capacity to meet the needs of agriculture will be tested in the next few weeks and months. I urge my colleagues, both rural and urban, to join with the 18 members of the Senate Committee on Agriculture, Nutrition, and Forestry to forge a cooperative alliance with the administration to shape a responsive emergency farm program.

I thank the Chair.

## ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from West Virginia was to be recognized for 5 minutes.

Mr. STEVENS. Madam President, I suggest the absence of a quorum and that it not be charged to the Senator's time.

Mr. SCHMITT. If the Senator will withhold that, I will make a very brief statement.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is here.

Mr. STEVENS. I withold the request, Madam President.

The ACTING PRESIDENT pro tempore. The Senator from West Virginia is now on the floor and he has 5 minutes.

## THE PANAMA CANAL TREATIES

Mr. ROBERT C. BYRD. Madam President, our work is done on the historic Panama Canal treaties. Of course, there is implementing legislation yet to come. But today we go on to other important matters.

We know that the tide of history is as swift and as sure as the coming of tomorrow.

But I feel that there must be a postscript to a day in time that may have charted the course of our relations with other nations of the Western Hemisphere for many years.

When the first word was uttered on the first day of debate on these treaties, a slim 8 percent of our Nation's population was convinced they were in our best national interests.

There was a pervasive feeling that we would be surrendering on the battlefield of greatness if we were to approve the ratification of these treaties. Their approval—in the words of political soothsayers—was not meant to be. These were the treaties that were not supposed to be approved for ratification.

Today, through the aid of the Nation's media, and especially with the help of National Public Radio which broadcast the debate, there is a greater understanding of these treaties throughout our country.

May I say with particular compliments to National Public Radio, and to the persons who made possible the transmission to the American people, in such clarity, of what was being said, and who analyzed the debate in the evenings and capsuled it in the RECORD, they did a masterful job.

There is no question in my mind but that the broadcast by National Public Radio resulted in a prolongation of the debate. Now, I said in my news conference this morning to news reporters that National Public Radio prolonged the debate. That was an inaccuracy. Senators actually prolonged the debate, but I do think that the broadcast of the debate resulted in its being prolonged. But I believe that may have been good. I think that the benefits, certainly, outweigh the disadvantages.

As a result of this broadcast—and it was an historic one—the first in the Senate's history and I am proud of that fact, it was possible for the people of

the United States and the countries to the south and north of us to look in on the Senate, as it were, and to see the debate in their mind's eye, at least, and to formulate a clearer judgment based on the information they were receiving through National Public Radio.

Granted, as the debate went back and forth, it may have been confusing because there were rebuttals and surrebuttals, and all of that. But I think it was a great service to the Nation for the media to have done what I think was a very fair and splendid job in reporting the debate.

I say this for the print media as well as for the telecommunications and other media.

It is still possible that some Senators, Madam President, who voted for these treaties may have offered themselves as sacrifices on the altar of courage.

This is especially true of several Senators who face reelection in the months ahead. Their wisdom, I feel, will be their vindication. Their vision, I believe, will be justified by history.

Madam President, I commend those on the other side of this issue, too—especially PAUL LAXALT, who led treaty opponents in an admirable way and with the utmost of dignity. After all, they helped mold and shape the treaties, and their contributions were necessary.

But again, I commend those who supported the treaty. I do not think I have ever seen a more remarkable display and demonstration of teamwork than I saw from day to day from Mr. CHURCH and Mr. SARBANES, who handled the issue with what I thought was as fine a grasp of every issue as I have ever seen any Senator demonstrate on the floor.

They met every issue head on. They were here, one or the other, or both practically all the time. They demonstrated a knowledge, so thorough, that I as one Senator was simply amazed.

I also thank those Senators who helped Senator SARBANES and Senator CHURCH, in handling floor debate, for example, Senator HOLLINGS, Senator LEAHY, Senator MOYNIHAN, Senator BAYH, Senator GRAVEL, Senator MATSUNAGA, Senator MUSKIE, Senator JAVITS, Senator CRANSTON, and others who were here, always ready, always knowledgeable and effective. It was a remarkable demonstration of organized effort and teamwork.

Once more I have to salute those Senators who demonstrated courage in the face of the greatest pressures I have seen brought to bear on the Senate in a long time. This said something good about the Senate of the United States. It was a treaty that was not supposed to be approved. Yet, two-thirds plus one stood up under this kind of pressure; and among that two-thirds plus one, I believe, were 16 Senators, on both sides of the aisle, who have to run for reelection this year. That was a demonstration of intellectual integrity and courage that I think should give the people of this country great confidence and faith in this institution.

Madam President, I cannot be too laudatory nor too generous in my praise for the courageous role played in this effort by my dear friend—my counterpart across the aisle—the distinguished minority leader, HOWARD BAKER.

He worked tirelessly with us in the long, long days during which we considered the treaties.

Always courteous, always affable, always cooperative and accommodating, his assistance was simply indispensable to our labors. I commend him, and I thank him for his understanding and for his help and for his strength in never flinching from his duty.

Finally, Madam President, there will be those who will second guess. Perhaps they read or heard this morning that General Torrijos was poised to shut down the canal if the vote had been in the negative.

While I do not agree with the prudence of his comments, I understand his feelings, and I understand the feelings of the Panamanians. Our great history—from the Revolutionary War until today—has had one central theme: We as a people must hold the reins of our own destiny.

I commend the Panamanians. They have exercised restraint through these debates. We know that for 75 years Panama—through many leaders with varying political leanings—has been faithful to a treaty that runs contrary to that country's interests.

So today, Madam President, as we close this chapter in the saga of two nations, I believe we have opened the door to unexplored frontiers of cooperation not only with Panama but also with the other Latin American nations to the south of us. In doing so, we have enhanced our image and our strength throughout the world, and we have shown that the United States is not afraid to stand by the principles it espouses.

We approved these treaties from a position of strength, not weakness, and this is the way history will record it.

## AIR TRANSPORTATION REGULATORY REFORM ACT OF 1978

The PRESIDING OFFICER (Mr. ANDERSON). Under the previous order, the Senate will now proceed to the consideration of S. 2493, which will be stated by title.

The legislative clerk read as follows:

A bill (S. 2493) to amend the Federal Aviation Act of 1958, as amended, to encourage, develop, and attain an air transportation system which relies on competitive market forces to determine the quality, variety, and price of air services, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. Time on this bill is limited to 4 hours, equally divided between and controlled by the Senator from Nevada (Mr. CANNON) and the Senator from Kansas (Mr. PEARSON), with 1 hour on any amendment, except one amendment by Senator SCHMITT and one amendment by Senator ZORINSKY, on each of which there shall be 2 hours, and 20 minutes on any debatable motion, appeal, or point of order.

Mr. CANNON. I yield myself such time as I may require.

Mr. President, I ask unanimous consent that the following staff members of the Committee on Commerce, Science, and Transportation have privileges of the floor throughout consideration of S. 2493, the Air Transportation Regulatory Reform Act of 1978: Aubrey Sarvis, Ed Hall, Chip Barclay, Frank Krebs, Maureen Sheppard, Will Ris, Sara Ross, Malcolm Sterrett, and Doug Buttrey.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, I bring to the Senate today one of the most significant pieces of legislation in the past several decades. Important not so much by itself, but because it represents one of the only opportunities this body has had in recent years to vote for less Government regulation and more free enterprise for a major U.S. industry. Too often in the Senate we are faced only with the choice of one new type of regulation or another. In the complex society in which we live, it is perhaps inevitable that important problems seek government solutions. Nevertheless, I for one, am sincerely tired of adding regulation and Government control to our peoples' lives, and I welcome this real and substantial opportunity to eliminate regulation where there is clear evidence that it has not served the regulated industry nor the consumers. This legislation is also important, as President Carter said twice in his address to the country last week, because it will have an anti-inflationary effect.

The Air Transportation Regulatory Reform Act of 1978 was developed through a slow and thoughtful debate in the Committee on Commerce, Science, and Transportation. The committee met more than 20 times to mark up a bill before voting 13 to 3 to send this legislation to the Senate. And, I think we learned something about ourselves during that debate. We learned that it is not as easy to support "free enterprise" and "less regulation" as a lot of us make it sound in our general speeches. When powerful corporations fear leaving their protective cocoon, a cocoon which has guaranteed survival, but discouraged profit, it is surprising to me that these companies are able to change the basic philosophy of some of my most respected colleagues.

I ask Senators to reflect on the arguments they will hear during this debate. Virtually all the arguments against airline reform, and automatic market entry in particular, are identical to the classic arguments of academicians who oppose a free enterprise economy—uneven allocation of resources, concentration of economic power, inefficiency, unfair advantage of those with greater resources, all are arguments we find anathema in the absolute. But I can assure Senators

that these same arguments with technical trimmings will be heard on the floor of the U.S. Senate regarding this bill.

If Senators believe that a free enterprise marketplace is an efficient allocater of resources, in plain English if they think it works, it is totally inconsistent to accept our opponents' arguments.

Opposition to this bill cannot be justified by claiming that there is something inherent in the structure of the airline industry which requires strict regulation. Such arguments are nonsense. The airline industry clearly does not have the characteristics of public utilities which must be regulated because their sheer size prohibits any competition. Indeed, it is difficult to imagine an industry whose main capital assets—airplanes—are as mobile. What industry could be better suited for adapting to the marketplace?

Make no mistake: Communities are not receiving air service today because of any regulatory system or by the philanthropic nature of airline management. Communities receive service because of two reasons, either there is a market to be served at a profit, which is true for four-fifths of today's air carrier cities, or they are served because a Government subsidy is provided. The latter group of small communities are protected by this bill, and the former group will benefit from the innovations and efficiency of competition.

Indeed, the only area of the airline business which requires substantial Government intervention is service to the Nation's very smallest communities where there are not enough passengers for profitable operations. I think we can all agree that air service to small isolated communities is of substantial enough public benefit to justify continued direct Government support.

But the current system of subsidizing small community airline service is irrational. We pay 12 carriers over $70 million a year, without the slightest regard to the quality of service being provided. And virtually no elected representative can be unaware of how dissatisfied many small communities are with this service.

All of that will be changed under this bill. For the first time, the CAB will be required to leave Washington, actually go out to the small communities throughout the country, and sit down with local and State representatives to determine their essential air transportation needs. Then the CAB will have the duty to see that these needs are met.

Let there be no doubt—there is an absolute guarantee of service to all communities now receiving it for at least 10 years. After that the CAB has an affirmative duty to see that small communities throughout the country are well served. In contrast to the dismal record of the past 15 years when over 175 communities have lost service, no community will lose air service as a result of this bill. Furthermore, the CAB is required to review the air transportation needs of every town that has lost service in the past 10 years to see if service should again be introduced.

Who supports S. 2493? Do consumer and civil groups support this bill? Yes, the Aviation Consumer Action Project, the National Taxpayers Union, the American Association of Retired Persons, Common Cause, the Americans for Democratic Action, and the American Conservative Union, to name a few. Do government groups support S. 2493? Yes, the Carter administration, the Ford administration, the Civil Aeronautics Board, the National Governors Association, the National Association of State Aviation Officials, the Airport Operators Council International, and the National Association of Counties. Does business support S. 2493? Yes, the National Association of Manufacturers, the National Retail Merchants Association, the National Industrial Traffic League, Sears, Roebuck & Co., and the American Retail Federation. Do any airlines or airline unions support this bill? Yes, Hughes Air West, Frontier, United, Pan Am, Alaska Airlines, PSA, Southwest, Federal Express, Flying Tiger, and the charter and commuter airlines. The pilots, flight attendants, and airline employees unions of Hughes Air West and the Pilots of United support S. 2493.

This legislation is supported by a diverse coalition of liberal and conservative, business and consumer, aviation and government groups.

Who opposes this bill? A few of the certified airlines, the number of which has steadily grown smaller, and some airline unions who have been told by the airline managements opposing the bill that it will jeopardize their jobs. In other words, some members of the closed club who want no new, different members in their midst because it might change business as usual.

One might ask, will reform really be of benefit, or is it one of those issues which carries many promises but few results? You need only look at the past year where simply talk about new entry and activist CAB resulted in a variety of fare discounts. These fare discounts combined with a good year, generally, and produced a record year in profits and passengers for many airlines. Other empirical evidence of reform's value is apparent in Texas where a carrier outside CAB control, Southwest Airlines, has doubled the passengers in a number of markets, both large and small. Southwest's success in offering low fares which have created very high-load factors and equally high profits is also evidence that less Government regulation does benefit consumers and airlines.

However, under today's law, such benefits are only available in a handful of new markets, after years of legal wrangling, and if there is a CAB disposed toward competition rather than protectionism.

Has the regulatory system worked to the advantage of today's certificated airlines? Not hardly. The airline industry has the worst debt-equity ratio of any major U.S. industry.

I submit to you that the evidence is clear. Regulatory reform will provide real and substantial benefits to both consumers and the airline industry.

Do we really need new legislation? I think CAB Chairman Kahn said it best in his testimony before the House Public Works Committee. I quote:

> You have seen in recent years an abrupt change in the philosophies of those appointed to administer the regulation of this industry. We are, I am proud to say, making important changes. But if a board can do a 180 degree about face in two years, its successor can go another 180 degrees—and 180 plus 180 is 360. Only Congress can say which of these it prefers, and make sure this whirling dervish ends up facing in the direction you want it to face.

I ask my colleagues to listen carefully to the debate on this bill. Listen to the arguments about why airline competition would be suicidal, destructive, inefficient, and harmful to communities and consumers. Then ask yourself why does competition work in supermarkets, soap suds, drugstores, and 95 percent of our industries without the major distortions our opponents predict for the airline industry.

I ask my colleagues to support S. 2493, because it will serve the American consumer, the airline industry, and our image as legislators who do more than recite political rhetoric about less regulation and more free enterprise.

Mr. President, I shall review briefly a summary of the provisions of the bill.

Section 401 of the committee print establishes new guidelines for the CAB award of route authority. The new tests put an emphasis on greater competition in the airline industry. This section meets an important need of the communities by placing a new emphasis on dormant authority awards and, most important in the move to less regulation, this section establishes a moderate graduated automatic entry proposal which allows air carrier management to select one and later two new routes a year without Government interference.

Further safeguarding the impact of the automatic entry are the built-in protections for air carriers and the emergency authority of the CAB to change the program if it is disrupting the system or service to any region.

Under sections 401 and 419, exit is permitted after notice of 90 days, unless the carrier is the last one serving the community in which case, extensions are required if no replacement carrier has been found.

Sections 408, 409, 412, and 414 clearly define the CAB antitrust immunity powers and puts an emphasis on the Board's approval of those mergers and agreements which are not anticompetitive.

Section 420 establishes a new class of certificated air carriers for the purpose of serving small communities.

Section 419 creates a new subsidy system based upon the needs of the communities while phasing out over 7 years the 406 subsidy systems that is based upon the needs of the air carriers.

All communities currently listed on air carrier certificates are guaranteed service for 10 years and new communities are to be considered for subsidy eligibility.

Most importantly, these sections put a new emphasis on the CAB consulting and working with community and State representatives.

Section 1002 establishes a no-suspend zone 35 percent down from the base fare level. On the upward side, fares may go up 5 percent in markets which are competitive but no upward flexibility is provided in monopoly markets. The base fare level is adjusted semiannually to account for inflation or deflation in the airline industry. All fares which are predatory or discriminatory may still be found unlawful by the board after a hearing.

Section 1010 assures all parties who file an application at the Board that they will receive an answer within 10 months. This section places an emphasis on streamline procedures where appropriate. Such a requirement of timely action by the Board is a key feature which relates to all other sections of the proposed bill.

Other sections of the bill include the declaration of policy, safety policy, exemption authority, Federal preemption, aircraft loan guarantees, and labor protection.

Mr. President, at this time I ask unanimous consent that a more detailed summary of the provisions of the bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

MAIN PROVISIONS OF S. 2493

POLICY DECLARATION AND GUIDELINES FOR PUBLIC CONVENIENCE AND NECESSITY

Strong reliance on competition, new entry, low-cost and innovative service. Explicit protection for small community air service. Maintenance of safety in air commerce and of existing carriers to earn a fair and reasonable return on investment. Avoidance of undue industry concentration and unfair, predatory or anticompetitive practices.

TRANSITION PERIOD

Provides different time periods to ease the transition to less regulation—5 years for carriers, 10 years for employees who may be affected by their carriers adjustments to the new system, 10 year guarantee of essential service to small communities, and new subsidy system to replace current subsidy program over 7 years.

401 ENTRY

Less restrictive requirement for 401 certification—instead of applicant proving entry is required by public convenience and necessity, they need only show the service is consistent with PC&N.

AUTOMATIC MARKET ENTRY

Allows existing carriers to automatically serve 1 new market a year for the first 2 years and 2 routes a year thereafter. For the first 3 years all carriers can protect 3 of their routes from automatic entry, in the 4th year 2 routes may be protected and in the 5th year 1 route. Large carriers will have no limit on the total number of unprotected routes on their system that may be entered by other carriers. Small trunks may only have 3 unprotected routes on their system entered during the first year, four in the second year and no limit thereafter. Local service carriers may have only 2 unprotected routes on their system entered for the first 3 years and no limit thereafter. CAB must report to Congress annually on the progress of the automatic entry program and in the fourth year make recommendations on if and how the program should be adjusted. CAB would also have emergency powers subject to congressional veto to change the program if it causes serious dislocations to the system or any region of the country.

DORMANT (UNUSED) AUTHORITY

Any 401 carrier may file an application for nonstop scheduled air transportation between 2 points listed on another carrier's certificate and being served by no more than one carrier. The CAB must make the award if the incumbent has left his authority dormant for a specified period and if the award is consistent with the PC&N. CAB has discretion to terminate dormant authority of incumbent. CAB is directed to give priority to these applications and decide them within 90 days of filing.

EXIT

Carriers may terminate service to a point within 90 days. If the carrier is the last one serving that community then the CAB may require the carrier to continue service for another 90 days while a replacement is secured. If a carrier has not been secured at the end of 180 days, the CAB shall require the incumbent to continue service for 30 day renewable intervals until another subsidy eligible replacement is secured.

LOCAL AIR CARRIERS

Bill establishes a new local air carrier certificate related to aircraft size (36 seats, 40,000 lbs.) Certificate provides benefits of interlining, joint fares and loan guarantees. New certificate intended to draw into federal system today's commuters and make them eligible to receive subsidy.

SUBSIDY

Bill creates new subsidy program replacing over 7 years the existing program which bases subsidy on the carrier system needs. New subsidy section determines subsidy based on community needs. In setting subsidy CAB must specifically consider development of an "integrated, linear" system to best meet community needs.

GUARANTEE OF ESSENTIAL AIR SERVICE

All communities currently listed on a carrier's certificate are guaranteed essential air service for 10 years. After one year the CAB may add new points as eligible for federal subsidy. Essential air service is defined as a minimum of 2 daily roundtrips five days per week.

REMOVAL OF RESTRICTIONS

Beginning on January 1, 1979 and thereafter, the CAB is prohibited from including a closed-door restriction on any certificate issued and any closed-door restriction in existence at that time becomes void, with some minor exceptions.

EXPEDITED PROCEDURES

CAB required to complete applications for new service within 10 months. CAB is directed to streamline its hearing process, to limit hearings to questions of material fact, and to use show cause procedures in lieu of unnecessary formal hearings.

REQUIREMENT TO PROVIDE SERVICE PROMISED

CAB to review the performance of new certificate holders providing innovative or low-cost transportation and may modify or revoke the certificate on the grounds that such service is not being provided.

FARES

Establishes a zone within which carriers may freely raise or lower fares without CAB approval. Fares may be increased 5% on competitive routes and decreased 35% from the semi-annually Board adjusted standard industry fare level. No upward flexibility is provided for monopoly markets.

LABOR PROTECTION

Provides a program of financial assistance (not to exceed 36 monthly payments) to protected employees (those with 4 or more years in the industry) who lose their jobs, are forced to relocate or who suffer a reduction in wages brought about by a bankruptcy or major contraction of their air carrier employer. CAB must find the bankruptcy or contraction was caused in major part by a change in the regulatory structure brought about by the act. A 15% reduction in a carrier's total number of full-time employees occurring within a 12 month period constitutes a major contraction. The program is of limited duration, covering only those bankruptcies or contractions occurring within 10 years of enactment.

LOAN GUARANTY

Renews the current loan guaranty program for five years extending it to include the guarantee of loans to the new class of local air carriers and raising the present $30 million (which is presently obligated) on loan guaranties to $100 million.

While the bill effects no safety regulations

SAFETY STUDY

or their implementation, to insure a high level of safety during the transition to less regulation, the Secretary of Transportation is directed to conduct continuous review of effects of the act on operations and to report to Congress annually for the first five years.

ANTITRUST IMMUNITY

Changes are made to tighten the CAB's authority to confer antitrust immunity and approve anticompetitive agreements and mergers.

Mr. CANNON. Mr. President, I reserve the remainder of my time.

Mr. PEARSON. Mr. President, I yield myself such time as I may require.

Mr. President, although this legislation is a matter of high priority of this administration and referred to as recently as the President's address dealing with inflation in this country a few days ago, today marks the culmination of more than 2 years that we have sought to form and perfect, as best we could in the legislative process, an airline rewriting or deregulation in a phased manner, and the bill that is presented here today represents that effort.

Mr. President, I particularly pay tribute to my distinguished colleague, Senator CANNON of Nevada, the chairman of our committee for his patience and perseverance through these 2 years and the leadership he has exhibited in being one of the chief architects of bringing this measure to the floor of the Senate.

Mr. President, I had some reservations on this total subject as it has been worked upon in the last 2 years, and that reservation did not relate to the problems of many of the great huge certified air carriers, but related more to the problems of local air service in those rural parts of our country where rail passenger transportation no longer exists, where bus service is inadequate, and where in many instances the commuter service or local air service is really one of the last means of people achieving a sense of communication and doing

their commerce and business as is necessary.

Mr. President, that concept was incorporated in a piece of legislation numbered S. 292 that I introduced, I think, 2 years ago, and which, in large part, has been meshed into and included in this particular piece of legislation. I think it adequately fills the need of the local air carriers in a new and abbreviated certified manner with a new subsidy program.

That subsidy program, Mr. President, illustrates and exhibits one of the principal hallmarks of this particular legislation. It is a phased deregulation. It is not total deregulation. It is an attempt either through entry or exit or the pricing mechanism or the subsidy to have a phased staged change of direction so that our aviation laws and the guidelines of the CAB will direct us toward a greater degree of competition and away from that barrier of protection which we have existed under for so long.

So, Mr. President, I think this is a measure which has been considered as thoroughly as any I have worked on in now several years of my experience here in the U.S. Senate, and I am very hopeful that it will receive the approval of the Senate, and that the House will go forward and we can seek to change the direction of regulation in this particular industry and, indeed, let it be some sort of a guidepost for other deregulation measure that surely shall come along the road.

Mr. President, today marks the culmination of more than 2 years of work by the Committee on Commerce, Science, and Transportation in preparation for consideration of this legislation by the full Senate. At the outset, I want to commend my distinguished colleague from Nevada for his patience and perseverance during the committee's consideration of this important legislation. I cannot recall any bill that has received closer and more extended consideration by the full committee. While passage of this legislation is a priority matter with the present administration, I would like to point out that the effort to achieve reform of the economic regulation of commercial air transportation began with the Ford administration.

When we first started down this road, I had some serious reservations about the idea of removing the economic regulatory controls over commercial air transportation. My concern was not for the "Big Apples" of this world. Rather, my concern was for the small and isolated communities across the country. Communities that depend upon subsidized air service for economic growth and stability. But I now believe that the bill adequately protects such communities.

I still have some trepidation about total deregulation of entry and pricing. But it must be emphasized that this legislation does not mandate total deregulation. In fact, the bill perhaps falls too short in removing regulatory controls over pricing and entry. At least one airline president agrees with that position. In a recent address, the president of American Airlines, one of the five largest carriers in the free world, stated that he preferred total and immediate deregulation rather than the legislation now pending in the Congress.

Indeed, this legislation is a mild dose of reregulation. At best, it only begins to chip away at the archaic but well entrenched foundation of regulation. There are those who continue to argue that total deregulation is the answer. Conversely, there are those who prefer the status quo. It appears that the most prudent approach lies somewhere between these two extremes. What is needed is balance, gradualism and transition. I believe this legislation is as close to the mark as we can come to achieving that goal.

This bill is not the end all and be all. But it is a beginning. The roots of economic regulation of the airline industry run deep and its tentacle-like branches have been allowed to grow until they have begun to choke the industry. Airlines today are unable to make the two most basic of business decisions—which market will be served and what price will be charged. Perhaps these regulatory controls should have been pruned years ago. Maybe we have neglected this entire area too long. In any event, we have in this bill an opportunity to begin putting basic business decisionmaking back into corporate board rooms and removing that process from the cloistered ivory towers of Federal bureaucracies.

The goal of regulation should not be to replace corporate management with civil servants. Rather, it should protect consumer interests and guard against predation.

Those who prefer the current law to any statutory change point to the most recent decisions of the Civil Aeronautics Board allowing somewhat more entry and pricing flexibility and argue that existing law seems to function quite well these days. Indeed, the CAB, under the leadership of its present Chairman, has formulated some rather innovative measures which, I might add, have not all been fully tested either in the marketplace or in the courts. The question remains: What happens when the leadership changes? Upon taking the helm, different captains often chart different courses and may have significantly divergent views about their ultimate destination. The fact is, the CAB has until the recent past been extremely protective and has rigidly controlled entry and pricing. I for one would not want the CAB to revert to such overly restrictive regulatory policies, and I believe the best way to preclude such an eventuality is to pass the legislation before the Senate today.

Mr. President, one of my major interests through the years in the Senate has been the development of progressive air transportation policy, primarily with respect to small community service. Early in the consideration of this legislation, I proposed a small community air service program that would guarantee that small and medium-sized communities would not suffer irreparable harm as a result of this legislation. An integral part of that proposal is the development of a new subsidy program and a 10-year service guarantee. Central to the plan is a policy statement that provides—for the first time—statutory authority for making Federal assistance available to assure the continuation of small community service where appropriate. The adoption of this proposal was essential to the committee's reporting this bill to the full Senate and I urge my colleagues to oppose any attempts to maintain the current subsidy system beyond the 7-year transition period provided in the bill.

By far, the most controversial provision of this legislation is the one providing a voluntary automatic entry program. Without going into great detail, the program allows carrier managements to decide on a controlled and limited basis what new market or markets that carrier should enter in any given year. Such entry would occur, should a carrier elect to exercise such right, without CAB approval. The businessman then would be making the decision rather than the regulators. I want to emphasize that this program is a very moderate approach, and with the protective features in the program, provide adequate protection against increased industry concentration.

I am aware that some of my colleagues on both sides of the aisle oppose the inclusion of such a provision in this legislation. For years, I have listened to business people and my colleagues in the Senate complain about the interference of Government in industry. Now we have an opportunity to begin to reduce some of that burdensome interference. There are those who say that the CAB should promulgate an automatic entry program by regulation. To that, the CAB Chairman has stated that he would prefer that the Congress provide explicit statutory provisions for the CAB to administer rather than leave the development of the program to the CAB. The automatic entry program in this legislation is a reasonable approach and I urge my colleagues to support it.

Throughout this process, airline labor has almost unanimously opposed the passage of this legislation. They contend that the bill will result in contractions among certain carriers and therefore result in fewer jobs. We have also heard the scenario that reduced economic viability will have a serious effect on airline safety. I find little merit in either argument. Increased traffic generation through more moderate fares and access to new markets will enhance employment opportunities. Likewise, it is inconceivable that an airline would operate with equipment that is not totally functional or crews that are not properly trained. The Nation's airline employees are among the most highly trained and well paid of any group of employees in the American labor force. In my judgment, there is nothing in this legislation that in any way threatens their relative position in the marketplace.

During committee markup of this bill, certain committee members expressed concern about the possible impact of this legislation on individual employees. In an attempt to address that concern the committee adopted an elaborate labor protective provision. In so doing, I believe the committee overreacted. In committee

I favored a much more moderate approach proposed by Senator ZORINSKY and which is incorporated in printed amendment No. 1707. The Zorinsky amendment would remove any possibility that Federal assistance be made available to airline employees which are among the most highly skilled and marketable members of the labor force. Although the more moderate approach did not prevail, I still support it and would encourage my colleagues to support the Zorinsky approach.

Should the merger of a failing carrier become necessary, there is ample precedent at the CAB for the imposition of extensive labor protective provisions in such cases including such benefits as moving expenses, seniority list integration and mandatory binding arbitration. In short, existing practice and procedure adequately protects the airline labor force and the traveling public in cases where a particular carrier fails.

Mr. President, this legislation is very important. It has received the attention and debate it deserves and the time has come for the Senate to work its will in the public interest. I am confident that after careful consideration, my colleagues will join with those who support this legislation and take that critical first step toward the reform of economic regulation of American business.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. PEARSON. Mr. President, I shall be glad to yield to the Senator for such time as he may desire.

Mr. SCHMITT. I thank the distinguished Senator from Kansas. I realize and commend his longstanding interest and leadership on the issue of deregulation, and airline deregulation, in particular. I certainly want to acknowledge the yeoman effort that Senator CANNON and the staff, both minority and majority, of the Commerce Committee have done in bringing this bill through some difficult air, some stormy air.

I believe we had 19 markup sessions. I believe that was a record for the Commerce Committee. But I do believe that the product that has emerged is one which deserves the support of the entire Senate and of the Congress and of the country.

We would also be remiss if we did not remind our colleagues that it was through the efforts of the Senator from Massachusetts (Mr. KENNEDY) that a great deal of the momentum was built up for the measure we are discussing today. I am not sure he would recognize fully what we have created out of the early efforts, but I do believe the interests of all Americans are served by S. 2493.

Mr. President, this week of April 1978 may long be remembered for far more important action in this country's future than even yesterday's historic Senate vote on the Panama Canal Treaty. This week might well be recalled, as history progresses, as the week in which the Senate of the United States took the first significant step toward relieving the American consumer and American business from what is now perceived as an oppressive regulatory burden which has been imposed upon it by Congress during the last half century.

If we are successful in our efforts, future generations may view our accomplishment as the turning point in our economic and political development in our third century of national existence.

No one realizes more than I that the path we have been asked to follow has potential pitfalls. We do run a risk of damaging our great airline industry and the people whom it serves, but we run that type of risk any time we act to change the regulatory conditions under which business and the public have operated. Only now the risk comes about because we are trying to reduce those regulations, we are trying to restore a degree of free enterprise, a large degree of free enterprise, gradually into a major portion of this Nation's transportation system.

It is, in my opinion, a small risk and a risk well worth taking. We can minimize, if not eliminate, that risk if we realize that it will remain the duty of Congress to oversee, to review, and, if necessary, to act to change the law or the actions of the executive branch under this law.

I might, Mr. President, draw an analogy to my past experience as a scientist.

Scientists with experience in testing the capability of natural systems to adapt to new environmental conditions generally follow a relatively simple procedure. They insure that the natural system is in a steady state of activity that is well understood and then expose that system to new conditions long enough for the system to adapt and long enough for a new steady state of activity to come into existence. Then, the new state is analyzed and further, more severe exposure to new conditions is planned based on the response of the system to the first change. If any change is too great, the natural system may be damaged or go into unstable oscillation as it tries to adapt.

This procedure would appear to be analogous to that we should follow as we attempt to deregulate the very complex natural system called the regulated airline industry. I believe the present regulated "steady state" condition of the airline "system" is well understood. The exposure to new conditions of less regulation should be of sufficient magnitude to have a measurable effect but not so great as to hurt the system. The length of exposure to the new conditions should be long enough for the units of industry, Government, and consumers to adapt and reach a new steady state. If the parameters of exposure to competition are chosen carefully, the second exposure can probably be as complete as desired.

Mr. President, my position on this issue of airline deregulation has not been reached quickly or without great deliberation. I participated in, I believe, all or almost all of the markup sessions, and during those numerous executive sessions of the Commerce Committee this Senator made every effort to fully examine all the issues and debate all the issues that were before us. The compromises that have been reached I think are well worth defending, not to say that some might not be improved.

In an effort to learn more about the manner in which this bill would impact on the industry, on the consumer, and on local governments, in August of 1977 I wrote a large number of letters to industry, Federal, State, and local officials, and employee organizations.

Then, as now, the dominant issue in the debate was that of automatic market entry. Automatic entry is the most critical new condition that will be faced by the airlines system if the changes in air transportation regulations now being considered by the Senate are enacted into law. Many other conditions will interact with automatic entry; however, it is clear that this concept, at least philosophically, will set the stage for the airline industry of the future. In order to examine the effect of automatic entry on the airlines system, limited automatic entry is provided for in the bill for the first few years.

Based in large measure upon the input I received, and also upon my personal philosophy of what Government should and should not do, I attempted to modify the automatic market entry provisions contained in what was then the committee print. My efforts met with limited success. Instead of the original automatic market entry rate of two per year for 5 years I suggested one per year for 5 years. The provision in the bill before us today calls for one per year for the first 2 years and two per year from that point on.

In my additional views contained in the committee report which accompanied this bill. I went to great lengths to point out my concerns with the automatic market entry provision. I still have those concerns, in part because after the report was published I again wrote to those who had received my letter of August 1977, to again solict their views. Again, great concern was raised about the concept of automatic market entry. Now, I want to make it clear that this Senator supports automatic market entry as a concept, although I still believe a lower and more prudent rate of entry would be wiser. This is particularly true when viewed in the context of the equally important provisions providing for essentially unrestricted entry into routes with dormant authority. However, automatic market entry is an extremely important part of this bill, for it allows the managers of our airline industry to exercise certain business judgments increasingly free from Government regulation. Further, it must be remembered that each year the CAB must submit a report to Congress on how automatic market entry is working, and what its effect has been on the industry and on the consumer. In 1983 a detailed CAB report to Congress on automatic market entry is due, directed particularly to the authorizing committees of that Congress, which will evaluate the progress of the program. The importance of this review, Mr. President, cannot be underestimated, because, as I have indicated, none of us can, unfortunately, predict what the effect of what we do here in the next few days will be. However, I do believe

that we will find it generally favorable, but that certain modifications may be required as we continue these reviews.

One might have expected the leaders of the airline industry to jump at the opportunity to exercise their independent business judgment on behalf of their respective airlines. But for the most part they have not chosen to do so. This is perhaps understandable for they are conditioned to doing business within a regulatory framework and somewhat predictable although economically difficult circumstances have arisen from the conditions so imposed. Their judgment ought not be hastily condemned, for they have grave obligations to their companies, stockholders, employees, banks, thus their caution is understandable. But, Mr. President, we in the U.S. Senate must of necessity march to the sound of a different drum—the drum that is now beaten by our constituents, a drum that asks for less expensive, more efficient Government, and less regulation of their daily lives. We must take into account the increasing demand and clear need for regulatory reform where regulation may be necessary, for it is regulations and paperwork that, in a large measure, are strangling the free enterprise system that has made this country great. We must move to heed the cries for relief from the American consumer and American business—relief from unreasonable Government interference. This bill will start us on the path toward providing relief for business and at the same time lowering the cost to the consumer and taxpayer.

My primary concern during the entire consideration of the bill has been what would happen to the small communities of our country. I am pleased to state that under the provisions of this bill, small communities will be treated most fairly. A State like New Mexico, which I represent, and similar States throughout the rural portions of the United States, both continental and otherwise, have as a major factor in their future growth and development the need for readily accessible airline service—particularly airline service between small communities and the central hubs of activity. For the first time, small communities will have a guarantee of air service under this measure. Given the fact that since 1960 about 180 communities have lost certified air service, the legislation before us is at the very least a major step forward.

These are the provisions the bill contains to insure adequate and increasingly available service to small communities:

First. The policy declaration specifies protection of air service to our small communities with assistance where appropriate. This ought to insure the necessary level of subsidy to guarantee air service by carriers serving small communities.

Second. It provides a guarantee of air service to communities now eligible for subsidized air service for 10 years. This means 10 years of essential air service will be provided, with that essential service guaranteed without interruption. Essential air service is defined as a minimum of two round trips per day, 5 days a week, to at least one principal community of interest. Present law contains no such guarantees.

Third. If an airline presently providing service to a small community wanted to withdraw, the bill requires the CAB first has to find a replacement airline. Thus no subsidized city would experience a loss in air service during the 10-year period. It is my belief that well before the end of this 10-year period, commuter type air service to small communities will have mushroomed in the rural States and rural sections of this country.

Fourth. The bill creates a new class of federally certified air carrier to be known as local air carriers. They will provide air service to cities which require subsidy—at least subsidy until the system becomes economical, which I think will be very rapidly, Mr. President. This new designation of local air carriers should encourage the development of more frequent and higher quality local commuter type air service.

Fifth. Such local air carriers, under this bill, will now be able to operate aircraft of up to 36 seats and with a gross takeoff weight not to exceed 40,000 pounds, and with less regulation than other certified carriers—an extremely important regulation, not only for the development of service but for the development of a safer, higher quality commuter aircraft.

Again let me point out, Mr. President, that even at the termination of the 10-year period, the CAB has the specific mandate to maintain "a comprehensive and convenient system of continuous scheduled airline service for small communities and for isolated areas with direct Federal assistance where appropriate."

With regard to this most important issue of air service to small communities, I have not been content with my own opinion. Thus, I wrote to those who should be in the best position to advise me and the Senate on this issue, the local officials who have to deal with the problems of transportation in their communities. This is what they have to say:

First. In a letter dated March 15, 1978, from Bob White, director of the Department of Aviation, State of New Mexico:

All things considered, we support this bill. It appears to be far preferable to anything we have seen from the House. And, it is certainly more sensitive to the needs of the average New Mexico airline market.

Second. In a letter dated February 23, 1978, John Nammack, executive vice president of the National Association of State Aviation Officials:

We are particularly pleased with the small community provisions which, in our view, provide for greater assurances of decent air service than has ever before been obtained.

Mr. Nammack went on to write:

You may also be concerned with the small community issue, Senator, and you may have wondered about the level of acceptance by the public of replacement commuter airline service when and if a certificated carrier pulls out. You may be interested to learn exactly how strong that acceptance has been in the many small communities shown on the enclosed chart, once the small but invariably vocal group of local leaders stops posturing about the community's alleged loss of face suffered when a certificated carrier with his large jets stops service. Normally, it takes the community no more than six months to learn that four or five scheduled commuter flights per day at convenient hours add up to far better service than they were experiencing before.

Third. For the Airport Operators Council, J. Donald Reilly, executive vice president, wrote on April 12, 1978:

The Airport Operators Council International, representing the governmental units in your state which own and operate airports served by the scheduled airlines, urges your approval of this historic legislation. . . . It now has evolved into a progressive legislative mechanism for modernization of the process by which communities receive air service, regulatory reform of the Civil Aeronautics Board, which—viewed from the perspective of the local government airport sponsor—is long overdue.

Fourth. In a letter dated April 17, Governor Milliken, of Michigan, on behalf of the National Governor's Association, wrote:

The nation's Governors favor airlines regulatory reform and consider this particular legislation to be essentially consistent with the official policy position that the National Governor's Association has adapted on this issue of such fundamental importance to the states.

Fifth. Finally, in a letter dated June 24, 1977, from Douglas Cochran, transportation consultant to the Four Corners Regional Commission to the five Governors of the commission States:

The presently proposed Senate legislation gives the Title V Regional Commissioners almost everything Governor Castro asked for regarding air service to small communities.

Mr. President, I am well aware that in some circles this is extremely controversial legislation. No doubt, those Senators who feel that this bill goes too far too fast will offer amendments, some of which I may support. Other changes, perhaps in the rate of Automatic Market Entry, can be expected to take place in the House-Senate conference. So what we have before us today is probably the high-water mark of this legislation. It will be changed for the better, possibly for the worst, during the legislative process, but it will still represent a historic turning point in the battle against Federal regulations and a tribute to its sponsors. It deserves the support of the Senate.

Mr. President, under the agreement, I have 2 hours to present an amendment. I will not present that amendment and, therefore, I yield back the 2 hours. I yield the floor.

The PRESIDING OFFICER. Who yields time.

Mr. CANNON. I yield to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota.

Mrs. HUMPHREY. Mr. President, I ask unanimous consent that during the consideration of S. 2493 Mr. Tom Cator, a member of my staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, I yield myself such time as I may require.

First, I want to pay tribute to the distinguished ranking minority member on the committee who has contributed so greatly to the development of this bill in the form we now have it, as well as the distinguished Senator from New Mexico. They were both of very great help. I also want to compliment both the majority and the minority staff for the tremendous job they did. As you already heard, this bill required more time for markup in the committee than any other piece of legislation since I have been here in the Congress. It certainly is a great tribute to all of those who have worked so hard on it.

Mr. PERCY. Mr. President, I strongly support the Air Transportation Regulatory Reform Act of 1978, S. 2493, before the Senate today. My cosponsorship and support of the legislation stems from a deep-seated belief that too much Federa interference in the airline marketplace is counterproductive and anticompetitive.

Excessive and outmoded government regulation has retarded growth in the airline industry. Retarded growth harms the long-term interest of airline management, employees, investors, and the general economy as a whole. Most importantly, airline regulation has priced air travel out of the reach of too many Americans. A 1974 Gallup poll showed that 76 percent of the population had not flown in the previous year and that 45 percent had never even flown once in their lifetime. It is little wonder that 85 percent of intercity travel is by inefficient, private automobile.

Government regulation has tended to make airline travel a "limousine" service for expense-account travelers. Without doubt we have the finest air transportation service in the world. But this service is restricted to only one-fourth of our population.

In recent months, we have witnessed a proliferation of discount fares that has resulted in a surge of new traffic. I welcome the initative of the airlines in offering these reduced fares and their timely approval by the Civil Aeronautics Board. I would like to emphasize, however, two salient facts to counter the critics of reform who argue that these new promotional fares, and the response of the Board, means that we no longer need reform. Quite to the contrary: first, these new fares were not offered to the public until this reform legislation was introduced; and second, the current Board has had to stretch the current law almost to the breaking point in order to insure prompt approval of these reduced fares.

Loosening Government's stranglehold on air transportation is a national priority. The latest systematic study by the General Accounting Office showed, for example, that trunk airfares are from 22 to 52 percent higher than they might otherwise be under a deregulated system. This means that air travelers are paying an unnecessary $1.4 billion each year as a result of Government overregulation. This regulation is choking off innovation and the freedom to compete. It is jeopardizing the viability of dynamic private enterprise.

The legislation before the Senate today offers an effective, controlled mechanism for making the airline industry more competitive. The umbilical cord tying Government to the commercial airline industry must be cut. If we are to develop better to smaller communities and lower fares throughout the industry, if we are to create an air transportation network responsive to the needs of all Americans, and if we are to attain the reality of healthy, unfettered competition, then the phased deregulation principles contained in S. 2493 are necessary and proper.

Mr. President, I do not believe it is necessary at this point to outline the many advantages to both industry and the consumer that adoption of this legislation would provide. Nor is it necessary at this point for me to review again the well-conceived well-intentioned provisions of this legislation. My colleagues who have been so instrumental in getting this bill on the floor today, Senators KENNEDY and CANNON, as usual have expertly described the specific advantage of the bill. I do wish, however, to address two major issues which will be discussed during the debate on S. 2493.

I would first like to call the attention of my distinguished colleagues to several provisions of S. 2493 aimed at guaranteeing high-quality and convenient air service to the Nation's small cities and isolated areas.

The vital purpose of these provisions is to help prevent any reduced air service to these cities and communities by local service airlines. Under the present regulatory system, the CAB has allowed carriers to drop service to some 170 communities in the past 15 years alone. For example, the large trunk air carriers have been steadily pulling out of medium and small sized cities in Illinois for the past 35 years. Alton-Wood River, Cairo, Lawrenceville, Galesburg, Sterling-Rock Falls, and Danville have all lost CAB-regulated air service in recent years. An additional six cities—Bloomington, Moline, Peoria, Quincy-Hannibal, Rockford, and Springfield—have lost the services of at least one CAB-certificated airline.

In addition, since 1972 over 250 route, applications have been made to the CAB for Illinois service. Of these, only 70, less than one-third, have been approved. The CAB's problem is that it has its hands full. Under existing law it is charged with the impossible task of setting fares, awarding routes, second-guessing airline management practices, and, in effect, running the carriers from Washington while simultaneously striving to protect the system as a whole. As a consequence, both carriers and the system suffer.

Many local service carriers have lost interest in serving small communities. They are rapidly withdrawing service from them. These carriers have set their sights on large cities outside of the regions they now serve.

Under the provisions of S. 2493, no air carrier could terminate or suspend service to a community without at least 90 days notice. If the carrier provided monopoly service, the CAB would be authorized to require it to continue service until such time as an alternate carrier could be found. If the carrier were operating at a loss, the CAB could help finance the operation.

This provision will effectively assure service to the many vital small communities around the Nation. I am attaching to my remarks an analysis prepared by the CAB, on these very issues of assuring continued and improved small town service.

S. 2493 also revamps the present subsidy program. The taxpayers of this Nation currently spend over $80 million each year to subsidize air service to small cities and communities. This subsidy program has frequently resulted in Federal financial support for inefficient, low-quality, inconvenient air service. Carriers often operate token air service late at night or early in the morning to collect the Federal subsidy.

Under S. 2493, the present subsidy program would be phased out over a 7-year transition period. New carriers would be able to "bump" others from routes to small communities if they could provide better service at less of a subsidy. In several Illinois cities, for example, the more-frequent flights offered by unsubsidized commuter airlines has resulted in a tripling of boardings over the period when subsidized carriers provided service.

For example, Britt Airways, a commuter airline, entered into a service agreement in 1968 with Allegheny Airlines to assume—without subsidy—its $86,000-a-year subsidized service to Danville, Ill. Britt tripled the number of flights and the monthly number of passengers soared from 350 in 1968 to 2,600 in 1977.

And, Britt managed to receive revenues in the amount of a 22-percent return on its capital, compared with the industry average of only 3.6 percent.

Experience amply demonstrates that low-cost, high quality commuter airlines are ready and willing to compete with the regulated airlines for these services. Small communities would be far better served under these provisions of S. 2493 than they are today.

I wish to address one additional feature of the legislation before us: the automatic market entry provisions of S. 2493.

These provisions would give airline carriers the opportunity, under prescribed limitations, to enter into new domestic scheduled routes wholly at their own discretion. This concept, I believe, is the key to airline regulatory reform. It is necessary to insure that carriers can engage in limited entry without approval by the CAB. Currently, CAB's approval procedures can take years to complete and often involve substantial costs to carriers. Under the new authority, carriers will have the opportunity to respond in a timely manner to situations where existing carriers are failing to adequately or inexpensively serve particular markets.

Automatic market entry is supported by President Carter, former President Ford, Secretary of Transportation

Brock Adams, CAB Chairman Kahn, former CAB Chairman Robson, Secretary of the Treasury Blumenthal, and numerous airlines including United, Western, Hughes Airwest, Frontier, and Pan Am. Automatic entry would serve the public, service the interests of a healthy, competitive airline industry, and effectively reduce unnecessary airline regulation.

I believe that this concept, as spelled out in S. 2493, is the single most important measure before us today to end arbitrary, time-consuming Government interference in the airline industry. Automatic market entry is crucial to encouraging increased competition among air carriers.

The provisions of S. 2493 would allow each air carrier to serve one new route without CAB approval during each of the first 2 years, and two new routes each year thereafter. Critics of this proposal have claimed that serious problems will result from overall reduced load factors and revenues, and predatory pricing among carriers.

The Commerce Committee, in its report on S. 2493, correctly noted that these fears "have been refuted and shown to be without foundation." The amount of expansion allowed under the automatic entry provision is modest when viewed in terms of the airlines industry as a whole. In 1974, more than 2,000 segments were flown by certificated carriers. Even assuming that every carrier used all the automatic entry allowed under the bill, the total number of segments flown would only increase by under 2 percent. As far as I am concerned, this is no indication of so-called "excessive" competition.

Predatory pricing would also be impossible under airline reform. Such pricing tactics by the larger airlines are only sensible if a competitor, once driven out of the market, cannot reenter it. Only then can the predator raise his prices (and his profits) after the competition is gone. This cannot be the case in the deregulated environment because carriers could always enter new markets at will aided by the most mobile capital investment in industry today—the modern jet aircraft. If the predator knows that his competitors can reappear simply by routing airplanes to the market and selling tickets, he will quickly discover that exploitation of his monopoly position is impractical.

Critics also argue that larger carriers, such as United Airlines and TWA, will use this provision to squeeze out smaller competitors by virtue of certain economies of scale.

This claim is simply wrong and has been conclusively shown to be so. There are few, if any, economies of scale of any great importance in the airline industry. Small, medium, and large carriers can compete on an equal basis. Laker Airlines, for example, is successfully competing against the world's largest airlines on its New York-London flights and is, in fact, undercutting these other airlines in certain cases by hundreds of dollars in price. North Central, a small airline, entered the nonstop Milwaukee-New York market and was able to force United Airlines, a company many times its size, out of the market. Ozark managed to do the same in the nonstop Chicago-St. Louis market by forcing American Airlines to reduce its service along this route to a mere token number of flights.

The critical issues at stake today in the Air Transportation Regulatory Reform Act of 1978 have been debated for many years. I believe the legislation before us today strikes the proper balance between the legitimate demands of industry, consumers, labor, and management. Its effects on this country, should the measure be enacted into law, would be immediate and far-reaching. I, for one, look forward to the day of its enactment as a milestone in reversing the trend toward overregulation by the Federal Government which we have witnessed over the past several decades.

Before I conclude, I wish to make special mention of several of my colleagues who have worked so diligently for so long to insure passage of air transportation regulatory reform. The distinguished Senator from Massachusetts, Mr. KENNEDY; and my esteemed colleagues from Nevada, Mr. CANNON, and from Kansas, Mr. PEARSON, have performed brilliantly in soliciting meaningful discussion and debate on these complicated issues and in designing legislation so delicately balanced and fair to all concerned. It is a unique privilege and honor to have worked closely with all of them in encouraging the reform legislation before us today.

Lastly, I wish to compliment my good friends from Missouri, Mr. DANFORTH, and from Alaska, Mr. STEVENS, for their diligent work in the Commerce Committee in molding the legislation, by compromise and consensus, along the lines both felt were necessary to insure the success of comprehensive airline reform.

Mr. President, I ask unanimous consent that the comments of the staff of the Civil Aeronautics Board, entitled "Five Truths About Subsidized Small Community Air Service" be included in the RECORD at this point. I believe the findings of the CAB in this report will demonstrate beyond a doubt the many benefits to be derived from enacting this vital reform legislation.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

FIVE TRUTHS ABOUT SUBSIDIZED SMALL COMMUNITY AIR SERVICE

INTRODUCTION

In December of 1977 the Association of Local Transport Airlines (ALTA) published a booklet entitled Five Myths About Subsidized Airline Service To Small Cities. This document was offered as a rebuttal to presentations made by the Civil Aeronautics Board and the U.S. Department of Transportation before Congressional committees holding hearings on airline regulatory reform. Basically, the ALTA booklet paraphrases statements made by the Board and DOT, declares them myths, and then proceeds to try and rebut them.

In this paper we will demonstrate that the so-called myths are actually the truth about subsidized small community air service. The truths are:

1. The local service carriers are no longer interested in serving small communities and are rapidly withdrawing from them.

2. There is a great deal of dissatisfaction with the present subsidy program for assuring air service to small communities.

3. When a commuter airline replaces a local service airline at a community, there is often an enormous increase in use of air service.

4. Subsidy can be sharply reduced and service improved if local service airlines are replaced by commuter carriers on a nationwide basis.

5. The present subsidy system requires support of inefficient services.

Before we get to the specific arguments made by ALTA, however, we believe it crucial to emphasize that their arguments rest on fundamental premises which ALTA has not expressed and which we believe to be false. The first is that subsidy should be provided (1) at all subsidy-eligible communities now certificated to the local service carriers without regard to (a) whether good air service would be provided without subsidy or, (b) whether, because of the community's proximity to nearby air service or its extremely small size, there is any need for air service, and (2) to pay for the high cost of service with jets and large turboprops regardless of the potential for cutting costs, improving service, and increasing traffic by using smaller aircraft. These rest on the implicit assumption—well founded in the history of the Federal Aviation Act but completely unjustified by sound public policy—that the purpose of subsidy is to advance the financial interests of particular airlines.

The second premise, which necessarily follows from the first, is that the current statutory basis for subsidized small community service should remain unchanged. When section 406, the subsidy provision, was included in the Civil Aeronautics Act in 1938, its purpose was to provide funds to the airline companies to "encourage" and "develop"—indeed "promote"—what was then a fledgling industry. The subsidy, in the form of mail pay, was intended to augment the airlines' passenger revenues on a permanent basis and in so doing to secure for the nation the advantages of a complete air transportation network more quickly than it might otherwise have developed. To promote that goal, the authors of the Act required the Board to pay subsidy to all carriers on the basis of each one's system financial need—not to compensate the carriers for specific services.

Although this statute is unchanged the industry has long since matured and the purpose of today's subsidy program is quite different. Our object, and we assume the object of Congress, is to provide the nation's small communities access to the air transportation system. Section 406, therefore, is a poor vehicle for present purposes.

Applied to local service carriers today, it and other statutory provisions prevent the government from controlling the service it buys or its cost. As a practical matter the system is now based on sole-source supply at each community and cost-plus remuneration for the carrier-controlled type of local air service provided. Under section 406, the supplier, not the government, determines the quantity and quality of service it will supply, the equipment it will operate, and often even the markets to be served. And since we are required to base our subsidy on the carrier's system need, rather than the minimum cost of the particular service required, we are unable to control our costs, unable even to relate our costs to the service actually provided.

This system has provided incentives for the local service carriers to maximize subsidy so as to finance large aircraft operations in large markets while minimizing services

in low-density markets involving small communities. It has, in fact, helped to finance their evolution into trunks and away from small local air service operations.

For these reasons the Board and others have been seeking ways to improve the subsidy program since the early 70's. Every disinterested person who has studied the problem has concluded that the key to a better, more efficient small community air system lies in new legislation. A new statute would permit the government to make explicit determinations of exactly what level and kind of services should be subsidized, and to make direct payments of the requisite subsidies to carriers selected as best able to provide those services at minimum cost.

All are also convinced that the key to high quality small community air service is the commuter airline industry. The success of these carriers in recent years has shown that acceptable service with small turboprop aircraft can be provided at the level of demand—without subsidy—at many if not most of the communities now receiving subsidized service. And at the smallest communities—those that cannot support air service without subsidy—the commuter carriers can provide service of a quality and quantity equal to or better than that provided today and do so at far lower subsidy cost.

Our answer to ALTA's latest criticisms of the new program follow.

1. The local service carriers are no longer interested in serving small communities and are rapidly withdrawing from them

As a generalization, that statement is certainly true, although the degree of interest in continuing to serve small communities varies from carrier to carrier.

Whether one looks at the carriers' route policies as revealed in the applications which they prosecute before the Board or—perhaps more telling—their investment policies, the conclusion is the same. The locals see their futures as regional trunk carriers, not as small community specialists.

The ALTA "refutation" of this "myth" consists of the following points:

1. "There are 167 cities in the U.S. which receive certificated service and have a population less than 100,000; the local service airlines serve 156 of these. . . ."

2. Of the 157 points suspended by local service carriers between 1962 and 1976, many enplaned very few passengers, others had service nearby, and others involved suspension-replacements.

3. Some local service carriers have abandoned more cities than others.

4. Some of these carriers have acquired small planes.

The only one of these assertions that seems to conflict with our generalization about the undesirable shift in interest of these carriers from the service of small localities is the first; and it is totally misleading. It seems to demonstrate that the small communities continue to be served almost exclusively by the locals.

Observe, however, that it refers only to the 167 small cities that are served by certificated carriers. And observe that many of these approach 100,000 in population, easily large enough for unsubsidized service. It therefore says absolutely nothing about the number of small cities that are served by uncertificated carriers—and by definition commuter airlines are uncertificated; or about what has happened to the size of these two categories in recent years. As we will point out below, unsubsidized commuter carriers served 150 small communities in 1976.

The other three assertions only seem to respond to the generalization; the only "myth" they "refute" would be the straw man that ALTA has itself constructed: it is of course not true that the locals have abandoned all service to small communities. In any reasonable version, the generalization is undeniably true.

Since 1965, about 95 small communities have ceased to receive service from the subsidized local service carriers.[1] In almost every instance, the initiative for these suspensions and deletions came from the carriers, though the Board approved. During the same period, the carriers filed additional applications for suspension and deletion which we denied. How many small communities did they seek to add to the system? During that same period, about six small communities were added to their systems. The last of these, Sullivan County, New York, was added over the opposition of the carrier.

It is true that the carriers left these communities for economic reasons: the traffic potential was, in their judgment, simply too slight to make service worth their attention. It is not true, however, that all of these communities are unable to support air transportation. While the local service carriers have been withdrawing services from them the commuter carriers which operate entirely without subsidy have been extending their services to many of the same communities and to others as well. A 1976 study by the Department of Transportation, Air Service to Small Communities, found that commuter carriers were then conducting services at 150 cities which enplaned fewer than 15 passengers per day. These are truly small communities, far below the threshold of profitable operations for local service carriers even with subsidy.

During the same 10-year period, the locals have vigorously prosecuted applications for new route authority—not to engage in local or feeder service; rather they have filed hundreds of applications seeking authority in dense markets of the sort once reserved exclusively for trunk carriers. Operations in these markets often involve competition with trunk air carriers and require jet aircraft or large equipment wholly unsuitable to small communities. And the trend is accelerating; whereas they formerly applied for short- and medium-haul routes, they are now seeking major long-haul extensions far outside the traditional boundaries of their systems. Hughes Airwest, for example, has applied for nonstop authority between Los Angeles, and cities in Ohio, Indiana, and Tennessee. Allegheny seeks nonstop authority between Pittsburgh and Los Angeles and also to points in Florida. Two local service carriers seek new authority between the Twin Cities and Las Vegas and on to points in California. And these are just a few examples.

Even more revealing of the carriers' long-term goals have been their investment decisions. In 1965, 99 percent of the aircraft in the local service fleet were turboprop or piston-powered, ranging in size from 26 to 56 seats. By 1976, only 35 percent were of that type, the rest being larger jet aircraft. These jets accounted for 90 percent of local service carrier investment in aircraft at the end of 1976, and were used to fly 89 percent of the revenue passenger miles logged by them. These aircraft are completely unsuited to small community air service. And lately the carriers have been buying even larger jets. Airwest has several 155-seat 727's; Southern has ordered 148-seat DC–9–80's; Allegheny is considering the acquisition of wide-body aircraft. Without exception communities able to support service with jet aircraft of the types already in the fleets of the local service carriers can support air service wholly without subsidy.[2] Thus when ALTA talks about the cities of 50,000-100,000 population which its members serve with subsidy it is talking about cities which could be served, with the right size aircraft, without subsidy.

Although two local service carriers have recently made purchases of new turboprop equipment, as ALTA observes, the vast majority of the propeller aircraft in the local service fleets are old and becoming so costly to maintain that their plane-mile costs approach those of jets. Several of the locals are on the verge of phasing out their prop aircraft altogether (see Appendix A).

The local service airlines have turned to larger and faster jet aircraft to maximize their profits by operating in longer, denser markets.

This is a natural and almost inevitable result of the regulatory environment in which they have operated over the last two decades. As they have moved their resources into trunkline-type aircraft and operations, their incentives to provide short-haul service—that is, small community service—have declined; and as they continue to mature into trunklines, their ability to serve small communities economically will continue to decline. It is not surprising that in many instances their services are less than satisfactory. To take but one example, a C.A.B. administrative law judge recently found, in a case involving service by a local service carrier at several communities in Kansas, that:

"In practically all cases [the carrier's] service has been gradually reduced over the years to minimum certificate requirements. . . . In all of the communities which are presently served . . . service has been reduced to one flight per day in each direction. The present limited service and scheduling consistently results in inconvenience to persons flying to and from the applicant cities and in most cases necessitates long layovers or overnight stays. Present . . . scheduling, which is principally designed to meet the trunk carrier departure times in the major terminals of Denver and Kansas City, usually results in midday or late-night scheduling for the applicant cities, thus, in most cases, eliminating one-day round-trip availability to or from the applicant cities . . ."

Please understand, we are not singling out a single carrier for criticism. The case is representative. Nor are we really criticizing the carriers. They are simply conducting their businesses in their own self-interest; that is precisely what they should be doing. It is the government's job as regulator to design a system in which their self-interest and the public interest coincide as closely as possible. That is where our present small community service program fails. The carriers get the money, the communities get a minimum level of service, often grudingly provided.

2. There is a great deal of dissatisfaction with the present subsidy program for assuring air service to small communities.

There certainly is.

ALTA's "answer" seems to be: no, there isn't; and besides what criticisms there are have been inspired, insidiously, by trouble-making critics of the present subsidy system.

Here is a quotation from the "Policy Statement on Aviation" adopted by the National Governors' Conference on September 9, 1977:

"The Governors are concerned seriously with the continuing loss of air service to small communities as certificated regional

[1] This figure does not include: (a) small communities suspended or deleted by trunk carriers, (b) points deleted and hyphenated with other cities (except Hagerstown, Md. and Martinsburg, W. Va.) or which receive service through another city, (c) points where service was dropped by one carrier but taken up by another, (d) points temporarily suspended, or (e) points which were deleted but had never received service.

[2] Tables 1–4 contain data on local service carrier aircraft. The smallest jets in the local service fleet, the DC–9–10 and BAC–111, carry about 75 seats while the largest turboprops carry 50 to 60 seats.

carriers are permitted to suspend or delete low-density or unprofitable communities. Air service to the majority of small communities can be provided in the most cost-effective, energy-efficient manner by commuter/feeder airlines operating as a fully recognized third level of the national air transportation system. . . ."

Here is another, from a joint statement of the National Conference of State Legislatures, the Conference of State Departments of Transportation, and the National Association of State Aviation Officials:

"The States are concerned about the loss of certificated service to small communities. Since 1965, service has been deleted at approximately 114 cities and service has been suspended at another 89 cities. Some of these cities are not isolated and can be served through other points. Many others are now dependent upon non-certificated air transportation for their vital connecting links to the national air transportation system, and still others have simply lost scheduled air transportation service altogether. . . . We are convinced that the problems faced by our small and isolated towns and cities will not be solved unless new legislation is adopted." [3]

3. When a commuter airline replaces a local service airline at a community, there is an "enormous" increase in use of air service

This is the one—and only—instance in which the criticism in the ALTA submission is a valid one. The Chairman was indeed misinformed in giving the Committee the impression that if one considers as a group all instances in which commuters have replaced local service carriers the results in the aggregate show an "enormous" growth in traffic—largely for the reason to which ALTA alludes: the CAB study on which he relied (unwittingly) neglected to take into account commuter operations before the local carrier suspended operations. We apologize to the Committee for having misinformed it in this way.

The essential conclusions of the CAB and DOT studies remain nevertheless valid: that commuter carriers have clearly demonstrated that they can in many, many instances replace local service carriers in markets currently under subsidy, with superior service and at lower cost.

In any event, the increase in service and traffic following replacement has in many instances indeed been "enormous." Here are five such cases. Between 1969, when Allegheny was replaced by a commuter carrier at Dubois, Pennsylvania, and 1976 traffic increased from 4,600 passengers to more than 14,600—i.e., more than trebled. Replacement of Texas International in 1976 at Jonesboro, Arkansas, caused traffic to more than double in the first year from 3,700 passengers to 7,600. At Wenatchee, Washington, Cascade's replacement of Hughes Airwest in 1974 was followed in only two years by an increase in traffic from 5,500 passengers to 9,500, 72 percent. The results were similar at Bloomington, Indiana. In three years traffic increased 76 percent, from 9,700 passengers to more than 17,000. In its eighth year after replacing Frontier at Dodge City, Air Midwest carried more than three times as many passengers, nearly 3,000 as against fewer than 1,000. These results, which are not in any way unusual, are set forth in detail in the accompanying table.

Nationwide the results have been highly satisfactory, although, we concede, not nearly so dramatic as in individual cases. Our latest study looked at all 47 points where commuters have replaced locals in the last ten years and the suspension/replacement was in effect in 1976. We found that we have complete data for only 37;[5] at these total traffic has grown about 8 percent annually since the suspension.[6] This achievement is all the more impressive in that it typically followed a record of declining traffic under the preceding service provided by the replaced local carriers: where we have complete traffic data for operations before the points were suspended, it shows that traffic generally declined in the five years preceding suspension.[7] Therefore, commuter service has often reversed a decline in traffic.[8]

We agree with ALTA, also, that commuter airlines generally do not stimulate traffic by offering lower fares. They do it by offering more frequent flights at more convenient times. This type of service, despite its lack of price advantage, is especially attractive to the business travelers who constitute the majority of short-haul air passengers.

4. subsidy can be sharply reduced and service improved if local service airlines are replaced by commuter carriers on a nationwide basis

"The conclusions of the CAB on this matter," ALTA says, "are based on a study which shows that after a 7-year transition of subsidized service to commuter airlines the annual subsidy bill will be $21 million instead of $73 million in 1977." That's right.

ALTA disputes that conclusion; but its description of the Board's Small Communities Subsidy Program is considerably different from our proposal.

First, our forecast of subsidy under the new program is not directly based on any fixed plane-mile costs. In the Board's 1972 study Service to Small Communities, we calculated that commuter airlines could profitably serve points averaging 18 or more daily passenger enplanements. That calculation was based in plane-mile costs for small aircraft operations and fares at that time. We reason that the rise in fares has been equal to the rise in costs since then, so that the 18 daily enplanements threshold is still valid. That is confirmed by the 1976 DOT study, Air Service to Small Communities, which concluded that profitable commuter operations could be conducted at points averaging as few as six daily enplanements. The DOT study found that commuters now serve 150 points enplaning fewer than 15 passengers per day; all 128 U.S. cities receiving commuter service in 1973 averaging 15 or more enplanements daily were still served by commuters in 1976. Over the same time period, only 4 of 62 commuter points averaging 6 to 15 daily enplanements lost service.[13] Therefore, we based our subsidy projections on the difference between actual average daily enplanements at each eligible community and the 18-per-day threshold. As we have clearly stated, and as the draft bills now in Congress provide, every community that is now on the certificated system, whether currently served or not, will be eligible for subsidy and will be guaranteed air service.[14] Our calculations show that in 1975 there were 61 points falling short of the 18 enplanement standard.[15] Our subsidy projection of $21 million for 1984 is the amount required to bring the subsidized carriers' revenues to the 18-per-day level at those 61 points, based on commuter fares to a nearby hub airport and allowing for five percent annual inflation.[16]

We are aware of the recent FAA proposal to require costly new equipment on commuter-size aircraft. We have contacted the FAA and urged them to consider carefully the relationship between the costs and the benefits involved in their proposal. Indeed, we understand that the FAA has already dropped several of the proposals which proved to be too costly. We can only assume that any new costs imposed on commuter airlines by the FAA will be reasonable and justified by increased safety margins. We feel that if that is the case, the costs should not be too great and our subsidy forecast contains sufficient conservative bias to accommodate the added costs and remain accurate. But even if the increased costs prove to be much greater than we expect, the overall cost of providing service with small aircraft should still be substantially less than with large aircraft.

We do not see significantly increasing commuter costs in the other areas discussed by ALTA. If we are allowed to administer the new small communities program as we have proposed it, we will be in control of the costs incurred by our economic regulation of commuters. Though we will need data from commuters in the program, we do not intend to impose substantial regulatory costs on them in the data reporting area or any other area. Commuter airlines already report certain traffic and operational data to us and we will hold additionl reporting under the small communities program to a minimum. The Board's record of having reduced the paperwork burden we impose on small businesses by more than 75 percent in the last two years is, we submit, simple proof that this is no empty declaration.

5. The present subsidy system requires support of inefficient carriers or services

Delete two words and the myth becomes the truth.

The present subsidy system requires support of inefficient services.

We do not accuse the local service carriers of being inefficient. Our argument is that the subsidized services they provide are inefficient.

Table 5 shows that in recent years, as service to small communities has declined, the subsidy bill for that service has increased. Table 6 shows that the increase cannot be ascribed completely to inflation, since the local service carriers' productivity gains have served to offset cost increases due to inflation over most of the last decade.

A better measure of the inefficiency in airline subsidy is not its absolute level but the large ratio of costs to benefits. We hold that, as a matter of policy, subsidy can be justified only where it pays for air service that would not otherwise be available. On this basis the passengers traveling to or from those certificated points which need subsiby to support air service were estimated by the DOT to be subsidized in 1974 at the rate of $227 per pas-

[3] Submitted on March 30, 1977, to the Subcommittee on Aviation of the Senate Committee on Commerce, Science, and Transportation.

[5] We had to drop ten of the 47 communities in the analysis criticized by ALTA due to lack of reliable data on commuter traffic. See Table 7.

[6] These figures cannot be compared with system-wide changes in the traffic of the local service carriers since such aggregate figures include not only "growth" but the effects of the carriers rapid expansion into trunk-type markets.

[7] See Table 8.

[8] As we have conceded, our original finding that 1976 traffic at 47 suspended points was enormously greater than the local service carrier's traffic at the point in the year before suspension was misleading: it was not a proper indicator of traffic growth trends at those communities because it left out any traffic carried by commuters before the local service carrier was suspended.

[13] DOT, *Air Service to Small Communities*, March 1976, p. 47.

[14] The CAB proposal would limit the explicit guarantee of service to points enplaning 80 or fewer daily passengers since there can be absolutely no doubt of the viability of non-subsidized scheduled service above the 80 pasenger level.

[15] This figure is exclusive of Alaska for which a separate subsidy program is required.

[16] Our subsidy calculation is intentionally conservative since it assumes no traffic stimulation at the subsidized communities.

senger. That specific number may be subject to dispute, but its general order of magnitude is correct. It shows that much of the subsidy being paid today goes for large aircraft services that would be provided anyway, or replaced by smaller aircraft services, without subsidy. The present subsidy system encourages this result by requiring the Board to pay for services which the Board cannot specify as to timing and aircraft type, by requiring the Board to consider system financial need in setting subsidy rates, and by allowing subsidy only to certificated carriers.

We feel we must emphasize, in conclusion, that the ALTA submission and seeming refutation of the CAB position is based fundamentally on a misconception—indeed a distortion—of that position. The CAB does not maintain that every local service carrier has totally lost interest in small community service; that commuters will in every case be able to provide better service than them and at lower cost. It does not advocate the categorical exclusion of the locals from subsidy, and never has.

The CAB view is grounded, rather, (1) on certain obvious and undeniable historical trends—of diminishing interest of local service carriers in small-scale local service, of a corresponding shift in their interest to long-haul traffic in denser markets, and of a dramatic corresponding shift in the kinds of equipment they use; (2) on the undeniable preferability of a system under which subsidy can be given, case by case, to whichever carrier or kind of carrier can proved the desired level of service at minimum cost; (3) on the equally undeniable prediction that this will in many, many cases be an uncertificated commuter rather than a currently certificated carrier; and (4) that the result will be a pattern of service that will be better for the communities involved, on the one hand, and the Federal taxpayer on the other. None of these is a myth; and none of them has ALTA refuted.

Mr. MAGNUSON. Mr. President, I want to congratulate my distinguished colleague, the chairman of the Commerce Committee, on the many hours of hard work he has invested in this important legislation. While I have not always shared his views on the degree to which the Congress should modify the regulatory structure governing the Nation's airlines, I do believe that this legislation moves in the right direction and that it is an improved piece of legislation as a result of the extensive consideration that was given it in Committee.

Part of the committee's work on this bill resulted in changes in the way in which carriers may raise their fares in some or all of the markets they serve. In the original Cannon-Kennedy bill (S. 689), carriers would have been permitted to raise fares in any market to a level no more than 10 percent above the fare in effect 1 year earlier. This "zone of reasonableness" for fare increases would have been enlarged to 20 percent after 1979. In the committee bill, by contrast, the carriers are permitted to raise fares to a level no more than 5 percent above the standard industry fare level. This change is a complex one, and is augmented by several other important changes that work together to insure fairness for carriers but also for passengers and communities.

My purpose in explaining these changes is to insure that no one mistakes what the committee has done. The committee has not simply reduced the zone of freedom for fare increases; it has instead attacked by other means the problems that the zone was originally intended to cure.

The background of the committee's action is simple. Under the existing Federal Aviation Act, the carriers have frequently complained that the Civil Aeronautics Board has made it impossible to obtain fare increases in timely fashion when costs increase. The three primary problems identified by the carriers are that the board has unreasonably, first, delayed action on fare increases needed to cover cost increases; second, refused to consider anticipated as well as previously experienced cost increases; and third disallowed, for faremaking purposes, certain costs actually incurred—or artificially attributed to the carriers revenues they have not, in fact, received.

S. 689 attempted to respond to these problems by permitting the carriers greater freedom to raise fares without Board interference. Specifically, S. 689 prohibited the Board from suspending or declaring unlawful any fare that was no more than 10 percent higher than the fare in effect in the same market a year earlier. This upward zone of reasonableness would have become 20 percent after 1979. The justification for the zone was to permit carriers to raise their fares in order to cover increased costs, and to do so without the regulatory lag and artificial adjustments that had previously characterized Board review of fare increase requests.

It was intended, of course, that a policy of more open market entry and greater competition would prevent abuse of this new freedom to increase fares. But several communities, and particularly the Port of Seattle, expressed concern that competition under the new statute would be insufficient to insure that passengers in particular markets would not be subject to price gouging.

For this reason, among others, the committee decided to solve by other means the problems of which the carriers had complained. Specifically, the committee adopted the standard industry fare level, computed according to industry average costs (as it is today), as the baseline for the new zone within which carriers may raise or lower fares without Board interference. To solve the problem of regulatory lag, the committee bill requires that this fare level be adjusted quarterly by the Board, thus permitting fare increases (if needed and competitively possible) at frequent and predetermined intervals. To solve the problem of artificial cost adjustments by the Board, the bill forbids the Board, when making its quarterly computations, to make any adjustment to costs actually incurred. (If a complaint is filed against any fare on grounds that it is too high, the bill also requires that the Board act promptly on the complaint and take into account reasonably anticipated future costs as well as costs already experienced.)

The result of these provisions is to solve, by other means, the problems that S. 689 originally intended to solve through creation of the upward zone of reasonableness. If the carriers need higher fares to cover higher costs (assuming competition does not drive costs down in every market), they can obtain those fares promptly under the committee bill without Board interference and without the need to rely on any upward pricing flexibility. This is because the fare level will itself be raised as costs increase, at regular intervals and without artificial cost adjustments.

In light of these provisions, the need for any upward fare flexibility is open to question. A fare at the formula level will by definition be a fare that enables a carrier of average efficiency to earn 12 percent rate of return. The fact (or allegation) that in some markets costs are higher than in others is, of course, implicit in the use of industry average costs to compute the fare formula, and in itself creates no argument for the freedom to charge above-formula fares in the allegedly higher cost markets. This is particularly true when, by definition, a carrier need not prove the existence of higher costs in order to take advantage of the upward fare flexibility provided by the zone.

Nonetheless, the committee bill does permit carriers to charge fares in particular markets as much as 5 percent above the standard industry fare level. In my view, it is essential that this zone not be increased. It is particularly important that the zone not be increased under the mistaken impression that the committee has simply "reduced" the zone originally provided in S. 689 or otherwise acted in disregard of the carriers' need to cover cost increases with fare increases. As I have already indicated, the present zone and the zone provided in S. 689 are simply not comparable; they are constructed on entirely different bases. The problems sought to be cured by the larger zone in S. 689 have also, in the committee bill, been cured by other provisions instead.

The committee bill also differs from S. 689 in the restrictions placed on fares within this upward zone. The Board may not suspend any fare within the zone, and such a fare is conclusively deemed to be just and reasonable. But the committee bill specifically permits the Board, after a hearing, to declare such a fare to be unlawful on the independent grounds of undue preference or prejudice. Should a community file a complaint on those grounds against any fare within the 5-percent zone, the bill requires that the complaint be acted upon within 90 days.

The purpose of these latter provisions is twofold. First, the committee intends that the carriers not lightly impose upon passengers and communities fares that are well above the level found to yield a 12-percent rate of return in average markets of the same distance. Second, if a community believes that it and its passengers are in fact the victims of unlawful discrimination, the committee intends that the Board respond immediately to the community's complaint. It took almost 10 years, and three formal proceedings before the Board, for the Puget Sound area to obtain the elimination of certain domestic common

fares that were unduly prejudicial on their face under the existing statute. Since the new act will require prompt Board consideration of matters important to the carriers, it should also require prompt Board resolution of matters important to passengers and communities alike.

I have taken the time to explain all of these provisions in some detail, Mr. President, solely because I am concerned that many individuals may fail, upon a reading of the bill alone, to understand why the committee "reduced" the upward zone of fare flexibility. As I have indicated, we did not simply reduce this zone. We provided directly for solutions to the problems the zone was originally designed to cure; having done that, we needed to protect passengers and communities as well as air carriers. In a purely economic sense, any upward zone is now arguably superfluous. I urge my colleagues to recognize this, and to leave the provisions relating to the upward zone intact.

UP AMENDMENT NO. 1227

(Purpose: To eliminate an antiquated provision of the existing law relating to corporate directors)

Mr. CANNON. Mr. President, at this time I send to the desk three technical amendments and I ask for their immediate consideration.

The PRESIDING OFFICER. The amendments will be stated.

Mr. CANNON. Mr. President, I ask unanimous consent that the three technical amendments be considered en bloc and that reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 1227.

The amendment is as follows:

On page 37, line 4, after the words "Sec. 9", insert: (a)

On page 37, line 6, delete "(a)" and insert in lieu thereof: (1)

On page 37, line 10, delete "(b)" and insert in lieu thereof: (2)

On page 37, between lines 13 and 14, insert:

"(b) Section 409(b) of the Federal Aviation Act of 1958 (49 U.S.C. 1379(b)) is deleted."

On page 85, line 21, after the word "suspend", insert: "or reject".

On page 90, line 11, delete: "title IV" and insert in lieu thereof: "this Act.".

On page 93, line 8, strike "shall" and substitute: "is authorized to".

On page 93, line 17, strike "shall be entitled to" and substitute: "may".

On page 95, line 1, strike "shall be entitled to" and substitute: "may".

On page 95, line 4, strike "shall be entitled to" and substitute: "may".

On page 100, delete lines 5 through 16 and insert in lieu thereof the following:

1(a) Section 3 of such Act is amended by inserting in the first sentence after the words "by such lender" the following: "to any air carrier holding a certificate to engage in local air transportation from the Civil Aeronautics Board or"

(b) Section 3 of such Act is further amended by deleting in the first sentence the word "wholly" and inserting the following in lieu thereof: "the major portion of which is conducted".

Mr. SCHMITT. If the Senator will yield, I ask unanimous consent that John Ryan, of my staff, be granted the privilege of the floor during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, adding the words "or reject" on page 85, line 21, closes an inadvertent loophole in the bill which would have allowed the CAB to frustrate the intent of the bill by rejecting tariffs instead of suspending them.

Changing the words on page 90 to read "this Act" instead of "title IV" will bring the authority to use expedited nonoral hearing procedures to all functions of the Board including fare applications which otherwise would not be included. This was an oversight in the original bill.

The changes on pages 93 and 95 are made simply to conform with Budget Act requirements.

Elimination of section 409(b) of the Federal Aviation Act merely removes an antiquated section of the act which deals with compensation which may be received by a corporate director as a result of a distribution of securities. This subsection is out of date and of negligible importance. Its elimination is merely a technical matter.

The amendment to the aircraft loan guarantee program is being made only to clarify that we have no intention to eliminate anyone now eligible to receive such loans from receiving them in the future.

Mr. President, I yield back the remainder of my time on the amendment and ask that the amendment be agreed to.

The PRESIDING OFFICER. Does the Senator from Kansas yield back his time?

Mr. PEARSON. Yes, Mr. President.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CANNON. Mr. President, I yield 10 minutes to the Senator from Massachusetts.

Mr. KENNEDY. I thank the Senator from Nevada, the chairman of the committee.

Mr. President, I ask unanimous consent that Mr. Tom Susman, Mr. Dave Boies, and Miss Susan McDormott of my staff be granted the privileges of the floor during the consideration of S. 2493.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, today we shall have the opportunity to vote on legislation which will change the entire face of the domestic aviation regulatory process. We will have the chance to tell the American public that we believe competition to be better than regulation, that business men and women can make better decisions about the conduct of their businesses than bureaucrats, and that four decades of Federal control over an industry does not guarantee four more decades without change.

Only slightly more than 4 years ago, the Subcommittee on Administrative Practice and Procedure looked at the performance of the Civil Aeronautics Board and discovered that the Board's procedures were unfair to some industry groups, inadequate to protect the interests of the traveling public, inefficient, and biased in favor of existing major carriers. Underlying our report on the CAB, issued in 1975, was the firm conviction of the subcommittee members that the existing Federal Aviation Act needed substantial overhaul if both the industry and the public were to be best served.

That conviction has been tested and proven over the last 3 years by dozens of days of hearings before my subcommittee as well as the Aviation Subcommittee of the Senate and House. That conviction also has been proven by years of study and analysis by academics, by Senate committees, by the executive branch and by the Civil Aeronautics Board itself.

S. 2493 is the joint product of many different Senators from different parties and committees. Above all, however, S. 2493 is the result of the effort and skill of the chairman of the Commerce Committee (Mr. CANNON). He has chaired dozens of days of hearings on aviation reform legislation; he has participated in lengthy subcommittee and committee markups on the bill; and he has brought his experience and sensitivity from 6 years as Aviation Subcommittee chairman to the drafting of a well balanced, comprehensive bill.

I commend him and the members of his committee and members of his staff, as well, for an excellent job.

Mr. President, it is now clear beyond doubt that the aviation regulatory scheme devised in the depression to protect an infant industry has resulted in higher fares, less service—especially to smaller communities, fewer competitive alternatives and generally less competition than the public deserves, and has a right to expect, from a mature industry. Our studies have shown, for example, that in those intrastate markets where airlines are free to enter and compete on their merits, prices are lower and service better than the prices and service offered by regulated interstate carriers over comparable routes.

Some carriers argue that passengers do not mind paying higher fares and that lower fares would mean less extravagant service and ruinously lower profits for airlines. In fact, time and time again—when given the choice—consumers choose lower fares over extravagant service. Further, the experience of intrastate competition reveals that more competition often improves service and profits, compared to the stagnation born of overregulation that many carriers have grown accustomed to.

Over the past several months, we have seen additional proof of the popularity and profitability of competition. Under the leadership of President Carter and Chairman Kahn of the CAB, carriers have been freed to increase their competitiveness both here in the United States and abroad.

The result has been the lowest air fares in history and higher profits than the industry has enjoyed in more than a decade.

Despite the improvements made by this administration and the present Board, we need this bill now more than ever,

as Chairman Kahn himself is the first, and one of the most eloquent, to say.

Without specific legislative direction, the CAB is without adequate criteria on how and to what extent competition should be increased. Moreover, the procompetitive decisions of this Board may be subject to obstruction and delay in the courts by carriers happier with the known environment of Government control than the more demanding environment of private competitive enterprise.

And, perhaps most importantly, in the absence of this legislation, the procompetitive decisions of this board may be reversed by subsequent boards who, for whatever reason, may decide to revert to Government control over competition.

I believe, Mr. President, that S. 2493 reforms the present law in four fundamental ways:

First, the bill substitutes carrier rate flexibility for Government control of rates. Predatory pricing below cost is forbidden, but so long as a carrier's rates are profitable, it has the right to engage in the same competitive bidding for the public's patronage that we depend on in other industries to provide consumers with better products and lower prices. The lower fares that such competition brings about are highly popular with consumers; we would expect this as a matter of commonsense. This has now been proven by the experience of intrastate carriers and by the recent interstate experience as well. The experience also shows that such competition can be highly profitable for the carriers as well.

Second, the bill reduces the presently overly restrictive limitations on entry. Since 1938, not one new trunk carrier has been certified by the CAB in the face of 80 applications for such certificates since 1950. The CAB, under this bill, will, of course, continue to regulate entry. But now it will be possible for a limited number of competitors to enter selected markets. Such new entry will provide new competitive alternatives for consumers and new competitive opportunities for carriers. The threat of such entry will also act as a spur to improved service and lowered prices by existing carriers.

Third, the bill is fashioned to provide improved service to small communities. This feature of the legislation is the result, in large part, of the work of Senator PEARSON. Studies have shown that service to smaller communities was seriously deteriorating. S. 2493 contains provisions which will halt that trend and encourage better, more flexible service to small communities. The easing of entry restrictions will also benefit smaller communities seeking new or improved service.

Fourth, this bill refines the standards for the granting of antitrust exemptions to airline carriers. It provides that the CAB can tailor the antitrust exemption granted to fit the air transportation needs of a particular case, instead of committing itself to a blanket exemption everytime an agreement is approved. This provision, like the bill as a whole, reduces unnecessary restriction on competition while preserving the CAB's authority to regulate where necessary to promote legitimate air transportation objectives.

The bill's objectives, and this bill itself, are supported by a broad coalition of consumer groups, business organizations, and other groups including:

The National Governor's Association; the National Association of Counties; National Association of State Aviation Officials; American Conservative Union; Americans for Democratic Action; Common Cause; Aviation Consumer Action Project; National Association of Manufacturers; American Association of Retired Persons; Congress Watch; Food Marketing Institute; Farm Bureau; American Retail Federation; Sears, Roebuck & Co.; Western Traffic Conference; National Retail Merchants Association; National Industrial Traffic League; as well as the National Taxpayers Union.

The bill is also supported by the Chairman of the CAB and elected representatives of both major political parties from every region of the country.

The bill, as its supporters recognize, is a long overdue reduction in unnecessary Government regulation of business and an equally long-overdue increase in the freedom of airlines to compete. Except in matters of health and safety, our society has, I believe wisely, chosen the competition of private unregulated business as the best way to insure that consumers are offered the products and services they desire at prices they can afford.

This bill, while preserving the Government's authority to regulate health and safety, frees airlines to do what business is supposed to do—serve consumers better for less. I join in commending the members of the committee for the excellent job they have done.

Mr. President, I yield back the remainder of my time.

Mr. CANNON. Mr. President, I yield such time to the Senator from South Dakota as he may require. How much time does he require?

Mr. McGOVERN. Twenty minutes.

Mr. CANNON. I yield 20 minutes to the Senator.

Mr. McGOVERN. Mr. President, I ask unanimous consent that Robin Carpenter of my staff be granted the privilege of the floor during all the procedures on this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, in the development of our Nation's transportation system, we have found it necessary to provide a regulatory framework to prevent the "free flow of market forces" from completely destroying competition and, ultimately, curtailing needed service.

Historians will recall that a century ago, the stagecoach lines in the Western United States engaged in such economic warfare until, eventually, there was only one company, Overland Stage Line, left in the business. Consumers soon found this "single carrier" provided miserable service at exorbitant rates.

When the stage lines were replaced by the railroads, the same type of situation existed until the Interstate Commerce Commission was created to protect the consumer.

The same rationale exists today, and certainly existed when the Civil Aeronautics Act of 1938 was adopted.

One of our distinguished colleagues, Senator JENNINGS RANDOLPH, spoke to the need of a regulatory agency for airlines when the CAA came to the floor of the Congress in 1938. Senator RANDOLPH—some 40 years ago—said:

> . . . Permanent long term (airline) legislation covering the economic phases of the industry is required to make possible the carrying out of a healthy long range planning on the part of both management and Government, and to avoid rate war, cutthroat devices and destructive and wasteful practices of which there have been disturbing signs. . . .

Senator RANDOLPH's comments were valid in 1938—and they are valid today. Under the 1938 legislation, the Nation's airlines prospered and grew to the point where our commercial airline system is the envy of the world.

Yet, under the umbrella of "lower fares and consumer protection," we are now asked to take the beginning steps toward a completely deregulated airline system—which, in my view, will ultimately destroy what we have so laboriously built.

The centerpiece of S. 2493 is its sections dealing with "automatic market entry" and "fares and practices."

Realizing the sensitivity of this issue and its impact on the Nation's commercial airline service, the committee has set out various constraints under which a carrier can enter a given market. These restrictions are a dilution of the free entry provisions of the previous bills, but the concept is certainly the same, and it is toward that concept that the bulk of my objections are directed, although I hasten to add, Mr. President, that I appreciate the improvements that have been made in this legislation since it was first proposed.

The essential difference in procedures is the qualifying test that would be applied by the CAB. Rather than the time-tested standard of "public convenience and necessity," this legislation suggests that any carrier who is "fit, willing, and able" can provide service. My concern on this point can best be illustrated by the following hypothetical example:

Four carriers, let us say, serve city A, providing 20 round trips a day to city B. A new carrier, not heretofore in that city-pair market, comes in and sets a fare at the lowest level provided under this bill, which is 35 percent below the standard industry fare level for the same or essentially similar class of service. The new carrier, using this service as a loss leader or market entry device, maintains the lower fare until the other four carriers are either driven out of the market or have substantially reduced service, leaving the new carrier as the dominant airline in the market.

Once that dominance has been established, the new carrier increases its fares to the full extent provided by law, which in this case would be 5 percent above the standard industry fare level, or 40 percent above the fares initially charged upon initial market entry. Flight fre-

quencies would be reduced to increase load factors. The end result would be a loss of total service between cities A and B.

Mr. GOLDWATER. Will the Senator yield for a unanimous-consent request?

Mr. McGOVERN. Yes.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that my staff member, Charles Lumbard, be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, I have a similar request, if I may.

Mr. McGOVERN. I yield to the Senator.

Mr. SCHMITT. Mr. President, I ask unanimous consent that privilege of the floor be granted to Patty White of Senator HAYAKAWA's staff, Lynne Davis of Senator BAKER's staff, Barbara Washburn of Senator JAVITS' staff, Charles Wood of Senator DANFORTH's staff, Ralph Oman and Marcus Bales of Senator MATHIAS' staff.

The PRESIDING OFFICER (Mr. ANDERSON). And the Chair adds Tracy Andrus.

Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, the end result of the hypothetical scenario I have described here would be a loss in total service between cities A and B.

To continue this grim scenario, it would be logical to assume that some other carrier, after surveying the market, would start the process all over again when it became economically feasible for them to do so.

S. 2493 does not permit "predatory" fare structures, but if the thrust of this bill, as it purports to be, is to encourage lower fares, then who can realistically determine what is an initial "bargain" to the consumer, and what is "predatory" pricing? It presupposes that the CAB will be privy to decisions made by airline management when, of course, they will not have such information.

The result of this kind of "competition" within the market will, in the course of a few years, result in the bankruptcy of many existing airlines or their merger with the dominant trunks. All of this to the long range detriment of our communications and our consumers.

Airlines with a strong financial position and/or excess fleet capacity are in the best position to outlast the competition in a deregulated airline environment.

Mr. President, I do not think it is any accident that United Airlines is the leading supporter in the industry of S. 2493. This enormous airline has ample excess capacity. Its fleet of 364 aircraft spends an average of 6.1 hours per day in the air as opposed to the industry average of 7.2 hours. If United could take on enough new routes to bring its fleet utilization up to the industry average or beyond, it could earn millions of dollars in extra revenues—probably more than enough to compensate for any rate cutting that might ensue from the various airlines cutting in on each other's prize routes.

Some smaller carriers—such as Frontier Airlines, a member of the Association of Local Transport Airlines—have also broken ranks with the general industry position against deregulation. Here, as in the case of United, the reason is basically self-interest. It has nothing to do with consumer interest. Frontier and some other local service airlines believe that they can, in time, benefit financially from increased fare flexibility and some realization of CAB control over market entry. Each airline has had to look at its "hole cards" and assess their future position against what they perceive will be the situation under deregulation.

Proponents of airline deregulation base much of their case on the lack of competition within the airline industry as opposed to other segments of our economy which, according to them, has led to consistently higher fare structures than are necessary.

In 1938, when the Civil Aeronautics Act was signed into law, 22 airlines were operating and were "grandfathered" into the new system under the statute. Since that time, over 90 new companies have been certified by the CAB. Through merger and dissolution this number has been reduced to 40.

This has created tremendous competitive forces to the point that today, in markets that produce more than 12 passengers a day, over 60 percent of them have a choice of airlines. In 92 percent of the city-pair markets with 300 or more passengers a day, there is competitive nonstop service and in most major markets there are three or more scheduled airlines. Market share concentration offers another measure of the competitive nature of an industry. Here the airlines compare favorably with other major industries. The largest carrier, United, has about 20 percent of the total revenue passenger miles. By comparison, AT & T has 85 percent of the telephone business, IBM 68 percent of the computer business, and General Motors 53 percent of the domestic automobile business.

Under current law, there is competition among carriers for shares of an expanding market.

The question of lower fares can be answered by pointing out that since 1948 air fares have risen only 24 percent while the Consumer Price Index has gone up 146 percent. Lower fare combinations would be possible under the existing system—and easier to implement—if it were not for the regulatory lag that is part of the CAB procedures. That, of course, must be corrected regardless of the outcome of this legislation.

While it is not my purpose here to do so, I think a case can be made that at least a portion of the foot-dragging at the CAB has been caused by their overt interest in deregulation, rather than in meeting their direct responsibilities under current law.

Airline deregulation carries with it the downgrading of service with smaller aircraft to many of the Nation's smaller communities which are now served by certificated carriers.

This, Mr. President, is one of my principal concerns with the legislation as it is now envisioned.

As envisioned by this bill, the existing jet and prop-jet aircraft will be phased out and the substitute equipment, regardless of frequency, will be much smaller, many without all-weather avionics. Over the course of the last decade, and before, it has been the policy of the Federal Aviation Administration to provide public moneys which, when matched by State and local funds, have been used to construct longer runways, install more sophisticated airways guidance equipment, and make other general improvements.

Acting on the strength of this Federal commitment, many cities and towns have expended considerable sums in building new airport terminals and connecting roadways.

In cities in my State receiving commercial service, each municipality and the State itself have made substantive investments in airport facilities predicated on the need to accommodate larger aircraft.

As service is withdrawn, what will happen to these facilities, many of which are maintained by long-term financial bonded obligations backed up by longer term lease agreements with the airline(s) and ground services?

The projected ease of exit and entrance to a given market will make most airlines reluctant to execute any long-term agreement, thereby destroying the airport management's ability to provide for maintenance or improvement of their facilities.

As the instability of the airline industry spreads as the result of deregulation, there will be a corresponding domino effect upon jobs in support industries such as airports and supplies, to related industries such as tourist services, rental cars, and food service. All of this disruption will be experienced to prove or disprove conclusively a theoretical assumption—that airline deregulation will result in lower air fares.

The focal point of my concern on this entire bill is in relation to the air service for smaller communities.

In considering the provisions of S. 2493 that purport to deal with this problem, it is important to consider the end, rather than the intermediate, result.

Once the door is opened on automatic market entry, we can anticipate that local service carriers will make application to terminate service to all system points boarding less than 40 passengers per day.

Most local service carriers are now in the early stages of a phaseout of their prop-jet equipment, which has been the standard aircraft for local subsidized service.

Recognizing that their subsidies will be terminated and the cross subsidization principle will no longer apply, they will seek to utilize their jet aircraft in higher density markets.

The CAB will then attempt to find a local service carrier to provide service. Given the generous early subsidy for local

service (third level) carriers and the provisions for aircraft purchase and other benefits, we can anticipate that there will be a number of new entrants into the third level air carrier network who will easily be able to convince the CAB that they are "fit, willing and able" to provide the service.

We can assume that the CAB will give the benefit of the doubt to the applicant third level carrier simply because they will want to honor the request of the regional carrier to get out of a market, and will be under serious pressure to do so.

There is no way of determining how route structure and flight frequency will be adjusted as the local service carrier attempts to make his operation a paying one. This will especially be the case in sparsely populated areas with longer flight distance, such as my own State of South Dakota and other comparable States.

Much is made of the financial saving of the elimination of the regional carrier subsidy program, but I have seen no accurate estimates of the total cost of this entirely new subsidy program that is being proposed to meet start-up equipment and facility acquisitions and early operational costs of local service carriers. It has been suggested, with some justification, that the new subsidy program could well cost three times—or nearly $100 million—what the present program requires.

In a sense, rural and small town America will be paying more in tax dollars for less service.

Those communities who have working relationships with existing regional carriers—partially subsidized under the present program—will not be able to continue that partnership under this bill.

Instead, they will be forced to accept some unknown, probably untried, carrier. As service deteriorates, and passenger boardings decline correspondingly, the CAB will ultimately determine that air transportation is not essential to a given point and all commercial air service will cease. We have seen that happen with the railroads. This bill will establish the framework for the same thing to happen with the airlines and commercial air service.

At a time when the administration is proposing a public services job bill with an estimated expenditure of about $11 billion, it is paradoxical that they should, in turn, be supporting legislation that, if adopted, envisions substantial unemployment in the airline industry. No proponent of S. 2493 has been able to accurately estimate how many jobs will be terminated by the full implementation of this legislation. It is obvious, however, that under deregulation airlines will have to concentrate on the major population centers in order to survive. If they direct their resources to these major hubs, smaller communities which are not as profitable will eventually be dropped or at least have to sustain a substantial reduction in service.

This will have a detrimental effect on airline employees. As an example, on Northwest Orient and Western Airlines, about 30 percent of the cities they serve have a metropolitan or county population of less than 100,000, providing hundreds of jobs.

With about 300,000 airline professionals involved in the Nation's airlines at present, a conservative projection of job loss with the full implementation of deregulation would be about 20 percent—or some 60,000 employees. This does not include supportive personnel employed by airports, municipalities, travel agencies, and others either directly or secondarily involved in commercial air transportation.

To meet this concern, S. 2493 has added a new section, which is not contained in its legislative predecessors (S. 689 or S. 292), entitled the "Employee Protection Program."

In simple terms, what this means is that a special account will be established to pay terminated employees for a maximum of 36 months following the loss of their jobs. Depending on the mix of employees who are furloughed, it could be anticipated that applications for assistance under this special account could run in excess of $100 million a year—or if the full 20 percent of the work force were affected, the demands against the account could total nearly $500 million a year, or some $1.5 billion over the full 36-month period has expired.

I suspect that there are many Americans who would find this price too high to pay in the name of deregulation. Beyond that, there is the understandable concern of the affected employees on what would happen to them after the 36-month period has expired.

In most instances, we are talking about highly trained professionals, pilots, flight attendants, mechanics and maintenance personnel, reservation clerks, and others who would have difficulty in locating similar employment elsewhere.

Proponents of this legislation may well quarrel with these projections, but the fact is that they do not know—and there is no data available—to determine the full adverse effect of this legislation upon the Nation's airline employees.

The employee protection program in S. 2493 signals that the sponsors of this legislation are aware that there will be layoffs, but it does not—and cannot—fill in the numbers or the costs involved. It is a sad commentary on this bill when we find ourselves providing unemployment benefits for an unknown number of people, in an amount that we cannot quantify, at a time when we are desperately trying to find ways to put people to work.

Mr. President, I have several amendments at the desk. If it is agreeable with the distinguished manager of the bill, the chairman of the committee, Senator CANNON, I would be happy to call up one of these amendments at this time.

Mr. STEVENS. Mr. President, will the Senator yield ?

Mr. McGOVERN. I yield.

Mr. STEVENS. I thank the Senator from South Dakota.

Mr. President, I have a technical amendment which, as a member of the committee, I have discussed with our distinguished chairman, the manager of the bill. I wonder whether he would yield to me for the purpose of having this amendment taken up at this time. Other technical amendments were taken up, and I was delayed in arriving on the floor and did not have my technical amendment taken up.

Will the Senator yield to me, without losing his right to the floor, for that purpose?

Mr. McGOVERN. I yield for that purpose.

UP AMENDMENT NO. 1228

Mr. STEVENS. Mr. President, I send an amendment to the desk.

(Purpose: To allow certain Alaskan Air carriers to participate in the automatic market entry program)

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 1228:

On page 18, line 9, delete everything in subparagraph (B) following "July 1, 1977," and insert in lieu thereof the following: "engaged in regularly scheduled air transportation in excess of 50 million available seat miles."

Mr. STEVENS. Mr. President, this amendment pertains only to Alaska. It is an amendment on page 18. At the time we offered that amendment, it referred to certified holders that operated turbojet-powered aircraft in scheduled air transportation service. This changes that standard of 50-million seat-mile available capacity. It would include the other certified carrier operating in Alaska today. Reeve Aleutian Airways.

My staff has mentioned this matter to the staff of the chairman, and I hope he will accept the amendment.

Mr. CANNON. Mr. President, the Senator is correct. This refers only to the State of Alaska and would bring one new carrier in its automatic market entry provision, and I have no objection to the amendment.

Mr. PEARSON. We have no objection to the amendment.

I move the adoption of the amendment.

Mr. STEVENS. I yield back all time, if there is time.

Mr. CANNON. I yield back time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment was agreed to.

Mr. STEVENS. I thank the Senator from South Dakota.

The PRESIDING OFFICER. The Senator from South Dakota.

AMENDMENT NO. 1789

Mr. McGOVERN. Mr. President, on behalf of myself and the Senator from Montana, Senator MELCHER, I call up amendment 1789 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN) for himself and Mr. MELCHER proposes amendment numbered 1789.

Mr. McGOVERN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, beginning on line 21, strike everything through line 20 on page 21, and insert in lieu thereof the following:

"(2) During each of the calendar years 1979, 1981, and 1983, each air carrier or person specified in paragraph (1) may select one segment, not to exceed 3,000 statute miles in length, over which it shall be authorized by the Board to provide scheduled nonstop air transportation of persons, property, and mail: *Provided, however,* That the Board shall not grant such authority to any carrier or person which has received new route authority in excess of 1,000 cumulative statute miles under subsections (a) (1) or (i) of this section during the 12-month period immediately preceding the date for filing selections under this subsection. No segment may be selected (A) if the average load factor, during the 6-month period prior to such selection, in service provided to such segment by any air carrier was less than 55 percent; or (B) which has been designated by another air carrier under paragraph (3) as being closed for that year to automatic entry under this subsection. Initial selections shall be filed with the Board on the first business day of July in each year for which automatic entry is authorized. Final selections shall be certified as selected by the Board by September 1, of the year in which the selection was filed, unless the Board finds that the air carrier or person making the selection is not fit, willing, and able to provide the air transportation selected, and to conform to the provisions of this Act and the rules, regulations, and requirements of the Board made or issued under this Act. Based on such certification, that air carrier or person shall be authorized to engage, for the next 20 months, in scheduled non-stop air transportation of persons, property, and mail over the segment selected.

"(3) Each air carrier specified in paragraph (1) may, for each year in which automatic entry is authorized, designate a number of segments between which it provides regularly scheduled nonstop air transportation, which shall not be open to automatic entry under this subsection as follows:

"(A) For the year 1979, two such segments.

"(B) For the year 1981, two such segments.

"(C) For the year 1983, one such segment may be designated under this paragraph. Designations for each year shall be filed with the Board on the first business day of January of the year for which the designations are made."

CONFORMING AMENDMENTS

On page 17, line 18, strike out the words "each year".

On page 21, line 21, renumber paragraph "(5)" to "(3)", and renumber all succeeding paragraphs accordingly.

On page 21, line 22, after the word "year" add the following, "for which automatic entry is authorized,".

On page 22, line 14, strike out the words "either of" and the number "(2)".

On page 22, line 15, strike out the word "calendar", change "years" to "year", and after the word "year" insert the following: "for which automatic entry was authorized,".

On page 23, line 25, after the word "segments" insert a comma and the words "if any,".

On page 24, line 7, after the word "segments" insert a comma and the words "if any".

On page 24, lines 12 and 13, change "1983" to "1984".

On page 24, line 17, change the number "4" to "5."

On page 24, line 20, change "(9)" to "(7)".

On page 27, line 11, add the following new paragraph:

"(11) The automatic entry program established by this subsection shall terminate on June 30, 1985.".

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. McGOVERN. I yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that my name be added as a cosponsor of this amendment if agreeable with the sponsor.

Mr. McGOVERN. I am delighted to have the Senator as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GOLDWATER. Mr. President, this amendment has several good features:

First, it clearly makes automatic entry an experiment with a definite termination date of June 30, 1985.

Second, it will deter the CAB from heaping competition on routes by limiting automatic entry to those carriers who had no regular new authority exceeding 1,000 miles in the preceding 12 months.

Third, it prohibits entry where the average load factor in the preceding 6 months has averaged out to 55 percent or less.

While I am opposed to automatic entry on principle, I can live with a program that is experimental and carefully controlled.

Mr. McGOVERN. Mr. President, automatic market entry, when combined with fare flexibility, is considered the centerpiece of the Air Transportation Regulatory Reform Act, which is now before us. Proponents of this legislation claim these two provisions will bring significant downward pressure on rates which will in turn encourage carriers to tighten operations and rationalize their routes. Proponents further claim that management decisions are far preferable to those made by regulatory agencies that are entrusted with protecting the public's best interests. To date, proponents of S. 2493 have not been able to establish that this legislation will bring about the desired result of lower fares and better service. As stated by James Landry, general counsel to the Air Transport Association of America:

Nothing in the proposals comes to grips with the key elements going into the price of air transportation—the cost of providing the service. If deregulation occurred tomorrow: the price of jet fuel would not go down, skilled airline employees would not work for less, airport operators would not lower their landing fees. The only thing that would go down would be the availability of airline service.

Furthermore, proponents of this legislation argue that deregulation will not lead to increased domination of U.S. commercial air service by a few carriers. This argument is predicated on the assumption that beyond a relatively low threshold there is no advantage to size, and that vigorous competition by large carriers against the small carriers will not endanger the existence of the smaller carriers.

The comparatively unregulated, intrastate carrier experience initially formed the basis of the pleas for the regulatory reform we are presently considering.

Mr. President, I have noted in the RECORD over the last weeks that the State of California is cited as the star example of the wonderful things that happen when essentially unregulated carriers go into operation. Especially is the Pacific Southwest Airlines, PSA, cited as perhaps the star in the field of essentially unregulated airlines to indicate how such airlines improve the service for passengers, bring down the fares, and tighten the competition.

But I think before we accept that argument, Mr. President, it might be worthwhile to see what has happened in California with these essentially unregulated carriers.

In that State, over the past 20 years, 16 unregulated carriers entered the intrastate market. Fourteen of them have now exited. Most remained in service less than a year. The markets served were not based on public necessity and convenience. Those few markets that were served were served erratically and in a most unpredictable and undependable manner as witness the fact that 14 out of 16 went out of business, most of them in less than a year's time.

To take the commonly used example of a small carrier successfully facing vigorous head to head competition with larger certificated carriers, in other words, Pacific Southwest Airlines, PSA recently reported a net loss for the fourth quarter of 1977 in addition to a net loss a year earlier of $1.6 million. Additionally, the company is planning to file for an 8.3 percent rate increase, although it received a substantial rate increase only a few months ago. It is extraordinary that proponents of this legislation can call this example their success story on which to base their rationale for this mode of regulatory reform.

I might say also with reference to the services offered by several of these airlines, these essentially unregulated airlines that the proponents of the bill cite with such pride, that some of those airlines offer reduced services. They function largely with nonunion labor. They operate with less experienced personnel. Adequate safety standards have not been developed that are comparable to the other airlines. They are unable to write through tickets for the convenience of passengers. They cannot check baggage through on other airlines. The customer receives cash register receipts rather than tickets, and by and large——

Mr. CANNON. Mr. President, will the Senator yield?

Mr. McGOVERN. I yield.

Mr. CANNON. The Senator is not stating that as a matter of fact, is he, because of a number of statements that he just made are simply not true?

Mr. McGOVERN. I am stating it as a fact.

Mr. CANNON. I just want to be sure the Senator is representing that as a pure fact because I will be glad to point out what the law is and what is permitted under the regulations, and that is simply not the truth.

Mr. McGOVERN. The Senator is not challenging the fact that of the 16 unregulated carriers that have gone into business in California 14 of them are out of business and many of them operated less than 1 year?

Mr. CANNON. No; I am not challenging that at all. But the California market is strictly a regulated market, regulated by the California PUC.

Mr. McGOVERN. But not regulated by the CAB.

Mr. CANNON. Not regulated by the CAB; by the California PUC.

One of the reasons of the poor earnings of PSA is because the California Public Service Commission has refused to grant them an increase. Now, the losses that that company originally had were related to their outside activities. They went into the hotel business. They tried to expand in a lot of other areas of expertise that they were not experts in. But they were experts in providing the low-cost service.

If you go to Southwest, Southwest has the highest rate of earnings of nonregulated and nonCAB-regulated in the Texas market and has the highest rate of earnings of any carrier in the business.

The Senator made the statement that they do not have interlining provisions. That simply is not the fact. We changed the law. They do have interlining provisions. They have through-baggage checking provisions, and all of those have been changed in current law.

I do not know what the law the Senator is reading, but he is simply behind the times in making the statements that they do not have through ticketing, they cannot do through ticketing, they cannot do interlining, and so on. This is not factual.

Mr. McGOVERN. The essential point that I am trying to make here about these examples that have been cited as such proud cases is that with the possible exception of Texas, where they do seem to have a kind of a unique situation, the life of these carriers has been very short. The service has been erratic. They are operating with personnel that is younger and less experienced than the regular airlines. It is my strong feeling that the service is not comparable to what one receives on the regulated airlines.

Mr. CANNON. If the Senator will yield further, he certainly cannot say about PSA that their service has been erratic. The Senator made the statement earlier that they use nonunion help. PSA is completely unionized.

Mr. McGOVERN. That is not true. I said many of these intrastate carriers use nonunion labor. I did not say PSA is not unionized.

Mr. CANNON. Most of them are out of business, as the Senator said. He talked about 14 that are no longer in business. I do not know what. They do not have any employees let alone nonunion ones, I suppose. But PSA does and they are highly unionized. They are competitive in the market. The record shows in the hearings that the rates paid their crew people in many instances were higher than that of the trunk carriers.

So there is no problem here.

Mr. McGOVERN. If I am in error here I stand corrected on those particular aspects of it. But, on the whole, the point I am making here is one that I think can be substantiated.

At best, the automatic entry provision establishes an uncertainty regarding the future nature and quality of air service in this country. No concrete data currently exists to affirm positive, across-the-board effects of this legislation, while a variety of situations throughout the country give a strong indication of the havoc this proposal could create. This uncertainty is quite visible in the aircraft loan business.

Several business spokesmen have suggested many insurance companies will not continue in this business if the incalculable aspects of this legislation are realized. William McCurdy, who recently retired after 23 years with Equitable has stated that—

> Long term lenders are generally opposed to deregulation because it gives the CAB no incentive for keeping the industry financially healthy. Competition may eliminate many, many carriers, and no long term lender is going to lend until he is reasonably assured the airlines will survive and pay back their loans.

Consequently, given the uncertainties of the effect of this legislation on air transportation, we may discover, in addition to bankrupt smaller carriers and reduced service or service disruptions, that few companies will be willing to finance essential airline investments for innovative, efficient aircraft.

Another issue that has not been given adequate consideration is the effect of the automatic entry provision on our domestic energy situation. Several estimates show that automatic entry alone would require approximately 200 million additional barrels of aviation fuel annually, while the entire reform legislation will create a need for an additional billion gallons. Based on a price of 40 cents per gallon for imported fuel, reliance on that market for the extra requirement would add about $400 million to the wrong side of the U.S. trade balance, contributing to our worsening inflation situation.

The administration has stated that this legislation is an integral component of its anti-inflation program; however, in addition to increasing our trade deficit, statistics from the Department of Labor indicate that this legislation will have a marginal impact on inflation.

Therefore, the proposal I am asking you to consider and support is a more cautious and rational alternative to the automatic entry provision in the present legislation. The proposed automatic entry program would provide existing certificated carriers with the option to enter one new route each year for 2 years and two new routes every year thereafter, up to a maximum of 3,000 statute miles per year. My proposal establishes that during the calendar years 1979, 1981, and 1983, each eligible carrier may select one segment, not to exceed 3,000 statute miles in length; provided that the board small not grant such authority to any carrier which has received new route authority in excess of 1,000 cumulative statute miles during the 12-month period. immediately preceding the date for filing selections under this section.

No segment may be selected if the average load factor, during the 6-month period prior to selection, was less than 55 percent or if the segment has been designated by another carrier as being closed for that year to automatic entry. Additionally, each eligible carrier may, for each year in which automatic entry is authorized, designate a number of segments between which it provides scheduled nonstop service, as being closed to automatic entry as follows: for the year 1979, two such segments; for the year 1981, two such segments; for the year 1983, one such segment.

I believe that this alternative would be an adequate compromise between the massive uncertainties with which we are faced in the present language of the bill, while mandating controlled reform along the lines suggested by this legislation. By allowing air carriers to enter markets only where the average load factor is greater than 55 percent, we provide some additional protection to several established segments and to marginally profitable routes where several carriers could experience the greatest losses under the proposed automatic entry provision.

Mr. President, I hope that this amendment will be adopted and will be looked on favorably by the committee and the Senate as a whole.

I reserve the remainder of my time.

Mr. CANNON. I yield 10 minutes to the Senator from Arizona.

The PRESIDING OFFICER (Mr. (SASSER). The Senator from Arizona.

Mr. GOLDWATER. Mr. President, before us is a bill that is the product of some very hard work by the Committee on Commerce, Science and Transportation.

I must say, Mr. President, since I prepared these remarks there have been changes in the airline fare system. In fact, it is possible to fly from here to my hometown now and back, if you want to arrange your time from a Tuesday to a Tuesday, for $204, and if you want to do it on the weekend it is over $680.

There are still some inconsistencies and differences in costs, but the costs have been declining on the airlines since work was started on this bill a long time ago. In fact, it has been some months since I have ridden on an airplane that has not been completely filled.

The distinguished Senator from Nevada (Mr. CANNON), and now the committee's chairman, deserves great credit for having tried to achieve a consensus on this highly complex legislation. That total agreement proved impossible is no reflection on him, but rather it is a result of having to reconcile many conflicting claims, some of which are:

First. Consumer desires for lower air fares during a period of escalating costs, especially fuel.

Second. Varying financial conditions of the airlines and their ability to compete in a more open marketplace.

Third. Regional differences affecting access to the national air transportation system.

Fourth. Workers in the industry fearing a shakeout and a loss of jobs.

Fifth. Reluctance on the part of long-term lenders to provide capital during a period of financial uncertainty in the industry.

Sixth. Fears by smaller communities that the airlines will compete on the long-haul, dense routes and therefore, they will lose service.

These are some of the concerns that came into play during the markup of S. 2493.

It took a recordbreaking 20 markup sessions to produce a bill. I submit that is a pretty good indicator of the amount of disagreement or doubt on the part of the committee members.

Moreover, nearly half of the committee membership filed additional or minority views.

Before discussing the merits of the bill, I want to take up a matter that might be called, "false advertising." On April 11, the President addressed the American Society of Newspaper Editors on the subject of inflation. During the course of his speech, he made this statement and I quote:

> Failure of the Congress to act on the hospital cost containment legislation will cost the taxpayers of our country more than $18 billion in needless Government spending over the next five years. Together with the airline deregulation bill, this is one of the two most important measures Congress can pass to prevent inflation.

First, I hope the Senators will notice that the President was unable to give any dollar figures for saving through airline deregulation.

Second, I have checked with the Bureau of Labor Statistics and here is a figure that tells the story: If the airlines were to give away their tickets tomorrow—absolutely free—the cost of living would be reduced by .483 percent. That is less than one-half of 1 percent.

Clearly, slight reductions in air fares are not going to have much impact on the fight against inflation.

The bill before us has some good features—features that received strong support in committee. "Regulatory lag" had become the rule rather than the exception at the CAB. Our bill, combined with the efforts of Dr. Kahn, should go a long way to speed up decisions at the Board.

It is absolutely beyond the limit for an applicant to wait 6 years for a decision, and then be told the Board will not take action because the application is out of date. So, the need for reform of the CAB had strong support within the committee.

Some disagreement arose over automatic market entry and the so-called, "reverse P.C. & N." or reverse test of public necessity of convenience. The latter was deleted by the committee and the former was somewhat reduced in scope. With the CAB having adopted a very liberal policy toward new route authority, especially where lower fares are involved, I wonder whether or not any automatic entry is needed.

Automatic market entry is a very hard game to play. In its original form, the bill provided for a graduated scale of entry based upon carrier size. However, the proponents of deregulation argued that there were no economies of scale in airline operations. They pointed out that some of the smaller airlines are more profitable than the big five. Accordingly, it seemed ridiculous to turn a small, profitable airline into a big, less profitable airline.

On the other hand, and this was not fully developed during the hearing process, there is a vast difference in economic strength, say, between United Airlines and Continental, or between American and Braniff. Economic weight is important where one airline decides to enter a bread and butter route of another airline.

Service aside, there are only two ways airlines can compete under this bill and under the policies adopted by the board: fares and frequency.

Airline "a" is a big airline with excess aircraft at its disposal. Through relatively low utilization rates it shows a low return on investment. Airline "b" is small, but has the right equipment for its route structure and high utilization rates. It has a much better rate of return on investment. But, if airline "a" should decide to compete flat out with airline "b" the probable winner is airline "a" because, airline "a" will meet "b" on prices, but the difference will be in frequency of flights offered the public.

Here we come to the net effect of this bill combined with very liberal policies at the Board. The proponents say increased competition will lead to more and healthier airlines. I disagree.

In the short term, I believe there will be greater competition and lower fares. During that period the consumer will get a break on fares. But as the competition increases, load factors will go down unless the fares are priced below cost. Over the long haul, I submit there will be a shake out in the industry through mergers and bankruptcies leading to less competition, higher load factors and less frequencies.

If you believe there should be fewer airlines or that the industry needs a shake out; then this bill and the board's current policies are your meat.

We have the greatest airline system in the world. While there is always room for improvement, the Congress should be careful about tampering with a proven system.

Mr. President, I repeat, I have high respect for the courtesy and patience of the Senator who managed this bill, the Senator from Nevada (Mr. CANNON). The committee meetings were anything but harmonious at times. He was faced with the objections of airlines and other segments of the industry. Out of it came a bill which, although I do not believe even he will say it is perfect, is as nearly perfect as perfect can be, and I do not think the Senate will have much trouble in supporting it, even though there may be some amendments offered that will be of value.

I thank the chairman for his courtesy.

The PRESIDING OFFICER. Who yields time?

Mr. CANNON. I yield myself 10 minutes.

Mr. President, automatic market entry is the heart of this regulatory reform bill. Automatic entry, like entry generally, is very important from a public viewpoint, from the carriers' viewpoint, and from a regulatory reform viewpoint. Following weeks of markup and debate in the Commerce, Science, and Transportation Committee, a consensus developed that automatic entry, in some form, was the most critical ingredient in reforming the airline system.

Automatic entry is basically just what the name infers—entry into new markets automatically, without having to go through long, complicated, and expensive application procedures before the Civil Aeronautics Board to obtain their approval. Currently, the process of applying for new routes before the CAB is long and drawn out, giving an opponent of the route award, usually an incumbent carrier serving the route who does not want more competition, sufficient time to outspend and outlobby the applicant. Thus the incumbent carrier can try to fend off entry not by keeping fares low and service good, but by hiring lawyers at high fees to fight an entry application at the CAB. With an automatic entry provision carrying the threat of quick entry by a potential competitor, the only effective way to discourage entry in your market is to keep your customers satisfied. Potential entry is as important as new competitors to keep the public well-served. Management will make judgments based on the economics of the marketplace, and not the regulatory and political philosophies of the Board members, or the skillfulness of Washington attorneys.

The bill we present to you today provides that each air carrier would be able to enter one new route for the first 2 years, and two routes per year thereafter. Also, there are protective provisions which guard against excessive entry on the routes of the routes of the small carriers and which allow each carrier to protect its best markets for a transition period. The program will provide modest entry every year and the continuing threat of entry throughout the system. This threat of entry will serve as a policeman on fares and service.

The fears expressed about automatic entry have been refuted and shown to be without foundation. The notion that this proposal would authorize excessive competition is nonsense. During the 1960's, the Board as a matter of course awarded authority in many more markets than would be allowed under automatic entry. In 1970 alone, according to the CAB's annual report, the CAB conferred new authority in 113 specific city pairs or more than three times as many city pairs that can be entered under automatic entry in the first 2 years and

almost twice as many that can be entered every year thereafter.

The amount of expansion allowed under automatic entry is modest when viewed in terms of the whole airline system. In 1974, more than 2,000 segments were flown by certificated carriers. Assuming every carrier used all the automatic entry allowed under this bill, the total number of segments flown would increase less than 2 percent.

The people who have been involved in the debate over automatic entry all have made it clear that this provision is essential to regulatory reform. President Carter has said it. President Ford said it. Secretarys Brock Adams and Bill Coleman said it. Former CAB Chairman John Robson and current Chairman Fred Kahn said it. The Nation's Governors have said it. The Nation's county officials have said it. The State aviation officials have said it. Every economist under the Sun has said it. And yet, we still hear from a few of the airlines of the evils and horrors of automatic entry—talk of failing companies, employee layoffs, service cutbacks to small communities and the destruction of the national air transportation system. This is pure nonsense—language used by a segment of the industry whose view is that they want to be sheltered by Government regulators from the laws of the American economic system. I say look at the testimony from the experts. Listen to the Secretary of Transportation and all five members of the CAB. They are the experts and they say the airline charges are bunk.

If automatic market entry is a radical concept then we have been doing something wrong in this country for the last 200 years. This provision says company management may decide once a year where they want to sell their product, without government interference.

The automatic entry provisions are an integral part of the entire regulatory reform package. In combination with a significantly liberalized Board route program—including wholly new entry—based on a solid, unambiguous declaration of policy favoring competition in both service and price dimensions, a strong and realistic threat of new entry will create incentives for a market oriented price/quality equilibrium.

The pending amendment purports to reduce the number of entries under automatic market entry—but I will tell you what it really does: It eliminates automatic entry completely and defeats this legislation. Let me tell you how it does this.

First, the amendment allows only one route selection for automatic entry every other year for the first 5 years. This is an insufficient amount of entries to provide meaningful competition, and it encourages pricing increases during the years automatic entry is not available.

Second, the only air carriers that will be eligible for automatic entry are those which have not received in the preceding year new route authority in excess of 1,000 cumulative statute miles either under regular route proceedings under section 401(a)(1) or under the dormant authority provisions of the bill. In light of the CAB's liberal entry policies and the recent actions they have taken in granting new authority, it is virtually impossible that any carrier will qualify for this so-called automatic entry program.

If this were not enough, the amendment also restricts automatic entry to routes where the average load factor is less than 55 percent. While the intent may be to restrict automatic entry to high density routes only, the fact is that many routes have load factors below 55 percent because the fares are simply too high.

The experience of Southwest proved that fact completely. This is exactly the kind of route which is a prime target for automatic entry and one in which the program will do the most good to bring the fares down.

In addition, because the percentage figure is based on an average load factor of 55 percent for any one carrier, this means that on an otherwise high density route where three carriers have a 99-percent load factor and one carrier has a 54-percent load factor, no automatic market entry would be allowed on that sector. Fundamentally, the amendment purports to continue the program through 1985, but by its wording the program is finished in 1983. This makes no sense whatsoever.

This legislation is the means through which long overdue reform in air transportation will be achieved by introducing and maintaining a more competitive market-oriented environment.

What this amendment says is, "give the people a sheep in wolf's clothing." Proponents of this amendment have kept the name of automatic market entry, but wrote a provision with no such thing. If you want to take out the heart of this legislation, then accept this amendment, but do not fool yourself by calling this a compromise, for it is not. The amendment says no automatic market entry.

The Senator made much to do about PSA. I would like for the record to point out a few things. In every year except one, from 1966 to 1976, a 10-year period, PSA had a net profit on their airline only operating results. In that one year, 1975, it was because they had high lease costs of L–1011's. If we figured it without the writeoff for lease cost, they had a profit in that year. So they operated at a profit in their airline operating experience every year for a period of 10 years. It is true, as we pointed out, in one quarter last year they lost money.

The Senator also made a comment on the employee pay. I would like to comment on that. For example, for PSA 727 captains in 1975—this is pursuant to the Department of Transportation figures—PSA paid higher wages than many certificated carriers. Their pay was higher than American. It was higher than Continental. It was lower than United and lower than Western.

Cabin attendants: PSA was higher than American, higher than Continental, lower than United, and slightly lower than Western, $100 lower than Western.

On licensed mechanics, PSA was lower than American, higher than Continental, higher than United, and slightly lower than Western.

That gives an idea of how their employee pay compares. As I stated already, they are unionized. I am sorry he did not read the report and the testimony presented by PSA who, incidentally, support the legislation completely. Their testimony was presented in the hearings before the Subcommittee on Aviation on March 21, 22, 23, and 24, 1977.

Mr. President, I call on my colleagues to support honest regulatory reform and reject this amendment.

Mr. PEARSON. Mr. President, the amendment offered to the pending bill would suggest that the bill presents somewhat of a very radical approach in the automatic entry provision of the bill which provides that an airline may, without CAB authority, enter into a route structure already authorized for another airline.

There are three brakes or three restrictions or inhibitors upon running wild.

The first is for the first 2 years they may only enter into one segment and in the years 3 to 5, two segments.

The second restriction is that the segments may not total more than 3,000 statute miles.

The third restriction is the ability of any carrier to protect their routes. That protection is to the extent that for years 1 to 3 a carrier may protect three segments, in the 4th year two segments, and in the 5th year one segment.

Those are three very restrictive inhibitors upon the automatic entry procedure.

If we adopt this amendment, what we have done is almost cut out the automatic entry provision in the bill which, as the chairman says, is the very heart of it, together with the flexibility in the pricing.

If we restrict it to one every other year, which is what this amendment does, and to only those routes where there is an average load factor of under 55 percent, there is no automatic entry.

Most of the objection to this particular provision throughout the consideration in the committee was that it did not go far enough, that it was too restrictive.

Mr. President, I represent, as the chairman has, that this is a very modest proposal. I think the Chairman of the CAB in a letter dated April 14 addressed to every Member of the Senate indicated that when, in the third paragraph of this letter, he wrote:

> The drafters of S. 2493 have concluded that the change should be gradual; that the industry so long protected from real competition should be exposed to the rigors and the discipline of a free market slowly and carefully, so that it has time to adjust. I endorse that approach.

Mr. President, this is a modest proposal. Perhaps amendments will be offered to expand this, but it is the middle ground. This is the kind of an amendment which will give us some experience in the next 5 years which will establish the record and which will give us some guidance as to what we can really do in this particular area.

Mr. KENNEDY. Will the manager of the bill yield 5 minutes?

Mr. PEARSON. I yield 5 minutes.

Mr. KENNEDY. Mr. President, I strongly oppose the McGovern-Goldwater amendment for reasons which have been stated by the floor manager and the minority.

The PRESIDING OFFICER. The Senator from Kansas only has time on the bill. The Senator from Nevada has time on the amendment.

Mr. PEARSON. I yield time on the bill.

Mr. KENNEDY. Will the Senator yield 5 minutes on the amendment?

Mr. CANNON. I yield 5 minutes on the bill.

Mr. KENNEDY. Mr. President, first of all, we should put into perspective what we mean when we refer to the impact of automatic entry under the provisions of this legislation. The total amount of entry opportunities under this legislation represents 2 percent of the passenger routes in this country. That's all, 2 percent of all serviced routes will be certified for automatic entry. If we take the number of routes that are actually authorized to receive service, but in fact are not serviced, then the percentage drops to a minuscule one-half of 1 percent.

The Senator from South Dakota wants to cut that back even more. The key elements to this regulatory reform of the airline industry are to provide flexibility on fares and facilitate market entry. Market entry is facilitated by allowing carriers to automatically enter 2 percent of the serviced routes. The Senator from South Dakota and the Senator from Arizona want to reduce that. It is important at the outset that we understand the nature of the phased and gradual approach to a more competitive environment that is provided by this legislation. It does not shock the system and introduces competition in a very modest manner. Only 2 percent of the route decisions will be put in the hands of management.

The Senator from South Dakota and the Senator from Arizona are basically saying that the institutional bureaucracy and the Civil Aeronautics Board are better equipped to make entry decisions than management in a free and open competitive market. The Senator from South Dakota would restrain entry not only by drastically cutting back the number of routes selectable under automatic entry but would also limit the type of market enterable by closing off all those markets whose incumbent carriers had a load factor of 55 percent or less.

The Senator from South Dakota believes that markets with low load factors cannot support new service and a competitive entry will result in over service to the loss of all.

I would like to ask the Senator from South Dakota who these new, independent airlines are that will be able to come into this business and go to the banks and be able to borrow tens of millions of dollars for new planes to compete on a market with a load factor of less than 55 percent, unless they believe, and the banks believe, that they can raise that load factor and generate more traffic. Low load factors mean low profits. No sensible manager and no sensible bank will invest in a market unless it has a future. Low load factors often mean poor management and high fares. Is this the market, the expensive, inefficient market, that the Senator from South Dakota wants to protect?

The fundamental concept and philosophy of this legislation is to permit businessmen to do in practice what we believe, in theory, that to compete on the basis of price is of essential importance in our society. As the Senator from Nevada has pointed out, as a matter of practical experience in the intrastate lines, as a matter of current experience in the interstate lines, and implied in the bill in terms of the entry provisions, to be able to compete in price is to be able to protect the consumer.

A second point, Mr. President: The Senator from South Dakota does not even mention the protections that exist in the legislation with regard to predatory practice. Mentioned on page 80, line 23, "The Board may not"—I shall include the relevant parts in the RECORD, but effectively, it is "may not"—"determine any fare demanded" is too low unless the fare is "predatory." There are protections in this bill for predatory practices.

Mr. McGOVERN. Will the Senator yield on that one point?

Mr. KENNEDY. If I may just finish my thought on this, then I shall be glad to yield.

I say that there are provisions in section 18 that deal with that particular language. There are other sections relating to predatory practices. I am sure the floor manager considered that.

Another point is there is nothing in this bill that vitiates the antitrust laws. As the chairman of the Antitrust Committee, I say we have reviewed in careful detail the antitrust provisions and the predatory practice provisions in this legislation. We have testified on those provisions before the Commerce Committee and completely satisfied them in terms of the protections for predatory practices.

So, Mr. President, I think in the area of predatory pricing that the Senator from South Dakota mentions, there are adequate protections under this legislation, not only in this bill but in the existing interpretations of the antitrust laws.

I am glad to yield to the Senator.

Mr. McGOVERN. Just on that point, I wanted to call to the attention of the Senator what I did say about predatory pricing. He said I did not take note of the fact that there was some mention of that in the legislation before us. The Senator was not on the floor, but I made this point:

> S. 2493 does not permit "predatory" fare structures, but if the thrust of this bill, as it purports to be, is to encourage lower fares, then who can realistically determine what is an initial "bargain" to the consumer and what is "predatory" pricing ?

In order to do that, you have to assume that the CAB is going to be privy to decisions made by airline management; but of course, they are not privy to that information at all on that particular point.

The PRESIDING OFFICER (Mr. MOYNIHAN). The Senator's time has expired.

Mr. KENNEDY. May I have another 2 or 3 minutes to respond?

Mr. CANNON. I yield 3 minutes.

Mr. KENNEDY. Mr. President, on this particular provision, we are not changing the existing legislation. The Senator cannot come in and say that this particular threat, in terms of predatory practices, is going to be worse than the current law. I agree that it is an important area to consider. We are not adding additional threats by this legislation.

The next point that I would like to make, Mr. President, is, if we accept the McGovern amendment, what, effectively, we are saying is that once you get a route in the United States, all you have to do is go out and continue to raise the prices on that particular route until you get a little bit below a 55-percent load factor; then you are protected from the threat of competitive entry and other airlines are prohibited virtually from coming in and challenging. These are the very markets upon which competitive challenges should be made. The McGovern amendment works completely contrary to the whole spirit and the approach of this legislation.

The final point I would like to make, Mr. President, is that in the areas where the CAB has provided some new routing in the 55-percent range or less—and they have done so in several different areas—it has taken since 1969 for the Board finally to come to grips with those particular routes; that is for approximately 8 years that the industry has been effectively stifled from bringing some degree of competition in.

In the Miami-Los Angeles route, where the incumbent has less than 55 percent—48 percent—the CAB has provided an incentive for a new air carrier to come in. The result has been that the existing carrier has reduced fares by approximately 35 percent and the airlines are doing exceedingly well down there.

Mr. MELCHER. Will the Senator yield?

Mr. KENNEDY. If I may just finish this next point.

In my own home city of Boston, Pan Am is now providing transportation from Detroit to Boston at half the previous rates, even though there was a previously low load factor—only 19 percent. For the first time, they are beginning to show some profits on that particular route.

I say that practical experience shows that the McGovern amendment does not make sense. It runs completely contrary to the spirit and intent of this legislation.

Mr. President, we are trying to provide a little competition in this industry, with the automatic entry provision at 2 percent of the routes presently served. Mr. President, let us not reduce this meager door on 2 percent. There are many industries in my own State of Massachusetts—little corner drug stores, fishermen, all other kinds of little mom and pop stores—that would love

to have some protection from competitors. Why we are not willing to accept this minuscule 2 percent, Mr. President, is something that I cannot understand.

Mr. MELCHER. Will the Senator yield?

Mr. KENNEDY. I am glad to yield.

Mr. MELCHER. Would the Senator from Massachusetts like this better if the 55 percent were removed from it entirely? I do not think it is key to the amendment at all.

Mr. KENNEDY. My comments were on the basis of the amendment. I would say, first of all, it would be better than it is. But second, we are also dealing with the question of reducing the possibility for new routes. That is the part of the amendment I addressed my comment to.

The PRESIDING OFFICER. The Chair makes the comment that the Senator from Massachusetts has no time to yield.

Mr. MELCHER. Would the chairman, who has control of the time, yield me some off the bill?

Mr. McGOVERN. I yield the Senator such time as he needs.

Mr. MELCHER. I am asking the chairman, I say to the Senator. We have only 15 minutes left on this amendment. It is a major amendment. I am asking the chairman for some time.

Mr. CANNON. How much time does the Senator want?

Mr. MELCHER. Ten minutes.

Mr. CANNON. I yield 10 minutes to the Senator from Montana.

Mr. MELCHER. I repeat, this is a major amendment not to be lost in some sort of attack based on the amendment's destroying the bill. It does not do that. The 2-percent figure that the Senator from Massachusetts mentioned is his 2 percent. I do not know how it is documented. What we are trying to do in this amendment is protect the States that do not have an abundance of airline service but now have adequate airline service, to protect them so that they do not lose it.

If the 55-percent factor would bother anybody a great deal, I, for one, would be willing to remove it, because it is not the key to the amendment itself. What we are striving to do here is protect consumers, mind you, in some States that do not have a great number of people in them, western States in particular. My own State has adequate, decent airline service now. What we are afraid of in automatic entry is that in the rush of airlines to enter the dense markets, dragging off the airplanes and the personnel to service those dense markets through automatic entry, they will take away our service; they will take away some of our aircraft; they will take away some of the personnel that take care of those aircraft; and our service will be reduced.

What does an antitrust provision have to do with protecting the level of the service in a sparsely populated State? We are making no claim of having anything to do with this simple amendment on antitrust. We are only making a concerted effort here to have the automatic entry provision of this bill as it is presently formed reduced to a point to where there is some control over it by the Civil Aeronautics Board, mind you, to review what is going on after automatic entry starts, to make sure that States like ours in the West and other thinly populated States will retain a level of service that is comparable, at least comparable, to what we have now.

At this point, Mr. President, I yield back the remainder of the time that was allotted to me by the chairman.

Mr. KENNEDY. Will the Senator give me 3 minutes?

Mr. CANNON. Yes; I yield the Senator 3 minutes.

Mr. KENNEDY. Mr. President, there are 57,000 city-pairs in this country. If we take the number of airlines that could take advantage of the entry provisions, multiply that number by 2, then divide it into 57,000, we find that new entry may affect, at a maximum, one-half of 1 percent of all city-pairs federally regulated carriers now have the authority to serve. And if we take the 2,000 route segments that are now actually served, and perform the same calculations, we find the percentage to be 2 percent.

The Senator has not reached that factor. The interesting thing is that the special organizations which represent small communities, the Association of Counties, the National and State Aviation Officials, and many other groups, are no less interested in the service of small communities.

As the Senator from Nevada has commented, and others have testified, one-third of the small communities of this country have lost service in the last 15 years.

Protection exists in this legislation to insure it will not happen in the future.

Only 16 percent of the routes that have been granted to the airlines in this country are actually being serviced today. The rest have a lock on them, Mr. President.

The bill already has plenty of protection for the smaller communities. The amendment of the Senators from South Dakota and Arizona is a step backward in terms of competition and pricing and service under this legislation.

I hope the amendment will not be accepted.

Mr. McGOVERN. Mr. President, I yield myself 5 minutes.

Mr. President, first of all, I congratulate my friend, the Senator from Massachusetts, for being able to speak with as much passion for deregulation as he speaks with when he is for regulation, as we heard him speak here a few weeks ago when we were talking about natural gas.

I know the Senator made a most eloquent and forceful plea for the virtues of regulation of gas and I, of course, agree with him on that. But I regret he is on the other side of the issue.

Mr. KENNEDY. Will the Senator yield on that point?

Mr. McGOVERN. Yes.

Mr. KENNEDY. The position of the Senator from Massachusetts in areas of economic regulation is that I think there can be, and should be a substantial reduction of Federal presence. In the areas of health and safety, however, there has to be substantial continuing regulation. It seems to me whether people are going to be able to heat their homes is to a significant degree related to issues of health and safety.

Mr. McGOVERN. In any event, this is an issue that is not going to be resolved by oratory. It is not going to be resolved by magical and arbitrary formulas. There is nothing sacred about the formula that the committee has reported out to determine how fast we are going to move into the automatic entry field.

The amendment that the Senator from Arizona, the Senator from Montana, and I have offered here today does not foreclose the possibility of a reasonable experiment in the concept of automatic entry. But it is a new one, a new concept. It is one that has brought about great anxiety in the small cities and communities across this country that fear it is the beginning of a rush of airline service into the more lucrative, more heavily traveled markets, with the second-rate equipment left for the rest of the country.

So the purpose of this amendment is not to defeat that experiment, but to slow it down and to maintain the historic function of the CAB as an agency that evaluates the services of the airlines on the basis of public convenience and necessity, rather than opening the door too wide in one step to the kind of development that we fear will deprive many parts of the country of the kinds of service that we have today.

Mr. HATCH. Will the Senator yield for a unanimous-consent request?

Mr. McGOVERN. Yes, I yield.

Mr. HATCH. I thank the Senator.

Mr. President, I ask unanimous consent that Mr. A. Grey Nokes of my staff be granted privilege of the floor during the pendency of this matter and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that Chip Sorrell of my staff and Tim McPike of Senator DeConcini's staff be granted privilege of the floor during the debate and votes on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ZORINSKY. I thank the Senator from South Dakota.

Mr. McGOVERN. Mr. President, I emphasize again to the Senators on the floor—and I wish more were here because this is an important amendment that affects the air service in a great many parts of the country—that this amendment does not kill off the possibility of some experimentation with the so-called automatic entry feature that is in the committee bill.

I know the committee has done a great many worthwhile things in the legislation that is now before us. But some of us would like to vote for that legislation. We would like to be able to support it on final passage.

What we are pleading for here is simply a more modest approach that permits us to get some operating experience over the next few years with

the new concept of automatic entry and greater fare flexibility.

If, on the basis of that, we have dependable data on which to legislate, we could then move with greater confidence in the direction that the committee has suggested.

But about all we have to go on so far are the predictions of the proponents of this legislation that it is going to work, that they see some virtue in it, and no particular danger or threat to those sections of the country that we feel would be threatened by the legislation.

They cite for evidence simply the experience of the essentially nonregulated intrastate carriers. But as I pointed out here on the floor a while ago, that experience has not been that convincing.

I suggested earlier that of the 16 unregulated carriers that went into California in the last 20 years, 14 of them went out of service in a very short period of time, many of them in less than a year. They did not provide, in most cases, the kind of dependable service that one expects from air carriers.

I suggested to the Senate that many of the services were lacking.

I want to correct a misimpression that perhaps was given with regard to PSA when I said that the union, along with most of the others in the nonregulated field, employ nonunion labor.

The Senator from Nevada corrected me and said that PSA, at least, does have union labor.

Well, that is true only so far as the pilots are concerned. They are operating with nonunion airport labor. They are operating with nonunion service personnel. And that is generally true with many of these intrastate carriers.

They are also providing less service and, at the same time, are not showing the kind of profit picture that leads one to have much assurance for the future.

Even PSA, cited as such an outstanding example, suggested a loss of $1.6 million in the fourth quarter of 1977, and they are planning already for an 8.3 percent rate increase, even though they had one only a few months ago.

So, Mr. President, I do not see anything in the record of these nonregulated air carriers to convince me that on the basis of that alone we should take the kind of precipitate step that this legislation calls for.

I plead with Members of the Senate to conduct this experiment on a somewhat more modest basis until we know what the impact of it is going to be on many parts of the country that now fear it.

Mr. President, I reserve the remainder of my time.

Mr. MELCHER. Mr. President, I wonder whether I could reclaim some of the time the chairman yielded me from the bill.

Mr. CANNON. How much time does the Senator want?

Mr. MELCHER. Five minutes.

Mr. CANNON. I yield the Senator 5 minutes.

Mr. MELCHER. I thank the chairman.

Mr. President, the Senator from Massachusetts was kind enough to provide us with the basis for the 2-percent entry provision or his computation of the 2-percent entry, which of course is 2 percent per year. It was based on 57,000 city pairs in the United States. That is a lot of city pairs, and it includes such pairs as Helena to Missoula, Butte to Missoula, Lincoln to Wichita, Lincoln to Omaha, or Omaha to Sioux City, et cetera. You can go all down the list.

What we are talking about in automatic entry is not those kinds of city pairs. On the contrary, what we are talking about in automatic entry is from Chicago to Dallas, from Miami to New York, from New Orleans to Miami, from Los Angeles to Chicago, or from Los Angeles up the coast to Seattle, and so forth. That is what the carriers are talking about in automatic entry.

I will guarantee the Senate and everybody else in this country that when the airlines are talking about automatic entry, they are not talking about Bozeman to Missoula, or Butte to Great Falls in my State. The reverse of the coin is that if there is unlimited automatic entry of those dense markets, such as some of those I have mentioned, the larger cities, from one larger city to the other, may become too overdense with airline carriers, and the aircraft and the personnel have to come from somewhere. So they come from those States like my own; and with a city pair such as Helena to Missoula or Helena to Great Falls, all of a sudden it becomes a city pair which, instead of having two airplanes a day going east and two airplaces a day going west, will have one airplane going east and one airplane going west. There is nothing in this bill that protects against deterioration of that kind of service.

When we discuss this, it is important that people in the Senate understand it. What we are attempting to do in this amendment is not to strike the mild automatic entry that is in effect in the bill. What we are trying to do is to make it a little less drastic than it is. I grant that what is in the bill is mild compared to just having complete automatic entry. But the reason it is like that is that all the testimony on this bill went to the effect that automatic entry, if not restrained, would lead to chaos for the airline industry of this country, and I do not think there was any airline that really wanted complete automatic entry.

So it was reduced. It was made a limited automatic entry. We reviewed that very carefully, and we found the flaws in it, too—but it was still a little too much.

The amendment that is now before us puts it down another notch and says, "Let's go ahead with some of it. Let's have it reviewed. Let's have some restraint on it. If it works, fine."

We must have some protection for these States that do have service now, with thin populations, which will not attract any increased airline service on the basis of automatic entry, but we must retain what we have in place now. I think it is a very necessary and worthwhile amendment, and I hope it will be accepted.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. MELCHER. I do not control the time.

Mr. CANNON. Mr. President, I should like to respond.

The Senator said he hoped the amendment would be accepted. I presume he was not in the Chamber when I made my speech against the amendment. I thought I left it quite certain that the amendment was not acceptable and would not be accepted, because it would destroy the whole bill. We are just wasting our time, if we are going to accept this amendment and try to go ahead with any bill.

Mr. PEARSON. Mr. President, I yield 4 minutes on the bill to the Senator from Illinois.

Mr. PERCY. Mr. President, I am very proud and pleased to be a cosponsor of this bill.

I commend Senator CANNON and Senator PEARSON for the outstanding work they have done. I became a cosponsor before the addition of the so-called labor protection provisions, and I want to indicate to my distinguished colleagues that I am more inclined to support the approach being taken by the distinguished Senator from Nebraska (Mr. ZORINSKY), which I think will take care of this problem in a way that I would rather see as a precedent; because we have a long line of problems if we go into deregulation, as I hope we will, and there will be adjustments and changes. I think it would be very unwise for the Federal Government to assume a degree of financial responsibility.

Mr. President, at this time I should like to comment on the amendment offered by Senator MCGOVERN, No. 1789.

Though I have worked very closely with my distinguished colleague on a number of matters in the past, in my judgment this amendment would seriously cripple, if not kill, the intent of the automatic market entry provisions of S. 2493.

First, it is based on the premise that some airlines might attempt to penetrate lucrative routes between major cities, thus diluting the load factors and profitability along the route. Although some airlines may see new opportunities in underserved markets, it is doubtful that many would want to go head-to-head in a highly competitive market, knowing moneys would be lost. I know at least one instance where an airline attempted to crack two lucrative markets and failed. United Airlines has been a supporter of deregulation. I was closely associated at the time with Pat Patterson, chairman of the board and chief executive officer of United Airlines, when it merged with Capital Airlines. United picked up nonstop routes out of Atlanta to both Washington and New York City. Despite the great efficiency of this airline and their demonstrated competence as the largest domestic airline in the United States, in this case they were unsuccessful in attempting to compete against Delta and Eastern, and United eventually withdrew, simply because of market factors.

Although it is possible, it seems doubtful that a new carrier would want to

enter the highly competitive Chicago to Los Angeles market where four airlines compete, or New York to Miami where three aggressive airlines compete. Rather, it is far more likely that, under automatic market entry, carriers would offer new nonstop service to cities that do not have it. For instance, United wishes to provide new nonstop service between San Diego and Cleveland and Buffalo and Los Angeles, while Hughes AirWest, wants to add new nonstop service from Louisville and Nashville to Los Angeles. Western Airlines has indicated its desire to offer new nonstop service out of Philadelphia. I would also like to address another provision of Senator McGOVERN's amendment. That provision, in essence, does not permit automatic market entry if the existing carriers on the route in question have average load factors less than 55 percent. In my opinion, this provision fails to come to grips with the casual factors which bring about low load factors. In many markets, low load factors are themselves due to high fares. Thus, when Texas International introduced its highly successful "Peanut Fares" in February 1977, load factors went soaring. Generally speaking, Texas International selected those flights with low load factors and cut fares by 50 percent. Some flights were in the middle of the day, some at night, and some in the morning. There were no other restrictions.

Here are some dramatic examples of how load factors have increased:

Between Los Angeles and Albuquerque they went up from 27.7 percent before the peanut fare to 83.1 percent. From Salt Lake City to Denver, load factors climbed from 26.8 percent to 81.1 percent and from New Orleans to Houston, from 32.4 percent to 74.5 percent.

Meanwhile, Texas International's financial return on those flights went up from a $108,000 loss to a $1.8 million profit. Significantly, most of the new passengers were not diverted from other carriers, but were citizens who either drove energy-inefficient automobiles or stayed at home.

Under the McGovern amendment, there would be no incentive to offer these discount fares that can, as seen, result in significantly higher load factors. If it were to pass, carriers might want to keep fares artificially high because they would know that, with lower load factors, they could keep the competition out.

Mr. President, I ask unanimous consent to have printed in the RECORD a copy of a statement I made commending Chairman Kahn for his decision yesterday to reactivate and introduce low fares into Midway Airport and do so expeditiously.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MIDWAY AIRPORT DECISION BY THE CIVIL AERONAUTICS BOARD

Tuesday's momentous decision by the CAB to permit low-fare flights out of Midway Airport will mean that Chicago-area residents will be able to fly throughout the Midwest at substantially reduced prices from a revitalized Midway. Not only will air passengers stand to benefit from improved service at lower fares, but the expansion of Midway will mean jobs, expanded services, and new economic opportunities for many of the hard-pressed communities surrounding Midway.

By early next year, I believe that we can expect Midway and all of downtown Chicago to begin experiencing the benefits of today's decision. I applaud CAB Chairman Alfred Kahn for adopting the extraordinary procedures which I earlier suggested in order to expedite approval of this new low-fare service out of Midway. For once, the bureaucracy in Washington has responded in a timely and judicious manner to the real needs of its citizens.

Mr. PERCY. Mr. President, I ask unanimous consent that Howard S. Marks and David Carol of my staff be accorded Senate floor privileges during all consideration of S. 2493, "The Air Transportation Regulatory Reform Act of 1978," including during any votes that may occur on amendments and on final passage.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Nevada.

Mr. CANNON. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CANNON. Mr. President, what is the time situation on the amendment?

The PRESIDING OFFICER. The Senator from South Dakota has 8 minutes on the amendment and the Senator from Nevada has 2 minutes.

Mr. CANNON. I thank the Senator.

I withhold my time.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. Mr. President, will the Senator from Kansas yield me 1 minute on the bill?

Mr. PEARSON. Mr. President, I yield the Senator from New Mexico 1 minute on the bill.

Mr. SCHMITT. Mr. President, I conducted my debate on the rate in which we entered automatic entry in this measure in committee. I think the committee compromise is an adequate compromise. It is particularly adequate in the light of what I know is the committee's intention to exercise oversight over the rate of entry to see whether or not there is, in fact, any serious harm done to the industry, to the consumer, or to our constituents.

I urge my colleagues to support the bill and to defeat the McGovern amendment.

I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. CANNON. Mr. President, I am willing to yield back my time.

Mr. McGOVERN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. STONE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STONE. Mr. President, I ask unanimous consent that Pam Weller, of my staff, be accorded the privilege of the floor during consideration and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so orderd.

Mr. SCHMITT. Mr. President, I ask unanimous consent that Marc Stinberg, of Senator GRIFFIN's staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PEARSON. Mr. President, I ask unanimous consent that Bob Hepler, of the staff of the Senator from Pennsylvania (Mr. HEINZ), be granted the privilege of the floor and in behalf of Senator BARTLETT that Tom Wizenger be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I ask unanimous consent that Charles Wood, of my staff, be granted the privilege of the floor during consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McGOVERN. Mr. President, I yield 5 minutes to the Senator from Montana, Senator MELCHER.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, throughout the long course of hearings and the unprecedented period of markup of the airline deregulation bill in the Commerce Committee, it became abundantly clear to me, that no one could predict the effects of automatic market-entry of the magnitude proposed in S. 2493 on the air transportation system of the United States.

On two occasions during the hearings and markup of this bill, the Chairman of the Civil Aeronautics Board responded to my inquiries that he was unable to assess the impact of automatic entry as proposed in this bill on the current air transportation system and that there was no way to predict the results which automatic entry would produce.

On July 12 of last year in commenting on the Commerce Committee draft of the bill, the Board stated—

That it has analyzed over the past two years various approaches to discretionary entry by the incumbent carriers into new markets, but has not been able to predict the ultimate impact of such programs.

Now, Mr. President, if the Board with its expertise, cannot predict the results of programs of the magnitude as proposed in this bill, it obviously becomes difficult for those of us with prime responsibility for the legislation to exercise reasoned judgment on any program other than a limited experimental new market entry authorization as contained in Amendment No. 1788 which I and the cosponsors have proposed.

In recent testimony before the House Aviation Subcommittee, Chairman Kahn was again candid in admitting that automatic entry would lead us to uncertain consequences.

To open up automatic market entry to the extent proposed in the present language of S. 2493 would result in un-

needed services and excess capacity in high-density, medium and long-haul markets and the resulting decrease in service to smaller markets and pressures for fare increases.

The amendment we propose reflects the fact that no one can predict the effects of automatic market entry on the air transportation system, therefore, the very limited entry program in the amendment will best serve the interests of the airlines and the consumers.

I believe that if Congress is to support this kind of legislated experimentation, it should be more limited at the outset than the market entry proposed in the bill now being considered and that the program should be under the continuing control and scrutiny of an expert body, which is the Civil Aeronautics Board.

Mr. President, it is my opinion that the result of an expedited automatic entry program such as proposed in the bill before us would be to quickly destroy the progress made by the Civil Aeronautics Board during the past 25 years in its effort to strengthen smaller carriers so as to reduce the imbalance in size which has existed between the largest four or five carriers and the remaining smaller carriers in the industry.

The limited experimental new market entry program we are proposing is a more modest and cautious approach to the automatic entry provision in the present legislation.

The amendment will allow carriers without any discrimination to select one non-stop city pair not to exceed 3,000 statute miles every other year beginning in 1979 and would terminate in 1985 while providing the necessary scrutiny of its consequences by the Congress and the Civil Aeronautics Board.

The amendment also authorizes each carrier to designate two markets the first year, two markets the second year, and one market segment in the third year which are closed to automatic entry by other carriers.

Therefore, Mr. President, the proposal I am asking the Senate to consider and support is the limited automatic entry provision of this amendment, as any entry of greater magnitude could very well cause an abrupt and damaging change in our national air transportation system. A system which has successfully developed for the past 40 years of economic regulation under the Civil Aeronautics Board.

I think we ought to accept it. I do not see any sign of a destroying intent of this bill. Rather I see it as straightening out this bill so that we have the opportunity, in States that have a lot of airline miles but very few people, to provide passengers to make sure that their service remains intact and at the same level.

In closing my remarks, Mr. President, I want to point out that this amendment is considered to be preferable to the automatic entry provision of S. 2493 by all of the airline labor unions and considered to be preferable to all but a few—very few—of the scheduled airlines.

The PRESIDING OFFICER. Who yields time?

Mr. McGOVERN. Mr. President, if the Senator from Nevada is prepared to yield back the remainder of the time, I will yield back my time.

Mr. CANNON. I yield back my time.

The PRESIDING OFFICER. All time being yielded back, the question is on agreeing to the amendment of the Senator from South Dakota. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

On this vote, the Senator from New Jersey (Mr. CASE) is paired with the Senator from Oregon (Mr. PACKWOOD). If present and voting, the Senator from New Jersey would vote "yea" and the Senator from Oregon would vote "nay."

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 21, nays 72, as follows:

[Rollcall Vote No. 120 Leg.]

YEAS—21

| Griffin | | |

So Mr. MCGOVERN's amendment No. 1789 was rejected..

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PEARSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Florida.

Mr. STONE. Mr. President, I have a series of questions I would like to ask the chairman of the committee.

Mr. BUMPERS. Will the Senator yield for a unanimous-consent request?

Mr. STONE. I yield.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Martha Jones, of my staff, be granted the privilege of the floor during the consideration of the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Will the Senator yield for another unanimous-consent request?

Mr. STONE. I yield.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Miss Henderson and Mr. Jeff Stone, of my staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Will the Senate please be in order?

Mr. GLENN. Mr. President, I make the same request for Walter Nolan, of my staff, to be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, will the Senator yield for a further unanimous-consent request?

Mr. STONE. I yield.

Mr. CHILES. Mr. President, I ask unanimous consent that Dee Woodberry, of my staff, be granted the privileges of the floor during the consideration of the pending bill.

Mr. LUGAR. Mr. President, I make the same request for Mr. Mark Lubber, of my staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Florida.

Mr. STONE. Mr. President, I will say to the distinguished chairman of the committee, the Senator from Nevada, that I have had inquiries from several small airlines in Florida about the dormant authority provision of this bill. A number of airlines, such as Air Sunshine, which serves Key West, serve as replacement carriers under a suspension-replacement agreement for a CAB certificated carrier on a route which the certificated carrier has authority to serve but does not serve.

My first question is: Would the route which is served by the replacement carrier be subject to the dormant authority provision of this bill?

Mr. CANNON. No, it will not be, I say to my colleague.

Mr. STONE. I thank the chairman. In other words, it would not be subject to the dormant authority provision of the bill because the route is not being served by the carrier that holds authority from the CAB to serve?

Mr. CANNON. That is correct.

Mr. STONE. Second, if a replacement carrier were to opt to turn in its CAB——

The PRESIDING OFFICER (Mr. CULVER). Will the Senator suspend? The Senate is not in order.

The Senator from Florida.

Mr. STONE. I thank the Chair.

To repeat the second question: If the replacement carrier were to opt to turn in its CAB exemption and operate solely under the authority of the State Public

Service Commission, would the carrier still be able to enter a suspension-replacement agreement with a CAB certificated carrier without subjecting the route so served to the dormant authority provisions of the bill?

Mr. CANNON. Yes; it would.

Mr. STONE. I thank the chairman. I have several more questions.

Mr. President, I would like to clarify the language in the Federal preemption section of the bill. With regard to part 298 carriers, exempt carriers, is it true that, in the first place, if they retain their exempt status, Federal law preempts State regulation over them?

Mr. CANNON. The answer is yes to that question.

Mr. STONE. I thank the chairman.

Second, if they give up their exempt status, so that they are certificated only by the State, State regulation prevails regardless of how much the carrier's revenue is derived from interline passengers?

Mr. CANNON. Yes, that is true, so long as they operate only within the borders of that State.

Mr. STONE. I thank the chairman.

A final question: For intrastate carriers over which the States retain authority, is it true that the interline passengers are not counted in determining "revenues from interstate operations," and that only revenues from passengers flown by the carrier on an interstate route would be figured into the calculation?

Mr. CANNON. The answer is "Yes."

Mr. STONE. I thank the chairman so much for his replies.

Mr. BUMPERS. Will the Senator from Nevada yield enough time for me to ask a couple of questions?

Mr. CANNON. The Senator from South Dakota was prepared to call up an amendment.

Mr. McGOVERN. I will withhold calling up the amendment.

Mr. CANNON. I yield.

Mr. BUMPERS. As I understand the provisions of this bill, it would phase out over a 7-year period the current system of subsidies based on mail and establish a program based on community need. Is that correct?

Mr. CANNON. The Senator is correct. The subsidy system as it is now, will be phased out and it will be replaced by one which focuses on the needs of a community. It will be provided to the carrier based on the community need.

Mr. BUMPERS. Is there any formula in the bill, or does the Chairman have some suggestions as to how the subsidy would work? It is my understanding that commuter lines are likely to be the principal beneficiaries of the new subsidy. Is that a fair statement?

Mr. CANNON. The Senator is correct. Those are the carriers who are likely to be the beneficiaries of the subsidy.

Mr. BUMPERS. How much did the U.S. Government subsidize the airlines last year?

Mr. CANNON. About $70 million.

Mr. BUMPERS. What does the committee contemplate would be the subsidy for 1979, as it would be applied under this bill?

Mr. CANNON. The contemplation for 1979 is at about that same level.

Mr. BUMPERS. The formula would be changed to emphasize community needs, and it would not be based on some of the other criteria which have been used. Is that correct?

Mr. CANNON. They would be able to provide additional service to the small communities for about that same amount of money by having it go to the communities based on the community needs. I am referrring only to 1979. As the subsidy system phases down, it is anticipated that the total subsidy level required would be less than the amount that is required at the present time.

Mr. BUMPERS. I like the whole concept becaues commuter airlines will be unregulated and can operate at times they deem to be economically feasible and still be eligible for the subsidy, simply based on the needs of the community. Is that correct?

Mr. CANNON. The Senator is correct. Of course the commuters receiving subsidy will be required to provide a minimum level of service. Beyond that, however, they will be free to operate however they wish. Based on the experience of many commuters, they will be providing better service to a lot of these small communities than the communities now get because they are providing it at a time and frequency level that the communities would like to have, or at least the people who live there would like to have.

Mr. BUMPERS. I thank the Chairman.

Mr. MAGNUSON. Will the Senator yield?

The PRESIDING OFFICER. The Senate will be in order.

Mr. CANNON. Yes, I yield.

The PRESIDING OFFICER. Will the Senator withhold? The Senate is not in order. The Senate will be in order before we continue.

Mr. MAGNUSON. It is not so much what the communities would like to have but what seems to be reasonable and desirable for the community. Most communities always want more air service than they need, but it would still take care of the question of the Senator from Arkansas.

Mr. CANNON. Yes. The chances are that under this system the communities would get better service than they are presently getting.

Mr. MAGNUSON. They would analyze it and see what would be reasonable service.

Mr. CANNON. That is correct.

Mr. HATCH. Will the Senator yield for a unanimous-consent request?

Mr. McGOVERN. I yield.

The PRESIDING OFFICER. The Senate will be in order. Conversations will be suspended before we continue.

Mr. HATCH. Mr. President, I ask unanimous consent that Mr. William R. Healy, of the staff of Senator Hansen, be granted the privileges of the floor during the pendency of this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Dakota is recognized.

The Senate will be in order.

Mr. HATCH. Also, Ernie Garcia and Steve Catrell, of the staff of Senator DOLE.

The PRESIDING OFFICER. Without objection, it is so ordered. If we get much more staff in here, let us keep it quiet.

The Senator from South Dakota.

AMENDMENT NO. 1784

Mr. McGOVERN. Mr. President, I call up my amendment No. 1784 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN) proposes an amendment numbered 1784.

Mr. McGOVERN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 57, between lines 17 and 18, insert the following:

(D) For the purpose of this subsection, service by another eligible air carrier shall not be considered as a substitute for any essential air transportation unless—

(i) at points in such service boarding 10 passengers or less per day, the substitute carrier's service does not reduce total seat capacity by more than 25 per centum;

(ii) at points boarding more than 10 passengers, but less than 20 passengers per day, the substitute carrier's service does not reduce total seat capacity by more than 15 per centum; and

(iii) at points boarding more than 20 passengers a day, the substitute carrier's service does not reduce total seat capacity by more than 5 per centum.

For the purpose of this subparagraph total seat capacity shall be determined on the basis of service provided at a point during the one-year period preceding the proposed substitution.

Mr. McGOVERN. Mr. President, I yield myself such time as I may take. I do not think it will take much time to explain this amendment. It is one of two amendments being offered that are designed to protect the service in smaller communities and is not nearly so complicated a concept as the amendment we have just been debating. The purpose of that one was also to give protection to our smaller communities and the consumers that live in those parts of the country, but I recognize that this is a highly technical subject and somewhat difficult for Senators, especially when they are not on the floor, to follow. The amendment that I now address and the one to follow are very simple modifications in the legislation now before us which are designed to insure that if there are carriers taken off the smaller lines serving the smaller communities, a comparable service will be provided.

The CAB and other proponents of this legislation have claimed that, under the terms of the bill, small community air service subsidies can be sharply reduced. At the same time, they argue, service will be improved as local service airlines would be replaced by commuter carriers. Of course, the whole question here, Mr. President, is what the quality of those commuter planes will be, what their capacity is and their capability of replac-

ing the service that is lost by the former carriers. I have seen no accurate estimates, frankly, of the total cost of this new subsidy program. We are told that it is supposed to be a saving over the present subsidies, but what will it cost? It means startup equipment and facility acquisition problems. To meet the early operational costs of local carriers, some of the estimates that I have seen indicated that the proposed subsidy program in the committee bill could cost three times what the present programs require, somewhere in the neighborhood of $100 million.

In a sense, the rural and smalltown sections of the country will be paying more in the way of taxes for less service. Those communities which have working relationships with existing regional carriers that are partially subsidized under the present program will not be able to continue that partnership under this legislation unless it is modified in some fashion. Instead, they will be forced to accept some unknown, untried new carrier. As service deteriorates, as I think it is quite probable that it will, and passenger boardings decline, then the CAB may ultimately determine that air transportation is not essential to a given point and the air service will cease. We have seen that happen in the railway experience and this bill could establish the framework for the same thing to happen with the airlines' commuter service.

I can see, Mr. President, that some of the points made in the local air service section of this bill are necessary and some, perhaps, are long overdue. But there is still a need to assure adequate replacement service to communities under this legislation. We have to be able to assure them high quality, efficient, safe air travel. I think the two amendments that I have to this section of the legislation will assure those goals.

In the existing language of the bill, in order to maintain essential air service to communities, the board may allow commuter air carriers to assume the routes abandoned by major trunk carriers. As I have said, this could downgrade service to small communities, reduce the seat capacity, and generate financial problems to communities which have made substantial long-term investments in their airport facilities in order to accommodate larger aircraft.

Consequently, the amendment that I now have pending at the desk, No. 1784, states that no carrier will be allowed to withdraw from any point where the carrier is the sole certified carrier unless substitute service can be provided without significantly reducing the seat capacity based on the number of passengers served per day from that point. That does not mean that another type of aircraft could not be substituted, but it does retain the requirement that adequate seating capacity be preserved. Frankly, in some cases, this will not allow substitute service in the form of commuter carriers, but would alleviate many of the problems that would have been created. I think the intention of the amendment is clear, and I very much hope that the Senate will see fit to adopt it to protect these less heavily populated sectors of the country.

Mr. President, I reserve the remainder of my time.

Mr. CANNON. Mr. President, I yield 30 seconds to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas is recognized.

The Senate will be in order. If Senators find it necessary and desirable to continue conversations with staff members who are seated next to them, would they kindly retire to the cloakroom or somewhere else so that we can have a climate in here where Members can hear the statements of the Senators who are seeking recognition and who are, in fact, trying to speak over this continual din?

The Senator from Texas is recognized.

Mr. TOWER. Mr. President, I ask unanimous consent that Mr. Allen Balch of my staff be granted the privilege of the floor during debate on S. 2493 and amendments thereto and during votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, I yield myself 5 minutes.

This amendment would help perpetuate a system of air transportation to small communities which is characterized by excess capacity, poorly timed service, high prices, and enormous subsidy bills. I vigorously oppose it.

No part of this bill has been as carefully scrutinized as the small community section. We have for the first time in history absolutely guaranteed service to small communities. We have also provided that the local communities will play an integral part in deciding the quality of service to be received.

The key to the whole program is to obtain the quality and quantity of service which best meets the unique needs of each community. Restrictions like those proposed here would limit greatly the ability of the Board and the community to design such patterns of service.

I may say, the Senator says he is concerned about the local communities. The provision in the bill has the support of the National Association of State Aviation Officials, the Airport Operators Council, and the National Association of Counties insofar as this particular provision is concerned.

Should the Senate sit here and arbitrarily set for perpetuity a minimum number of seats to be provided in each market? It just does not make sense. We have in this bill given clear directions to the CAB to maintain a comprehensive and convenient system of continuous scheduled airline service for small communities and isolated areas. We have given them the tools to do it with. We have told them to go out to each community and sit down with the local people to agree on a pattern of service.

Let us not tie their hands. In many cases, this amendment would force the CAB to chose between maintaining existing service patterns—which are often very poor—or, if going to a more suitable aircraft, having to order more flights each day than there are passengers flying to or from the community.

Mr. President, the staff of the board has given me some examples of the application of this amendment. Here is one:

Blythe, California, is now served by Hughes Air West with 40-seat airplanes. In order to comply with the McGovern amendment, a replacement carrier would have to offer nine trips a day to and from Blythe, assuming a reasonably sized commuter aircraft. In 1977, approximately five people per day were enplaned at Blythe. This means that under the McGovern amendment, nine flights a day would serve Blythe in order to pick up five passengers.

Mr. President, who could possibly benefit either from a policy which maintains the status quo or a policy which requires a lot of empty planes to be flying around? Certainly, not the traveling public. Certainly not the local communities. Most certainly, not the taxpayers who would support this to the extent of an increase, a 25 percent increase, in subsidy.

Mr. PEARSON. Will the Senator yield me 1 minute?

Mr. CANNON. Yes.

Mr. PEARSON. Mr. President, I think the bill actually does what the Senator from South Dakota seeks to do. This bill provides that after the 7-year subsidy period is phased out, service is guaranteed for 10 years.

I can appreciate his concern to keep the level of service at a high level for the local communities. But what has really happened is that the local service carriers in area after area, or region after region, have gone in where they have served small communities and then, as time progresses, and new equipment comes on, they upgrade their equipment and, all of a sudden, do not have the small, two-engine planes any more, they have jets coming in.

All of a sudden, we have larger planes, more expensive to operate. They come into the small communities and simply cannot understand that sort of service with that kind of cost, and all of a sudden, they are pulling out.

The Senator says we do not have to have the same equipment, but we have to have the same number of seats, which is tantamount to the same thing.

So I think we have adequate service here, adequate protection, in the community service section of this particular bill. I think the bill does precisely what concerns the Senator from South Dakota.

Mr. SCHMITT. If the Senator will yield me 1 minute, I join with my two colleagues (Mr. CANNON and Mr. PEARSON) to oppose this amendment.

I think it is clear, as I said in my opening statement, that the small communities not only have been considered and are, in fact, protected by this legislation, but that all those individuals we have contacted who are specifically concerned with airline service to small communities agree with that statement.

I would refer my colleagues to the opening statement where we quoted several letters from people concerned with small community activities in air transportation.

If the Senator will yield me 1 more minute, I would also illustrate that in the case of New Mexico we have seen for many years exactly what the problem

has been with large aircraft serving too small a community. It is a continuing problem. It is a problem that is with us right now, one where carriers find that they just economically cannot serve three medium-sized cities in New Mexico. They want very much to get out of that market.

At the same time, I think it is safe to say they realize the difficulty they are putting those cities into.

Under this bill, we provide options that literally do not exist today and encourage options to develop that, as Mr. Nammeck has said, as I quoted him in my opening remarks, will provide better, more frequent, less expensive service to communities of this kind.

So I urge my colleagues to support the committee position on this bill and defeat the amendment.

Mr. McGOVERN. Mr. President, I yield myself such time as I may require.

Mr. President, just to respond briefly to the observation made by the distinguished manager of the bill (Mr. CANNON), the amendment that I am offering here is not really as rigid as the Senator apparently believes.

When we talk about avoiding a significant reduction in the seating capacity, that is not an absolute formula that goes to the kind of rigid situation the Senator describes.

The amendment is so brief that I think it would be worth the time of the Senate if I could just read what it says:

(D) For the purpose of this subsection, service by another eligible air carrier shall not be considered as a substitute for any essential air transportation unless—

(i) at points in such service boarding 10 passengers or less per day, the substitute carrier's service does not reduce total seat capacity by more than 25 per centum;

So it does allow for some reasonable reduction.

(ii) at points boarding more than 10 passengers, but less than 20 passengers per day, the substitute carrier's service does not reduce total seat capacity by more than 15 per centum; and

(iii) at points boarding more than 20 passengers a day the substitute carrier's service does not reduce total seat capacity by more than 5 per centum.

I think, Mr. President, this is a reasonable amendment. It does allow some flexibility, but at the same time it gives a measure of protection to communities that otherwise may take a very sharp cut in the quality and capability of their service.

Beyond that, I question very much whether the cost of the committee bill as they described it here, to replace the existing subsidized operation, is going to be as reasonable as we have been led to believe.

I repeat what I said here earlier, that the new subsidy proposed in the committee bill could very well run as much as three times the cost of the present program.

I hope, at the very least, that this amendment, modest as it is, will be accepted. It gives some measure of protection to these small communities.

Mr. CANNON. Mr. President, I am prepared to yield back the remainder of my time.

Mr. McGOVERN. Mr. President, I yield back the remainder of my time.

Mr. CANNON. Mr. President, I move to table the amendment.

Mr. McGOVERN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from South Dakota (Mr. McGOVERN). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), and the Senator from New Hampshire (Mr. McINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Virginia (Mr. SCOTT) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from Oregon (Mr. PACKWOOD) would each vote "yea."

The result was announced—yeas 80, nays 12, as follows:

[Rollcall Vote No. 121 Leg.]

YEAS—80

| | | |
|---|---|---|
| Allen | Ford | Nelson |
| Baker | Garn | Nunn |
| Bartlett | Glenn | Pearson |

| Abourezk | Hatfield, Mark O. | McIntyre |
| Case | Mathias | Packwood |
| Haskell | | Scott |

So the motion to table Mr. McGOVERN's amendment (No. 1784) was agreed to.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. McGOVERN. Mr. President, in view of the vote on the last amendment, and also on the previous amendment, I think it is quite clear that the Senate does not feel that any additional assurance is needed to the smaller communities as far as air service is concerned and apparently the overwhelming majority are convinced that the bill, without amendment, will give all the protection that is needed to our smaller communities.

I, of course, disagree with that verdict, but I recognize that the votes have been overwhelming in the other direction, so I will not call up the second amendment that I had referred to earlier, amendment 1785.

I wish to call attention to another amendment which will be my final proposed amendment this afternoon.

The PRESIDING OFFICER. The Senate will be in order.

AMENDMENT NO. 1783

(Purpose: To make certain amendments to improve air transportation to small communities)

Mr. McGOVERN. I call up my amendment No. 1783 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. McGOVERN) proposes an amendment numbered 1783.

Mr. McGOVERN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 76, after line 23 insert the following:

Federal Assistance for Certain Emergency Medical Transportation

(o) In any case where because of regulations of the Board or any other Federal agency with respect to equipment and personnel necessary for operating as an air ambulance, any air commuter or air taxi operation certified or regulated by a State agency will have to discontinue providing the only emergency medical transportation to any community, the Board is authorized, upon application, to make payments in the amount necessary to provide such equipment and personnel to continue such emergency medical transportation.

Mr. McGOVERN. Mr. President, this amendment relates to the need for air ambulance service. In many rural areas air ambulances are the only safe means of transportation for patients who need complex and intensive care. Urban residents requiring specialized surgery also depend on air ambulances to fly them to major specialized medical centers.

Recently the FAA has proposed standards for air ambulance operators mandating necessary medical personnel and equipment for all aircraft used for emergency medical transportation. These standards are necessary and long overdue and will provide some means of patient care while the patient is being transported to standard medical facilities. However, in many small rural areas, the only existing air ambulance operations are offered by standard charter and air taxi businesses who indicate that the costs of complying with the new standards will be prohibitive and they will no longer offer these services. Additionally, several local and State officials believe

that air ambulance services will be curtailed in their States when these regulations go into effect.

Consequently, I am offering an amendment to allow air ambulance operators who are providing the sole emergency medical transportation service to a given community to be eligible for a one-time subsidy to equip their aircraft as mandated by the new regulations in order to continue this essential air service.

I think the purpose of the amendment is clear, and I am hopeful it will be adopted.

Mr. CANNON. Mr. President, I yield 30 seconds to the Senator from Tennessee.

## HUBERT H. HUMPHREY INSTITUTE OF PUBLIC AFFAIRS AND THE EVERETT McKINLEY DIRKSEN CONGRESSIONAL LEADERSHIP RESEARCH CENTER

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2452.

The Presiding Officer laid before the Senate the following message from the House of Representatives:

*Resolved*, That the bill from the Senate (S. 2452) entitled "An Act to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and for the Everett McKinley Dirksen Congressional Leadership Research Center", do pass with the following amendment:

Page three, after line two, insert:

(d) This Act shall take effect October 1, 1978.

Mr. BAKER. Mr. President, on behalf of myself and the distinguished Senator from Minnesota (Mrs. HUMPHREY), I ask that the Senate proceed to its immediate consideration.

The Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The motion was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. CANNON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. I thank the Senator from Nevada.

## AIR TRANSPORTATION REGULATORY REFORM ACT OF 1978

The Senate continued with the consideration of the bill.

Mr. CANNON. Mr. President, I am perfectly willing to look at the subject in some detail, but I cannot accept the proposed amendment at this time on this bill.

At no time during the last 2 years of hearings and testimony has this issue been raised. We have no testimony from State medical authorities, existing air ambulances, the CAB or the FAA, and I want to hear from all of these people first before enacting legislation.

Furthermore, the FAA and not the CAB has the jurisdiction over air ambulances, and it makes no sense to me to change that responsibility now.

I say to my colleague that we will in the Commerce Committee be considering other aviation matters this year and we would certainly be willing to have him send that to us. We would get the response from the agencies and have it considered at that time on one or two pieces of legislation we will be considering later this year.

Mr. McGOVERN. Does the Senator think, if the proposal does prove to have merit, it will be an appropriate way in which it can be handled by the committee this year?

Mr. CANNON. Well, I think there would be a way that we could consider it. Whether or not the committee would pass it I have no idea because, as I say, I have no factual data to base it on. But we would get the response from the FAA and, as I said, the FAA is the one that has jurisdiction and not the CAB as the Senator is proposing to give them authority here.

I can assure the Senator that we will consider this issue in committee this year if the Senator wants to withdraw it and give us that opportunity. Otherwise I would have to oppose it here on this bill.

Mr. KENNEDY. Mr. President, will the Senator yield further?

Mr. McGOVERN. Yes.

Mr. KENNEDY. We will also be considering the emergency medical legislation which also does provide for air emergency ambulance service which has been implemented particularly in the Western States, States that have very broad highways, and I would be very glad to work with the Senator, in whatever is the most appropriate vehicle to see if the interest cannot be carried forward.

The record has been a successful one. I think the cases that I know particularly of are in the State of Colorado which has made a very significant difference, and where they have been imaginative.

I would certainly be glad form a health point of view to work with the Senator from South Dakota.

Mr. McGOVERN. Well, Mr. President, in view of these assurances and the fact that I recognize we do not yet have the FAA report on this matter or any recommendation from them that, perhaps, we would be better advised to introduce it as a separate measure for appropriate referral either to the committee chaired by Senator CANNON or to the committee handling the legislation to which Senator KENNEDY has referred.

Under those circumstances I will not press for a vote on the measure at this time.

The PRESIDING OFFICER. Does the Senator withdraw his amendment?

Mr. McGOVERN. Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right, and without objection it is so ordered.

Who yields time?

Mr. ZORINSKY addressed the Chair.

UP AMENDMENT NO. 1229

Mr. ZORINSKY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk proceeded to read the amendment.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Will the Senator yield?

Mr. ZORINSKY. Yes.

The PRESIDING OFFICER. Is this the amendment where the Senator has a 2-hour time limitation?

Mr. ZORINSKY. The Chair is correct.

The PRESIDING OFFICER. I thank the Senator.

The amendment is as follows:

On page 93, strike out line 6 and all that follows down through line 22 on page 99 and insert in lieu thereof the following:

"EMPLOYEE PROTECTION PROGRAM

SEC. 22. (a) DUTY TO HIRE PROTECTED EMPLOYEES.—Each person who is a protected employee of an air carrier which is subject to regulation by the Civil Aeronautics Board who is furloughed or otherwise terminated by such an air carrier on account of qualifying dislocation shall have first right of hire, in order of the date by which they were dislocated, and regardless of age, in his occupational specialty, by any other such air carrier hiring additional employees. Each such air carrier hiring additional employees shall have a duty to hire such a person before they hire any other person, except that such air carrier may recall any of its own furloughed employees before hiring such a person.

The Secretary of Transportation shall establish, maintain, and periodically publish a comprehensive list of jobs available with air carriers certified under section 401 of the Federal Aviation Act of 1958. Such list shall include that information and detail, such as job descriptions and required skills, the Secretary deems relevant and necessary. In order to carry out his responsibilities under this subsection, the Secretary of Transportation may require each such air carrier to file with the Secretary the reports, data, and other information necessary to fulfill his duties under this subsection. The Secretary of Transportation shall be responsible for insuring the accuracy and timeliness of the reports.

The Secretary of Labor shall make every effort to assist an eligible protected employee in finding other employment.

The Secretary of Labor shall be responsible for insuring that the employee's hiring rights are protected and that the airlines comply with this labor protection provision.

(b) RULES AND REGULATIONS.—(1) The Secretary may issue, amend, and repeal such rules and regulations as may be necessary for the administration of this section.

(2) All rules and regulations shall be submitted to the Congress on the date that they are proposed by the Secretary. Such rules and regulations shall become effective 60 legislative days after the date they were submitted to the Congress, unless during that 60-day period either House adopts a resolution stating that that House disapproves such rules or regulations may become effective on the date, during such 60-day period, that a resolution has been adopted by both Houses stating that the Congress approves of them.

(3) For purposes of this subsection, the term "legislative day" means a calendar day on which both Houses of Congress are in session.

(c) DEFINITIONS.—For the purposes of this section—

(1) The term "protected employee" means a person who, for at least 1 year, on the date of enactment of this section, has been employed full time by an air carrier holding a certificate issued under section 401 of the Federal Aviation Act of 1958. Such term shall not include any members of the Board of Directors or officers of a corporation or any employee terminated for cause.

(2) The term "qualifying dislocation" means reduction of the total number of full-time employees of an air carrier within a 12-month period except for those employees who are deprived of employment because of a strike of an air carrier holding a certificate under section 401 of the Federal Aviation Act of 1958, Air Transportation Regulatory Reform Act. The reduction of such employees must be caused by the change in regulatory structure provided by the Air Transportation Regulatory Reform Act of 1978, as determined by the Civil Aeronautics Board.

(3) The term "Secretary" means the Secretary of Transportation or the Secretary of Labor.

(d) TERMINATION.—The provisions of this section shall terminate 10 years from enactment of this legislation.

Mr. ZORINSKY. Mr. President, my amendment strikes the labor protection provision from the bill. In its place, the labor protection provision I am proposing will remove the present trigger or contraction requirement of 15 percent and also requires that protected employees be employed by an airline for only 1 year. However, instead of affording the relief of compensation from the pockets of the Nation's taxpayers, my amendment provides that qualified protected employees be given a preference in hiring by other carriers.

My substitute labor protection provision is far more liberal in application than is the present bill's provision. Mine will apply to most full-time employees and not only those who have been employed by the airlines for 4 years. My amendment requires that the employee only need have been employed for 1 year to be eligible. Additionally, by removing the contraction requirement I have assured employees will not get caught in a percentage squeeze,

In a letter which I will insert for the record to Senator HARRISON SCHMITT, dated February 22, 1978, J. J. O'Donnell, president of the Airline Pilots Association, states:

Finally let me address the employee protection program contained in the bill (Section 22). While it is encouraging that the Committee recognizes the potential hardships which this legislation may cause to airline employees, the provision in the bill falls far short of insuring protection in practical terms. Two areas in particular need to be addressed. First, the bill limits the eligibility for protection to those employees who have four years seniority on the date of enactment. Obviously this will exclude from coverage thousands of workers on the bottom of airline seniority lists—those who need protection the most. Second, the bill provides for employee protection only in the event of an airline bankruptcy or "major contraction," which is defined as a reduction by at least 15 percent of the total number of full-time employees of an air carrier within a 12-month period. These conditions are so arbitrary and impractical as to render this section of the bill virtually meaningless in terms of honest protection for workers. If the purpose of the program is to protect airline employees whose lives and careers are adversely affected by the enactment of this legislation, then it should do just that. We strongly believe that the arbitrary 15 percent threshold should be removed, and the protective coverage applied to all affected employees.

I have changed my amendment to accommodate these complaints regarding the bill's provisions.

I say at the outset that I have supported efforts to return the airline industry to a less regulated, free enterprise environment. As a member of the Committee on Commerce, Science and Transportation, my record on this legislation has been second to none in support of deregulation.

This support is grounded on the premise that this legislation, by its very nature, will benefit this industry by encouraging growth and additional employment. As a result of this return to a more competitive environment, expansion, and contractions may occur in the marketplace. Employment may also consequently expand and contract. Some less competitive, less efficient carriers may be consumed by their competitors, new carriers will very likely enter the marketplace.

Some previously employed individuals as a result, may need to seek new employment.

Unless we desire to change the nature of our free economic system, these are facts of life which we all accept.

No one has come forward with a stockholder protection provision under this legislation, no one suggests compensating such stockholders for their losses resulting from this legislation.

There is no doubt that this legislation may produce contraction on a per carrier basis. However, the macroeconomic picture of the airline industry as a whole resulting from this legislation is one of expansion.

Evidence of such expansion and increased employment opportunities have already been seen in the airline cargo industry which was totally deregulated this past fall. If airline cargo industry bears any analogy to the passenger industry, then it is clear that this legislation will in fact increase employment opportunities industrywide. Additionally the new price competition among the airlines has resulted in record passenger miles flown by the airlines.

The first fired, first hired provision that I am proposing meshes perfectly with this expected expansion. I ask my colleagues, why resort to the pocket of the taxpayer when the airline industry itself can provide the relief?

Concern for the dislocation of airline employees has been the major stimulus for certain airline employee organizations to seek labor protection or oppose the legislation. Because of this pressure, such provisions were incorporated in the bill.

The provisions in the bill authorize a special new welfare program for airline employees under the auspices of the Secretary of Labor. The bill requires that once the 15-percent contraction threshold is met, and no job is found, these employees must be compensated so as to be in "no substantially worse position regarding wages and fringe benefits." Since airline employees are some of the highest paid in the Nation and receive generous fringe benefits, and since the legislation provides payments for up to 36 months the amount of money from the Treasury required to support even a small number of employees is astronomical.

I cannot imagine our taxpayers being willing to support a pilot in the manner to which he has become accustomed at $100,000 a year. True, the Treasury will not shell out $100,000 since income tax must be taken into consideration. Nevertheless, that same pilot will get between $30,000 to $40,000 tax free. The Treasury will therefore experience a shortfall of the difference between the $100,000 and what the pilot eventually receives since he will not be paying taxes. That means that the rest of the taxpayers will either have to pick up the tab and make up that shortfall or the Government must do more deficit spending.

Conceivably this kind of program could over a 3-year period cause a billion dollar strain on the Treasury in payout plus shortfall, which certainly is staggering.

Where are all my colleagues who are so concerned about inflation?

Not too long ago, on this very Senate floor, I can remember words being contributed to a discussion of an agricultural bill which, in the minds of many, was contributing to inflation. When we see a bill such as this, which has prospects of aiding the consumers of this country but only in reversal to having to additionally encumber the pocketbooks of the taxpayers concerning the guaranteed payment to those employees that may lose jobs due to the exposure to the sunlight of the free enterprise system, I cannot believe that this body is willing to provide a billion-dollar bailout for the executives of the Nation's airline industry for their bad business decisions by compensating their employees. This remedy is especially noxious in light of the ability of our free enterprise system and the boom in the airline passenger industry expected to result from the thrust of this legislation as a whole to remedy the employment problem here in question.

You will hear arguments today that employer protection in the airline industry is not new. This is true. But the type of remedy provided in this bill is a strong departure from past precedents. Protection is not new, the bill's remedy is totally precedent in this industry.

My amendment on the other hand is modeled after and has precedent in the labor protecting provisions imposed by the CAB in mergers and acquisitions pursuant to section 412 of the Federal Assistance Act of 1958.

Regarding the issue of precedent let me warn my colleagues that what we are doing today will be precedent for tomorrow. You will hear arguments that this industry is "unique," because of the degree to which it is regulated by the Federal Government.

Many industries are regulated to varying degrees by the Federal Government. To single out this industry as "unique" is illogical. Who can say that the ulti-

mate effect on the airline industry economy by CAB regulation is greater than the EPA's economic effect on the steel industry. Does not the trucking industry have analogous regulations by the ICC. Quite frankly, OSHA's effect on the small businesses may be just as much in degree by its economic effect on those businesses as the CAB is on the airline industry. To single out the airline industry as being "uniquely" qualified for this type of remedy is simply without foundation.

Consequently I doubt that the "unique" quality of the airline industry will preclude these provisions from being utilized as a precedent in the future. To the contrary, every labor organization working in any type of regulated industry will seize the opportunity to seek this remedy if and when relief is perceived as necessary. The "unique" quality of this precedent will pale in the light of such pressure.

To my colleagues who do not believe that this is precedent, I wonder how many have not heard representatives of organized labor request increased protection beyond the bill's present provision. I hear there is a hue and cry for Amtrak. I bet my colleagues who were here remember that those same Amtrak employee protection provisions were not meant to be precedent for future legislation.

I ask when and where will this all end. I hope this body can begin to set a reasonable and prudent course for the future. I believe my amendment provides this.

Finally, in closing, Mr. President, I would like to address my colleagues who strongly support automatic entry or want more entry through a reverse public convenience and necessity test, and still want even stronger employee protection provisions. The Airline Pilots Association has said that the best employee protection provision is no entry at all. If you want to protect labor then stop pushing for increased entry. If you want free enterprise then let the market seek its level.

The goals you seek are inherently incongruous. You cannot have it both ways, while picking the pocket of the taxpayer. If you want to force the airlines toward a more competitive environment, fine, if you want to oppose trusts and monopolies, fine. But then it is also time to quit overprotecting certain segments of that free enterprise system.

I ask unanimous consent, Mr. President, to have printed in the RECORD letters from the American Farm Bureau Federation and the National Association of State Aviation Officials endorsing my amendment, and also the letter to which I have referred during my talk signed by J. J. O'Donnell, president.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
*October 20, 1977.*

Hon. WARREN G. MAGNUSON,
*Chairman, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, D.C.*

DEAR SENATOR MAGNUSON: We understand that the latest draft of the Airline Regulatory Reform Bill includes a labor protection provision which would give certain assurances to airline employees whenever 15 percent or more of the employees in the industry lose their jobs as a result of reform legislation.

When we filed an earlier comment on this subject with your Committee (our letter dated July 8, 1977), there was no proposal before the Committee to include a so-called labor protection provision.

In our testimony before the House Aviation Subcommittee, we made the following statement on H.R. 8813:

"We are strongly opposed to Section 27 of the bill, since we read it as a blank check on the Treasury to protect the interests of employees who are adversely affected by new competition resulting from section 6, 7, or 8, leaving details of such protection to rulemaking by the Secretary of Transportation. Airline employees have no such protection under the present regulatory system. There is no need for an employee protection provision in this bill, as most experts who have studied regulatory reform have testified that reform would result in an increase in airline employment, not a reduction."

We are opposed to adding a labor protection provision to the Senate bill, although we would support the concept which we understand Senator Zorinsky will propose in Committee or on the floor. This proposal provides that the last employees of an airline losing their jobs due to regulatory reform shall be the first hired when additional jobs become available.

We ask that this letter be considered a supplement to our letter of July 8 and that it be made a part of the record.

Sincerely,

JOHN C. DATT,
*Director, Washington Office.*

---

WASHINGTON, D.C.,
*March 3, 1978.*

Hon. EDWARD ZORINSKY,
*U.S. Senate, Russell Building, Washington, D.C.*

DEAR SENATOR ZORINSKY: This association welcomes the opportunity to express our great appreciation to you for introducing and defending your several constructive amendments to the small community air service section of the airline regulatory reform bill. These amendments carried without serious challenge thanks to you, and will require the CAB to consult with the States on major aspects of the service to small community program.

All of the State aviation directors, together with the Governors and Secretaries of Transportation I am sure, are grateful to you for your leadership on this issue.

We discussed the two labor protection amendments during NASAO's Winter Conference in Baltimore last week. After considerable debate, we reached the following conclusion.

While NASAO strongly supports the thrust of the Senate bill on air transportation regulatory reform, we also feel that labor considerations are outside the purview of NASAO's expertise in aviation. We are deeply interested in early passage of the regulatory reform legislation and recommend that the labor provisions of the Senate bill be treated in separate legislation, a decision that apparently has already been taken by the House Public Works and Transportation Committee as reflected in their consensus bill, HR 11145.

Thank you, Senator, for your many courtesies to this association.

Sincerely,

JOHN A. NAMMACK.

---

FEBRUARY 22, 1978.

Hon. HARRISON SCHMITT,
*U.S. Senate, Washington, D.C.*

DEAR SENATOR: Thank you for the opportunity to submit our views to you on S. 2493, the "Air Transportation Regulatory Reform Act of 1978." As we have stated on numerous occasions in the past, we are opposed to the enactment of major deregulation legislation on the grounds that Congressional action is not necessary to accomplish most of the basic objectives of proponents of reform of the airline regulatory process. It is our view after analyzing the bill and the committee report that major substantive changes are necessary to allay the concerns which we have with the measure. Let me outline briefly some of our suggested changes.

The "automatic market entry" provision (Section 401 (k)) must be eliminated. We have consistently argued that Federal regulatory control over airline route expansion is imperative for the orderly development of a stable network of efficient, reliable, and safe public air transportation services. The ultimate objective of the automatic entry concept, however, is to remove the CAB from the route certification process leaving this fundamental element of airline system development totally in the hands of private management. In our view, this is anathema to our long-standing philosophy concerning Federal regulation of public transportation, particularly air transportation.

Equally critical is the provision which would enable carriers to abandon markets with relative ease (Section 401 (h)). Under the bill, the airlines would be virtually unrestricted to exit cities and markets which are economically marginal, and the CAB would be left with the sole responsibility to find suitable service replacements. The consequences for numerous communities and regions of the country would be totally unacceptable in terms of service quality and pricing. This provision should be deleted.

The changes proposed in the bill for the certification of charter air carriers (Section 421) are not wise in our judgment. The recent experience of the proliferation of all-cargo airlines with the passage of the air cargo deregulation bill should be sufficient evidence as to what is certain to happen in the charter field if S. 1493 is enacted in its present form. Since enactment of H.R. 6010, the cargo deregulation bill, over 50 certificates have been granted by the Board for unrestricted all-cargo service. Applicants for charter certificates should be required to meet the same "public convenience and necessity" test as their scheduled counterparts. We also believe that the specific provisions regarding off-route charter authority for scheduled carriers (Section 401 (n)) should be deleted from the bill. The percentage limitations on such authority should be determined by the CAB which has the expertise and the authority to adjust them as conditions warrant.

The provisions regarding the certification and subsidization of commuter air carriers (Sections 419 & 420) are too broad and cumbersome in our view, and fail to account adequately for the critical safety deficiencies inherent in this segment of the industry Under the bill, the CAB is saddled with an unreasonable responsibility of guaranteeing "essential air transportation" services, which, by the Board's own admission, would require an enormous enlargement of its bureaucracy to implement and administer. While we do not oppose subsidy eligibility for commuter operations where necessary in the public interest, we must insist that the operators of Federally subsidized carriers be required by law to meet minimum safety standards and regulations comparable to those which govern other certificated airlines. Appropriate amendments to Sections 419 and 420 should be adopted to establish an effective program of "local air transportation" which is safe in its operations and practical in its administration.

We are opposed to the seven-year phase-out of the current local service subsidy program (Section 406), and the replacement of it by the propgram outlined in Section 419. While changes in the legislative basis of the program may be meritorious, we believe that

the interconnecting network of air services now available to hundreds of communities throughout the country should not be sacrificed on the grounds that cheaper, albeit lower quality, service may be provided by commuter airlines. We are convinced that the long-range consequences for reliable air transportation in the sparsely populated regions of the nation will be regretted if Congress ignores the vital public service aspects of the current subsidy system and opts in favor of an allegedly cheaper alternative.

Finally, let me address the employee protection program contained in the bill (Section 22). While it is encouraging that the Committee recognizes the potential hardships which this legislation may cause to airline employees, the provision in the bill falls far short of insuring protection in practical terms. Two areas in particular need to be adressed. First, the bill limits the eligibility for protection to those employees who have four years seniority on the date of enactment. Obviously this will exclude from coverage thousands of workers on the bottom of airline seniority lists—those who need protection the most. Second, the bill provides for employee protection only in the event of an airline bankruptcy or "major contraction," which is defined as a reduction by at least 15% of the total number of full-time employees of an air carrier within a 12-month period. These conditions are so arbitrary and impractical as to render this section of the bill virtually meaningless in terms of honest protection for workers. If the purpose of the program is to protect airline employees whose lives and careers are adversely affected by the enactment of this legislation, then it should do just that. We strongly believe that the arbitrary 15% threshold should be removed, and the protective coverage applied to all affected employees.

In conclusion, Senator, let me reaffirm once again our sincere conviction that the Federal government has an important responsibility to execute in the development of the nation's public air transportation system. This responsibility is shared by the Congress and its administrative arm the CAB. The role of the Congress is the establishment of airline regulatory policy, and the role of the CAB is the implementation of that policy. In our view, S. 2493, as reported, is clearly an abdication of the Federal responsibility to insure the orderly development of a stable network of efficient, reliable, safe, and reasonably priced air transportation services. This abdication becomes apparent when one strips away all the technical verbiage in the bill, and finds that the role of the CAB has been relegated to that of a huge bureaucracy populated by rubber stamps. If and when the Senate of the United States recognizes this fact, I am convinced that its members will proceed with extreme caution in their consideration of S. 2493.

Thank you once again for the opportunity to share our views with you on this vital subject.

Sincerely,

J. J. O'DONNELL,
*President.*

(Mr. RIEGLE assumed the chair.)

Mr. PEARSON. Will the Senator yield?

Mr. ZORINSKY. I yield.

Mr. PEARSON. I congratulate the Senator for his participation and for the fine contribution he has made. May I inquire about the amendment the Senator has proposed? It has some variations and modifications over the amendment he had some weeks and some months ago. Is that correct?

Mr. ZORINSKY. That is correct.

Mr. PEARSON. If the Senator will yield further so that I might see if I really understand what he seeks to do—and I believe I am in sympathy with the amendment—under this particular bill, the labor protection provisions provide that if there is a contraction or even a bankruptcy or economic dislocation which the CAB determines equals 15 percent of the total employment, those people who have a full-time job and have worked for 4 years who are then out of a job, or if they have a reduction in pay, have some compensation as determined by the Department of Labor, as I understand this.

Mr. ZORINSKY. My distinguished colleague is correct in making that assumption.

Mr. PEARSON. That is the assumption.

As I understand the Senator's amendment, he would make it applicable to employees of 1 year and strike the 15 percent so he covers a great many more people?

Mr. ZORINSKY. That is correct.

Mr. PEARSON. But he provides no funds for compensation. Are there Federal funds whatsoever?

Mr. ZORINSKY. There are no Federal funds whatsoever.

Mr. PEARSON. The aid that the Senator made reference to under the merger provisions is the first-fired, first-hired provision?

Mr. ZORINSKY. Job opportunities.

Mr. PEARSON. That is a much more diplomatic way to put it, I might say. Actually, while they might seem to be marginal positions, these are highly skilled people, generally, and greatly in demand, as I understand it. I want to say that I do not know what the position of the manager of the bill is. We have discussed this point to some extent. I view this particular proposal sympathetically and I may support the Senator in his efforts.

Mr. ZORINSKY. I thank my distinguished colleague from Kansas.

Mr. CANNON. Mr. President, I yield myself 5 minutes.

Mr. President, I have mixed emotions about this. I did support the provision in the bill as now written, which was not offered by me but offered by the distinguished Senator from Missouri and the Senator from Washington. I must say that as the bill is written there are some provisions in it I cannot go along with. If the Senator's amendment fails, I have an amendment which I would expect to offer, which would eliminate the provision providing a guarantee to a pilot who may be earning up to $100,000 a year, which I agree with him is unreasonable.

I think the Secretary of Labor, if this bill stays as it is now, is the one who ought to make the determination as to the adjustment assistance which is provided.

I believe the principle of new employees having to be hired from the industry itself, the first-out-first-in concept, is a good one. I think this would insure that people have the opportunity to work, even though it is with another carrier. I realize that creates problems among the various unions which are involved.

I must say that I do not think we are going to have those kinds of disruptions. I believe this is merely a provision where some might say it is adequate insurance. I believe we have a bill here which will insure that we will end up with more employees for these various carriers rather than fewer, and that will be true right across the board.

The Senator from Missouri is in the Chamber, I would prefer to yield to him, because it is his amendment. I yield him such time as he would like to have. His amendment is the one which is in the bill, and I presume he would want to oppose the amendment of the Senator from Nebraska.

How much time does the Senator from Missouri desire?

Mr. DANFORTH. I am not sure.

Mr. CANNON. I will yield 10 minutes to start, and if the Senator desires more time, I will yield additional time.

The PRESIDING OFFICER. The Senator from Missouri is recognized for 10 minutes.

Mr. DANFORTH. Mr. President, I think it is quite an overstatement to say that the labor protection provision in the airline deregulation bill opens up a sort of Pandora's box and provides a precedent which would be widely followed in many other situations. The basis for labor protection in this particular bill is that the airline industry is not similar to most industries in the United States.

Most business enterprises in the United States operate on the basis of open competition. People who go into business, people who apply for employment with a business, generally recognize that when they get into that kind of an enterprise, they will prosper as the company prospers, and they will suffer if the company suffers. But in the airline industry we have not had open competition. For the past 40 years we have not had open competition in the airline industry. Instead, we have had an industry which has been very heavily regulated by the Federal Government.

An airline is not free, under existing law, to enter into any market that it wants, as an ordinary business can.

An airline is not free to set up whatever price it wants on its tickets, as any other industry is free to set prices.

Instead, we have a very carefully regulated and controlled industry. The people who went into this industry, who determined their life plans according to this system, counted on a basic legal structure under which they will be operating. What we are doing in this bill is changing the rules of the game. We are changing the rules of the game which were established some 40 years ago when an infant industry developed.

The rules are not being changed by the marketplace. The rules are not being changed by the ordinary course of events.

The rules have been set by the Congress in the first place and the rules are being changed by the Congress. So we have this unique situation where the Congress sets the rules and the Congress then, in the middle of the game, changes the rules.

We have recognized in the automatic entry provisions in the bill that when

the Government changes the rules which the Government has established, then we should provide some transitional period for those who are going to be affected. In automatic entry we have provided a transitional period for the airlines, for the companies, so that they will not all of a sudden be engulfed in this new system of automatic entry, but there will be a gradual phase-in for automatic entry.

What we are saying in labor protection is that if we are going to have a phase-in to protect the industry, let us have a phase-in to protect the employees as well.

The Senator from Nebraska would say that it is sufficient protection for the employees for them to be able to be hired either by their old employer, if it gets healthier, or by some other airline located somewhere else. As I understand it, there is no provision at all in his bill to move families across the country to new communities. Furthermore, there is no provision whatever for what happens to the communities which are going to be affected.

I have in mind especially one of the communities I happen to represent, Kansas City, Mo., and the surrounding area.

The TWA overhaul base outside of Kansas City employs 4,800 people. TWA in Kansas City, in total, employs 11,200 people.

Let us suppose that TWA, which has felt very threatened by this legislation, has a major contraction as a result of this bill. Let us suppose that it might be a boon for the rest of the industry, but that TWA has a very hard time as a result of this bill. What is to happen to 11,200 human beings who happen to be employed by that company in Kansas City? What is going to happen to their wives and their children? Are they supposed to move? Are they supposed to move to Atlanta or to New York or to someplace else to hope to find some other job in a distant part of the country? I think it is unrealistic.

It also does not take into account the effect that it has, not only on the lives of those people, but on the community itself. It is as though some Government installation were suddenly removed from a community. How is the community to get along?

It is my belief that the amendment that has been offered by the Senator from Nebraska is totally inadequate, because all it does is provide that if you can pick up stakes and move your whole family to some other community, maybe you will be able to get a job in that other community.

Senator CANNON has pointed out the great hope for this legislation. That hope is that it is going to be a boon for the consumer, that the consumer is going to be much better off, that suddenly, we are going to have better service and we are going to have lower fares. We are talking about inflation now. The Senator from Nebraska mentioned the inflationary effect of labor protection. If this bill operates the way it is supposed to operate, the bill itself would have an anti-inflationary effect. The effect of it would be to reduce air fares, to make it possible for people to travel without paying so much for a ticket. The average person, the consumer, will be able to benefit, the American public will be able to benefit by lower air fares.

If the American public is going to benefit, then why should the American public benefit out of the pocketbooks of the people who are employed by the airlines? If the American public, as a whole, is going to be better off as a result of airline deregulation, why is it so unreasonable to ask the people as a whole to pay the bill for those who may suffer or who would suffer as a result of this legislation?

With respect to precedents, there is a precedent for what labor protection does in this instance. The precedent is railroad reorganization, and it is simply not true that it amounts to a huge raid on the Treasury. In railroad reorganization, the Federal Government, the Congress of the United States, changed the rules of the game in midstream and provided that those who lost their jobs as a result of railroad reorganization, as a result of governmental action, would be compensated by the Government. It was thought to be a very reasonable and a very fair proposition. The effect of it was that in 1977, it did not cost any billion dollars, it cost $60 million. In 1978, it is estimated that it will cost $50 million. Then it will be scaled down in 1979 to $25 million, then down to $10 million by 1980. That is the kind of cost it is. It is not any billion dollars.

There is no way that any individual is going to be paid any $100,000 a year under this proposal, not even close. Railroad reorganization, I am told, is much more generous in the compensation that it provides than what would be provided in this bill. Yet it will be scaled down to $10 million a year.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DANFORTH. May I have 5 more minutes?

Mr. CANNON. I yield 5 more minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 additional minutes.

Mr. DANFORTH. Mr. President, after the debate is completed on the amendment offered by the Senator from Nebraska, at that point, I shall offer a substitute for his amendment and the substitute will do several things. It will specifically address itself to one of the problems that Senator ZORINSKY has raised with respect to the labor protection provisions in the bill as it stands; that is the 15 percent test to trigger compensation under this provision. I think, on reflection, that on this part of his suggestion, Senator ZORINSKY has made a good point, because if, as a result of this bill, instead of a 15-percent contraction, there is, say, a 14-percent contraction in employment, that 14 percent would be out in the cold under the existing bill. So it will be my intention to offer as a substitute at the appropriate time an amendment which would track Senator ZORINSKY insofar as it would do away with the 15-percent test; and also would make certain other improvements, I think, on the bill as it presently exists.

The basic concept of the bill now, I think, is one that deserves to be emphasized, which is certainly far superior to Senator ZORINSKY's amendment. That is that when you have an industry which has been developed under governmental regulation and when the Government regulation is changed in midstream and people suffer as a result, through no fault of their own but because of what we do in Congress, then we should offer them some protection for a limited period of time to make it possible for them to adjust to the new situation.

I thank the Senator from Nevada for yielding me this time.

Mr. ZORINSKY. Mr. President, I yield myself such time as I may require.

My colleague, the Senator from Missouri, speaks very eloquently of assuring people a means of livelihood once they have embarked on a livelihood that sustains their family. I certainly have no objection to that. However, he just concluded his argument by saying that when we have made mistakes in this Chamber, people of this country should not have to be made to suffer the economic penalties thereof. He opens up an entire new world of economic penalties that have been imposed upon the people of America. I know several businesses which have been put out of business, which have had to go broke by either additional encumbrances imposed or through rules and regulations promulgated as a result of various legislative events taking place in these halls. He does not mention a word about these people. He confines himself to the uniqueness of an airline industry.

Well, I point out to my colleague from Missouri that Americans are Americans, taxpayers are taxpayers, wherever they reside in this great land of ours. Certainly, in equality for all, to say that a group will be encumbered economically in a given industry without mentioning the hundreds of thousands of people who have been economically penalized by legislation that has evolved in Congress to date is not fair to those that have not been mentioned. I shall not take the time today to enumerate the long list of unfortunates within this country who have been the object of legislation to the point where they no longer exist in the business communities of our fair States and cities.

I would like to briefly make a comment concerning no moving costs being visible in my amendment or in this bill.

It would not surprise me at all if corporations and industries themselves provide moving expenses. I see nowhere in the Constitution of this country where we have to guarantee moving expenses for people who have been unfortunate in losing a job and seeking another job.

I also would assume in many instances many of these moving expenses are tax deductible in order to obtain a new place of employment.

So I do say to my colleague, we are completely overlooking and omitting the ability of private enterprise to provide some moving expenses in the hiring of employees.

The comment was made concerning changing the rules of a ball game. There are many ball games being played in this country today, not only in the airline industry. I would point out that daily rules

of the ball games are being changed by Federal rules and regulations, whether it be in agriculture, whether it be in manufacturing and in textiles, throughout this country, that are in some way adversely affecting the well-being and economics of employees and laborers throughout this land.

I just wanted to bring the other side of the coin to the surface, because in my estimation we are zeroing in on the fact that this bill is doomed to failure.

My colleague from Missouri says that if this bill does what it should do, there is no need for my amendment, and, conversely, if this bill does what it should do, there is no need for my colleagues' concern with having a guaranteed subsistence in the form of an additional welfare program built into this bill, because he is absolutely correct, that is not necessary with the success of this bill. I do not think it is fair to this body to assume the assured doom of this airline deregulation bill.

Mr. HATCH. Will the Senator yield?

Mr. ZORINSKY. I am most pleased to yield to my colleague.

Mr. HATCH. I thank my friend from Nebraska.

I think he makes persuasive points. I also feel we have been setting some very dangerous precedents in this area.

I remember the redwood bill. Of course, we have a number of other areas where it seems to me that if we start making the Federal Government, in essence, the protector of last resort in all these situations, that we will have everybody who is put out of a job as a result of any form of Federal regulation coming to the Federal Government to be taken care of for a period of time.

Also, I think these provisions lead to the situation where people really are not making every attempt they should to go and find work. Therefore, although I have to confess I like what the Senator from Nebraska is doing in his amendment, I intend to offer a substitute to his amendment which will basically strike this employee protection provision because section 22, the employees protection program of this bill provides as has been mentioned that employees of certificated airlines with 4 years employment, will be paid from the U.S. Treasury for a period up to 3 years, amounts up to their full pay and allowances plus fringe benefits, tax free, if they lose their jobs, experience a reduction in their wages, or are required to relocate as a result of a bankruptcy or "major contraction" of their employer resulting from regulatory reform.

The very nature of this bill should create more jobs, not less jobs. Therefore, that loss of their jobs is unlikely to occur. But, if it does, we give them incentive to stay off work rather than find additional work.

I think the Senator's approach is not very reasonable.

I feel that this provision is unwarranted and is a grossly unfair raid on the U.S. Treasury which could cost the American taxpayer in excess of $1 billion per year. Considering similar prorams in Amtrak (which has cost the taxpayers of this country $38 million since its inception in 1973) and ConRail (which has cost taxpayers $140 million since its inception in 1976), I am convinced that my concerns over the economic consequences of this provision are entirely warranted especially since I believe that this establishes a very dangerous trend.

As this body is well aware, employees of the airlines of this country enjoy some of the highest wages and most luxurious fringe benefits in our economy. Airline pilots salaries are well in excess of $50,000 per year. In many cases that is not uncommon. It is easy to appreciate why my constituents, where a family of four is getting by on income under $10,000 per year, are strongly opposed to this type, and this amount of largesse by the Federal Government favoring a privileged special interest group.

Furthermore, section 22 sets a dangerous precedent for future modifications in our excessive and burdensome bureaucratic infrastructure. If we are to favor airline employees with these types of Federal grants, why not make similar concessions to those unfortunates in our economy who have been put out of work by actions of OSHA, EPA, FTC, and other agencies of the Federal Government.

I submit that provision has been made under our employment security regulations for those in our society who lose their jobs or who must relocate because of economic conditions. If those provisions are applicable to any Americans, they should apply to all Americans, and there should be no special or favored treatment accorded to workers in a special and privileged industry.

For these reasons, I will, at the first chance I can, move to have this body strike section 22, the employees protection program, in its entirety from this bill.

I thank the distinguished Senator from Nebraska for allowing me this amount of time from his time.

Mr. DANFORTH. Mr. President, a parliamentary inquiry. Who has the floor?

The PRESIDING OFFICER. The Senator from Nebraska has the floor, but if the Senator has a parliamentary inquiry, he can certainly state it.

Mr. DANFORTH. I just wanted to inquire.

Mr. ZORINSKY. Without losing my right to the floor, is there a parliamentary inquiry?

Mr. DANFORTH. No.

The PRESIDING OFFICER. The Senator was inquiring whether the Senator from Nebraska still held the floor and the Chair advised that the Senator from Nebraska does hold the floor.

Mr. ZORINSKY. I thank the Senator from Utah for his support to the extent that he feels my amendment seems to be a step in the right direction, with the exception it does not go far enough and, in effect, he has indicated he has a substitute amendment to my amendment which eliminates the entire section.

Am I correct?

Mr. HATCH. Yes. That is correct. I feel there is no need for that section and that this sets very dangerous precedents which continue to allow the Federal Government to intrude, at the expense of the taxpayers of this country, in a situation where it is hardly justified.

Mr. CANNON. Mr. President, if the Senator will yield back his time, I am prepared to do so.

Mr. DANFORTH. Mr. President, I wonder whether I may have a little time.

Mr. CANNON. I thought the Senator was going to offer a substitute.

Mr. DANFORTH. I will.

Mr. CANNON. The Senator cannot offer it until the time has been yielded back or has been used.

Mr. DANFORTH. That is correct, but I wanted to make some more comments on the basic issue.

Mr. CANNON. I yield the Senator 2 minutes.

Mr. DANFORTH. I thank the Senator.

Mr. President, it is a little amusing to me to hear the Senator from Utah refer to members of the Machinists Union in Kansas City as a privileged, special-interest group. I would not call guys with whom I go to the Royals game a privileged, special-interest group, and I do not think they would view themselves as a special-interest group. I think they see themselves as people who have invested a great deal of their lives in a particular company. They have homes and families, and they have made their plans on the basis of their future with this particular company.

I certainly am not here as a champion of mindless Government regulation; but, unlike ordinary Government regulation, in the airline industry you have a comprehensive system of regulation which has been created by the Federal Government, in the first place, under which the industry has developed.

It seems to me most unusual to provide a transitional period to cushion any possible blow for the companies, when we do not provide a transitional period for the people who work for those companies.

Furthermore, with respect to the health of the industry, I think it is my hope that we can finally get a bill worked out here which will benefit the airline industry as a whole. But the issue is not the airline industry as a whole. The issue is specific airlines that may be affected very differently from one another as a result of this bill. What happens if most airlines profit from or are helped by this bill but one particular airline, on which a whole community depends, goes bankrupt as a result of this bill?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DANFORTH. May I have 2 additional minutes?

Mr. PEARSON. How much time does the Senator need?

Mr. DANFORTH. About 3 minutes.

Mr. PEARSON. I yield the Senator 3 minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. DANFORTH. Mr. President, I should like to present a hypothetical situation, because I think it really explains how this situation is going to work with respect to families located, for example, in Kansas City, Mo., should a

particular airline suffer as a result of this bill.

Let us suppose a man is employed by TWA and has a wife and a couple of kids, and all of a sudden TWA shuts down its operation in Kansas City. Under the proposal of the Senator from Nebraska, just what happens to that individual? What is he supposed to do the next morning? Is he supposed to wait for the phone to ring? Is he supposed to wait for some benefactor to move into some other city where he can get a job? Maybe he cannot. What is going to happen to his neighbor? What is going to happen to thousands of people who live in the community? Where are they supposed to go in search of another job?

That is why a meaningful labor protection proposition is important. What Senator ZORINSKY has offered is absolutely meaningless so far as the average employee of an airline is concerned.

Mr. ZORINSKY. Mr. President, I yield back the remainder of my time.

Mr. CANNON. I yield back the remainder of my time.

UP AMENDMENT NO. 1230

Mr. DANFORTH. Mr. President, I send to the desk an amendment which I offer as a substitute for the amendment offered by the Senator from Nebraska.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH) proposes an unprinted amendment numbered 1230, in the nature of a substitute.

The amendment in the nature of a substitute is as follows:

In lieu of the language proposed by Mr. ZORINSKY in Amendment No. 1707 to S. 2493 insert the following:

EMPLOYEE PROTECTION PROGRAM

SEC. 22. (a) GENERAL RULE.—The Secretary of Labor shall make monthly assistance payments, or reimbursement payments, in amounts computed according to the provisions of this section, to each individual who the Secretary finds, upon application, to be an eligible protected employee. An eligible protected employee shall be a protected employee who (1) has been deprived of employment, or (2) has been adversely affected with respect to his compensation, on account of a qualifying dislocation.

(b) MONTHLY ASSISTANCE COMPUTATION.—(1) An eligible protected employee shall be entitled to receive a monthly assistance payment, for each month in which he is an eligible protected employee, in an amount computed by the Secretary. The Secretary, after consultation with the Secretary of Transportation, shall, by rule, promulgate guidelines to be used by him in determining the amount of each monthly assistance payment to be made to a member of each craft and class of protected employees, and what percentage of salary such payment shall constitute for each applicable class or craft of employees.

In computing such amounts for any individual protected employee, the Secretary shall deduct from such amounts the full amount of any unemployment compensation received by the protected employee.

(2) If an eligible protected employee is offered reasonably comparable employment, and such employee does not accept such employment, then such employee's monthly assistance payment under this section shall be reduced to an amount which such employee would have been entitled to receive if such employee had accepted such employment. If the acceptance of such comparable employment would require relocation, such employee may elect not to relocate and, in lieu of all other benefits provided herein, to receive the monthly assistance payments to which he would be entitled if this paragraph were not in effect, except that the total number of such payments shall be the lesser of three or the number remaining pursuant to the maximum provided in subsection (e).

(3) Whether employment is "reasonably comparable" shall be determined pursuant to regulations promulgated by the Secretary.

(c) ASSISTANCE FOR RELOCATION.—If an eligible protected employee relocates in order to obtain other employment, such employee shall be entitled to receive reasonable moving expenses (as determined by the Secretary) for himself and his immediate family. In addition, such employee shall be entitled to receive reimbursement payments for any loss resulting from selling his principal place of residence at a price below its fair market value (as determined by the Secretary) or any loss incurred in canceling such employee's lease agreement or contract of purchase relating to his principal place of residence.

(d) DUTY TO HIRE PROTECTED EMPLOYEES.—(1) Each person who is a protected employee of an air carrier which is subject to regulation by the Civil Aeronautics Board who is furloughed or otherwise terminated by such an air carrier on account of a qualifying dislocation shall have first right of hire, in order of seniority and regardless of age, in his occupational specialty, by any other air carrier hiring additional employees which held a certificate issued under section 401 of the Federal Aviation Act of 1958 prior to the effective date of this section. Each such air carrier hiring additional employees shall have a duty to hire such a person before they hire any other person, except that such air carrier may recall any of its own furloughed employees before hiring such a person. Any employee who is furloughed or otherwise terminated on account of a qualifying dislocation, and who is hired by another air carrier under the provisions of this subsection, shall retain his rights of seniority and right of recall with the air carrier that furloughed or terminated him.

(2) Beginning on the date on which monthly assistance payments under this section begin, the Secretary shall establish, maintain, and periodically publish a comprehensive list of jobs available with air carriers certificated under section 401 of the Federal Aviation Act of 1958. Such list shall include that information and detail, such as job descriptions and required skills, the Secretary deems relevant and necessary. In addition to publishing the list, the Secretary shall make every effort to assist an eligible protected employee in finding other employment. Any individual receiving monthly assistance payments, moving expenses, or reimbursement payments under this section shall, as a condition to receiving such expenses or payments, cooperate fully with the Secretary in seeking other employment. In order to carry out his responsibilities under this subsection, the Secretary may require each such air carrier to file with the Secretary the reports, data and other information necessary to fulfill his duties under this subsection.

(3) In addition to making monthly assistance or reimbursement payments under this section, the Secretary shall encourage negotiations between air carriers and representatives of eligible protected employees with respect to rehiring practices and seniority.

(e) PERIOD OF MONTHLY ASSISTANCE PAYMENTS.—(1) Monthly assistance payments computed under subsection (b) for a protected employee who has been deprived of employment shall be made each month until the recipient obtains other employment, or until the end of the 36 months occurring immediately after the month such payments were first made to such recipient, whichever first occurs.

(2) Monthly assistance payments computed under subsection (b) intended to compensate for a loss of job shall be paid for no longer than 36 months with respect to protected employees with less than 10 years prior service with his former employer, for no longer than 48 months with respect to protected employees with more than 10 but less than 15 years, and for no longer than 60 months with respect to other protected employees;

monthly assistance payments intended to compensate for decreased wages shall be paid for no longer than 48 months with respect to all protected employees;

provided that the total number of monthly assistance payments made under this section for any reason shall not exceed 60.

(f) RULES AND REGULATONS.—(1) The Secretary may issue, amend, and repeal such rules and regulations as may be necessary for the administration of this section.

(2) All rules and regulations shall be submitted to the Congress on the date that they are proposed by the Secretary. Such rules and regulations shall become effective 60 legislative days after the date they were submitted to the Congress, unless during that 60-day period either House adopts a resolution stating that that House disapproves such rules or regulations, except that such rules or regulations may become effective on the date during such 60-day period, that a resolution has been adopted by both Houses stating that the Congress approves of them.

(3) For purposes of this subsection, the term "legislative day" means a calendar day on which both Houses of Congress are in session.

(g) AIRLINE EMPLOYEES PROTECTIVE ACCOUNT.—All payments under this section shall be made by the Secretary from a separate account maintained in the Treasury of the United States to be known as the Airline Employees Protective Account. There is authorized to be appropriated to such account annually, beginning with the fiscal year ending September 30, 1979, such sums as are necessary to carry out the purposes of this section, including amounts necessary for the administrative expenses of the Secretary related to carrying out the provision of this section.

(h) DEFINITIONS.—For the purposes of this section—

(1) The term "protected employee" means a person who, on the date of enactment of this section, has been employed for at least 4 years by an air carrier holding a certificate issued under section 401 of the Federal Aviation Act of 1958. Such term shall not include any members of the Board of Directors or officers of a corporation.

(2) The term "qualifying dislocation" means a bankruptcy or major contraction of an air carrier holding a certificate under section 401 of the Federal Aviation Act of 1958, occurring during the first 10 complete calendar years occurring after the date of enactment of the Air Transportation Regulatory Reform Act of 1978, the major cause of which is the change in regulatory structure provided by the Air Transportation Regulatory Reform Act of 1978, as determined by the Civil Aeronautics Board.

(3) The term "Secretary" means the Secretary of Labor.

(4) The term "major contraction" means a reduction of the total number of full time employees of an air carrier within a 12-month period, except for those employees who are deprived of employment because of a strike.

(i) TERMINATION.—The provisions of this section shall terminate on the last day the Secretary is required to make a payment.

The PRESIDING OFFICER. On this amendment there is to be 1 hour of debate, evenly divided.

Mr. DANFORTH. Mr. President, this will take a very short time to explain.

The amendment, in its principal features, tracks the provisions for labor protection which are now found in the bill, but it makes the following changes:

First, a major contraction would be any contraction that is caused by the effects of the bill. In the bill as it now stands, it would take a 15-percent reduction in a year to trigger the labor protection provisions of the bill. That is, a specific airline would have to have either bankruptcy or a reduction in its work force of 15 percent or more. The amendment provides that any reduction in the work force caused by the bill would be sufficient to trigger the labor protection device. In that respect, this substitute does the same thing that Senator ZORINSKY's amendment does.

Second, the bill as it presently stands offers payments for a period of up to 3 years or until a new job is obtained, in case of loss of job. In case of decrease in wages, the bill as it presently stands calls for compensation for a maximum 3-year period of time. The substitute would change that to track the policies that the CAB has followed in the case of merger. That is, in the case of a decrease in wages, the additional compensation would be payable for 4 years, instead of the 3 years in the bill; and in the case of loss of a job, the period of compensation would range from 3 years to 5 years, depending on the length of time of employment of the employee.

If the employee had been employed from 4 years to not less than 10 years, compensation would last for 3 years. If he was employed from 10 to 15 years, compensation would last for 4 years. If he was employed for 15 years or more, compensation would last for 5 years.

The reason for this sliding scale is that the whole theory of labor protection is to protect people who have invested their lives and their life planning in a particular industry which is regulated. If a person has been there only 2 or 3 years, it was felt by the committee that that person had not sufficiently invested his future in the company that has had the contraction; that he could not go out and make other plans. But when a person really develops seniority, then the longer he has the seniority, the more he suffers as a result of the contraction. Therefore, the length of time he receives compensation would be on a sliding scale from 3 years to 5 years, depending on his seniority.

Finally, there is a requirement in the bill that a person who loses his job as a result of a contraction must accept reasonably comparable employment. It has been pointed out to me that "reasonably comparable employment" is something which is subject to interpretation, and the fear is that "reasonably comparable" might be construed as being something that is not comparable at all.

Therefore, what the substitute does is to provide that the Secretary of Labor by regulation can define what is meant by "reasonably comparable."

Mr. CANNON. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 minutes.

Mr. CANNON. Mr. President, I have to oppose this amendment. Basically, this does away with the triggering mechanism which is written into the bill at the present time.

I think the provision in the bill is very, very liberal. As a matter of fact, I think it is too liberal in some areas; and I have an amendment that I am going to propose if Senator ZORINSKY's amendment is not agreed too to make the provision a little more restrictive than it is now.

At least, we have to have some kind of a triggering mechanism. Because normal and seasonal fluctuations in the industry could well result in a windfall to people who simply are out of a job because of a seasonal fluctuation, there has to be a mechanism which triggers the protection.

So, I hope that the Senate will not support this amendment. I do not think it is necessary, and I think that the present provision in the bill is certainly very, very ample.

I am prepared to yield back my time.

Mr. DANFORTH. Mr. President, if the Senator will yield, I shall make a few additional comments.

First of all, it was pointed out to me that in the case of railroad reorganization, which is, I think, the closest precedent for what is involved here, there is no 15 percent triggering mechanism. Therefore, the people who work for the airlines point out to me why is not one form of transportation as good as another form of transportation?

Second, I think it would be an anomalous situation if there were 14 percent contraction which was caused by this bill and no protection at all were offered.

So I think that really the question is are people hurt by the bill and, if they are hurt by the bill, then the public should alleviate that burden because presumably if there is a benefit from the bill the public will realize that benefit.

Mr. CANNON. Mr. President, I am prepared to yield back the remainder of my time.

Mr. DANFORTH. Mr. President, I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back.

Mr. DANFORTH. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri, Senator DANFORTH, to the amendment of the Senator from Nebraska, Senator ZORINSKY.

On this amendment, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SPARKMAN (After having voted in the negative). On this vote I have a pair with the distinguished Senator from New York (Mr. MOYNIHAN). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withdraw my vote.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE) and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

On this vote, the Senator from New Jersey (Mr. CASE) is paired with the Senator from Oregon (Mr. HATFIELD). If present and voting, the Senator from New Jersey would vote "yea" and the Senator from Oregon would vote "nay."

The result was announced—yeas 37, nays 54, as follows:

[Rollcall Vote No. 122 Leg.]

YEAS—37

| | | |
|---|---|---|
| Anderson | Eagleton | Melcher |
| Bayh | Goldwater | Metzenbaum |
| Bellmon | Hart | Pell |
| Brooke | Hatfield, Paul G. | Randolph |
| Burdick | Heinz | Ribicoff |
| Chiles | Huddleston | Riegle |
| Clark | Humphrey | Sarbanes |
| Cranston | Inouye | Sasser |
| Culver | Javits | Schweiker |
| Danforth | Kennedy | Stone |
| Dole | Magnuson | Wallop |
| Domenici | Matsunaga | Williams |
| Durkin | | |

NAYS—54

| | | |
|---|---|---|

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Sparkman, against.

NOT VOTING—8

| | | |
|---|---|---|
| Abourezk | Hatfield, Mark O. | McIntyre |
| Case | McGovern | Moynihan |
| Haskell | | Packwood |

So Mr. DANFORTH's amendment was rejected.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PEARSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATCH obtained the floor.

The following Senators requested and by unanimous consent, the privilege of

the floor was granted in behalf of the following staff members: Mr. JAVITS: Don Zimmerman; Mr. THURMOND: Rob Lyon; Mr. STEVENS: Steve Silver; Mr. CHAFEE: Mark Gorman; Mr. SARBANES: Frances Pergericht; Mr. DURKIN: Harris Miller and Albert Weeks; Mr. BROOKE: Ralph Neas; Mr. WALLOP: Patty McDonald; Mr. FORD: Amy Bondurant; and Mr. BELLMON: James G. Prather.

Mr. CANNON. Mr. President, will the Senator from Utah yield me one moment?

Mr. HATCH. I yield to the Senator from Nevada.

Mr. CANNON. Mr. President, I would just like to say to my colleagues——

The PRESIDING OFFICER (Mr. METZENBAUM). The Senate will be in order. The Senator will suspend a moment until order is restored.

Mr. CANNON. In the light of all the unanimous-consent requests for floor privileges, if we still have room for Senators on the floor, I think we may be able to finish this measure tonight. The Senator from Utah has a substitute amendment that is not going to take very long. We have yielded back the time on Senator ZORINSKY's amendment. Senator KENNEDY has one amendment that he is willing to take a 15-minute limit on, and I have one that will take about 2 minutes.

Mr. HEINZ. Mr. President, if the Senator will yield, I have an amendment that I suppose Senators might want at least 15 minutes on a side on.

Mr. CANNON. It is possible, depending on how it goes in the next few minutes, that we may be able to finish the bill by 6:30 tonight. Otherwise, we will undoubtedly go over until tomorrow.

UP AMENDMENT NO. 1231

Mr. HATCH. Mr. President, I call up my unprinted amendment in the nature of a substitute for the Zorinsky amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH), as a substitute for UP amendment No. 1229, proposes an unprinted amendment numbered 1231:

In lieu of the language proposed to be inserted insert the following—

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted insert the following:

It is the policy of the United States not to approve employee protection programs.

Mr. HATCH. I have already made the argument on this amendment. Basically, all it does is strike the employee protection provisions of this bill, which I think set a bad example and precedent for a trend which is not right for anybody, especially the taxpayers of this country.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, will the Senator yield me 3 minutes?

Mr. CANNON. I yield 3 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I hope the amendment of the Senator from Utah will be defeated. In this legislation, we are effectively guaranteeing service to small communities in this Nation for a period of 10 years. We are maintaining certain basic protections for the airlines and their shareholders for a period in the future. Airlines are even permitted to protect certain selected routes from automatic entry despite the anticompetitive effect of such protection for airlines. We are writing in guarantees for just about every aspect of the airline industry. That happens to be the fact of the matter.

We also have a limited employee protection policy written into this legislation. That is only fair; but the amendment of the Senator from Utah would strike it out. I say we are protecting the stockholders, we are protecting the communities, and we are protecting the airlines with this legislation. The effect of the amendment of the Senator from Utah would be to say, "It is OK to protect all of those people, but we should wipe out and eliminate what limited protections there are for the employees." I say that would be unfair and unwarranted.

It seems to me that the provisions now before the Senate in the proposal of the Senator from Nevada and the Senator from Kansas are limited provisions for the protection of employees that we should not strike from this bill; if anything, they should be strengthened.

Mr. HATCH. Mr. President, I hope it will be noted that this bill would produce more competition in the airline business. But it has been estimated that there could be as much as $1 billion cost to the American taxpayers annually. I do not think the Federal Government should be in the position of having to continue to set what I consider to be a dangerous precedent of employee protection for everyone because we continue to pass such legislation here in this body.

I am prepared to yield back the remainder of my time.

Mr. CANNON. Mr. President, I will just say that I am opposed to the amendment. I personally do not think there will be the kind of disruptions painted here. I do not know where that estmate of a billion dollars a year came from; certainly not from any knowledgeable source as far as I know. But I hope the amendment will be defeated, and I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time having been yielded back, the question is on agreeing to the amendment of the Senator from Utah (Mr. HATCH). The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN) would vote "nay".

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from New Jersey, (Mr. CASE) would each vote "nay."

The result was announced—yeas 7, nays 85, as follows:

[Rollcall Vote No. 123 Leg.]

YEAS—7

| | | |
|---|---|---|
| Curtis | Hayakawa | Schmitt |
| Garn | Hodges | |
| Hatch | Lugar | |

NAYS—85

| | | |
|---|---|---|
| Allen | Glenn | Muskie |
| Anderson | Goldwater | Nelson |
| Baker | Gravel | Nunn |
| Bartlett | Griffin | Pearson |
| Bayh | Hansen | Pell |
| Bellmon | Hart | Percy |
| Bentsen | Hatfield, Paul G. | Proxmire |
| Biden | Hathaway | Randolph |
| Brooke | Heinz | Ribicoff |
| Bumpers | Helms | Riegle |
| Burdick | Hollings | Roth |
| Byrd, Harry F., Jr. | Huddleston | Sarbanes |
| Byrd, Robert C. | Humphrey | Sasser |
| Cannon | Inouye | Schweiker |
| Chafee | Jackson | Scott |
| Chiles | Javits | Sparkman |
| Church | Johnston | Stafford |
| Clark | Kennedy | Stennis |
| Cranston | Laxalt | Stevens |
| Culver | Leahy | Stevenson |
| Danforth | Long | Stone |
| DeConcini | Magnuson | Talmadge |
| Dole | Mathias | Thurmond |
| Domenici | Matsunaga | Tower |
| Durkin | McClure | Wallop |
| Eagleton | Melcher | Weicker |
| Eastland | Metzenbaum | Williams |
| Ford | Morgan | Young |
| | | Zorinsky |

NOT VOTING—8

| | | |
|---|---|---|
| Abourezk | Hatfield, Mark O. | McIntyre |
| Case | McGovern | Moynihan |
| Haskell | | Packwood |

So Mr. HATCH's amendment (No. 1231) was rejected.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the the amendment was rejected.

Mr. HANSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CANNON. Mr. President, I advise my colleagues that the time has been yielded back on the next amendment. I do not know whether Senator ZORINSKY will ask for a minute to explain it or not, but after this next vote, I intend to ask unanimous consent for a 10-minute rollcall, because we think there will be three more rollcall votes.

Mr. ZORINSKY. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment by the Senator from Nebraska. The yeas and

nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN) would vote "nay".

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

On this vote, the Senator from Oregon (Mr. HATFIELD) is paired with the Senator from New Jersey (Mr. CASE). If present and voting, the Senator from Oregon would vote "yea" and the Senator from New Jersey would vote "nay".

The result was announced—yeas 43, nays 48, as follows:

[Rollcall Vote No. 124 Leg.]

YEAS—43

| | | |
|---|---|---|
| Allen | Glenn | Percy |
| Baker | Gravel | Randolph |

NOT VOTING—9

| | | |
|---|---|---|
| Abourezk | Hatfield, Mark O. | Moynihan |
| Case | McGovern | Packwood |
| Goldwater | McIntyre | |
| Haskell | | |

So the amendment of the Senator from Nebraska (No. 1229) was rejected.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PEARSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CANNON. Mr. President, I say to my colleagues that I have two amendments that will not require rollcall votes and will not require more than 1 minute of explanation. So far as I know, there are two remaining amendments that would require rollcall votes, but they will be very short.

I ask unanimous consent that the remaining rollcalls this evening be limited to 10 minutes.

Mr. JAVITS. Mr. President, if the Senator will yield, I expect that I may have an amendment, too.

The PRESIDING OFFICER. Is there objection with respect to the 10-minute rollcalls? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 1232

(Purpose: To amend the Bill to improve the section on financial assistance to adversely affected airline employees)

Mr. CANNON. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 1232.

Mr. CANNON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 94, lines 1–6, strike: "The amounts of monthly assistance payable under this section shall be computed by the Secretary to insure that the protected employee will not, during the period in which he is entitled to protection, be placed in a substantially worse financial position with respect to wages and fringe benefits."

Mr. CANNON. Mr. President, as written, the employee protection provision seems to guarantee each dislocated employee benefits equal to full salary and fringe benefits. This should be changed.

Airline employees are not average wage earners. Some pilots earn up to $100,000 per year including fringe benefits. It would be outrageous to have the taxpayers support this style of living.

This amendment would leave the discretion concerning the level of payments with the Secretary of Labor who has the expertise and experience in providing adjustment assistance to workers.

I yield back the remainder of my time.

Mr. PEARSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1233

(Purpose: To amend the Bill to allow the existing discount fare policy of the CAB to continue)

Mr. CANNON. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 1233.

Mr. CANNON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, strike line 14 and substitute: "(7) The".

Mr. CANNON. Mr. President, as the bill is drafted, it allows existing discount fare policies to exist, so that a carrier can raise its fares up to 5 percent or lower up to 35 percent. In light of the action of the board recently in allowing discount fares up to as much as 50 perment, this amendment would allow the existing discount fare policies of the board to continue without any interference. The committee had originally contemplated that after a 1-year transition period the CAB could adjust downward the zone of pricing flexibility. Since that time, however, many new discount fares have been offered by virtually every airline. Therefore, a 1-year transition period no longer is necessary. This amendment merely gives congressional approval to the lower prices being offered throughout the country.

Mr. President, I yield back the remainder of my time.

Mr. SCHMITT. Mr. President, will the Senator from Kansas yield me 2 minutes, before he yields back his time?

Mr. PEARSON. I yield 2 minutes to the Senator.

Mr. SCHMITT. Mr. President, this is a comment relative to the preceding amendment. I thought the Senator from Nevada was still on the provision of the bill relative to the labor protection clause. I would like to make a few historical comments relative to the activity in the committee.

This is the one area where I differ with the committee. I differed with them in committee as well as here on the floor.

In the discussions we had over automatic entry and the rate at which automatic entry should occur, it was the Senator from New Mexico who felt that the rate proposed in the original committee print was too high and that it might well cause disruptions within the industry as well as within labor. In the argument against the proposal of the Senator from New Mexico to reduce that rate, it was often mentioned that this was of no concern, that the rate was not too high, and that no disruptions would occur. As soon as the compromise rate was agreed to, suddenly we were faced with a proposal within committee to add a labor protection provision, which essentially has just been adopted.

Mr. President, I do not think that the people in this area can have their cake and eat it. Either automatic entry at the rate proposed is too high or it is not. I think we can get by now with the compromise automatic entry.

However, I do want the record to be clear that I think the committee is asking unfairly for additional protections, protections which could be provided should a problem actually occur.

In addition, any allocations from the Federal Treasury that are required under this provision would be inflationary, I believe, at the time they are allocated; and of course inflation is the No. 1 problem we all have to be cognizant of during this budget cycle. I think this issue will be appropriate for discussion potentially during the actual consideration of the budget that will be before us in the next few weeks.

I thank the Senator from Kansas for yielding me time.

Mr. PEARSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

UP AMENDMENT NO. 1234

(Purpose: to amend the short title)

Mr. STEVENS. Mr. President, I call up a technical amendment which I have at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 1234.

Mr. STEVENS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On the first page, lines 3 and 4, strike out "Air Transportation Regulatory Reform Act of 1978" and insert in lieu thereof "Cannon-Kennedy-Pearson Air Transportation Reform Act of 1978".

Mr. STEVENS. Mr. President, this is a technical amendment which names this bill after the three principal sponsors of the measure.

I yield back the remainder of my time.

Mr. CANNON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the amendment is agreed to, without objection.

UP AMENDMENT NO. 1235

(Purpose: To revise the certificate issuing procedure)

Mr. KENNEDY. Mr. President, I call up my amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 1235.

The amendment is as follows:

On page 9, beginning with line 5, strike out all through line 15 and insert in lieu thereof the following:

(b)(1) The Board shall issue a certificate under subsection (a)(1) authorizing, in whole or in part, the air transportation specified in the application, if the Board determines that the applicant is fit, willing, and able to perform properly the air transportation specified in the application, and to conform to the provisions of this Act and the rules, regulations, and requirements of the Board made or issued under this Act; unless the Board determines that the air transportation is not consistent with the public convenience and necessity.

(2) In any determination as to whether or not the applicant is fit, willing and able to perform properly the air transportation specified in the application and to conform to the provisions of this Act, the applicant shall have the burden of showing that it is so fit, willing, and able.

(3) In any determination as to whether the air transportation specified in the application is or is not consistent with the public convenience and necessity, an opponent of the application shall have the burden of showing that such air transportation is not consistent with the public convenience and necessity.

Mr. KENNEDY. Mr. President, for the information of the Members of the Senate, I would be glad to have a 15-minute time limitation on the amendment.

Mr. CANNON. Mr. President, I ask unanimous consent that the time be changed to 15 minutes, 10 minutes to the sponsor of the amendment and 5 minutes to the manager of the bill.

Mr. PERCY. Mr. President, reserving the right to object, I do not object, unless I can have 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I yield myself 5 minutes.

Mr. President, I offer this amendment in behalf of myself, Senator BAYH, Senator HART, Senator HATCH, Senator PERCY, Senator GARN, Senator LAXALT, Senator ROTH, and Senator HUMPHREY. It is a very simple amendment, but a very important amendment.

As drafted, section 5 requires the Board to make an affirmative determination that proposed air service is "consistent with the public convenience and necessity" before it may grant a certificate for route authority; that is, the Board must find that the proposed service will make a positive contribution to the overall development of the air transportation system. The burden of proof for this determination falls on the applicant for the route authority. In effect, this burden puts a potential competitor-entrant in the position of having to support a costly and laborious justification of competitive service when there is nothing yet in the record which raises the inference that the service may be detrimental to the air industry. Additionally, collateral beneficiaries such as the communities to be serviced must come forth at time and expense to themselves and support the air service.

I am introducing an amendment that would remove this burden by no longer requiring the Board to make an affirmative finding that the proposed air transportation is "consistent with the public convenience and necessity." In substitute, my amendment would require the Board to authorize new service unless it is not "consistent with the public convenience and necessity." The burden for such a showing would fall on the opponent of the application.

The whole thrust of this reform legislation is that competition in the airline industry should be encouraged, not encumbered. Reversing this standard facilitates market entry by according applicants a procedural advantage when applying for route authority. This advantage carries with it the presumption that competition is good policy and in itself contributes to the development of the air transportation industry.

As Transportation Secretary Brock Adams said:

The rules of the game should be that competition is consistent with the PCN and you should have to prove your case if you're against new competition, not the other way around.

Competition in the airline industry should be encouraged, not encumbered. Competitor-entrants into markets should not be put in the position of having to support a costly and laborious justification of competitive service. Collateral beneficiaries of competitive service—communities, airports, consumers, and so forth—should not have to join in support of the proposed service at time and cost to them.

Certainly most other sectors of the economy do not have to go through elaborate administrative proceedings before the Federal Government allows them to offer a new service or product to the public that happens to compete with some other private company. Yet even under the liberalized provisions of new section 401, the airlines still have to do just that.

If a service is unwarranted or will not serve the public interest, it may be disallowed by the Board. But it is not unreasonable to require the opponents of competition to prove that it would be harmful.

The Airport Operators Council, which represents the airport operators in just about every one of the 50 States, realize that there is too much of a burden on the smaller communities under the present burden of proof. They are effectively saying that the burden should be upon that carrier that already has the route to demonstrate that the entrance of a new carrier will not meet the standard of the public convenience and necessity.

It is only in that way that we change the legislation. We are basically saying that we are procompetition rather than against competition.

That is, as I say, why we have the communities which are affected strongly in support of the legislation.

A final point that I make is that in the initial legislation introduced by the Senator from Nevada and myself, this provision was included. I am informed it has also been accepted in the markup in the House of Representatives legislation.

I hope it will be accepted by the Senate.

I reserve the remainder of my time.

Mr. THURMOND. Mr. President, will the Senator add me as a cosponsor of that amendment?

Mr. KENNEDY. Mr. President, I ask unanimous consent that the distinguished Senator from South Carolina (Mr. THURMOND) be added as a cosponsor to my amendment.

The PRESIDING OFFICER (Mr. STONE). Without objection, it is so ordered.

The Senator from Nevada.

Mr. CANNON. Mr. President, I yield myself 1 minute.

I do not know whether anyone wishes any time to speak against this amendment or not.

I personally support that position. I supported it in committee. There was some dispute in committee as to whether that test should be retained.

I do recognize that it has been supported by the President. It is supported by Secretary Adams. It is supported by a number of people who are knowledgeable in this area.

I may say that the legislative proposal for airline regulatory reform submitted to Congress by President Ford during

his administration also contained this test.

So far as I personally am concerned I support the amendment.

Mr. PEARSON. Mr. President, will the Senator yield?

Mr. CANNON. I yield to my colleague.

Mr. PEARSON. Mr. President, this amendment is consistent with the whole thrust and intent of the legislation.

I support it.

I believe the Senator from New Mexico wishes some time, and we have about 3 minutes remaining.

Does the Senator wish 1 minute?

Mr. SCHMITT. One minute.

Mr. PEARSON. I yield 1 minute to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico is recognized for 1 minute.

Mr. SCHMITT. Mr. President, so the record is clear, in the committee there was considerable discomfort about this provision, and I think it came largely from the fact that we are doing so much. I argued on many occasions that I was afraid that the rate at which the industry was going to move into the deregulated environment was potentially too fast, and I think that with this type of provision we are further accelerating that rate.

Obviously the Members here, many of them, believe that we can safely accelerate it.

I again think there is some inconsistency with our previous votes in that position.

For the record, I remind my colleagues that there are many provisions in here that are moving us toward a deregulated environment. I support those provisions. I think it is probably overkill to actually move this far with this PC and A provision.

I yield back the remainder of my time.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. CANNON. Mr. President, I yield 2 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 minutes.

Mr. PERCY. Mr. President, first of all, I commend Senator KENNEDY on his contribution to this bill.

In this regard, I not only support what he has done in helping to develop this entire bill but also feel that his amendment will serve two very important goals. Under the present burden of proof test, an applicant for new authority must show that existing service is inadequate to serve the public interest. This necessitates a great waste of financial resources by carriers and communities in legal fees to justify that the new service is necessary.

For instance, until recently Peoria, Ill., was served by only one airline. Peoria is a major city in central Illinois with the largest single manufacturer in the State headquartered there—Caterpillar. Only one airline for many years served Peoria, and as Peoria goes so goes the Nation, as Everett Dirksen used to say.

Competition, I maintained for years, would not only improve the service into Peoria but elsewhere in the Nation. It would also improve the income for the competing carriers. In the case of Peoria, since Continental began service, more flights at lower fares are available to the public. In fact, the day Continental began its service, Ozark dropped its fares 24 percent to match those by Continental. Both airlines, it appears, have benefited from the competition.

Certainly, for a city like Peoria to have to spend $200,000 arguing for better service before the CAB in the last 5 years is an undesirable thing such as the current proceeding involving improved service from Peoria to Atlanta and the Southeast. With the present system, few new applicants are able to pass the burden of proof test. Competing airlines have consistently been able to prevent new applicants from receiving authority. The Kennedy amendment would effectively end this waste.

Second, the amendment would make the airline industry increasingly competitive in nature. The present system protects existing carriers by making the applicant show that new service is necessary. Cheaper rates or improved service is rarely sufficient justification for certification. Under the Kennedy amendment, any new applicant would be granted authority unless a competitor could prove that the new service was not in the public interest. In other words, the burden of proof would now be on the competitor rather than the applicant. In practice, there would be few instances where an existing carrier could show that new service was not in the public interest. The result would be increased competition throughout the industry, lower fares, and more convenient service.

Mr. President, at this point I would like to reiterate once again a fact known to any of us who have traveled extensively abroad: Air service in the United States ranks amongst the finest in the world. Although this debate has brought to the public's attention the weaknesses and failings of our commercial air transportation system, these failings are indeed minor, when compared with the dependability, the safety, and the efficiency exhibited by the Nation's air carriers and their employees. These employees include pilots, flight attendants, reservationists, ground personnel, and others who work sometimes under adverse conditions, such as subzero cold at airports in my State of Illinois.

Airline reform legislation should directly benefit them, as more passengers are attracted to the carriers through lower fares permitted by this proposed law. More passengers translate into more employees to handle the surge of new traffic.

Additionally, airline managers should benefit by the legislation as it gives them more freedom to increase their profitability. Airline decisions will be made in airline board rooms where they belong, instead of at the CAB on Connecticut Avenue, in Washington, D.C., which has been serving as a sort of superboard of directors for the airlines. No wonder airlines earnings in recent years have averaged 3.6 percent. Investors could earn more through investment of Government securities. In order for airlines to purchase $65 billion for new fuel-efficient planes by 1990, they will need to increase their profitability and this legislation affords them at least a better opportunity than exists now. Something is wrong when airlines return on total capital is the lowest of 30 major industries in the United States.

Most importantly, this proposed law would allow for greater fare flexibility without Government inteference. Although domestic air fares are lower than European air fares, in some instances, they are not lower than fares offered by carriers to the north and south of us.

For instance, it's $12.96 less in U.S. funds, or 12 percent cheaper to fly on Air Canada from New York City to the twin cities of Sault Ste. Marie, Ontario, and Sault Ste. Marie, Mich., than it is to fly on U.S. carriers over the same general route, but on the American side of the border. The higher U.S. fare is $108.

Similarly, it only costs $41.35 to fly on Aeromexico the 449 miles from Matamoros, Mexico (across from Brownsville, Tex.) to Mexico City. Compare that with the fare from Brownsville to Dallas, which is only about 75 miles farther which costs $66 or about 41 percent more, which surely isn't solely due to the extra mileage.

Something is terribly wrong, when Canadians and Mexicans can fly American-built planes that skirt our borders at fares much lower than paid by Americans on Federal regulated U.S. carriers.

This bill will allow enough downward fare flexibility to prevent a continuation of this system.

At this time, I would like to commend Senator CANNON, Senator PEARSON, and Senator KENNEDY, for fighting the long and hard fight for reform.

The American public, airline employees, and airline executives will benefit because of their efforts.

Mr. MELCHER. Mr. President, will the chairman yield me some time?

Mr. CANNON. Yes, how much time does the Senator wish?

Mr. MELCHER. Whatever is available—3 or 4 minutes.

Mr. CANNON. Three minutes.

The PRESIDING OFFICER. The Senator from Nevada has only 1 minute remaining.

Mr. KENNEDY. Mr. President, I am glad to yield 3 minutes to the Senator.

Mr. MELCHER. I thank the Senator.

The PRESIDING OFFICER. The Senator from Montana is recognized for 3 minutes.

Mr. MELCHER. Mr. President, as this is described, it sounds as though it is all ice cream and cake. But there is another situation that develops if you reverse the public convenience and necessity test.

If service between Minneapolis and Billings is desired by United or by Western, they make the application. The city of Billings may well prefer not to jeopardize the fine service we have from Minneapolis to Billings by Northwest.

Under this requirement, what is to protect the city of Billings in establishing their case that a new entry will jeopardize the existing service and cause not only probably a threat to the city of

Billings, but also to connecting flights that Northwest has to Butte, to Bozeman, and on to Spokane.

To reverse the public convenience and necessity test and remove the burden of proving that an application is in the public interest by the applicant or carrier and placing the burden on the community opposing the application would open up market entry more than is proposed in this legislation. If this amendment were passed the CAB would automatically approve every application that came before it.

I believe the carrier should always be required to prove that the application they are making is in the public interest and the interest of the community and the consumers.

So I see this as a grave threat for the type of service that we have in our State and I dare say in many other States.

We hashed this out in the committee, and I believe the committee came down, if the chairman will advise me, or his staff will advise me, by something like 11 to 6 opposing this provision. Is that about right on the vote? It was about 11 to 6 that we came down to strike this very provision.

Mr. CANNON. I do not recall what the exact vote was.

Mr. MELCHER. I recall 11 votes to strike it.

Mr. CANNON. The first vote was a tie 8 to 8, and we came back with another vote on it. I do not recall.

Mr. MELCHER. I would say that the better judgment in this case is not to add this again to this bill. We looked at it thoroughly in committee. We determined that it jeopardized some of the existing service and some of the existing rights of communities that now have good service in States that have small populations but do depend upon air travel, such as Montana.

I hope that the amendment will not be accepted.

Mr. STEVENS and Mr. KENNEDY addressed the Chair.

Mr. STEVENS. Mr. President, I know the Senator from Massachusetts probably wishes to close on his own amendment.

Acting for the Senator from Kansas, I yield myself 2 minutes on the bill. I support the position of the Senator from Montana. This matter was taken up in the committee. We have a substantial reform package here for the airlines. I believe this issue should be faced at a later time after we see what happens with the progress that we are supporting.

I think an overwhelming majority now are supporting the bill as it came out of the committee.

To reverse the whole concept of the P.C. & N. test at this time, in my opinion, would be wrong because of the reasons stated by the Senator from Montana. What we are going to have is we are going to have communities fighting each other under the name of competition and private enterprise, fighting to get a new airline in to land so they can compete with a sister community, and, at the present time, the burden is on the applicant. This would shift this around and put the burden upon those who feel they would be harmed by the applicant's admission into this competition.

I think that burden will fall upon the small communities and, particularly, those of us who represent areas that have vast numbers of small communities, each of which is interested in having this kind of service. I believe that to reverse the P.C. & N. test now would be unwise and, therefore, I cannot support the amendment.

Mr. KENNEDY. Mr. President, I would like to read the relevant part of the letter of the Airport Operators Council:

> Acceptance of your amendment, Senator, will save airport communities in the overwhelming majority of cases from having to expend large amounts of local public funds to engage consultants and attorneys to develop economic data to file with the board supporting desired new air service. The burden would, in our view, be more appropriately switched to opposing parties to show such applications are consistent.

Mr. President, I have in my hand the list of small communities in this country that have spent hundreds, thousands, and millions of dollars of local taxpayers' money, and that have been called upon to hire attorneys to appear here before the CAB in instance after instance to support new air service. Some of those instances lasted 8 to 10 years.

What the Airport Operators Council understands is that, in the overwhelming majority of cases, their interests will be protected. Perhaps in a particular situation a new entrant will fail to provide service and the community will still have to come to the CAB. However, in the overwhelming majority of cases the communities, as represented by the Airport Operators Council, feel their interests will be protected.

Let me say finally, Mr. President, that basically all this amendment does is shift the burden of proof to the protestant. If evidence is going to be brought alleging that new service is not consistent with public convenience and necessity, obviously it is going to be denied. The question, then, is whether you are going to put that particular burden on the hundreds of smaller communities in this country, or on an incumbent carrier who protests entry by a competitor. In Boston, we have the Massachusetts Port Authority. It has plenty of lawyers who can come down here and spend all the time that is needed. But when the burden of proof falls on the smaller communities, it falls substantially harder. A reversed burden of proof is in their interest. Their support is the reason for this amendment being put forward.

Make no mistake about it, small communities are the ones that are strongly in support of this particular position. Small community support was the genesis of it.

I yield 1 remaining minute to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. BUMPERS. Thank you, Senator KENNEDY.

[Laughter.]

The PRESIDING OFFICER. Does the Senator request time?

Mr. KENNEDY. Since I yielded 3 minutes to an opponent may I have 1 minute? I ask unanimous consent to have one more minute.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BUMPERS. Mr. President, when we oppose an amendment like Senator KENNEDY's, we are saying that we are scared to death that competition is going to spoil free enterprise.

Senator KENNEDY's amendment sets forth the simple criterion that you either believe in competition or you do not. You either believe communities ought to be served, or they ought not to be served.

In Jonesboro, Ark., Texas International moved out in 1975, and the people of Jonesboro feared they would lose airline service completely. Air Illinois came in, and enplanements increased from 2,600 in 1975 to over 7,000 in 1976. This occurred because Air Illinois flew where the people of Jonesboro wanted to go, and at the time of day they wanted to go, which Texas International had never done.

The city of Jonesboro, Texas International, and Air Illinois were all pleased, and it is a very happy circumstance, because competition moved in and replaced regulation.

No airline is going to enter a market under this amendment unless it stands a good chance to compete, and compete profitably. The airlines ought to have this right, and I do not think the small communities of this country, of which my State has a large number, as most of yours do, should have to hire lawyers and spend a lot of public money to promote competition. That is what our job is supposed to be.

Therefore, I support the Kennedy amendment.

Mr. SCHMITT. Mr. President, since the Senator from Kansas is here, I yield myself 2 minutes on the bill.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, again I would remind my colleagues that this whole bill increases the availability of competitive airline service throughout our economy. This whole bill provides many protections for various parts of the industry and for various size communities.

I think we must remember, and I believe I am correct in this, that the provision we are discussing here with this amendment applies to 401 proceedings of the CAB and does not apply to the automatic entry provision. It does not apply to the dormant authority provisions or any other of the six or seven ways in which increased competition will occur.

I agree with what the Senator from Montana and the Senator from Alaska have said about specific types of problems in small communities.

However, I think it is even more important to realize how much we are doing to increase the availability of airline service, potential availability of airline service, to all communities, and that to

take this further step is unnecessary at this time. In the future we may find that a change would be of importance and of use, once we see how the other provisions have interacted with a regulated industry.

So, Mr. President, again I would strongly urge that this amendment be rejected.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. CANNON. Vote.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

● Mr. KENNEDY. I have a few questions that go to the revisions that this legislation would make in the application of the antitrust laws to the airline industry. The Antitrust Subcommittee, which I chair, and its staff worked closely with you and the Commerce Committee all last year in drafting these antitrust provisions. Basically, what I would like to do, Senator CANNON, is confirm that your view of the legislation is the same as mine—just to reassure myself that no further antitrust amendments are needed.

First, I am very concerned that we avoid creating a gap in jurisdiction where neither the CAB nor the Federal courts will feel competent. For instance. under the current law every agreement an airline enters into—whether oral or written—must be brought before the CAB for approval. Board approval automatically brings with it antitrust immunity. Under S. 2493, however, carriers need not file each and every agreement and I think this is a good reform that will reduce the paperwork burden on private companies and the CAB. Thus, under the proposed bill, there will be situations where there are unfiled intercarrier agreements that the Board no longer has to approve.

I am sure the intent is that these unfiled agreements would not receive any immunity from the antitrust laws. But, sometimes Federal courts have been reluctant to entertain antitrust questions where the acts complained of might have been immunized by a Federal agency. What I want to be certain about is that an election by an airline not to file an agreement is understood to be an election to accept full antitrust responsibility and jurisdictional exposure in the Federal courts if the agreement is anticompetitive. It will not do any harm to the regulatory scheme if the courts step in and hear criminal complaints and civil damage suits in situations where airlines have entered into restraint of trade agreements and where those agreements have not been specifically immunized from antitrust attack by the CAB. Does my understanding comport with the committee's intent?

Mr. CANNON. Yes; I agree with your remarks and your interpretation of the proposed bill entirely.

Mr. KENNEDY. Another point that I would like to make along those lines concerns the question of predatory pricing. We all know that predatory pricing in any industry is unlawful. It is an attempt to price below cost in order to drive out competitors and, afterward, to raise prices above costs to recoup losses. The Sherman Act prohibits predatory pricing because it is an attempt to monopolize. We also know that as a practical matter predatory pricing is a rare occurrence, especially where entry into an industry is not very difficult. Thus, the best check against unlawful predatory pricing is liberalized entry.

So, the bill's entry provisions are important to prevent predatory pricing. The proposed bill would also remove a lot of unnecessary Federal supervision of prices but it would still charge the CAB with cancelling predatory rates if it should find that they exist. Now cancellation of rates by the Board is a useful power, yet by itself it isn't much of a threat and, standing alone, might not do as much to discourage some competitors from taking unfair aim at the new entrants as do the antitrust laws. But any company might think more than twice about a treble damage suit. And that's my point: I do not see anything wrong with a court permitting a treble damage action to lie based on a truly predatory pricing scheme.

The proposed bill defines "predatory" as violative of the antitrust laws, so both the Board and the courts would be acting under the same standard. There is no sound reason not to let a damage action proceed and a number of good reasons to go ahead, especially if the Board has first considered the rate and found it predatory. Although the allegedly unlawful prices would first have to be investigated and ruled upon by the Board, my interpretation of the new ratemaking scheme is that, once the Board finds a rate predatory, this kind of private litigation could proceed. Is that your understanding?

Mr. CANNON. That is correct, Senator. The Federal Aviation Act has a specific provision (section 1106) that says that it does not displace private remedies, and while that cannot always be taken literally, this is one of the instances where it can and should.

Mr. KENNEDY. There is one last point that I would like to be sure about. It concerns the revisions to section 414 of the Federal Aviation Act—the section that permits the Board to confer antitrust immunity on relationships that it approves. The new section has two aims: first, to minimize the amount of immunity that is automatically conferred to no more than is necessary for the activities specifically reviewed and specifically immunized by the Board. Second, to give the Board the discretion to limit that immunity even further. On this second point, I would like to be certain that we all agree that this means that the Board could, if it chose, approve of activities that it would not immunize. That is, that in the proper case, the Board might allow a merger or agreement to go forward but still decide to withhold antitrust immunity altogether. I think this is important because it will take a lot of responsibility for policing competitive fair play off the Board and put it back on the airline. The Board will not have to always choose between disapproval and antitrust immunity, and the parties will know that they cannot misbehave after initial approval and expect to use a Federal law as a shield against antitrust liability.

I would just like to confirm that your understanding of this section is the same as mine.

Mr. CANNON. Yes.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. CASE), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) would each vote "yea."

The result was announced—yeas 69, nays 23, as follows:

[Rollcall Vote No. 125 Leg.]

YEAS—69

So Mr. KENNEDY'S amendment (No. 1235) was agreed to.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PEARSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania.

UP AMENDMENT NO. 1236

Mr. HEINZ. Mr. President, I send an (Purpose: To revise Federal preemption) amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

of the amendment be dispensed with.

read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 1236.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading

On page 77, line 10, beginning with the comma, strike out all to the period in line 11 on page 78, and substitute the following:

"(2) When any air carrier which on August 1, 1977 was operating in intrastate air transportation regulated by a State receives a certificate to provide interstate air transportation, any authority received from such State prior to August 1, 1977 shall be considered to be part of its authority to provide air transportation received from the Board under this Act until modified, suspended, amended or terminated as provided under this Act."

Mr. HEINZ. Mr. President, the amendment I have offered is designed to remove a problem that I think has crept into this legislation. Specifically, the proposed amendment deals with the so-called 50 percent rule in section 17, which has to do with Federal preemption. The amendment would eliminate the 50 percent rule from the Federal preemption section of the bill and make all carriers holding a Federal certificate subject to CAB regulation for the entirety of their operations.

The purpose of this amendment is severalfold.

First, it attempts to remove a double layer of regulation which would exist on an intrastate carrier should that intrastate carrier seek to establish just one interstate route, which, as it now stands, would be subject to both State and Federal regulation.

I know this is not at all the intention of this legislation. This legislation is designed to accommodate deregulation, not more regulation.

Second, the amendment seeks to make it easier for an intrastate carrier, should it wish an interstate route, to do so by reducing the barriers which would otherwise exist. One of those barriers that under the bill would exist is the barrier of trying to convert State-regulated routes into federally regulated routes. Even under this bill there is still Federal regulation, of course, of a lesser nature.

It does so by allowing, any time an interstate route is granted to an intrastate carrier, the intrastate carrier to convert its intrastate routes from State regulation to Federal regulation, and it thereby makes competition an easier reality and reduces, at the same time, the paperwork burdens.

The need for this I think is inarguable. I think virtually every witness testified that it is in the public interest to have one system of regulation for interstate air transportation. Where conflicts do exist or may exist between State and Federal authorities we should make every effort to eliminate those conflicts.

The dual system of regulation in the past has created an impossible jumble of conflicts between Federal and State agencies. For example, federally regulated carriers and State-regulated carriers which serve the same market within a State under their respective certificates find it impossible to compete on a fare basis because of the differences in statutory provisions, rules, regulations, of the different agencies.

For example, federally regulated carriers are required to file tariffs usually on 45 days' notice. Interstate carriers in some States have no advance notice requirement and have an obvious advantage over the federally certificated carriers in competitive markets. But in other instances a single carrier may hold both Federal and State authority. As a practical matter, while these authorities merge and it is virtually impossible to distinguish between them, the fact is that in attempting to maintain such a fictional distinction on this dual system of regulation the agencies find themselves in irreconcilable positions. For example, State agencies have ordered the continuation of service which the CAB may have ordered suspended on the grounds of public interest.

Well, that is exactly the kind of dual regulation this amendment seeks to eliminate, Mr. President. I hope we will be able to do so.

I would like to add the Senator from Kansas (Mr. PEARSON) as a cosponsor of this amendment.

Mr. President, I hope my colleagues will join me in bringing about a beneficial step which will benefit competition, benefit the cause of deregulation, and benefit, most of all, a sound air transportation system in the United States.

Mr. CANNON. Mr. President, I yield myself 5 minutes.

This Federal preemption section represents the diligent efforts of the committee with input from the National Association of Regulatory Utility Commissioners to provide a remedy to this complex problem of dual Federal-State regulation. The committee recognized and confirmed the right of State governments to regulate airlines which provide wholly intrastate air transportation. However, the committee felt it was vital that only one standard of regulation exist for airlines operating under authority of the CAB.

Section 423 prohibits States from exercising economic regulatory control or jurisdiction over interstate airlines. However, in recognition of the intrastate airline systems which have developed under State regulation, those States will retain jurisdiction over such intrastate airlines if those carriers obtain CAB certificates until such time as more than 50 percent of the air carriers' revenues are derived from interstate services. The three States affected are California, Texas, and Florida which have developed extensive regulatory structures and these States will continue to exercise economic jurisdiction over Air California, PSA, Southwest, and Air Florida respectively. Under this provision, should any of those carriers obtain a CAB certificate, then the CAB would regulate only the interstate service of that carrier with the State retaining the regulatory control over the rest of the intrastate service of the carrier. Under the present law, should one of these intrastate carriers obtain a CAB certificate, the entire system would immediately fall under Federal jurisdiction. But under the bill, not until 50 percent or more of the carriers' revenues are derived from interstate services will that carrier come under the regulatory control of the CAB. And carriers, large or small, providing wholly intrastate services will continue to be regulated by their respective States.

This section has been carefully worked out to balance the competing interests and I believe it satisfies the problems of dual regulation without infringing upon the rights of the States to regulate purely intrastate activities.

I oppose the Senator's amendment.

I yield to the Senator from California.

Mr. CRANSTON. Mr. President, I urge support for the Commerce Committee's solution to the problem of Federal preemption. I am for as little regulation as possible. That is why I support the committee bill. I am for as little overlapping of regulation as possible. That is not the issue before us.

California pioneered in many ways the innovations which proved that airline competition will reduce air travel costs to consumers. That was done basically in my State. The situation today in California is such that our State public utilities commission estimates that Federal preemption of State regulation of intrastate air routes would result in higher, not lower, air fares for the thousands of Californians and visitors to our State flying the high density routes between Los Angeles and San Francisco, Oakland, Sacramento, and San Diego.

The State public utilities commission also assured me in a letter dated April 17 that the commission "is committed to helping PSA financially." The PUC hopes the Senate will not eliminate our rate regulations to the detriment of Californians and all visitors to California who enjoy the benefit of our low air fares which have been achieved through an unusual blend of vigorous competition and enlightened and reasonable regulation.

I do not know the situation in other States, but I assume that there may be similar circumstances elsewhere in the United States.

I urge support for the Commerce Committee solution to this problem.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I want to make very clear to my colleagues that this amendment does not permit the Federal Government to move in on an intrastate carrier. It does not, I say to my good friend from California, permit

the Federal Government to preempt State regulations on an intrastate California airline.

I believe PSA is an airline that flies solely intrastate. Is that not correct, I ask my good friend from California?

Mr. CRANSTON. It would become interstate almost immediately if this amendment is passed. Presently, it is intrastate.

Mr. HEINZ. My understanding, I say to my good friend from California, is that PSA supports this amendment.

Mr. CRANSTON. Of course.

Mr. HEINZ. Well, it seems to me that it would be advantageous to have an airline that is that significantly interested in the kind of competition that I think we all believe this would bring about. I repeat, if an airline is regulated solely intrastate, this does not permit the Federal Government to move in on that airline. If, however, another airline chooses to have an interstate route or be regulated interstate, as a result there would be more competition. It is hard for me to see how that would result in increased fares. Competition rarely does that, in the opinion of this Senator.

I guess my basic problem with the 50 percent in the committee bill, I say to my good friend from Nevada, is that it is like denying paternity until the woman is a little more than half pregnant. In fact, where you have interstate routes, you have an interstate carrier. It seems to me that the 50 percent is an artificial distinction.

Mr. President, I ask that we proceed to a vote, unless there is any other discussion.

Mr. CANNON. Mr. President, I am ready to yield back my time.

Mr. CRANSTON. Will the Senator yield me 1 minute?

Mr. CANNON. Yes.

Mr. CRANSTON. I point out that the present air fare of PSA from Los Angeles to San Francisco is $26.02. The maximum fare, if this is adopted, could be $51.57, an increase of $25.55. A 98-percent increase would occur. Since there are over 2 million passengers, the estimated impact in California would be an increase in air fares of $51,066,000. Deregulation should not lead to that kind of increase in the cost of flying in my State or any State.

Mr. CANNON. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield back his time?

Mr. HEINZ. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The nays appear to have it.

Mr. HEINZ. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

Mr. PEARSON. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. PEARSON. The vote on this amendment is still of the 10-minute variety?

The PRESIDING OFFICER. The Senator is correct.

The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

The result was announced—yeas 20, nays 72, as follows:

[Rollcall Vote No. 126 Leg.]

YEAS—20

| | | |
|---|---|---|
| Baker | Heinz | Pearson |
| Bartlett | Helms | Percy |
| Bellmon | Javits | Roth |
| Dole | Laxalt | Schweiker |
| Eagleton | Lugar | Scott |
| Hathaway | Mathias | Thurmond |
| Hayakawa | Muskie | |

NAYS—72

NOT VOTING—8

| | | |
|---|---|---|
| Abourezk | Haskell | McGovern |
| Case | Hatfield, Mark O. | McIntyre |
| Goldwater | | Packwood |

So Mr. HEINZ' amendment (No. 1236) was rejected.

Mr. CANNON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CANNON. Mr. President, I yield 30 seconds to the Senator from New Hampshire.

Mr. PEARSON. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from New Hampshire will be recognized as soon as the Chair obtains order.

The Senator from New Hampshire.

Mr. DURKIN. I thank the Chair and I thank the distinguished chairman.

Mr. President, I have five interrogatories here with respect to the intent of the bill and the chairman has indicated that his answers are "Yes."

I ask unanimous consent that they appear in the RECORD in toto as if delivered and I ask unanimous consent that a statement and accompanying exhibit appear as if delivered in its entirety.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. The Senator is correct. The answer is "Yes" to the questions that he has just had printed in the RECORD.

Mr. DURKIN. I thank the Chair.

● Mr. DURKIN. Some small communities are concerned that sections 401 and 419 of the Federal Aviation Act of 1958 as amended by this bill could result in termination of certificated air service to them. I believe that the bill does guarantee continued certified air service but I want to clarify the intent of appropriate sections.

Is it correct to say that under sections 401 and 419 of the Federal Aviation Act as amended by the bill, each and every community now receiving certificated scheduled air transportation service shall continue to have certificated scheduled air transportation without any break in service for a minimum of 10 years?

Mr. CANNON. Yes; it is correct.

Mr. DURKIN. Is it correct to say that under sections 401, 419(h) and appropriate sections as amended by the bill, the CAB is required to guarantee that each community presently receiving certificated air carrier service shall continue to get certificated scheduled service for the 10 year period, at least until January 1, 1989, as specified in section 419(h)?

Mr. CANNON. Yes; it is correct.

Mr. DURKIN. Is it correct to say that the language of the bill guarantees that even in the circumstances in which a community has not yet received a determination by the CAB as to what constitutes essential air service, the Board is required to provide continued certificated scheduled air service to the community?

Mr. CANNON. Yes; the Senator is correct.

Mr. DURKIN. Is it correct to say that under the language of this bill that once a community has had a determination by the CAB of that service which constitute essential air transportation for the eligible point of the community, the CAB shall be responsible to guarantee that under all circumstances, that community shall continue to receive air transportation under the procedures laid out in section 419(h) and other appropriate sections of the bill?

Mr. CANNON. Yes; the Senator is correct.

Mr. DURKIN. In other words under the provisions of this bill any community which is receiving certificated scheduled air service today is guaranteed a minimum of 10 years of certificated scheduled air service including such subsidy as is required to maintain that certificated scheduled air service.

Mr. CANNON. Yes; that is correct.

Mr. DURKIN. Mr. President, I want to thank the Chairman of the Commerce Science and Transportation Committee

for helping me to clarify this matter which is so important to small States such as New Hampshire.

Mr. President, as we all know the making of new laws and the overhauling of existing ones is often a complicated business, not easily explained or understood.

The proposed airline deregulation bill that comes before us this week is no exception. Commerce Committee members and their staffs have spent countless thousands of hours working up a bill that attempts to address the many aspects of airline regulations.

Because this issue contains so many complexities, it comes as a great pleasure to me to have one segment of the media take the time and effort to outline and illuminate this complex area.

Mr. Norman Knight, president and editor-in-chief of the Knight Quality Stations, has done just that with a 48-part series of radio broadcasts aired on his three Massachusetts and two New Hampshire radio stations.

Mr. Knight has had a long and distinguished career in broadcasting business and, I greatly respect the work he has done in highlighting this legislation. Many of his concerns have been reflected in the final version of this bill.

His reports are incisive, to-the-point, and, most important, give the people who are paying our salaries an accurate idea of what we are doing for them in Washington.

I ask unanimous consent that Mr. Knight's editorials, which he researched, wrote, and produced, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE AIRLINES: REGULATION, DEREGULATION OR REREGUATION—A FORTY-EIGHT PART SERIES OF RADIO REPORTS

REPORT NO. 1

Our listeners know how strongly the Knight Quality Stations feel about the free enterprise system so it might seem somewhat strange that we would question deregulation of any type. In this and succeeding analyses we will discuss Senate bill 689 titled "The Air Transportation Reform Act of 1977", and referred to as the Cannon-Kennedy bill. The Knight Quality Stations believe that the public is entitled to a fair, objective analysis of this proposed legislation because it is concerned with all aspects of air travel—cost, safety, services, growth, subsidies and jobs. Our next report will analyze the claims of the bill's sponsors as we continue this series on the Knight Quality Stations.

REPORT NO. 2

As we continue our series, "The Airlines: Regulation, Deregulation or Reregulation", the Knight Quality Stations feel that you should know there are long term and short term problems that have to be considered. The proposed legislation, Senate bill 689, has been discussed by many witnesses before the subcommittee on aviation of the Senate Committee on Commerce, Science and Transportation. We will analyze this testimony together with the expressed opinions of the airlines, consumer groups and other interested parties. . . . And, in so doing, the Knight Quality Stations hope to help you draw your own conclusions and communicate your thoughts to your legislators.

REPORT NO. 3

Continuing this Knight Quality Stations series, "The airlines: regulation, deregulation or reregulation", we will begin to analyze the viewpoints of Senator Edward Kennedy. A leading advocate of airlines deregulation, Senator Kennedy cosponsored with Senator Cannon of Nevada this legislation, popularly known as the Cannon-Kennedy bill. In his testimony before the Senate Aviation Subcommittee, Kennedy voiced his desire to bring more competition to the airline industry. He emphasized that the proposed legislation would permit fare increases of 10% the first year and 20% annually thereafter, and fare reductions low enough to cover direct costs. More details concerning Senator Kennedy's thoughts on airline fares on our next report.

REPORT NO. 4

Our last report on "The airlines: Regulation, deregulation or reregulation" referred to the geneal structures of air fare increases and reductions as proposed by Senator Kennedy in the Cannon-Kennedy bill. In his testimony before the Senate Aviation Subcommittee, Senator Kennedy compared the fares between the CAB regulated airlines and the intrastate carriers operating in California and Texas, whose fares were 20 to 60% lower than the CAB formula with a similar situation in California. The Senator quoted extensively from a General Accounting Office report to Congress estimating 22 to 52% higher air fares than would be possible under less regulation, and feeling that the GAO study's results paralleled economic studies by Keeler, Miller and Douglas. More of Senator Kennedy's testimony and conclusions when we continue our Knight Quality Stations series on Senate bill 689.

REPORT NO. 5

We continue our reports with more of Senator Kennedy's testimony as joint sponsor of the Cannon-Kennedy bill which proposes to "deregulate" airlines. Senator Kennedy claims that this bill contains a direct cost standard for fare reductions which will result in significant price reductions to the traveler and prevent below-cost pricing. He feels it makes little sense to maintain a federal formula and wants airlines to be free to lower fares generally and experiment with selective cheaper fares. In the Senator's opinion the airlines should lower air fares, eliminate frills and avoid lavish scheduling. More about this when the Knight Quality Stations continue our series, *"The airlines: Regulation, deregulation or reregulation"*, with Senator Kennedy's conclusions about consumer preferences.

REPORT NO. 6

Continuing with our series on proposed airlines deregulation, we want to report further on Senator Kennedy's testimony regarding the question of air fares and consumer savings. Senator Kennedy differentiates very carefully between what he calls "costly competition" and "price competition". His basic premise was that fuller planes result in lower fares and that consumers prefer a fuller plane, lower fare alternative. Senator Kennedy's contention that price competition would be productive while service competition is wasteful was the thrust of his testimony in regards to pricing—next the Knight quality stations will discuss the other major area of Senator Kennedy's testimony regarding the regulation of entry as our Knight quality stations series continues on this subject of the Cannon-Kennedy bill.

REPORT NO. 7

Our analysis of proposed air line deregulation is called, "The airlines: Regulation, deregulation or reregulation", and continues with the testimony of Senator Kennedy before the Senate Aviation Subcommittee. The "regulation of entry" portion of the Senator's testimony consumed three extra long pages of single-space transcripts that reinforced his claims that substantive changes are necessary in order to allow newcomers to provide competitive trunk service, and to replace the CAB's route award procedures with less rigid guidelines. He suggests that carriers are dissuaded from filing applications because of small prospects of success, high legal costs and limited litigation resources. These and other contentions by Senator Kennedy when the Knight Quality Stations will discuss the specific entry provisions of Senate bill 689, "The Air Transportation Regulatory Reform Act of 1977."

REPORT NO. 8

Senate bill 689 titled, "The Air Transportation Act of 1977", is the subject of this series on the Knight Quality Stations. In outlining some of the changes proposed by the Cannon-Kennedy bill, Senator Kennedy testified that the new general entry provisions will make route grants automatic if the CAB does not act within prescribed time limits, define factors that are consistent with public convenience and necessity, provide for circumstances for route awards without full proceedings, and provide for automatic route expansion by both CAB-regulated and intrastate airlines. We discuss Senator Kennedy's conclusions about general entry provisions when we continue with our series "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 9

Senator Kennedy's testimony to the Senate Aviation Subcommittee contained two major areas of discussion, pricing and general entry. This report on the Knight Quality Stations addresses the Senator's conclusions regarding the entry provisions of the Cannon-Kennedy bill. He refers to them as precise, definite and uncomplicated. The bill's cosponsor claims that although airlines say they can compete in price, history says they have not done so, declaring that the scheduled lines offered lower-priced service only after nonscheduled carriers offered low fares with fuller airplanes. He concluded that the proposed general entry rules will make it possible for new carriers to charge lower prices and thereby constitute the realistic threat that will force higher priced, existing airlines to lower their fares. The Knight Quality Stations will report next on other points made by Senator Kennedy in his testimony on Senate bill 689.

REPORT NO. 10

These reports by the Knight Quality Stations have analyzed the major points made by Senator Kennedy in his testimony to the aviation subcommittee. He said that the CAB's power to confer antitrust immunity on airlines has been seriously abused, and that his bill provides for a more limited and precise statutory antitrust exemption. He also insisted that contrary to questions raised, small communities would not be denied service but that services would be expanded. . . . and that the current subsidy program would be reformed. As regards the loss of jobs caused by regulatory reform, Senator Kennedy testified there would be no disruption and no threat to jobs, that the opposite would be the case. Next on our series, "The airlines: Regulation, deregulation or reregulation", a "wrap-up" of Senator Kennedy's testimony.

REPORT NO. 11

When he testified before the Senate Subcommittee on Aviation, Senator Kennedy referred to Senate bill, "The Air Transportation Regulatory Reform Act of 1977", as a responsible, practical and comprehensive formula to redirect our Nation's air transportation system into one that better serves consumers, communities and airlines. He claimed that the act will result in less Government, not more. . . . And that a vital economy is less affected by cut-throat competition than by choking regulation. In succeeding reports we will move on to testi-

mony by members of the executive branch of our Government as our series, "The airlines: Regulation, deregulation or reregulation," continues on the Knight Quality Stations.

REPORT NO. 12

Our Knight Quality Stations series on proposed airline deregulation must include the views of John F. Robson, Chairman of the Civil Aeronautics Board. In his testimony before the Senate Aviation Subcommittee, Chairman Robson reaffirmed and restated certain of the Board's judgments. First, that the Congress should direct regulation of domestic airlines towards more reliance on greater market forces. And, second, that the transition toward this change should be gradual and carefully monitored. Third, he emphasized the risks and uncertainties that could accompany relaxation of present entry, exit and pricing controls. All of these are important points and in our next report we will continue with other viewpoints expressed by Chairman Robson in the Senate subcommittee's consideration of Senate bill 689, the Air Transportation Regulatory Reform Act of 1977.

REPORT NO. 13

Our last Knight Quality Stations report on the subject of proposed airline deregulation covered three of the basic points made by John Robson, Chairman of the CAB in his testimony before the Senate Aviation Subcommittee. His fourth contention was that such increased competition could lead to failure of less-efficient large carriers as well as smaller carriers—but along with these possible failures he suggested that there could be interruptions of service to smaller markets, hardships to airline employees, different fares and rates market to market, and a real possibility of greater concentration by fewer airlines. His final point was that if no reform were accomplished, the long term effects could be unsatisfactory for everyone—the airlines, the Government, and the public. More on this final point and other interesting comments by Chairman Robson when we continue our series, "The Airlines: Regulation, Deregulation or Reregulation."

REPORT NO. 14

Continuing our analysis of the views of John Robson, CAB Chairman, in our last report we talked of potential long term effects without reform. According to Robson, these could include weakened financial prospects for some of the carriers, erosion of investor confidence, and increased pressure for Federal aid to assist carriers. Robson feels that with the potential hardships of a more competitive system the public must be protected by flexible regulatory control under new statutory guidance. It is important to note that Robson's testimony clashed in substantive areas with that of Senator Kennedy, and when these reports continue we will analyze Robson's warnings to the Subcommittee on Aviation in regard to Senate bill 689.

REPORT NO. 15

Earlier in this series the Knight Quality Stations felt it important to report some of the key areas of Senator Kennedy's testimony concerning his cosponsorship of Senate bill 689. This was followed by some of the basic information supplied to the Senate Aviation Subcommittee by John Robson, CAB Chairman. Inherent in Robson's testimony was his strong feeling about regulation and, although he agreed with the aims of the Cannon-Kennedy bill, he was certainly at odds with some of Kennedy's means to achieve those objectives. Robson recommended that the regulatory structure of our air transportation system move toward increasing reliance on competitive market forces as the principal means of regulation. However, his recommendation contained an important qualification that will be discussed on our next report.

REPORT NO. 16

Continuing with the comments made by John Robson, CAB Chairman, we talked in our earlier report about his recommendation that there be greater reliance on competitive market forces. This series places great emphasis on a phrase that followed Robson's statement about competitive market forces, three words starting with "if". Those words were, "if carefully introduced, and based on this "if", Robson believes that such a system could create more efficiency, result in lower fares, allow carriers to seek pricing and marketing innovations without Government intervention, increase opportunities for long-term airline profits, and maintain satisfactory levels of air service. John Robson's conclusions when we continue with our series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 17

It is obvious to those following our series on the proposed airline deregulation bill that it can affect all Americans. This report emphasizes the differences in thinking between Chairman Robson and Senator Kennedy. For instance, Robson has warned that Senate bill 689 proposes fare flexibility that would lower fares in selected high-density markets but could lead to higher fares in smaller markets. The CAB Chairman also opposed the free entry dormant authority, discretionary route mileage provisions, and the transfer of jurisdiction of interline agreements and mergers to the Justice Department. Chairman Robson and Senator Kennedy's disagreements raise some basic questions that we will discuss when we continue with "The airlines: Regulation, deregulation or reregulation" on the Knight Quality Stations.

REPORT NO. 18

Consideration by the U.S. Senate Aviation Subcommittee of Senate bill 689 included testimony by John Robson, CAB Chairman. Prior reports on this Knight Quality Stations series have outlined some of the differences between Robson's thoughts and those of the bill's cosponsor, Senator Kennedy. Clashing with Kennedy's statements, the Chairman testified that Senate bill 689, in Robson's words, "omits many elements essential to a prudent and effective regulatory reform program and contains features which will be counter productive." Robson's testimony raises a basic question, does Senate bill 689 move too fast with too much and, in the process, does it create more bureaucracy than we now have? The Knight Quality Stations will analyze the views of other interested parties as our airline deregulation series continues.

REPORT NO. 19

Our Knight Quality Stations series on proposed airline deregulation continues with some of the comments made by Charles Schultze, Chairman of the Council of Economic Advisers. In his appearance before the Senate Aviation Subcommittee, he made it clear that the President does want an airline regulatory reform bill . . . and would like to have it on his desk for signature by summer! He felt that Government regulations stifle competition and inflate air fares, and would like to see eased route entry without adverse effects to small communities. A controversial statement on airline employees job protection by Charles Schultze in our next report on this series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 20

Senate bill 689 is titled, "The Air Transportation Regulatory Reform Act of 1977", and one of the questions raised in Senate Aviation Subcommittee hearings has been that of possible loss of jobs for airline employees. Charles Schultze, Chairman of the Council of Economic Advisers, testified that the Carter administration would be unwilling to support any proposal to protect airline workers against job loss. In this connection Schultze said, "Such protection would be undeserved and would grant airline workers an unprecedented measure of security." Also testifying with Schultze was Robert Crandall of the Council of Wage and Price Stability and when questioned about portions of his testimony, Crandall conceded he was "not an airline expert." Testimony by Schultze and Crandall seemed to agree with the aims of the Cannon-Kennedy bill but showed a distinct lack of knowledge of what is happening on a day-to-day basis in the real world of the airline industry. More comments by administration spokesmen when this Knight Quality Stations series continues.

REPORT NO. 21

Airline deregulation as proposed through the Cannon-Kennedy bill and our series on this subject continue as we analyze the testimony of W. Michael Blumenthal, Secretary of the Treasury, before the Senate Aviation Subcommittee. He repeated the administration's desire for greater fare flexibility, eased route entry and more competition. At the same time he wanted the airlines to have the burden of proving how continued regulation would benefit either themselves or the public. Differing with Charles Schultze, Blumenthal felt that legislation should give direction to the CAB and should not dictate specific route entry or pricing formulas. It is important to note that supporters of some type of airline regulatory reform differ substantially in the means by which such reforms can be accomplished. Next, Brock Adams, Secretary of Transportation, on this Knight Quality Stations series.

REPORT NO. 22

This is another report in our continuing series on proposed airline deregulation and we will discuss the comments of another administration spokesman, Transportation Secretary Brock Adams. Referring to the Cannon-Kennedy bill, he said that it provides a appropriate framework for reform. However, he differed with specific points of the bill and suggested that most new entries be in the short-haul, high-density markets like Dallas-Houston or Los Angeles-San Francisco. He opposed the direct cost formula of the bill and disagreed with Kennedy's proposal that jurisdiction of interline agreements and mergers be moved to the Justice Department. There are noticeable differences of opinion among administration spokesmen and major areas of disagreement with Senator Kennedy as we move on to our next report featuring again comments by Brock Adams.

REPORT NO. 23

Brock Adams is Secretary of Transportation of these United States and his viewpoints on the airline study carry weight. When he testified before the Senate Aviation Subcommittee, he disagreed with various features of the Cannon-Kennedy bill and we think a highlight of his testimony was his admission that changes should be controlled experimentally with enough time for adjustment by the involved parties, and he urged strongly that the President be responsible for international aviation matters, contrary to Senator Kennedy's proposal. It was when Secretary Adams was testifying, that Senator Stevens of Alaska said that the bill might be good for Los Angeles-Las Vegas or New York-Washington, but not for small communities and, now quoting Senator Stevens, "it goes too far, too fast, and you'll be sorry because you'll have to administer it." Transportation Secretary Adams' testimony was important enough that we are going to continue with it on our next report on the Knight Quality Stations.

REPORT NO. 24

Continuing with transportation Secretary Adams' comments and testimony on Senate bill 689, known as the Cannon-Kennedy bill, the Secretary stated that air service is a public utility! This statement in itself is valid, but raises problems for Senator Kennedy and his espousal of the bill that he is co-sponsoring since the bill calls for enormous rate flexibility, a far cry from the status of a public utility. Secretary Adams differed with Kennedy in other areas as well as with his strong emphasis on airline employee interests. Assuming proper performance, job security is important to every worker, including airline employees, so our next report will feature this subject along with other comments by Secretary Adams on the Knight Quality Stations series: "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 25

When concluding our last report in our analysis of the Cannon-Kennedy bill, we mentioned the differences in certain areas between Senator Kennedy's proposals and the comments of Transportation Secretary Brock Adams, who emphasized strongly the interests of airline employees. This was most evident in his statement, "We should consider what might occur if there is a failure causing significant unemployment." Although Secretary Adams stressed gradualism, he supported the President by saying that he hoped "something emerges this year" and then said, "if things go wrong, there'll always be another Congress, another year when we can correct it." When we change a basic regulatory act that has been on the books for decades, many interested and qualified parties disagree with Secretary Adams and believe that more study and a true national dialogue are essential in spite of the well-known names associated with Senate bill 689. Testimony from consumer activist Ralph Nader next as our Knight Quality Stations series continues.

REPORT NO. 26

The so-called airline deregulation hearings conducted by the Senate Aviation Subcommittee featured an appearance by Ralph Nader. Nader severely castigated the CAB as a protective shield for airlines. He claimed that, because of the CAB's policies, consumer fraud has been winked at, meaningful price competition has been outlawed, and inefficiency has been encouraged. Nader was one of the few witnesses who totally supported the Cannon-Kennedy bill and thoroughly disapproved of virtually every aspect of present airline regulation. He went one step further and proposed the creation of a consumer agency funded by airline passengers. Nader's comments were not unexpected and, as these reports continue on the Knight quality stations, we will analyze comments made by the other cosponsors of Senate bill 689, Senator Howard Cannon of Nevada.

REPORT NO. 27

Senator Kennedy's testimony before the Senate Aviation Subcommittee was perhaps the most voluminous of any one participant. However, this series of reports on the Knight Quality Stations would be incomplete without some statements by the bill's other cosponsor, Senator Howard Cannon of Nevada, chairman of the Aviation Subcommittee. Since Senate bill 689 proposes basic changes, it is essential that we quote Howard Cannon—these are his words. "Even though I'm cosponsor of the legislation, substantially all of the people with expertise have said that the proposed bills go too far." With his obvious influence, perhaps Senator Cannon's words are prophetic regarding the direction that will be taken by the committee and the Senate as a whole. Some thoughts by Senator Barry Goldwater, next on this series, "the airlines: regulation, deregulation or reregulation."

REPORT NO. 28

Those following this series know that the Knight Quality Stations believe that Senate bill 689 deserves careful deliberation and proper representation of all viewpoints. An aviation enthusiast, Senator Barry Goldwater testified at the Senate subcommittee hearings and praised the airline industry as "the best system in the world, charging the cheapest rates." Senator Goldwater said that he was not convinced that Congress should take legislative action until workings at the CAB were improved, and that the CAB currently has the powers to accomplish everything offered in the legislation—and that one or two airlines might control the industry under "the law of the marketplace." Senator Goldwater concluded that although he originally thought deregulation was a good idea, he is now not so sure. Some expressions by airline industry spokesmen as our series continues on the Knight Quality Stations.

REPORT NO. 29

This report in our continuing series on the proposed airline deregulation bill includes comments by Eastern Airlines chairman, Frank Borman. The respected airline executive and former astronaut blasted Senate bill 689 as "flawed legislation that threatens the very basic core of our system." Chairman Borman alluded to the faulty assumptions in the Cannon-Kennedy bill, concentrating heavily on the GAO study of airline fares. One of the assumptions to which Borman referred was that of seating density. Using actual mock-ups of an aircraft, members of the subcommittee stumbled over one another trying to squeeze into the cramped seats illustrating one of the flaws in this GAO study that served as a primary information source for Senator Kennedy. Some other airline reactions when "the airlines: regulation, deregulation or reregulation" continues on the Knight Quality Stations.

REPORT NO. 30

Our last report referred to the testimony of Eastern Airlines chairman, Frank Borman, in regard to the Cannon-Kennedy bill and we think it important to add that the former astronaut feels that the present laws should not be rewritten. On the contrary he felt that the existing law "didn't need one comma changed." Borman's testimony before the Senate Aviation Subcommittee was highlighted by his claim that the goals of deregulation could be achieved through improved procedures at the CAB. The Eastern Airlines chairman said that airlines are already highly competitive—that it is the unregulated auto, tobacco, computer, and soft drink industries that are dominated by one or two major companies. Additional thoughts from airline spokesmen when we continue this series on the Knight Quality Stations.

REPORT NO. 31

Airline reaction to the Cannon-Kennedy bill was almost universally negative but the reasons differed from airline to airline. For instance, Delta Airline Senior Vice President Richard Maurer conceded that Delta was in strong financial shape and could survive the price and route war that he felt was inevitable under reregulation. Maurer felt strongly about the consequences of passage of Senate bill 689 and quoting the Delta senior vice president: "Delta was part of a total air transportation system and that after destruction had been wrought, there would be cries for new and more oppressive forms of regulation, leading toward nationalism." Following Maurer's testimony, regional carriers proposed changes in both the entry and pricing provisions of the bill and requested route and subsidy protection. More airline reactions to the Cannon-Kennedy bill when the Knight Quality Stations continues its series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 32

In testifying before the Senate Aviation Subcommittee on Senate bill 689, TWA President C. E. Meyer, Jr., opposed its enactment. Regarding possible job losses, Meyer felt the proposed legislation would create employment problems. Here are his words: "Some deregulation proponents indicate that those losing their jobs with one company will simply move to another. But I am sure that job retraining programs or labor protective provisions will not satisfy an employee who has spent the last 20 years of his life establishing a career with a particular company. A large proportion of these jobs are associated with a high degree of specialized skill and the possibility of retraining workers with these skills for employment at a comparable level in other industries is minimal. In any meaningful sense, their careers would be at an end." This and other conclusions by President Meyer will be reviewed as the Knight Quality Stations continue with this special series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 33

The Knight Quality Stations are devoting this report to the conclusions stated by TWA President, C. E. Meyer, in his testimony before the Senate Aviation Subcommittee on Senate bill 689. Meyer suggested some changes in the regulatory structure but on some of the very important issues raised by the Cannon-Kennedy bill he proposed that a joint industry/Government task force be established to study these problems and make recommendations. Meyer predicted that the passage of Senate bill 689 would aggravate the energy crisis, lead to a loss of airline service to small communities and severely hinder airlines from raising capital. More about the effect of this bill on airline finances when we continue our series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 34

The effect of Senate bill 689 on the airlines' ability to finance their capital needs is the subject of this report on the Knight Quality Stations. In his testimony to the Senate Aviation Subcommittee, Frederick Bradley, vice president of Citibank, said that the Cannon-Kennedy bill would prove disastrous to both the industry and the traveling public. Bradley predicted that carriers, not able to raise money to replace aging fleets, would actually disappear, through bankruptcy or merger. Another primary lender to airlines, William McCurdy, vice president of Equitable Life, warned that, with deregulation, the airlines would go the way of northeastern railroads. McCurdy said that none of the Big Five met current credit-worthy standards and that lenders unanimously agree that deregulation would cause upheaval, if not total chaos! Some airline union reactions to Senate bill 689 when we continue our series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 35

Union and airline employees' reaction to the Cannon-Kennedy bill appears to be universally opposed. AFL–CIO counsel, William Mahoney, says the bill will be anti-consumer, anti-industry, anti-labor and anti-public interest. He feels that passage of the bill will be devastating to airline employees' morale and, therefore, to the efficiency and safety of air transportation. John Peterpaul, vice president of the Machinists, says the bill would reduce the seniority system to chaos. He feels that the bill has the same effect as if someone purposely set out to put carriers out of business, destroy the world's finest air trans-

portation system, and throw thousands of skilled workers out of jobs. President J. J. O'Donnell of the Airline Pilots' Association, said we do not need deregulation or reregulation but better regulation, and emphasized that safety standards could not be maintained by new entrepreneurs. Our Knight Quality Stations series continues with our own conclusions and recommendations.

REPORT NO. 36

The Airline Transportation Regulatory Reform Act of 1977 is the title of Senate bill 689 and it is referred to as the Cannon-Kennedy bill after its cosponsors. It is interesting that the Aviation Subcommittee, which conducted these hearings earlier in '77, was not the originating force for this proposed airline regulatory reform legislation. It was first discussed in the Senate Judiciary Committee's Subcommittee on Administrative Practice and Procedures, chaired by Senator Kennedy. Senator Cannon, Chairman of the Senate Aviation Subcommittee, might agree that the Judiciary Committee is an unlikely place to discuss aviation matters. The fact is that Kennedy was the moving force in proposing this legislation and Subcommittee Chairman Cannon probably "went along with it." Now he has some second thoughts. More about this as the Knight Quality Stations continue with an analysis of the Cannon-Kennedy bill.

REPORT NO. 37

In our last report we discussed briefly the origins of the proposed aviation regulatory reform measures now contained in the Cannon-Kennedy bill and we suggested that Senator Cannon now has some misgivings. Over a year ago Senator Cannon said that open entry economics would result in lower prices only on high density routes, service would be diminished over less profitable routes, economic concentration would occur, and the concept of limited entry and route certificates would be balkanized by profit-minded new entrepreneurs. Cannon felt then that eventually air fares would rise, when the strongest competitors had out-muscled their weaker opponents. More on Senator Cannon's views when we continue our series "The airlines: Regulation, deregulation or reregulation.

REPORT NO. 38

Senator Cannon's views continue on this report as we analyze further the Senate's consideration of the Air Transportation Regulatory Reform Act of 1977. Moreover during the recent Aviation Subcommittee hearings, Cannon said he is having second thoughts about a new law, believes the best answer might be necessary reforms in the existing law and to see to it that the CAB does a better job of administering it. Cannon is obviously keeping an open mind, Knight Quality Stations congratulate him for doing so. After our extensive research we are convinced that all the facts must be heard and that the Aviation Subcommittee, the full Senate Commerce Committee, and the Senate itself must not allow political expediency to transcend the long-range public interest. Some other viewpoints on Senate bill 689 in our next report on "The Airlines: Regulation, Deregulation or Reregulation."

REPORT NO. 39

In cur continuing series on the subject of proposed airlines deregulation, the consensus of most large airline carriers in their Senate testimony was that the proposed deregulation would have a severe negative impact on the industry and the Nation's transportation system. One of the exceptions was United Airlines, a carrier that found areas of agreement with the proposals. United felt that under deregulation, carriers could use their sales and managerial skills for the benefit of companies and consumers. Most of the other major airlines felt that Senate bill 689 goes much too far—beyond desirable reform to radical changes that could jeopardize our national airlines transportation system. More about this when our airlines deregulation series continues on the Knight Quality Stations.

REPORT NO. 40

This series of reports on Senate bill 689 is concerned with the public's right to know about legislation that can affect our lives in many ways. Our airlines are respected universally as the most efficient and economical in the world. The Knight Quality Stations agree with most of the major carriers that it is desirable to accomplish regulatory reform, lower fares, and better service—but not if it means the destruction of our airlines and the possibility of making them public charges like the railroads. More about the railroads and their relationship to this controversy when we continue with some of our conclusions on this special series, "The Airlines: Regulation, Deregulation or Reregulation.

REPORT NO. 41

In continuing our airlines deregulation series, some of our Knight Quality Stations research has centered on comparisons of the airlines with the railroads. Amtrak last year cost the American taxpayers $360 million, subsidy demands by the end of this decade could reach $6 billion! In this series the view of various administration spokesmen and those of Senator Kennedy have been conveyed in as much detail as possible within the limitations of radio analysis. We are convinced that railroads, particularly those of the Northeast, are a great lesson in history for those in public life who do not have the background training or experience to tamper with the world's finest transportation system. More conclusions about Senate bill 689, the Air Transportation Regulatory Reform Act of 1977 when our series continues.

REPORT NO. 42

This report on Senate bill 689 discusses the research basis for many of the assumptions drawn by Senator Kennedy. He projected increased airline revenues resulting in lower fares based on a GAO study; the airlines based their figures on the CAB's own estimates. Kennedy claims a fare reduction of 10 percent would bring the airlines $240 million a year in added revenues but the CAB's estimate is that the carriers would lose that much money. The Knight Quality Stations believe that with a half-billion-dollar difference, we prefer to accept the CAB figures based on actual operating experience instead of untested theories. The GAO study might not be the solid research that Kennedy claims, but could be blue-sky theory, and in our next report the Knight Quality Stations will analyze further the conflicting viewpoints of Senator Kennedy and airline officials.

REPORT NO. 43

Knight Quality Stations would be remiss were we not to discuss the impact of Senate bill 689 on the energy situation. With the passage of the Cannon-Kennedy bill in its present form, the subsequent deregulation would mean a capacity increase by carriers on good routes and withdrawal from poor ones. Domestic airline experience indicates that we would have over-capacity with low load factors and the misuse of precious fuel—this at a time when our President has stated that the gravity of the energy crisis could be exceeded only by the possibility of war. More conclusions as we wind down this series of reports by the Knight Quality Stations on the Air Transportation Regulatory Reform Act of 1977.

REPORT NO. 44

Listeners to this series are aware of the complicated issues facing our Congress in regard to proposed airline deregulation. What is not so obvious are the consequences of the passage of Senate bill 689 in its present form and the distinct possibility that deregulation simply doesn't "cut it." For one thing the traditional method of salvaging employees of weak carriers is a merger, but this does not apply to a deregulation environment. The reasons is that in the airline business a surviving carrier merges with a weak carrier to obtain routes. Under deregulation there are no protected routes. This potentially serious problem can adversely affect Americans in all walks of life. More on this and related areas as our conclusions continue on this series "The Airlines: Regulation, Deregulation or Reregulation."

REPORT NO. 45

Our last report discussed some of the consequences of the passage of Senate bill 689. If deregulation does not work, lower profitability and the inability to attract new financing will mean that obsolescent aircraft could not be replaced. Some trunk carriers would be forced to institute massive layoffs while dozens of other industries would be affected as suppliers to the airlines and airports. Many airline employees could lose senicrity, thousands of trained and skilled professionals might be displaced with traumatic implications for their families and communities. The effect of Senate bill 689 on safety and services, next when we continue this series, "The Airlines: Regulation, Deregulation or Reregulation."

REPORT NO. 46

Our airlines deregulation series continues with our conclusions about the effect on safety and services if Senate bill 689 is passeed. If deregulation brings new entries into the airlines business, our studies convince us that interline reservations, ticketing and baggage handling will become progressively more chaotic. We like competition, actually we love it. But with the kind of competition that now exists, we do not believe that new carriers can achieve acceptable profit levels and match the present carriers' safety margins. Aircraft modernization would be discouraged, many smaller cities will lose air service, and large Federal subsidies would be required. On the other hand, we believe that some constructive changes are necessary and we'll look at those in our next report as we near the conclusion of our series, "The airlines: Regulation, deregulation or reregulation."

REPORT NO. 47

Like many of those who have testified before the Senate Aviation Subcommittee on Senate bill 689, we believe that some regulatory reforms are necessary. For instance, we think that the airlines should have some flexibility in making pricing adjustments to cover costs, most businesses are permitted to do so. We agree with those who recommend that a joint industry-Government task force look at present route structures and encourage new competition by establishing realistic criteria that will provide additional services without destroying existing carriers. However, we object to hasty adoption of Senate bill 689 which responds not to public enlightenment but to political expediency disguised as regulatory reform progress. Next, our final report as we complete our series, "The airlines: Regulation, deregulation or reregulation" on the Knight Quality Stations.

REPORT NO. 48

In this, our final report on Senate bill 689, we say unequivocably that this bill could be the first step toward nationalization of our airlines. There will be more bureaucracy, not less. With Federal ownership our airlines system would be equated with those in Europe where Government-owned carriers offer limited services at fares double those in our country. The world's finest and least subsidized air transportation network should not be destroyed to satisfy parochial theories.

The Knight Quality Stations believe you should make your opinion known to your Senator. And based on our analysis, we recommend that he vote against Senate bill 689 as an experiment which should not be undertaken since its results will not be deregulation but, instead reregulation that will cost Americans more and give us less.●

Mr. CANNON. I yield 30 seconds to the distinguished majority leader.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, for their diligent labor in managing the Air Transportation Regulatory Reform Act of 1978 (S. 2493), I would like to commend my distinguished colleagues, Senator CANNON, chairman of the Committee on Science, Commerce, and Transportation—this is the first bill he has brought to the floor and managed since he became chairman of that committee—and Senator PEARSON, the ranking minority member of that committee. Also I wish to commend Senator KENNEDY, chairman of the Antitrust and Monopolies Subcommittee of the Judiciary, who is a primary cosponsor of this legislation.

Each of these Senators and their respective committees have worked assiduously to lay the foundation which supports this far-reaching regulatory reform measure. The thoroughness and thoughtfulness of their efforts have made possible the timely and expeditious consideration of the bill. I believe the breadth of support for this measure in the Senate today reflects the quality of their individual and combined efforts.

This is a bill of great importance, in the first instance, because it will provide long overdue and necessary reform for an overregulated and stagnant airline industry. By creating an atmosphere of greater flexibility and competition, it will make that industry more efficient and more responsive to the needs of the consuming public, providing better service at reduced prices.

But S. 2493 is far more significant than simply a measure to improve the performance of one sector of our economy. It also stands as a major step in our Nation's fight against the inflation that is having such a detrimental effect on our economy.

As we are all well aware, today inflation is one of this country's most serious economic problems. Yet, controlling it seems to be our most elusive national objective. Our economy has been afflicted by increasingly higher rates of inflation throughout the 1970's. During this time, we have prescribed several doses of wage and price controls and many doses of higher interest rates to contain it. Unfortunately, these policies have not been successful.

The Air Transportation and Regulatory Reform Act provides us with a different approach. It will help to strengthen the free enterprise system in the airline industry by lessening economic regulations. Its overall effect will be both anti-inflationary and expansionary.

When the Civil Aeronautics Board was established by law in 1938, the air transportation business was in its infancy. Congress determined that orderly development of the industry and its markets would benefit the industry, consumers, and the national interest. Mr. President, I believe the 1938 law has served us well.

Regulating the industry as though it were in its infancy, however, no longer makes good economic sense. In order to protect those airlines which were fledgling enterprises 40 years ago, the 1938 law minimizes the number of markets in which more than one air carrier can compete and virtually eliminates price competition. This in turn has minimized the total number of competitors in the industry.

Indeed, no new trunk carrier has been certified since 1938, yet 80 applications have been filed with the Board since 1950. Between 1970 and 1975, the Board did not even hold hearings on route applications.

Insulated from competition, carriers have become increasingly inefficient, driving fares up and profits down. With fares and routes ruled out as grounds for competition, carriers compete by offering fancy frills and services, such as meals and beverages, which add to costs without a commensurate gain in ridership.

Moreover, the CAB has set prices in a way which tends to push fares up when ridership and profits decline. The Board's pricing formula has had a negative spiral effect on fares and ridership in the name of stabilizing profits. As more and more Americans are priced out of the air travel market, the Board has granted fare increases, further discouraging ridership and dampening profits. This chain of events leads me to conclude that the 1938 law no longer makes good economic sense.

In recent years, the Board itself has recognized the need to rationalize its policies. John E. Robson, Chairman during the Ford administration, was the first Board member to espouse reform. The new Chairman, Alfred E. Kahn, and other members of the Board have intensified efforts to reduce Federal regulation and promote more competition. The Board is encouraging airlines to reduce fares, and more airlines are being allowed to compete for the lucrative business of many important commercial routes.

It is interesting to note, Mr. President, that industry critics who in the past have argued that flexible entry and lower fares would lead only to lower profits, higher operating costs, and business failures, now are filing more requests for new routes and discount fares. Contrary to previous industry expectations, lower fares have contributed to and, in some cases, precipitated a surge in passenger traffic and profits. Airlines offering discount fares—TWA, American, and United—all have reported increases in revenues as a result of more travelers taking advantage of the discounts.

Some airlines have said that they are in favor of competition, but that legislation is not necessary, because carriers will continue to offer service at competitive prices. Mr. President, it is a curious thing that the airline industry purports to support the free enterprise system, yet some airlines oppose legislation which would lessen Government regulation and promote competition—the hallmark of the free enterprise system.

Also, I wonder how long an airline would continue to offer services at competitive prices if the prospect of increased competition were not imminent or if the leadership at the CAB were replaced by individuals less inclined to reduce regulation and promote competition. As procompetitive as the Board is today, eliminating unnecessary restrictions is constrained, in the end, by the language of the statute itself.

That was the purpose of our deliberations here today, Mr. President, to amend the existing statute in such a way as to reduce unnecessary Government interference in the marketplace. For example, S. 2493 provides that any regulated carrier may reduce a fare by as much as 35 percent without prior Board approval. In markets served by more than one carrier, airlines also will be free to raise fares by 5 percent. Not only will paperwork and other regulatory costs be minimized, but also the freedom to change fares will stimulate price competition.

In addition, S. 2493 will reduce the economic burden imposed by the Government on enterprises seeking to enter the air transportation business. This legislation eases the eligibility criteria which must be met in order to be certified as a common carrier.

The automatic entry provision also reduces limitations placed by the Government on new or existing enterprises seeking to expand services. For the first 2 years after enactment, a certified carrier will be free to serve one new route a year without CAB approval. After the first 2 years, a carrier will be free to serve two routes per year without Government approval.

Mr. President, the flexible entry and pricing provisions of this bill will help Americans cope with inflation without cutting back on purchases. Lower air fares encourage greater ridership, which means more jobs. Servicing more passengers while reducing individual fares is by definition anti-inflationary. Inflation can be controlled and unemployment reduced by strengthening the free enterprise system. That is what this legislation provides, and it is the reason why President Carter called for the enactment of air transportation regulatory reform this year. The Senate has acted wisely in support of this legislation, the benefits of which will be great.

I again want to commend the manager of the bill, Senator CANNON, who has been known in the Senate as one of our best floor managers while he served with distinction as chairman of the Committee on Rules and Administration.

He has mastered the difficult and complex legislation which the Commerce Committee must deal with, and now guides that committee with the same great skill and knowledge he displayed as Chairman of the Rules Committee.

Mr. CANNON. Mr. President, we have taken a significant action here today to reduce the cumbersome regulatory process and to streamline outdated regulations. In addition we have taken a sig-

nificant action toward reducing the amount of Government intervention in the private business sector, in an area where that intervention is no longer serving the best interests of the industry or of the consumer.

I hope this is just one of many pieces of legislation which will come from this body to reduce Government regulations where they are outdated and do not serve consumers or the regulated industry.

This is a good bill. It provides the key elements of pricing flexibility and liberalizes the requirements for entry. It contains adequate protections for carriers and employees alike. In short, it is a well-balanced, well-thought-out piece of legislation which will encourage new and more competition.

At the same time, we have provided for the maintenance of essential air transportation to small and isolated communities—something absent under the present law; and in fact we are providing that service so our Nation's small communities will improve.

I would like to thank the distinguished ranking Republican Member from Kansas; all the members of the committee and the majority and minority staffs, all who have worked so long and hard on this legislation. Mr. President, we can be proud of the action we have taken today.

● Mr. MUSKIE. Mr. President, I support S. 2493, the Air Transportation Regulatory Reform Act of 1978. This bill would partially deregulate the Nation's airlines. It represents the first comprehensive revision of the structure of airline regulation since the establishment of the Civil Aeronautics Authority in 1938. The bill instructs the Civil Aeronautics Board to work toward a goal of providing low-cost, efficient air transportation in a regulatory environment based on competitive market forces.

There are a number of attractive provisions of this bill which would bring the fresh air of competition to the airline industry. It would permit freer entry of air carriers into new markets and provide more flexibility in setting fares. It would also reduce the CAB's power to approve anticompetitive mergers, acquisitions, and other control activities.

The bill also contains adequate safeguards to insure a smooth transition to a more competitive environment. It contains employee protection provisions should an air carrier suffer a major financial problem resulting from enactment of the bill. It establishes a new program including commuter as well as local service air carriers for small communities. It also renews for an additional 5 years the guaranteed loan program for air carriers serving small communities.

Mr. President, as chairman of the Budget Committee, I have a special interest in this bill because of its potential anti-inflationary effects. All of us are aware of the heavy price which inflation exacts upon American consumers and taxpayers. The public opinion polls make it clear that Americans view inflation as our most critical economic problem. All of us have had this confirmed by our constituents.

Next week the Senate Budget Committee will report to the Senate the first budget resolution for fiscal year 1979. The committee was especially mindful of the inflation problem in preparing the fiscal year 1979 budget. We tried to achieve reductions in spending and in the deficit wherever possible to signal the country our awareness of the necessity for congressional action to lower inflation.

The control of aggregate spending will be critical to the battle against inflation, especially as the economy approaches full employment in the future. But there is another inflationary battle that must be fought. That is the battle against Government actions which restrict supply and directly increase costs and prices, whatever their impact on spending and the deficit.

Regulatory actions in particular can sometimes be severely inflationary without adding a dollar to Government spending or the deficit. Sometimes this inflationary price is worth paying, but often it is not. For this reason, we must give careful consideration to the legislation which may directly increase or reduce costs and prices.

It has been estimated that actions taken by the Congress last year will add a full percentage point to the rate of inflation this year. And just 2 weeks ago this body passed a farm bill that, together with the administration's recent actions, would have added another half a percent to consumer prices.

Fortunately, I sense a growing recognition that we cannot afford to continue to legislate inflation. Although the farm bill passed the Senate, the President unequivocally pledged to veto the bill as inflationary, and the House of Representatives resoundingly rejected it. Washington may finally be hearing the voice of the American people insisting that action be taken against inflation.

Mr. President, this bill presents us with an opportunity to lower prices through our actions rather than to raise them. We have had so little experience with genuine competition in interstate air travel that it is difficult to make precise estimates of the impact on this bill on inflation.

However, recent experience with intrastate fare reductions and fare discounting indicates that, as a result of this bill, fares would fall, passenger traffic would increase, and employment in the industry would rise. A range of estimates by the Comptroller General, the Civil Aeronautics Board, and private economists have indicated that full airline deregulation would reduce fares by 10 to 30 percent, saving air travelers $1½ to $4½ billion annually. This bill, which would provide partial deregulation, would have a slightly smaller but significant anti-inflationary impact, cutting 0.1 to 0.3 percentage points from the rate of inflation next year.

Mr. President, a few tenths of a point off the inflation rate may not sound like much. In fact it can be very significant. The President's anti-inflation strategy is to decelerate inflation by 0.5 percent a year, and this is widely recognized to be an ambitious goal. This bill's anti-inflation impact next year would represent a substantial portion of this deceleration of inflation.

Mr. President, I would like to illustrate the importance of a "few" tenths of a percent of inflation. Consider the Nation's consumers. Two-tenths of a percent of additional inflation cuts $2.5 billion from the purchasing power of their income. It cuts another $1 billion from the purchasing power of their savings held in banks and thrift institutions.

Furthermore, cost-of-living adjustments then lead to higher wages and transfer payments, and thus to a second round of higher prices. Even those consumers fortunate enough to get pay increases to recover their lost purchasing power end up worse off, because they would find themselves in higher tax brackets.

Two-tenths of a percent of inflation means a lot to consumers and to taxpayers.

Consider the Nation's businesses. The expectation of more rapid inflation is reflected in higher interest rates, greater uncertainty in investment decisions, a weaker stock market, and greater tax burdens. The result would be less business investment.

Two-tenths of a percent of inflation means a lot to the Nation's businesses.

Consider the international situation of the dollar. More rapid inflation will be reflected in depreciation of the dollar, pushing up import prices and fueling further inflation.

But perhaps the most serious danger in ignoring a "few tenths" of a percent of inflation is that it only takes a few such programs to add up to a large inflationary bill.

Last year the Congress ignored a "few tenths" of a percent of inflation on numerous occasions, and we added a full percent to inflation as a result.

Now we have an opportunity to undo some of this inflationary damage. In his recent anti-inflation message, the President specifically noted the importance of enacting airline regulatory reform legislation this year. The Congress should support the President's anti-inflation efforts.

If no significant airline deregulation is achieved this year, the propects for reforming the regulation of other industries will be weakened substantially, and prospects for reducing inflation will dim even further. Passage of this bill will give a clear signal to the American people that the Congress is serious about reducing inflation.●

● Mr. STEVENSON. Mr. President, aviation regulatory reform has been under consideration by the Congress for at least 3 years. The Senate Commerce Committee held lengthy hearings and met throughout last summer and fall in markup sessions. The bill now before us reflects the committee's judgment of the steps that must be taken and the timing of those steps in order to reduce and rationalize Federal regulation of the air carrier industry and protect the public interest in an efficient, reliable national air transportation system. As a cosponsor of S. 2493 and a member of the Com-

merce Committee and its Aviation Subcommittee, I urge my colleagues to support the bill.

S. 2493 includes compromises and restraints. While the industry, the public, the executive branch and the Congress agreed that regulatory reform is needed, there were many differences over the character of the measures proposed. The air carrier industry was itself divided. The committee's objective was a balanced bill that would promote a healthy competitive industry, but there are still some who fear this bill's effects on particular segments of the industry. I am reasonably confident that their fears are groundless. Nevertheless, reducing Government regulation entails risks. We have little prior experience with legislation that loosens the ties that have bound an industry for 40 years. We cannot predict the decisions of each air carrier as it seeks to maintain and improve its position in a far more competitive environment. Therefore caution was indicated.

The provision for automatic market entry is a major departure from the current regulatory scheme. The bill directs the CAB to report annually to the Congress on the progress of automatic market entry, and in the fourth year to submit recommendations on whether and how the program should be changed. The Board is also given emergency powers, subject to congressional veto, to change the automatic entry program at any time if it causes serious dislocations within the industry or in service to any region of the country.

Although the bill does not alter aviation safety procedures, there was some concern that more intense competition might induce carriers to slight safety standards. To prevent this from happening the committee has put safety at the top of the bill's list of policy guidelines for CAB consideration. We have also directed the Secretary of Transportation to conduct a continuous review of the effects of the act on air safety and to report to the Congress annually for the first 5 years.

Mr. President, the adequacy of service to small and medium-size communities was one of my primary concerns. It has been a long struggle for these communities in Illinois to obtain air service, and I could not support a bill that might reverse our progress. S. 2493 guarantees essential air service for 10 years for all communities currently listed on a carrier's certificate. The CAB may add other communities to the list after the first year. The carriers providing subsidized service to those communities may continue with the same subsidy arrangement for up to 7 years. However, a new subsidy arrangement based on the cost of service needed by the community will be phased in. In some cases this will mean the loss of service by a major carrier using large planes and the substitution of local air carriers using smaller planes. However, it should also mean improved schedules and greater frequency of service. Many communities have already made the transition from limited trunk carrier service to local air carriers more actively engaged in serving the community and region and therefore willing to provide more frequent and economical service.

A further protection for community service is provided in the restrictions on exit. The bill requires a carrier planning to terminate service to give 90 days' notice. If it is the last carrier serving the community, the CAB may require it to continue service for another 90 days while a replacement is sought. At the end of 180 days if no replacement has been found, the Board must require the carrier to extend for 30-day periods until another subsidy-eligible replacement is found. To increase the availability of local carriers the bill provides for a new local air carrier certificate for carriers using smaller aircraft. It will encourage commuter airlines to apply and thus become eligible to provide subsidized service.

Mr. President, the downward-fare flexible provisions in the bill may be less significant now that the CAB is permitting a far greater degree of experimentation with fare cutting. The lid on upward flexibility, allowing 5 percent increases on competitive routes without Board approval, may be the more important provision on fares. It preserves the Board's responsibility to prevent excessive fare increases on some routes and services to recover losses resulting from excessive fare cuts in other more competitive areas. It should also be noted that the bill requires the Board to find an increase above the standard industry fare level to be unlawful if it is "unduly preferential, unduly prejudiced, or unjustly discriminatory." Further, a fare cut below 35 percent is unlawful if it is found to be "predatory."

Some supporters of the bill argue that it will help to cut airline fares. Although it may do so in some markets, we cannot promise that this will be its general effect. The industry is faced with many of the inflationary conditions common to all businesses. Moreover, higher fuel costs are inevitable and expensive aircraft must be replaced in the next few years. Perhaps our best hope is that fare increases will be restrained through greater competition and more efficient use of personnel and equipment. When carriers are allowed to compete on fares, they may cease to compete on the kinds of expensive frills which air travelers will gladly do without in order to avoid fare increases.

Automatic market entry is the most controversial provision of the bill and the one on which the committee had the greatest difficulty in reaching agreement. Although we have limited automatic entry and provided certain route protections during the first few years, it is still impossible to predict with absolute certainty what the effects of the provision will be. It will depend on a whole series of decisions by each carrier in selecting routes to enter and those to protect. The original bill was substantially modified in response to both the ambitions and the fears of various carriers. We were presented on the one hand with strong arguments that automatic market entry was essential to the creation of a more competitive environment, and on the other, with equally eloquent claims that it would mean the demise of some of the small but highly efficient trunkcarriers. Certainly the public interest would not be served by a bill that would cause cutthroat competition, with the large driving out the small and the affluent the poor. In monitoring the effects of automatic entry we must make certain that tough competition tomorrow will not lead to dangerous industry concentration the day after. I am persuaded that this will not be the result of the bill, but I agree that we must take seriously our responsibility to watch closely and act promptly if we are mistaken.

If our hopes are realized, more competition will mean more rational business decisions, more rather than fewer scheduled carriers, service to more communities, and improved financial health for the efficient carriers.

Although automatic market entry is a key provision, it seems to me that the changes in the guidelines by which the Board of Trustees determines "public convenience and necessity" in its regular section 401 route proceedings are at least equally important. These guidelines move away from the current law's protective philosophy toward greater competition and more attention to the interests of the air traveler. The bill also directs the Board as it applies this standard to move approve route applications which are "consistent with" not merely "required by" the public convenience and necessity. This is a technical change but it is highly significant and will greatly ease the burden placed on an applicant. These changes, together with the new time limits and speedier procedures required of the Board should encourage carriers to develop new routes as they see opportunities, knowing that standards will be more liberal and route proceedings far more efficient.

Mr. President, it is essential that the Senate pass a strong bill. It is not yet clear what kind of bill the House will approve, but we have every indication that it will call for more limited reforms. I urge my colleagues to support the bill reported by the Commerce Committee.●

● Mr. BAKER. Mr. President, there has been a good deal of discussion within the Congress over the last few years about the need to eliminate outmoded Federal regulations which hamper the operation of the free market system and result in unnecessary price increases for consumers. President Ford and President Carter have both made regulatory reform a major goal of their administrations, and I believe that a majority of Americans agree that it is time to reexamine the effect of Federal regulation upon the cost and availability of goods and services in the economy.

The bill before us today, the Air Transportation Regulatory Reform Act of 1978, is the product of more than 3 years of hearings and study by the Committee on Commerce and the Subcommittee on Administrative Practice and Procedure of the Judiciary Committee. It is the most significant and the most far-reaching regulatory reform bill which the Senate has considered, and it is regarded by

many as the crucial first step in our efforts to modernize the entire Federal regulatory structure.

The purposes of S. 2493 are to encourage greater competition within the airline industry; to make possible the development of a more flexible fare structure which will offer passengers a wider range of price options; to eliminate costly delays in Civil Aeronautics Board proceedings; and to improve air service to small communities by establishing a subsidy system which is more responsive to community needs.

I believe that S. 2493 is a carefully crafted measure that will achieve these goals, and I commend my colleagues on the Commerce Committee for the many weeks of work which they have devoted to fashioning the best reform bill possible.

Early last year, because of my longstanding interest in air transportation and my general support for regulatory reform, I cosponsored S. 292, a reform measure introduced by the distinguished Senator from Kansas (Mr. PEARSON). I believed that S. 292 presented a moderate and rational approach to increased competition within the industry, and I was particularly supportive of the small-community service provisions of that bill. I am pleased, therefore, that S. 2493, as approved by the Commerce Committee, takes essentially the same approach to the small-community service issue as the Pearson-Baker bill.

Most critics of S. 2493 cite several concerns about the bill as the basis for their opposition to it, and I would like to address these issues very briefly and to outline the reasons why I feel that the committee has met the legitimate objections of its critics.

First, it is claimed that enacement of this measure will result in excessive competition within the airline industry and that it will cause airlines to abandon their less profitable routes in order to shift their attention to more lucrative markets. I believe that the automatic market entry (or AME) provisions of the bill are so modest and so gradual as to render this argument invalid. The bill permits carriers to automatically enter only one new route during each of the first 2 years after enactment and only two routes a year during the next 3 years. As the committee's report points out, assuming every carrier used all the automatic entry allowed under the bill, the total number of segments flown would increase less than 2 percent. Moreover, I believe that critics of the bill have failed to prove claims that airlines now serve many markets which are unprofitable, and a DOT study has shown that only 29 of the 394 cities with scheduled flights would lose by the test of profitability. Many communities which do not generate a great deal of traffic on their own are important to the carriers, because they provide "feeder" traffic for other, more profitable routes. In addition, the bill contains provisions which permit each carrier to designate, for the first 5 years after enactment, certain routes which other carriers may not enter under the AME provision. To supplement this protection, the bill also directs the CAB to intervene to suspend or modify automatic market entry in the event that its operation "is causing substantial public harm to the national air transportation system, or a substantial reduction in air service to small- and medium-sized communities in any region of the country." With these safeguards built into the bill, it would be difficult to imagine the dire consequences predicted by some opponents of regulatory reform.

The second fear expressed by critics of S. 2493 is that encouraging new entrants into scheduled air transportation will somehow result in a lessening of safety standards and that existing airlines will "cut corners" on safety in order to lower their costs to meet new competition. As the sponsors of the bill have pointed out many times, the bill in no way reduces or alters the authority of the Federal Aviation Administration to regulate aviation safety. As a matter of fact, the bill expressly requires the Secretary of Transportation to "conduct a continuous review of the actual and potential effects of the implementation of the Act—upon the standard of safety in air transportation" and to "take those steps necessary to insure" that standard is maintained. Since the bill recognizes a new class of carriers, commuter air carriers, which now fall under a different set of safety regulations from those which govern certificated air carriers, the Administrator is also charged with studying the safety regulations and procedures applicable to commuter carriers and revising them as necessary in order to maintain the "highest standard of safe, reliable air transportation."

As a practical matter, I find it hard to envision any carrier, new or old, taking steps which will threaten its safe operation. Nothing is more important to the economic viability of an airline than its safety record and the confidence of the traveling public. I do not believe that the facts or that commonsense support contentions that regulatory reform will encourage unsafe operations.

Lastly, I have heard opponents of regulatory reform argue that the bill will reduce service to small communities. In reality, Mr. President, the small community service section will result in improved service to small communities, and I view these provisions as among the most important in the bill.

In the last 16 years, the CAB has allowed the airlines to drop service to 175 communities. As a result, many of these cities have found that their efforts to attract new industry have been severely hampered. In other communities, where air carriers are now being subsidized to provide service, the Board has no authority over the type of service which is provided, the scheduling of flights, or the kind of equipment used. Some of these cities and towns, therefore, are forced to settle for flights at awkward hours, using inadequate equipment. It is clear that the current subsidy program, which costs about $80 million per year, is not providing the best possible service to the communities involved.

S. 2493 creates a new subsidy program designed to meet the needs of the community rather than the needs of the carrier. It will operate concurrently with the existing program for 7 years, after which the existing subsidy program will be discontinued. All points which are now listed on the certificate of any carrier will be guaranteed air service for 10 years, even if those points are not now being served as a result of a suspension approved by the Board. Under the new program, the Board will be required to consult with the community about its needs under the subsidy program. In addition, the Board will be able to prescribe the kind of service which will be provided in return for subsidy. The bill makes commuter air carriers eligible to provide subsidized service and it authorizes them to operate larger aircraft than they are now permitted to do. Moreover, S. 2493 will make commuter airlines eligible for Federal loan guarantees, for participation in joint fare and interlining agreements, and for equal listing in the Official Airlines Guide. These provisions will make it easier for passengers to buy through tickets when traveling on commuter carriers.

In sum, I am convinced that the Committee on Commerce has succeeded in designing a regulatory reform measure which is fair to consumers, to small communities, and to the airlines themselves. While it would be unrealistic to assume that no restructuring would take place among the Nation's air carriers as a result of this bill, I believe that the increased competition mandated by S. 2493 will result in an improved air transportation system which is more responsive to the forces of the marketplace and the needs of the consumer. I urge its enactment into law, and I hope that a majority of my colleagues will support the bill with their votes this week.●

● Mr. DOLE. Mr. President, I rise in support of the Air Transportation Regulatory Reform Act of 1978.

For the first time since the creation of the Civil Aeronautics Board in 1938, Federal economic regulation of the airline industry is being seriously addressed. In October 1975, President Ford sent Congress a proposal to allow easier entry into the airline business, to give carriers more discretion to set fares, and to increase competition in major markets. On March 4, 1977, President Carter endorsed a similar proposal to reduce Federal regulation of airlines.

In addition to this support, dozens of Government and non-Government studies have shown that CAB regulation produces economic inefficiency. The intrastate fares charged, for example, in California and Texas are traditionally 30 to 50 percent lower than CAB-regulated fares for comparable distances.

CONSUMER BENEFITS

If the public is to benefit, regulatory reform legislation must provide airlines with the ability to offer experimental and innovative fares to stimulate travel, and to compete with other modes of transportation. Regulatory reform offers the potential of opening up a full range of fares, according to the conditions and needs of the market. While inflation will

continue to push the costs of such items as fuel and labor upward, increased competition could deter fares from going up as rapidly or as high as they would under a more regulated system. Pricing flexibility also is necessary to insure that well-managed airlines are able to charge fares that cover their long-run costs and produce a return on investment sufficient to attract capital and to keep their aircraft fleet modern and to meet growing travel demand.

SMALL COMMUNITY SERVICE

Opponents of S. 2493, argue that it would eliminate scheduled service to many small communities, bankrupt numerous large air carriers, and cause substantial unemployment among airline employees. Two studies on regulatory reform by the American Enterprise Institute (AEI) disagree. Both studies point out that evidence from the unregulated commuter airlines and intrastate carriers suggests that a reduction in regulation would eventually lead to better service for small communities. These studies also argue against the specter of carrier bankruptcy: The lower fares that would result should stimulate demand, so that the load factors would rise. The increased demand would, moreover, require an increase in the number of employees in the passenger service areas. Thus, though the rate of growth in air crews and other personnel supporting flights might not rise as rapidly as it has, the rate of growth in ticket agents, reservations personnel, and baggage handlers should be significantly higher than in the past.

GUARANTEED SERVICE TO SMALL COMMUNITIES

The Senate Committee on Commerce, Science, and Transportation recognized that there are small, often isolated communities that need scheduled airlines service, but where traffic levels simply are too low to make the service economically self-sufficient.

The air carriers which serve these cities currently receive subsidy payments from the CAB to provide air service. This subsidy program has been highly criticized for paying too high subsidies for inappropriate service. The current subsidy mechanism allows airlines to operate larger aircraft than necessary for the market and thereby obtain higher subsidy payments. The CAB also has the power to eliminate subsidy for any community at any time.

To insure small communities this vital air service, S. 2493 will provide a guarantee of air service to communities now eligible for subsidized air service for a period of at least 10 years. The system of subsidy payments is altered to promote more efficient and timely service at less cost to the Government. Further, if the airline now providing service desired to terminate its route to a small city, the bill would require that the CAB first find a suitable replacement airline. No subsidized city would experience a loss of service during the 10-year period. Even after the 10-year guarantee of service period has expired, the objective of the bill is to assure continued safe, dependable service which has the potential to provide cities more convenient scheduling and more trip frequencies than does today's system of small community service.

AUTOMATIC MARKET ENTRY IS IN THE CONSUMER'S BEST INTEREST

The Senator from Kansas believes the primary objective of this reform is to create a more innovative, efficient, and self-reliant airline system. To achieve this, the airline regulatory structure must be changed to permit freer entry by existing and new airlines. The potential entry by one airline into the domain of another airline provides real incentive for each to develop its services and prices to meet the demands of the marketplace. S. 2493 provides for a liberalized market entry and encourages innovation. The same interplay of market forces that promotes competition also requires that airlines should have the right to stop flying routes that are not profitable for that airline. Airlines, like any other business, would have the flexibility to allocate their resources to meet market opportunities or to counter competitive threats. S. 2493 addresses this need.

PHASE-IN WILL AVOID DISRUPTION

S. 2493 recognizes that the transition from a highly regulated environment to a free market system cannot occur overnight without disrupting segments of the industry. The automatic entry provision is carefully phased in over a period of years. Each airline can only enter a limited number of new markets each year under this authority. Also, the smaller airlines can protect their most valuable routes during the initial years. The committee has carefully balanced the theory of deregulation with the realities of the status of competition in the airline industry.

Mr. President, this bill enjoys strong bipartisan support in the Senate and has been endorsed by many national groups representing consumers, business, and government. While the Senator from Kansas suggests that this bill is hardly drastic deregulation, it does take the first steps toward providing flexibility over where and when airlines may operate and how much they may charge. Mr. President, I urge adoption of this important bill.●

Mr. CANNON. Mr. President, I am prepared to yield back the remainder of my time.

Mr. PEARSON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The bill is open to further amendment. If there be no further amendment to be proposed. the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. CANNON. Mr. President. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Colorado (Mr. HASKELL), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

I further announce that, if present and voting, the Senator from New Hampshire (Mr. MCINTYRE) would vote "yea."

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. CASE), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) would each vote "yea."

The result was announced—yeas 83, nays 9, as follows:

[Rollcall Vote No. 127 Leg.]

YEAS—83

| | | |
|---|---|---|
| Allen | Ford | Morgan |
| Anderson | Garn | Moynihan |
| Baker | Glenn | Muskie |
| Bartlett | Gravel | Nelson |

| Case | Hatfield, Mark O. | McIntyre |
| Goldwater | | Packwood |

So the bill (S. 2493) was passed, as follows:

S. 2493

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Cannon-Kennedy-Pearson Air Transportation Reform Act of 1978".

DECLARATION OF POLICY

SEC. 2. (a) Section 102(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1302) is amended to read as follows:

"Interstate and Overseas Air Transportation

"SEC. 102. (a) In the exercise and performance of its powers and duties under this Act with respect to interstate and overseas air

transportation, the Board shall consider the following, among other things, as being in the public interest, and consistent with the public convenience and necessity:

"(1) The maintenance and furtherance of a high degree of safety in air commerce.

"(2) The development and maintenance of an efficient and reliable air transportation system which provides an opportunity for efficient and well-managed air carriers to earn a fair and reasonable return on investment in a competitive environment in order to meet the present and future needs of the public, the foreign and domestic commerce of the United States, the Postal Service, and the national defense.

"(3) The encouragement, development, and maintenance of an air transportation system relying on actual and potential competition to provide efficiency, innovation and low prices, and to determine the variety, quality, and price of air transportation services.

"(4) The creation, development, and maintenance of a sound regulatory and economic environment which facilitates entry into air transportation markets by new air carriers, and facilities entry into additional air transportation markets by existing air carriers.

"(5) The prevention of unfair, deceptive, predatory, or anticompetitive practices in air transportation, and the avoidance of (A) undue industry concentration, excessive market domination, monopoly power and (B) other conditions that would tend to allow one or more air carriers unreasonably to increase prices, reduce services, or exclude competition in air transportation.

"(6) The maintenance of a comprehensive and convenient system of continuous scheduled airline service for small communities and for isolated areas, with direct Federal assistance where appropriate.".

(b) Section 102 of the Federal Aviation Act of 1958 is further amended by inserting at the end thereof the following:

"Foreign air transportation

"(c) In the exercise and performance of its powers and duties under this Act with respect to foreign air transportation, the Board shall consider the following, among other things, as being in the public interest, and in accordance with the public convenience and necessity:

"(1) The encouragement and development of an air transportation system properly adapted to the present and future needs of the foreign and domestic commerce of the United States, of the Postal Service, and of the national defense.

"(2) The regulation of air transportation in such manner as to recognize and preserve the inherent advantages of, assure the highest degree of safety in, and foster sound economic conditions in such transportation, and to improve the relations between and coordinate transportation by air carriers.

"(3) The promotion of adequate, economical, and efficient service by air carriers at reasonable charges, without unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices.

"(4) Competition to the extent necessary to assure the sound development of an air transportation system properly adapted to the needs of the foreign and domestic commerce of the United States, of the Postal Service, and of the national defense.

"(5) The promotion of safety in air commerce.

"(6) The promotion, encouragement, and development of civil aeronautics.".

DEFINITIONS

SEC. 3. Section 101 of the Federal Aviation Act of 1958 (49 U.S.C. 1301) is amended—

(a) by redesignating paragraphs (14) through (25) as paragraphs (15) through (26), respectively, and by inserting immediately after paragraph (13) the following new paragraph:

"(14) 'Charter air transportation' means charter trips, including inclusive tour charter trips, in air transportation, rendered pursuant to authority conferred under this Act under regulations prescribed by the Board.";

(b) by redesignating paragraphs (26) through (32) as paragraphs (28) through (34), respectively, and by inserting immediately after paragraph (26), as redesignated, the following new paragraph:

"(27) 'Local air transportation' means scheduled air transportation of persons, property, and mail provided pursuant to a certificate issued under section 420 of this Act.";

(c) by redesignating paragraph (33) as paragraph (36) and by inserting immediately after paragraph (34), as redesignated, the following new paragraph:

"(35) 'Predatory' refers to practices which would constitute a violation of the antitrust laws (as referenced in section 414 of this Act).";

(d) by redesignating paragraphs (34) and (35) as paragraphs (38) and (39) and by inserting immediately after paragraph (36), as redesignated, the following new paragraph:

"(37) 'Scheduled air transportation' means air transportation of persons in regular route service which is not charter air transportation.";

(e) by striking out paragraphs (36) and (37) thereof;

(f) by redesignating paragraphs (38) and (39) as paragraphs (40) and (41), respectively; and

(g) by inserting immediately after paragraph (41), as redesignated, the following:

"(42) 'State agency' means that department, agency, officer or other entity of a State government which has been designated according to State law as—

"(A) the recipient of any notice required under title IV of this Act to be given to a State agency; or

"(B) the representative of the State in any matter about which the Board is required, under such title IV, to consult with or consider the views of a State agency.".

SAFETY

SEC. 4. Title I of the Federal Aviation Act of 1958 is further amended by adding at the end thereof the following new section:

"SAFETY STUDY

"Policy

"SEC. 105. (a) The Congress intends that the implementation of the Air Transportation Regulatory Reform Act of 1978 result in no diminution of the high standard of safety in air transportation attained in the United States at the time of the enactment of that Act. To carry out that intention, the Secretary shall conduct a continuous review of the actual and potential effects of the implementation of that Act, and the amendments made by that Act, upon the standard of safety in air transportation in the United States. Based on that review, the Secretary shall take those steps necessary to ensure that the high standard of safety in air transportation referred to in the first sentence of this subsection is maintained in all aspects of air transportation in the United States.

"Regulations and Inspection Procedures

"(b) By January 1, 1979, the Secretary shall complete a thorough review, and submit a report thereon to the appropriate authorizing committees of the Congress, and to the Administrator, of the safety regulations and inspection procedures applicable to each class of air carriers subject to the provision of title IV, in order to ensure that all classes of air carriers are providing the highest possible level of safe, reliable air transportation to all the communities served by those air carriers. Based on such review, the Administrator shall promulgate the safety regulations and establish the inspection procedures he deems necessary to maintain the highest standard of safe, reliable air transportation in the United States.

"Report to Congress

"(c) During each of the 5 calendar years occurring after the effective date of this section, beginning with 1980, the Secretary shall submit a report to the Congress of the results of the review conducted by him under subsection (a). Each such report shall include legislative and administrative recommendations, specifically relating to the Secretary's or the Administrator's authority, as the Secretary deems necessary and appropriate to carry out the purposes of this section.".

CERTIFICATES

SEC. 5. Section 401 of the Federal Aviation Act of 1958 (49 U.S.C. 1371) is amended to read as follows:

"CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

"Certificates

"SEC. 401. (a) The Board shall issue certificates of public convenience and necessity to engage in—

"(1) scheduled interstate or overseas air transportation of persons, property, and mail; or

"(2) foreign air transportation, including foreign scheduled air transportation of persons, property, and mail, foreign all-cargo air transportation, and foreign charter air transportation.

"Interstate and Overseas Air Transportation

"(b)(1) The Board shall issue a certificate under subsection (a)(1) authorizing, in whole or in part, the air transportation specified in the application, if the Board determines that the applicant is fit, willing, and able to perform properly the air transportation specified in the application, and to conform to the provisions of this Act and the rules, regulations, and requirements of the Board made or issued under this Act; unless the Board determines that the air transportation is not consistent with the public convenience and necessity.

"(2) In any determination as to whether or not the applicant is fit, willing and able to perform properly the air transportation specified in the application and to conform to the provisions of this Act, the applicant shall have the burden of showing that it is so fit, willing, and able.

"(3) In any determination as to whether the air transportation specified in the application is or is not consistent with the public convenience and necessity, an opponent of the application shall have the burden of showing that such air transportation is not consistent with the public convenience and necessity.

"Foreign Air Transportation

"(c) The Board shall issue a certificate under subsection (a)(2) authorizing, in whole or in part, the air transportation specified in an application therefor, if the Board determines that—

"(1) the applicant is fit, willing, and able to perform properly the air transportation specified in the application, and to conform to the provisions of this Act, and the rules, regulations, and requirements of the Board made or issued under this Act; and

"(2) such air transportation is required by the public convenience and necessity;

except that, the Board shall not issue any certificate under subsection (a)(2) authorizing foreign charter air transportation to any air carrier holding a certificate issued before

January 1, 1977, under section 401(d)(1) (as that subsection read on January 1, 1977).

"Guidelines for Determining the Public Convenience and Necessity

"(d) In determining whether the air transportation proposed in an application for a certificate to be issued under subsection (a)(1) is consistent with the public convenience and necessity, the Board shall, in addition to the policy statement in section 102(a) of this Act, be guided as follows:

"(1) Innovative or more efficient methods of operation in air transportation, or significant reductions in fares or charges below fares or charges in effect in markets in question or comparable markets, are consistent with the public convenience and necessity.

"(2) The avoidance of (A) industry concentration, excessive market domination, monopoly power and (B) other conditions that would tend to allow one or more air carriers unreasonably to increase prices, reduce services, or exclude competition in air transportation is consistent with the public convenience and necessity.

"(3) The diversion of revenue or traffic from another air carrier is not in itself inconsistent with the public convenience and necessity.

"Limitations

"(e) Each certificate issued under subsection (a)(1) shall specify the terminal points and intermediate points, if any, between which which the air carrier holding such certificate is authorized to engage in air transportation and the service to be rendered. The Board may attach to the exercise of the privileges granted by each such certificate, or any amendment thereto, such reasonable terms, conditions, and limitations (including limits as to the duration of the certificate) as may be required by the public convenience and necessity.

"Conditions of Foreign Air Transportation

"(f) A certificate issued by the Board under subsection (a)(2) shall, insofar as the air transportation operations to be provided under such certificate are to take place outside of the United States, designate the terminal and intermediate points only insofar as the Board determines it is practicable to do so. Otherwise such certificate shall designate only the general route to be followed. Any air carrier holding a certificate issued under subsection (a)(2) may, in scheduled foreign air transportation, handle and transport mail of countries other than the United States. In performing scheduled flights in foreign air transportation, each such air carrier is authorized to transport persons, property, and mail, between points served on such flights in any State or the District of Columbia. Such authority shall be limited to one roundtrip flight per day in each city-pair market served by such air carrier, unless otherwise authorized by the Board.

"Emergency Operations

"(g) No air carrier holding a certificate issued under this section shall be deemed to have violated any term, condition, or limitation of its certificate, or any amendment thereto, by landing or taking off during an emergency at a point not named in its certificate, or by operating in an emergency, under regulations which may be prescribed by the Board, between terminal and intermediate points other than those specified in its certificate.

"Terminations, Reductions, and Suspensions of Service

"(h)(1) Except as provided in paragraphs (2) and (3), no air carrier, holding a certificate issued under this section, shall—

"(A) terminate or suspend air transportation which it is required to provide to a point under such certificate; or

"(B) reduce any such air transportation below that which the Board has determined to be essential air transportation for that point;

unless such air carrier has first given the Board, the community affected, and the State agency of the State in which such community is located, at least 90 days notice of its intent to so terminate, suspend, or reduce such air transportation. If the air carrier proposing to so terminate or suspend air transportation is the only air carrier certificated under this section providing scheduled air transportation to the point involved, or, if the air carrier proposing to reduce air transportation is the only air carrier certificated under this section providing essential air transportation to the point involved, then the Board may require such air carrier to continue providing such air transportation for an additional 90-day period. During the period between the date notice of a proposed termination, suspension, or reduction is given to the Board, the affected community, and the State agency, and the date such termination, suspension, or reduction is to become effective, the Board shall make every reasonable effort to secure another air carrier which is certificated under this section to provide the essential air transportation which is being proposed to be terminated, suspended, or reduced. If the Board determines that, by the end of such period, it will be unable to so secure another air carrier which is certificated under this section, then the Board shall provide for the maintenance of essential air transportation to such point, according to the provisions of section 419(h).

"(2) Upon application of any air carrier holding a certificate issued under this section, the Board may, by regulation or otherwise, without prior notice, authorize such an air carrier to suspend temporarily any air transportation provided by it to a point, if it is in the public interest to do so, so long as essential air transportation is maintained to any point to which essential air transportation is guaranteed under section 419 of this Act. Each application for a temporary suspension under this paragraph shall be served, by the applicant, upon the community affected and the State agency of the State in which such community is located. The Board shall not approve a temporary suspension of longer than 30 days without a hearing, if a hearing is requested by the affected community.

"(3) If an air carrier holding a certificate issued under this section proposes to terminate or suspend air transportation being provided by it under such certificate between two points, and such air carrier is the only air carrier certificated under this section providing air transportation between such points, then such air carrier shall give the Board, the community affected, and the State agency of the State in which the community is located, at least 60 days notice of such intended termination or suspension.

"(4) For the purposes of this subsection, the term 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the United States Virgin Islands.

"Dormant Authority

"(i)(1) Any air carrier holding a certificate issued under this section may file an application with the Board seeking authority to provide the nonstop scheduled air transportation between two points listed on a certificate issued under this section to any other air carrier and between which no more than one air carrier is providing scheduled air transportation. The Board shall award such authority to the applicant air carrier, if the Board determines that—

"(A) the authority to be awarded is authority to engage in nonstop scheduled interstate or overseas air transportation between two points between which another air carrier holds authority to provide such air transportation, and such other air carrier has not exercised such authority pursuant to published flight schedules at a minimum of five round trips per week for at least 180 days during the 12 months immediately preceding the date on which such application was filed under this subsection; and

"(B) awarding such authority to such applicant air carrier is consistent with the public convenience and necessity.

In addition, either on its own motion or on petition, the Board, if it determines it is consistent with the public convenience and necessity, may reduce, restrict, suspend, or terminate the authority to provide air transportation between such points of the air carrier whose failure to exercise such authority gave rise to the application under this subsection.

"(2) Notwithstanding any other period of limitation (including the provisions of section 1010) applicable to the Board, the Board shall, whenever it receives an application under paragraph (1), make the determinations required under paragraph (1) with respect to that application, without an oral evidentiary hearing, within 90 days after the date that application was filed with the Board. As opposed to all other applications or petitions filed with the Board under this Act, the Board shall give priority to the consideration of applications filed with the Board under this subsection.

"Closed-Door Restrictions

"(j) On and after January 1, 1979, the Board shall not include a closed-door restriction in any certificate issued under this section, or in any amendment thereto, issued after such date. Any closed-door restriction included in any such certificate, or amendment thereto, issued before such date shall, on and after such date, be void and of no force and effect, except that this subsection shall not apply to (1) a closed-door restriction applicable to air transportation between two points both of which are in the State of Hawaii, or (2) an existing closed-door restriction which resulted from a sale, exchange, or transfer by the air carrier of its authority to provide air transportation in any market to another air carrier.

"Automatic Market Entry

"(k)(1) According to the provisions of this subsection the following air carriers and persons may select segments each year for which they will be temporarily authorized to provide scheduled nonstop air transportation of persons, property, and mail:

"(A) Any air carrier which holds a certificate issued under this section authorizing that air carrier to provide air transportation of persons to a point in the contiguous 48 States or the District of Columbia and which, during the most recent 12-month period for which data is available occurring before the date an application is filed with the Board under this subsection, engaged in regularly scheduled air transportation in excess of 100 million available seat-miles.

"(B) Any air carrier which holds a certificate issued under this section authorizing that air carrier to provide air transportation of persons to a point in the State of Alaska and which, during the 12-month period ending on July 1, 1977, engaged in regularly scheduled air transportation in excess of 50 million available seat-miles.

"(C) Any person who, during the 12-month period ending January 1, 1979, engaged in regularly scheduled intrastate air transportation in excess of 125 million available seat-miles.

"(D) Any person who, on January 1, 1979, held a certificate to provide charter air trans-

portation of persons and property to points in the contiguous 48 States, Alaska, or the District of Columbia, and who, during the 12-month period ending July 1, 1977, operated a turbojet-powered aircraft in charter air transportation.

"(2) During each of the calendar years 1979 and 1980, each air carrier or person specified in paragraph (1) may select one segment over which it shall be authorized under this subsection to provide scheduled nonstop air transportation of persons, property, and mail, so long as the statute miles of the segment selected by that air carrier or person, in either year does not exceed 3,000 statute miles. During calendar year 1981, and for each calendar year thereafter, each such air carrier or person may select two segments over which it shall be authorized to provide scheduled nonstop air transportation of persons, property, and mail, so long as the cumulative statute miles of the two segments selected by an air carrier, in any one year, does not exceed 3,000 statute miles. No segment may be selected which has been designated by another air carrier under paragraph (3) as being closed for that year to automatic entry under this subsection. Initial selections shall be filed with the Board on the first business day of July each year. Final selections shall be certified as selected by the Board by September 1, of the year in which the selection was filed, unless the Board finds that the air carrier making the selection is not fit, willing, and able to provide the air transportation selected, and to conform to the provisions of this Act and the rules, regulations, and requirements of the Board made or issued under this Act. Based on such certification, that air carrier or person shall be authorized to engage, for the next 20 months, in scheduled nonstop air transportation of persons, property, or mail over the segments selected.

"(3) Each air carrier specified in paragraph (1) may, for each year, designate a number of segments for which it provides regularly scheduled nonstop air transportation, which shall not be open to automatic entry under this subsection as follows:

"(A) For each of the years 1979, 1980, and 1981, three such segments.

"(B) For the year 1981, two such segments.

"(C) For the year 1983, one such segment.

"(D) After the year 1983, no such segments may be designated under this paragraph.

Designations for each year shall be filed with the Board on the first business day of January of the year for which the designations are made.

"(4) (A) Notwithstanding the provisions of paragraph (2), for selections made in each of the calendar years 1979, 1980, and 1981, an air carrier which, on or after January 1, 1973, was receiving compensation from the Board under section 406, shall have no more than two segments in which it is actually providing scheduled air transportation certified for automatic entry under this subsection. Notwithstanding the provisions, of paragraph (2), an air carrier holding a certificate issued under this section and which operated, during the most recent 12-month period for which data is available, fewer than 25 billion available seat-miles in air transportation, shall have no more than three segments in which it is actually providing scheduled air transportation certified for automatic entry under this subsection in calendar year 1979, and no more than four such segments so certified in calendar year 1980. After calendar year 1981 (for air carriers specified in the first sentence of this subparagraph), and after calendar year 1980 (for air carriers specified in the second sentence of this subparagraph), there shall be no limits under this paragraph on the number of segments of an air carrier subject to automatic entry.

"(B) If, during the period of limitation specified in subparagraph (A), automatic entry is selected for a number of segments of an air carrier which exceeds the limits set forth in that paragraph, the particular segments of such air carrier in which automatic entry shall be certified shall be those segments selected by the smallest applicants (based on system-operating revenues). Any air carrier denied its choice for automatic entry because of the provisions of this paragraph may select another segment by filing such selection with the Board on September 15 of the same year. The Board shall process such selection by October 15 of the same year.

"(5) The Board shall publish within 10 days after the first business day in July of each year, a list of the segments selected for automatic entry that year, identifying the air carrier or person selecting each segment. Any air carrier or person who finds that another air carrier or person has selected the same segment as that air carrier or person may then file with the Board, by August 1, of the same year, a notice stating that the first selection made by the air carrier or person filing such notice is withdrawn, and selecting an alternative segment. The alternative segment selected shall then become the segment selected by that air carrier or person for that year, and the first selection shall be void. If, according to the final selections made, more than one person or air carrier selects the same segment for automatic entry under this subsection, all such selections on that segment shall be certified by the Board for automatic entry, so long as each selection is an otherwise valid selection.

"(6) A segment may not be selected in any year if the segment had been selected during either of the 2 preceding calendar years and scheduled air transportation is being provided over that segment under authority received by an air carrier or person under such selection.

"(7) Any authority to provide air transportation received under this subsection shall terminate if the air carrier or person receiving such authority fails to provide a regular pattern of scheduled nonstop air transportation of persons, property, and mail for 18 consecutive months after initiating air transportation according to such authority. Breaks in service occasioned by labor disputes or by factors beyond the control of the air carrier or person shall not destroy the continuity of service rendered before or after such breaks in service.

"(8) Any air carrier or person which engages for 18 consecutive months in regularly scheduled nonstop air transportation of persons, property, and mail over a segment pursuant to authority received under this subsection may apply to the Board for a certificate permanently authorizing that air carrier or person to engage in unrestricted nonstop scheduled air transportation in such segment. Within 30 days after the date of application the Board shall grant such application and issue the certificate as requested unless the Board determines that the applicant has not conformed to the provisions of this Act with respect to the service in question.

"(9) The Board shall submit an annual report to the appropriate authorizing committees of the Congress on the operation, during the immediately preceding year, of the program established by this subsection. The first such report shall be submitted by March 1, 1980, and each subsequent report shall be submitted by March 1 of each year thereafter. Each report shall contain as much data and information as the Board deems necessary and appropriate to accurately describe the operations of such program and give the Congress adequate information on which to evaluate such operations. Such data and information shall, among other things, include the number of segments selected during the reporting year, a list of the air carriers and other persons participating in such program, the cities between which air transportation has been provided under authority received under this subsection, a list of the air carriers or persons who have discontinued providing air transportation which they were providing under authority received under this subsection, a list of the segments designated by an air carrier under paragraph (4), and an evaluation of the effect the operation of the program established under this subsection has had on the maintenance of an efficient and responsive air transportation system, on a national and regional basis.

"(10) After January 1, 1983, but before March 1, 1983, Board shall submit a detailed comprehensive report to the appropriate authorizing committees of the Congress which shall contain an evaluation and review of the operation of the program established by this subsection during the previous 4 years. Such comprehensive report shall, among other data and information, contain—

"(A) a summary of the data submitted in each of the annual reports submitted under paragraph (9);

"(B) a detailed specific recommendation to the Congress as to whether, and in what form, such program should be continued;

"(C) a description of modifications that should be made in the program;

"(D) an evaluation of the effect of the operation of such program on the quantity, quality, variety, and cost of air transportation being provided on a national and regional basis;

"(E) an evaluation of the effect the operation of such program has had on the maintenance of an efficient and reliable air transportation system, on a national and regional basis; and

"(F) an estimate of the effect such program will have, during the 5 years occurring immediately after the date of the report, on such air transportation system.

"(11) (A) The Board shall, on an emergency basis, by rule, modify the program established by this subsection, if the Board finds that—

"(i) the operation of such program is causing substantial public harm to the national air transportation system, or a substantial reduction in air service to small and medium sized communities in any region of the country;

"(ii) the modification proposed by the Board is required by the public convenience and necessity in order to alleviate such harm or reduction; and

"(iii) such harm or reduction identified by the Board cannot be rectified by any reasonably available means other than the modification proposed by the Board.

Any emergency modifications proposed by the Board under this paragraph shall modify such program only to the minimum extent necessary to rectify the harm or reduction identified by the Board.

"(B) Such emergency modifications, along with the supporting data and findings, shall be submitted to the Congress on the date that they are proposed by the Board. Such modifications shall become effective 60 legislative days after the date they were submitted to the Congress, unless during that 60-day period either House adopts a resolution stating that that House disapproves such modifications, or, during such 60-day period, a resolution has been adopted by both Houses stating that the Congress approves of such modifications, in which case such modifications shall become effective on the date of adoption of the approval resolution.

"(C) For the purposes of this paragraph, the term 'legislative day' means a calendar day on which both Houses of Congress are in session.

"(D) The findings of fact by the Board in any proceeding held under this paragraph, if supported by substantial evidence, shall be conclusive. No objection to a modification of the program proposed by the Board under this paragraph shall be considered by a court unless such objection shall have been urged before the Board, or if it was not so urged, unless there were reasonable grounds for failure to do so.

"(12) For the purposes of this subsection, the term 'segment' means an air route between two points within the contiguous 48 States (including the District of Columbia) or between two points one of which is in the State of Alaska, the Commonwealth of Puerto Rico, or the United States Virgin Islands and the other is in one of the contiguous 48 States (including the District of Columbia).

"Civil Reserve Air Fleet

"(l)(1) Except as provided in paragraph (2) of this subsection, transportation of persons or property by transport category aircraft in interstate air transportation procured by the Department of Defense, including military departments within such Department, through contracts of more than 30 days duration for airlift service within the United States, shall be provided only by air carriers which (A) have aircraft in the civil reserve air fleet or offer to place aircraft in such fleet, and (B) hold any certificate issued under this title.

"(2) In any case in which the Secretary of Defense determines that no air carrier certified under subsection (a) of this section or under section 421 is capable of providing and willing to provide the type of service described in paragraph (1) of this subsection, he may contract with an air carrier which does not hold a certificate issued under this title.

"Charters

"(m) An air carrier holding a certificate for scheduled air transportation issued under this section may engage in charter air transportation under regulations prescribed by the Board. With respect to charter tips in interstate or overseas air transportation provided by such air carriers, such regulations shall provide that any such air carrier who operates—

"(1) more than 200 million system-scheduled aircraft miles during a year may operate no more than 2 percent of its total system-scheduled aircraft miles operated in that year in off-route charter trips;

"(2) less than 200 million but more than 60 million such miles in a year may operate no more than 5 percent of such miles operated in that year in off-route charter trips; and

"(3) less than 60 million such miles in a year may operate no more than 10 percent of such miles operated in that year in off-route charter trips;

except that any air carrier who, on January 1, 1977, was operating under a certificate issued under this section which authorized off-route charter trips in excess of the limits established in this subsection shall continue to be permitted to operate off-route charter trips to the extent authorized by such certificate. Any regulations prescribed by the Board under this subsection shall also include the frequency and regularity limitations upon off-route charters applied by the Board on January 1, 1977. For the purposes of this subsection, the term 'off-route charter trips' shall have the same meaning as that term was applied by the Board on January 1, 1977.".

NOTICE OF TARIFF CHANGES

SEC. 6. Section 403(c) of the Federal Aviation Act of 1958 (49 U.S.C. 1373(c)) is amended to read as follows:

"Notice of Tariff Changes

"(c)(1) Except as provided in paragraph (2), no change shall be made in any rate, fare, or charge, or any classification, rule, regulation, or practice affecting such rate, fare, or charge, or the value of the service thereunder, specified in any effective tariff of any air carrier until 30 days' notice of the proposed change has been filed, posted, and published in accordance with subsection (a) of this section, except the Board may establish an alternative notice requirement, of not less than 25 days, to allow an air carrier to match the fares or charges specified in another air carrier's proposed tariff. Any notice specified under this subsection shall plainly state the change proposed to be made and the time such change will take effect.

"(2) If the effect of any proposed tariff change would be to institute a fare that is outside of the applicable range of fares specified in subparagraphs (A) and (B) of section 1002(d)(2), or specified by the Board under section 1002(d)(7), or would be to institute a fare to which such range of fares does not apply, then such proposed change shall not be implemented except after 60 days' notice filed in accordance with regulations prescribed by the Board.

"(3) In exercising its power to suspend tariffs under subsections 1002(g) and 1002(j), the Board shall file and deliver a statement in writing of its reasons for such suspension, as required under subsection 1002(g), at least 30 days before the time when the affected tariff would otherwise go into effect.".

MAIL AND COMPENSATION

SEC. 7. Section 406 of the Federal Aviation Act of 1958 (49 U.S.C. 1376) is amended as follows:

(a) Subsection (b) of such section 406 (49 U.S.C. 1376(b)) is amended to read as follows:

"Ratemaking Elements

"(b) In fixing and determining fair and reasonable rates of compensation under this section, the Board, considering the conditions peculiar to transportation by aircraft and to the particular air carrier or class of air carriers, may fix different rates for different air carriers or classes of air carriers, and different classes of service. In determining the rate in each case, the Board shall take into consideration, among other factors, (1) the condition that such air carriers may hold and operate under certificates authorizing the carriage of mail only by providing necessary and adequate facilities and service for the transportation of mail; (2) such standards respecting the character and quality of service to be rendered by air carriers as may be prescribed by or pursuant to law; and (3) the need of each such air carrier for compensation for the transportation of mail sufficient, together with all other revenue of the air carrier from the service for which the compensation is being paid (and after January 1, 1983, together with all other revenue of the air carrier from other sources also), to enable such air carrier under honest, economical, and efficient management, to provide air service of at least the same extent, character, and quality as that provided during the year ending December 31, 1977, and to maintain and continue the development of air transportation to the extent and of the character and quality required for the commerce of the United States, the Postal Service, and the national defense. Any air carrier receiving compensation from the Board pursuant to this section which, before January 1, 1986, terminates service to a point for which compensation is paid by the Board, shall not, if such service is resumed by such air carrier, be eligible for compensation from the Board under this section for such service. Nothing in this subsection shall be construed as prohibiting any air carrier specified in the preceding sentence from applying for and receiving compensation for such service under section 419.".

(b) Subsection (c) of such section 406 (49 U.S.C. 1376(c)) is amended by adding the following at the end thereof: "The Board may make payments pursuant to this section only to those air carriers which were entitled to receive compensation from the Board under the provisions of this section for the performance of services during the 12 months ended June 30, 1977. The Board shall make no payments under this section for any services performed after January 1, 1986.".

MERGERS AND CONTROL

SEC. 8. Section 408 of the Federal Aviation Act of 1958 (49 U.S.C. 1378) is amended as follows:

(a) Subsection (a) of such section 408 (49 U.S.C. 1378(a)) is amended to read as follows:

"Acts Prohibited

"SEC. 408. (a) It shall be unlawful, unless approved by order of the Board, as provided in this section—

"(1) for two or more air carriers, or for any air carrier and any other common carrier or any person substantially engaged in the business of aeronautics, to consolidate or merge their properties, or substantial portion thereof, into one person for the ownership, management, or operation of the properties previously in separate ownerships;

"(2) for any air carrier, any person controlling an air carrier, any other common carrier, or any person substantially engaged in the business of aeronautics, to purchase, lease, or contract to operate all or a substantial portion of the properties of any air carrier;

"(3) for any air carrier or person controlling an air carrier to purchase, lease, or contract to operate all or a substantial portion of the properties of any person substantially engaged in the business of aeronautics otherwise than as an air carrier;

"(4) for any foreign air carrier or person controlling a foreign air carrier to acquire control in any manner whatsoever of any citizen of the United States substantially engaged in the business of aeronautics;

"(5) for any air carrier or person controlling an air carrier, any other common carrier, or any person substantially engaged in the business of aeronautics to acquire control of any air carrier in any manner whatsoever, except that the Board may by order exempt any such acquisition of a noncertificated air carrier from this requirement to the extent and for such periods as may be in the public interest; or

"(6) for any air carrier or person controlling a certificated air carrier to acquire control, in any manner whatsoever, of any person substantially engaged in the business of aeronautics other than as an air carrier.".

(b) Subsection (b) of such section 408 (49 U.S.C. 1378(b)) is amended to read as follows:

"Power of Board

"(b)(1) Any person seeking approval of a transaction specified in subsection (a) of this section, shall present an application to the Board, and, at the same time, a copy of the Attorney General and the Secretary of Transportation, and thereupon the Board shall notify the persons involved in the transaction and other persons known to have a substantial interest in the proceeding, of the manner in which the Board will proceed in disposing of such application. Unless, after a hearing, the Board finds that the transaction will not be consistent with the public interest or that the conditions of this section will not be fulfilled, it shall, by order, approve such transaction, upon such terms and conditions as it shall find to be just and reasonable and with such modifications as it

may prescribe, except the Board shall not approve such transaction—

"(A) if it would result in a monopoly or would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of air transportation in any region of the United States; or

"(B) whose effect in any region of the United States may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are outweighed in the public interest by the probable effect of the transaction in meeting significant transportation conveniences and needs of the community to be served, and unless it finds that such significant transportation conveniences and needs may not be satisfied by a reasonably available alternative having materially less anticompetitive effects.

The party challenging the transaction shall bear the burden of proving the anticompetitive effects of such transaction, and the proponents of the transaction shall bear the burden of proving that it meets the significant transportation conveniences and needs of the community to be served and that such conveniences and needs may not be satisfied by a less anticompetitive alternative.

"(2) The Board shall approve or disapprove any application for the approval of a transaction specified in subsection (a) within 180 days after the date such application was filed with the Board, unless the proposed transaction is of a particularly complex nature. If the Board determines that the proposed transaction is of a particularly complex nature, it may extend the period during which the Board must act on the application for not more than two additional 90-day periods. Notice of any extension shall be served on all interested parties and with the appropriate authorizing committees of the Congress, with thorough explanations of the complexities of the case which require such extensions.

"(3) In any case in which the Board determines that the transaction which is the subject of the application does not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation, and determines that neither the Attorney General, nor the Secretary, nor any other person disclosing a substantial interest in the transaction then currently is requesting a hearing, the Board, no sooner than 30 days after publication in the Federal Register of notice of the Board's intention to dispose of such application without a hearing (a copy of which notice shall be furnished by the Board to the Attorney General and the Secretary not later than the day following the date of such publication), may determine that the public interest does not require a hearing and, in accordance with the standards set forth in subparagraphs (A) and (B) of paragraph (1) of this subsection, by order, approve or disapprove such transaction.".

INTERLOCKS

SEC. 9. (a) Section 409(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1379(a)) is amended as follows:

(1) Paragraphs (1), (2), and (3) of such section 409(a) are each amended by striking out "is engaged in any phase of" and inserting in lieu thereof "is substantially engaged in the business of".

(2) Paragraphs (4), (5), and (6) of such section 409(a) are each amended by striking out "engaged in any phase of" and inserting in lieu thereof "substantially engaged in the business of".

(b) Section 409(b) of the Federal Aviation Act of 1958 (49 U.S.C. 1379(b)) is deleted.

AGREEMENTS

SEC. 10. (a) Subsection 412(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1382(a)) is amended by inserting in the heading "AFFECTING FOREIGN AIR TRANSPORTATION" immediately after "AGREEMENTS"; and by inserting "foreign" immediately after "affecting".

(b) Subsection 412(b) of such Act (49 U.S.C. 1382(a)) is amended by inserting "affecting foreign air transportation" immediately after "agreement" each time it appears therein.

(c) Section 412 of such Act (49 U.S.C. 1382) is further amended by adding at the end thereof the following:

"Filing and Approval of Agreements Affecting Interstate or Overseas Air Transportation

"(c)(1) Any air carrier may file with the Board a true copy, or, if oral, a true and complete memorandum, of any contract or agreement (whether enforceable by provisions for liquidated damages, penalties, bonds, or otherwise), or a request for authority to discuss possible cooperative working arrangements, affecting interstate or overseas air transportation and in force on January 1, 1979, or thereafter entered into, or any modification or cancellation thereof, between such air carrier and any other air carrier, foreign air carrier, or other carrier.

"(2) Upon filing of each contract or agreement, or memorandum of any contract or agreement, affecting interstate or overseas air transportation, or any modification or cancellation thereof, or upon the filing of a request by an air carrier for authority to discuss possible cooperative working arrangements, pursuant to paragraph (1), the Board, in accordance with regulations prescribed by the Board, shall provide to the Attorney General and the Secretary written notice of, and an opportunity to submit written comments on, the filed document. The Board may, upon its own initiative, or if requested by the Attorney General or the Secretary, in accordance with regulations prescribed by the Board, proceed by hearing to make the determinations specified in paragraph (3) regarding the filed contract or agreement, or the contract or agreement for which a memorandum was filed, or the filed request for discussion authority, whether or not previously approved by the Board.

"(3) The Board shall, by order, disapprove any such contract or agreement, or any modification or cancellation thereof, or any request for authority to discuss possible cooperative working arrangements, affecting interstate or overseas air transportation, whether or not previously approved by it, that it finds to be inconsistent with the public interest, or in violation of this Act, and shall, by order, approve, for a specified period, any such request, contract, or agreement, or any modification or cancellation thereof, that it finds is consistent with the public interest, and not in violation of this Act, except that the Board shall not approve any such contract or agreement, or any modification or cancellation thereof, that limits the level of capacity among air carriers in markets in which they compete, that fixes rates, fares, or charges between or among air carriers (except for joint rates, fares, or charges), or that is between an air carrier not directly engaged in the operation of aircraft in air transportation and a common carrier subject to the Interstate Commerce Act, as amended, governing the compensation to be received by such common carrier for transportation services performed by it. In addition, the Board shall not approve any such request, contract, or agreement, or any modification or cancellation thereof, if the effect of such approval would be substantially to lessen competition, or to tend to create a monopoly, or to create or maintain a situation involving a significant burden on competition, unless it finds that—

"(A) after considering reasonably available alternative means which would have a materially less anticompetitive effect, the anticompetitive effects of such approval are outweighed by significant and demonstrable air transportation benefits to the general public; and

"(B) with respect to determinations made after July 1, 1983, the air transportation benefits cannot be accomplished by reasonably available alternative means having materially less anticompetitive effects.

"(4) If an agreement or contract, or any modification thereof, or the grant of authority to discuss possible cooperative working arrangements, affecting interstate or overseas air transportation would provide the parties with significant cost savings or other significant competitive advantages which cannot be duplicated by the reasonable efforts of the actual or potential air carrier competitors of the parties to such agreement, contract, or discussions, the Board shall, if the public interest so requires, as a condition of its approval, require that the agreement, contract, or authority provide such air carrier competitors the opportunity to join in the agreement, contract, or discussion upon reasonable terms, including payment of a reasonable share of the costs of the agreement or contract.

"(5) In those instances where, in approving a contract agreement, or any modification or cancellation thereof, or request, under paragraph (3), the Board determines that the contract, agreement, or memorandum of a contract or agreement, or any modification or cancellation thereof, or request, would have anticompetitive effects of the type specified in that paragraph, but that such effects are outweighted by the factors specified in that paragraph, the Board shall limit the effectiveness of its approval to a period reasonably related to the continued existence of the factors upon which it based its decision, but in no case longer than 5 years. Before the end of such period, the parties may resubmit the contract, agreement, memorandum, or request, to the Board.

"(6) In any proceeding before the Board involving the application of the standards set forth in subparagraph (A) or (B) of paragraph (3), the party opposing the proposed contract, agreement, modification, or request shall have the burden of proving anticompetitive effects, and the party defending the proposed contract, agreement, modification, or request shall have the burden of proving air transportation benefits, and with respect to determinations made after January 1, 1984, that such benefits cannot be accomplished by reasonably available alternative means having materially less anticompetitive effects.

"(7) The findings required by paragraph (3), shall be included in any order of the Board approving or disapproving any contract or agreement, or any memorandum of any contract or request, or any modification or cancellation thereof, or any such request.

"(8) The Board shall approve or disapprove any application for approval filed under paragraph (1) within 90 days after the date the application was filed unless the Board determines that the application is of a particularly complex nature, in which case the Board may extend the period within which it must act by not more than 270 days.

"(9) Approval of any contract or agreement, or any modification or cancellation thereof, or any request, affecting interstate or overseas air transportation rendered by the Board before January 1, 1979, shall expire on January 1, 1982, unless refiled before July 1, 1980, and reapproved under the provisions of this subsection. Notwithstanding the provisions of paragraph (8), applications for reapproval of previously approved contracts, agreement, or requests (or substantially similar replacements) refiled under this paragraph need not be acted upon by the Board until January 1, 1982, except that in the case of a particularly complex contract, agreement, or request the Board may extend the period of its effectiveness for

a period not longer than 180 days and need not act upon the refiled contract, agreement, or request until the end of the extension period.".

ANTITRUST IMMUNITY

SEC. 11. Section 414 of the Federal Aviation Act of 1958 (49 U.S.C. 1384) is amended to read as follows:

"IMMUNITY CONFERRED

"SEC. 414. Any person affected by any order made under section 408, 409, or 412 of this Act shall be, and is hereby, relieved from the operations of the antitrust laws, as designated in section 1 of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes', approved October 15, 1914, and of all other restraints or prohibitions made by, or imposed under, authority of law, only insofar as may be necessary to enable such person to engage in the air transportation activities specifically approved by the Board in such order, except that in such an order the Board may specifically define and limit the scope of the immunity conferred, authorized, approved, or required by such order.".

EXEMPTION AUTHORITY

SEC. 12. (a) Section 416(b)(1) of the Federal Aviation Act of 1958 (49 U.S.C. 1386(b)(1)) is amended to read as follows:

"Exemptions

"(b)(1) The Board, from time to time and to the extent necessary, may exempt from the requirements of this title or any provision thereof, or any rule, regulation, term, condition, or limitation prescribed thereunder, any person or class of persons if it finds that the exemption is consistent with the public interest. Notwithstanding any other provision of this Act, the Board shall issue a final decision with respect to any application filed with the Board for an exemption with respect to the size of an aircraft which an air carrier may use within 90 days after such application is filed.

"(2) Any air carrier operating within the State of Alaska under part 298 of the economic regulations of the Board shall not be subject to any limitation, promulgated by the Board, on the number or location of points to be served by such air carrier, or any limitation on the frequency of service by such air carrier to points within that State, unless the Board, after a hearing, finds that the operation of such air carrier substantially impairs the ability of a certificated air carrier to provide the service authorized by its certificate, including but not limited to, the minimum service requirement for Alaska specified in section 419(g)(2)."

(b) Section 416(b) of such Act (49 U.S.C. 1386(b)) is further amended by renumbering paragraph (2) thereof as paragraph (3), and by adding at the end thereof the following new paragraph:

"(4) Any air carrier that engages in interstate or overseas air transportation with aircraft having a seating capacity of 36 passengers or less and a maximum certificated gross takeoff weight of 40,000 pounds or less shall not be required to obtain a certificate to engage in air transportation with such aircraft if that air carrier conforms to such financial responsibility and reporting requirements as the Board may by regulation impose. Air transportation provided by an air carrier pursuant to this paragraph shall be exempt from the provisions of section 422 (a) and such other provisions as the Board may, by rule, provide.

"(5) The Board may by order relieve foreign air carriers who are not directly engaged in the operation of aircraft in foreign air transportation from the provisions of this Act to the extent and for such periods as such relief may be in the public interest.".

COMPENSATION FOR ESSENTIAL AIR TRANSPORTATION

SEC. 13. (a) Title IV of the Federal Aviation Act of 1958 is amended by adding at the end thereof the following new section:

"COMPENSATION FOR ESSENTIAL AIR TRANSPORTATION

"Authority To Provide Compensation

"SEC. 419. (a)(1) In furtherance of the congressional policy to encourage and foster the development of safe and reliable scheduled air transportation for small communities and isolated areas, the Board shall, according to the provision of this section, determine fair and reasonable amounts of compensation for, and make payments of compensation to, any eligible air carrier who is providing or will provide essential air transportation to an eligible point, as provided in this section. Such compensation shall be made available from appropriations made to the Board for that purpose.

"(2) The Board shall, by rule, establish guidelines to be used by the Board in computing the fair and reasonable amount of compensation required to insure the continuation of essential air transportation at any eligible point. Such guidelines shall include expense elements based upon representative costs of air carriers providing scheduled air transportation of persons, property, and mail, using aircraft of the type determined by the Board to be appropriate for providing essential air transportation to the eligible point concerned.

"Air Carrier Eligibility

"(b) An eligible air carrier, for purposes of this section, shall be an air carrier who—

"(1) holds either a certificate to engage in interstate and overseas air transportation issued under section 401, or a certificate to engage in local air transportation issued under section 420, or both; and

"(2) if such air carrier will be providing essential air transportation to an eligible point in the State of Alaska, holds authority to engage in such air transportation issued by the proper agency of the State of Alaska.

"Points Eligible for Compensation

"(c) For purposes of this section, the term 'eligible point' shall include—

"(1) any point in any State which was, on January 1, 1979, listed on the certificate issued under section 401 before January 1, 1979, to any air carrier, regardless of whether authority to serve such point has been suspended by order of the Board; and

"(2) any other point designated by the Board under subsection (d) of this section. Each point designated as an eligible point according to paragraph (1) shall remain so designated until January 1, 1989. Before January 1, 1989, the Board shall review the points designated as eligible points under paragraph (1), and, applying the criteria established under subsection (d) of this section (as well as other criteria the Board deems appropriate), determine which of those points shall continue to be designated as eligible points after January 1, 1989.

"Addition of Eligible Points

"(d)(1) By no later than January 1, 1980, after considering the views of State agencies and other interested parties, the Board shall, by rule, establish objective criteria for designating points as additional eligible points. In establishing or modifying such criteria, the Board shall consider, among other factors, the level of traffic generated by the point concerned, its future traffic generating potential, the cost to the Government of providing essential air transportation to the point, the alternative means of transportation available to the residents of the point concerned for access to the national transportation system and its principal communities of interest, and the degree of isolation of the point from the national air transportation system. The Board may, from time to time, by rule, modify the criteria established by it under this paragraph.

"(2) By no later than January 1, 1980, the Board shall begin to review those points in any State, which were deleted from any certificate of public convenience and necessity between July 1, 1968, and January 1, 1979, to determine whether any such point shall be designated as an eligible point under the criteria established under paragraph (1). The review and designation of any such points shall be completed before January 1, 1982.

"(3) On or after January 1, 1982, the Board, upon application by any interested party, may designate any point as an eligible point under the criteria established under paragraph (1).

"(4) The designation of any point as an eligible point may be withdrawn if the point no longer meets the criteria for designation as an eligible point, except that the designation of a point under subsection (e)(1) as an eligible point may not be withdrawn before January 1, 1989.

"Applications for and Review of Compensation

"(e)(1) When the Board determines that essential air transportation will no longer be provided to any eligible point unless compensation therefor is paid under this section, the Board shall entertain and consider applications by eligible air carriers who are willing to provide essential air transportation to such point for compensation under this section. In reviewing such applications, the Board shall, among other factors, specifically consider—

"(A) the desirability of developing an integrated linear system of air transportation whenever such a system most adequately meets the air transportation needs of the communities involved; and

"(B) the experience of an applicant in providing scheduled air service in the vicinity of the communities for which essential air transportation is proposed to be provided; and

"(C) notwithstanding the provisions of subparagraph (B), with respect to eligible points in the State of Alaska, the experience of an applicant in providing scheduled air service or significant patterns of nonscheduled air service under part 298 of the Economic Regulations of the Board (14 CFR 298).

"(2) The Board shall determine the amount of compensation to be paid any individual eligible air carrier, for providing essential air transportation at an eligible point, according to the guidelines established by the Board under subsection (a)(2). The Board shall continue to pay compensation to an eligible air carrier only for so long as the Board determines it is necessary in order to maintain essential air transportation at the eligible point for which compensation is being paid. The Board shall make payments of compensation under this section at times and in a manner determined by the Board to be appropriate.

"(3) The Board shall periodically review the amount of compensation being paid an eligible air carrier under this section. Based upon that review, using the guidelines established by it under subsection (a)(2), the Board may make appropriate adjustments in the amount of compensation which it will pay to that eligible air carrier after such review. If an air carrier fails to satisfactorily provide the essential air transportation to an eligible point specified by the Board, for the

amount of compensation computed by the Board, then the Board may terminate compensation payments to such air carrier.

"Competing Applications

"(f)(1) After January 1, 1983, any air carrier holding a certificate issued under section 401 or 420, may file an application with the Board seeking to have any compensation provided under section 406 to the air carrier then serving an eligible point terminated in order to allow the applicant air carrier to provide air transportation to that eligible point for compensation under this section. The Board shall grant such application, after notice and a hearing if requested by the air carrier receiving subsidy under section 406, taking into consideration the objectives specified in subparagraphs (A) and (B) of subsection (e)(1), if the applicant can show that termination of the compensation being paid under section 406, and the provision of service by such applicant air carrier with compensation under this section will result in a substantial—

"(A) improvement in the air service being provided such eligible point; and

"(B) decrease in the amount of compensation that will be required to continue essential air transportation to that eligible point.

"(2) After January 1, 1983, any air carrier holding a certificate issued under either section 401 or 420 may file an application with the Board seeking to have the compensation provided under this section to the air carrier then serving an eligible point, and which has been serving such eligible point for at least 2 years preceding the date on which such application was filed, terminated in order to allow the applicant air carrier to provide essential air transportation to such eligible point for compensation under this section. The Board shall grant such application, after notice and a hearing if requested by an air carrier receiving compensation under this section, taking into consideration the objectives specified in subparagraphs (A) and (B) of subsection (e)(1), if the applicant air carrier can show that termination of the compensation being provided to the air carrier then serving such eligible point, and the provision of essential air transportation for compensation under this section by the applicant air carrier will result in a substantial—

"(A) improvement in the air transportation being provided such eligible point with no increase in the amount of compensation then being paid; or

"(B) decrease in the amount of compensation that will be required to continue essential air transportation to that eligible point.

"(3) In disposing of each application filed under this subsection, the Board shall, in addition to considering the objectives specified in subparagraphs (A) and (B) of subsection (e)(1), solicit and give great weight to the opinions of the communities affected by the proposed replacement of an air carrier under this subsection.

"Essential Air Transportation

"(g)(1) By no later than January 1, 1980, the Board, after specifically considering the views of interested communities and the State agency of each State, shall establish, by rule, criteria to be used in determining the essential air transportation for eligible points for which compensation may be provided under this section. Such criteria shall include, among other things, the standards to be used by the Board in determining the minimum frequency of air transportation to an eligible point, the minimum specifications of the aircraft to be used in providing such air transportation, and the maximum fares. Beginning July 1, 1982, the Board, upon the request of any community affected or of any certificated air carrier seeking to provide, or providing, air transportation to an eligible point, shall determine what is essential air transportation for the eligible point of the community affected making such request, or for the eligible point being served by the air carrier making such request, or for the eligible point which the air carrier making such request seeks to serve, as the case may be. By no later than January 1, 1985, the Board shall determine essential air transportation for each eligible point specified in subsection (c)(1) or designated by the Board under subsection (c)(2).

"(2) For the purposes of this section, the term 'essential air transportation' means scheduled air transportation of persons provided under such criteria as the Board determines satisfies the needs of the community concerned for air transportation to one or more communities of interest and insures access to the Nation's air transportation system, at rates, fares, and charges which are not unjust, unreasonable, unjustly discriminatory, unduly preferential, or unduly prejudicial. In no case shall essential air transportation be specified as fewer than two daily round trips, 5 days per week, except that, with respect to air transportation within the State of Alaska, essential air transportation shall not be specified at a level of service less than that which existed for any particular point during calendar year 1976, and in no case shall essential air transportation be specified as fewer than two roundtrips per week, unless otherwise specified under an agreement between the Board and the State agency of the State of Alaska, after consultation with the community affected.

"(3) The Board shall periodically review the specification of essential air transportation for each eligible point, and may, based upon that review and consultations with State agencies, and representatives of local government entities, make the appropriate adjustments to the specifications.

"Guarantee of Essential Air Transportation and Terminations

"(h)(1) The Board shall insure that essential air transportation is provided, on a continuing basis, to each eligible point specified in subsection (c)(1) until January 1, 1989. If, at any time during the period beginning on January 1, 1979, and ending on January 1, 1989, the Board receives notice, either under section 401(h)(1), section 420(e)(1), or under paragraph 2(A) of this subsection, that air transportation to such an eligible point is proposed to be suspended, terminated, or reduced below the level determined by the Board to be essential air transportation for the community, then the Board shall proceed according to the following provisions (in the following order) to insure that essential air transportation is provided, on a continuing basis, to the eligible point:

"(A) First, the Board shall determine if there is another air carrier providing air transportation to the eligible point which the Board determines to be essential air transportation for that eligible point. If there is such an air carrier, the Board shall continue to monitor the air transportation being provided by such air carrier to that eligible point.

"(B) Second, if there is no other air carrier providing essential air transportation to that eligible point, the Board shall, according to the provisions of this section, secure an eligible air carrier to provide such essential air transportation.

"(C) Third, if the Board determines that an eligible air carrier cannot be secured, as specified in subparagraph (B), within the 180-day period specified in section 401(h)(1), or the 90-day period specified in section 420(d)(1), and that it is necessary in order to avoid any suspension of service to that eligible point, then the Board shall require the air carrier then providing air transportation to that eligible point and proposing to so terminate, reduce, or suspend such air transportation, to continue to provide such air transportation for an additional 30-day period. If at the end of that 30-day period the Board determines that no eligible air carrier can be secured to provide essential air transportation to that eligible point on a permanent basis, either with or without compensation, then the Board shall extend such requirement for such additional 30-day periods (making the same determination at the end of each period) as may be necessary to continue air transportation to such eligible point until an eligible air carrier can be secured to provide essential air transportation to that eligible point on a permanent basis. In no case shall an air carrier who is required to continue providing air transportation under this subparagraph beyond the applicable notice period in either section 401(h)(1) or 420(d)(1), suspend, terminate, or reduce such air transportation below that level determined by the Board to be essential air transportation for that community until the Board certifies to such air carrier that it may terminate, reduce, or suspend such air transportation because another eligible air carrier is providing essential air transportation to the eligible point. Each air carrier which, under this section, is required to continue providing air transportation shall be provided compensation therefor under paragraph (3).

"(2)(A) If the essential air transportation to an eligible point specified in subsection (c)(1) is being provided, during the 10-year period referred to in paragraph (1), by an air carrier subject to the jurisdiction of the Board, other than an air carrier certificated under section 401 or 420, then such air carrier shall give notice to the Board, the community affected, and the State agency of the State in which the community is located, of a proposed termination, reduction, or suspension of air transportation to that eligible point at least 90 days before the date such proposed termination, reduction, or suspension is to become effective. Such air carrier shall be subject to the same requirements to continue providing air transportation as an air carrier under paragraph (1)(C) of this subsection.

"(B) When an air carrier specified in subparagraph (A) gives notice of an intended termination, reduction, or suspension of essential air transportation to an eligible point specified in subsection (c)(1), the Board shall pay compensation to such air carrier computed in the same manner as amounts of compensation are computed under paragraph (3) of this subsection.

"(3) The Board shall provide compensation to an air carrier under this section beginning, in the case of an air carrier required to give notice of a proposed termination, reduction, or suspension of air transportation under paragraph (2), within 30 days after the date such notice is filed with the Board; and in the case of any other air carrier required by the Board to continue providing air transportation to an eligible point, on the first day of the first 30-day period during which such air carrier is required to provide air transportation by the Board. Such compensation shall be paid out of appropriations made available to the Board for that purpose, and shall be in amounts determined by the Board necessary to insure each recipient air carrier a reasonable rate of return on its investment related to the air transportation involved, taking into account its fully allocable costs in providing the air transportation involved and the air carrier's revenues derived from providing such air transportation.

"(4) During any period for which the Board requires any air carrier to continue providing air transportation to an eligible point which such air carrier has proposed to terminate, reduce, or suspend, the Board

shall continue to make every effort to secure an eligible air carrier to provide at least essential air transportation to such eligible point, on a permanent basis, as otherwise provided in this subsection.

"Definition

'(i) For the purposes of this section the term 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the United States, Virgin Islands, unless specifically provided otherwise.".

(b)(1) Except as provided in section 419(f)(1) of the Federal Aviation Act of 1958, as amended, any air carrier who, on January 1, 1977, was providing interstate air transportation, under a certificate issued under section 401(d) of the Federal Aviation Act of 1958 (as such section read immediately before it was amended by this Act), in any city-pair market for which it was entitled to receive compensation from the Board under section 406 of that Act (as such section read immediately before it was amended by this Act), shall not, during the 7-year period beginning on January 1, 1979, solely by reason of the enactment of the amendment made by subsection (a)—

(A) have such compensation payments suspended or terminated; or

(B) be required to obtain a certificate to serve such point under section 420 of that Act (relating to certificates for local air carriers).

(2) Notwithstanding any other provisions of law, if during such 7-year period any air carrier specified in paragraph (1) terminates air service to an eligible point, then the Board shall determine the amounts of, and eligibility for, any compensation payments made to another air carrier for providing air transportation to that point under the provisions of section 419 of that Act.

LOCAL AIR TRANSPORTATION

SEC. 14. Title IV of the Federal Aviation Act of 1958, as amended by this Act, is further amended by adding at the end thereof the following new section:

"LOCAL AIR TRANSPORTATION

"Authority To Issue Certificates

"SEC. 420. (a) The Board shall issue a certificate to an applicant to engage in local air transportation of persons, property, and mail, if the Board determines that the applicant is fit, willing and able to perform properly local air transportation, to conform to the provisions of this Act and the rules, regulations, and requirements of the Board made or issued under this Act.

"Limitations

"(b) The Board shall not designate the geographical area, or the terminal or intermediate points, within or between which air transportation may be provided under a certificate issued under this section.

"Suspension and Revocation

"(c) The Board, upon application or upon its own motion, may suspend or revoke any certificate issued under this section, if the Board determines that the air carrier holding such certificate—

"(1) is no longer fit, willing, and able to properly perform the local air transportation authorized by such certificate; or

"(2) has intentionally failed to comply with any applicable provision of this title, or any order, regulation, or rule issued by the Board under this title.

Any interested party may file with the Board a protest or memorandum in favor of or in opposition to any such suspension or revocation of a certificate issued pursuant to this section.

"Termination of Service

"(d)(1) No air carrier providing local air transportation to any eligible point specified in subsection 419(c)(1) shall terminate, suspend, or reduce air transportation below that which the Board determines to be essential air transportation for that point, unless it shall have first given the Board, the community affected, and the State agency of the State in which such community is located, at least 90 days' notice of such proposed termination, suspension, or reduction, unless that essential air transportation is being provided to that point by another air carrier. During the 90-day period the Board shall make every reasonable effort to secure another air carrier holding either a certificate issued under section 401 or this section to provide essential air transportation to that point. If the Board determines that it will be unable to so secure another such air carrier within such 90 days, then it shall provide for the maintenance of essential air transportation to that point under the provisions of section 419(h).

"(2) With respect to any other point to which such an air carrier provides local aid transportation, the Board may, by rule, prescribe notice period (not longer than 30 days) to be adhered to by such air carrier when proposing to terminate or suspend local air transportation to that point.

"Nonapplicability of Certain Provisions

"(e) The following provisions of this title shall not apply to an air carrier which holds a certificate issued under this section and does not hold a certificate issued under section 401 or under section 421, or to the performance of local air transportation by any other air carrier holding a certificate issued under this section:

"(1) Sections 405(b), 407(b), 407(c), and, to the extent consistent with the public interest, 407(d).

"(2) Section 403, except the provisions of that section shall apply to—

"(A) tariffs for through rates, fares, and charges filed jointly with an air carrier or a foreign air carrier subject to the tariff filing requirements of such section 403;

"(B) tariffs, to the extent required by the Board, which relate to liability limitations with respect to persons or property in international air transportation; and

"(C) tariffs for rates, fares, and charges for the performance of essential air transportation, to the extent required by the Board under section 419.

"(3) Section 404(a), except—

"(A) such section shall apply to any essential air transportation provided under the provisions of section 419;

"(B) every air carrier shall at all times provide safe service, equipment, and facilities in connection with local air transportation; and

"(C) every air carrier shall observe just and reasonable joint rates, fares, and charges, and just and reasonable classifications, rules, regulations, practices as provided in tariffs specified by paragraph (2) to be filed jointly by such an air carrier with any other air carrier or foreign air carrier, and shall establish just, reasonable, and equitable divisions of such joint fares, rates, and charges as between air carriers participating therein which shall not unduly prefer or prejudice any such participating air carrier.

"(4) Section 404(b), except—

"(A) with respect to through service provided pursuant to tariffs specified by paragraph (2) to be filed jointly by such air carrier and any other air carrier or foreign air carrier; and

"(B) with respect to the provision of essential air transportation under the provisions of section 419.

"(5) Section 408 and 409 with respect to any air carrier which holds a certificate issued under this section and does not hold a certificate issued under section 401, except that this paragraph shall not be construed as relieving any other person who is subject to such sections from the obligations of those sections with respect to any relationships, transactions, contracts, or agreements they may have with any such air carrier.

"Limitations on Aircraft Size

"(f) An air carrier holding a certificate issued under this section shall provide or offer to provide local air transportation under that ceritficate only with an aircraft having a seating capacity of 36 passengers or less, and a maximum certificated gross takeoff weight of 40,000 pounds or less

"Local Air Transportation in Alaksa

"(g) An air carrier holding a certificate issued under this section shall not provide or offer to provide local air transportation under such certificate between points both of which are in the State of Alaska, or one of which is in the State of Alaska and the other in Canada, unless such air carrier also holds authority to provide such air transportation from the State of Alaska.

"Liability Insurance

"(h) Each air carrier holding a certificate issued under this section shall maintain in effect liability insurance as required by the Board.

"DEFINITION

"(i) For the purposes of this section, the term 'State' means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the United States Virgin Islands, unless specifically provided otherwise.".

Charter Certificates

SEC. 15. (a) Title IV of the Federal Aviation Act of 1958, as amended by this Act, is further amended by adding at the end thereof the following new section:

"CERTIFICATES FOR CHARTER AIR TRANSPORTATION

"General Provisions

"SEC. 421. (a) The Board shall issue a certificate under the provisions of this section authorizing, in whole or in part, the interstate or overseas charter air transportation specified in the application, if the Board determines that the applicant for that certificate is fit, willing, and able to perform properly the charter air transportation specified in the certificate; and to conform properly to the provisions of this Act, and the rules, regulations, and requirements issued or made by the Board under this Act. With respect to any certificate for which the application is filed with the Board before January 1, 1982, the Board, in addition to the determination specified in the preceeding sentence, shall determine that the charter air transportation specified in such certificate is consistent with the public convenience and necessity.

"Exception

"(b) During the 5-year period beginning on January 1, 1979, the Board shall not issue any certificate under this section to perform charter air transportation to any air carrier holding a crtificate of public convenience and necessity issued under section 401(d)(1) of this Act before January 1, 1977.

"Limitations

"(c) The Board shall attach to any certificate issued under this section, or any amendments thereto, such reasonable terms, conditions, or limitations as may be required in the public interest, but the Board shall not designate the geographical area, or the terminal or intermediate points, within or between which service may be rendered.

"Continuity

"(d)(1) Any air carrier who, on December 31, 1978, held a certificate issued under section 401(d)(3) (as that subsection read on December 31, 1978) to engage in interstate or overseas supplemental air transportation

shall continue to hold such certificate of public convenience and necessity authorizing that air carrier to engage in interstate or overseas charter air transportation. Such certificate shall continue to confer all of the authority, rights, and privileges conferred by such certificate on June 30, 1978, and such air carriers shall continue to be subject to all of the provisions of such certificate, except that such certificate shall include the authority to transport mail in interstate or overseas air transportation.

"(2) Any reference in any law, rule, regulation, or document of the United States to a certificate of public convenience and necessity for supplemental air carriers, shall be deemed to include certificates issued under this section.

"Charter Air Transportation in Alaska

"(e) Notwithstanding any other provision of this title, no certificate issued under this section shall authorize the holder thereof to provide charter air transportation between two points within the State of Alaska unless, and then only to the extent to which, the Board, in issuing or amending such certificate, may authorize after determining that such charter air transportation is required by the public convenience and necessity. This subsection shall not apply to a certificate issued under this section to a person who, before July 1, 1977, maintained its principal place of business within the State of Alaska and conducted air transport operations between points within the State of Alaska with aircraft having a certificated gross takeoff weight of more than 40,000 pounds.".

GENERAL PROVISIONS

SEC. 16. Title IV of the Federal Aviation Act of 1958, as amended by this Act, is further amended by inserting at the end thereof a new section to read as follows:

"GENERAL PROVISIONS

"Certificate Required

"SEC. 422. (a)(1) Except as specifically provided in this title, or exempted from the provisions of this title by the Board under section 416, no air carrier shall engage in any air transportation unless there is in force for that air carrier either a certificate issued by the Boad under section 401, 418, 420, or 421 authorizing such air carrier to engage in the air transportation specified in such certificate.

"(2) Except as specifically provided in this title, an air carrier holding or applying for any certificate under this title, or exempted from any provision of this Act, may hold or apply for any certificate or exemption under this Act.

"Applications for Certificates

"(b) Each application for a certificate shall be made in writing to the Board and shall be in such form and contain such information, and be accompanied by such proof of service upon such interested parties, as the Board, by regulation, shall require, and upon the community affected and the State agency of the State in which such community is located.

"Notice of Applications

"(c) Upon receiving an application for a certificate, the Board shall give notice thereof to the public by posting a notice of that application in the office of the secretary of the Board, and to such other interested parties as the Board, by regulation, may determine. Any interested person may file with the Board a protest or memorandum of opposition to or in support of the issuance of a certificate.

"Schedules and Equipment

"(d) Except as provided in section 419, no term, condition, or limitation of a certificate shall restrict the right of the holder thereof to add to or change schedules, equipment, accommodations, and facilities for performing the authorized air transportation and services as the development of the business and the demands of the public require.

"Control of Domestic Tour Operators

"(e) It shall be unlawful for any air carrier, or foreign air carrier, directly engaged in the operation of aircraft, to be engaged in, or to control, be controlled by, or be under common control with any person engaged in selling or organizing charter trips in interstate or overseas air transportation, or in United States originating foreign air transportation.

"Effective Date of Certificates

"(f) Each certificate issued under this title shall be effective from the date specified therein, and shall continue in effect until suspended or revoked as provided in this title, or until the Board certifies that operation thereunder has ceased, or, if issued for a limited period, shall continue in effect until the expiration of that period, unless, before the date of expiration, such certificate is suspended or revoked as provided in this title, or the Board certifies that operations thereunder have ceased.

"Authority to Modify, Suspend, or Revoke

"(g)(1) The Board upon petition or complaint or upon its own initiative, may alter, amend, modify, or suspend any certificate issued under section 401 or 421, in whole or in part, if the public interest so requires, or may revoke any such certificate, in whole or in part, for intentional failure to comply with any provision of this title or any order, rule, or regulation issued hereunder or any term, condition, or limitation of such certificate, except that no such certificate shall be revoked unless the holder thereof fails to comply, within a reasonable time to be fixed by the Board, with an order of the Board commanding obedience to the provision, or to the order (other than an order issued in accordance with this proviso), rule, regulation, term, condition, or limitation found by the Board to have been violated. Any interested person may file with the Board a protest or memorandum in support of or in opposition to the alteration, amendment, modification, suspension, or revocation of the certificate.

"(2) In any case where the Board has issued a certificate under section 401 on the basis that the air carrier holding such certificate will provide either innovative or low priced air transportation under such certificate, the Board, upon petition or its own motion, may review the performance of such air carrier, and may alter, amend, modify, suspend, or revoke such certificate or authority (in the same manner as otherwise provided under this subsection) on the grounds that such air carrier has not provided, or is not providing, such air transportation.

"Transfers Prohibited

"(h) No certificate may be transferred by any means unless such transfer is incidental to the transaction specified in, and is in compliance with, the provisions of section 408 of this Act.

"Certain Rights Not Conferred by Certificate

"(i) No certificate shall confer any proprietary, property, or exclusive right in the use of any airspace, Federal airway, landing area, or air-navigation facility.

"Compliance With Labor Legislation

"(j)(1) Every air carrier shall maintain rates of compensation, maximum hours, and other working conditions and relations of all of its pilots and copilots who are engaged in interstate air transportation within the continental United States (excluding Alaska) so as to conform with decision numbered 83 made by the National Labor Board on May 10, 1934, notwithstanding any limitation therein as to the period of its effectiveness.

"(2) Every air carrier shall maintain rates of compensation for all of its pilots and copilots who are engaged in overseas or foreign air transportation or air transportation wholly within a territory or possession of the United States, the minimum of which shall be not less, upon an annual basis, than the compensation required to be paid under said decision 83 for comparable service to pilots and copilots engaged in interstate air transportation within the continental United States (excluding Alaska).

"(3) Nothing in this subsection shall be construed as restricting the right of any such pilots or copilots, or other employees, of any such air carrier to obtain by collective bargaining higher rates of compensation or more favorable working conditions or relations.

"(4) It shall be a condition upon the holding of a certificate by any air carrier that such carrier shall comply with title II of the Railway Labor Act, as amended.

"(5) The term 'pilot' as used in this subsection shall mean an employee who is responsible for the manipulation of or who manipulates the flight controls of an aircraft while underway including takeoff and landing of such aircraft, and the term copilot as used in this subsection shall mean an employee any part of whose duty is to assist or relieve the pilot in such manipulation, and who is properly qualified to serve as, and holds a currently effective airman certificate authorizing him to serve as, such pilot or copilot.

"Insurance and Liability

"(k)(1) No certificate shall be issued or remain in effect unless the applicant for such certificate or the air carrier, as the case may be, complies with regulations or orders issued by the Board governing the filing and approval of policies of insurance or plans for self-insurance, in the amount prescribed by the Board, conditioned to pay, within the amount of such insurance, amounts for which applicant or such air carrier may become liable for bodily injuries to or the death of any person, or for loss of or damage to property of others, resulting from the operation or maintenance of aircraft under such certificate.

"(2) In order to protect travelers and shippers by air craft operated by certificated air carriers, the Board may require any such air carrier to file a performance bond or equivalent security arrangement, in such amount and upon such terms as the Board shall prescribe, to be conditioned upon such air carrier's making appropriate compensation to such travelers and shippers, as prescribed by the Board, for failure on the part of such carrier to perform air transportation services in accordance with agreements therefor.

"Part Charter Limitation

"(l) In no event shall an air carrier providing air transportation under a certificate issued under section 401 commingle, on the same flight, passengers being transported in interstate or overseas charter air transportation with passengers being transported in scheduled interstate or overseas air transportation, except that this subsection shall not apply to the carriage of passengers in air transportation under group fare tariffs. The preceding sentence shall expire 5 years after the date of enactment of this subsection. Thereafter, certificated air carrier shall have the authority to sell on an individually ticketed basis up to 20 percent of the seats on any aircraft engaged in charter air transportation, so long as such sales are made within 15 days of the flight departure.

"Continuing Requirement

"(m) The requirement that each applicant for a certificate or any other authority under this title must be found to be fit, willing, and able to perform properly the transportation

covered by its application and to conform to the provisions of this Act and the rules, regulations, and requirements of the Board under this Act, shall be a continuing requirement applicable to each such air carrier with respect to the transportation authorized by the Board. The Board shall by order, entered after notice and hearing, modify, suspend, or revoke such authority, in whole or in part, for failure of such air carrier to comply with the continuing requirement that the air carrier be so fit, willing, and able, or for failure to file such reports as the Board may deem necessary to determine whether such air carrier is so fit, willing, and able.

"Charter Regulations

"(n) Board regulations shall not restrict the marketability, flexibility, accessibility, or variety of charter trips whether provided under a certificate issued under section 401 or 421, except to the extent required by the public interest, and shall in no event be more restrictive than those regulations regarding charter air transportation in effect on July 1, 1977.".

FEDERAL PREEMPTION

SEC. 17. Title IV of the Federal Aviation Act of 1958, as amended by this Act, is further amended by adding at the end thereof the following new section:

"Federal Preemption

"SEC. 423. (a)(1) No State shall enact any law, establish any standard determining routes, schedules, or rates, fares, or charges in tariffs of, or otherwise promulgate economic regulations for, any air carrier certificated or exempted by the Board under the provisions of this title, except that any State which, on or before January 1, 1979, had authorized an air carrier to provide intrastate air transportation in that State, may continue to regulate such intrastate operations of such air carrier notwithstanding the fact that such air carrier, after January 1, 1979, is issued, for the first time, a certificate under this title, for so long as not less than 50 percent of the revenues of such air carrier is derived, during the most recent period for which data is available, from such intrastate operations. For the next year following such a period during which such an air carrier derived more than 50 percent of its revenues from interstate operations, and for each year thereafter, the entire air transportation operations of such air carrier shall be subject to regulation by the Board under this title. The Board shall provide regulations for allocating revenues of air carriers specified in the first sentence of this paragraph between intrastate and interstate air transportation operations.

"(2) When any air carrier which is specified in the first sentence of paragraph (1) becomes totally regulated by the Board, any authority received from the State to provide air transportation shall be considered to be part of its authority to provide air transportation received from the Board under this title, until modified, suspended, revoked, amended, or terminated as provided under this title.

"(3) Except with respect to air transportation authorized by the Board under a certificate issued under section 401 or, air transportation for which compensation may be paid under section 419, the provisions of paragraph (1) shall not apply to the air transportation of persons, property, or mail conducted wholly within the State of Alaska.

"(4) Any air carrier certificated by the Board under this title, and who enters into an agreement with an intrastate air carrier for the through handling of baggage or passengers, shall not, by reason of that agreement, be subject to regulation by any State. Neither shall such intrastate air carrier become subject to regulation by the Board by reason of entering into such an agreement. Nothing in this paragraph shall be construed, however, as affecting in any manner the Board's authority, otherwise conferred, over air transportation transactions covered by an agreement between air carriers, including agreements between interstate and intrastate air carriers for the through handling of baggage or passengers.

"(5) Any aircraft being used in flights (except flights between points in the State of Hawaii) in air transportation between points in the same State which, in the course of such flights, crosses a boundary between two States, or between the United States and any other country, or between a State and the beginning of the territorial waters of the United States shall not, by reason of crossing such boundary, be considered to be operating in interstate or overseas air transportation.

"Definition

"(b) For the purposes of this section, the term 'State' includes the several States of the United States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the District of Columbia, the territories and possessions of the United States, any political subdivision of any State, and any agency or entity of two or more States.".

FARES AND PRACTICES

SEC. 18. (a) Section 1002(d) of the Federal Aviation Act of 1958 (49 U.S.C. 14(d)) is amended to read as follows:

"Fares and Practices

"(d)(1) Except as provided in paragraph (2), whenever, after notice and hearing, upon complaint or upon its own initiative, the Board determines that—

"(A) any individual or joint fare or charge demanded, charged, or collected, or received by any air carrier for scheduled interstate or overseas air transportation of persons;

"(B) any rate or charge demanded, charged, collected, or received by any air carrier for air transportation of property in the State of Hawaii, or air transportation of property in the State of Alaska; or

"(C) any clasification, rule, regulation, or practice affecting any rate, fare, or charge specified in subparagraph (A), or (B), or the value of service thereunder;

is or will be unjust or unreasonable, the Board shall determine the maximum and minimum rate, fare, or charge thereafter to be demanded, charged, collected, or received by such air carrier, or the lawful classification, rule, regulation, or practice affecting such rate, fare, or charge thereafter to be effective.

"(2) The Board may not—

"(A) determine any fare demanded, charged, collected, or received by an air carrier for interstate or over seas air transportation of persons (other than a fare demanded, charged, collected, or received by an air carrier for scheduled air transportation of persons in any city-pair market in which the air carrier transports 70 percent or more of the passenger air traffic, as determined by the Board) to be unjust or unreasonable on the basis that it is too high, unless after July 1, 1979, the fare is, on the date the tariff containing such fare is filed, more than 5 percent higher than the standard industry fare level for the same or essentially similar class of service, except that, while no increase within the limits specified in this subparagraph may be suspended, an increase in fares above the standard industry fare level shall be found unlawful if that increase results in a fare which is unduly preferential, unduly prejudicial, or unjustly discriminatory; or

"(B) determine any fare demanded, charged, collected, or received by an air carrier for interstate or overseas scheduled air transportation of persons to be unjust or unreasonable on the basis that it is too low, unless the fare is—

"(i) on the date the tariff containing such fare was filed, more than 35 percent below the standard industry fare level for the same or essentially similar class of service; or

"(ii) predatory.

In determining whether a fare for scheduled air transportation of persons is unjust or unreasonable on the basis that is too high, the Board shall take into consideration reasonably estimated or foreseeable future costs and revenues for a reasonably limited future period during which the fare at issue would be in effect.

"(3) Whenever, after notice of hearing, upon complaint, or upon its own initiative, the Board determines that any classification, rule, regulation, or practice affecting any individual or joint rate or charge demanded, charged, collected, or received by an air carrier for the interstate or overseas air transportation of property or affecting any fare or charge demanded, charged, collected, or received by an air carrier for the interstate or overseas charter air transportation of persons, or affecting the value of service thereunder, is or will be unjust or unreasonable, the Board shall determine and prescribe the lawful classification, rule, regulation, or practice thereafter to be effective.

"(4) Whenever, after notice and hearing, upon complaint, or upon its own initiative, the Board determines that any individual or joint rate, fare, or charge demanded, charged, collected, or received by an air carrier for interstate or overseas air transportation, or any classification, rule, regulation, or practice affecting such rate, fare, or charge, or the value of service thereunder, is or will be unjustly discriminatory, or unduly preferential, or unduly prejudicial, or predatory, the Board shall alter the same to the extent necessary to correct such discrimination, preference, prejudice, or predatory practice and may order the air carrier to discontinue demanding, charging, collecting, or receiving the discriminnatory, preferential, prejudicial, or predatory rate, fare, or charge, charge, or enforcing the discriminatory, preferential, prejudicial, or predatory classification, rule, regulation, or practice.

"(5) In any Board proceeding under paragraph (2)(B), the party opposing any fare or charge on the basis that it is too low shall have the burden of proving that the fare or charge is too low.

"(6)(A) For the purposes of paragraph (2), 'standard industry fare level' means the fare level (as adjusted only in accordance with subparagraph (B)) in effect on July 1, 1977, for each class of service existing on that date, and in effect on the effective date of the establishment of each additional class of service established after July 1, 1977.

"(B) The Board shall, no less than semiannually, adjust each standard industry fare level specified in subparagraph (A) by increasing or decreasing such fare level, as the case may be, by the percentage change from the last previous period in the actual operating cost per available seat-mile for domestic scheduled service. In determining the standard, the Board shall make no adjustment to costs actually incurred.

"(C) By no later than July 1, 1978, the Board shall issue rules modifying the rules governing those classes of service in existence on July 1, 1977, which provide lower fare levels during off-peak periods, so as to expand the period of availability of such classes. The Board shall allow any air carriers to establish additional classes of service in accordance with the objectives of paragraph (c)(5) or as may be otherwise consistent with the public interest.

"(7) The Board may by rule increase the percentage specified in paragraph (2)(B).".

(b) Section 1002(e) of the Federal Aviation Act of 1958 (49 U.S.C. 1482(e)), is amended to read as follows:

"Standards for Limited Fare Regulation

"(e) In exercising and performing its powers and duties under subsection (d) of this section, the Board shall take into consideration, among other factors—

"(1) the criteria set forth in section 102 of this Act;

"(2) the need in the public interest for adequate and efficient transportation of persons and property at the lowest cost consistent with the furnishing of such service;

"(3) as to maximum fares, the need of an air carrier for profits sufficient to enable the air carrier, under honest, economical, and efficient management, to provide adequate and efficient air transportation;

"(4) the effect of prices upon the movement of traffic;

"(5) the desirability of a variety of price and service options such as peak and off-peak pricing or other pricing mechanisms to improve economic efficiency and provide low-priced air service; and

"(6) the desirability of allowing an air carrier to determine its prices in response to particular competitive market conditions on the basis of each air carrier's individual costs.".

SUSPENSION OF RATES, FARES, AND CHARGES

SEC. 19. The last sentence of section 1002 (g) of the Federal Aviation Act of 1958 (49 U.S.C. 1482(g)) is amended to read as follows: "The Board may not suspend or reject any proposed tariff—

"(1) because of a proposed fare contained in the tariff if such fare is within the percentage limits specified by subparagraph (A) (other than a fare for air transportation to which the percentage limitations of subparagraph (A) are not applicable) or (B)(i) of subsection (d)(2), or specified by the Board under subsection (d)(7);

"(2) containing a fare outside of the limits specified in subparagraph (A) or (B)(i) of subsection (d)(2), or specified by the Board under subsection (d)(7), because of a proposed fare or charge contained in the tariff, unless the Board is authorized under subsection 1002(d) of this Act to find the proposed rate, fare, or charge unlawful; or

"(3) containing a fare outside of the limits referred to in clause (2) of this sentence, on the basis that a proposed fare or charge contained in the tariff is too low, unless the Board first finds there is a substantial probability that the proposed fare or charge will be found unlawful under subsection 1002 (d).".

EXPEDITED PROCEDURES

SEC. 20. Title X of the Federal Aviation Act of 1958 is amended by inserting at the end thereof the following new section:

"EXPEDITED PROCEDURES

"Determination Regarding a Hearing

"SEC. 1010. (a) Whenever an application, complaint, or petition relating to interstate or overseas air transportation is filed with the Board under title IV of this Act (other than an application, complaint, or petition filed under section 408 or 409, an application specified in the first sentence of section 401 (a)(2), or an application, complaint, or petition for which a specific period of limitation or procedure is otherwise specifically provided), the Board shall, within 90 days after receiving such application, complaint, or petition, determine whether a specific provision of title IV or the public interest requires that the application, complaint, or petition be set for a hearing. During that 90 days the Board shall give interested persons an opportunity to participate in the decision of whether to set such application, complaint, or petition for a hearing through submission of written data, views, or arguments, but need not grant or offer an opportunity for oral presentation.

"Hearing Not Required

"(b)(1) If the Board determines, after considering any written data, views, or arguments submitted under the procedure provided in subsection (a), that a hearing is not required on such application, complaint, or petition, the Board shall issue an order, within 30 days after the date of its decision not to set the application, complaint, or petition for hearing, either granting or denying the application, complaint, or petition, or dismissing the application, complaint, or petition. Any order denying, granting, or dismissing an application, complaint, or petition shall clearly state the reasons of the Board for that decision, and shall be deemed to be a final order of the Board subject to judicial review.

"(2) If the Board determines that a specific provision of title IV or the public interest requires a hearing on an application, complaint, or petition, and that there are disputed issues of material fact, relating to such application, complaint, or petition, which require an oral evidentiary hearing to resolve, the Board shall proceed according to subsection (c). If the Board determines that a specific provision of title IV or the public interest requires a hearing on an application, complaint, or petition, but that there are no disputed issues of material fact which require an oral evidentiary hearing to resolve, the Board shall proceed according to subsection (d).

"Oral Evidentiary Hearing

"(c)(1) Whenever a specific provision of title IV or the public interest requires the Board to set an application, complaint, or petition for a hearing, and if the Board determines that there are disputed issues of material fact which require an oral evidentiary hearing to resolve, the Board shall set such application, complaint, or petition for an oral evidentiary hearing, at which each interested person will be entitled to present such evidence and testimony, and to conduct such cross-examination of persons as the Board determines to be appropriate, and required for a full and true disclosure with respect to such issues. Such hearings may be conducted by the Board, a member of the Board, or an administrative law judge.

"(2) The Board may prescribe such rules and make such rulings concerning proceedings in such hearings as may be necessary to avoid unnecessary costs or delay.

"(3) In a hearing held under this subsection, the Board, an administrative law judge, or Board member, as the case may be, shall issue an initial or recommended decision within 150 days after the date of the Board's decision that the application, complaint, or petition be set for an oral evidentiary hearing. If the Board does not act within 60 days after the initial or recommended decision is issued, the initial or recommended decision of the Board, administrative law judge, or Board member, as the case may be, shall become the final decision of the Board, subject to judicial review. If the Board takes review of the initial or recommended decision, the Board shall issue its final order with respect to such application, complaint, or petition within 90 days after the date such initial or recommended decision was issued.

"(4) Where the application, complaint, or petition raises one or more issues of unusual complexity or difficulty the Board may issue an order with a statement of the reason therefor, extending for not more than 30 days the period within which the Board administrative law judge, or Board member is required to issue an initial or recommended decision. In addition, the Board may extend any deadline stated in this section if delay results from the failure of an applicant, complainant, or petitioner to comply in a timely manner with procedural requirements of the Board, but the extension shall be for a period not to exceed the time of such delay.

"Show Cause Order

"(d)(1) Notwithstanding that a specific provision of this Act or the public interest requires the Board to set an application, complaint, or petition for a hearing, the Board may by order, entered after notice and opportunity for interested persons to file appropriate written evidence and arguments as it shall by rule provide, dispense with an oral evidentiary hearing and proceed to final decision, with or without an opportunity for further written or oral argument before the Board, in any case where it finds on the basis of the record before it, and of facts of which it is entitled to take notice under its rules of procedure, that there are no significant disputed issues of material fact which require an oral evidentiary hearing to resolve. In such case, the Board shall, on its own initiative or at the request of an interested party, first issue an order to show cause, describing specifically the action it proposes to take, setting forth its tentative findings of fact and conclusions of law in support of such action, requiring any interested party opposed to such action to show cause why such action should not be taken, and if such party requests an oral evidentiary hearing, why such a hearing is necessary to determine significant disputed issues of material fact and why any relevant and material facts the party proposes to adduce cannot be adequately placed into the record by written submissions or other means. Upon receipt of answers to its order to show cause, the Board shall proceed to final decision in the case, or set the case down for an oral evidentiary hearing.

"(2) With respect to applications, complaints, or petitions pertaining to interstate or overseas air transportation processed pursuant to this subsection, final decisions shall be rendered within not more than 180 days after the date the application, complaint, or petition was filed, and decisions to set down for oral evidentiary hearing shall be made within not more than 120 days after the date the application, complaint, or petition was filed.

"Hearing for Revocations or Suspension

"(e) Notwithstanding subsection (d), any air carrier may obtain an oral evidentiary hearing, if requested in a timely manner, in any proceeding related to the suspension or revocation of its certificate.

"Complaints of Civic Parties

"(f) Notwithstanding the provisions of this section, or of any other provision which applies periods of limitation on the Board, whenever a complaint is filed with the Board by a civic party under section 1002(d)(4), the Board shall, grant, deny, or dismiss such complaint within 90 days after such complaint was filed.

"Response to Applications, Complaints and Petitions

"(g) Notwithstanding any other provision of law, each time the Board grants, denies, or dismisses an application, complaint, petition, or other document requesting Board action, the Board shall state the reasons for so granting, denying, or dismissing such application, complaint, petition, or document in response to the action requested, except that the Board may dismiss an application, complaint, petition or other document for failure to comply with the procedures of the Board.".

EXISTING DETERMINATIONS

SEC. 21. All orders, determinations, rules, regulations, permits, contracts, certificates, rates, and privileges which have been issued, made, or granted, or allowed to become effective, by the President, the Civil Aeronautics Board, or the Postmaster General, or any court of competent jurisdiction, under any provision of law repealed or amended by

this Act, or in the exercise of duties, powers, or functions, which ahe vested in the Board, and which are in effect at the time this Act takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Board, or by any court of competent jurisdiction, or by operation of law.

EMPLOYEE PROTECTION PROGRAM

SEC. 22. (a) GENERAL RULE.—The Secretary of Labor is authorized to make monthly assistance payments, or reimbursement payments, in amounts computed according to the provisions of this section, to each individual who the Secretary finds, upon application, to be an eligible protected employee. An eligible protected employee shall be a protected employee who (1) has been deprived of employment, or (2) has been adversely affected with respect to his compensation, on account of a qualifying dislocation.

(b) MONTHLY ASSISTANCE COMPUTATION.—(1) An eligible protected employee may receive a monthly assistance payment, for each month in which he is an eligible protected employee, in an amount computed by the Secretary. The Secretary, after consultation with the Secretary of Transportation, shall by rule, promulgate guidelines to be used by him in determining the amount of each monthly assistance payment to be made to a member of each craft and class of protected employees, and what percentage of salary such payment shall constitute for each applicable class or craft of employees. In computing such amounts for any individual protected employee, the Secretary shall deduct from such amounts the full amount of any unemployment compensation received by the protected employee.

(2) If an eligible protected employee is offered reasonably comparable employment, and such employee does not accept such employment, then such employee's monthly assistance payment under this section shall be reduced to an amount which such employee would have been entitled to receive if such employee had accepted such employment. If the acceptance of such comparable employment would require relocation, such employee may elect not to relocate and, in lieu of all other benefits provided herein, to receive the monthly assistance payments to which he would be entitled if this paragraph were not in effect, except that the total number of such payments shall be the lesser of three or the number remaining pursuant to the maximum provided in subsection (e).

(c) ASSISTANCE FOR RELOCATION.—If an eligible protected employee relocates in order to obtain other employment, such employee may receive reasonable moving expenses (as determined by the Secretary) for himself and his immediate family. In addition, such employee may receive reimbursement payments for any loss resulting from selling his principal place of residence at a price below its fair market value (as determined by the Secretary) or any loss incurred in canceling such employee's lease agreement or contract of purchase relating to his principal place of residence.

(d) DUTY TO HIRE PROTECTED EMPLOYEES.—(1) Each person who is a protected employee of an air carrier which is subject to regulation by the Civil Aeronautics Board who is furloughed or otherwise terminated by such an air carrier on account of a qualifying dislocation shall have first right of hire, in order of seniority and regardless of age, in his occupational specialty, by any other air carrier hiring additional employees which held a certificate issued under section 401 of the Federal Aviation Act of 1958 prior to the effective date of this section. Each such air carrier hiring additional employees shall have a duty to hire such a person before they hire any other person, except that such air carrier may recall any of its own furloughed employees before hiring such a person. Any employee who is furloughed or otherwise terminated on account of a qualifying dislocation, and who is hired by another air carrier under the provisions of this subsection, shall retain his rights of seniority and right of recall with the air carrier that furloughed or terminated him.

(2) Beginning on the date on which monthly assistance payments under this section begin, the Secretary shall establish, maintain, and periodically publish a comprehensive list of jobs available with air carriers certificated under section 401 of the Federal Aviation Act of 1958. Such list shall include that information and detail, such as job descriptions and required skills, the Secretary deems relevant and necessary. In addition to publishing the list, the Secretary shall make every effort to assist an eligible protected employee in finding other employment. Any individual receiving monthly assistance payments, moving expenses, or reimbursement payments under this section shall, as a condition to receiving such expenses or payments, cooperate fully with the Secretary in seeking other employment. In order to carry out his responsibilities under this subsection, the Secretary may require each such air carrier to file with the Secretary the reports, data, and other information necessary to fulfill his duties under this subsection.

(3) In addition to making monthly assistance or reimbursement payments under this section, the Secretary shall encourage negotiations between air carriers and representatives of eligible protected employees with respect to rehiring practices and seniority.

(e) PERIOD OF MONTHLY ASSISTANCE PAYMENTS.—(1) Monthly assistance payments computed under subsection (b) for a protected employee who has been deprived of employment shall be made each month until the recipient obtains other employment, or until the end of the 36 months occurring immediately after the month such payments were first made to such recipient, whichever first occurs.

(2) Monthly assistance payments computed under subsection (b) for a protected employee who has been adversely affected relating to his compensation shall be paid for no longer than 36 months, so long as the total number of monthly assistance payments made under this section for any reason do not exceed 36.

(f) RULES AND REGULATIONS.—(1) The Secretary may issue, amend, and repeal such rules and regulations as may be necessary for the administration of this section.

(2) All rules and regulations shall be submitted to the Congress on the date that they are proposed by the Secretary. Such rules and regulations shall become effective 60 legislative days after the date they were submitted to the Congress, unless during the 60-day period either House adopts a resolution stating that that House disapproves such rules or regulations, except that such rules or regulations may become effective on the date, during such 60-day period, that a resolution has been adopted by both Houses stating that the Congress approves of them.

(3) For purposes of this subsection, the term "legislative day" means a calendar day on which both Houses of Congress are in session.

(g) AIRLINE EMPLOYEES PROTECTIVE ACCOUNT.—All payments under this section shall be made by the Secretary from a separate account maintained in the Treasury of the United States to be known as the Airline Employees Protective Account. There is authorized to be appropriated to such account annually, beginning with the fiscal year ending September 30, 1979, such sums as are necessary to carry out the purposes of this section, including amounts necessary for the administrative expenses of the Secretary related to carrying out the provision of this section.

(h) DEFINITIONS.—For the purposes of this section—

(1) The term "protected employee" means a person who, on the date of enactment of this section, has been employed for at least 4 years by an air carrier holding a certificate issued under section 401 of the Federal Aviation Act of 1958. Such term shall not include any members of the Board of Directors or officers of a corporation.

(2) The term "qualifying dislocation" means a bankruptcy or major contraction of an air carrier holding a certificate under section 401 of the Federal Aviation Act of 1958, occurring during the first 10 complete calendar years occurring after the date of enactment of the Air Transportation Regulatory Reform Act of 1978, the major cause of which is the change in regulatory structure provided by the Air Transportation Regulatory Reform Act of 1978, as determined by the Civil Aeronautics Board.

(3) The term "Secretary" means the Secretary of Labor.

(4) The term "major contraction" means a reduction by at least 15 percent of the total number of full-time employees of an air carrier within a 12-month period. Any particular reduction of less than 15 percent may be found by the Board to be part of a major contraction of an air carrier if the Board determines that other reductions are likely to occur such that within a 12-month period in which such particular reduction occurs the total reduction will exceed 15 percent. In computing a 15-percent reduction under this paragraph, the Board shall not include employees who are deprived of employment because of a strike.

(i) TERMINATION.—The provisions of this section shall terminate on the last day the Secretary is required to make a payment under this section.

LOAN GUARANTY

SEC. 23. The Act entitled "An Act to provide for Government guaranty of private loans to certain air carriers for purchase of modern aircraft and equipment, to foster the development and use of modern transport aircraft by such carriers and for other purposes", approved September 7, 1957 (49 U.S.C. 1324 note), is amended as follows:

(1) (A) Section 3 of such Act is amended by inserting in the first sentence after the words "by such lender" the following: "to any air carrier holding a certificate to engage in local air transportation from the Civil Aeronautics Board or".

(B) Section 3 of such Act is further amended by deleting in the first sentence the word "wholly" and inserting the following in lieu thereof: "the major portion of which is conducted".

(2) Section 4(c) of such Act is amended by striking out "10" and inserting in lieu thereof "15".

(3) Section 4(d) of such Act is amended by striking out "$30,000,000" and inserting in lieu thereof "$100,000,000".

(4) Section 3 of such Act is amended by striking out "twenty" and inserting in lieu thereof "25".

AIRPORT AND AIRWAY DEVELOPMENT ACT AMENDMENTS

SEC. 24. Section 11 of the Airport and Airway Development Act (49 U.S.C. 1711) is amended as follows:

(1) Paragraph (1) of such section 11 is amended to read as fo'lows:

"(1) 'air carrier airport' means—

"(A) an airport which, on December 31, 1978, was an air carrier airport (as that term was defined on that date); and

"(B) an existing public airport regularly served, or a new public airport which the Secretary determines will be regularly served,

by an air carrier certificated by the Civil Aeronautics Board under section 401 of the Federal Aviation Act of 1958, and a commuter airport.".

(2) Paragraph (7) of such section 11 is amended by (A) striking out "401(a)" and inserting in lieu thereof "422(a)"; and (B) inserting "or operating under a certificate issued by the Civil Aeronautics Board under section 420 of such Act," immediately after "1958".

MISCELLANEOUS

SEC. 25. The table of contents for the Federal Aviation Act of 1958 is amended as follows:

(a) Strike out "Sec. 102. Declaration of policy: The Board." and insert in lieu thereof the following item:

"Sec. 102. Declaration of policy: The Board.
"(a) Interstate and overseas air transportation.
"(b) All-cargo air transportation.
"(c) Foreign air transportation.".

(b) Immediately after "Sec. 104. Public right of transit." insert the following new item:

"Sec. 105. Safety study.
"(a) Policy.
"(b) Regulations and inspection procedures.
"(c) Report to Congress.".

(c) The item for section 401 is amended to read as follows:

"Sec. 401. Certificate of public convenience and necessity.
"(a) Certificates.
"(b) Interstate and overseas air transportation.
"(c) Foreign air transportation.
"(d) Guidelines for determining the public convenience and necessity.
"(e) Limitations.
"(f) Conditions of foreign air transportation.
"(g) Emergency operations.
"(h) Terminations, reductions, and suspensions of service.
"(i) Dormant authority.
"(j) Closed-door restrictions.
"(k) Automatic market entry.
"(l) Civil reserve air fleet.
"(m) Charters.".

(d) The item for section 412(a) is amended to read as follows:

"(a) Filing of agreements affecting foreign air transportation required.".

(e) The item for section 412 is further amended by inserting at the end thereof the following:

"(c) Filing and approval of agreements affecting interstate or overseas air transportation.".

(f) The item for section 414 is amended to read as follows:

"Sec. 414. Immunity conferred ".

(g) Immediately after the item for section 418 insert the following new items:

"Sec. 419. Compensation of essential air transportation.
"(a) Authority to provide compensation.
"(b) Air carrier eligibility.
"(c) Points eligible for compensation.
"(d) Addition of eligible points.
"(e) Applications for and review of compensation.
"(f) Competing applications.
"(g) Essential air transportation.
"(h) Guarantee of essential air transportation and terminations.
"(i) Definition.

"Sec. 420. Local air transportation.
"(a) Authority to issue certificates.
"(b) Limitations.
"(c) Suspension and revocation.
"(d) Termination of service.
"(e) Nonapplicability of certain provisions.
"(f) Limitations of aircraft size.

"(g) Local air transportation in Alaska.
"(h) Liability insurance.
"(i) Definition.

"Sec. 421. Certificates for charter air transportation.
"(a) General provisions.
"(b) Exception.
"(c) Limitations.
"(d) Continuity.
"(e) Charter air transportation in Alaska.

"Sec. 422. General provisions.
"(a) Certificate required.
"(b) Applications for certificates.
"(c) Notice of applications.
"(d) Schedules and equipment.
"(e) Control of domestic tour operators.
"(f) Effective date of certificates.
"(g) Authority to modify, suspend, or revoke.
"(h) Transfers prohibited.
"(i) Certain rights not conferred by certificate.
"(j) Compliance with labor legislation.
"(k) Insurance and liability.
"(l) Part charter limitation.
"(m) Continuing requirement.
"(n) Charter regulations.

"Sec. 423. Federal preemption.
"(a) Federal preemption.
"(b) Definition."

(h) The item for section 1002(d) is amended to read as follows:

"(d) Fares and practices.".

(i) The item for section 1002(e) is amended to read as follows:

"(e) Standards for limited fare regulation.".

(j) Immediately after "Sec. 100. Joinder of parties." insert the following new item:

"Sec. 1010. Expedited procedures.
"(a) Determination regarding a hearing.
"(b) Hearing not required.
"(c) Oral evidentiary hearing.
"(d) Show cause order.
"(e) Hearing for revocations or suspensions.
"(f) Complaints of civic parties.
"(g) Response to applications, complaints, and petitions."

(k) The last sentence of subsection 407(b) of the Federal Aviation Act of 1958 (49 U.S.C. 1377(b)) is repealed.

(l) Section 404(a)(1) of the Federal Aviation Act of 1958 is amended by striking out "rates, fares, and charges,", each place it appears, and inserting in lieu thereof, in each such place, "fares and charges,".

EFFECTIVE DATE

SEC. 23. (a) Except as provided in subsection (b), this Act, and the amendments made by this Act, shall take effect January 1, 1979.

(b) Sections 4, 23, 24, and 26 of this Act shall take effect on the date of enactment of this Act.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CANNON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 2493.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, not to extend beyond 30 minutes, with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE HOUSE

At 3:45 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 482. A bill to direct the Secretary of the Interior to purchase and hold certain lands in trust for the Zuni Indian Tribe of New Mexico; to confer jurisdiction on the Court of Claims with respect to land claims of such tribe; and to authorize such tribe to purchase and exchange lands in the States of New Mexico and Arizona.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 2452. A bill to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and for the Everett McKinley Dirksen Congressional Leadership Research Center.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3994. An act for the relief of Charles P. Abbott;

H.R. 4243. An act to authorize the Secretary of the Interior to convey certain lands in Placer County, California, to Mrs. Edna C. Marshall, and for other purposes;

H.R. 7588. An act to confirm a conveyance of certain real property by the Southern Pacific Railroad Company to M. L. Wicks;

H.R. 7971. An act to validate the conveyance of certain land in the State of California by the Southern Pacific Transportation Company;

H.R. 8588. An act to reorganize the executive branch of the Government and increase its economy and efficiency by establishing Offices of Inspector General within the Departments of Agriculture, Commerce, Housing and Urban Development, the Interior, Labor, and Transportation, and within the Community Services Administration, the Environmental Protection Agency, the General Services Administration, the National Aeronautics and Space Administration, the Small Business Administration, and the Veterans' Administration, and for other purposes;

H.R. 11400. An act to authorize the appropriation of specified dollar amounts for each of the National Science Foundation's major program areas (and certain subprograms), and to provide requirements relating to periods of availability and transfers of the authorized funds;

H.R. 11465. An act to authorize appropriations for the United States Coast Guard for fiscal year 1979, and for other purposes; and

H.R. 11495. An act to authorize research, development, and demonstration projects relating to aviation, and for other purposes.

## HOUSE BILLS REFERRED

The following bills were read twice by their titles and referred as indicated:

H.R. 3994. An act for the relief of Charles P. Abbott; to the Committee on the Judiciary.

H.R. 4243. An act to authorize the Secretary of the Interior to convey certain lands

in Placer County, California, to Mrs. Edna C. Marshall, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 7588. An act to confirm a conveyance of certain real property by the Southern Pacific Railroad Company to M. L. Wicks; to the Committee on Energy and Natural Resources.

H.R. 7971. An act to validate the conveyance of certain land in the State of California by the Southern Pacific Transportation Company; to the Committee on Energy and Natural Resources.

H.R. 8588. An act to reorganize the executive branch of the Government and increase its economy and efficiency by establishing Offices of Inspector General within the Departments of Agriculture, Commerce, Housing and Urban Development, the Interior, Labor, and Transportation, and within the Community Services Administration, the Environmental Protection Agency, the General Services Administration, the National Aeronautics and Space Administration, the Small Business Administration, and the Veterans' Administration, and for other purposes; to the Committee on Governmental Affairs.

H.R. 11400. An act to authorize the appropriation of specified dollar amounts for each of the National Science Foundation's major program areas (and certain subprograms), and to provide requirements relating to periods of availability and transfers of the authorized funds; to the Committee on Human Resources.

H.R. 11465. An act to authorize appropriations for the United States Coast Guard for fiscal year 1979, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 11495. An act to authorize research, development, and demonstration projects relating to aviation, and for other purposes to the Committee on Commerce, Science, and Transportation.

## HOUSE BILL JOINTLY REFERRED

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that H.R. 10822, an act to improve the operations of the national sea grant program, to authorize appropriations to carry out such program for fiscal years 1979 and 1980, and for other purposes, be jointly referred to the Committee on Commerce, Science, and Transportation, and the Committee on Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

## AUTHORITY FOR STAR PRINT OF SENATE CONCURRENT RESOLUTION 79

A star print was authorized for Senate Concurrent Resolution 79. disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters. The Committee on Finance was discharged from further consideration, and the concurrent resolution was referred to the Committee on the Judiciary.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 2553. A bill to authorize appropriations for the fiscal year 1979 for certain maritime programs of the Department of Commerce, and for other purposes (Rept. No. 95–741).

By Mr. CANNON, from the Committee on Commerce, Science and Transportation, with an amendment:

S. 2552. A bill to amend the Act of July 19, 1940, relating to travel in the United States, to authorize additional appropriations (Rept. No. 95–742).

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with an amendment and an amendment to the title:

S. 1829. A bill to provide for the establishment of the Jean Lafitte National Historical Park in the State of Louisiana, and for other purposes (Rept. No. 95–743).

By Mr. HATHAWAY (for Mr. BAYH), from the Select Committee on Intelligence, without amendment:

S. 2939. An original bill to authorize appropriations for Fiscal Year 1979 for intelligence activities of the U.S. Government, the Intelligence Community staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes (Rept. No. 95–744).

By Mr. LONG, from the Committee on Finance, with amendments:

H.R. 6715. An act to correct technical and clerical mistakes in the tax laws (Rept. No. 95–745).

By Mr. LONG, from the Committee on Finance, with amendments and an amendment to the title:

H.R. 9251. An act relating to extensions of time for the existing tax treatment of certain items (Rept. No. 95–746).

By Mr. PELL, from the Committee on Finance, with amendments and an amendment:

S. Res. 219. A resolution establishing a senior citizen internship program in the Senate (Rept. No. 95–747).

By Mr. PELL, from the Committee on Rules and Administration, without amendment:

S. Res. 421. A resolution authorizing the printing of the committee print entitled "Voting Rights in Major Corporations" as a Senate document (Rept. No. 95–748).

S. Res. 437. An original resolution to pay a gratuity to Kristin T. Atkinson. Placed on the Calendar.

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary:

Benjamin R. Civiletti, of Maryland, to be Deputy Attorney General (together with separate views) (Ex. Rept. No. 95–17).

(The above nomination from the Committee on the Judiciary was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. EASTLAND, from the Committee on the Judiciary:

Donald E. Ziegler, of Pennsylvania, to be U.S. District Judge for the Western District of Pennsylvania.

Robert W. Sweet, of New York, to be U.S. District Judge for the Southern District of New York.

Gustave Diamond, of Pennsylvania, to be U.S. District Judge for the Western District of Pennsylvania.

By Mr. RANDOLPH, from the Committee on Environment and Public Works:

William E. Albers, of the District of Columbia, to be Alternate Federal Cochairman of the Appalachian Regional Commission.

(The above nomination from the Committee on Environment and Public Works was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. PELL (for himself, Mr. MAGNUSON, Mr. HOLLINGS, and Mr. STEVENS):

S. 2938. A bill to improve the operations of the national sea grant program, to authorize appropriations to carry out such program for fiscal years 1979 and 1980, and for other purposes; to the Committee on Commerce, Science, and Transportation and the Committee on Human Resources jointly by unanimous consent.

By Mr. HATHAWAY (for Mr. BAYH), from the Select Committee on Intelligence:

S. 2939. A bill to authorize appropriations for Fiscal Year 1979 for intelligence activities of the United States Government, the Intelligence Community staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes; original bill reported and placed on the calendar.

By Mr. RIEGLE:

S. 2940. A bill to amend the Federal Railroad Safety Act of 1970 to authorize additional appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. MATHIAS:

S. 2941. A bill to amend the Internal Revenue Code of 1954 to provide that a married individual who files a separate return may be taxed at the same rate as an unmarried individual; to the Committee on Finance.

By Mr. GRIFFIN:

S. 2942. A bill for the relief of Hyong Cha Kim Kay; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 2943. A bill to amend the Internal Revenue Code of 1954 with respect to refunding obligations; to the Committee on Finance.

By Mr. GRAVEL:

S. 2944. A bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, National Wild and Scenic Rivers, National Forest and National Wilderness Preservation Systems, to establish a Federal-State Land Use Planning Commission, to establish procedures for the management of fish and wildlife on public lands in Alaska, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. TALMADGE (by request):

S. 2945. A bill to authorize civil penalties for violations of various laws for preventing the introduction and dissemination of livestock and poultry diseases, plant diseases, and plant pests; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2946. A bill to authorize the Secretary of Agriculture to relinquish exclusive legislative jurisdiction over lands or interests under his control; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2947. A bill to authorize the Secretary of Agriculture to regulate the exportation and transportation of animal semen; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2948. A bill to amend the Act of July 2, 1962, to authorize intrastate quarantines under extraordinary emergency conditions, to authorize United States marshals to serve warrants under the Act, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2949. A bill to repeal the Tobacco and Plant Exportation Act of 1940; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2950. A bill to repeal the statutes relating to the publishing of cotton price predictions in Government reports and the issuance of cotton crop reports; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2951. A bill to authorize the Secretary of Agriculture to accept and administer on behalf of the United States gifts or devices of real and personal property for the benefit of the Department of Agriculture or any of its programs; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2952. A bill to amend the Tobacco Inspection Act to consolidate, and provide additional authority for the Secretary of Agriculture to establish methods for efficient and equitable marketing of tobacco; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY (for himself and Mr. WEICKER):

S. 2953. A bill to amend title 23 of the United States Code in order to improve transportation throughout the Nation; to the Committee on Environment and Public Works.

By Mr. FORD:

S. 2954. A bill to amend the Communications Act of 1934 in order to protect the rights of the general public in the television broadcasting of major sports events; to the Committee on Commerce, Science, and Transportation.

By Mr. RANDOLPH (for himself, Mr. STAFFORD, Mr. HEINZ, and Mr. WILLIAMS):

S.J. Res. 127. A joint resolution designating September 10 through September 17, 1978 as "National Rehabilitation Week"; to the Committee on the Judiciary.

---

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PELL (for himself, Mr. MAGNUSON, Mr. HOLLINGS, and Mr. STEVENS):

S. 2938. A bill to improve the operations of the national sea grant program, to authorize appropriations to carry out such program for fiscal years 1979 and 1980, and for other purposes; to the Committee on Commerce, Science, and Transportation and the Committee on Human Resources, jointly, by unanimous consent.

SEA GRANT COLLEGE PROGRAM AUTHORIZATION

● Mr. PELL. Mr. President, I am introducing today, on behalf of myself and Senators MAGNUSON, HOLLINGS, and STEVENS, legislation to authorize appropriations for the national sea grant college program for fiscal years 1979 and 1980.

As the author, with Representative PAUL ROGERS of Florida, of the legislation which established the sea grant college program in 1966, I have watched closely the development and accomplishments of the program. During the past 12 years, the sea grant college program, although operating on a modest budget, has played a significant role in developing the capabilities required to make more productive use of our Nation's rich marine and coastal resources.

Through programs of education, applied research and extension services, by Sea Grant Colleges and other participating institutions, the Sea Grant program has had a direct impact on our knowledge and productive use of marine resources.

Earlier this month, the Subcommittee on Education, Arts and Humanities of the Human Resources Committee, and the Committee on Commerce, Science and Transportation, conducted a joint oversight hearing on the Sea Grant program.

The legislation being introduced today, based on that hearings, provides a modest increase in funding levels, and makes other minor adjustments in the program to make it even more effective.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2938

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the title heading of title II of the Marine Resources and Engineering Development Act of 1966 (33 U.S.C. 1101 et seq.) is amended to read as follows:

"TITLE II—NATIONAL SEA GRANT COLLEGE PROGRAM."

SEC. 2. Section 201 of the National Sea Grant Program Act (33 U.S.C. 1121) is amended by inserting "College" immediately before "Program".

SEC. 3. The National Sea Grant College Program Act (as redesignated by section 2 of this Act) (33 U.S.C. 1121–1131) is amended—

(1) by amending section 204(d)—

(A) by striking out "and" at the end of paragraph (5),

(B) by redesignating paragraph (6) as paragraph (7), and

(C) by inserting immediately after paragraph (5) the following new paragraph:

"(6) accept funds from other Federal departments, agencies (including agencies within the Administration), and instrumentalities to pay for grant made, and contracts entered into, by the Secretary under section 25(a); and";

(2) by striking out the period at the end of the last sentence of section 205(a) and inserting in lieu thereof the following: ", except that this limitation shall not apply in the case of grants or contracts paid for with funds accepted by the Secretary under section 204(d)(6).";

(3) by amending the first sentence of section 26(c) to read as follows:

"There are authorized to be appropriated for purposes of carrying this section not to exceed the following amounts:

"(1) $5,000,000 for each of fiscal years 1977, 1978, and 1979.

"(2) $7,000,000 for fiscal year 1980.";

(4) by amending section 211—

(A) by striking out "ANNUAL" in the section heading and inserting in lieu thereof "BIENNIAL",

(B) by amending subsection (a) to read as follows:

"(a) BIENNIAL REPORT. The Secretary shall submit to the Congress and the President, not later than February 15, 1980, and not later than February 15 of every even numbered year thereafter, a report on the activities of, and the outlook for, the national sea grant program."; and

(C) by amending the last sentence of subsection (b) to read as follows: "Such material shall be submitted to the Secretary not later than February 1 of the year in which the report concerned is to be submitted under subsection (a), and the Secretary shall cause it to be published as a separate section in such report."; and

(5) by amending the first sentence in section 212 to read as follows:

"There are authorized to be appropriated for purposes of carrying out the provisions of this title (other than section 206) not to exceed the following amounts:

"(1) $50,000,000 for each of fiscal years 1977 and 1978.

"(2) $55,000,000 for each of fiscal years 1979 and 1980.".

SEC. 4. Section 3 of the Sea Grant Program Improvement Act of 1976 (33 U.S.C. 1124a) is amended by amending the first sentence of subsection (c) to read as follows:

"There are authorized to be appropriated for purposes of carrying out this section not to exceed the following amounts:

"(1) $3,000,000 for each of fiscal years 1977, 1978, and 1979.

"(2) $5,000,000 for fiscal year 1980.".

● Mr. HOLLINGS. Mr. President, I take great pleasure in cosponsoring this legislation today reauthorizing the Sea Grant program in the National Oceanic and Atmospheric Administration. This program, which is in its 12th year, is quite unique; it combines applied research, education and training, and advisory services in the marine affairs field, utilizing the expertise of our university and college systems to assist marine industries and other marine interests.

The legislation we are introducing today carries with it a 2 year authorization, and a modest increase in funding levels. In addition, two minor amendments are proposed: First, adding the term "College" to the title of the program; and second, providing a passthrough authority for funds from other programs within the National Oceanic and Atmospheric Administration. Sea Grant is in an unusual position within NOAA to assist other programs in the agency to utilize the experience, knowledge, and facilities of the Sea Grant college network to produce greater benefits and better knowledge for everyone.

I am delighted to join my colleague from Rhode Island in cosponsoring this legislation, and look forward to many more years of fruitful effort on the part of the Sea Grant program.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill introduced by the Senator from Rhode Island (Mr. PELL) dealing with authorizing appropriations to carry out the national sea-grant program for fiscal years 1979–1980, be jointly referred to the Committee on Commerce, Science, and Transportation and the Committee on Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

---

By Mr. RIEGLE:

S. 2940. A bill to amend the Federal Railroad Safety Act of 1970 to authorize additional appropriations, and for other

purposes; to the Committee on Commerce, Science, and Transportation.

FEDERAL RAILROAD SAFETY AUTHORIZATION ACT OF 1978

● Mr. RIEGLE. Mr. President, I am introducing today S. 2940 which is a combination bill containing the authorization for fiscal year 1979 for the Federal Railroad Administration, as well as a number of needed rail safety amendments. The Nation's accidents, injuries and deaths continue to be at an unacceptable level. Much of the blame is on the state of disrepair of the facilities, rolling stock and track conditions. Track defects were the cause of twice the number of accidents than any other cause in 1977. Almost one-fourth of the Nation's track is under slow orders, meaning that the track is substandard. The estimated figure for deferred maintenance is $6.6 billion at present. Something has to be done before it is too late and the rail system in the country becomes nonexistent.

The first portion of this bill authorizes the sum of $37,725,000 for FRA's budget for fiscal year 1979 broken down as follows:

First. For the Office of Safety, 600 safety inspectors (including 100 track inspectors and 45 signal and train control inspectors) and 125 clerical personnel not to exceed $20,725,000. Such funds shall be available for travel expenses of safety inspectors for not less than 20 days per month.

Second. $3,500,000 is authorized for the State program under the Rail Safety Act which is the same amount as has been authorized in previous years.

Third. $3,500,000 for salaries and expenses not otherwise provided for, which is the same as authorized in prior years.

Fourth. $10,000,000 for conducting safety research and development activities.

There are limitations on funding contained in the proposed bill requiring that at least 50 percent of the funds for railroad research and development shall be for safety research, improved track inspection and data acquisition technology, improved rail freight service, and improved passenger systems. In addition, funds for any railroad research and development program shall not exceed the funds allotted for railroad safety research.

The bill also clears up confusion created by two opposite court decisions in defining the term "designated terminal" under the Hours of Service Act. Designated terminal is defined as the home terminal and the away from home terminal for the assignment of a particular crew. In addition, the hours of service for a railroad worker is reduced to 10 hours per day starting 2 years from the effective date of this law.

Section 6 of the bill limits the length of a freight train to 4,300 feet, exclusive of the caboose. Studies have shown that the length of the train has direct correlation between accidents and efficiency. At present, the average length of a freight car is approximately 56½ feet, which would mean that a train could contain up to 75 cars. At present, the average number of cars in a train is 67.

Section 7 is designed to protect a railroad employee who is discharged, harassed or discriminated against where he notifies the secretary of an alleged violation or danger; has filed or instituted any proceeding resulting from any alleged violations of the safety laws; has testified in any safety proceeding; has refused to operate defective equipment or refused to work in an area or surroundings where he reasonably believes there is present an imminent danger to his safety and health.

The final section creates an Office of Occupational Safety and Health to administer the occupational safety and health functions of the FRA. The sum of $9,000,000 for salaries and expenses for up to 200 inspectors, and 40 clerical personnel are authorized. In addition, funds shall be available for travel expenses for such inspectors for not less than 20 days per month.●

---

By Mr. MATHIAS:

S. 2941. A bill to amend the Internal Revenue Code of 1954 to provide that a married individual who files a separate return may be taxed at the same rate as an unmarried individual; to the Committee on Finance.

MARRIAGE TAX

● Mr. MATHIAS. Mr. President, I am introducing today a bill to permit married persons the option of filing their tax returns under the same tax rate as are applicable to single individuals.

Each year, more and more married couples find it necessary for both spouses to contribute to family income. Under the pressures of inflation, one income is becoming increasingly inadequate for many families. In addition, many more women than previously, both single and married, are pursuing careers as part of a general movement toward the improvement of the economic, social, and professional status of women.

I speak in behalf of what, in quintessential tax lingo, is termed the "two-earner couple." Under our present income tax laws, when both husband and wife work, they expose themselves to higher tax rates than those for single persons or for married couples where only one person works. What's worse, while people on every side blame society's ills on the breakup of the family, these "two-earner couples" are advised by tax consultants that they could save money by divorcing and simply continuing to live together.

It is a great shock for these people to discover that Congress has imposed on them a tax penalty solely based on matrimony. The two-income married couples find that they must pay sharply higher Federal income taxes than if they were single earning the same incomes—even living together on those same incomes. Single workers are shocked to learn that if they were to get married their tax liability would increase under existing law, even if their incomes and expenses remain the same. Such a result is so irrational that many people find it hard to believe that it exists; yet it actually does exist under the present Federal law.

The marriage tax affects people of all income levels. Two married workers, for example, employed at about the minimum wage—$4200 per year each—must pay a marriage tax penalty of $191 over the Federal income taxes they would pay if they were single. Mr. President, this is real money at that income level—amounting to 38.2 percent of their Federal income tax bill, or over 62 percent more than the tax they would pay if they were single.

This "tax on marriage"—or as some have called it, this "sin subsidy"—runs against the entire tradition of our tax policy prior to 1969 and, I think, against the deep-rooted traditions of our society.

To rectify this situation, I am introducing a bill that would permit a married person to file his or her tax return individually, and thereby calculate the tax owed on the tables applicable to single individuals. Those married persons who prefer to file jointly would be unaffected by the new provision, and single taxpayers would not incur any greater tax liability. My bill will not provide a lower rate for married people; it will only equalize the tax rate so that men and women who happen to be married will not have to pay more taxes than single people. In addition, my bill would permit married persons who file separately under the new provisions to take advantage of the credit for employment-related expenses, such as the child care credit, in the same way as single taxpayers.

These reforms are long overdue. In the past, when I have introduced similar bills to eliminate the tax on marriage, Congress has tended to treat this problem as a matter of low priority, largely, I think, because of a perceived lack of interest among the public. This year I have received a great deal of mail on the subject. It has been estimated that at least one-half of all married couples are two-earner couples, and that most of them are affected adversely by the tax on marriage. As the public becomes more aware of this injustice, the demand will increase for abolition of the "tax on marriage." My bill would accomplish this in a simple, straightforward manner. I believe the time has come for this remedy, and that it should be enacted this year to become effective in time to provide relief on 1978 income.

Mr. President, I ask unanimous consent that my bill, as well as an editorial from the Washington Post by Dr. Sydney J. Key dated January 29, 1978, entitled, "Let's Stop the Tax on Marriage," and a chart illustrating the effect of current tax laws on two-income spouses at various income levels, be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 2941

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) so much of subsection (c) of section 1 of the Internal Revenue Code of 1954 (relating to tax imposed) as precedes the table is amended to read as follows:

"(c) Individuals (Other Than Surviving Spouses and Heads of Households) and Cer-

tain Married Individuals.—There is hereby imposed on the taxable income of—

"(1) every individual (other than a surviving spouse as defined in section 2 (a) or the head of a household as defined in section 22 (b)),

"(2) every married individual (as defined in section 143) who—

"(A) does not make a single return jointly with his spouse under section 6013,

"(B) who elects, at such time and in such manner as the Secretary prescribes, to have this subsection apply, and

"(C) whose spouse elects, at such time and in such manner the Secretary prescribes, to have the provisions of this subsection apply,

a tax determined in accordance with the following table:".

(b) Section 1 of such Code is amended by adding at the end thereof the following new subsection:

"(f) Community Property Laws.—In the case of a married individual (as defined in section 143) who elects to have the provisions of subsection (c) apply with respect to his taxable income for any taxable year, the computation of such taxable income shall be made without regard to any community property laws.".

(c) Subsection (d) of section 1 of such Code is amended—

(1) by inserting "Certain" before "Married" in the heading thereof, and

(2) by inserting ", or who elects to have the provisions of subsection (c) apply," after "section 6013".

(d) Subsection (d) of section 63 of such Code (relating to the definition of taxable income) is amended—

(1) by inserting ", or who is married and makes an election under section 1 (c)" before the comma at the end of paragraph (2), and

(2) by inserting "under section 1(d)" after "return" in paragraph (3).

(e) Clause (i) of section 6012 (a)(1)(A) of such Code (relating to persons required to make returns of income) is amended—

(1) by striking out ", is not" and inserting in lieu thereof "and is not", and

(2) by inserting "or who is married (as so determined) and makes an election under section 1 (c)," before "and for the taxable year".

Sec. 2. Subsection (c) of section 42 of the Internal Revenue Code of 1954 (relating to general tax credit) is amended by inserting "under subsection (d) of section 1" after "return".

Sec. 3. (a) Section 44A of the Internal Revenue Code of 1954 (relating to expenses for household and dependent care services necessary for gainful employment) is amended—

(1) by inserting ", or a married individual who makes an election under section 1(c) for such year" after "year" the first place it appears in subsection (e)(1)(A),

(2) by inserting "and who has not so elected" after "year" the first place it appears in subsection (e)(1)(B),

(3) by inserting "Certain" before "Married" in the heading of subsection (f)(2), and

(4) by inserting "or make the election provided under section 1(c) for such year" before the period at the end of subsection (f)(2).

(b) Section 152 of such Code (relating to definition of dependent) is amended—

(1) by striking out "or (e)" in subsection (a) and inserting in lieu thereof ", (e), or (f)", and

(2) by adding at the end thereof the following new subsection:

"(f) Support Test in Care of Credit for Employment-Related Expenses.—In the case of a married individual who makes an election under section 1(c) for the taxable year and who is entitled to claim the credit under section 44A with respect to any person but for the fact that he did not contribute over half of the support of such person, such person shall be treated for purposes of subsection (a) as having received over half of such support from such individual if—

"(1) over half of such support was received from such individual and his spouse;

"(2) the individual contributed over 10 percent of such support; and

"(3) the individual's spouse does not claim such person as a dependent in any taxable year beginning in such calendar year.".

Sec. 4. Section 1348 of the Internal Revenue Code of 1954 (relating to 50 percent maximum rate on personal service income) is amended by inserting "or make the election provided in section 1(c) for each year" before the period at the end of subsection (c).

Sec. 5. The amendments made by this Act apply to taxable years ending after the date of the enactment of this Act.

---

### Let's Stop the Tax on Marriage

(By Sydney J. Key)

The basic structure of our present income tax laws—which favor married one-earner couples—dates back to 1948. Then, in the normal American family, the husband worked and the wife stayed home. Now, 30 years later, families in which both husband and wife are employed outnumber one-earner couples. In perhaps the ultimate statistical recognition of the two-earner couple as the norm, the Census Bureau is abandoning its practice of designating the male as "head of household." Yet the male "head of household" concept still seems to hold sway in national tax policy.

This concept was clearly present in the Tax Reform Act of 1969, which set up a new, lower rate schedule for single wage earners and ignored what effect this would have when two wage earners were married. This new rate schedule, combined with increases in the standard deduction that benefited a single person more than a married person, produced what is known as the "marriage tax" on two-earner couples.

Peter Sailer, an Internal Revenue Service statistician, has calculated that at least 13 million married two-earner couples—the great majority of two-earner couples and one-third of all married couples with wages or salaries—paid a marriage tax to the U.S. government in 1974; that is, their taxes were higher as a married couple filing a joint return than they would have been as two single individuals living together. For these couples, the government's annual tax on marriage totaled an estimated $2 billion. And, contrary to popular belief, almost all of these 13 million couples had combined incomes under $50,000.

The amount of the marriage tax for a two-earner couple can vary from a few dollars to a few thousand dollars; it tends to increase both with the couple's total income and with the similarity of the two incomes. When one spouse earns less than about one-fifth of the couple's total income, the benefits from income-splitting (the source of the big tax break for one-earner couples) usually outweigh the factors causing the marriage tax.

Three factors cause the marriage tax penalty. For 1977 income tax returns, a married couple, even when both spouses work, is limited to a standard deduction of only $3,200 ($1,600 if separate returns are filed); if single, they could each claim a standard deduction of $2,200 for a total of $4,400.

Even if the couple itemized deductions greater than $4,400, they still would be penalized by the effect of the tax rate schedules. For example, if each spouse had a taxable income of $15,000, the "marginal tax rate"—that is, the tax rate on the highest dollars of income earned—would be 39 percent, whether they filed jointly on their combined taxable income of $30,000 or separately on their taxable incomes of $15,000 each. But if two single people had the same taxable incomes—$15,000 each—each would have a marginal tax rate of only 31 per cent.

The singles' rates are lower because of a special tax rate schedule created by the Tax Reform Act of 1969. Until then, singles had to use the schedule for married individuals filing separately, the schedule with the highest tax rates. The purpose of the new singles' schedule was to reduce somewhat the taxes a single person paid compared to the taxes paid by a married one-earner couple filing a joint return with the same taxable income. But, as is often the case, the government's attempt to help one group (here, the singles) inadvertently left another group (the two-earner couples) relatively worse off. Married two-earner couples still had to use either the high rates of the schedule for marrieds filing separately or add their incomes together and use the schedule for marrieds filing jointly. Since the tax rate increases as income increases, adding the two incomes together results in the second income being taxed at higher rates than the first.

The final factor contributing to the marriage tax is the general tax credit for 1977. Each single person with a taxable income of $9,000 or more may claim one $180 tax credit; if two such people are married, they get only one $180 credit.

These factors, of course, are not of equal importance. The 1977 tax cost of marriage for a couple with adjusted gross incomes of $15,000 each who claim the standard deduction is $1,019. Of this amount, $180 is attributable to the loss of the extra tax credit. The standard deduction penalty accounts for $348 of the marriage tax. The largest component of the marriage tax, $407, derives from a married wage earner having to use a different tax rate schedule than one who is single; the higher the total income and the more similar the incomes of husband and wife, the more important this component becomes. The remaining $84 is accounted for by the effect of the standard deduction penalty at the higher married tax rate.

Under the progressive U.S. tax system, the only way to remove the marriage tax penalty for two-earner couples without again placing an unfair burden on singles compared to one-earner couples is to distinguish between one- and two-earner couples with the same total income.

At present, married couples with the same total income pay the same tax regardless of by whom or in what proportions the income is earned. According to the Treasury's Office of Tax Analysis, it is a "widely accepted" principle of taxation that "no distinction should be made among married couples according to which spouse earns the income."

But it is by no means axiomatic that a one-earner couple's tax bill should be identical with that of a two-earner couple with the same total income. In fact, many experts would argue that in this case total income is not the most appropriate indicator of the couple's tax capacity. For one thing, the dollar income for the one-earner couple does not include the value of the homemaker's services in the home, the very same value which many are now arguing should be quantified for purposes of Social Security benefits. For another, two-earner couples must pay the extra cost of earning the second income, such as transportation, clothes and meals that would not be needed if the second worker stayed at home.

Since the United States has been in the forefront in so many areas of equal rights for women, it is perhaps surprising that, compared with other industrial countries, it is almost alone in adhering to the principle of taxation that only the total income, and

not who earns it, matters. A recent Organization for Economic Cooperation and Development survey of 17 industrial countries found that in all but the United States a two-earner couple with the husband and wife each earning the average national wage are taxed less heavily than a one-earner couple with the same total income. In the United States, the tax would be the same.

Last fall, however, there were some intimations of change. The Office of Tax Analysis began acknowledging that "opposition to the marriage penalty is now so widespread that . . . it seems clear that . . . there must be some distinction between one-earner and two-earner married couples." And President Carter's tax proposals originally included an additional deduction of up to $600 for two-earner couples. But even this very limited attempt to deal with the marriage tax problem was eliminated from the administration's final tax package.

As now proposed by the administration, the various changes in personal exemptions, tax credits and tax rates would effect the marriage tax, but not in any systematic way. So while the hypothetical couple described above (each spouse earning $15,000) would appear to receive one of the larger absolute reductions in their marriage tax—$343, down from $1,019 to $676—other two-earner couples would have smaller reductions or even increases in their marriage taxes. The crucial point is, of course, that the marriage tax on two-earner couples remains an integral part of the tax structure, while its size continues to be at the mercy of changes made for other reasons.

In the end, then, the new proposals make no distinction between one- and two-earner couples. The original proposal for a deduction for two-earner couples did make this distinction, but at the same time it perpetuated the concept of tax rate schedules based on marital status.

Clearly, for both singles and two-earner couples, the most comprehensive solution to the problem of taxes and marital status is to tax every individual's own income on the same rate schedule regardless of marital status (the pre-1948 situation) but (unlike pre-1948) without regard to whether there are community property laws in the individual's state of residence. This was repeatedly proposed, to no avail, by former Rep. Edward Koch, now mayor of New York.

Rep. Millicent Fenwick (R-N.J.) has proposed a less comprehensive but less costly solution, which is simply to allow married two-earner couples the option of using the singles' tax rate schedule for each spouse's own income. If every taxpayer with earnings were also allowed to use the same standard deduction regardless of marital status, each working spouse would not only be taxed on the same rate schedule as a single person but would also be permitted to take the same standard deduction as a single person.

A number of two-earner couples have achieved this result by getting divorced, which is, until the law is changed, the only way to do it. But, as one of these couples has pointed out they would much prefer "being able to file as singles without having to file for divorce."

TAX ON MARRIAGE, EFFECT ON 2-INCOME SPOUSES AT VARIOUS INCOME LEVELS—TAXABLE YEAR 1977

| Assumed incomes | Tax on married couple filing joint return | Total tax on single individuals with same incomes | Marriage tax penalty | Marriage tax penalty as percentage over tax on 2 singles |
|---|---|---|---|---|
| $4,200 and $4,200 | $499 | $308 | $191 | 62.01 |
| $5,000 and $5,000 | 765 | 566 | 199 | 35.16 |
| $6,200 and $10,200 | 2,020 | 1,758 | 262 | 14.9 |
| $9,200 and $11,000 | 2,961 | 2,498 | 463 | 18.53 |
| $12,500 and $14,000 | 4,784 | 4,004 | 780 | 19.48 |
| $15,000 and $15,000 | 5,957 | 4,944 | 1,013 | 20.49 |
| $16,250 and $19,750 | $8,217 | $6,765 | $1,452 | 21.46 |
| $19,950 and $19,950 | 9,835 | 7,998 | 1,937 | 24.22 |
| $22,000 and $28,000 | 14,530 | 11,738 | 2,792 | 23.79 |
| $30,000 and $30,000 | 19,530 | 15,766 | 3,764 | 23.87 |
| $31,000 and $34,000 | 22,030 | 18,016 | 4,014 | 22.28 |

By Mr. CURTIS:

S. 2943. A bill to amend the Internal Revenue Code of 1954 with respect to refunding obligations; to the Committee on Finance.

● Mr. CURTIS. Mr. President, the purpose of the proposed amendment to section 103 of the Internal Revenue Code is to correct inequities which have arisen from a summary change in the tax law governing the advance refunding of industrial development bonds.

Prior to November 4, 1977, tax-exempt bonds could be issued to refund industrial development bonds provided that certain requirements set forth in the regulations under section 103 were met. Many corporations had expended large amounts of money, time and effort in the preparation of refunding bond issues which met the requirements of the existing regulations. On November 4 the Treasury Department released a press release stating that new regulations imposing substantial restrictions on refundings of industrial development bonds would be proposed, and would apply to refunding bonds issued after 5 p.m. eastern standard time on November 4, 1977. These regulations were proposed on December 1, 1977.

The proposed amendment would correct the unfairness caused by the summary change in the law by providing transitional provisions. The transitional provisions are narrow in scope and would permit refunding issues to proceed to closing only if, prior to December 1, 1977, certain actions toward the issuance of the refunding obligations had been taken by the governing body of the issuer or the affected corporation or a bond purchase agreement for the sale of the refunding obligations had been executed. These transitional rules are comparable to the procedure followed in 1968 when the industrial development bond provisions were enacted by the Congress.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2943

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That (a) section 103(b) of the Internal Revenue Code of 1954 (relating to industrial development bonds) is amended by adding at the end thereof the following new paragraph:

"(8) Refunding obligations may be issued to refund obligations described in paragraphs (4), (5) and (6) and obligations to which this subsection did not apply by reason of the date of their issuance if the obligations comply with regulations prescribed or proposed to be prescribed by the Secretary prior to the date of the issuance of the refunding obligations."

(b)(1) Except as provided in paragraph (2), the amendment made by subsection (a) shall apply to all refunding obligations described in section 103(b)(8) of the Internal Revenue Code of 1954.

(2) Paragraph (1) of section 103(b) shall not apply to any refunding obligations issued not more than 180 days after the date of the enactment of this Act to refund obligations to which section 103(b)(1) did not apply by reason of the date of their issuance if—

(A) the proceeds of such refunding obligations are applied solely to the payment of principal, interest and any redemption premium on the refunded obligations either at or prior to the maturity thereof and the payment of the issuance expense of the refunding bonds; and

(B)(i) the issuance of such refunding obligations or the proceedings toward such issuance were authorized or approved by the governing body of the governmental unit issuing the obligations or by the voters of such governmental unit;

(ii) a bond purchase agreement for the sale of such refunding obligations had been executed; or

(iii) the corporation obligated to make payments to the governmental unit for payment of the debt service on the obligations to be refunded approved by its Board of Directors (or by any committee thereof empowered to take action of that nature) participation in refunding transactions or approved proceedings toward the consummation of refunding transactions.●

By Mr. GRAVEL:

S. 2944. A bill to designate certain lands in the State of Alaska as units of the National Park, National Wildlife Refuge, National Wild and Scenic Rivers, National Forest, and National Wilderness Preservation Systems, to establish a Federal-State Land Use Planning Commission, to establish procedures for the management of fish and wildlife on public lands in Alaska, and for other purposes; to the Committee on Energy and Natural Resources.

ALASKA LANDS CONSERVATION AND MANAGEMENT ACT

● Mr. GRAVEL. Mr. President, today I am introducing a bill entitled the Alaska Lands Conservation and Management Act. Like several other bills introduced this Congress this bill follows up the provisions of section 17(d)(2) of the Alaska Native Claims Settlement Act (ANCSA) by designating certain lands in Alaska as additions to the National Park, Wildlife Refuge, National Forest and National Wild and Scenic Rivers Systems. How-

ever, over the past year the so-called (d)(2) issue has evolved into a much more comprehensive, far-reaching legislation than simply the establishment of new units of conservation systems. In the bill I am introducing today are many provisions which address critical areas of land use and land ownership in Alaska other than those strictly related to the designation of new conservation systems studied under the provisions of section 17(d)(2).

This bill is the product of the views and legislative work of many different interest groups and individuals as well as my own. I have solicited and received the thoughts and suggestions of literally thousands of organizations and knowledgeable persons both within Alaska and outside Alaska over the past several years on this issue. Much of this input is reflected in this bill. In addition, I have closely watched the progress of similar legislation in the House and have incorporated some of the language which was developed in the House Interior Committee where I felt Alaskan interests had participated in developing some good compromise language and provisions. Furthermore, the bill reflects consideration of the available, though limited, literature and data on alternative resource uses of lands which some have proposed for inclusion in conservation systems.

FOUR SYSTEM LANDS

My bill calls for the inclusion of 51.25 million acres in the four conservation systems identified in section 17(d)(2) of ANCSA. Some people would have you believe that Alaskans do not favor the designation of any such "four systems" lands in Alaska. This obviously is not the case. Under the provisions of my bill the total acreage in the Nation's national park system would be doubled; the national wildlife refuge system would be increased by 60 percent—if the existing refuges in Alaska were not counted, the refuge system would be doubled—and the number of rivers in the national wild and scenic rivers system would be more than doubled.

In terms of acreage, I feel this bill strikes a reasonable middle ground. Similar bills have recommended anywhere from 25 to 115 million acres of lands included in conservation systems. The acreage I have recommended in this bill, together with the existing acreage in Alaska in parks, refuges, and forests totals over 97 million acres—over one-fourth of the entire area of Alaska; or an area nearly the size of California.

I feel the 51.25 million acres of conservation system units in my bill includes the true nationally significant gems in Alaska. These are not just mountain tops and glaciers, but also include the complete range of ecosystems found in our State. Each unit represents a viable, manageable area which would preserve some of the best remaining natural environments in our country. At the same time, the boundaries were closely scrutinized to exclude those areas which were not necessary for the protection of nationally significant natural features or resources or did not add any special values to the conservation unit.

Similarly, the boundaries attempted to exclude those relatively few areas where the potential for the development of mineral resources or other resources is known to be high and where development would represent a significant conflict with designation of a conservation unit.

In other cases the designation of the particular management system was designed to minimize the impacts of inclusion of an area in a conservation system. One of the single greatest potential conflicts in national parks designation in Alaska is that on hunting. The designation of "preserves" in the Wrangell Mountain, Lake Clark and Aniakchak areas will relieve many of these conflicts by permitting sport hunting while at the same time protecting the obvious national interest in these lands.

FEDERAL-STATE LAND USE PLANNING COMMISSION

The simple designation of "(d)(2)" lands will not end the land problems or uncertainties in Alaska. Putting 50 or 80 or 100 million acres safely away on the shelf is only half a measure of "protection" of Alaska's lands. I am not willing to say, lock up these millions in parks and let us turn our backs on the future management of the bulk of the land in the State. If we are to learn from the land use mistakes so prevalent in the rest of the United States, let us start thinking in terms of long-range land planning and management now, with Alaska.

Under my bill there would remain over 250 million acres of land outside of the four systems or any comprehensive planning and zoning authority. These lands will be owned by the Federal and State governments and by private owners—largely native corporations created by ANCSA. Rather than nice neat big blocks of single-owner lands, a checkerboard of ownerships will dominate the State with important resources such as minerals, fish and game, timber, and the like found in locations not respecting any arbitrary ownership boundaries.

To properly plan and coordinate uses on most of Alaska's lands after the "(d)(2)" issue has been settled, I am proposing the establishment of a new Federal-State Land Use Planning Commission for Alaska. This Commission would have jurisdiction over all Federal lands located outside conservation system units and military reservations, over all State lands and over any private lands voluntarily placed under its authorities through a process set up by the State. The Commission would be composed of nine full-time members; a chairman appointed jointly by the President and the Governor, four Federal members appointed by the President, and four State members appointed by the Governor.

The Commission would set policy and overall management direction on lands under their jurisdiction with the line management carried out by the Bureau of Land Management, the appropriate State agency, and the concerned private landowner. The Commission would conduct land use plans for the various areas and classify the lands as to the various uses which would be permitted on the lands. In all cases they would closely coordinate uses of lands with managers and owners of adjacent lands.

Among the duties of the Commission would be the coordination of the implementation of various environmental laws such as the Clean Air Act, the Federal Water Pollution Control Act, the Coastal Zone Management Act, and others. This will insure that decisionmaking in regard to the permitting of a particular development will take into account all facets of the project, and once an overall decision to proceed with a development is made, that the usual nightmare of red-tape can be consolidated and expedited.

As opposed to a one-shot designation, the Commission concept is a proposal for on-going mechanism which can provide the necessary leadership and information base on a statewide basis to creatively solve the host of unknown problems which we in Alaska will undoubtedly be facing in the years ahead. I view this proposal as the most important part of this legislation. The Commission is really the core of what could be truly landmark legislation for my State and what could be possible a model for other States.

WILDERNESS

Although not mentioned in the provisions of section 17(d)(2) of ANCSA, designation of units of the Wilderness Preservation System has become an area of heated debate in the Alaska lands issue. Except in the case of southeast Alaska, I have not designated any wilderness in this bill.

Wilderness is not a designation in the same sense as a national park or refuge. Rather, it is a specific management prescription placed on top of portions of lands managed by a particular Federal agency such as the Forest Service or the Park Service. In the Lower 48 States studies have typically been conducted over a number of years on areas managed by a particular agency prior to passage of legislation designating portions of those areas as Wilderness. Except in southeast Alaska where the Forest Service is nearing completion of wilderness studies, virtually none of the areas recommended for as new units of the various conservation systems in my bill or the other "(d)(2)" bills have been studied for potential designation as wilderness areas. With the designation of most of these areas as parks, refuges, and wild and scenic rivers it seems both premature and unnecessary at this time to superimpose wilderness designations without the benefit of any specific studies as to what resources are involved and which areas would be best suited for designation.

In the case of the seven areas designated by this bill in the Tongass National Forest in southeast Alaska, I have proposed that final boundaries and acreages be determined after the completion of the Forest Service's land use plan for the region. I am confident that the data from this planning process will show that with careful boundary determinations, we can protect most of our great wilderness resources in southeast without any adverse impact on the local timber industry or on the several significant mineral deposits which have been located.

This is not to say that wilderness designations are not desirable in other areas

of Alaska. Under this bill the Commission would conduct studies of the demand for and use of wilderness as well as location of potential wilderness areas throughout the State. After 2 years the Commission would recommend areas which would form a statewide diversified wilderness system accommodating a variety of wilderness uses and incorporating a variety of landscapes and ecosystems. These studies and recommendations together with the findings and recommendations of Federal land managers would be the basis of later legislation designating wilderness throughout the State.

SUBSISTENCE

With several modifications the subsistence provisions closely follow those developed after considerable discussions and language rewrites by the House Interior Committee and concerned Alaskan groups. The issue of protecting the lifestyles of many rural Alaskans through the insurance of the continued use of plants and animals by these people for much of their economic livelihood has been a very emotional and divisive issue among Alaskans. The language worked out thus far is not perfect, nor does it make anybody really happy. However, it does incorporate what I feel are excellent concepts which have already gained support among several different interests involved in the debate. The discussions of this provision are still ongoing, and I would expect that further changes will be desirable.

STATE AND NATIVE LAND CONVEYANCES

Although Congress passed the Alaska Native Claims Settlement Act in 1971 providing for the conveyance of over 40 million acres of land to various Native corporations set up by the act, to date only a fraction of these lands have actually been conveyed. A host of reasons can be attributed to this delay. However, I think now is the time to cut our losses and provide some additional congressional direction to expedite the conveyance of these lands. Although I feel again that further modifications may be needed in the Native conveyance provisions in this bill, I think that clear, swift action is vitally needed in this area if we are to make good on our intentions in the Claims Act.

There is a well-worn argument in the (d) (2) debate which goes something like, "The state has received first pick of the best 103 million acres of Alaska land for resource exploitation under the terms of the Alaska Statehood Act, and so now the Nation is entitled to designate the remainder as parks, refuges. and other conservation system areas." As a matter of fact the State has only received approximately a quarter of their entitlement under the Statehood act and further selections and patents have been seriously disrupted if not barred by the withdrawal of lands for potential conservation system additions and by other public land withdrawals. As part of the (d) (2) settlement the entitlement of the State must be clarified and conveyance expedited.

MINERALS

As I have previously mentioned, relatively little is known about the resources on much of the land in Alaska. I have included many areas in conservation systems where any resource development possibilities will be effectively "written off" in favor of more apparent scenic, wildlife or other natural values. However, I think there are still some measures which we can take which will increase our knowledge of these designated areas, and in some cases, provide for vitally needed resource development without significantly impacting the values for which the conservation system area was established.

Specifically, I am proposing that mineral surveys be continued in all areas under appropriate safeguards. Also, with the exception of parks and monuments extraction activities could be permitted by the Secretary of the Interior under careful guidelines.

Furthermore, the Secretary would be directed to initiate an oil and gas leasing program on all refuge system lands. Although he has this authority under existing law, this authority has been virtually unused on existing refuges in Alaska to date.

One notable area where this has been most frustrating is within the existing Arctic National Wildlife Range. Although exploration of this land for oil and gas was intended at its creation, no such work has ever been permitted except by Federal agencies. Based on USGS information it now appears that the north slope of the range may possess the greatest potential for on-shore oil and gas discoveries in the United States. With our country's balance of trade payments running at dangerous deficits due to our heavy dependence on foreign oil, this situation seems almost ludicrous.

I think a carefully regulated, carefully monitored oil and gas leasing program on the range could lead to the discovery and development of a major oil and gas find which in turn would be of significant importance to continuance of our Nation's economic health and standard of living, just as the Prudhoe Bay has proved to be. Furthermore, I think that such a program could be designed to not impact the caribou and other wildlife that the range seeks to protect. As is the case with other North Slope explorations, activities are restricted to winter months when ice and snow provide protection of the permafrost and the animals are largely absent.

In a further effort to expedite this oil and gas program, I am proposing that the subsurface of a small portion of the range, approximately 3 percent, adjacent the State-owned Prudhoe Bay field be conveyed to the State in exchange for State lands of high national interest located next to proposed park and refuge areas designated by this bill. The surface of the range would still be owned by the Federal Government and would be managed by the Fish and Wildlife Service so that any exploration of or extraction from the subsurface estate would be carefully regulated. Such a trade would provide an excellent method of consolidating land ownerships of areas of high State interest as well as areas of high Federal interest.

TRANSPORTATION AND UTILITY CORRIDORS

Under some of (d) (2) proposals various conservation systems link up to form continuous designated areas hundreds of miles long. Even under more modest proposals we are often talking about new park or refuge areas which are over 100 miles wide or long. Obviously, the use of State or private lands adjacent to such proposal areas could be seriously restricted if at some future time a transportation or utility corridor were needed across the particular unit to reach a population center or market outlet.

It is therefore imperative that some provision be made for the possible future need of such corridors. This bill sets up a mechanism whereby the Commission would study possible routes of a needed transportation or utility system and make recommendations for rights-of-way across the necessary lands. Such rights-of-way across units of conservation systems would be granted by the Secretary unless he could make specific findings that reasonable alternatives exist and that significant harm would be done to the particular resources for which the unit were established to protect.

DENALI PARK DEVELOPMENT

Another area of the bill which I feel is extremely important is the development of visitor facilities to and in the conservation units which we establish. If such areas are to be for the good of the Nation, then we must make a firm commitment to make them available to the people. "Paper Parks" without a commitment to management and reasonable development are of little value.

One area in particular where I feel development would be of statewide and national value is the proposed expanded Denali "McKinley" National Park. Most people agree that the south side of the park offers much more opportunity for the provision of visitor facilities and for the provision of a quality recreational experience than the location of the existing park headquarters on the edge of the north side.

In this bill I am calling for a comprehensive study of a recreational development site on the south side. Such a study would include economic scoping for the desirable size of development, engineering feasibility, architectural designs, environmental studies, and transportation studies. Also included is an authorization for appropriation of moneys for development of a mass transit system from Anchorage to the site. The eventual development of a tightly controlled recreational city under the shadow of Denali (McKinley) would make this a visitor attraction of world scale.

SUMMARY

There are other miscellaneous provisions in this complex legislation which are too numerous to specifically discuss. This legislation is obviously of critical importance to Alaska. The decisions

which are eventually reached in regard to the issues which I have briefly discussed will affect the economic and social lifestyle of Alaskans for years to come. Just as with the Statehood Act and the Native Claims Act, the (d)(2) legislation will form an extremely large portion of the legislative history of my State and its future destiny.

For these reasons I implore my colleagues not to take this legislation lightly or use it as an opportunity to right all the environmental wrongs of the past or seek atonement for past votes on environmental issues. This is not just another park bill, this is legislation affecting an entire State's economic and social well-being. I ask you for your attention to the views of those most affected by this legislation in the months ahead and urge your strong consideration of the provisions contained in this bill.

I ask unanimous consent that the entire text of this bill along with a summary of the major provisions be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 2944

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Alaska Lands Conservation and Management Act".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Purposes, maps, and boundaries.

TITLE I—NATIONAL PARK SYSTEM

PART A—ESTABLISHMENT OF NEW AREAS

Sec. 101. Gates of the Arctic National Park.
Sec. 102. Yukon-Charley National Rivers.
Sec. 103. Kobuk Valley National Monument.
Sec. 104. Cape Krusenstern National Monument.
Sec. 105. Wrangell-St. Elias National Park; Wrangell Mountains National Preserve.
Sec. 106. Lake Clark National Park; Lake Clark National Preserve.
Sec. 107. Aniakchak National Monument; Aniakchak National Preserve.
Sec. 108. Imuruk Basin National Preserve.

PART B—ADDITIONS TO EXISTING AREAS

Sec. 111. Denali National Park.
Sec. 112. Katmai National Park.
Sec. 113. Glacier Bay National Park.

PART C—ADMINISTRATIVE PROVISIONS

Sec. 121. Administration of new areas.
Sec. 122. Recognition of Native selections.

TITLE II—NATIONAL WILDLIFE REFUGE SYSTEM

PART A—ESTABLISHMENT OF NEW AREAS

Sec. 201. Selawik National Wildlife Refuge.
Sec. 202. Innoko-Kaiyuh National Wildlife Refuge.
Sec. 203. Koyukuk National Wildlife Refuge.
Sec. 204. Alaska Marine Resources National Wildlife Refuge.
Sec. 205. Shismaref National Wildlife Refuge.

PART B—CHANGES AND ADDITIONS TO EXISTING AREAS

Sec. 211. Yukon Delta National Wildlife Refuge.
Sec. 212. Arctic National Wildlife Range expansion.
Sec. 213. Arctic National Wildlife Range exchange.
Sec. 214. Kenai National Moose Refuge.
Sec. 215. Cape Newenham National Wildlife Refuge.

PART C—ADMINISTRATIVE PROVISIONS

Sec. 221. Administration of new areas.

TITLE III—NATIONAL WILD AND SCENIC RIVERS SYSTEM

PART A—RIVERS WITHIN NATIONAL PARK SYSTEM

Sec. 301. Designation of rivers.
Sec. 302. Administrative provisions.

PART B—RIVERS WITHIN NATIONAL WILDLIFE REFUGE SYSTEM

Sec. 311. Designation of rivers.
Sec. 312. Administrative provisions.

PART C—RIVERS OUTSIDE NATIONAL PARK AND WILDLIFE REFUGE SYSTEM UNITS

Sec. 321. Designation of rivers.
Sec. 322. Administrative provisions.

TITLE IV—NATIONAL FOREST SYSTEM

Sec. 401. Additions to National Forest System.

TITLE V—WILDERNESS AND WILDERNESS STUDY AREAS

Sec. 501. Designation of wilderness in Southeast Alaska.
Sec. 502. Boundaries.
Sec. 503. Administrative provisions.
Sec. 504. Wilderness study.

TITLE VI—ALASKA FEDERAL-STATE LAND USE PLANNING COMMISSION

Sec. 601. Establishment of Commission; jurisdiction.
Sec. 602. Membership and procedures of Commission.
Sec. 603. Functions and duties.
Sec. 604. Cooperation of Federal agencies in environmental laws coordination.
Sec. 605. Termination of existing commission.
Sec. 606. Sunset clause.

TITLE VII—SUBSISTENCE

Sec. 701. Findings.
Sec. 702. Policy.
Sec. 703. Subsistence definition.
Sec. 704. State regulation.
Sec. 705. Enforcement duties of Secretary of the Interior.
Sec. 706. Cooperative arrangements.
Sec. 707. Subsistence and land use decisions.
Sec. 708. Access.
Sec. 709. Snowmobiles and motorboats.
Sec. 710. Research.
Sec. 711. Periodic reports.
Sec. 712. Regulations.
Sec. 713. Other laws.
Sec. 714. Limitations.
Sec. 715. Reimbursement to the State.

TITLE VIII—IMPLEMENTATION OF ALASKA NATIVE CLAIMS SETTLEMENT ACT AND ALASKA STATEHOOD ACT

Sec. 801. Conveyance of core township lands.
Sec. 802. Other conveyances to Native corporations.
Sec. 803. Administrative provisions.
Sec. 804. State land selections and conveyances.
Sec. 805. Protection of Native lands in contingency areas under timber sales.
Sec. 806. Use of protraction surveys.
Sec. 807. Action to enforce; jurisdiction.
Sec. 808. National Environmental Policy Act.
Sec. 809. Technical corrections in section 15 (a) of P.L. 94-204.

TITLE IX—MINERAL STUDY, EXPLORATION AND EXTRACTION IN CONSERVATION SYSTEM UNITS

Sec. 901. General geological investigations and mineral assessment programs in Alaska.
Sec. 902. Oil and gas leasing programs in National Wildlife Refuges.
Sec. 903. Non-fuel mineral exploration and and extraction programs.
Sec. 904. Existing mineral claims and mineral leasing rights in conservation system units.

TITLE X—TRANSPORTATION AND UTILITY RIGHTS-OF-WAY

Sec. 1001. Identification and approval process.

TITLE XI—GENERAL ADMINISTRATIVE PROVISIONS

Sec. 1101. Mining.
Sec. 1102. Selections by Native corporations and the State.
Sec. 1103. Land acquisition; inholdings.
Sec. 1104. Location of administrative sites.
Sec. 1005. Facilities on Native lands; services.
Sec. 1106. Inter-agency cooperation.
Sec. 1107. Planning.
Sec. 1108. Authority to construct capital improvements on non-federal lands.
Sec. 1109. State land exchanges.
Sec. 1110. Local hire.
Sec. 1111. Navigation facilities.
Sec. 1112. Access.
Sec. 1113. Cooperative information centers.
Sec. 1114. Section 22(e) lands.

TITLE XII—MISCELLANEOUS PROVISIONS

Sec. 1201. Denali National Park study and development.
Sec. 1202. Authorizations for construction.
Sec. 1203. Creation of National Historic Trails System.
Sec. 1204. Designation of Iditarod National Historic Trail.
Sec. 1205. Klondike Gold Rush National Historic Park.
Sec. 1206. Scenic highway study.
Sec. 1207. Reservation of transportation and utility corridor.
Sec. 1208. Bureau of Land Management wilderness reviews.
Sec. 1209. In-situ coal gasification research.
Sec. 1210. Authorization for appropriation.

PURPOSES, MAPS, AND BOUNDARIES

SEC. 2. (a) In order to preserve for the benefit, use, education, and inspiration of present and future generations certain natural lands and rivers in the State of Alaska (hereafter referred to as the "State") that contain nationally significant natural, scenic, historic, archeological, geological, scientific, wilderness, cultural, recreational, and wildlife values, the areas described in Title I are, subject to valid existing rights, hereby declared to be units of the National Park System; the areas described in Title III are, subject to valid existing rights, hereby declared to be units of the National Wild and Scenic Rivers System; lands described in Title IV are, subject to valid existing rights. hereby declared to be added to units of the National Forest System; and lands designated in Title V are, subject to valid existing rights, hereby declared to be units of the National Wilderness Preservation System.

(b) It is the intent of Congress in this Act to preserve unrivaled scenic and geological values associated with natural landscapes; to provide for the maintenance of sound populations of, and habitat for, resident and nonresident wildlife species; to preserve in their natural state unaltered ecosystems; to protect the resources related to subsistence needs; to protect and preserve the historic and archeological heritage of Alaska and the nation; to preserve wilderness resource values and related recreational opportunities; and to maintain opportunities for scientific research in undisturbed ecosystems.

(c) It is also the intent of Congress to provide a management system for the lands which are not located within the conservation system units designated in the Act for making sound land use decisions on lands owned by one or more governmental or private entities but which contain common

resources requiring complementary management decisions and actions.

(d) It is also the intent of Congress to encourage the use and appreciation of the various conservation system units designated by this Act by the public. To the extent that it is compatible with the resources and values for which the unit was established, access and facilities to accommodate visitors and recreationists to and within the designated units would be developed in connection with the management plans for the areas.

(e)(1) The boundaries of areas added to the National Park and Wildlife Refuge Systems shall, in coastal areas, not extend seaward beyond the mean high tide line to include lands owned by the State of Alaska unless the State shall have concurred in such boundary extension and such extension is accomplished under the notice and reporting requirements of this Act.

(2) The maps described in Titles I, II, IV, and V of this Act shall be on file and available for public inspection in the Office of the Secretary of the Interior (hereafter referred to as the "Secretary"), or the Secretary of Agriculture with regard to the National Forest System.

(3) As soon as practicable after enactment of this Act, a map and legal description of each change in land management status effected by this Act in the four national conservation systems, including the National Wilderness Preservation System, shall be published in the Federal Register and filed with the Speaker of the House of Representatives and the President of the Senate, and each such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in each such legal description and map may be made. Each such map and legal description shall be on file and available for public inspection in the Office of the Secretary. Whenever possible, boundaries shall follow hydrographic divides or embrace other typographic features in all cases where straight line map boundaries approximate such features. Following reasonable notice in writing to the Congress of his intention to do so, the Secretary and the Secretary of Agriculture may make minor adjustments in the boundaries of the areas added to or established as units of the National Park Wildlife Refuge, Wild and Scenic Rivers, and the National Forest Systems by this Act.

## TITLE I—NATIONAL PARK SYSTEM

### PART A—ESTABLISHMENT OF NEW AREAS

#### GATES OF THE ARCTIC NATIONAL PARK

SEC. 101. (a) There is established the Gates of the Arctic National Park of approximately 7,500,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The park established pursuant to this section shall be managed for the purposes of—

(1) maintaining the wild and undeveloped character of the area;

(2) providing opportunities for visitors to experience solitude;

(3) preserving the environmental integrity and scenic beauty of the mountains, forestlands, rivers, lakes, and other natural features of the area;

(4) protecting populations of fish and wildlife and their habitats; including caribou, grizzly bear, Dall sheep, moose, wolves, and raptorial birds;

(5) providing opportunities for water recreation on wild rivers and lakes, hiking, camping, and other outdoor recreational activities in a manner consistent with the purposes specified in paragraphs (1), (2), (3), and (4); and

(6) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

#### YUKON-CHARLEY NATIONAL RIVERS

SEC. 102. (a) There are established the Yukon-Charley National Rivers of approximately 1,490,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978 which shall be on file available for public inspection in the office of the Secretary.

(b) The national rivers established pursuant to this section shall be managed for the purposes of—

(1) maintaining the environmental integrity of the Charley River basin, including streams, lakes, and other natural features, in its undeveloped natural condition for public benefit and scientific study;

(2) protecting populations of fish and wildlife and their habitats, including the peregrine falcon and other raptorial birds, waterfowl, caribou, moose, Dall sheep, grizzly bear, and wolves;

(3) protecting and interpreting historical sites and events associated with the gold rush on the Yukon River as well as the geological and paleontological history and cultural prehistory of the area;

(4) providing opportunities for water recreation, hiking, camping, and other outdoor recreation activities in the area in a manner consistent with the purposes specified in paragraphs (1), (2), (3), and (4); and

(5) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

#### KOBUK VALLEY NATIONAL MONUMENT

SEC. 103. (a) There is established the Kobuk Valley National Monument of approximately 200,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The monument established pursuant to this section shall be managed for the purposes of—

(1) maintaining the environmental integrity of the natural features of the Kobuk River Valley, including the Great Kobuk Sand Dunes, in an undeveloped state;

(2) protecting and interpreting, in cooperation with Native cultures, the various natural features of the area;

(3) protecting the migration routes of the Arctic caribou herd;

(4) protecting populations of fish and wildlife and their habitats, including caribou, moose, black and grizzly bear, wolves, and waterfowl;

(5) providing opportunities for hiking, camping, river recreation, and other outdoor recreation activities in the area in a manner which does not interfere with the purposes specified in paragraphs (1), (2), (3), and (4); and

(6) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

#### CAPE KRUSENSTERN NATIONAL MONUMENT

Sec. 104. (a) There is established the Cape Krusenstern National Monument of approximately 190,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The monument established pursuant to this section shall be managed for the purposes of—

(1) protecting and interpreting a series of archeological sites depicting every known cultural period of arctic Alaska;

(2) providing for the scientific study of the immigration of Asian people into the area;

(3) preserving and interpreting evidence of prehistoric and historic native cultures, in cooperation with native Alaskans;

(4) protecting and interpreting a series of beach ridges, as well as the process of beach outbuilding;

(5) protecting seals and other marine mammals, birds, and other wildlife and fish resources and their habitats;

(6) providing opportunities for outdoor recreation activities in a manner which does not interfere with the purposes specified in paragraphs (1), (2), (3), (4), and (5); and

(7) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

#### WRANGELL-SAINT ELIAS NATIONAL PARK; WRANGELL MOUNTAINS NATIONAL PRESERVE

SEC. 105. (a) There is established the Wrangell-Saint Elias National Park of approximately 7,360,000 acres of Federal lands, and the Wrangell Mountains National Preserve of approximately 3,940,000 acres of Federal lands. These areas shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The park and preserve established pursuant to this section shall be managed for the purposes of—

(1) maintaining the scenic beauty and quality of the high mountain peaks, foothills, glacial systems, lakes and streams, waterfalls, valleys, and coastal landscapes of the park and preserve in their natural state;

(2) protecting populations of fish and wildlife and their habitats, including caribou, grizzly bear, Dall sheep, mountain goats, moose, wolves, trumpeter swans and other waterfowl, and marine mammals;

(3) providing opportunities for camping and hiking, river recreation, hunting and other outdoor recreation activities in a manner consistent with the purposes specified in paragraphs (1) and (2), and

(4) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

#### LAKE CLARK NATIONAL PARK; LAKE CLARK PRESERVE

SEC. 106. (a) There is established the Lake Clark National Park of approximately 2,230,000 acres of Federal lands, and the Lake Clark National Preserve of approximately 910,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The area established pursuant to this section shall be managed for the purposes of—

(1) protecting the watershed values necessary for the perpetuation of the salmon fishery in Bristol Bay and other fisheries;

(2) maintaining the scenic beauty and quality of portions of the Alaska Range and the Aleutian Range, including active volcanoes, glaciers, wild rivers, lakes, waterfalls, and alpine meadows in their natural state;

(3) protecting populations of fish and wildlife and their habitats including the Mulchatna caribou herd, Dall sheep, grizzly bear, wolves, bald eagle, and peregrine falcon;

(4) providing opportunities for water recreation, nature study, sightseeing, hiking, camping, hunting, and other outdoor recreation activities in a manner consistent with the purposes specified in paragraphs (1), (2), and (3); and

(5) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

ANIAKCHAK NATIONAL MONUMENT; ANIAKCHAK NATIONAL PRESERVE

SEC. 107. (a) There is established the Aniakchak National Monument of approximately 170,000 acres of Federal lands, and Aniakchak National Preserve, of approximately 80,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The area established pursuant to this section shall be managed for the purposes of—

(1) maintaining the caldera and its associated volcanic features and landscape, including the Aniakchak River and other lakes and streams, in their natural state;

(2) studying, interpreting, and assuring continuation of the natural process of ecological succession;

(3) protecting populations of fish and wildlife and their habitats, including grizzly bear, wolves, moose, caribou, sea lions, seals, and other marine mammals, geese, swans, and other waterfowl;

(4) interpreting geological and biological processes for visitors and providing opportunities for river running, hiking, hunting and other outdoor recreation activities, in a manner consistent with the purposes specified in paragraphs (1), (2), and (3); and

(5) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

IMURUK BASIN NATIONAL PRESERVE

SEC. 108. (a) There is established the Imuruk Basin National Preserve of approximately 400,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April —, 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The area established pursuant to this section shall be managed for the purposes of—

(1) protecting and interpreting examples of arctic plant communities, volcanic lava flows, frost phenomena and other geological processes;

(2) providing for the archeological and paleontological study in cooperation with Native Alaskans, of the process of plant and animal and human migration between North America and the Asian Continent including the protection of resources necessary for such study;

(3) protecting populations of fish and wildlife and their habitats, including marine mammals, grizzly bear, moose, and wolves;

(4) providing opportunities for outdoor recreation activities in a manner consistent with the purposes specified in paragraphs (1), (2), and (3); and

(5) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

PART B—ADDITIONS TO EXISTING AREAS

DENALI NATIONAL PARK

SEC. 111. (a)(1) Mount McKinley National Park is redesignated, and shall be known as, "Denali National Park".

(2) Mount McKinley is redesignated, and shall be known as, "Denali".

(3) Any law, regulation, map, document, or record of the United States in which such park or such mountain is referred to as "Mount McKinley National Park" or "Mount McKinley" shall be changed to refer to such park or such mountain as "Denali National Park" and "Denali", respectively.

(b)(1) Denali National Park is expanded by the addition of an area containing 2,620,000 acres of Federal lands generally depicted on the map entitled " ," dated April , 1978.

(2) The purposes of the expansion of Denali National Park are to—

(A) contain and protect the entire Denali massif and glacial system as well as additional scenic mountain peaks and formations. Protection of these features and the accommodation of recreational activities such as hiking, climbing, and camping which are associated with these features shall be emphasized in the management of the lands added to the south side of the existing Park.

(B) provide further protection for moose, caribou, Dall sheep, wolves, grizzly bear, and other wildlife and their habitats. Protection of these wildlife species shall be emphasized in the management of the lands added to the west and north side of the existing Park.

KATMAI NATIONAL PARK

SEC. 112. (a)(1) Katmai National Monument is redesignated, and shall be known as, "Katmai National Park".

(2) Any law, regulation, map, document, or record of the United States in which such monument is referred to as "Katmai National Monument" shall be changed to refer to such monument as "Katmai National Park".

(b)(1) Katmai National Park is expanded by the addition of an area containing 1,080,000 acres of Federal lands generally depicted on the map entitled "———," dated April —, 1978.

(2) The purposes of the expansion of Katmai National Park are to—

(A) protect high concentrations of grizzly (brown) bear and their denning areas as well as habitat for other wildlife;

(B) maintain unimpaired water habitats for significant salmon populations; and

(C) complete or contain areas of scenic, geological, watershed, and recreational value.

GLACIER BAY NATIONAL PARK

SEC. 113. (a)(1) Glacier Bay National Monument is redesignated, and shall be known as, "Glacier Bay National Park".

(2) Any law, regulation, map, document, or record of the United States in which such monument is referred to as "Glacier Bay National Monument" shall be changed to refer to such monument as "Glacier Bay National Park."

(b)(1) Glacier Bay National Park is expanded by the addition of an area containing 490,000 acres of Federal lands generally depicted on map entitled " ," dated April , 1978.

(2) The purposes of the expansion of Glacier Bay National Park are to—

(A) protect animal habitat and migration routes; and

(B) preserve portions of the Fairweather Range including the northwest slope of Mount Fairweather.

PART C—ADMINISTRATIVE PROVISIONS

ADMINISTRATION OF NEW AREAS

SEC. 121. (a) The Secretary shall administer the lands established or added to existing areas under the provisions of this title as units of the National Park System, pursuant to the provisions of the Act of August 25, 1916 (39 Stat. 535 et seq.), as amended and supplemented (16 U.S.C. 1 et seq.), and under the provisions of this Act.

(b) Notwithstanding the provisions of the Act of August 25, 1916 (35 Stat. 535 et seq.), as amended and supplemented (16 U.S.C. 1 et seq.)—

(1) hunting may be permitted on units of the National Park System under the provisions of title VII of this Act, and within any unit designated as a Preserve;

(2) transportation and utility rights-of-way may be granted by the Secretary across units of National Park System under the provisions of title X of this Act; and

(3) access to units of the National Park System shall be provided under the provisions of title XI of this Act.

(c) All proclamations and Executive orders reserving lands, waters, and interests therein for the former Katmai and Glacier Bay National Monuments shall remain in full force and effect, except to the extent that may be inconsistent with the Alaska Native Claims Settlement Act or the purposes of any unit established or expanded by this Act, and in such case the provisions of this Act shall prevail. Any funds available for the purposes of such monuments are hereby made available for the purposes of Katmai National Park or Glacier Bay National Park, as appropriate.

RECOGNITION OF NATIVE SELECTIONS

SEC. 122. Valid Native selections or nominations of lands within the boundaries of the Gates of the Arctic National Park or within the boundaries of the Wrangell-Saint Elias National Park and Preserve established under the provisions of this title, are recognized and shall be honored and conveyed by the Secretary in accordance with the Alaska Native Claims Settlement Act and title VIII of this Act.

TITLE II—NATIONAL WILDLIFE REFUGE SYSTEM

PART A—ESTABLISHMENT OF NEW AREAS

SELAWIK NATIONAL WILDLIFE REFUGE

SEC. 201. (a) There is established the Selawik National Wildlife Refuge of approximately 1,480,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The refuge established pursuant to this section shall be managed for the purposes of—

(1) protecting the crossroads habitats of the Asiatic and North American Flyways and their significant populations of snow geese, ducks and swans, sandhill cranes, and shorebirds;

(2) protecting populations of fish and wildlife and their habitats, including caribou;

(3) providing opportunities for hunting, fishing, reindeer grazing, and other activities, including continued subsistence uses, in a manner which does not interfere with the purposes specified in paragraphs (1) and (2); and

(4) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

INNOKO-KAIYUH NATIONAL WILDLIFE REFUGE

SEC. 202. (a) There is established the Innoko-Kaiyuh National Wildlife Refuge of approximately 2,180,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The refuge established pursuant to this section shall be managed for the purposes of—

(1) assuring continuing high production levels of waterfowl, including ducks, geese, and swans;

(2) protecting populations of fish and wildlife and their habitats, including numerous bird species, moose, beaver, salmon, and the Beaver Mountain caribou herd;

(3) permitting hunting, fishing, and other activities, including continued subsistence uses, in a manner which does not interfere with the purposes specified in paragraphs (1) and (2); and

(4) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

KOYUKUK NATIONAL WILDLIFE REFUGE

SEC. 203. (a) There is established the Koyukuk National Wildlife Refuge of approximately 2,680,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The refuge established pursuant to this section shall be managed for the purposes of—

(1) maintaining habitats in order to assure continued high level fall flights of ducks and geese;

(2) protecting populations of fish and wildlife and their habitats, including moose and fur bearing animals;

(3) providing opportunities for hunting, fishing, and other activities, including continued subsistence uses, in a manner which does not interfere with the purposes specified in paragraphs (1) and (2); and

(4) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

ALASKA MARINE RESOURCES NATIONAL WILDLIFE REFUGE

SEC. 204. (a) There is established the Alaska Marine Resources National Wildlife Refuge of approximately 330,000 acres of Federal lands. This area shall consist of the lands which are generally depicted on the map entitled " ," dated April , 1978, or which are in the following described units, together with all other federally-owned islands, islets, rock, reefs, and spires within six miles of the coast of Alaska:

(1) the Chukchi Sea unit, including Cape Lisburne, Cape Thompson, and the Chamisso National Wildlife Refuge;

(2) the Bering Sea unit, including the Bering Sea and Pribilof National Wildlife Refuge, Hagemeister Island, Fairway Rock, Sledge Island, Bluff Unit, Besboro Island, Egg Island, and the Punuk Islands;

(3) the Aleutian Islands unit, including the Aleutian Islands and Bogoslof National Wildlife Refuges, and all other Federal lands in the Aleutian Islands;

(4) the Alaska Peninsula unit, including the Simenof and Semidi National Wildlife Refuges; and

(5) the Gulf of Alaska unit, including the Forester Island, Hazy Islands, Saint Lazaria, and Tuxedni National Wildlife Refuges, the Barren Islands, Latax Rocks, Harbor, Pye, and Chiswell Islands, and the islands, islets, rocks, or spires surrounding Kodiak and Afognak Islands.

(b) The map referred to in subsection (a) shall be on file for public inspection in the office of the Secretary.

(c) The refuge established pursuant to this section shall be managed for the purposes of—

(1) protecting internationally significant marine birds and mammals and the land, water, and other marine resources on which such birds and mammals rely;

(2) perpetuating other indigenous fish and wildlife resources of the coastal marine environment;

(3) providing for national and international research on marine resources; and

(4) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

(d) The Secretary is directed to negotiate with the appropriate Native corporations pursuant to section 22(f), as amended, of the Alaska Native Claims Settlement Act the conveyance of public lands, interests therein, or other valuable consideration to the corporations in exchange for their interest in Walrus and Otter Islands, Sea Lion Rocks and the bird cliffs on St. Paul and St. George Islands. At such time as the exchange is agreed to, the Pribilof Islands National Wildlife Reserve, including Walrus and Otter Islands, Sea Lion Rocks and the bird cliffs on St. Paul and St. George Islands shall be included within the Bering Sea unit of the Alaska Marine Resources National Wildlife Refuge established in this section.

SHISHMAREF NATIONAL WILDLIFE REFUGE

SEC. 205. (a) There is established the Shishmaref National Wildlife Refuge of approximately 1,500,000 acres of Federal lands. This area shall consist of the lands generally depicted on the map entitled " ," dated April , 1978, which shall be on file available for public inspection in the office of the Secretary.

(b) The refuge established pursuant to this section shall be managed for the purposes of—

(1) perpetuating nationally significant migratory waterfowl and mammal populations on the lands and waters of the Shishmaref area;

(2) providing for archeological and paleontological study, in cooperation with Native Alaskans, of the process of plant, animal, and human migration between North America and the Asian continent;

(3) providing for continued subsistence uses;

(4) protecting range conditions for the continued grazing of reindeer;

(5) providing for recreational activities in a manner which does not interfere with the purposes specified in paragraphs (1), (2), (3), and (4); and

(6) furthering such other goals as the Secretary finds to be consistent with the provisions of this section.

PART B—CHANGES AND ADDITIONS TO EXISTING AREAS

YUKON DELTA NATIONAL WILDLIFE REFUGE

SEC. 211. (a)(1) The Clarence Rhode National Wildlife Refuge and Hazen Bay National Wildlife Refuge are redesignated, and shall be known as, the "Yukon Delta National Wildlife Refuge".

(2) Any reference to the "Clarence Rhode National Wildlife Refuge" or the "Hazen Bay National Wildlife Refuge" in any law, regulation, map, document, or record of the United States shall be considered to refer to such refuge as the "Yukon Bay National Wildlife Refuge".

(b)(1) The Yukon Bay National Wildlife Refuge is expanded by the addition of an area containing 7,600,000 acres of Federal lands generally depicted on the map entitled " ," dated April , 1978.

(2) The purposes of the expansion of the Yukon Bay National Wildlife Refuge are to—

(A) perpetuate the significant fall flights of ducks, swans, and geese, including large numbers of emperor geese, cackling geese, and large numbers of black brant;

(B) perpetuate significant numbers of shorebirds and waterbirds;

(C) protect populations of fish and wildlife and their habitats, including internationally significant migratory bird, fish, and marine mammal resources;

(D) maintain the environmental integrity of rivers and lakes;

(E) provide opportunities for hunting, fishing, and other activities, including continued subsistence uses, in a manner which does not interfere with the purposes specified in subparagraphs (A), (B), (C), and (D); and

(F) further such other goals as the Secretary finds to be consistent with the provisions of this section.

ARCTIC NATIONAL WILDLIFE RANGE EXPANSION

SEC. 212. (a) The Arctic National Wildlife Range is expanded by the addition of an area containing 1,890,000 acres of Federal lands generally depicted on the map entitled " ," dated April , 1978.

(b) The purposes of the expansion of the Arctic National Wildlife Range are to—

(1) protect internationally significant populations of caribou and migratory birds and their habitats;

(2) perpetuate other migratory and resident fish and wildlife populations;

(3) protect representative Arctic life zones and their primitive characters;

(4) provide continued opportunity for wildlife and wildland oriented recreational and subsistence uses in a manner which is consistent with the purposes specified in paragraphs (1), (2), and (3); and

(5) further such other goals as the Secretary finds to be consistent with the provisions of this section.

ARCTIC NATIONAL WILDLIFE RANGE EXCHANGE

SEC. 213. (a) The subsurface estate of approximately 280,000 acres of land described on the map entitled dated April, 1978, which is within the Arctic National Wildlife Range is removed from such Range.

(b) After the concurrence of the Governor of the State of Alaska and the Secretary, __ acres of lands which have been selected by the State, tentatively approved for patent to the State, or patented to the State, and which are located within or adjacent to one or more of the units of the National Park System or the National Wildlife Refuge System designed under the provisions of title I or II of this Act, shall be conveyed to the United States Government by the State or retained by the United States Government, as appropriate, and shall be added to the appropriate unit of the National Park System or the National Wildlife Refuge System designated under the provisions of title I or II of this Act.

(c) After the conveyance to or retention of lands by the United States pursuant to subsection (b), the Secretary shall convey the subsurface estate removed from the Arctic National Wildlife Range pursuant to subsection (a) to the State. The Secretary shall take such action as may be necessary to insure that the State may make full use of such subsurface estate, but may impose reasonable restrictions of such use which are designed to protect the surface values of the area.

KENAI NATIONAL MOOSE REFUGE

SEC. 214. (a)(1) Kenai National Moose Range is redesignated, and shall be known as, "Kenai National Moose Refuge".

(2) Any reference to the "Kenai National Moose Range" in any law, regulation, map, document, or record of the United States shall be considered to refer to such refuge as the "Kenai National Moose Refuge".

(b)(1) Kenai National Moose Refuge is expanded by the addition of an area containing 40,000 acres of Federal lands generally depicted on the map entitled " ," dated April , 1978.

(2) The purposes of the expansion of Kenai National Moose Refuge are to—

(A) perpetuate a nationally significant population of moose;

(B) protect populations of fish and wildlife and their habitats, including moose and other mammals and waterfowl;

(C) provide opportunities for wildlife oriented recreation in a manner consistent with the purposes specified in subparagraphs (A) and (B); and

(D) further such other goals as the Secretary finds to be consistent with the provisions of this section.

CAPE NEWENHAM NATIONAL WILDLIFE REFUGE

SEC. 215. (a) Cape Newenham National Wildlife Refuge is expanded by the addition of an area containing 240,000 acres of Federal lands generally depicted on the map entitled " ," dated April , 1978.

(b) The purposes of the expansion of Cape Newenham are to—

(1) protect populations of fish and wildlife and their habitats, including the large

populations of waterfowl, marine birds, and mammals associated with the Cape Newenham area;

(2) permit hunting, fishing, and other activities, including continued subsistence uses, in a manner consistent with the purpose specified in paragraph (1); and

(3) further such other goals as the Secretary finds to be consistent with the provisions of this section.

PART C—ADMINISTRATIVE PROVISIONS

ADMINISTRATION OF NEW AREAS

SEC. 221. (a) The Secretary shall administer the lands established or added to existing areas under the provisions of this title as units of the National Wildlife Refuge System, pursuant to the provisions of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd et seq.) and of this Act.

(b) (1) All proclamations, Executive orders, public land orders, and similar actions, which, prior to the date of enactment of this Act, reserve any lands, waters, or interests therein for refuge purposes within the boundaries of the areas established as or added to units of the National Wildlife Refuge System under the provisions of this title shall remain in full force and effect except where inconsistent with the provisions of this Act.

(2) Any funds available on the date of enactment of this Act for lands, waters, or interests therein reserved under any proclamation, Executive order, public land order, or similar action prior to the date of enactment of this Act shall continue to be available to carry out the purposes of the unit in which such land, water, or interest therein is located.

TITLE III—NATIONAL WILD AND SCENIC RIVERS SYSTEM

PART A—WILD AND SCENIC RIVERS WITHIN NATIONAL PARK SYSTEM

SEC. 301. Designation.—Section 3(a) of the Wild and Scenic Rivers Act (82 Stat. 907), as amended (16 U.S.C. 1274(a), is further amended by adding the following new paragraphs:

"( ). Alatna, Alaska.—The main stem within the Gates of the Arctic National Park; to be administered by the Secretary of the Interior.

"( ). Aniakchak, Alaska.—That portion of the river, including its major tributaries, Hidden Creek, Mystery Creek, Albert Johnson Creek, and North Fork Aniakchak River, within the Aniakchak National Monument and National Preserve; to be administered by the Secretary of the Interior.

"( ). Bremmer, Alaska.—The main stem, and the North, South, and Middle Forks within the Wrangell-Stain Elias National Park; to be administered by the Secretary of the Interior.

"( ) Charley, Alaska.—The entire river, including its major tributaries, Cooper Creek, Hosford Creek, and Crescent Creek, within the Yukon-Charley Rivers National Rivers; to be administered by the Secretary of the Interior.

"( ). Killik, Alaska.—That portion of the river, including its major tributary, Easter Creek, within the Gate of the Arctic National Park; to be administered by the Secretary of the Interior.

"( ). Noatak, Alaska.—That portion of the river within the Gates of the Arctic National Park; to be administered by the ———.

"( ). North Fork of the Koyukuk, Alaska.—That portion of the river, including its major tributary, the Tinayguk River, within the Gate of the Arctic National Park; to be administered by the Secretary of the Interior.

"( ). Tlikakila, Alaska.—That portion within the Lake Clark National Park; to be administered by the Secretary of the Interior.

SEC. 302. Administrative Provisions.—(a) The river segments designated in section 301 of this title are hereby classified and designated, and shall be administered, as wild river areas pursuant to the Wild and Scenic Rivers Act.

(b) The provisions of subsection 3(b) and section 6 of the Wild and Scenic Rivers Act shall not apply to the river segments listed in section 301. The provisions of Title VII of this Act shall supersede those of section 13(a) of the Wild and Scenic Rivers Act, concerning fish and wildlife.

PART B—WILD AND SCENIC RIVERS WITHIN NATIONAL WILDLIFE REFUGE SYSTEM

SEC. 311. Designation.—Section 3(a) of the Wild and Scenic Rivers Act (82 Stat. 907) as amended (16 U.S.C. 1274(a)), is further amended by adding the following new paragraphs:

"( ). Sheenjek, Alaska.—The segment within the Arctic National Wildlife Refuge, to be administered by the Secretary of the Interior."

SEC. 312. Administrative Provisions.—(a) The river segment designated in section 303 of this title is hereby classified and shall be administered as a wild river area within the National Wildlife Refuge.

(b) Notwithstanding any provisions to the contrary of the Wild and Scenic Rivers Act (82 Stat. 907; 17 U.S.C. 1271), the boundaries of the river segments referred to in section 311 of this title may include up to one mile from the mean high water level on either side of the river segments. Notwithstanding the provisions of section 3(b) of such Act, the Secretary shall establish boundaries of the river segments referred to in section 311 of this title within three years after the date of enactment of this title.

PART C—ADDITIONS TO NATIONAL WILD AND SCENIC RIVERS SYSTEM LOCATED OUTSIDE NATIONAL PARK SYSTEM UNITS AND NATIONAL WILDLIFE REFUGES

SEC. 321. Designation.—Section 3(a) of the Wild and Scenic Rivers Act (82 Stat. 907) as amended (16 U.S.C. 1274(a)) is further amended by adding the following paragraphs:

"( ). Alagnak, Alaska.—The portion beginning at the source, its major tributary the Nonvianuk, and running to the west boundary of township 13 south, range 43 west; to be administered by the Secretary of the Interior.

"( ). Andreafsky, Alaska.—That portion of the main stem from its source, including all headwaters to the west boundary of township 25 north, range 73 west; to be administered by the Secretary of the Interior.

"( ). Birch Creek, Alaska.—The segment of the main stem from the vicinity of the confluence of the North Fork downstream to its intersection with the Steese Highway; to be administered by the Secretary of the Interior.

"( ). Fortymile, Alaska.—The main stem within the State of Alaska; South Fork; Walker Fork downstream from the confluence of Liberty Creek; Mosquito Fork downstream from the vicinity of Kechumstuk; West Fork Dennison Fork downstream from the confluence of Logging Cabin Creek; North Fork; Champion Creek; the Middle Fork downstream from the confluence of Joseph Creek; and Joseph Creek; to be administered by the Secretary of the Interior.

"( ). Gulkana, Alaska.—The main stem from Paxson Lake to Sourdough and the entire West and Middle Forks; to be administered by the Secretary of the Interior.

"( ). Ivishak, Alaska.—That portion from its source, including all headwaters and an unnamed tributary to Porcupine Lake; to be administered by the Secretary of the Interior.

( ). Kanektok, Alaska.—That portion from Kagati Lake to a point sixteen miles above the mouth; to be administered by the Secretary of the Interior.

"( ). Noatak, Alaska.—That portion from the boundary of the Gates of the Artic National Park to the confluence of the Kelly River; to be administered by the Secretary of the Interior.

"( ). Sheenjek, Alaska.—The segment from the boundary of the Arctic National Wildlife Refuge to the confluence of the Porcupine River; to be administered by the Secretary of the Interior.

"( ). Unalakleet, Alaska.—The segment of the main stem beginning at 159 degrees 21 minutes 06.156 seconds west longitude approximately six miles from the headwaters extending downstream sixty miles to 160 degrees 19 minutes 15.031 seconds west longitude in the vicinity of the confluence of the Chiroskey River; to be administered by the Secretary of the Interior.

"( ). Wind, Alaska.—That portion from its source, including all headwaters and one unnamed tributary in township 13 south, range 21 east; to be administered by the Secretary of the Interior."

SEC. 322. Administrative Provisions.—(a) The Alagnak, Andreafsky, Birch Creek, Gulkana, Ivishnak, Kanetok, Noakak, Sheenjek, Unalakleet and Wind components as well as the Mosquito Fork downstream from the vicinity of Kechumstuk to Ingle Creek, North Fork, Champion Creek, Middle Fork downstream from the confluence of Joseph Creek, and Joseph Creek segments of the Fortymile component, designated in section 321 of this title, are hereby classified and designated and shall be administered as wild river areas pursuant to the Wild and Scenic Rivers Act. The remaining segments of the Fortymile components are classified and designated and shall be administered as scenic river areas, pursuant to such Act. The classification as wild river areas of certain segments of the Fortymile by this subsection shall not preclude such access across those river segments as the Secretary determines to be necessary to permit commercial development of mineral deposits in the North Fork drainage.

(b) The Secretary of the Interior shall take such action as is provided for under section 3(b) of the Wild and Scenic Rivers Act to establish detailed boundaries and formulate detailed development and management plans within one year after the date of enactment of this title with respect to the Alagnak, Birch Creek, and Gulkana components; within two years with respect to the Fortymile and Noatak components; within three years with respect to the Sheenjek, Andreafsky, Ivishak, Kanektok, and Unalakleet components. The detailed plan for each river (i) shall include establishment of detailed boundaries not to exceed one mile from the mean high water level on either side of the river segments, and (ii) shall include the establishment of a corridor based essentially on line-of-sight from the river within which the Secretary determines that minerals should continue to be withdrawn.

(c) Notwithstanding any provisions of the Wild and Scenic Rivers Act (82 Stat. 907; 16 U.S.C. 1271) to the contrary, an area extending one mile from the mean high water level on either side of the river segments referred to in this section is hereby withdrawn, subject to valid existing rights, from all forms of appropriation under the mining laws and from operation of the mineral leasing laws, including in both cases amendments thereto, pending establishment of the detailed boundaries provided for in subsection (b).

(d) The provisions of this title specifying maximum permissible corridors for individual components shall supersede any provisions to the contrary of the Wild and Scenic Rivers Act.

(e) Notwithstanding the provisions of section 9(a)(iii) of the Wild and Scenic Rivers Act, the minerals in all Federal lands within the line-of-sight corridor established pursuant to subsection (b) included in any component or part of a component designated by this section as a wild river area are effective upon the establishment of such corridor, withdrawn, subject to valid existing rights, from all forms of appropriation under the mining laws and from operation of the mineral leasing laws including, in both cases, amendments thereto. The Secretary is authorized to open the remainder of the lands within the detailed boundaries of the river segment to mining and mineral leasing subject to such regulations as he may prescribe.

(f) The Secretary may seek cooperative agreements with the owners of the non-Federal lands adjoining the wild and scenic rivers established by this title to assure that the purpose of such regulations are served to the greatest extent feasible.

(g) Notwithstanding any other provision of law or of this Act to the contrary, with respect to components of rivers herein designated and administered by the Secretary, the Secretary may (i) grant access for oil and gas pipelines in accordance with the Mineral Leasing Act of 1920; (ii) permit, subject to such terms and conditions as he deems necessary, access for roads across, through, or over such river components; and (iii) permit the continued use of Federal lands, waters and interests therein for customary and traditional transportation purposes and those required under existing international treaties.

(h) Rivers designated in section 321 of this title shall be managed by the Federal agency charged with management of the adjacent Federal lands.

## TITLE IV—NATIONAL FOREST SYSTEM

### ADDITIONS TO NATIONAL FORESTS

SEC. 401. The following units of the National Forest System are hereby expanded:

(1) Tongass National Forest by the addition of three areas, Kates Needle, Juneau Icefield, and Brabazon Range, containing approximately 1.54 million acres, as generally depicted on a map entitled, "Additions to the Tongass National Forest" dated , which shall be filed and made available for public inspection.

(2) Chugach National Forest by the addition of four areas, Nellie Juan, College Fiord, Copper River and Harding Icefield, containing approximately 2.11 million acres, as generally depicted on a map entitled, "Additions to the Chugach National Forest" dated , which shall be filed and made available for public inspection.

## TITLE V—DESIGNATION OF WILDERNESS IN SOUTHEAST ALASKA

SEC. 501. In furtherance of the purposes of the Wilderness Act and subject to valid existing rights, the following lands are hereby designated as wilderness and, therefore, as components of the National Wilderness Preservation System:

(1) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "Admiralty Island Wilderness," dated , and which shall be known as the Admiralty Island Wilderness.

(2) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "West Chichagof-Yakobi Wilderness," dated , and which shall be known as West Chichagof-Yakobi Wilderness.

(3) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "Russell Fiord Wilderness," dated , and which shall be known as Russell Fiord Wilderness.

(4) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "Granite Fiords Wilderness," dated , and which shall be known as Granite Fiords Wilderness.

(5) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "Stikine-LeConte Wilderness," dated , and which shall be known as Stikine-LeConte Wilderness.

(6) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "Tracy Arm Wilderness," dated , and which shall be known as Tracy Arm Wilderness.

(7) Certain lands in the Tongass National Forest, Alaska, which comprise approximately acres, as generally depicted on a map entitled, "Petersburg Creek Wilderness," dated , and which shall be known as Petersburg Creek Wilderness.

### BOUNDARIES

SEC. 502. (a) The boundaries of the areas designated in section 501 shall be determined by the Congress upon completion of the Tongass Land Use Management Plan by the United States Forest Service. Such boundaries shall:

(1) include only such commercial forest lands which shall not cause the potential annual yield of the Tongass National Forest to be reduced below existing levels of timber harvest, utilizing marginal and special components at a level which is reasonable in regard to the economic, technological and environmental constraints present at the time of passage of this Act; and

(2) exclude significant known mineral discoveries and mining claim areas.

(b) To the extent it is consistent with the requirements of subsection (a) of this section, additional wilderness areas or wilderness study areas may be designated.

### ADMINISTRATIVE PROVISIONS

SEC. 503. (a) This section is enacted in recognition of the unique character of the wilderness areas in Alaska. Nothing in the provisions of this section shall be construed to expand, diminish, or modify the provisions of the Wilderness Act with respect to lands located in areas outside of the State of Alaska.

(b) The appropriate Secretary may take such measures as may be necessary to provide for fire, insect, and disease control in areas designated as wilderness under the provisions of this Act while maintaining the wilderness character of such areas and protecting adjoining lands or waters.

(c) The appropriate Secretary shall permit the continuance of customary uses of aircraft, motorboats, and snowmobiles established prior to the date of enactment of this Act in areas designated as wilderness under the provisions of this Act, but may impose such restrictions as may be necessary to maintain the wilderness character of such areas.

(d) The appropriate Secretary shall permit the taking of fish and wildlife on lands designated as wilderness areas under the provisions of this Act which are under his jurisdiction in accordance with applicable laws of the United States and the State of Alaska. Subsistence activities described in title VII of this Act, including access by motorized vehicles, shall also be permitted within areas designated as wilderness under the provisions of this Act.

(e)(1) The appropriate Secretary shall permit public use cabins within areas designated as wilderness under the provisions of this Act which are in existence on the date of enactment of this Act to be used by the public and to be maintained or replaced under such conditions as the Secretary finds to be necessary to preserve the wilderness character of such areas.

(2) The appropriate Secretary is authorized to permit the construction and maintenance of new public use cabins and shelters within areas designated as wilderness under the provisions of this Act in order to protect the public health and safety, protect and preserve the wilderness character of the area, or meet minimum requirements for the administration of such areas. The appropriate Secretary may impose such conditions on the construction and maintenance of such cabins as may be necessary to preserve the wilderness character of the area.

(f) Commercial services may be performed within areas designated as wilderness under the provisions of this Act to the extent necessary to provide activities to carry out the recreational or wilderness purpose of the areas.

(g) In any case where State owned lands, privately owned lands, or mining claim lands are completely surrounded by areas designated as wilderness under the provisions of this Act, the State, private owner, or interest holder shall be given such rights as may be necessary to assure adequate access to the appropriate lands.

(h)(1) In order to study, restore, augment, or sustain fish populations the appropriate Secretary is authorized to permit research, fish stocking, enhancement, rehabilitation, and development activities which are in accordance with the principles of sound fisheries management, as well as the development of fish aquaculture and research sites, within areas designated as wilderness under the provisions of this Act. The appropriate Secretary shall require that structures built for such fish aquaculture or research sites include only the minimum facilities necessary for the operation of such sites, and that such structures be constructed in a manner which minimizes the impact on the natural environment and wilderness purposes for which the area was designated as a wilderness area under the provisions of this Act.

(2) The appropriate Secretary may permit reasonable access, including access by motor vehicle—

(A) to the State, or to the holder of a permit for fish enhancement programs or development activities, for the purpose of conducting necessary fish and wildlife management activities; and

(B) for the evaluation of sites needed for fisheries, research, enhancement, rehabilitation, and development and for the construction, operation, and maintenance of authorized projects.

### WILDERNESS STUDY

SEC. 504. (a) The Congress finds and declares that—

(1) while there is general agreement that much of the land in Alaska possesses wilderness values and would qualify as potential units of the Wilderness Preservation System, there is a lack of information concerning the demand for wilderness and the uses of wilderness in Alaska; and

(2) the designation of units of the Wilderness Preservation System in Alaska should be done with the knowledge of and with consideration of the inventory of potential wilderness areas throughout the State, the range of uses and resources to occur or be protected in designated wilderness units, and the alternative resource uses of potential wilderness units.

(b) The Commission established in title VI of this Act shall report to the Congress within two years of enactment of this Act the findings and recommendations of a study

of wilderness and recreation lands in Alaska. Such study shall be conducted in consultation with appropriate Federal, State and local agencies in Alaska and other interested organizations, all the report shall include

(1) a general statewide analysis of current and future demands and needs for designated units of the Wilderness Preservation System and for areas managed primarily for recreation other than wilderness units; and

(2) a general statewide inventory of lands meeting the criteria for potential inclusion in the Wilderness Preservation System; and

(3) a general statewide analysis of current and future uses of lands of wilderness character and lands currently managed primarily for recreational purposes; and

(4) recommendations of the general acreages and the general locations of areas which should be designated as units of the Wilderness Preservation System. Such recommendations shall seek to accommodate the demands and needs for the various uses of wilderness identified by the Commission and shall be made with the purpose of facilitating the ultimate establishment of a statewide wilderness system which would include a diversified cross-section of lands meeting the criteria for inclusion in the Wilderness Preservation System; and

(5) recommendations of management practices which would be appropriate for various wilderness units which may be recommended for designation by the Commission; and

(6) recommendations of general areas other than wilderness units which should be designated or managed primarily for recreational uses in order to meet the demands for and uses of recreational lands identified by the Commission.

(c) There are authorized to be appropriated $1,000,000 for the purpose of conducting the studies authorized in this section.

## TITLE VI—ALASKA FEDERAL-STATE LAND USE PLANNING COMMISSION

### ESTABLISHMENT OF COMMISSIONS; JURISDICTION

SEC. 601. (a) Following designation under Alaska State law of all lands patented or tentatively approved for patent to the State to be cooperatively managed with designated Federal lands, there is hereby established the Alaska Federal-State Land Use Planning Commission (hereinafter referred to as the "Commission").

(b) In addition to the designated State lands, the Commission shall have jurisdiction over all public lands in the State of Alaska under the management of the Bureau of Land Management, including the National Petroleum Reserve in Alaska.

(c) With the approval of the Commission, lands for which patents or interim conveyances have been issued to Native corporations under the terms of the Alaska Native Claims Settlement Act and other private lands may be placed voluntarily under the jurisdiction of the Commission pursuant to the procedures and conditions to be enacted by the State of Alaska.

### MEMBERSHIP AND PROCEDURES OF COMMISSION

SEC. 602. (a)(1) The Commission shall, subject to the provisions of section 601, be composed of nine members as follows:

(A) one member appointed, after consultation with and concurrence by the Governor of Alaska, by the President of the United States, with the advice and consent of the Senate, who shall be Chairman of the Commission;

(B) four members appointed by the President of the United States, with the advice and consent of the Senate;

(C) Four members appointed by the Governor of the State of Alaska subject to confirmation by a majority of the Alaska State Legislature in joint session.

(2) Upon the first vacancy of a position in each of the categories created pursuant to subparagraphs (B) and (C) of paragraph (1) (whether created by expiration of a member's term or otherwise) occurring on or after the date on which 80 per centum or more of all lands for which patents or interim conveyances have been issued have been dedicated by Native corporations for jurisdiction under the Commission, the President and the Governor, shall fill the vacancies under their respective jurisdictions by appointing a Native (as that term is defined in section 3(b) of the Alaska Native Claims Settlement Act). Thereafter, as long as such lands remain so dedicated, at least one of such members appointed in each of the categories created pursuant to subparagraphs (B) and (C) of paragraph (1) shall be a Native.

(b)(1) The Chairman shall be compensated at a rate to be determined by the President not to exceed the rate provided for GS–18 of the General Schedule under section 5332 of Title 5, United States Code.

(2) All other members of the Commission shall be compensated at a rate to be determined by the President, after consultation with and concurrence by the Governor of Alaska, not to exceed the rate provided for GS–16 of such General Schedule.

(3) Upon vouchers approved by the Chairman, all members of the Commission shall be reimbursed for necessary expenses incurred by them in carrying out their duties under this Act.

(c) The Commission, with the approval of the Chairman, is authorized to obtain the services of experts and consultants in accordance with section 3109 of title 5, United States Code.

(d)(1) Members of the Commission shall serve for a four-year term except that, of the initial members appointed pursuant to subparagraph (B) of subsection (a)(1), two members shall be appointed for two year terms, and of the initial members appointed pursuant to subparagraph (C) of subsection (a)(1), two members shall be appointed for two year terms. A vacancy in the membership shall not affect the Commission's powers but shall be filled in the manner provided in paragraph (2) of subsection (a). Any person appointed to fill a vacancy involving an unexpired term shall serve for the duration of that term. Except to the extent otherwise provided in subsection (a), members may be reappointed to serve additional terms.

(2) The Chairman of the Commission shall serve at the pleasure of the President and the Governor.

(e) Six members of the Commission shall constitute a quorum, except that the Commission may establish a lesser number for purposes of subsection (g).

(f) All Commission meetings shall be public and shall be duly noticed at least fifteen days prior to the date when the meeting is to take place.

(g) The Commission, or on its authorization, any subcommittee or member thereof, may hold such hearings, take such testimony, receive such evidence, and print such reports as are deemed necessary to carry out the functions specified in this title.

(h) The Chairman is authorized, in accordance with regulations prescribed by the Commission, to create and abolish employments and positions including temporary and intermittent employments; to fix and provide for the qualification, appointment, removal, compensation, pension and retirement rights of Commission employees; and to procure needed office space, supplies and equipment.

(i) The principal office of the Commission shall be located in the State of Alaska.

(j) The Federal government shall pay only 50 percent of the costs and other expenses incurred in each fiscal year by the Commission in carrying out its duties under this Act.

(k) The Commission is authorized to use the services, equipment, personnel and facilities of Federal departments and other agencies, with or without reimbursement. Each department and agency of the Federal government shall cooperate fully in making its services, equipment, personnel and facilities available to the Commission.

(l) The Commission is authorized to accept donations, gifts and other contributions and to utilize such donations, gifts and contributions in carrying out its functions under this Act.

(m) The Commission shall keep and maintain complete accounts and records of its activities and transactions, and such accounts and records shall be available for public inspection.

(n) The Commission is authorized to establish such advisory groups or committees of non-Commission members as may be necessary to assist it in performing its functions.

(o) The Chairman is authorized to establish whatever internal organization as may be necessary to efficiently conduct the functions of the Commission, including the assignment of work areas of primary responsibility for various members.

(p) The Commission shall, on or before March 1 of each year, prepare and submit to the President, the Governor of Alaska, the Legislature and the Congress an annual report summarizing its activities during the preceding calendar year, together with its recommendations.

### FUNCTIONS AND DUTIES

SEC. 603. (a) It shall be the function of the Commission—

(1) to review resource inventories prepared by the managing agencies and other affected or concerned Federal and State agencies concerning lands under the jurisdiction of the Commission; and to initiate and conduct other such inventories and resource studies as may be needed;

(2) to develop comprehensive land use plans with respect to lands under the jurisdiction of the Commission;

(3) to make land classifications pursuant to such plans, and to approve and to supervise the regulation of uses in accordance with such plans and classifications;

(4) to assure that such classifications would specifically identify lands which are suitable and open for the following primary uses:

(A) oil, gas and other fuel mineral exploration and possible development;

(B) non-fuel mineral exploration and possible development;

(C) permanent and seasonal human habitation;

(D) agricultural and aquaculture development;

(E) timber harvesting;

(F) tourism and recreational development;

(G) primitive or wilderness use;

(H) fish and wildlife habitat; and

(I) other resource uses as may be appropriate;

(5) to assist in the development and review of land-use plans for lands selected by Native corporations under the terms of the Alaska Native Claims Settlement Act which may not be designated for jurisdiction by the Commission; and to assist in the development and review of land-use plans of municipal governments;

(6) to review existing withdrawals of Federal and State public lands and recommend to the President and Congress such additions to or modifications of such withdrawals as the Commission deems appropriate;

(7) to make recommendations, from time to time, to the President, Congress and the

Governor and the Legislature of the State of Alaska as to changes in laws, policies, budgets and programs relating to the public lands which the Commission deems necessary or desirable;

(8) to make recommendations to the appropriate officers of the governments of the United States and the State of Alaska and to develop general plans which would ensure that economic growth and development are orderly, planned and compatible with State and national economic, social and environmental objectives;

(9) to make recommendations to appropriate officers of the United States, the State of Alaska, municipal officials and private landowners to improve coordination and consultation between the Federal, State and municipal governments in making resource allocations and land use decisions;

(10) to coordinate Federal and State administration, as it affects lands under the jurisdiction of the Commission, of the following Acts: the Federal Water Pollution Control Act, as amended; the Clean Air Act, as amended; the Solid Waste Disposal Act; the National Environmental Policy Act of 1969; the Coastal Zone Management Act of 1972, as amended; and the Safe Drinking Water Act.

(11) to determine the location of specific routes or corridors which would serve identified regional, statewide or national transportation or utility needs; direct the appropriate agency to grant rights-of-way across lands under its jurisdiction and provide study findings and make specific recommendations to the appropriate landowner where such rights-of-way would cross lands not under the Commission's jurisdiction, and in connection therewith the Commission shall evaluate alternative routes and modes and shall seek to recommend prudent and feasible routes and corridors which minimize environmental; and

(12) to perform any other duties authorized under section 17(b)(1) of the Alaska Native Claims Settlement Act.

(b) With respect to the uses under paragraph (4) of subsection (a), the Commission shall have the authority to pursue such uses on a lease basis under such terms as it may prescribe or under applicable provisions of the public land laws. In the case of leases for mineral exploration the Commission shall prescribe such procedures and rules which shall recognize the value of and provide opportunities for exploration and discoveries by small businesses and individuals.

(c) With respect to all Federal lands subject to the jurisdiction of the Commission, the Secretary may veto a decision of the Commission. With respect to all State lands subject to the jurisdiction of the Commission, the Governor of Alaska may veto a decision of the Commission. With respect to any lands owned by Native corporation or other private lands subject to the jurisdictions of the Commission, either the Secretary or the Governor may veto a decision by the Commission. Any such veto shall be made within 30 days of the Commission's decision and shall be accompanied by a report to the Commission containing specific findings supporting the veto and indicating possible alternatives.

(d) Federal, State and Native corporation lands under the jurisdiction of the Commission shall continue to be managed by the respective agencies established under Federal and State law, and in the case of corporation lands, by the respective corporation owner, except that uses of Federal, State and Native corporation lands shall be regulated in accordance with classifications made by the Commission. Except to the extent that they would be inconsistent with a Commission classification or the provisions of this Act, land use management decisions made by an agency shall be in accordance with the laws and regulations which generally govern the functions of such agency.

(e) Lands under the jurisdiction of the Commission shall be withdrawn from all forms of disposition or appropriation under Federal public lands laws, including mining and mineral leasing laws, until a land use plan has been completed for the particular area by the Commission and classifications imposed in regard to permissible land uses. The provisions of this subsection shall not apply in cases where the Commission takes action to permit specific uses in an area or areas.

(f) In performing the functions specified in subsection (a), the Commission shall hold public hearings in the specific locale or region for which specific land use plans, classifications or actions are being proposed or considered.

(g) In the development of land use plans and classifications, the Commission shall give priority to the conduct of a study of the Alaska Peninsula region of Alaska, South of Katmai National Park. The study shall include recommendations for land ownership consolidations and possible creation of conservation system units.

COOPERATION OF FEDERAL AGENCIES IN ENVIRONMENTAL LAWS COORDINATION

SEC. 604. In order to assist the Commission in carrying out its coordination function under section 603(a)(10) and to insure that the uses of land under the jurisdiction of the Commission being permitted under the Federal Water Pollution Control Act, as amended, the Clean Air Act, as amended, the Solid Waste Disposal Act, the National Environmental Policy Act of 1969, the Coastal Zone Management Act of 1972, as amended, and the Safe Drinking Water Act, are consistent with the land use plans and classifications of the Commission the Secretary of Commerce, the Administrator of the Environmental Protection Agency, and the Chairman of the Council on Environmental Quality, shall, with respect to the implementation of such Acts under their respective jurisdictions—

(1) provide the Commission with copies of all orders, notices, regulations, or other material initiated concerning the implementation of such Act affecting any lands under the jurisdiction of the Commission;

(2) solicit and receive comments from the Commission prior to making any final decision concenring any rule, regulation, stipulation, policy or other action affecting such lands; and

(3) shall make such final decisions with a view towards obviating conflicts or problems identified by the Commission in its comments.

TERMINATION OF EXISTING COMMISSION

SEC. 605. Notwithstanding any other provision of law, Federal participation in the Joint Federal-State Land Use Planning Commission for Alaska, established in Section 17(a) of the Alaska Native Claims Settlement Act, shall cease 180 days following the date of enactment of this Act or upon establishment of the Commission provided for in section 601 of this title, whichever first occurs. Immediately upon termination of Federal participation, all unexpended funds appropriated to the Joint Commission and all property shall be returned, as appropriate, to the United States and the State of Alaska, unless the Commission provided for in section 601 of this title has been established, in which case all Federal funds and property shall be transferred to the Commission.

SUNSET CLAUSE

SEC. 606. (a) Unless otherwise hereafter provided by law, Federal participation in the Commission shall terminate upon the expiration of the eleven calendar year period following the date on which the Commission takes effect.

(b) On or before the two-year period immediately preceding the date of the expiration of the eleven calendar year period following the date on which the Commission takes effect, the Secretary and the Commission shall report to the President and the Congress with respect to the Secretary's and the Commission's views and recommendations concerning the desirability or non-desidability of continued Federal participation in the Commission.

(c) If at the expiration of the eleven calendar year period following the date on which the Commission takes effect the Congress has not acted to continue Federal participation in the Commission, the Secretary, acting under authority provided for in existing law, is directed to withdraw from all forms of appropriation under the public land laws, including the mining and mineral leasing laws, up to, but not to exceed forty million acres of unreserved public lands in the State of Alaska which were previously under the jurisdiction of the Commission. Such lands shall be withdrawn for the purpose of studying the lands' suitability for potential addition to or creation as units of the National Park, Forest, Wildlife Refuge, and Wild and Scenic Rivers Systems.

(d) Within two years of the expiration of Federal participation in the Commission the Secretary shall submit to the Congress his recommendations with respect to such lands withdrawn. Areas recommended for addition to or creation as units of the National Park, Forest, Wildlife Refuge, and Wild and Scenic Rivers Systems shall remain withdrawn from any appropriation under the public land laws until such time as the Congress acts on the Secretary's recommendations, but not to exceed two years from the recommendation dates. The withdrawal of areas not so recommended shall terminate at the end of the two year period after the expiration of Federal participation in the Commission.

TITLE VII—SUBSISTENCE

FINDINGS

SEC. 701. The Congress finds and declares that—

(1) the continuation of subsistence uses by Natives of Alaska on the public lands and on their Native lands is essential to their physical, economic cultural existence.

(2) the continuation of subsistence uses by some other residents of the State of Alaska on the public lands is essential to their physical, economic and traditional existence.

(3) the situation in Alaska is unique in that, in most cases, no practical alternative means are available to replace the food supplies and other items gathered from fish and wildlife which supply persons dependent on subsistence uses.

(4) continuation of subsistence uses of resources on public and other lands in Alaska is threatened by the increasing population of Alaska, with resultant pressure on subsistence resources, by sudden decline in the populations of some wildlife species which are crucial subsistence resources, and by increased accessibility of remote areas containing subsistence resources.

(5) in order to fulfill the policies and purposes of the Alaska Native Claims Settlement Act, and as a matter of equity, it is necessary for the Congress to invoke its constitutional authority over Native affairs and over management of the public lands to protect and provide for continued subsistence uses on public lands by Alaska Natives and other Alaska residents.

(6) the national interest in the proper regulation, protection and conservation of fish and wildlife on the public lands in Alaska and the continuation of the opportunity for

a subsistence way of life by the inhabitants of Alaska require that an administrative structure be established for the purpose of enabling people who have personal knowledge of local conditions and requirements to have a meaningful role in the management of fish and wildlife and of subsistence uses on the public lands in Alaska.

POLICY

SEC. 702. It is hereby declared to be the policy of Congress that—

(1) management policies on the public lands in Alaska are to cause the least adverse impact possible on rural people who traditionally and consistently depend upon subsistence resources of such lands. Consistent with management of fish and wildlife in accordance with recognized scientific principles and the purposes for which each conservation system unit is established, designated, or expanded by or under this Act, the purpose of this title is to provide the opportunity for people engaged in a genuinely subsistence-oriented lifestyle to continue to do so if they desire and to allow such people to decide for themselves their own degree of subsistence dependency.

(2) subsistence use of wildlife and other renewable resources shall be the first priority consumptive use of all such resources on the public lands of Alaska, and where it is necessary to restrict taking in order to assure the continued viability of a fish or wildlife resource or the continuation of subsistence uses of such resource, the taking of such resource for subsistence uses shall be given preference on the public lands over recreational, sport, or other consumptive uses.

(3) except as otherwise provided by this Act or other Federal laws, Federal land managing agencies, in managing subsistence activities on the public lands and in protecting the continued viability of all wild renewable resources in Alaska, shall cooperate with adjacent landowners and land managers, including Native corporations, appropriate State and Federal agencies, and other nations.

SUBSISTENCE DEFINITION

SEC. 703. As used in this Act, the term "subsistence uses" means customary and traditional uses in Alaska of wild, renewable resources for direct personal or family consumption as food, shelter, fuel, clothing, tools or transportation, for the making and selling of handicraft articles, including clothing, or for the customary trade or barter among subsistence users for personal or family consumption. Such uses may provide a cash supplement.

STATE REGULATION

SEC. 704. (a) Except as otherwise provided by this Act and other Federal laws, during an interim period of eighteen months beginning on the date of the enactment of this Act, the State of Alaska is authorized to regulate, in a manner not inconsistent with the policies set forth in section 702 and the definition set forth in section 703, the taking of fish and wildlife for subsistence uses on the public lands in Alaska. If the State fails to accept such authority, the Secretary shall regulate such taking during the eighteen-month interim period in a manner not inconsistent with such policies and definition.

(b) at the end of the eighteen-month interim period, the State of Alaska is authorized to regulate, in a manner consistent with the provisions of this Act, the taking of fish and wildlife for subsistence uses on the public lands in Alaska. If the State fails to accept such authority, the Secretary shall regulate such taking in a manner consistent with the provisions of this Act, including applicable provisions of this section concerning State regulation.

(c) If the State wishes to exercise the authority conferred under subsection (b) of this section, then within eighteen months after the date of the enactment of this Act, the Governor of the State of Alaska shall submit to the Secretary a State program which shall include at least the following elements:

(1) a system capable of monitoring subsistence and other consumptive uses of such species to insure that timely and appropriate State action will be taken to carry out the purposes and policies of this title.

(2) The establishment of not less than five or more than twelve fish and game management regions which, taken together, shall include all public lands where the State is exercising regulatory authority under this title. After consultation with the Secretary, the Native Corporations, rural residents, and other interested persons and organizations, the State shall, from time to time, determine the number and boundaries of such regions taking into account the exterior boundaries of Native Corporations, State fish and game management unit boundaries, ecosystems, the migration and movement of fish and wildlife utilized for subsistence purposes, the boundaries of conservation system units, boroughs, cities, towns and unincorporated municipalities, and other relevant factors.

(3) A State law or regulation which—

(A) provides priority for subsistence uses over other consumptive uses of fish and wildlife on the public lands; and

(B) provides that, whenever it is necessary to restrict the taking or other consumptive uses of subsistence resources in order to protect the continued viability of such resources or the continuation of subsistence uses of such resources, restrictions and limitation on and priorities for such consumptive uses shall be established on the basis of the following criteria: (i) customary and direct dependence upon the resource as the mainstay of one's livelihood, (ii) local residence, and (iii) availability of alternative resources.

(4) A system of local and regional fish and game councils within each management region referred to in paragraph (3). Each such council shall be composed of residents of the concerned region and shall have the following functions:

(A) Reviewing, developing and evaluating proposals for regulations, policies, management plans, and other matter relating to the conservation and utilization of fish and wildlife in such region.

(B) Providing a forum for the expression of opinions and recommendations by persons interested in any phase of fish and game conservation and utilization.

(C) Maximizing local and regional participation in the fish and wildlife decision-making process.

(D) Preparing a recommended subsistence management plan or a general fish and wildlife management plan which includes subsistence uses for such region. The plan shall contain (i) an identification of current and anticipated significant subsistence uses of fish and wildlife in such region, (ii) an evaluation of current and anticipated significant subsistence needs for fish and wildlife in such region, (iii) a recommended subsistence management strategy for fish and wildlife resources of such region, and (iv) proposals for and advice concerning policies, standards, guidelines, and regulations necessary to implement the plan.

(5) the provision of necessary staff to the regional councils and the distribution of all available, relevant technical and scientific support data to the local and regional councils.

(6) A requirement that the State agency referred to in paragraph (3)(A) or any other State rulemaking authority shall be guided by the advice and recommendations of the regional councils concerning the taking of fish and wildlife for subsistence uses within their respective regions and shall implement the recommendations, unless the agency or authority after hearing determines on the record that any such recommendation is not supported by substantial evidence, is violative of recognized principles of sound fish and wildlife management, or would be detrimental to the satisfaction of rural subsistence needs.

(d) The Secretary shall issue a certificate of approval for the State program and publish a summary of such program in the Federal Register if he finds that such program complies with the provisions of this section and is well adapted to achieve the purposes and policies of this title. If the Secretary is unable to make such finding, he shall so notify the State and shall afford the State and opportunity to modify its program under a procedure similar tothe procedure set forth in section 705. If the State fails to submit a State program within the eighteen-month period established in section 704(a), the Secretary shall exercise his authority to manage the habitat of fish and wildlife on the public lands in Alaska for subsistence uses in a manner consistent with the provisions of this Act until such time as the State submits a program for which the Secretary is able to issue a certificate of approval. If the State submits its program within the eighteen-month period specified in section 704(a), but at the end of that period the Secretary has not either issued a certificate of approval or determined that modifications of the State program are necessary, the Secretary may extend the interim period during which the State may exercise the authority specified in subsection 704(a), and during such extension the Secretary shall complete his review of the State program and shall act thereon. No extension under the preceding sentence shall be for a period greater than eighteen months, and no such extension shall be renewed more than once.

ENFORCEMENT DUTIES OF SECRETARY OF THE INTERIOR

SEC. 705. (a) After issuance of a certificate of approval under section 704(d) of this title, the Secretary of the Interior shall monitor the implementation of the State program. In his review the Secretary shall consult with the local and regional councils referred to in section 704(c)(4). If the Secretary, after notice and hearing determines that the program or its implementation is not in compliance with the requirements, purposes, or policies of this title, he shall so notify the State and shall indicate changes in its program or its implementation which he considers necessary to bring the State into compliance.

(b) If, after a reasonable opportunity, the State fails to make the changes in its program or its implementation which may be required by the Secretary under subsections (a) or (b) of this section, the Secretary shall afford the State formal notice and hearing pursuant to Section 554 of Title V of the United States Code. The Secretary shall have the burden of demonstrating by a preponderance of the evidence that the State program or its implementation is not in compliance with the requirements, purposes, or policies of this title. If after hearing the Secretary finds the State is not in compliance he may issue a suspension of the certificate, in whole or in part. If the Secretary issues a suspension of the certificate under this subsection, he shall assume, in accordance with the requirements, purposes, and policies of this title (including applicable provisions of section 704 pertaining to State regulation), responsibility for regulating the subsistence taking of fish and wildlife on the public lands to which such suspension applies, until such time as the Secretary certifies that the State is in compliance

with the State program and the requirements, purposes, and policies of this title.

(c) Notwithstanding any other provision of the Act or other law, the Secretary, after adequate notice and public hearing, may temporarily close any of the public lands in Alaska (including those within a conservation system unit) or any portion thereof to subsistence or other uses when necessary for reasons of public safety, administration or to assure the continued viability of one or more fish or wildlife species.

COOPERATIVE ARRANGEMENTS

SEC. 706. The Secretary is authorized to enter into cooperative agreements or otherwise cooperate with other Federal agencies, the State of Alaska, Native Corporations, and other appropriate persons and organizations (including, through coordination with the Secretary of State, other nations) to effectuate the purposes and policies of this title.

SUBSISTENCE AND LAND USE DECISIONS

SEC. 707. In determining whether to withdraw, reserve, lease, or otherwise permit the use, occupancy, or disposition of public lands under any provision of law authorizing such actions, the head of the Federal agency having primary jurisdiction over such lands or his designee shall evaluate the subsistence needs of the persons who would be affected, the availability of other lands for the purposes sought to be achieved, and other alternatives which would reduce or eliminate the use, occupancy, or disposition of public lands needed for subsistence purposes. No such withdrawal, reservation, lease, permit, or other use, occupancy, or disposition of such lands which would significantly restrict subsistence uses shall be affected until the head of such Federal agency—

(1) gives notice to the State agency described in section 704(c)(3)(A) and appropriate local and regional councils described in section 704(c)(4) if such councils have been established,

(2) gives notice of, and holds, a hearing in the vicinity of the area involved, and

(3) determines that such significant restriction of subsistence uses is necessary and unavoidable and minimizes the land and impacts on subsistence uses involved.

ACCESS

SEC. 708. The Secretary shall ensure the persons engaged in traditional or customary subsistence activities shall have appropriate access to subsistence resources on the public lands.

SNOWMOBILES AND MOTORBOATS

SEC. 709. Notwithstanding any other provision of this Act or other law, the Secretary shall permit on the public lands appropriate use for subsistence purposes of snowmobiles, motorboats and other means of surface transportation traditionally employed for such purposes, subject to such reasonable regulations as are necessary to prevent abuse, waste or damage to terrain or other natural values.

RESEARCH

SEC. 710. The Secretary of the Interior and the Secretary of Agriculture shall each undertake research on fish and wildlife and subsistence activities on the public lands in Alaska under their respective jurisdiction, seek data thereon from subsistence users, consult such users frequently, and make findings concerning such research available to the State of Alaska, the local and regional councils described in section 704(c)(4), subsistence users, and other appropriate persons and organizations.

PERIODIC REPORTS

SEC. 711. Within five years after the date of the enactment of this Act and every two years thereafter, the Secretary of the Interior, in consultation with the Secretary of Agriculture, shall prepare and submit a report to the President of the Senate and the Speaker of the House of Representatives on the current status of fish and wildlife and subsistence and other uses of those resources on the public lands. The report shall include at least the following:

(1) The management and taking of fish and wildlife under this title.

(2) The status of fish and wildlife populations on the public lands.

(3) The number of persons engaged in subsistence uses and in other uses of fish and wildlife on the public lands.

(4) The status of subsistence uses in the economy and culture of rural Alaska.

(5) Comments, if any, on the report made by the State of Alaska, the local and regional councils described in section 704(c)(4), and other appropriate persons and organizations.

(6) A description of those actions taken, or which may need to be taken in the future, to permit the continuation of subsistance activities on the public lands, as well as recommendations for any legislation the Secretary deems desirable. A summary of the report shall be published in the Federal Register and made available to the public.

REGULATIONS

SEC. 712. The Secretary of the Interior and the Secretary of Agriculture shall each prescribe such regulations as are necessary and appropriate to carry out their respective responsibilities under this title.

OTHER LAWS

SEC. 713. Nothing in this title shall be deemed to modify or repeal the provisions of the Fur Seal Act of 1966 (80 Stat. 1091; 16 U.S.C. 1151–1187), the Endangered Species Act of 1973 (87 Stat. 884; 16 U.S.C. 1531–1543), the Marine Mammal Protection Act of 1972 (86 Stat. 1027; 16 U.S.C. 1361 and following), the Act entitled "An Act for the protection of the bald eagle," approved June 8, 1940 (54 Stat. 250; 16 U.S.C. 667–668d), the Fish and Wildlife Act of 1956 (70 Stat. 1119; 16 U.S.C. 742a–754), the Migratory Bird Conservation Act (45 Stat. 1222; 16 U.S.C. 715 and following), the Fisheries Conservation and Management Act of 1976, the Federal Aid in Wildlife Restoration Act (16 U.S.C. 777), or any amendments to any one or more of such Acts.

LIMITATIONS

SEC. 714. (a) Nothing in this title shall be construed as granting any property right in any fish, wildlife, or other resource of the public lands in Alaska, nor as permitting the level of subsistence uses of fish and wildlife on such lands to be significantly expanded beyond the level of such uses occurring on such lands on or before January 1, 1978.

(b) Nothing in this title shall be construed as permitting any subsistence use of the resources of any portion of the public lands (including any unit of the National Park System) where any such use was not permitted on the date of the enactment of this Act, nor as vesting elsewhere than in the Secretary any authority to manipulate habitat on any portion of the public lands.

REIMBURSEMENT TO THE STATE

SEC. 715. (a) Upon the issuance of a certificate of approval described in section 704(d) of this title, the Secretary of the Interior is authorized to reimburse the State agency described in section 704(c)(3)(A), from funds appropriated for the Department of the Interior, for costs relating to the implementation of the State program. Sums paid under this section shall be in addition to any grants, payments or other sums to which the State is entitled under existing law. The purpose of such reimbursements shall be to assist the State in devloping and implementing the State program described in section 704. During any fiscal year, such reimbursements shall not exceed 50 per centum of the costs of the program's development and implementation during such fiscal year. Such costs shall be verified in a statement which the Secretary of the Interior determines to be an adequate, accurate account.

(b) No reimbursements shall be paid under this section for costs incurred by the State during any period of suspension of part or all of the State program under section 705.

(c) Total payments to the State under this section shall not exceed the sum of $5,000,000 in any one fiscal year.

(d) The Secretary shall periodically review the financial aspects of implementing the State program and shall advise the Congress at least once in every five years as to whether or not the maximum amount of payments specified in subsection (c) is adequate for proper implementation of the State program.

(e) With respect to any fiscal year in which insufficient funds are appropriated—

(1) to reimburse 50 per centum of the costs referred to in subsection (a), or

(2) to meet the maximum amount of payments specified in subsection (c), whichever is less, the Secretary shall consult the State, and shall hold a public hearing, for the purpose of determining the most economical manner in which the State can, consistent with the provisions of this title, carry out its program during such fiscal year.

TITLE VII—IMPLEMENTATION OF ALASKA NATIVE CLAIMS SETTLEMENT ACT AND ALASKA STATEHOOD ACT

CONVEYANCE OF CORE TOWNSHIP LANDS

SEC. 801. (a)(1) Except to the extent that conveyance of a surface estate would be inconsistent with section 22(1) of the Alaska Native Claims Settlement Act, there is hereby conveyed to and vested in each Village Corporation for a Native village which is determined to be eligible for land under section 11 or 16 of the Alaska Native Claims Settlement Act all of the right, title and interest of the United States in and to the surface estate in the township or townships withdrawn pursuant to section 11(a)(1)(A) or 16(a) of such Act in which all or any part of such village is located. As used in this paragraph the term "Native village" has the same meaning such term has in section 3(c) of the Alaska Native Claims Settlement Act.

(2) There is hereby conveyed to and vested in each Village Corporation which, by the date of enactment of this Act, is determined to be eligible under the Alaska Native Claims Settlement Act to, and has elected to, acquire title to any estate pursuant to section 19(b) of the Alaska Native Claims Settlement Act all of the right, title and interest of the United States in and to the estates in a reserve which was set aside for the use or benefit of the stockholders or members of such Corporation before the date of enactment of the Alaska Native Claims Settlement Act.

(3) There is hereby conveyed to and vested in each Regional Corporation which, as a result of a conveyance of a surface estate by paragraph (1) of this subsection, is entitled under section 14(f) of the Alaska Native Claims Settlement Act to receive the subsurface estate corresponding to such surface estate all of the right, title and interest of the United States in and to such subsurface estate.

(b) Within six months after the date of enactment of this Act, the Secretary shall issue to each Native Corporation referred to in subsection (a) interim conveyances or patents to the estate or estates conveyed to such Corporation by such subsection, but title shall be deemed to have passed on the date of enactment of this Act, or on the date of eligibility determination if subsequent thereto, notwithstanding any delay in the

issuance of the interim conveyances or patents.

(c) A Village Corporation's obligation to reconvey lands under section 14(c) of the Alaska Native Claims Settlement Act shall arise only upon receipt of an interim conveyance or patent under subsection (b) of this section or under such Act. For purposes of sections 14(c), 14(f), and 22(g) of the Alaska Native Claims Settlement Act, interim conveyances and patents issued pursuant to this Act shall have the same effect as if issued pursuant to sections 14(a) and 14(b) of the Alaska Native Claims Settlement Act and shall be deemed to have been so issued. Disputes between or among Native Corporations arising from conveyances under this Act shall be resolved by a board of arbitrators of a type described in section 12(e) of the Alaska Native Claims Settlement Act pertaining to disputes over land selection rights and the boundaries of Village Corporations.

(d) Except as otherwise expressly provided in this Act, the provisions of the first two sentences of section 14(g) of the Alaska Native Claims Settlement Act shall apply to all conveyances made by sections 801 and 802 of this Act as if such conveyances were made under the Alaska Native Claims Settlement Act.

OTHER CONVEYANCES TO NATIVE CORPORATIONS

SEC. 802. (a) If a Native Corporation entitled to receive land under the Alaska Native Claims Settlement Act elects to utilize the expedited conveyance procedure provided by this section, then, within one hundred and eighty days after the date of enactment of this Act, or the date of eligibility determination, such Corporation shall file with the Secretary a document or documents which lists in order of preference such Corporation's priorities for the conveyance of all or any part of the amount of lands which such Corporation is entitled to receive under the Alaska Native Claims Settlement Act. Any Native Corporation not electing to utilize such expedited procedure shall receive conveyance to its total entitlement under the Alaska Native Claims Settlement Act.

(b)(1) Within one hundred and eighty days after the date on which a list of priorities is filed by a Native Corporation under subsection (a) of this section, the Secretary shall—

(A) determine whether each land selection contained in such list is valid under the Alaska Native Claims Settlement Act and publish such determination in the Federal Register; and

(B) publish in the Federal Register the minimum amount of land which he is able to determine that such Corporation is entitled to receive under the Alaska Native Claims Settlement Act.

If the Secretary is unable to determine the total amount of the land entitlement of such Corporation under subparagraph (B), he shall, at least every six months thereafter, redetermine the minimum amount referred to in such subparagraph and publish in the Federal Register such minimum amount as redetermined. The Secretary shall continue to make such redeterminations until he is able to determine and publish the total amount of such land entitlement.

(2) For a period of thirty days after each date on which the Secretary publishes under paragraph (1) of this subsection a minimum amount of land or the total amount of land a Native Corporation is entitled to receive, the Corporation may file with the Secretary a document or documents amending or supplementing the priorities previously filed with the Secretary with respect to any land for which no conveyance has yet taken place, and thereafter conveyances under paragraph (3) or (6) of this subsection shall take place in accordance with such amended priorities. In the event that any land for which a Native Corporation may, under the preceding sentence, file amended priorities has also been validly selected by one or more other Native Corporations, such other Corporation or Corporations similarly may, during the same thirty day period, file amended priorities with respect to such selected land and any other land not previously designated as lower priority than such selected land, and thereafter conveyances to it under paragraph (3) or (6) of this subsection shall take place in accordance with such amended priorities.

(3) Except as provided in section 803(b), on the forty-fifth day following each date on which the Secretary publisher under paragraph (1) of this subsection a minimum amount of land which a Native Corporation is entitled to receive under the Alaska Native Claims Settlement Act, there shall hereby be conveyed to and vested in such Corporation all of the right, title and interest of the United States in and to those lands—

(A) which were validly selected by such Corporation under the Alaska Native Claims Settlement Act and not validly selected by one or more other Native Corporations under such Act;

(B) which are of the highest priority contained in the list of priorities filed by such Corporation; and

(C) which have a cumulative acreage which is equal to the acreage subject to the Corporation's priorities but not more than such minimum amount—

(i) reduced by the cumulative acreage of lands previously conveyed to such Corporation by this subsection or under the Alaska Native Claims Settlement Act; and

(ii) reduced as provided in paragraphs (4) and (5) of this subsection.

(4) In any case in which the Secretary determines under paragraph (1)(A)—

(A) that a land selection contained in the list of priorities filed by a Native Corporation is invalid under the Alaska Native Claims Settlement Act, and

(B) that the cumulative total of acreages of land selections contained in such list of higher priorities than the land selection referred to in subparagraph (A) does not exceed the most recent determination under paragraph (2) of the minimum land entitlement of such Corporation.

the total amount of lands to be conveyed by paragraph (3) shall be reduced by an acreage which equals the acreage of the land selection determined to be invalid under subparagraph (A).

(5) In any case in which the Secretary, before the date of conveyance of lands to a Native Corporation by paragraph (3), determines—

(A) that a valid land section contained in the list of priorities filed by a Native Corporation under subsection (a) of this section has also been validly selected under the Alaska Native Claims Settlement Act by one or more other Native Corporations, and

(B) that the cumulative total of acreage of land selections contained in such list as higher priorities than the land selection referred to in subparagraph (A) does not exceed the most recent determination under paragraph (2) of the minimum land entitlement of such Corporation, the total amount of lands to be conveyed by paragraph (3) shall be reduced by an acreage which equals the acreage of the land selection referred to in subparagraph (A).

(6) Whenever the Secretary receives in writing—

(A) the acceptance by a Native Corporation of a determination of the Secretary to reduce the acreage of a conveyance to such Corporation under paragraph (4) or (5) of this subsection,

(B) the results of a final decision on an action filed by a Native Corporation contesting the validity of a determination of the Secretary to reduce the acreage of a conveyance to such Corporation under paragraph (4) or (5) of this subsection, or

(C) the provisions of a final settlement or the results of a final decision on a dispute over which a Native Corporation is entitled under the Alaska Native Claims Settlement Act to receive conveyance of lands which were the subject of a determination by the Secretary under paragraph (5) of this subsection,

all of the right, title and interest of the United States in and to any lands which the concerned Native Corporation is entitled to receive under the Alaska Native Claims Settlement Act as a result of the concerned acceptance, dispute, or settlement shall hereby be conveyed to and vested in such Corporation.

(7) Within ninety days after the date of a conveyance under paragraph (3) or (6) of this subsection, the Secretary shall issue to the concerned Native Corporation interim conveyances or patents to the lands subject to such conveyance, but title shall be deemed to have passed on the date of such conveyance, notwithstanding any delay in the issuance of the interim conveyances or patents.

(c) Nothing in this section shall be construed as applying to lands conveyed by section 801(a) of this Act.

(d) For purposes of this section and sections 801(c), 803 and 805(d) of this title, the term "Native Corporation" means any Village Corporation, any Regional Corporation, any Urban Corporation, and any Native group as such term is defined in section 3(d) of the Alaska Native Claims Settlement Act.

(e) All withdrawals on Admiralty Island heretofore made by the Secretary of the Interior for selection by the Juneau and Sitka Urban Corporations under the terms of section 14(h)(3) of the Alaska Native Claims Settlement Act are hereby ratified and confirmed.

ADMINISTRATIVE PROVISIONS

SEC. 803. (a) With respect to lands conveyed to Native Corporations on or after the date of enactment of this Act, the Secretary shall only reserve those easements which are described in section 14(g) or 17(b)(1) of the Alaska Native Claims Settlement Act and shall be guided by the following principles:

(1) all aesements should be designed so as to minimize their impact on the compactness of Native lands, on lifestyles, and on subsistence uses; and

(2) each easement should be specifically located and described and should include only such areas as are essential for the purpose or purposes for which the easement is reserved.

(b) Whenever, after a conveyance has been made by this Act or under the Alaska Native Claims Settlement Act, the Secretary determines that an easement not reserved at the time of conveyance is required for any purpose specified in section 17(b)(1) of the Alaska Native Claims Settlement Act, he is authorized to acquire such easement by purchase or otherwise. The acquisition of such an easement shall be deemed a public purpose for which the Secretary may exercise his exchange authority pursuant to section 22(f) of the Alaska Native Claims Settlement Act. In determining whether to acquire an easement under this subsection, the Secretary shall be guided by the principles listed in paragraphs (1) and (2) of subsection (b) of this section.

(c) This Act is not intended to modify, repeal or otherwise affect any provision of the Act of January 2, 1976 (89 Stat. 1145), and shall not be construed as imposing any additional restriction on the use or management of those lands described in section

22(k) of the Alaska Native Claims Settlement Act.

STATE OF ALASKA LAND SELECTIONS AND CONVEYANCES

SEC. 804. (a) In furtherance and confirmation of the State of Alaska's entitlement to certain national forest and other public lands in Alaska for community development and expansion purposes, subsection 6(a) of the Alaska Statehood Act is amended in part by substitution of the phrase "thirty-five years" for the phrase "twenty-five years" contained in said subsection.

(b) In furtherance and confirmation of the State of Alaska's entitlement to certain public lands in Alaska, subsection 6(b) of the Alaska Statehood Act is amended in part by substitution of the phrase "thirty-five years" for the phrase "twenty-five years" contained in said subsection; said subsection 6(b) is, as to future state land selections, further amended by repeal of the proviso regarding Presidential approval of land selections north and west of that line described in section 10 of said Act.

(c) In full and final settlement of any and all claims by the State of Alaska arising under the Act of March 4, 1915, as amended, including claims to surveyed lands which were within federal reservations or withdrawals, at the time of Statehood, the State is hereby granted 75,000 acres which it shall be entitled to select until January 4, 1994 from vacant, unappropriated and unreserved public lands in Alaska.

(1) Except as provided herein, such selections shall be made in conformance with the provisions for selections under section 6(b) of the Alaska Statehood Act. Selections made under this subsection shall be in units of whole sections as shown on the official survey plats of the Bureau of Land Management, including protraction diagrams, unless part of the section is unavailable or the land is otherwise surveyed, or unless the Secretary waives the whole-section requirement.

(2) Lands selected and conveyed to the State under this subsection shall be subject to the provisions of sections 6(j) and (k) of the Alaska Statehood Act.

(d) All tentative approvals of State of Alaska land selections pursuant to the Alaska Statehood Act are hereby ratified and confirmed, subject only to valid existing rights including but not limited to land conveyances heretofore or hereafter made pursuant to valid selections filed by Native village corporations on or before December 18, 1974 pursuant to sections 12(a) or 12(b) of the Alaska Native Claims Settlement Act, and the United States hereby confirms that all right, title and interest of the United States in and to such lands is deemed to have vested in the State of Alaska as of the date of tentative approval; provided that this subsection shall not apply to tentative approvals which, prior to the date of enactment of this Act, have been relinquished by the State, or have been finally revoked by the United States under authority separate from that derived from sections 11(a)(2), 12(a) and 12(b) of the Alaska Native Claims Settlement Act.

(1) Upon approval of land survey by the Secretary, such lands shall be patented to the State of Alaska.

(2) If the State elects to receive patent to any of the lands which are the subject of this subsection on the basis of protraction surveys in lieu of field surveys, the Secretary shall issue patent to the State of that basis within six months after notice of such election for townships having no adverse claims on the Public Land Records. For townships having such adverse claims of record, patent on the basis of protraction surveys shall be issued as soon as practicable after such election. The State shall bear the burden of loss of acreage due to errors, if any, in any such protraction survey.

(3) Future tentative approvals of State of Alaska land selections, when issued, shall have the same force and effect as those existing tentative approvals which are confirmed by this subsection (d), and shall be processed for patent by the same administrative procedures as specified in paragraphs (1) and (2) of this subsection.

(e) All existing valid State of Alaska land selections made pursuant to the Alaska Statehood Act are hereby confirmed, subject only to valid existing rights including but not limited to conveyances heretofore or hereafter made pursuant to valid selections filed by Native village corporations on or before December 18, 1974 pursuant to sections 12(a) or 12(b) of the Alaska Native Claims Settlement Act.

(1) As soon as practicable after the date of enactment of this Act, the Secretary shall issue tentative approvals to such State selections as required by the Alaska Statehood Act, and pursuant to subsection (j) of this section. The sequence of issuance of such tentative approvals shall be on the basis of priorities determined by the State. All right, title and interest of the United States shall vest in the State of Alaska upon issuance of such tentative approvals.

(2) Upon approval of land survey by the Secretary, such lands shall be patented to the State of Alaska.

(3) If the State elects to receive patent to any of the lands which are the subject of this subsection on the basis of protraction surveys in lieu of field surveys, the Secretary shall issue patent to the State on that basis within six months after notice of such election for townships having no adverse claims on the Public Land Records. For townships having such adverse claims of record, patent on the basis of protraction surveys shall be issued as soon as practicable after such election. The State shall bear the burden of loss of acreage due to errors, if any, in any such protraction survey.

(4) Future valid State of Alaska land selections shall be subject only to valid existing rights, including but not limited to conveyances heretofore or hereafter made pursuant to valid selections filed by Native village corporations on or before December 18, 1974 pursuant to sections 12(a) or 12(b) of the Alaska Native Claims Settlement Act.

(f) The State, at its option, may file future selection applications and amendments thereto, pursuant to section 6 (a) or (b) of the Alaska Statehood Act or subsection (c) of this section, for lands which are not, on the date of filing of such applications, available lands within the meaning of section 6 (a) or (b) of the Alaska Statehood Act. Each such selection application, of otherwise valid, shall become an effective selection without further action by the State upon the date the lands included in such application become available within the meaning of said section 6 (a) or (b) regardless of whether such date occurs before or after expiration of the State's land selection rights. Selection applications heretofore filed by the State may be refiled so as to become subect to the provisions of this subsection; provided that no such refiling shall prejudice any claim of validity which may be asserted regarding the original filing of such application. Nothing contained in this subsection shall be construed to prevent the United States from transferring a Federal reservation or appropriation from one Federal agency to another Federal agency for the use and benefit of the government.

(g) The State of Alaska may select lands exceeding by not more than twenty-five percent in total area the amount of State entitlement which has not been patented or tentatively approved under each grant or confirmation of lands contained in the Alaska Statehood Act or other law. If its selections under a particular grant exceed such remaining entitlement, the State shall thereupon list all selections for that grant which have not been tentatively approved in desired priority order of conveyance, in blocks no larger than one township in size; provided, however, that the State may alter such priorities prior to receipt of tentative approval. Upon receipt by the State of subsequent tentative approvals, such excess selections shall be reduced by the Secretary pro rata by rejecting the lowest prioritized selection blocks necessary to maintain a maximum excess selection of twenty-five percent of the entitlement which has not yet been tentatively approved or patented to the State under each grant.

(1) The State of Alaska may, by written notification to the Secretary, relinquish any selections of land filed under the Alaska Statehood Act or subsection (c) of this section prior to receipt by the State of tentative approval; provided, however, that lands conveyed pursuant to subsection (h) of this section may not be relinquished pursuant to this paragraph.

(2) Section 6(g) of the Alaska Statehood Act is amended in part by addition of the following provision immediately following the last sentence of said subsection: "As to all selections made by the State after January 1, 1979 pursuant to section 6(b) of this Act, the Secretary of the Interior, in his discretion, may waive the minimum tract selection size where such a reduced selection size would be in the national interest."

(h) In furtherance of its entitlement to lands under section 6(b) of the Alaska Statehood Act, the United States hereby conveys to the State of Alaska all right, title and interest of the United States in and to all vacant, unappropriated and unreserved lands including lands subject to subsection (m) of this section, which lie within the following townships as specified in the list of State selection interest lands submitted by the State of Alaska and on file in the office of the Secretary of the Interior, and as depicted on the map entitled," dated 1978.

(i) Lands identified in subsection (h) shall be conveyed to the State subject to valid existing rights, including valid existing Native selection rights under the Alaska Native Claims Settlement Act. All right, title and interest of the United States in and to such lands shall vest in the State of Alaska as of the date of this Act, subject to those reservations specified in subsection (m) of this section.

(1) As soon as practicable after the date of enactment of this Act, the Secretary shall issue to the State tentative approvals to such lands as required by the Alaska Statehood Act and pursuant to subsection (j) of this section. The sequence of issuance of such tentative approvals shall be on the basis of priorities determined by the State.

(2) Upon approval of land survey by the Secretary, those lands identified in subsection (h) shall be patented to the State of Alaska.

(3) If the State elects to receive patent to any of the lands which are identified in subsection (h) on the basis of protraction surveys in lieu of field surveys, the Secretary shall issue patent to the State on that basis within six months after notice of such election for townships having no adverse claims on the Public Land Records. For townships having such adverse claims of record, patent on the basis of protraction surveys shall be issued as soon as practicable after such election. The State shall bear the burden of loss of acreage due to errors, if any, in any such protraction survey.

(j) Nothing contained in this section shall relieve the Secretary of the duty to adjudicate conflicting claims regarding the lands specified in subsection (h) of this section, or otherwise selected under authority of the Alaska Statehood Act, subsection (c) of this section, or other law, prior to the issuance of tentative approval.

(k) The following withdrawals, classifications, or designations shall not, of themselves, remove the lands involved from the status of "vacant, unappropriated, and unreserved" lands for the purposes of subsection (h) of this section and future State selections pursuant to the Alaska Statehood Act or subsection (c) of this section.

(1) Withdrawals for classification pursuant to section 17(d)(1) of the Alaska Native Claims Settlement Act; provided, that in accordance with the Memorandum of Understanding between the United States and the State of Alaska dated September 2, 1972, to the extent that Public Land Orders Numbered 5150, 5151, 5181, 5182, 5184, 5190, 5194 and 5388 by their terms continue to prohibit State selections of certain lands, such lands shall remain unavailable for future State selection, but may be conveyed pursuant to subsection (h) of this section.

(2) Withdrawals pursuant to section 11 of the Alaska Native Claims Settlement Act, and which are not conveyed pursuant to sections 12, 14 or 19 of said Act;

(3) Classifications pursuant to the Classification and Multiple Use Act, 78 Stat. 987 (1964);

(4) Classifications or designations pursuant to the Federal Land Policy and Management Act, 90 Stat. 2743 (1976).

(l) Notwithstanding any other provision of law, on lands selected by, or granted or conveyed to, the State of Alaska under section 6 of the Alaska Statehood Act or this Act, but not yet tentatively approved to the State—

(1) The Secretary is authorized to make contracts and grant leases, licenses, permits, rights-of-way, or easements, and any tentative approval or patent shall be subject to such contract, lease, license, permit, right-of-way, or easement; provided that the authority granted the Secretary by this subsection is that authority the Secretary otherwise would have had under existing laws and regulations had the lands not been selected by the State; and provided further that the State has concurred prior to such action by the Secretary;

(2) From and after the date of enactment of this Act, ninety per centum (90%) of any and all proceeds derived from contracts, leases, licenses, permits, rights-of-way, or easements or from trespasses originating after the date of selection by the State shall be held by the Secretary until such lands have been tentatively approved to the State. As such lands are tentatively approved, the Secretary shall pay to the State from such account the proceeds allocable to such lands which are derived from contracts, leases, licenses, permits, rights-of-way, easements, or trespasses. The proceeds derived from contracts, leases, licenses, permits, rights-of-way, easements, or trespasses and deposited to the account pertaining to lands selected by the State but not tentatively approved due to rejection or relinquishment shall be paid as would have been required by law were it not for the provisions of this Act. In the event that the tentative approval does not cover all of the land embraced within any contract, lease, license, permit, right-of-way, easement, or trespass, the State shall only be entitled to the proportionate amount of the proceeds derived from such contract, lease, license, permit, right-of-way or easement, which results from multiplying the total of such proceeds by a fraction in which the numerator is the acreage of such contract, lease, license, permit, right-of-way, or easement which is included in the tentative approval and the denominator is the total acreage contained in such contract, lease, license, permit, right-of-way, or easement; in the case of trespass, the State shall be entitled to the proportionate share of the proceeds in relation to the damages occurring on the respective lands;

(3) Nothing in this subsection shall relieve the State or the United States of any obligations under section 9 of the Alaska Native Claims Settlement Act, or the fourth sentence of section 6(h) of the Alaska Statehood Act.

(m) All conveyances to the State under section 6 of the Alaska Statehood Act, this Act, or other law, shall be subject to valid existing rights and to any right-of-way or easement reserved for or appropriated by the United States—

(1) Where prior to a conveyance to the State, a right-of-way or easement has been reserved for or appropriated by the United States or a contract, lease, license, permit, right-of-way, or easement has been issued for the lands, the conveyance shall contain provisions making it subject to the right-of-way or easement reserved or appropriated and to the contract, lease, license, permit, right-of-way, or easement issued or granted, and also subject to the right of the United States, contractee, lessee, licensee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits previously granted, issued, reserved or appropriated. Upon issuance of tentative approval, the State shall succeed and become entitled to any and all interests of the United States as contractor, lessor, licensor, permitter, or grantor in any such contracts, leases, licenses, permits, rights-of-way or easements, except those reserved to the United States in the tentative approval.

(2) The administration of rights-of-way or easements reserved to the United States in the tentative approval shall be in the United States, including the right to grant an interest in such right-of-way or easement in whole or in part;

(3) Where the lands tentatively approved do not include all of the land involved with any contract, lease, license, permit, right-of-way, or easement issued or granted, the administration of such contract, lease, license, permit, right-of-way, or easement shall remain in the United States, unless the agency responsible for administration waives such administration;

(4) Nothing herein shall relieve the State or the United States of any obligations under section 9 of the Alaska Native Claims Settlement Act, or the fourth sentence of section 6(h) of the Alaska Statehood Act.

(n) Any extensions of time periods granted to the State pursuant to Section 17(d)(2)(E) of the Alaska Native Claims Settlement Act are hereby extinguished, and the time periods specified in subsections (a), (b) and (c) of this section shall hereafter be applicable to such State selections.

(o) Nothing in this section shall alter the rights or obligations of any party with regard to section 12 of the Act of January 2, 1976, P.L. 94–204, sections 4 and 5 of the Act of October 4, 1976, P.L. 94–456, or section 3 of the Act of November 15, 1977, P.L. 95–178.

PROTECTION OF NATIVE LANDS IN CONTINGENCY AREAS UNDER TIMBER SALES

SEC. 805. Section 15 of the Alaska Native Claims Settlement Act is amended by inserting "(a)" after "Sec. 15." and by adding at the end thereof the following new subsection:

"(b) No land conveyed to a Native Corporation pursuant to this Act or by title VIII of the Alaska National Interest Lands Conservation Act which is within a contingency area designated in a timber sale contract let by the United States shall thereafter be subject to such contract or to entry or timbering by the contractor. Until a Native Corporation has received conveyance to all of the land to which it is entitled to receive under this Act, no land in such a contingency area that has been withdrawn for selection by such Corporation under this Act shall be entered by the timber contractor and no timber shall be cut thereon, except by agreement with such Corporation. For purposes of this subsection, the term 'contingency area' means any area specified in a timber sale contract as an area from which the timber contractor may harvest timber if the volume of timber specified in the contract cannot be obtained from one or more areas definitely designated for timbering in the contract."

USE OF PROTRACTION SURVEYS

SEC. 806. With the agreement of the party to whom a patent is to be issued under this title, the Alaska Native Claims Settlement Act, or the Alaska Statehood Act, the Secretary may base such patent on protraction surveys in lieu of field surveys.

ACTION TO ENFORCE; JURISDICTION

SEC. 807. For a period of three years after the date of enactment of this Act, any appropriate Federal district court shall have jurisdiction to hear, consider, and decide any action brought by the State or by a Native Corporation to enforce the provisions of this title and to award appropriate attorney and witness fees and other costs of the litigation to the prevailing party.

NATIONAL ENVIRONMENTAL POLICY ACT

SEC. 808. In the passage of the Alaska Native Claims Settlement Act the Congress took full consideration of the National Environmental Policy Act of 1969 and the environmental impacts associated with land withdrawals, conveyances, the reservation of easements and other similar administrative actions required in the Alaska Native Claims Settlement Act to carry out the purposes of that Act.

TECHNICAL CORRECTIONS IN SECTION 15(a) OF P.L. 94–204

SEC. 809. Section 15(a) of P.L. 94–204, 89 Stat. 1154–1155, is amended as follows:

(1) Strike the description beginning with "Township 36 south, range 52 west/" through "Township 41 south, range 53 west, sections 1, 2, 11, 12, 13 S.M., Alaska, notwithstanding;" and insert in lieu thereof the following:

"Township 36 south, range 52 west, all;

"Township 37 south, range 51 west, all;

"Township 37 south, range 52 west, all;

"Township 37 south, range 53 west, sections 1 through 4, 9 through 16, 21 through 24, and the North one-half of sections 25 through 28;

"Township 38 south, range 51 west, sections 1 through 5, 9, 10, 12, 13, 18, 24 and 25;

"Township 38 south, range 52 west, sections 1 through 35;

"Township 38 south, range 53 west, sections 1, 12, 13, 24, 25 and 36;

"Township 39 south, range 51 west, sections 1, 6, 7, 16 through 21, 28 through 33, and 36;

"Township 39 south, range 52 west, sections 1, 2, 11 through 15, and 22 through 24.

"Township 39 south, range 53 west, sections 33 through 36, and the south one-half of section 26;

"Township 49 south, range 51 west, sections 2 and 6;

"Township 40 south, range 52 west, sections 6 through 10, 15 through 21, and 27 through 36;

"Township 49 south, range 53 west, sections 1 through 19, 21 through 28, and 34 through 36;

"Township 49 south, range 54 west, sections 1 through 34;

"Township 41 south, range 52 west, sections 7, 8, 9, 16, 17 and 18;

"Township 41 south, range 53 west, sections 1, 4, 5, 8, 9, 11, 12 and 16;

"Township 41 south, range 54 west, section 6;

(2) Strike the initial word "The" in the line immediately following the description, and insert "notwithstanding the."

## TITLE IX—MINERAL STUDY, EXPLORATION AND EXTRACTION IN CONSERVATION SYSTEM UNITS

### GENERAL GEOLOGICAL INVESTIGATIONS AND MINERAL ASSESSMENT PROGRAMS IN ALASKA

SEC. 901. (a) Nothing in the provisions of this Act, the provisions of the Wilderness Act, nor any other provision of law shall be construed to prohibit the Secretary from conducting mineral assessment programs and general geological investigatory programs and inspections in Alaska directly or by grants to or contracts with individuals and business concerns.

(b) The Secretary shall promulgate guidelines concerning the conduct of the program authorized under subsection (a) in areas which are located within a conservation system unit. Such guidelines shall insure that such program is conducted in an environmentally sound manner which does not interfere with the purposes for which such areas are established as part of such unit.

### OIL AND GAS LEASING PROGRAMS IN NATIONAL WILDLIFE REFUGES

SEC. 902. (a) The Congress finds and declares that—

(1) leases for the exploration and development of oil and gas resources on units of the National Wildlife Refuge System have generally not been granted, despite the authority of the Secretary to enter into such leases; and

(2) exploration and development of oil and gas resources could occur with minimal adverse impact on such refuge system lands if such exploration and development were carried out under strict regulations concerning surface uses of such lands.

(b)(1) The Secretary shall conduct, pursuant to his authority under existing law, a leasing program for the exploration and development of oil and gas resources on units of the National Wildlife Refuge System located in Alaska, including lands designated as units of such system under the provisions of title II. The Secretary shall utilize the recommendations of representatives of the oil and gas industry, conservation groups, the Governor of the State of Alaska, Alaskan local governments, Native corporations, and interested groups and individuals in determining which lands located in units of the National Wildlife Refuge System should be leased for the exploration and development of oil and gas resources.

(2) The Secretary shall promulgate such regulations as may be necessary to insure that exploration and development of oil and gas resources in any refuge system unit pursuant to the provisions of this section occur in a manner which does not result in any significant adverse impact on the resources or values for which such refuge system unit was established.

### NON-FUEL MINERAL EXPLORATION AND EXTRACTION PROGRAMS

SEC. 903. (a)(1). The Secretary shall conduct a program, directly or by the issuance of permits to individuals or business concerns, to study and explore the mineral potential of the areas established as or added to conservation system units under the provisions of this Act which are under his jurisdiction, and to determine whether further mineral exploration and extraction activities can be conducted in such areas in a manner which does not interfere with the purposes for which such areas were established as such units.

(2) The Secretary shall determine the size of land tracts for which permits are to be issued by balancing the need for a tract of reasonable size to permit study or exploration with the need to minimize any adverse impact of such study or exploration on the conservation system unit.

(3) In issuing permits for study or exploration under the provisions of this section, the Secretary shall give full consideration to interested individual prospectors and small business concerns.

(4) The Secretary shall authorize the holders of permits to map the surface or subsurface of areas studied or explored under the provisions of this section by aerial, mechanical, physical, or other techniques, as well as by physical entry and examination, geophysical activities, and other evaluation methods. The Secretary shall require that any holder of a permit who employs techniques or methods with result in a substantial alteration of any surface feature of the area studies or explored shall restore such surface feature to its original condition immediately after the conclusion of such study or exploration.

(b)(1) The Secretary may issue permits for the further exploration or extraction of minerals from lands located in areas established as or added to conservation systems units under the provisions of this Act if he determines, based on information gained from studies or explorations conducted pursuant to subsection (a), that such further exploration and extraction may be conducted in a manner which does not substantially interfere with the purposes for which such units was established and that any surface altered by such further exploration or extraction may be substantially restored to its original condition. The Secretary may not issue permits for further exploration or extraction in units of the National Park or Monuments System without the prior consent of Congress.

(2) The Secretary may issue regulations to limit the scope of further exploration and extraction activities in order to preserve, to an appropriate degree, known scenic, habitat, natural, or historical values or concerns in any conservation system unit where such further exploration or extraction is located.

(3) In issuing permits for further exploration or extraction in a particular area under the provisions of this subsection, the Secretary shall offer permits for further exploration or extraction to holders of permits for study or initial exploration in that area. Any such permit holders shall have sixty days from the date when the Secretary offers a permit for further exploration or extraction to accept such offer. If any such offer is rejected by such permit holder, the Secretary shall immediately make the land for which such permit was offered available for lease on a competitive bidding basis.

(c) The Secretary shall provide the public and the Commission established under the provisions of title VI an opportunity to comment on the implementation of the provisions of this section. After receiving such comments, or after a reasonable time from the provision of such opportunity, the Secretary shall issue regulations to implement the provisions of this section concerning—

(1) the issuance of permits for exploration and extraction, including the sizes of tracts for which permits will be issued and requirements for competitive bidding;

(2) the duration, assignment, and renewal of permits;

(3) the establishment of a fee and royalty schedule for issuance and maintenance of permits;

(4) additional appropriate terms for the issuance of permits;

(5) requirements to insure that any activity under any permit for study, exploration or extraction in an area located in a conservation system unit shall be undertaken in a manner which does not unreasonably interfere with the purposes for which such unit was established;

(6) the removal of minerals;

(7) facilities for general access, storage, removal, and transportation of minerals extracted under any permit, including roadways, storage sites, processing operations, water lines, pipelines, communications, and similar facilities; and

(8) such other matters as the Secretary finds reasonably necessary to implement the provisions of this section.

### EXISTING MINERAL CLAIMS AND MINERAL LEASING RIGHTS IN CONSERVATION SYSTEM UNITS

SEC. 904. Persons holding valid existing mineral claims and mineral leases within conservation system units designated under the provisions of titles I, II, III, IV, and V shall be afforded reasonable and customary access to such claims or leases, including access by motor vehicles. The provisions of this Act or any other Act shall not be construed to prohibit the use of such claims or leases in a manner intended under the Mining Law of 1872, and related Acts, and the Mineral Leasing Act of 1920, as amended.

## TITLE X—TRANSPORTATION AND UTILITY RIGHTS-OF-WAY

SEC. 1001. (a) Notwithstanding any other provision of law, the Secretary is authorized to permit rights-of-way for transportation or utility systems across any lands designated as a unit of the National Park System, the National Wildlife Refuge System, the National Wild and Scenic Rivers System, or the National Wilderness Preservation System (hereinafter referred to as a "conservation system unit") under the provisions of title I, II, III, or V of this Act.

(b) Upon receipt of any application for such transportation or utility right-of-way, the Secretary shall afford the Commission established under title VI of this Act the opportunity to review, study, and make recommendations concerning such application.

(c) In accordance with the provisions of title VI of this Act, the Commission shall make recommendations to the Secretary concerning the approval or disapproval of all applications for rights-of-way for transportation and utility systems across lands designated as a conservation system unit under the provisions of title I, II, III, or V of this Act.

(d) If the Secretary disapproves an application for a right-of-way which has been recommended for approval by the Commission, he shall issue, within the shortest reasonable time, detailed findings concerning such disapproval which shall include—

(1) information indicating that the transportation or utility system right-of-way which is the subject of the application cannot be constructed in a manner which would avoid significant damage or degradation to the natural resources and values for which the affected conservation system unit was established; and

(2) a finding that the natural values for which the affected conservation system unit was established which would be significantly damaged or degraded by the right-of-way for which the application is made outweigh the public interest benefits which would result from the development of such transportation or utility system right-of-way; and

(3) a demonstration of a feasible and prudent alternative to the right-of-way for which the application is made which would—

(A) cause less damage or degradation to the natural values of the affected conservation system unit; or

(B) be more compatible with the purposes for which the affected conservation system unit was established.

(e) Section 603 (c) (relating to the veto authority of the Secretary over decisions of the Commission) does not relieve the Secre-

tary of his duties prescribed under this section.

## TITLE XI—GENERAL ADMINISTRATIVE PROVISIONS

### MINING

SEC. 1101. (a) All lands designated by this Act as units of the National Park System, National Wildlife Refuge System, and, notwithstanding the provisions of section 9(a)(ii) of the Wild and Scenic Rivers Act (82 Stat. 907) as amended (16 U.S.C. 1274(2)), wild rivers, as provided in section 322 of this Act, are hereby withdrawn, subject to valid existing rights, from all forms of appropriation under the mining laws and, except in the case of the National Wildlife Refuge System, from operation of the mineral leasing laws.

### SELECTIONS BY NATIVE CORPORATIONS AND THE STATE

SEC. 1102. (a) All lands within the areas added to existing units or established by Titles I, II, III, and IV of this Act, which are subject to selection or selected by Native Corporations under the terms of the Alaska Native Claims Settlement Act, and which are not selected by or conveyed to those Corporations under the terms of that Act are hereby added to and incorporated within the appropriate area, to be administered under the terms of this Act, at such time as the relinquishment of Native rights becomes final.

(b) With respect to valid Native and State selections and Native and State-owned lands which are within the boundaries of the areas added to or established by this Act as units of conservation systems—

(1) inclusion of validly selected lands by the State or by Native corporations shall in no way affects the ability of the Native corporation or the State to receive patent or interim conveyance to such lands;

(2) valid Native selections and Native-owned lands shall be deemed to be included within such boundaries on the date of approval of this Act, except that any such lands shall be deeemed to be excluded upon receipt by the Secretary of written notification from the chief executive officer of the concerned Native corporation during the one-year period from the date of approval of this Act that any such lands should be excluded;

(3) valid State selections and State-owned lands shall be deemed to be included within such boundaries on the date of approval of this Act, except that any such lands shall be deemed to be excluded upon receipt by the Secretary of written notification from the Governor of the State during the one-year period from the date of approval of this Act that any such lands should be excluded.

(c) Nothing in the foregoing subsection (b) shall prohibit the acquisition by the Secretary, after the one-year period from the date of approval of this, of valid Native and State selections and Native and State-owned lands formerly within the boundaries depicted on the maps referred to in section 2 of this Act, with the consent of the owner. Property so acquired shall thereupon become part of the area from which it was excluded, subject to the laws and regulations applicable thereto.

### LAND ACQUISITION; IN HOLDINGS

SEC. 1103. (a) Within the boundaries of the units of the national conservation systems and classifications established by or pursuant to this Act, the Secretary or the Secretary of Agriculture with respect to national forest lands may acquire lands and interests in lands within areas placed under their respective jurisdiction by donations, purchase, exchange, or otherwise.

(b) The Secretary may utilize condemnation proceedings without the consent of the owner to acquire private lands or interests therein only in cases where the private or commercial uses of the land are clearly not in keeping with the recreational or other purposes of the conservation unit, that the land is vitally necessary for the use or management of the conservation unit, and that all reasonable efforts to acquire such lands or interests therein by negotiation have failed. In such proceedings the private land owner will have the option of receiving in exchange lands of equal value made available by the appropriate Secretary from public lands elsewhere of similar character or otherwise acceptable to the private landowner.

(c) The owner of an improved property on the date of its acquisition, as a condition of such acquisition, may retain for himself, his heirs and assigns, a right of use and occupancy of the improved property for noncommercial residential or recreational purposes, as the case may be, for a definite term of not more than twenty-five years or, in lieu thereof, for a term ending at the death of the owner or the death of his spouse, whichever is later. The owner shall elect the term to be reserved. Unless the property is wholly or partially donated, the Secretary shall pay to the owner the fair market value of the owner's interest in the property on the date of its acquisition, less the fair market value on that date of the right retained by the owner. A right retained by the owner pursuant to this section shall be subject to termination by the Secretary upon his determination that such right is being exercised in a manner inconsistent with the purposes of this Act, and it shall terminate by operation of law upon notification by the Secretary to the holder of the right of such determination and tendering to him the amount equal to the fair market value of that portion which remains unexpired. The Secretary shall afford the occupant the opportunity to cease such inconsistent use prior to termination of such occupation right.

(d) Regardless of the ownership of the land, the Secretary shall permit owners of dwellings located on Federal lands included in conservation systems under this Act to occupy such dwellings for a definite term of not more than twenty-five years or, in lieu thereof, for a term ending at the death of the owner or the death of his spouse, whichever is later. The owner shall elect the term to be reserved. These provisions shall only apply to persons who are occupying dwellings as a principal place of residence and which were constructed when such lands were open to entry under the public land laws.

### LOCATION OF ADMINISTRATIVE SITES

SEC. 1104. The Secretary may establish administrative sites or visitor facilities outside the boundaries of any area established under this Act, or protect any significant archeological sites outside the boundaries of the areas described in Titles I, II, or III of this Act. For these purposes he may establish on Federal lands or acquire other lands not to exceed one-thousand acres for administrative and visitor facilities for each area, and no more than seven thousand five acres for archeological or paleontological sites outside the boundaries of each of the areas referred to herein: *Provided*, That no such administrative site, visitor facility, or archeological site may be established on National Forest System lands without the concurrence of the Secretary of Agriculture.

### FACILITIES ON MARINE LANDS; SERVICES

SEC. 1105. (a) The Secretary shall, with the concurrence of the Native Corporation involved, attempt to locate administrative sites and visitor facilities for areas established under this Act on adjacent Native-owned lands, wherever possible and desirable.

(b) Notwithstanding any other provision of revenue-producing visitor services, the Secretary shall grant the village and/or regional corporations most directly affected the first right of refusal to provide such services within the unit under such terms and conditions as he may by agreement prescribe.

### INTER-AGENCY COOPERATION

SEC. 1106. The Secretary shall direct the Fish and Wildlife Service to participate, where appropriate, in fish and wildlife studies and resource planning on units authorized by this Act as components of the National Park and Wild and Scenic Rivers System. The Secretary shall also direct the National Park Service, where appropriate, to participate in recreation planning, interpretation, historic resources protection, and ecological research on areas authorized by this Act as units of the National Wildlife Refuge and Wild and Scenic Rivers Systems.

### PLANNING

SEC. 1107. Except as otherwise provided, within five years from the effective date of this section, the Secretary shall formulate (and he may from time to time revise) a detailed resource management and use plan for each unit of the systems established in Titles I and II of this Act. Where units of the National Wildlife Refuge System and the National Park System include important biological and physical characteristics which control the natural occurrence and the management of fish and wildlife and their habitat, and include scenic, historical, and archeogical resources within each unit, a single plan shall be developed for the management and use of such resources. Each plan shall identify management practices, which the Secretary shall adopt and implement, that will accomplish the specific purposes of the areas set forth in titles I and II.

The Secretary shall formulate each plan any revision thereof only after holding one or more public hearings in the vicinity of the affected unit or units, and only after consultation with the appropriate agencies of the State of Alaska.

### AUTHORITY TO CONSTRUCT CAPITAL IMPROVEMENTS ON NON-FEDERAL LANDS

SEC. 1108. Notwithstanding any other provision of law, the Secretary is authorized to construct, operate, and maintain, with funds appropriated for the purposes of this Act, such permanent and temporary buildings and facilities as he deems appropriate to provide visitor services and for administrative purposes, and lands within and outside the boundaries of the units established by this Act, without regard to whether title to the underlying land is in the United States: *Provided*, That in the case of buildings and facilities constructed on non-Federal land, the owner shall have entered into a cooperative agreement with the Secretary, the terms of which shall assure the continued use of such buildings and facilities for the purposes of this action.

### STATE LAND EXCHANGES

SEC. 1109. In the exercise of his authority to acquire lands, waters, and interests therein for the purposes of this Act, the Secretary may utilize the provisions of subsection 22(f) of the Alaska Native Claims Settlement Act, as amended. Property acquired within the boundaries of the areas added to the four conservation systems by this Act shall become part of the area within which it is located, and subject to the laws and regulations applicable to such area.

### LOCAL HIRE

SEC. 1110. (a) The Secretary shall establish a program under which any individual who, by reason of having lived or worked in or near a conservation system unit, has special knowledge or expertise concerning the natural or cultural resources of such unit and the management thereof (as determined by the Secretary) may be considered for selection for any position within such unit without regard to—

(1) any provision of the civil service laws or regulations thereunder which require

minimum periods of formal training or experience;

(2) any such provisions which provides an employment preference to any other class of applicant in such selection; and

(3) any numerical limitation on personnel otherwise applicable.

Individuals appointed under this subsection shall not be taken into account in applying any personnel limitation described in paragraph (3).

(b) Within one year after the date of approval of this Act, and annually thereafter during each of the following ten years, the Secretary shall prepare and submit to the Congress a report indicating the actions taken in carrying out the provisions of subsection (a) of this section together with any recommendations for legislation in furtherance of the purposes of this section.

NAVIGATION FACILITIES

SEC. 1111. Within areas added to the National Park System, Wildlife Refuge, National Forest, and Wild and Scenic Rivers Systems by this Act, access to, and operation and maintenance of, and construction of air and water navigation aids and related facilities shall be permitted in accordance with the laws and regulations applicable to the National Park, Wildlife Refuge, National Forest, and Wild and Scenic Rivers Systems, as appropriate. Access to and operation and maintenance of facilities for national defense purposes and related air and water navigation aids within or adjacent to such areas shall continue in accordance with the laws and regulations governing such facilities notwithstanding any other provisions of this Act. Nothing in the Wilderness Act shall be deemed to prohibit such access, operation, and maintenance within wilderness areas designated by this Act.

ACCESS

SEC. 1112. (a) The Secretary shall take such actions within or outside the boundaries of conservation system units as may from time to time be necessary, including acquiring or providing easements or other interests in lands in accordance with the provisions of this title, to carry out any one or more of the following purposes, consistent with the purposes for which the concerned conservation system units were established, designated, or expanded:

(1) providing access to subsistence lands for purposes of subsistence uses under this Act;

(2) providing access for purposes of administering units of the National Park, National Wildlife Refuge, National Forest, or Wild and Scenic Rivers Systems established or expanded by this Act;

(3) providing public access to conservation system units, consistent with the purposes for which the units are established, designated, or expanded; and

(4) insuring continued public access to areas conveyed to the State, particularly in cases where such areas are enclosed by one or more conservation system units.

(b) Except as otherwise provided in this Act, in administering the conservation system units in Alaska, the Secretary shall permit the continuation of customary patterns and modes of travel across such units. Such travel may be conditioned by such reasonable regulations as the Secretary shall promulgate to assure that such travel is consistent with the purposes for which such unit was established. Before promulgating regulations under this section, the Secretary shall give at least sixty days public notice of the proposed regulations, including publication of the proposed regulations in a newspaper or newspapers having general circulation in each State judicial district in Alaska where the unit or units affected by the proposed regulations are located, and shall hold a public hearing or hearings concerning the proposed regulations at one or more locations convenient to the unit or units affected.

COOPERATIVE INFORMATION CENTERS

SEC. 1113. (a) The Secretary of the Interior is authorized to establish, after consultation with other appropriate Federal agencies, on not to exceed one thousand acres of State land at a site adjacent to the Alcan Highway, an information and education center for visitors to Alaska. The Secretary and the Governor of the State shall jointly participate in the program planning, construction, and operation of the center and shall seek participation of representatives of Native groups in Alaska and may accept contributions of funds, personnel, and planning and program assistance from such State agencies, local agencies, Federal agencies, Native representatives, and other persons for purposes of such planning, construction, and operation. Before establishing any such center on any such site, the Secretary shall notify the appropriate committees of Congress of his intention to do so. The Secretary and the State shall administer the center of its facilities in accordance with the Act of August 25, 1916 (39 Stat. 535), and other provisions of law applicable to units of the National Park System and in accordance with such State laws as may be applicable.

(b) The Secretary of the Interior is authorized to establish in Anchorage, Fairbanks, and Southeastern Alaska, an information and education center for visitors to Alaska. The Secretary shall seek participation from the State, units of local government, and representatives of Native groups in Alaska and may accept contributions from State agencies, local agencies, Federal agencies, Native representatives, and other persons in the same manner and to the same extent as is authorized under subsection (a) in connection with the Alcan Highway Center. Before establishing any such center in any such city, the Secretary shall notify the appropriate committees of the Congress of his intention to do so. The Secretary is authorized to lease or acquire by purchase, donation, or exchange such property in Anchorage, Fairbanks and Southeastern Alaska, as may be necessary to carry out the purposes of this subsection, except that (1) any property owned by a State or local government may be acquired for such purposes only by donation or exchange, and (2) any property owned by any other person may be acquired for such purposes only with the consent of such person.

(c) There are authorized to be appropriated $10,000,000 for the purpose of construction of the Alcan visitor center established in subsection (a) of this section and for the establishment of the information and education center authorized in subsection (b) of this section.

SECTION 22(e) LANDS

SEC. 1114. Any withdrawals of land by the Secretary pursuant to section 22(e) of the Alaska Native Claims Settlement Act which are not included in any of the conservation units established in title II of this Act are hereby revoked.

## TITLE XII—MISCELLANEOUS PROVISIONS

DENALI NATIONAL PARK STUDY AND DEVELOPMENT

SEC. 1201. (a) The Congress finds and declares that—

(1) the superlative natural scenery of the expanded Denali National Park area, and the close proximity of such park area to most residential areas in Alaska and to major transportation systems utilized by visitors to Alaska make it desirable to provide greater opportunities for visitor access to, accommodation in, and use of Denali National Park established in section 111;

(2) the present lack of access to and facilities within the expanded Denali National Park area prevents full enjoyment of such park area; and

(3) the construction of facilities for visitor services and accommodations in the expanded Denali National Park area would permit greater enjoyment and use by the public.

(b) The Secretary is authorized to enter into cooperative agreements with the State, local governments, and local organizations for the purpose of conducting studies and making recommendations concerning the development of facilities necessary for the provision of visitor services and accommodations for the expanded Denali National Park area, including the location and design of such facilities.

(c) Within two years from the date of enactment of this Act, the Secretary shall submit a report to the Congress containing recommendations and proposals for the development of facilities for the provision of visitor services and accommodations for the expanded Denali National Park area. The report shall include—

(1) an economic analysis evaluating the potential market for visitors towards which the development of facilities could be aimed;

(2) a transportation study concerning the cost and feasibility of—

(A) a mass transportation system connecting Anchorage, Alaska, with the expanded Denali National Park area;

(B) the development of a road connecting such park area with the State highway system;

(C) the connection of such park area with the Alaska Railroad; and

(D) the development of an airport near such park area;

(3) an engineering study concerning the cost, feasibility and architectural design of a range of visitor facilities in the expanded Denali National Park area designed to accommodate up to 10,000 visitors and year-round residents, including an interpretive center, lodging facilities, recreational facilities, water impoundments, a tramway, related viewing facilities, and other visitor facilities; and

(4) an environmental study concerning the development of facilities for visitor services in the expanded Denali National Park area, including—

(A) possible actions to mitigate any adverse environmental impacts on such Park area; and

(B) plans to deal with environmental concerns relating to sewage disposal, domestic water supply, local climatological information, avalanche or earthquake hazards, as well as other environmental matters.

(d) For purposes of this section, the "expanded Denali National Park area" means the southern portion of that land added to the Denali National Park under section 111 of this Act and the land in Denali State Park adjacent to such southern portion.

(e) To carry out the provisions of this section, there are authorized to be appropriated $2,000,000 for fiscal years 1979 and 1980. Any funds expended by the State of Alaska for the purposes set forth in this section prior to enactment of this Act shall be reimbursed to the State of Alaska from the funds authorized in this section.

AUTHORIZATIONS FOR CONSTRUCTION

SEC. 1202. There are authorized to be appropriated $500,000,000 for—

(1) the construction of a mass transit system connecting Anchorage, Alaska, with a visitor center and development site in or near the Denali National Park,

(2) the construction of a visitor center associated with related visitor facilities within Denali State Park; and

(3) the construction of a tramway to provide visitor access from a visitor center and

other facilities within Denali State Park to an observation site within Denali National Park.

CREATION OF NATIONAL HISTORIC TRAILS SYSTEM

SEC. 1203. The National Trails System Act (82 Stat. 919; 16 U.S.C. 1241) is amended as follows:

(a) In section 2(b) delete "and scenic" and insert "scenic and historic".

(b) In section 3 redesignate subsection "(c)" as "(d)", and insert prior thereto a new subsection (c) as follows:

"(c) National Historic Trails, establish as provided in section 5 of this Act, and designated in accordance with the criteria in section 7 of this Act, which will be extended trails that follow as closely as possible the original trails or routes of national historical significance. Although designation of such trails or routes shall be continuous, an established or developed trail may not be continuous.".

(c) In the new section 3(d) delete "or national scenic" and insert ", national scenic, or national historic".

(d) In the heading of section 5 "SCENIC" insert "AND NATIONAL HISTORIC"; in the first sentence of section 5(a) after "scenic" insert "and national historic"; and in section 5(b) after "national scenic" wherever it appears insert "or national historic".

(e) In section 6 delete in the first sentence "or national scenic" and insert", national scenic, or national historic"; and in the second sentence delete "or scenic" and insert ", scenic, or historic".

(f) In section 7 in the first sentence of subsection (a) after "Scenic" insert "and National Historic"; in subsection (b) and in the first sentence of subsection (c) after "scenic" wherever it appears insert "or national historic"; in the penultimate sentence of subsection (c) delete "and scenic" and insert ", scenic, and historic"; in subsection (d) delete "or scenic" and insert ", scenic, and historic"; in subsection (e) after "scenic" wherever it appears insert "or historic"; in the first sentence of subsection (h) delete "or scenic" and insert ", scenic, or historic"; in the second sentence of subsection (h) after "scenic" insert "or historic"; and in the first sentence of subsection (i) delete "or scenic" and insert ", scenic, or historic".

(g) Section 7 of such Act is further amended by adding at the end thereof the following new subsection:

"(j) To qualify for designation as a National Historic Trail, a trail must meet all three of the following criteria:

"(1) It must be a trail established by historic use and historically significant as a result of that use. The trail need not exist as a trail at present to qualify, but its location must be known sufficiently to permit evaluation of public recreation potentials.

"(2) It must be of national significance with respect to any of several broad facets of American history such as trade and commerce, migration and settlement, or military campaigns. To qualify as nationally significant, historic use of the trail must have had a far-reaching effect on broad patterns of American culture. Trails significant in the history of native Americans (Indians, Aleuts, and Eskimos) may be included.

"(3) It must have significant potential for public recreational use based on historic interpretation and appreciation. The potential for such use generally is greatest along cross-country segments developed as historic trails, and at historic sites associated with the trail. The presence of recreation potential not related to historic appreciation is not sufficient justification for designation under this category.".

(h) In section 8(a) at the end of the first sentence insert the following sentence: "The Secretary is also directed to encourage States to consider, in their comprehensive statewide historic preservation plans and proposals for financial assistance for State, local, and private projects submitted pursuant to the Act of October 15, 1966 (80 Stat. 915), as amended, needs and opportunities for establishing historic trails.".

DESIGNATION OF IDITAROD NATIONAL HISTORIC TRAIL

SEC. 1204. (a) The Iditarod Trail, Alaska, a trail of approximately one thousand and six hundred miles extending from Seward to Nome, Alaska, following the route(s) as generally depicted on the map identified as "Proposed Iditarod Trail, Number dated --------" is hereby designated a national historic trail within the National Trails System. The Iditarod National Historic Trail shall be administered by the Secretary of the Interior.

(b) Within three years from the date of this Act an inventory and evaluation of all sites, structures, and other properties located along or immediately adjacent to the designated route possessing historical, architectural, archeological, or cultural value shall be conducted by the administering agency in consultation with concerned public and private landowners or managers. This inventory and evaluation shall, among other things, identify properties eligible for inclusion in the National Register of Historic Places and formulate plans for the protection and preservation of significant historical and archeological properties.

(c)(1) The provisions of section 1203 do not prohibit the construction, reconstruction, or improvement of roads, highways, railroads, or water transportation routes which may be designated as part of a historic trail.

(2) Notwithstanding any other provision of law, the designation of the Iditarod Trail as a historic trail shall not prohibit the construction of new transportation or utility systems across or along portions of the trail right-of-way.

(3) The provisions of this section shall not be construed as designating the general historic trail corridor of the Iditarod Trail as a "historic site of national, State, or local significance" as that term is used in section 4 (f) of the Department of Transportation Act (49 U.S.C. 1653 (f)).

(d) There is authorized to be appropriated $200,000 for the purpose of acquiring lands or interests in lands, signing, conducting an inventory and evaluation of historical and archeological sites, and other actions necessary to implement this section.

KLONDIKE GOLD RUSH NATIONAL HISTORIC PARK

SEC. 1205. The second sentence of subsection (b)(1) of the first section of the Act entitled "An Act to authorize the Secretary of the Interior to establish the Klondike Gold Rush National Historical Park in the States of Alaska and Washington, and for other purposes", approved June 30, 1976 (90 Stat. 717), is amended to read as follows: Lands or interests in lands owned by the State of Alaska or any political subdivision thereof may be acquired only by donation or exchange, and notwithstanding the provisions of subsection 6(i) of the Act of July 7, 1958 (72 Stat. 339, 342), commonly known as the Alaska Statehood Act, the State may include the minerals in any such transaction.".

SCENIC HIGHWAY STUDY

SEC. 1206. (a) Subject to valid existing rights, all public lands within an area, the centerline of which is the centerline of the Parks Highway from the entrance to Denali National Park to the Talkeetna junction which is one hundred and thirty-six miles south of Cantwell, the "Denali Highway" between Cantwell and Paxson, the "Richardson Highway" and "Edgerton Highway" between Paxson and Chitina, and the existing road between Chitina and McCarthy (as those highways and road are depicted on the official maps of the department of transportation of the State of Alaska) and the boundaries of which are parallel to the centerline and one mile distant therefrom on either side, are hereby withdrawn from all forms of entry or appropriation under the mining laws and from operation of the mineral leasing laws of the United States.

(b) During the three years period beginning on the date of enactment of this Act, the Secretary shall study the desirability of establishing a Denali Scenic Highway to consist of all or part of the lands described in subsection (a) of this section. In conducting the studies, the Secretary, through a study team which includes representatives of the Secretary of Transportation, the National Park Service, the Bureau of Land Management, the State, and of each Regional Corporation within whose area of operation the lands described in subsection (a) are located, shall consider the scenic and recreational values of the lands withdrawn under this section, the importance of providing protection to those values, the desirability of providing a symbolic and actual physical connection between the national parks in south-central Alaska, and the desirability of enhancing the experience of persons traveling between those parks by motor vehicles. Members of the study team who are not Federal employees shall receive from the Secretary per diem (in lieu of expenses) and travel allowances at the rates provided for employees of the Bureau of Indian Affairs in Alaska in grade GS–15.

(c) In conducting the studies required by this section, the Secretary shall cooperate with the State and shall consult with each Village Corporation within whose area of operation lands described in this section are located and with the owners of any lands adjoining the lands described in subsection (a) concerning the desirability of establishing a Denali Scenic Highway. The Secretary, through the National Park Service, shall also give such public notice of the study as he deems appropriate, including at least publication in a newspaper or newspapers having general circulation in the area or areas of the lands described in subsection (a), and shall hold a public hearing or hearings at one or more locations convenient to the areas affected.

(d) Within three years after the date of enactment of this Act, the Secretary shall report to the President the results of the studies carried out pursuant to this section together with his recommendation as to whether the scenic highway studied should be established and, if his recommendation is to establish the scenic highway, the lands described in subsection (a) which should be included therein. The President shall advise the President of the Senate and the Speaker of the House of Representatives of his recommendations and those of the Governor of Alaska with respect to creation of the scenic highways, together with maps thereof, a definition of boundaries therof, an estimate of costs, recommendations on administration, and proposed legislation to create such a scenic highway, if creation of one is recommended.

(e) The lands withdrawn under subsection (a) of this section shall remain withdrawn until such time as the Congress acts on the President's recommendation, but not to exceed two years after the recommendation is transmitted to the Congress.

(f) There are hereby authorized to be appropriated $60,000,000 for the purpose of paving approximately 115 miles of the Denali Highway from the Tangle Lakes area to the intersection of this Highway with the Parks Highway.

RESERVATION OF TRANSPORTATION AND UTILITY CORRIDOR

SEC. 1207. The Secretary is hereby directed to designate a right-of-way across Federal lands generally following the Alcan Highway and the Ladue River as depicted on the map entitled " ," dated April , 1978. Such a right-of-way shall be withdrawn from all forms of appropriation and disposition, except for valid state selections under the terms of the Alaska Statehood Act and valid Native selections under the terms of the Alaska Native Claims Settlement Act, for the purpose of construction of transportation and utility systems from the Fairbanks area to the Canadian border.

BUREAU OF LAND MANAGEMENT WILDERNESS REVIEWS

SEC. 1208. Notwithstanding any other provision of law, section 603 of the Federal Land Policy and Management Act of 1976, shall not apply to any lands in Alaska. However, in carrying out his duties under section 201 and section 202 of such Act and other applicable laws, the Secretary may identify areas in Alaska which are suitable as wilderness and may, from time to time, make recommendations to the Congress for inclusion of any such areas in the Wilderness Preservation System, pursuant to the Wilderness Act. In the absence of congressional action relating to any such recommendation of the Secretary, the Bureau of Land Management shall manage all such areas which are within its jurisdiction in accordance with applicable land use plans and applicable provisions of law. Nothing in this section shall be construed as relieving the Secretary of the duty of reviewing the wilderness values of the National Petroleum Reserve in Alaska in connection with the study required by section 105 of the Naval Petroleum Reserves Production Act of 1976 (Public Law 94-258).

IN SITU COAL GASIFICATION RESEARCH

SEC. 1209. (a) The Congress finds and declares that—

(1) section B. (1) of the "Terms and Conditions for Land Consolidation and Management in the Cook Inlet Area", supplemental to section 3(b) of Public Law 94-456, requires that coal resources located in the subsurface estate granted to the Native regional corporation within the Kenai National Moose Range shall only be extracted in a liquid or gaseous state and that such extraction shall be undertaken in accordance with the most advanced technology commercially available at that time and causing the least practicable temporary and permanent harm to the fish and wildlife habitats of the range; and

(2) if extraction under these conditions is to take place and the corporation is to exercise their property rights regarding any coal resources which may be located on lands owned by the corporation within the range, additional research and prototype development of in situ coal gasification or coal extraction in a liquid state is necessary; and

(3) the benefits of such research and development would be applicable to other areas of the State of Alaska and to other parts of the United States, the costs of such research and development are beyond the reasonable capabilities of the corporation and these costs would preclude the reasonable exercising of property rights granted under the the terms of Public Law 94-456.

(b) The Secretary of Energy shall enter into contracts with the Native corporations receiving patent to subsurface estates, where the right to extract coal from such estate is limited to extraction in a liquid or gaseous state, for the purpose of conducting research, including development of test wells, on the feasibility of extraction of coal in a liquid or gaseous state in accordance with the provisions of section B.(1) of the "Terms and Conditions for Land Consolidation and Management in the Cook Inlet Area" supplemental to section (3)(b) of Public Law 94-456. Where the Secretary of Energy contracts for such research and testing, the Secretary of the Interior shall, subject to such reasonable conditions as are necessary to protect the fish and wildlife resources of the range, permit the use of the surface estate of the range as may be necessary for the conduction of the research program.

(c) There are authorized to be appropriated $2,000,000 annually for a period of six years from the date of passage of this Act for the purpose of conduction of the research described in section 1209.

AUTHORIZATION FOR APPROPRIATION

SEC. 1210. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act for fiscal years beginning after the fiscal year 1978.

---

SUMMARY

NATIONAL PARK SYSTEM—TITLE I—PARKS, MONUMENTS

| | *Acreage (mil. acres)* |

TITLE V—WILDERNESS DESIGNATION

Except in Southeast Alaska, no "instant" wilderness designated.

Seven areas designated wilderness in the Tongass National Forest.

Boundaries and acreages to be determined upon completion of Tongass land use management plan, and would not affect existing level of timber harvest or include significant mineral areas.

Includes special provisions to provide for access, cabins, aquaculture facilities, and other uses in wilderness areas.

Land use planning commission would conduct studies of wilderness demands, uses, and potential areas and make recommendations.

TITLE VI—ESTABLISHMENT OF NEW FEDERAL-STATE LAND USE PLANNING COMMISSION

The commission would be established upon the passage of State law dedicating State land for jurisdiction under the commission.

All Federal land not included in conservation systems or military reserves would be placed under the commission.

The State would legislate a process by which private and native corporation lands could be voluntarily placed under the commission's jurisdiction and receive certain advantages such as property tax exemptions.

The commission would be composed of 9 memberss: 1 chairman jointly appointed by president and governor, 4 Federal members by President, and 4 State members by governor. 1 Federal member and one State member would be native if 80 percent or more corporation land dedicated.

Members would be full-time and serve staggered 4-year terms.

Functions and authorities of the commission would include:

Development of land use plans and land classifications for various land uses;

Insuring that Federal, State, and local planning and land uses are harmonious;

Coordinate implementation of air and water pollution laws, coastal zone management law, and other environmental laws;

Determine location of transportation and utility system rights-of-way across Fed, State, and private lands;

Veto power would be retained by the governor and the Secretary of Interior over their respective lands. Either the state or the secretary would have veto over native corporation lands.

On-the-ground management would be retained by the normal federal (BLM) and state (DNR) agencies.

Lands under the commission would be withdrawn from all entries and appropriations pending classification by the commission.

The commission would terminate after 11 years unless renewed by Congress. If the commission is terminated the secretary could withdraw up to 40 million acres of lands formerly under commission jurisdiction for possible additions to conservation systems.

TITLE VII—SUBSISTENCE

The state would retain prime responsibility for fish and game management.

When fish and wildlife resources are scarce, subsistence users would be given preference in using those resources.

Subsistence users would be defined on the basis of dependence on the resources, not race or ethnic background.

All federal lands, including national park lands, would be open to subsistence uses. Access by customary means, including motorized vehicles, would be permitted on all lands.

The state would create a system of regional boards and local advisors. Regional boards would have primary responsibility, subject to state overview, for development of fish and wildlife policies and regulations.

The secretary would monitor state subsistence program and could suspend program if subsistence provisions not followed. State would have ample hearing opportunities and time to correct program.

Federal funds would be authorized and granted to the state to off-set the extraordinary costs to set up and run special subsistence program.

TITLE VIII—NATIVE AND STATE LAND CONVEYANCE

Core townships would be conveyed to native corporations by the act with patent or interim conveyance issued within 6 months.

Provides for an expedited conveyance process for all other lands whereby patents or interim conveyances issued within 6 months of submission of prioritization of selections.

Essential easements specified by existing law would be reserved in all conveyances subject to the time limitations imposed by this title.

Provides for confirmation of State selections and expedited conveyance process.

Clarifies selection rights and entitlements and amends statehood act to assist in selection process.

Corrects ANCSA amendment language to provide KONIAG correct selection lands.

TITLE IX—MINERAL STUDY, EXPLORATION AND EXTRACTION IN CONSERVATION SYSTEM UNITS

Authorizes continued mineral study, exploration in all system units.

Secretary directed to initiate oil and gas leasing program on wildlife refuge system lands.

In all but park and monument units nonfuel mineral extraction permits could be issued by Secretary following exploration. In parks and monuments congressional approval would be required.

Reasonable and customary access and use assured for existing valid claims and leases in conservation system units.

TITLE X—TRANSPORTATION AND UTILITY CORRIDORS

The commission would conduct studies of all proposed transportation or utility systems which may be proposed. Based on what it determined to be the most prudent and feasible alternative, rights-of-way would be authorized across lands under its jurisdiction.

The commission would recommend rights-of-way to the Secretary across four-systems lands based on its studies. The Secretary would grant the recommended right-of-way unless he issued specific findings showing that the route would result in significant harm to the particular resources involved and that there existed another prudent and feasible alternative which avoided such impacts.

TITLE XI—ADMINISTRATIVE PROVISIONS

State and native lands included in conservation unit boundaries only at their concurrence.

Lands selected but not eventually conveyed to native corporations would become part of conservation unit if within boundaries.

Condemnation of private lands only when uses clearly not in keeping with purposes of conservation unit and all reasonable efforts to acquire failed. Owner given right to occupy improved property for life if acquired.

Homesites legally entered by not filed upon would qualify for lifetime occupancy permit.

Authorizes purchase of isolated archeological sites.

Calls for development of management plans for units.

Provides for local hire in management of four systems lands.

Authorizes servicing and construction of navigation facilities.

Provision of access to and in units of four systems.

Establishes Alcan highway visitor center and other information centers. Authorizes $20 million for these centers.

TITLE XII—MISCELLANEOUS

Calls for special study of development of visitor access and facilities on south side of proposed Denali (Mt. McKinley) National Park.

Within two years of act, secretary would report on economic, environmental, and engineering costs, plans and feasibility of range of developments.

$2 million is authorized for study.

$500 million is authorized for construction of mass transit system from Anchorage, visitor center, and tramway.

Establishes new historic trails system and designates Iditarod Trail as national historic trail.

Would allow state or other lands to be donated or acquired for Klondike Gold Rush National Historical Park.

Calls for a scenic highway study along Denali highway between Parks highway and Glennallen area. Authorizes $60 million for paving Denali highway.

Directs secretary to withdraw a transportation and utility corridor across Federal lands along Alcan highway and Ladue River between Fairbanks and Canada border.

Exempts Alaska from provisions of section 603 of BLM organic act calling for wilderness studies on all BLM lands.

Directs Secretary of Energy to conduct coal gasification research on native subsurface lands. Appropriates $2 million annually for 6 years for program.●

---

By Mr. TALMADGE (by request):

S. 2945. A bill to authorize civil penalties for violations of various laws for preventing the introduction and dissemination of livestock and poultry diseases, plant diseases, and plant pests; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2946. A bill to authorize the Secretary of Agriculture to relinquish exclusive legislative jurisdiction over lands or interests under his control; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2947. A bill to authorize the Secretary of Agriculture to regulate the exportation and transportation of animal semen; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2948. A bill to amend the act of July 2, 1962, to authorize intrastate quarantines under extraordinary emergency conditions, to authorize U.S. marshals to serve warrants under the act, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2949. A bill to repeal the Tobacco and Plant Exportation Act of 1940; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2950. A bill to repeal the statutes relating to the publishing of cotton price predictions in Government reports and the issuance of cotton crop reports; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2951. A bill to authorize the Secretary of Agriculture to accept and administer on behalf of the United States gifts or devices of real and personal property for the benefit of the Department of Agriculture or any of its programs; to the Committee on Agriculture, Nutrition, and Forestry.

S. 2952. A bill to amend the Tobacco Inspection Act to consolidate, and provide additional, authority for the Secretary of Agriculture to establish methods for efficient and equitable marketing of tobacco; to the Committee on Agriculture, Nutrition, and Forestry.

● Mr. TALMADGE. Mr. President, I am today introducing at the request of the administration several bills for referral to committee and appropriate consideration. The Department of Agriculture recommends that these legislative proposals be enacted.

Mr. President, I ask unanimous consent that a summary of the bills prepared by the staff of the Committee on Agriculture, Nutrition, and Forestry be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

STAFF EXPLANATION OF ADMINISTRATION REQUEST BILLS

S. 2945 would expand the scope of sanctions for violations of certain so-called "Animal Quarantine" and "Plant Quarantine" acts intended to prevent the introduction into the United States and the dissemination within the United States of livestock and poultry diseases and plant diseases and pests.

S. 2946 would authorize the Secretary of Agriculture to relinquish exclusive jurisdiction over certain property of the Federal Government where he deems appropriate. This authority is needed to control vandalism and other crimes against Federal property and personnel, both employees and visitors, within the boundaries of the exclusive jurisdiction properties under the

control of the Secretary but isolated from Federal law enforcement officials.

S. 2947 would provide specific authority to promulgate rules and regulations concerning the exportation and transportation of animal semen. This authority would clearly establish the Department's authority to issue health certificates necessary to meet the importation requirements of destination countries in a manner similar to the livestock certification authorized by the existing provisions of law.

S. 2948 would expand the powers of the Secretary of Agriculture after he has declared an extraordinary emergency due to the existence of any dangerous, communicable disease of livestock or poultry that constitutes a threat to the livestock or poultry of the United States.

S. 7949 would repeal the Tobacco Seed and Plant Exportation Act of 1940. As other countries have succeeded in producing tobacco, there no longer is a constructive purpose to be served by restricting American tobacco seed and plant exports.

S. 2950 would repeal the statutes relating to the publishing of cotton price predictions in Government reports and the issuance of cotton crop reports. Cotton is the only crop having specific legislation that relates to the issuance of crop estimates. Likewise, cotton is the only agricultural commodity covered by specific legislation prohibiting price forecasting. All other crop estimates are issued under provisions of law governing the collection of statistics and issuance of crop reports. These provisions would govern the issuance of cotton acreage and production reports upon repeal of the appropriate statutes.

S. 2951 would expand the authority of the Secretary of Agriculture to accept and administer on behalf of the United States gifts or devises of real and personal property for the benefit of the Department of Agriculture or any of its programs. The Secretary is presently limited to accepting only those gifts made to the National Arboretum and the National Agricultural Library.

S. 2952 would amend the Tobacco Inspection Act to consolidate and provide additional authority for the Secretary of Agriculture to establish methods for efficient and equitable marketing of tobacco. The bill would consolidate the relevant authorities now contained in existing law, more clearly define the growers who may participate in the referendum required to be held prior to final designation of a tobacco auction market by the Secretary of Agriculture, and provide certain additional authority needed for effective administration of the program.●

---

By Mr. KENNEDY (for himself and Mr. WEICKER):

S. 2953. A bill to amend title 23 of the United States Code in order to improve transportation throughout the Nation; to the Committee on Environment and Public Works.

HIGHWAY AND PUBLIC TRANSPORTATION IMPROVEMENT ACT OF 1978

● Mr. KENNEDY. Mr. President, I am today introducing, along with the distinguished Senator from Connecticut, the Highway and Public Transportation Improvement Act of 1978. This act, which is intended to revise title 23 of the United States Code, represents another step in our continuing efforts to rationalize American transportation policy.

The basic thrust behind our bill is this: Highway programs must be considered in the light of our overall transportation needs, and, certainly as importantly, our other needs—those which pertain to energy, the air, land use, health and safety. We should not create artificial distinctions in aiding our transportation system and thereby prevent the use of funds for locally felt needs. We should not create artificial distinctions and incentives by having transportation planning and project selection processes take place in separate little boxes, one for mass transit and one for highways. We should not proceed in our transportation planning without considering the effect of our transportation efforts in other areas which are important to us.

Over the years, Senator WEICKER and I have attempted to bring these principles to bear on the Highway Trust Fund. In 1973 we proposed an amendment which first made it possible for States to cancel non-essential links of the interstate highway system and to use the money for mass transit projects. In 1975, together with Senator MUSKIE and Senator John Sherman Cooper, we amended the act to include $750 million for maintenance of Federal aid system roads as well as new construction.

Today we are introducing another set of amendments. They are detailed in the section-by-section analysis following our remarks. But I want to point out some of the highlights of the legislation that we are introducing.

Our first amendment is to section 101, which includes the definitions under the act. We move to modify the definition of "construction" so that it includes maintenance of Federal system projects. In our amendment any system which could be constructed with title 23 money could at State or local option, be maintained with title 23 money. Current "3R" standards allow for support only for major maintenance projects—which really constitute reconstruction. But whatever reasons exist for Federal aid to build a system of roads in the first place also are applicable to maintaining them once they are built. So long as we keep up aid for roads, we should aid the mature parts of the system as well as the new parts. As long as the Federal Government limits the maintenance option, it is encouraging States to construct new highways when they might legitimately prefer to keep their existing roads in a decent state of repair.

Our second amendment (to sec. 103 (a)(d)) consolidates a number of existing highway programs into four Federal-aid systems:

The interstate, the primary, urban—for urbanized areas over 50,000—and the small urban and rural. This consolidation effectively permits States and urbanized areas to base their transportation project decisions on their own locally determined needs, rather than encouraging maximize their Federal aid by choosing projects from rigidly defined Federal categories. We extend the present option of using urban and Interstate System funds for transit capital expenses to all Federal aid systems.

Our next amendment restores the sentence to section 103(e)(4) which the administration took out of its proposed bill which says that any funds transferred from an interstate project would be a supplement to and not a substitute for money due under UMTA. We certainly do not want to penalize those who make the decision to switch funds from highways to mass transit. Yet, deleting this sentence might suggest that DOT has the authority to do so. We want to allow a State to transfer money but without the sentence DOT might be able to force the State into merely choosing whether to forsake a highway.

Our fourth amendment, to section 103(e)(4), of importance restores to the act another provision which the administration proposes removing, involving obligation to match funds for those project transferred between 1973 and 1976, between the time when the interstate transfer provision was first put in and the 1976 amendments to the Highway Act. Under the 1973 Interstate transfer amendment the Federal Government undertook a contractural obligation to fund the Federal share of any transferred project. Under the 1976 amendments, subsequent transferors were not guaranteed that the Federal Government would continue to provide its share till completion. Now the administration wants to take the contractural obligation off of the Federal Government for the projects switched between 1973 and 1976. This is unfair and should not be done. One of the main reasons that the projects were switched in this period is because of the guarantees that were offered. The Federal Government should not pull back on its terms after a State has irretrievably committed to a transfer.

Our fifth amendment is to section 103 of title 23. We adopt the administration's proposals to end all interstate construction not begun by 1986, and to erase all penalties to States which choose to "transfer" their apportionments for nonessential interstate segments to other highway or mass transit projects. However, we modify the administration proposal which says that a State must withdraw and transfer an interstate section by 1982 if it is to do so at all. Where a highway has been subjected to a judicial injunction or another judicial or administrative restraint after that date, but before 1986, we would allow the State to withdraw that section and use it for mass transit purposes if it choses.

Our sixth amendment is one of the most important. It adds a subsection to section 105. Section 105 provides for States to submit a program of projects proposed to be constructed in the coming year with funds appropriated under the title. We believe that the States should consider how these projects will affect other national goals. The energy shortage, the murky air and the plight of our cities all serve notice that highways have important ramifications for the way we live as well as the way we travel. Our amendment would have the States consider alternatives to construction of a particular project, and also consider whether the proposed project has been planned in such a way as to minimize, in the aggregate, such adverse effects as air, noise and water pollution,

disruption of community cohesion, adverse housing effects and excess energy consumption.

Our seventh amendment would amend section 129 to allow a State to impose tolls on a Federal aid system highway for purposes of managing peak load demand. The Clean Air Act allows use of such tolls in nonattainment areas, where air pollution is too great. But the Highway Act currently disallows such tolls. The purpose of these tolls is to set a price on the use of the road equal to the external costs that the use produces at peak hours. It is not for collection of a fund to build still more roads. Therefore, we don't allow these funds to be set aside for highway purposes, other than the costs of operating and maintaining a toll facility.

Our next amendment is to section 134, and it changes the planning requirements. It first requires development of a 5-year plan to supplement the long-range plans that the States and urbanized areas develops. It requires that a simple plan be developed for mass transit projects funded through UMTA and highway projects funded through FHWA. In sum, one hand should know what the other is doing, and this is best done by submission of an integrated plan. The plan must also show how the projects chosen have been designed to minimize the adverse effects enumerated in section 109. We do not require an alternative analysis at this time, since it would be too involved a process to show all the reasonable alternatives for all the projects which might be undertaken in the future. (In conjunction with our efforts to create a multimodal planning process, we also propose in an amendment to section 302 that State transportation departments replace State highway departments for the purpose of administering projects funded under the act.)

The ninth amendment that we want to highlight repeals section 142(k) of title 23. This section says that an interstate transfer proposal shall not be approved where a trust fund or similarly assured funding for both highway and public transit has been established. Some proposals have been made to set aside parts of various taxes which might be imposed as incentives to energy conservation and use them for such purposes as "energy efficient" transportation. We do not know how much money would be set aside under these proposals and we do not know what types of projects would be funded under these proposals. We should not prevent the States from undertaking a voluntary transfer merely because an exploratory or demonstration fund might be set up at some time.

Finally, our 10th amendment would add a sentence to section 144, giving priority funding for bridge replacement to bridges which are unsafe because of structural deficiencies of physical deterioration over those which are merely "functionally obsolete." Proposals are being made to greatly increase the funds available for reconstruction of bridges. The proposals are usually accompanied by reports on the sad and dangerous condition of our bridges. It seems reasonable that those bridges should be seen to first, in preference to bridges which might be increased for the sake of still heavier trucks.

Mr. President, we believe that the changes we have proposed above, and the other changes that we recommend in the bill that we introduce today will go a long way toward creating a better transportation system for all Americans, and will go a long way to rationally fitting that transportation system into our overall national needs.

Mr. President, I ask unanimous consent that the bill and the section-by-section analysis which accompanies it be included in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 2953

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this may be cited as the "Highway and Public Transportation Improvement Act of 1978".

TITLE I—AMENDMENTS TO TITLE 23, UNITED STATES CODE DEFINITIONS

SEC. 101. Section 101 (a) of title 23 of the United States Code is amended as follows:

(1) The definition of "construction" is amended by (A) adding after "highway" the words "or public transportation projects"; (B) adding between "rehabilitation," and "acquisition of rights-of-way", the following: "maintenance,"; and (C) adding before the period at the end a comma and the following: "and the acquisition of necessary facilities and equipment for a public transportation project, and may include costs of operating such public transportation".

(2) The definition of "county" is amended by deleting the word "highways" and substituting in each place it occurs the word "transportation". (3) Following the definition of "county" add the following definition:

"The term 'designated recipient' means the State agency or local public body designated pursuant to section 150.".

(4) The definition of "maintenance" is amended by inserting before the period at the end thereof the following: "or public transportation system including all structures, facilities and equipment necessary for the safe and efficient utilization of such systems".

(5) The definition of "project" is amended by (A) adding after the word "highway" as first used in the definition, the words "or public transportation system", and (B) deleting the last four words of the definition, and substituting in lieu thereof the words "such a system, in the case of assistance for the operation of a public transportation system, the term 'project' shall apply to the conditions set forth by the Secretary for the use of such funds".

(6) The definition of "project agreement" is amended by deleting the words "State highway department" and substituting in lieu thereof the words "designated recipient".

(7) The definition of "State funds" is amended by deleting the last two words of the definition, and substituting in lieu thereof the words "agency empowered by State law to expend such funds".

(8) The definition of "Federal-aid secondary system" is repealed.

(9) Following the definition of "Federal-aid system", add the following definition:

"The term 'Federal-aid small urban and rural system' means the Federal-aid system described in subsection (b) of section 103 of this title.

(10) Following the definition of "urban area," add the following definitions:

"The term 'mass transportation' means transportation by bus, or rail or other conveyance, either publicly or privately owned, which provides to the public general or special service (but not including school buses or charter or sightseeing service) on a regular and continuing basis.

"The term 'public paratransit' means those forms of collective passenger transportation, as defined by the Secretary, which provide shared-ride service to the general public or special categories of users on a regular and predictable basis and which do not necessarily operate on fixed schedules or over prescribed routes.

"The term 'public transportation' means either mass transportation or public paratransit, or both.

"The term 'routes' means the geographical location of highways, or public transportation operations.".

AMENDMENT OF SECTION 103

SEC. 102. Section 103 of title 23 of the United States Code is amended to read as follows:

"Sec. 103. Federal-aid systems.

"(a) For the purposes of this title, the four Federal-aid systems, the primary system, the Small Urban and Rural system, the Urban system, and the Interstate System, are established and continued pursuant to the provisions of this section, and in the case of the Small Urban and Rural system, in accordance with section 133 of this title.

"(b)(1) The Federal-aid primary system shall consist of an adequate system of connected main highways, selected or designated by each State through its State highway department, subject to the approval of the Secretary as provided by subsection (f) of this section. This system shall not exceed 7 per centum of the total highway mileage of such State, exclusive of mileage within national forests, Indian, or other Federal reservations and within urban areas, as shown by the records of the State highway department on November 9, 1921. Whenever provision has been made by any State for the completion and maintenance of 90 per centum of its Federal-aid primary system, as originally designated, said State through its State highway department by and with the approval of the Secretary is authorized to increase the mileage of its Federal-aid primary system by additional mileage equal to not more than 1 per centum of the total mileage of said State as shown by the records on November 9, 1921. Thereafter, it may make like 1 per centum increases in the mileage of its Federal-aid primary system whenever provision has been made for the completion and maintenance of 90 per centum of the entire system, including the additional mileage previously authorized. This system may be located both in rural and urban areas. The mileage limitations in this paragraph shall not apply to the District of Columbia, Hawaii, Alaska, or Puerto Rico.

"(2) After June 30, 1976, the Federal-aid primary system shall consist of an adequate system of connected main roads important to interstate, statewide, and regional travel, consisting of rural arterial routes and their extensions into or through urban areas. The Federal-aid primary system shall be designated by each State acting through its State highway department and where appropriate, shall be in accordance with the planning process pursuant to section 134 of this title, subject to the approval of the Secretary as provided by subsection (f) of this section. Funds apportioned to each State for the primary system may be spent for any project on the urban system or on the small urban and rural system to the extent that such apportionment is attributable to urbanized areas, and small urban and rural areas as appropriate.

"(c) The Federal-aid Small Urban and Rural system shall consist of those routes designated in section 133.

"(d) The Federal-aid urban system shall be located in each urbanized area and shall consist of transportation projects therein other than highway projects on the Interstate System. Funds apportioned to each State for the primary system may be expended for any project on the Urban system or on the Small Urban and Rural system to the extent that such apportionment is attributable to urbanized areas, and small urban and rural areas, respectively.

"(e)(1) The Interstate System shall be designated within the United States, including the District of Columbia, and, except as provided in paragraphs (2) and (3) of this subsection, it shall not exceed forty-one thousand miles in total extent. It shall be so located as to connect by routes, as direct as practicable, the principal metropolitan areas, cities, and industrial centers, to serve the national defense, and to the greatest extent possible, to connect at suitable border points with routes of continental importance in the Dominion of Canada and the Republic of Mexico. The routes of this system, to the greatest extent possible, shall be selected by joint action of the Governor of each State and the adjoining States, subject to the approval by the Secretary as provided in subsection (f) of this section. This system may be located in both rural and urban areas.

"(2) In addition to the mileage authorized by the first sentence of paragraph (1) of this subsection, there is hereby authorized additional mileage for the Interstate System of five hundred miles, to be used in making modifications or revisions in the Interstate System as provided in this paragraph. Upon the request of a Governor and the local governments concerned, the Secretary may withdraw his or her approval of any route or portion thereof on the Interstate System within that State selected and approved in accordance with this title if he determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System (including urban routes necessary for metropolitan transportation) and will not be constructed as a part of the Interstate System, and if he receives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by such route or portion thereof and the additional mileage authorized by the first sentence of this paragraph shall be available for the designation of Interstate routes or portions thereof as provided in this subsection. The provisions of this title applicable to the Interstate System shall apply to all mileage designated under the third sentence of this paragraph except that the cost to the United States of the aggregate of all mileage designated under the third sentence of this paragraph shall not exceed the cost to the United States of the aggregate of all mileage approval which is withdrawn under the second sentence of this paragraph, such costs shall be that as of the date of withdrawal as determined in accordance with subsection (i) of this section. In considering routes or portions thereof to be added to the Interstate System under the third sentence of this paragraph, the Secretary shall, in consultation with the States and local governments concerned, give preference, along with due regard for Interstate highway type needs on a nationwide basis, to routes or portions thereof in States in which the Secretary has heretofore or hereafter withdrawn his or her approval of other routes or portions thereof.

"(3) In addition to the mileage authorized by paragraphs (1) and (2) of this subsection, there is hereby authorized additional mileage of not to exceed 1,500 miles for the designation of routes in the same manner as set forth in paragraph (1), in order to improve the efficiency and service of the Interstate System to better accomplish the purposes of that system.

"(4) Upon the joint request of a Governor and the local governments concerned, the Secretary may withdraw his or her approval of any route or portion thereof on the Interstate System which is within an urbanized area or which passes through and connects urbanized areas within a State and which was selected and approved in accordance with this title, if he determines that such route or portion thereof is not essential to completion of a unified and connected Interstate System and if he receives assurances that the State does not intend to construct a toll road in the traffic corridor which would be served by the route or portion thereof. When the Secretary withdraws his or her approval under this paragraph, a sum equal to the Federal share of the cost to complete the withdrawn route or portion thereof, as determined in accordance with subsection (i) of this section, shall be available to the Secretary to incur obligations for the Federal share of either public transportation projects involving the construction of fixed rail facilities or the purchase of passenger equipment including rolling stock, for any mode of mass transit, or both, or projects authorized under any transportation assistance program under this title or the Urban Mass Transportation Act of 1964, or both, which will serve the urbanized area and the connecting non-urbanized area corridor from which the Interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located. Upon the joint request of the Governor and local governments concerned, the Secretary may approve substitute projects for other areas within the State. Approval of the plans, specifications and estimates for such project by the Secretary shall constitute a contractive obligation of the Federal Government to pay the Federal share of such project as provided in this paragraph. The Federal share of obligations incurred after September 30, 1978, for substitute projects shall be that provided in section 120 (c) of this title. There are hereby authorized to be appropriated out of the general fund of the Treasury such sums as are necessary for public transportation projects substituted pursuant to this paragraph. The sums available for obligation under this paragraph shall remain available until obligated. Obligations incurred after the date of enactment of this sentence under this paragraph for highway or public transportation projects substituted as a consequence of withdrawals made after May 5, 1976, shall come from sums apportioned to the State under section 104 (b) (2) (A) of this title. Funds available for expenditure to carry out the purposes of this paragraph shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to the Urban Mass Transportation Act of 1964, as amended. After the date of enactment of this sentence, the Secretary may not redesignate any mileage as part of the Interstate System as a consequence of any withdrawal made pursuant to this paragraph.

"(f) The Secretary shall have authority to approve in whole or in part the Federal-aid Small Urban and Rural system, the Federal-aid urban system, the Federal-aid Primary system and the Interstate System, as when such systems or portions thereof are designed, or to require modifications or revisions thereof. No Federal-aid system or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.

"(g) The Secretary on July 1, 1974, shall remove from designation as a part of the Interstate System each segment of such system for which a State has not notified the Secretary that such State intends to construct such segment, and which the Secretary finds is not essential to completion of a unified and connected Interstate System. Any segment of the Interstate System, with respect to which a State has not submitted by July 1, 1975, a schedule for the expenditure of funds for completion of construction of such segment or alternative segment within the period of availability of funds authorized to be appropriated for completion of the Interstate System, and with respect to which the State has not provided the Secretary with assurances satisfactory to him that such schedule will be met, shall be removed from designation as a part of the Interstate System. No segment of the Interstate System removed under the authority of the preceding sentence shall thereafter be designated as a part of the Interstate System except as the Secretary finds necessary in the interest of national defense or for other reasons of national interest. This subsection shall not be applicable to any segment of the Interstate System referred to in section 23(a) of the Federal-Aid Highway Act of 1968.

"(h) Notwithstanding subsections (e)(2) and (g) of this section, in any case where a segment of the Interstate System was a designated part of such system on June 1, 1973, and is entirely within the boundaries of an incorporated city and such city enters into an agreement with the Secretary to pay all non-Federal costs of construction of such segment, such segment shall be constructed.

"(i) In determining the cost of an Interstate route or portion thereof for which withdrawal is applied for under paragraphs (2) and (4) of subsection (e) of this section, the Secretary shall use as a base cost for such determination the estimated cost of construction of such route or portion thereof at the latest stage of approval by the Secretary, or the date of approval of each substitute project under paragraph (4) of subsection (e) of this section, whichever is later. Such cost shall then be increased or decreased in accordance with the increase or decrease in construction materials and labor to construct such substitute project in the local market where the project is located. Additionally the Secretary shall take into account in his or her determination of cost, changes in the route or portion thereof which would have been necessary to meet Federal approval if the withdrawn project had been completed. Any Governor or designated recipient dissatisfied with the cost revision approved by the Secretary may appeal such decision in the manner provided for in subsection (g) of section 134 of this title.

"(j) (1) After September 30, 1982, the Secretary may not approve (A) any Interstate project pursuant to section 106 of this title (except pursuant to section 139 of this title or relating to toll roads) unless the environmental impact statement (EIS) process for the project, as required by the National Environmental Policy Act, has been completed or (B) any withdrawal pursuant to subsection (e)(4) of this section, except that an Interstate route or portion thereof for which the environmental impact statement process has been completed prior to September 30, 1982, but which is subject to judicial injunction or other judicial or administrative restraints, on or after September 30, 1982, shall be eligible for withdrawal approval and paragraph (2) of this subsection shall apply to such project. Immediately after this date, the Secretary shall remove from designation as part of the Interstate System each route or portion thereof of such system for which no such process has been completed or withdrawal has been made.

"(j)(2) By September 30, 1986, all routes or portions thereof on the Interstate System (for which the Secretary finds that sufficient Interstate authorizations are available) must be completed or under contract for construction and construction must have commenced unless such failure to be under construction is due to court order or administrative restraint. Immediately after such date, the Secretary shall remove from designation as part of the Interstate System each route or portion thereof of such system not complying, with this paragraph.

"(3) Any Interstate route or portion thereof or any highway or public transportation project substituted pursuant to subsection (e) of section 123 of this title which is: (A) under construction but not completed, (B) not under construction due to court order, or (C) not under construction because of insufficient Interstate authorizations, shall on September 30, 1986, become a separate and individual project for which authorizations and appropriations shall be made separately from funds provided under this title. After September 30, 1986, no apportionments shall be made to the States for the Interstate System pursuant to section 104(b)(2)(A).".

AMENDMENTS TO SECTION 104

SEC. 103. Section 104 of title 23 of the United States Code is amended—

(1) by deleting paragraphs (2) and (4) of subsection (b), and redesignating the remaining subsections and cross references accordingly;

(2) by deleting the words "State highway departments" in redesignated paragraph (2)(A), and substituting in lieu thereof the word "Governor";

(3) by adding the following after the last sentence of such paragraph: "After the date of enactment of this sentence the Secretary shall revise the method of apportionment contained in this paragraph by including the cost of completion of any highway or public transportation project, substituted pursuant to subsection (d) of section 103 of this title, as part of the estimate of the cost of completing the then designated Interstate System.";

(4) by deleting the words "State highway departments" in subsection (e) and substituting in lieu thereof the word" Governors"; and

(5) by amending subsection (f) to read as follows:

"(f) On October 1 of each fiscal year, the Secretary shall set aside 2 per centum of the funds to be apportioned under this section which shall be available for the purposes of section 134 of the Highway and Public Transportation Improvement Act of 1978 relating to transportation planning, except that, for the funds apportioned under (b)(2)(A) of this section, the Secretary shall set aside and make available this per centum of such funds on October 1 of the year preceding the fiscal year for which authorized.".

AMENDMENT OF SECTION 105

SEC. 104. Section 105 of title 23 of the United States Code is amended to read as follows:

"SEC. 105. Programs.

"(a) As soon as practicable after the apportionments have been made under sections 104, 133 and 151 of this title, or appropriations have been made under the Urban Mass Transportation Act of 1964, the Governor of any State, or the designated planning organization, whichever is appropriate, shall submit to the Secretary, for his or her approval, a single program of proposed projects comprised of projects to be funded under either of such Acts, for the utilization of funds apportioned or appropriated. The Secretary shall act upon programs submitted to him or her as soon as practicable after the same have been submitted, and may approve a program in whole or in part.

"(b) Except as provided in subsection (c) of this section, in approving programs for projects, the Secretary shall require that such projects be selected in accordance with the planning process required pursuant to section 134 of this title and section 8 of the Urban Mass Transportation Act of 1964.

"(c) Notwithstanding subsection (b) of this section, the Secretary may approve projects under this section which he or she finds are eligible for emergency relief under the provisions of section 125 of this title.

"(d) In approving programs of projects under this section, the Secretary shall require that such programs of projects have been selected by the planning organizations designated pursuant to section 134 of this title and section 8 of the Urban Mass Transportation Act of 1964.

"(e) In approving programs of projects the Secretary shall require the Governors and designated planning organizations to give priority to the reconstruction of highways which have been shown to be hazardous to the public.

"(f) In approving programs of projects under this chapter, the Secretary may give priority of approval to, and expedite the construction of, projects that are recommended as important to the national defense by the Secretary of Defense, or other officials authorized by the President to make such recommendations.

"(g) In approving programs of projects on the Federal-aid systems pursuant to this chapter, the Secretary shall give priority to those projects which incorporate improved standards and features with safety benefits.

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the Governors and designated planning organizations shall give consideration to projects providing direct and convenient public access to public airports and public ports for water transportation, and in approving such programs the Secretary shall give consideration to such projects.

"(i) In approving programs of projects under this section, the Secretary should give preference to those projects. Whereas implementation will result in the savings of energy resources, as such projects are identified in the plan submitted pursuant to section 134 of this title. Further priority shall also be given to projects falling within the provisions of section 146 of this title.".

"(j) In furtherance of the national transportation policy expressed in section 134(a), the Secretary shall not approve any project for which funds have been apportioned under this title or appropriated pursuant to the Urban Mass Transportation Act of 1964 unless he finds that all reasonable alternatives capable of meeting the transportation needs, as such needs are identified in the appropriate plans required by section 134 of this title, have been considered and that the proposed project is one which can feasibly meet such transportation need while eliminating or best minimizing such adverse effects as the following:

"(1) air, noise and water pollution;

"(2) destruction or disruption of manmade and natural resources, aesthetic values, important historical and cultural assets, and community cohesion;

"(3) adverse housing effects and tax and property value loss, particularly within the inner city;

"(4) injurious displacement of people, business and farms;

"(5) excess energy consumption and vehicle miles travelled;

"(6) ill health and traffic accidents; and

"(7) disruption of the integrity of existing farm units and the practical use of prime agricultural land.

AMENDMENTS TO SECTION 106

SEC. 105. (a) Section 106(a) of title 23 of the United States Code is amended by deleting "Except as provided in section 117 of this title, the State highway department," and substituting in lieu thereof "The Governor or designated recipient".

(b) Section 106(c) of such title is amended by deleting the word "highway" and substituting in lieu thereof the word "system".

AMENDMENT TO SECTION 107

SEC. 106. Section 107(c) of title 23 of the United States Code is amended by deleting the words "State highway department" and substituting in lieu thereof the words "appropriate agency".

AMENDMENTS TO SECTION 108

SEC. 107. (a) Section 108 of title 23 of the United States Code is amended by deleting the words "State highway department" wherever appearing therein, and substituting in lieu thereof the words "designated recipient", and by deleting the word "highway" from the phrase "Federal-aid highway system" wherever appearing therein.

(b) Subsection (c)(2) of such section is amended by deleting the words "of highways".

(c) Subsection (c)(3) of such section is amended by deleting the words "of a highway".

AMENDMENTS TO SECTION 109

SEC. 108. Section 109 of title 23 of the United States Code is amended—

(1) in subsection (a), by deleting the phrase "on any Federal-aid system";

(2) in subsection (c), by deleting the words "Projects on the Federal-aid secondary system in which Federal funds participate" and inserting in lieu thereof the words "Small Urban and Rural projects"; and

(3) by deleting subsection (h) and inserting in lieu thereof the following:

"(h) In furtherance of the national transportation policy expressed in section 134(a), not later than January 1, 1979, the Secretary, after consultation with appropriate Federal and State officials, shall promulgate guidelines designed to assure that possible adverse economic, social, and environmental effects relating to any proposed project under this title or the Urban Mass Transportation Act of 1964 have been minimized in developing such project, and that the final decisions on the project are made in the best overall public interest taking into consideration the need for fast, safe, and efficient transportation, public services, and the costs and benefits of eliminating or minimizing such adverse effects and the following:

"(1) air, noise and water pollution;

"(2) destruction or disruption of manmade and natural resources, aesthetic values, important historical and cultural assets, and community cohesion;

"(3) adverse housing effects and tax and property value loss, particularly within the inner city;

"(4) injurious displacement of people, business and farms;

"(5) excess energy consumption and vehicle miles travelled;

"(6) ill health and traffic accidents; and

"(7) disruption of the integrity of existing farm units and the practical use of prime agricultural land.

Such guidelines shall apply to all proposed projects with respect to which plans, specifications and estimates are approved by the secretary after the issuance of such guidelines. Until such guidelines are in force, the guidelines previously issued pursuant to this subsection shall remain in force.";

(4) in subsection (i) by inserting "(1)"

after "(1)", by deleting the world "highway" wherever it appears, and by deleting the last sentence and adding the following paragraph:

"(2) Not later than January 1, 1979, the secretary, acting jointly with the Administrator of the Environmental Protection Agency shall review and revise the standards issued pursuant to paragraph (1) of this subsection. After revising such standards the secretary shall not approve plans and specifications for any proposed project on any Federal-aid system or financed by the Urban Mass Transportation Act of 1964, as amended, unless he determines that such plans and specifications insure compliance with such standards. The Secretary and the Administrator shall issue, at the same time and in the same manner as authorized above, regulations to achieve those standards by retrofitting or otherwise reducing noise levels on existing transportation facilities that have received Federal funds at any time, from either this title or the Urban Mass Transportation Act of 1964, as amended. Any area which fails to meet the standards issued pursuant to this subsection must take all reasonable steps to retrofit or otherwise reduce noise levels of those facilities which violate such standards. Any such area shall use at least 5 per centum of the funds apportioned to it under section 104(b) and 133(a) of this title for the purpose of retrofitting such facilities as were financed under this title. Any such area shall also use at least 5 per centum of the funds apportioned to it under the Urban Mass Transportation Act of 1964, as amended, for the purpose of retrofitting such facilities as were financed under that Act.";

(5) by deleting subsection (j) and inserting in lieu thereof the following:

"(j) Not later than January 1, 1979, the Secretary and the Administrator of the Environmental Protection Agency, acting jointly, shall issue regulations to assure that projects constructed pursuant to this title and the Urban Mass Transportation Act of 1964, are consistent with any approved plan for the implementation of any ambient air quality standard for any air quality control region designated pursuant to the Clean Air Act, as amended. The Secretary shall not approve any project, any program of projects submitted pursuant to section 105 of this title or any plan or certify any planning process under section 134 of this title unless he finds, in consultation with the Administrator of the Environmental Protection Agency, that such project, program of projects, plan or planning process does not (1) exacerbate any existing violations of National Ambient Air Quality Standards, (2) contribute to a violation of National Ambient Air Quality Standards for a pollutant for which no concentrations in violation of the standard have been measured, (3) delay attainment of National Ambient Air Quality Standards, (4) interfere with maintenance of National Ambient Air Quality Standards, once the standards are attained, or (5) omit any appropriate portions of implementation plans promulgated under section 110 of the Clean Air Act, as amended, including transportation control measures.";

* * * * *

(6) adding at the end thereof the following new subsections:

"(l) The Secretary shall not approve any project under this title which increases the vehicular or weightbearing capacity of any highway unless it meets all requirements and provisions of the National Environmental Policy Act of 1969.

"(m) The Secretary shall not approve any project under this title which interferes with bicycle or pedestrian access to routes for travel from one place to another unless there is a safe and convenient alternative route for bicyclists or pedestrians, as the case may be.".

AMENDMENTS TO SECTION 110

SEC. 109. (a) Subsection (a) of section 110 of title 23 of the United States Code is amended by deleting the words "State highway department" and substituting in lieu thereof the words "designated recipient".

(b) Subsection (b) of such section is amended by deleting the words "highway department".

AMENDMENT TO SECTION 111

SEC. 110. Section 111 of title 23 of the United States Code is amended by deleting the words "State highway department" and substituting in lieu thereof the words "designated recipients".

AMENDMENT TO SECTION 112

SEC. 111. (a) Subsection (a) of section 112 of title 23 of the United States Code is amended by deleting the words "State highway department" and substituting in lieu thereof the words "designated recipient".

(b) Subsection (e) of such section is repealed.

AMENDMENTS TO SECTION 113

SEC. 112. (a) Subsection (a) of section 113 of title 23 of the United States Code is amended by deleting the words "highway" and "the primary and secondary, as well as their extensions in urban areas, and the Interstate System,".

(b) Subsection (b) of such section is amended by deleting the words "highway department" and substituting in lieu thereof the words "designated recipient".

AMENDMENTS TO SECTION 114

SEC. 113. Section 114 of title 23 of the United States Code is amended by—

(1) deleting the words "highways or portions of highways" and substituting in lieu thereof the word "project";

(2) deleting the words "State highway department" and substituting in lieu thereof the words "designated recipient"; and

(3) deleting "Except as provided in section 117 of this title such" and inserting in lieu thereof "Such".

AMENDMENTS TO SECTION 116

SEC. 114. Section 116 of title 23 of the United States Code is amended—

(1) in subsection (a) by deleting the words "State highway department" and inserting in lieu thereof the words "designated recipient";

(2) in subsection (b) by deleting the words "State highway department" and "highway department" and substituting in lieu thereof the words "designated recipient";

(3) in subsection (c) by deleting the words "State highway department" and substituting in lieu thereof the words "designated recipient";

(4) in subsection (d) by deleting the words "State highway departments" the first time such words appear in such subsection, and substituting in lieu thereof the word "Governors", and deleting the words "State highway departments" the second time such words appear in such subsection, and substituting in lieu thereof the words "designated recipient"; and

(5) in subsection (e) by deleting the words "State highway departments" and substituting in lieu thereof the words "designated recipients".

REPEAL OF SECTION 117

SEC. 115. Section 117 of title 23 of the United States Code is repealed.

AMENDMENTS TO SECTION 118

SEC. 116. Section 118 of title 23 of the United States Code is amended—

(1) by deleting the words "State highway department" in subsection (a) and substituting in lieu thereof the word "Governors"; and

(2) by deleting the words "three years" in subsection (b), and substituting in lieu thereof the words "two years".

AMENDMENTS TO SECTION 120

SEC. 117. Section 120 of title 23 of the United States Code is amended—

(1) in subsection (a)—

(A) by deleting "(d)", and substituting in lieu thereof "(c)";

(B) by deleting the words "with primary, secondary, or urban funds, on the Federal-aid primary system, the Federal-aid secondary system and the Federal-aid urban system", and substituting in lieu thereof the words "under this title"; and

(C) by deleting the words "highway construction" and substituting in lieu thereof the word "transportation";

(2) in subsection (f)—

(A) by deleting the word "highway"; and

(B) by deleting the next to the last sentence;

(4) in subsection (g), by deleting the words "State highway department" and substituting in lieu thereof the word "Governor"; and

(4) by adding the following new subsection:

"(i) Funds allocated in any year for a Federal-aid system may be used for the purposes of operating a public transportation system in accordance with the provisions of section 5(f) of the Urban Mass Transportation Act of 1964, as amended.".

AMENDMENTS TO SECTION 121

SEC. 118. Section 121 of title 23 of the United States Code is amended—

(1) by deleting the word "State" and substituting in lieu thereof the words "designated recipient"; and

(2) by deleting the words "State highway department" and substituting in lieu thereof the word "Governor".

AMENDMENTS TO SECTION 122

SEC. 119. Section 122 of title 23 of the United States Code is amended—

(1) by adding after "primary," the words "small urban and rural, urban"; and

(2) by deleting "or extension of any of the Federal-aid highway systems in urban areas,".

AMENDMENTS TO SECTION 123

SEC. 120. Section 123 of title 23 of the United States Code is amended—

(1) by deleting the word "secondary" and substituting in lieu thereof "small urban and rural, or urban"; and

(2) deleting the words "including extensions thereof within urban areas".

AMENDMENT TO SECTION 124

SEC. 121. Section 124 of title 23 of the United States Code is amended by deleting the words "State" and "State highway department", and substituting in lieu thereof the words "designated recipient".

AMENDMENT TO SECTION 125

SEC. 122. (a) Section 125(a) of title 23 of the United States Code is amended by placing a period after the words "in such years", and deleting the remainder of the subsection.

(b) Section 125 (b) and (c) of such Code is amended by deleting "highway" in the term "Federal-aid highway system" wherever appearing therein.

AMENDMENT TO SECTION 128

SEC. 123. Section 128 of title 23 of the United States Code is amended by deleting the words "State highway department" and substituting in lieu thereof the words "designated recipient".

AMENDMENT TO SECTION 129

SEC. 124. Section 129 of title 23 of the United States Code is amended by adding at the end thereof the following subsection:

"(i) Notwithstanding any provision of this title to the contrary, any State or designated recipient may impose tolls on any highway for the purpose of managing peak load demand of vehicular traffic. No funds from such tolls may be used for highway purposes, excepting such amounts which may be used for the operation and maintenance of such toll facilities.".

SMALL URBAN AND RURAL TRANSPORTATION ASSISTANCE

SEC. 125. (a) Title 23 of the United States Code is amended by inserting after section 132 a new section as follows:

"SEC. 133. Small urban and rural transportation assistance.

"(a) On October 1 of each fiscal year the Secretary, after making the deduction authorized by subsection (g) of this section, shall apportion the remainder of the sums authorized to be appropriated for expenditure for small urban and rural transportation assistance for that fiscal year to the States in the following manner:

"One-fourth in the ratio which the area of each State bears to the total area of all the States; one-half in the ratio which the population of small urban and rural areas of each State bears to the total population of small urban and rural areas of all the States as shown by the latest available Federal census; and one-fourth in the ratio which the mileage of rural delivery routes and intercity mail routes where service is performed by motor vehicles in each State bears to the total mileage of rural delivery routes and intercity mail routes where service is performed by motor vehicles in all the States at the close of the next preceding calendar year, as shown by a certificate of the Postmaster General.

"(b) Sums apportioned under this section shall be available for obligation for a period of two years following the close of the fiscal year for which such sums are apportioned, and any amounts so apportioned remaining unobligated at the end of such period shall lapse.

"(c) The Secretary may approve as a project in small urban and rural areas any public transportation project, including operating assistance, which would be eligible for Federal financing assistance under the provisions of the Urban Mass Transportation Act of 1964, as amended, or any highway project, other than projects on the Federal-aid primary or Interstate System. Financial assistance provided under this section shall be subject to such terms, conditions, requirements, and provisions as the Secretary may determine to be necessary or appropriate for the purposes of this section. For public transportation projects such terms, conditions, requirements, and provisions shall be similar to those applicable to grants under sections 3 and 5 of the Urban Mass Transportation Act of 1964, as amended, insofar as the Secretary may deem them appropriate.

"(d)(1) The Federal share payable on account of any highway project financed with sums apportioned under this section shall be that provided in section 120(a) of this title.

"(2) The Federal share payable on account of any public transportation project, other than operating assistance, financed with sums apportioned under this section shall not exceed 80 per centum of the net project cost as defined in section 4(a) of the Urban Mass Transportation Act of 1964, as amended. The Federal share payable on account of any public transportation operating assistance project financed with sums apportioned under this section shall not exceed 33⅓ per centum of the total eligible operating expenses incurred in the operation of public transportation services assisted under this section. The Highway Trust Fund shall be reimbursed from the general funds of the Treasury for any sums expended pursuant to this section for any operating assistance project.

"(e) At least 10 per centum of the sums apportioned under this section to each State shall be used for public transportation projects as set forth in subsection (c) of this section: *Provided*, That, upon application by the State the Secretary may waive such requirement if the Secretary finds that a lower level of public transportation assistance is warranted by the transportation needs of the small urban and rural areas of such State.

"(f) The State may distribute funds to eligible recipients within the State to carry out the purposes of this section. Eligible recipients may include State agencies, local public bodies and agencies thereof (including counties and Indian tribes), nonprofit organizations, and operators of public transportation services.

"(g) On October 1 of each fiscal year, the Secretary shall set aside and make available 2 per centum of the sums authorized to be appropriated for expenditure for small urban and rural transportation assistance for that fiscal year, for carrying out the purposes of section 134 of the Highway and Public Transportation Improvement Act of 1978 relating to transportation planning.".

(b) Sections 155 and 219 of title 23 of the United States Code and section 147 of the Federal-Aid Highway Act of 1973, as amended, are repealed.

(c) The analysis of chapter 1 of title 23, United States Code, is amended by deleting

"133. Repealed."

and inserting in lieu thereof

"133. Small urban and rural transportation assistance.".

by deleting

"155. Access highways to public recreation areas on certain lakes.",

and inserting in lieu thereof

"155. Repealed.",

and by deleting

"219. Safer off-system roads.",

and inserting in lieu thereof

"219. Repealed.".

AMENDMENT OF SECTION 134

SEC. 126. (a) Section 134 of title 23 of the United States Code is amended to read as follows:

"SEC. 134. Transportation planning.

"(a) It is declared to be the national transportation policy to encourage and promote the development of transportation systems embracing various modes of transportation that will serve the States and local communities efficiently and effectively in a manner which will minimize air, noise and water pollution; destruction or disruption of man-made and natural resources, aesthetic values, important historical and cultural assets and community cohesion; adverse housing effects and tax and property value loss, particularly within the inner city; injurious displacement of people, business and farms; excess energy consumption and vehicle miles traveled; and disruption of the integrity of existing farm units and the practical use of prime agricultural land. To accomplish this objective, the Secretary shall cooperate with State and local officials in the development of long-range and five-year, statewide and urbanized area transportation plans, as well as programs of projects based on such plans. Before approving, in whole or in part, a plan, or a program of projects, the Secretary shall find that it is formulated on the basis of and reasonably addresses transportation needs and that it affirmatively uses transportation to achieve other national and local objectives while minimizing those adverse effects of transportation development identified in this section and identifies those specific elements of the plan, or program of projects, which would eliminate or best minimize such adverse effects. Such plans shall be the result of a planning process which includes an analysis of alternative transportation system management and investment strategies to make more efficient use of existing transportation resources and to meet needs for new transportation facilities. Such planning process shall consider all modes of transportation and shall be continuing, cooperative, and comprehensive.

"(b) The Secretary shall not approve under section 105 of this title any program of projects unless he or she finds that such projects are based on a plan, approved in accordance with the provisions of this section, and a continuing, comprehensive transportation planning process carried on cooperatively by States and local communities in conformance with the policies and objectives stated in this section.

"(c) After October 1, 1980, a State or designated recipient shall be eligible to receive its apportionments pursuant to the Urban Mass Transportation Act of 1964, only if it has a comprehensive long-range and five-year transportation plan that has been approved by the Secretary. Such plans shall be reapproved by the same procedure whenever a plan has been significantly changed since its previous approval or reapproval. When reapproving a five-year plan, the Secretary may reapprove the long-range plan if he or she finds that they are consistent with each other. The Secretary shall not approve any plan for any State or urbanized area unless he finds that (1) such plans are in accordance with a continuing, comprehensive, and cooperative transportation planning process, and (2) all reasonable measures to permit, encourage, and assist public participation in such continuing, comprehensive, and cooperative transportation planning process have been taken. The Secretary, in cooperation with the States and urbanized areas, shall develop and publish regulations specifying minimum guidelines for public participation in such processes, which shall include hearings held at least annually, at which there will be a review of the transportation planning process, plans, and programs of projects, and opportunity provided for the consideration of various alternatives to the plan under consideration. No transportation project may be constructed in any urbanized area of fifty thousand population or more unless the responsible public officials of such area in which the project is located have been consulted and their views considered with respect to the corridor, the location, and the design of the project.

"(d) The States and urbanized areas shall each submit a single program of projects with respect to both this title and the Urban Mass Transportation Act of 1964. Such program of projects shall be approved in accordance with section 105 of this title. The Secretary shall not, however, approve a program or projects, unless (1) the urbanized area, or after October 1, 1980, the statewide planning process on which such program of projects is based is being carried on in conformance with the objectives and provisions of this section, and (2) the Secretary finds that the program of projects is based on the planning process.

"(e) The Secretary shall approve State and urbanized area plans in whole or in part, but shall not approve any plan which fails to reasonably meet transportation needs and—

"(1) provide that the State and urbanized area administering agencies will make such reports to the Secretary in such form and containing such information as may reasonably be necessary to enable the Secretary to

perform his or her duties under this title and the Urban Mass Transportation Act of 1964, and will keep such records and afford such access thereto as the Secretary finds necessary to assure the correctness and verification of such reports;

"(2) provide such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid the State or designated recipients under this title or the Urban Mass Transportation Act of 1964;

"(3) provide for the expenditure of adequate amounts of such State's apportionment for each fiscal year under this title and appropriations under the Urban Mass Transportation Act of 1964 for the maintenance of the planning process;

"(4) provide for the development, maintenance, and operation of transportation facilities responsive to the needs of such State and its communities, and in determining compliance with this paragraph, the Secretary shall (A) require the State or designated planning organization to show how the plan reflects the needs of, and is coordinated with, community development plans in urbanized areas, and (B) rely on representations from the appropriate State, Federal and local agencies having responsibilities and jurisdiction in the areas of housing and community development as to the impact such plan will have on housing and community development;

"(5) demonstrate compliance with applicable State and Federal environmental laws, and in determining compliance with this paragraph, the Secretary shall rely on representations from the appropriate State and Federal agencies charged by law with responsibility for protecting environmental quality as to the impact the plan will have upon such State and Federal environmental protection programs;

"(6) demonstrate compliance with applicable State and Federal energy conservation programs, and in determining compliance with this paragraph, the Secretary shall rely on representations from the appropriate State and Federal agencies charged by law with the responsibility to implement programs to conserve energy as to the impact the plan will have upon such State and Federal energy conservation programs; and

"(7) provide an analysis of the impact such plan will have on the social, environmental, and economic well being of the State, or area covered by the plan, and such steps as will be taken to minimize adverse social, environmental, and economic effects on such State or area.

The Secretary shall advise the State or designated planning organization of the reasons for not approving a plan or a program of projects. Approval by the Secretary of any plan or program of projects under this section shall not prevent the Secretary from subsequently disapproving any individual transportation project pursuant to the provisions of this title or the Urban Mass Transportation Act of 1964, or other Federal law, including but not limited to the National Environmental Policy Act of 1969 and section 4(f) of the Department of Transportation Act.

"(f) Whenever the Secretary, after reasonable notice and opportunity for hearing to the State or local agency administering a State or urbanized area plan approved under this title, finds that—

"(1) the State or urbanized area plan has been so changed that it no longer complies with the provisions of this title or the Urban Mass Transportation Act of 1964; or

"(2) in the administration of the plan there is a failure to comply substantially with any such provisions; the Secretary shall notify such State or designated recipients that no further payments will be made to the State or designated recipients under this title or the Urban Mass Transportation Act of 1964 (or, at his or her discretion, that further payments to the State or designated recipient will be limited to projects under or portions of the State or urbanized area plan not affected by such failure), until he or she is satisfied that there will no longer be any failure to comply. Until the Secretary is so satisfied, no further payments may be made to such State or designated recipient (or payments shall be limited to projects under or portions of the State or urbanized area plan not affected by such failure).

"(g) Any Governor or designated planning organization dissatisfied with a final action of the Secretary under this section may appeal to the United States court of appeals for the circuit in which the State or urbanized area is located by filing a petition with such court within sixty days after such final action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary or any officer designated by him or her, for that purpose. The Secretary thereupon shall file in the court the record of the proceedings on which he or she based his or her action, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition the court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part, temporarily or permanently, but until the filing of the record, the Secretary may modify or set aside the order. The findings of the Secretary as to the facts, if supported by substantial evidence, including representations or findings by other Federal agencies acting in accordance with the provisions of subsection (e) of this section, shall be conclusive, but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his or her previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence and the representations or findings of other Federal and State agencies acting in accordance with the provisions of subsection (e) of this section. The judgment of the court affirming or setting aside, in whole or in part, any action of the Secretary shall be final, subject to the review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code. The commencement of proceedings under this subsection shall not, unless so specifically ordered by the court, operate as a stay of the Secretary's action.

"(h) The Secretary may define those contiguous interstate areas of the Nation in which the movement of persons and goods between principal metropolitan area, cities, and industrial centers has reached, or is expected to reach, a critical volume in relation to the capacity of existing and planned transportation demands and future growth. After consultation with the Governors and responsible local officials of affected States, the Secretary may by regulation designate, for administrative and planning purposes as a critical transportation region or a critical transportation corridor each of those areas which he or she determines most urgently require the accelerated development of transportation systems embracing various modes of transport, in accordance with the purposes of this section. The Secretary shall immediately notify such Governors and local officials of such designation. The Secretary may, after consultation with the Governors and responsible local officials of the affected States, provide by regulation for the establishment of planning bodies to assist in the development of coordinated transportation planning, to meet the needs of such regions or corridors, composed of representatives of the affected States and metropolitan areas, and may provide assistance including financial assistance to such bodies. Nothing in title 23, United States Code, or the Urban Mass Transportation Act shall preclude two or more States or contiguous urbanized areas from coordinating or acting jointly in the preparation and execution of their individual or joint transportation plans, as appropriate, as developed under this section, or from acting under such laws on a regional rather than a State basis. Such regional cooperation and joint activity is to be encouraged. There is authorized to be appropriated out of any money in the Treasury not otherwise appropriated, not to exceed $500,000 to carry out this subsection.".

(b) The analysis of title 23 of the United States Code is amended by striking out

"134. Transportation planning in certain urban areas.", and inserting in lieu thereof

"134. Transportation planning.".

AMENDMENT TO SECTION 141

SEC. 127. Section 141 of title 23 of the United States Code is amended by deleting "Federal-aid secondary system" and substituting in lieu thereof "Federal-aid small urban and rural system".

AMENDMENT OF SECTION 142

SEC. 128. Section 142 of title 23 of the United States Code is amended to read as follows:

"Sec. 142. Public transportation.

"(a) To encourage the development, improvement, and use of public transportation systems, the Secretary may approve as a project that can be financed under this title, or the Urban Mass Transportation Act of 1964, as amended, the construction of exclusive or preferential bus lanes, highway traffic control devices, bus passenger loading areas and facilities (including shelters), and fringe and transportation corridor parking facilities to serve bus and other public transportation passengers. If fees are charged for the use of any parking facility constructed under this section, the rate thereof shall not be in excess of that required for maintenance and operation of the facility (including compensation to any person for operating the facility). The Secretary may also approve as such a project exclusive or preferential bus, truck, and emergency vehicle routes or lanes. Projects constructed under the previous sentence shall not be subject to the third sentence of section 109(b) of this title. Sums apportioned under sections 104(b) and 133(a) shall be available to finance the cost of projects under this subsection.

"(b) The establishment of routes and schedules of such public transportation systems shall be based upon a continuing comprehensive transportation planning process carried on in accordance with section 134 of this title, and the Urban Mass Transportation Act of 1964.

"(c)(1) For all purposes of this title, a project authorized by subsection (a) of this section shall be deemed to be a highway project.

"(2) Notwithstanding section 209(f)(1) of the Highway Revenue Act of 1956, the Highway Trust Fund shall be available for making expenditures to meet obligations resulting from projects authorized by subsection (a) of this section and such projects shall be subject to, and governed in accordance with, all provisions of this title applicable to projects financed from this title except to the extent determined inconsistent by the Secretary.

"(3) The Federal share payable on account of projects authorized by subsection (a) of this section shall be that provided in section 120 of this title.

"(d) In any case where sufficient land exists within the publicly acquired rights-

of-way of any Federal-aid highway to accommodate needed rail or non-highway public mass transportation facilities and where this can be accomplished without impairing automotive safety or future highway improvements, the Secretary may authorize a State to make such land and rights-of-way available without charge to a publicly owned transit authority for such purposes wherever he may deem that the public interest will be served thereby.

"(e) Funds available for expenditure to carry out the purposes of subsection (a) shall be supplementary to and not in substitution for funds authorized and available for obligation pursuant to the Urban Mass Transportation Act of 1964, as amended.

"(f) In providing funds for public mass transportation projects under this title, the Secretary shall, to the maximum extent possible, provide that rules and regulations issued concerning the use of such funds for public mass transportation projects be the same as those issued pursuant to the Urban Mass Transportation Act of 1964. In complying with this section, the Secretary shall insure that projects for which funding is sought under this title comply with the following sections of the Urban Mass Transportation Act of 1964—

"(1) the third and fifth sentences of section 3 (a) (1), relating to the use of Federal funds;

"(2) section 3 (e), relating to the acquisition of privately owned facilities;

"(3) section 3 (f), relating to the use of buses for charter operations;

"(4) section 3 (g), relating to the use of buses for schoolbus operations;

"(5) sections 5 (e) and 5 (f), relating to the source of local funds used to match Federal funds for projects involving the payment of operating expenses;

"(6) section 5 (k) (2), relating to projects where the source of non-Federal funds derives from more than one jurisdiction.

"(7) section 5 (m) and section 108 of the National Mass Transportation Assistance Act of 1974, relating to the charging of fares for the elderly and handicapped;

"(8) section 5 (n) (2), relating to the application of chapter 15 of title 5, United States Code, to nonsupervisory employees of federally aided mass transportation systems;

"(9) section 12 (b), relating to contracts entered into by means other than competitive bidding;

"(10) section 12 (e), relating to the powers of the Secretary to regulate the mode of operation of mass transportation facilities, but this provision shall not apply to the use of funds apportioned under this title for the payment of operating expenses;

"(11) section 13 (c), relating to standards for labor;

"(12) section 15, relating to financial reporting systems;

"(13) section 16, relating to the planning and design of facilities to meet the needs of the elderly and handicapped; and

"(14) section 18, relating to standards of buses acquired with Federal assistance.".

AMENDMENT TO SECTION 144

SEC. 129. Section 144 of title 23 of the United States Code is amended by adding at the end thereof the following new subsection:

"(i) The Secretary shall not approve any project under this section to replace or rehabilitate a bridge to exceed the traffic carrying capacity of the road adjacent to the bridge. The preceding sentence shall not apply to bridge rehabilitation or reconstruction undertaken to provide bridge capacity for farm implements and vehicles used for the cultivation of land or trucks carrying agicultural products from farm to market.".

REPEAL OF SECTION 148

SEC. 130. Section 148 of title 23 of the United States Code, including the reference thereto in the analysis of such title, is repealed.

AMENDMENT OF SECTION 150

SEC. 131. Section 150 of title 23 of the United States Code is amended to read as follows:

"SEC. 150. Allocation of urban system funds.

"(a) The funds apportioned to any State under section 104(b)(4) of this title which are attributable to an urbanized area having a population of 50,000 or more shall be allocated among such urbanized areas within such State for projects in programs approved under section 105 of this title in the ratio that the population within each such urbanized area bears to the population of all such urbanized areas, or parts thereof within such State. In the expenditure of funds allocated under the preceding sentence, fair and equitable treatment shall be accorded incorporated municipalities of 200,000 or more population within urbanized areas. The funds apportioned to any State under section 133 of this title which are attributable to urban areas of more than 5,000 but less than 50,000 population within such State for projects in programs approved under section 105 of this title, shall be allocated in accordance with a fair and equitable formula developed by the State in consultation with local elected officials and approved by the Secretary.

"(b) Notwithstanding any contrary provision of this title, the funds that would otherwise be apportioned to any State under section 104(b)(3) of this title on or after October 1, 1979, that are attributable to an urbanized area of 200,000 population or more shall be apportioned to the recipient or recipents jointly designated by the Governor and local elected officials of the urbanized area, to receive and disburse such funds. Expenditure of such funds shall be subject to all the requirements of this title, and where appropriate the Urban Mass Transportation Act of 1964, except that with regard to such funds the designated recipient shall have the responsibility and authority vested in the State by this title and must have adequate powers and be suitably equipped and organized to discharge the duties required by this section and demonstrates the capacity to administer the programs for which it is the designated recipient, to the satisfaction of the Secretary. Nothing in this section is intended to preclude the State from being a designated recipient if agreed to by the Governor and appropriate local elected officials.

"(c) Funds allocated to an urbanized area under the provisions of this system may, upon approval of the local elected officials of the area and the Secretary, be transferred to the allocation of another such urbanized area.".

AMENDMENTS TO SECTION 217

SEC. 132. Section 217 of title 23 of the United States Code is amended—

(1) by deleting subsection (a) and inserting in lieu thereof:

"(a) To encourage energy conservation and the multiple use of transportation rights-of-way including the development, improvement, and use of bicycle transportation and the development and improvement of pedestrian walkways for recreational and commuting purposes in urban areas, or to connect such areas with national, State or local parks, seashores or recreational areas, the States and designated recipients may, as a Federal-aid project or in conjunction with other Federal-aid projects, construct new or improved bicycle lanes, either in conjunction with or on existing highway lanes or shoulders, or bicycle paths, traffic control devices, shelters and parking or support facilities designed and/or regulated to serve bicycles and persons using bicycles, and pedestrian walkways. Such projects shall be located and designed pursuant to an overall plan which will provide due consideration for safety and contiguous routes, and be in conformance with section 134 of this title.";

(2) in subsection (d), by inserting after "(d)" the following: "The Secretary shall establish by regulation, construction standards for bicycle projects to insure that they have safe and adequate surface conditions, widths, sight distances and lighting, realistic design speeds, and grades reasonably negotiable on a bicycle."; and

(3) by deleting subsection (e), and inserting in lieu thereof:

"(e) The Secretary is authorized to make grants to States and designated recipients to achieve the purposes of this section on such terms and conditions he or she may require. To the extent that they are consistent with the purposes of this section, the provisions of chapter 1 of this title shall apply to such projects and grants. There is hereby authorized to be appropriated $45,000,000 per year for fiscal years 1979, 1980, 1981 and 1982 for these purposes.".

AMENDMENT TO SECTION 302

SEC. 133. (a) Section 302 of title 23 of the United States Code is amended—

(1) by deleting the title and substituting in lieu thereof:

"State highway and transportation department."; and

(2) by inserting at the end thereof the following new subsection:

"(c) After October 1, 1980, any State desiring to avail itself of the benefits of this title or the Urban Mass Transportation Act of 1964, as amended, shall have a single State transportation agency, which shall have adequate powers and be suitably equipped and organized to discharge to the satisfaction of the Secretary the duties required by this title and the Urban Mass Transportation Act of 1964, as amended, as well as the authority for the development of multi-modal transportation programs planning and policy generally in such State. After October 1, 1980, the provisions of subsections (a) and (b) of this section shall apply to such State transportation agencies.".

(b) The analysis of such title is amended by striking out:

"302. State highway department."

and inserting in lieu thereof:

"302. State highway and transportation departments.".

CONSOLIDATED PLANNING

SEC. 134. (a) In accordance with this section, the Secretary shall make grants to States and in urbanized areas, to planning organizations designated in accordance with the requirements of section 8 of the Urban Mass Transportation Act of 1964, as amended, and section 134 of title 23, United States Code, for projects for the development of transportation plans and programs required by such sections; and to make grants and contracts for activities eligible under section 8(j) of the Urban Mass Transportation Act of 1964, as amended. Grants under this section shall be from funds made available under section 4(f) of the Urban Mass Transportation Act of 1964 and section 104(f) and section 133(g) of title 23, United States Code.

(b) The Federal share of such projects under this section shall not exceed 80 per centum thereof unless the Secretary determines that the interests of the Federal program would be best served without matching funds. The Secretary shall designate for use in the States, 90 per centum of the funds available to carry out the purposes of this section in the ratio which each State's total apportionment of funds under sections 4(f) of the Urban Mass Transportation Act of 1964 and section 104(f) and section 133(g) of title 23, United States Code, bears to the total of all such apportionments to all States, except that no State shall be

designated less than one-half of one per centum of the amount apportioned. Funds not distributed by formula will be retained by the Secretary for use on a discretionary basis.

(c) The amount of funds designated for a State pursuant to the formula established under subsection (b) of this section that are attributable to an urbanized area of fifty thousand or more population shall be made available by the Secretary to the planning organization designated in accordance with the provisions of section 134 of title 23, United States Code, and section 8(b)(3) of the Urban Mass Transportation Act of 1964, as amended.

---

TITLE II—TERMINATION OF HIGHWAY TRUST FUND

TERMINATION

SEC. 201. Effective after September 30, 1978—

(1) the Highway Trust Fund is terminated and the amount in such Fund, including any obligations held in such Fund, shall be covered into the general fund of the Treasury;

(2) any outstanding appropriations from, or obligations of, such Trust Fund shall be paid from such general fund;

(3) any authorizations for appropriations to be made from such Trust Fund shall be considered to be authorizations for appropriations from such general fund; and

(4) section 209 of the Highway Revenue Act of 1956 is repealed.

KENNEDY-WEICKER AMENDMENTS TO ADMINISTRATION HIGHWAY LEGISLATION

Section 101—Definitions:

Our first amendment modifies the definition of "construction", as follows:

(a) to include public transportation;

(b) to include maintenance; therefore, any projects that could be constructed on a federal system could be maintained with federal system funds;

(c) to include acquisition of transit facilities and operating subsidies (we support limiting operating subsidies to be one-third total operating cost, as per Administration amendments to UMTA);

(d) to include improvements to vehicle weight enforcement program as per Administration 401(b).

Our second amendment modifies definition of "county"; See Footnote 1.

Our third amendment defines designated recipient as per Sec. 131.

Our fourth amendment expands the definition of maintenance to include public transportation.

Our fifth amendment expands the definition of "project" to include public transportation, including operating assistance.

Our sixth amendment redefines "project agreement"—See Footnote 2.

Our seventh amendment redefines "state funds" to substitute "agency empowered by state law to expend such funds"; since public transportation is authorized, a state DOT and designated recipients are then the eligible agency, which may no longer be the state highway department.

Our eighth amendment eliminates the secondary system and secondary projects are folded into small urban and rural system; See Sec. 103 amendments.

Our ninth amendments adopts Administration Sec. 401(e) defining "small urban and rural area" "small urban and rural transportation project"; see Administration proposed 133 and Sec. 103(b), for definition of eligible routes and establishment of system.

Our tenth, eleventh and twelfth amendments define "mass transportation", "public paratransit" and "public transportation."

Our thirteenth amendment defines "routes."

Section 102—Federal Aid Systems

We amend as follows:

(a) Establish four federal-aid systems: the Small Urban and Rural, the Urban, the Primary and the Interstate (Administration does same).

Note: We are, like the Administration, eliminating categories. Multiple categories promote rigidity in the use of funds and create unnecessary construction. By creating a smaller number of systems and broadening eligible routes under those systems, we provide flexibility to use the money on those routes which are most in need of construction or reconstruction in any given area, and increase flexibility for use on various modes, which is more compatible with the goal of developing multi-modal transportation systems.

(b) The primary system is left as is, but primary apportionments may be spent on transportation projects in urbanized areas, or in small urban and rural areas, as appropriate.

(c) Small Urban and Rural System established to include all roads and transit routes in small urban and rural areas except Interstate. (Administration does same)

(d) Urban system expanded to include all roads and transit routes in urbanized areas except Interstate highways and primary highways. (Administration does same). *Note:* 23 U.S.C. 142 currently permits Urban system money to be used for transit capital expenses.

(d)(1) See Footnote 3.

(d)(2) See Footnote 3; Governor now makes request to withdraw; we substitute reference to new cost-escalation for determining costs of withdrawn and substitute routes—see Subsection (i).

Note: In designation of replacement Cramer-Howard substitute projects we remove language which requires preference to be given to extension of Interstate routes through municipalities.

(e)(4) Insert reference to new cost-escalator as provided in Subsection (i).

Further, we oppose Administration language (Sec. 301) which would cut off the approval of substitute projects under the Interstate transfer section on September 30, 1984. This is part of the Administration's language to end the Interstate system. The Administration also requires all withdrawal decisions which are necessary as a prerequisite for substitution of projects in 1982. We oppose this because proposed Interstate segments which remain Interstate construction projects after the 1982 cutoff date may subsequently be rules to be unacceptable. In such cases, transfer should remain an option until final de-designation or construction occurs in 1986 as per subsection (j). Dates for ending Interstates which have been set before (see 23 U.S.C. 193 have not been adadhered to and the system has continued. There is no certainty that the 1986 dates will be adhered to, thus Interstates may continue beyond that date but without the present transfer option. We believe Interstates and substitutes should be treated equally as provided in our amended subsection (j). It is not necessary to eliminate the transfer option in order to end the Interstate system in 1986.

We provide that substitute projects for a withdrawn Interstate may be approved for other areas in the state upon joint request of governor and local officials concerned. Currently, substitutes are limited to the corridor or area from which route was withdrawn. We believe that there may be circumstances where the public interest will be served by allowing funds to flow elsewhere for substitute projects and this should be allowed when the parties involved can agree to do this.

We create a 90–10 matching ratio for substitute project as the Administration does in their Sec. 301. Currently, substitute projects are matched in accordance with the system matching ratio that the substitute projects is on 70–30 for highways or for public transit as per UMTA (80–20).

We delete sums for substitute transit projects through UMTA as superfluous.

We make both highway and public transportation substitute projects funded from Interstate apportionments (see our 23 U.S.C. 104(b)(2)(A)) rather than from the apportionment from the substitute federal system. The Administration has highways only receiving apportionments from Interstate apportionment formula; see Administration Sec. 301.

Because all substitutes are funded from Interstate apportionments the proportional reduction of Interstate apportionments is no longer needed and is thus deleted. Similarly, the Administration limits proportioned reduction to public transit because under their amendments, only transit transfers are financed by other than the Interstate apportionments.

We oppose Administration's deletion of sentence 9 of existing law which provides that funds for substitute transit projects are not to be considered to be substituted in place of UMTA funds.

We support Administration proposal to add that mileage of withdrawn routes can no longer be redesignated as a consequence of withdrawal. See Administration Sec. 301.

(i) We add new cost escalator for withdrawn routes. Costs to construct Interstate projects may be inflated until they are completed. We believe this should apply to all substitute projects as well. We seek to clarify the method by which such costs are determined by creating this subsection.

(j)(1) We adopt the Administration proposal requiring states to either submit Environmental Impact Statements on all Interstate projects, or to "withdraw" such projects for transfer, by Sept. 30, 1982. However, we add a proviso that Interstate withdrawal will be permitted after 1982 if a court or administrative agency restrains construction of any Interstate segment after that date.

(j)(2) We adopt Administration provision that all Interstates segments be under construction by September 30, 1986, unless insufficient federal Interstate money is available; we add a similar exception for segments under court order or administrative restraint.

(j)(3) We add a new subsection providing for treatment of segments falling under the exceptions above and other uncompleted projects. In order to achieve the end of the Interstate system we believe it to be necessary to end apportionments for such system, and to accomplish this while still permitting the completion of those projects not de-designated, we make them individual projects for which authorizations and appropriations are made separately. Thus, the Interstate program ends while not penalizing incomplete projects. This is the only way to guarantee that no new Interstate projects will be added to receive further apportionments.

Sec. 103—Apportionment

Our first amendment deletes apportionment for Secondary System (Administration repeals Secondary section); apportionment for Small Urban and Rural System which we used to replace Secondary is in Sec. 133(a).

Our second amendment: See Footnote 3 as to cost to complete estimates for Interstate apportionments.

Our third amendment includes Interstate transfer substitutes in the cost to complete because we provide that they shall be funded from Interstate apportionments under Sec. 103.

Note. We oppose Administration Interstate apportionment formula which bases one-half of apportionment on cost to complete essential gaps Priority funding for so-called "essential gaps "only creates incentives for

states to increase their apportionments before declaring every gap essential. In the process, it makes Interstate, which is permitted only for non-essential gaps, disadvantageous. States and local areas should be permitted to determine which gaps need completion and which should be transferred, without financial bases created in the federal highway mechanism. See Administration Sec. 304(a) and (b).

Our fourth amendment: See Footnote 3; our Sec. 104(d), apportionment of funds to governor.

Our fifth amendment adopts Administration proposal in Sec. 414(c) increasing the percent of the deduction from apportioned funds for planning purposes (from one-half of 1% to 2%). The method of apportioning such deducted funds contained in existing subsections (f)2 through (f)4 is amended in the Consolidated Planning Fund Sec. 602.

Section 104—Program of Projects

We amend as follows:

(a) Governor or designated planning agency is substituted for the state highway department as the entity submitting programs of projects to the Secretary. We require a single program of projects encompassing projects from both Title 23 and UMTA, instead of just Title 23 projects.

(b) & (c) We provide that all programs of projects must be selected in accordance with the planning process, except for those under subsection (c), emergency relief provision. Current law applies only to urban system projects. Existing Sec. 105(d) is replaced by this provision. We are deleting the requirement that projects be selected with the concurrence of the state highway department.

(d) We provide for submission of programs by the designated planning organizations created by Sec. 134 Planning Process.

(e) New section providing that priority be given to reconstruction of hazardous highways.

(h) Governors or designated planning organizations required to give consideration to projects giving direct access to airports and ports, etc.

(i) New section directing priority be given to projects that save energy, and to carpools and vanpools.

(j) Creates a new subsection requiring that all reasonable alternatives be considered in selecting projects, and that the project selected be one which can feasibly meet the transportation need while eliminating or best minimizing the same adverse factors discussed under subsection 109(h) below. UMTA already requires an alternative analysis, the same should be required for highways. We are also adding another step to the alternatives analysis done by UMTA, by providing the factors to be considered, and by requiring areas to choose the alternative which is most consistent with other critical national priorities. Although the Secretary is required to insure the best alternative is selected, the local areas retain more than a fair share of the responsibility because the alternatives are placed solely within the context of the locally determined transportation needs; also, only the "feasible" alternatives capable of meeting those needs must be considered.

Section 105.—Plans, Specifications and estimates.

Our first amendment repeals reference to 23 U.S.C. 117 certifications of submissions of Plans, Specifications and Estimates of proposed projects (we repeal Sec. 117); see Footnote 3.

Our second amendment modifies subsection (c); see Footnote 1, referring maximum engineering estimates to transportation projects.

Our third amendment repeals subsection (b) which provides that specifications for projects are determined by the state highway department.

Section 106.—Acquisition of Rights-of-way—Interstate System

"State highway department" is replaced by "appropriate agency" as the recipients of deeds for Interstate rights-of-way conveyed by the Secretary.

Section 107.—Advance Acquisition of Rights-of-Way

See Footnote 2, making money available for acquiring rights-of-way. We amend to refer to all federal-aid systems, not just highway systems; (allows advance rights-of-way for transportation, not just highways.)

Section 108.—Standards

Our first amendment applies standards approval (subsection (a)) to all transportation projects, not just highways.

Our second amendment substitutes "Small Urban and Rural" projects for "Secondary" projects. Administration does same but adds word "highway."

Our third amendment modifies subsection (h) to require the Secretary to promulgate new standards regarding the possible adverse, economic, social and environmental effects of new projects. The guidelines cover both UMTA and highway projects. The new guidelines will differ from existing ones in the following ways:

1. in developing projects adverse effects shall be "minimized" instead of existing "fully considered;"

2. final decisions on projects shall take into consideration of "benefits" as well as "costs" of minimizing adverse effects;

3. In addition to those factors currently listed in 23 U.S.C. 109(h), adverse effects are now made to include:

(a) destruction or disruption of important historical and cultural assets.

(b) housing impacts.

(c) excess energy consumption and vehicle miles travelled.

(d) ill-health and traffic accidents.

(e) in minimizing effects of employment and housing effects and tax and property loss, particular attention must be paid to such effects in the inner city.

(f) disruption of the integrity of existing farm units and the practical use of private agricultural land.

(g) "disruption of desirable community and regional growth" is no longer listed as an adverse effect; "destruction or disruption of the availability of public facilities and services" and "adverse employment effects" are also no longer listed as "adverse effects." These three factors, which we delete, can be interpreted to encourage highway construction over alternative modes.

Our fourth amendment modifies subsection (i) to make noise standards applicable to transportation projects and create new revised noise standards for proposed and existing projects. These new standards differ by being made jointly by the Secretary and EPA Administrator. Plans and specifications for new projects must "insure compliance" with the new standards. Regulations are also issued to achieve the new standards by retrofitting existing facilities and areas must take reasonable steps to so retrofit 5% of funds apportioned to areas in violation must be used to retrofit, if feasible. Noise levels of existing projects can also be reduced by stiffer vehicle noise regulations or other means available to states and localities.

Our fifth amendment modifies subsection (j). Current law requires the Secretary, after consultation with EPA Administrator, to promulgate guidelines to assure that highway construction is consistent with air quality implementation plans under the Clean Air Act in areas violating Clean Air Act standards. We require new regulations promulgated jointly by the Secretary and EPA Administrator for all transportation projects. The Secretary may not approve any plan, program of projects, or project unless he finds in consultation with the Administrator that they do not create or exacerbate any violation of ambient air quality, standards, or which omits an important element of a state improvement plan under the Clean Air Act.

Our sixth amendment creates a new subsection (l) existing regulations allow new highway lanes to be built on existing right-of-way without doing an environmental impact statement. Such construction may have a substantial adverse impact and should not automatically be excepted from the environmental impact statement requirement, particularly since extra right-of-way is often purchased around major routes in anticipation of future lane needs.

Our seventh amendment creates a new subsection (m) requiring that new projects provide for safe and convenient crossing points for pedestrians and bicyclists.

Sec. 109—Project Agreements.

Our first amendment—See Footnote 2; project agreements to be made with designated recipients rather than State highway department.

Our second amendment—the state, rather than State highway department, makes agreements with local officials when the local officials are picking up the local costs of the project.

Section 110—Agreements Relating to Use of and Access to Interstate System

Our amendment—See Footnote 2

Section 111—Letting of Contracts

Our first amendment—See Footnote 2.

Our second amendment repeals secondary system reference, same as Administration Section 413(k); and certification (we repeal certification Sec. 117).

Section 112—Prevailing Rate of Wage

Our first amendment applies section to all transportation projects; Administration 413 (1) makes it apply to all highway projects.

Our second amendment—See Footnote 2 for consultation with Secretary of Labor.

Section 113—Construction

Our first amendment modifies to refer to all transportation projects.

Our second amendment—See Footnote 2; refers to supervision of construction of projects and information signs.

Our third amendment repeals certification permission. (We repeal Section 117).

Section 114—Maintenance

Our first amendment—See Footnote 2 regarding requirements to maintain projects.

Our second amendment—See Footnote 2 regarding agreements with counties and municipalities regarding maintenance.

Our third amendment—See Footnote 2 regarding withdrawal of approval for new projects where there has been a failure to maintain existing facilities.

Note: We support Administration Section 413(p) which provides that where counties or municipalities are responsible for maintenance and failure to meet such responsibility, funds for all federal projects (except for Interstate) shall be withheld. Current law limits such cutoffs to *secondary* and *urban* projects.

Our fourth amendment—See Footnote 3 regarding consultation for national bridge and inspection standards; see Footnote 2 regarding requirements to perform such inspections.

Our fifth amendment—See Footnote 2 regarding training for bridge inspectors.

Section 115—Certification Acceptance.

The provision in existing law allowed the Secretary to certify that the state had laws and regulations which accomplished the provisions of federal laws, and where such certification could be made, then the Secretary could discharge his duties under 23 U.S.C. to the state. Since, however, we have added substantive new provisions (in place of procedural provisions) regarding planning, programs of projects and projects compliance

with policy which we establish under such sections, including compliance with federal laws, it is no longer permissible to allow the Secretary to certify such compliance.

Section 116—Availability of Sums Apportioned.

Our first amendment—See Footnote 3 regarding certifying the availability of apportionments.

Our second amendment sums apportioned were available for three years. We make it for two years, after the end of fiscal year for which authorized, as is currently done in UMTA.

Section 117—Federal Share Payable.

Our first amendment—In subsection (a) we support Administration Section 403(a)(1) making all federal system matching ratios 80–20. We amend by:

(a) in current laws, there is an exemption for rail-highway crossings which we eliminate, and in lieu thereof, an exception from the 80–20 matching rates is created for funds authorized for the Interstate system (which we include as including transfers) under Section 108 of the Federal-Aid Highway Act of 1956 (where all Interstate authorizations derive from)

(b) technical reference to Federal-Aid Systems

(c) applies 80–20 to all transportation projects, not just highway projects.

Our second amendment—(a) subsection (f) provision regarding forest, park, public, land, and Indian roads may receive 100% matching ratio. We change from highway to transportation projects.

(b) We strike sentence which allows 100% match for repair or reconstruction of bridges as they use the term "comparable facility" because such term allows replacement of bridges, etc. to a standard higher than that which we allow under the Special Bridge Replacement Provision.

Our third amendment—See Footnote 3 regarding cooperation with the Department of Interior for highways in Indian reservations and national parks.

Our fourth amendment—limitation of operating subsidies as is done under UMTA Section 5(f). Under current law, this limitation is 50% of funds apportioned; we support Administration bill which provides that such limit is 33⅓% of actual operating expenses.

Section 118—Payments to States for Construction.

Our first amendment payments go to designated recipient rather than states.

Our second amendment—See Footnote 3 regarding the appropirate officials to receive public funds for the states.

Section 119—Bond Retirement.

Technical references to appropriate federal systems.

Section 120—Relocation of Utility Facilities.

State is defined as also designated recipients to receive funds for utility relocation.

Section 121—Advance to States.

See Footnote 2 regarding early payments to states for construction proceeding faster than money is distributed (i.e., borrowing from future apportionments).

Section 122—Emergency Relief.

Delete provision that 60% of funds from Highway Trust Fund and 40% from general treasury. Administration Section 409 makes 100% come from Trust Fund after FY 1978.

Section 123—Public Hearings.

See Footnote 2; designated recipient to conduct public hearings.

Section 124—Toll Roads, Bridges, Tunnels and Ferries.

We extend Sec. 129 to permit tolls on highways designed to discourage rush hour traffic. We disallow use of the tolls raised from being spent on new highways.

The Clean Air Act recommends use of rush hour tolls as a traffic control device in "non-attainment areas", but 23USC disallows such tolls.

Section 125—Small Urban and Rural System.

Adopt Administration proposal (Section 405); we make one change: apportionments should be available for two years after the fiscal year for which authorized, as we provided for other federal systems; Administration provides for three years.

Section 126—Planning.

(a) We add requirements for five-year plans in addition to long-range plans; a single plan rather than a highway plan "properly coordinated" with plans for other modes. Plans and programs are required to reasonably address transportation needs while minimizing the adverse effects contained in 105(j) and 109(h). The plan and programs are to identify those elements which minimize such adverse effects. The Secretary must substantively review plans and programs for compliance.

The Administration requires in their Section 134(a) that plans for cities over one-million in population be substantively reviewed by the Secretary (see Administration Amendments Section 603). We have applied substantive review to all plans and delineated, more specifically, the factors to be considered in such a review.

We adopt Administration language of their 134(a) requiring analysis of alternative system management and investment strategies for all plans.

The Administration also requires multimodal plans and programs for all areas; and that such plans and programs give "due consideration" to generally stating social goals and objectives. They also require that the process be continuing, comprehensive and cooperative "to the degree appropriate." We require the same, but delete "to the degree appropriate." Administration deletes sentence requiring that local officials "be consulted and their views considered" with respect to proposed project. We move the sentence elsewhere in the section.

The Administration requires the Secretary to review plans and programs for cities over one million to be sure that they "reasonably address" other delineated non-transportation factors. In their Section by Section analysis, DOT interprets this to mean that the plan or program should "affirmatively use transportation to achieve other national and local objectives," and we adopt this language in our own subsection (a). We also go a step further in requiring minimization of adverse effects within the context of "reasonably addressing transportation needs."

(b) We redesignate existing (b) as (h); our subsection (b) does not adopt the Administration's recommendation that there be a statewide planning process which integrates the plans of all areas under one million. We do not necessarily oppose their recommendation, we simply take no position on the relationship of local planning to statewide planning.

(c) We require reapproval of plans when they have been significantly changed; also require annual public hearings on the plan, and we insert a sentence from existing (a) (which the Administration deleted) requiring that local officials be consulted about the location and design of projects.

(d) We require a single intermodal program of projects; programs of projects are governed by Section 105; the Administration provides for separate programs of projects under Title 23 and UMTA and only Title 23 projects are governed by Section 105.

(e) Provides requirements for approval of plans, including:

plan must reasonably meet transportation needs;

adequate reporting and record keeping;

fiscal control procedures;

adequate funding for maintenance of the planning process;

compliance with community development plans;

compliance with state and federal environmental laws and energy conservation programs.

In determining compliance with such laws, plans and programs, the Secretary shall rely on representations from appropriate state, local and federal agencies as to whether or not the transportation plans do comply with such laws. Plans must also provide an analysis of social, economic and environmental effects and steps to minimize adverse effects on same.

(f) When Secretary funds a substance change in plan such that an area no longer complies with Title 23, or UMTA, the Secretary shall make no further payments on either any project or on those projects which are in violation, until the area is again in compliance.

(g) Provides expedited court review for suits of governors and members of designated planning organizations to review final actions by the Secretary.

(h) Redesignated (b) and Administration (e). We add (to section permitting designation of critical transportation regions and planning for them) that nothing in Title 23 or UMTA should preclude planning jointly by two or more states or contiguous urbanized areas. Such cooperation is to be encouraged.

Note: We support Administration Section 410 which merges funds with Outdoor Advertising Program and raises matching ratios from 75 to 80 percent.

Section 127—Enforcement of Requirements—Vehicle Weights

Change reference from Secondary to Small Urban and Rural.

Section 128—Public Transportation

The existing section enables the Secretary to approve public transportation projects under Title 23. Much of the language is now superfluous.

New Subsection (a) replaces existing (a)(b) and (c). It authorizes Title 23 to finance any public transportation project that can be financed under Title 23 or UMTA; provides that fees at parking facilities constructed with federal funds cannot exceed what is necessary for maintenance and operation; we exclude exclusive and preferential bus and truck lanes on Interstates from the requirement that all Interstate projects be four lanes wide.

Our Subsection (b) is existing (d) amended to include UMTA Planning with regard to establishing routes and schedules (i.e., they must be based on planning process).

Our Subsection (c) is existing (e), technically amended to provide exception to provision of the Highway Trust Fund enabling law which prohibits HTF from financing anything but highways.

We delete existing (f), (h) and (j) because they are covered by the cross reference section (new subsection (f)).

We retain existing (a), our subsection (d), providing that highway rights-of-way space can be donated to public transit authorities for transit purposes.

Our subsection (e) we retain provision (i) providing that Title 23 transit funding is supplemental to, and not in substitution for UMTA funds.

We repeal (k) which provides that transit cannot be funded from Title 23, "in any year when there has been enacted an Urban Transportation Fund or similar assured funding for both highway and public transportation."

We create new (f) to cross reference UMTA and Title 23 and provide that regulations for

transit projects in Title 23, be the same as those under UMTA.

Section 129—Special Bridge Replacement Program

Administration Section 411, which we support, to allow rehabilitation in addition to replacement of unsafe bridges. We add new subsection designed to prevent funds under this section from being used to increase capacity; such increases in capacity can be funded under other provisions of law but should not come from safety funds. Increases in capacity, however, are permitted to allow safe use of bridges by today's heavier farm equipment.

Note: We support Administration Section 406(b). This new section created largely from existing laws.

Section 130—Priority Primaries

We support Administration repeal of Priority Primaries otherwise known as the "Junior Interstates".

Section 131—Allocation of Urban System Funds

(a) We provide that urban system funds are allocated to the urbanized areas rather than earmarked for them by the state. Current law provides for intrastate apportionment of a fair and equitable basis for areas 200,000 or more in population, or where there is no such formula on the basis of population. We provide that money for all urbanized areas be allocated on the basis of population and that the current "fair and equitable" provision be used for cities 5,000 to 50,000 in population. Administration allocates money directly to areas 200,000 or more, and allows a "fair and equitable" formula to govern the remaining urbanized areas.

(b) We provide that funds for areas 200,000 or more are apportioned for designated recipients. (UMTA already requires designated recipients for 200,000 or more.) The designated recipient must demonstrate capacity to administer programs and have suitable powers and organization to be designated as a recipient; the state may be the designated recipient if agreed to by state and local officials; Administration 406(i) makes the same provision for cities over one million but does not require them to demonstrate capacity.

(c) Funds allocated to an urbanized area, on approval of local officials and the Secretary, may be transferred for use in any other area of the state. Same as Administration Section 406(i).

Note: We support Administration repeal of Section 155 Access Highways to Public Areas on Certain Lakes.

Section 132—Bicycle Projects and Pedestrian Walkways

We amend existing law to make it a discretionary categorical grant program at $45 million per fiscal year ('79 to '82) (current law allows up to $45 million to be used, as part of other project costs, for this purpose); such projects need not be in conjunction with other federal projects; we clarify existing law to permit bicycle lanes on existing facilities or separate bicycle paths; we add, as an eligible use, money for support facilities.

Requires Secretary to establish regulations for construction standards.

Section 133—State Highway, Departments

We create requirement, after October 1, 1980, for a single state transportation agency to serve functions currently required of state highway departments and other transportation programs.

Note: We support Administration provision directing the Secretary to prepare a plan to merge UMTA and FHWA.

Section 134 (Administration Section 602—Consolidated Planning Fund)

(a) Secretary makes grants to states and designated planning organizations for plans and programs required under Title 23, and UMTA; funds come as sums apportioned under those Acts, Administration limits direct grants to areas over one million in population.

(b) We provide that the Secretary may waive the 80-20 federal match for planning funds. Ninety percent of funds available are distributed to states in the ratio of their apportionments. Minimum of one-half of 1 percent to each state; remainder distributed on a discretionary basis and available for Planning R&D. Administration provides for the same matching ratio, gives Secretary discretion on distribution formula.

(c) Secretary shall make available funds to urbanized area designated MPO's on the basis of funds apportioned under (b) that are attributable to the urbanized area.

The Administration provides allocation of funds by the state to urbanized areas between 200,000 and one million in population. Urbanized areas less than 200,000 in population receive funds in a fair and equitable manner.

TITLE II—TERMINATION OF HIGHWAY TRUST FUND

Section 201.—Repeals the Highway Trust Fund and provides funding from general revenues for Title 23 programs.

FOOTNOTES

[1] Substitute "Transportation" for "Highway"; we make 23 U.S.C. totally intermodal—that is all federal-aid systems are eligible for use on public transportation projects.

[2] Substitute "designated recipient" for "State Highway Department": bill established designated recipients to receive and disburse funds which may, or may not be the state highway department, so where the context can be applied to agencies that will receive funds which may not be SHD, then we substitute designated recipients for the SHD. See Section 150 for explanation of designated recipients.

[3] Substitute "Governor" for "State Highway Department." Many policy and planning decisions formerly exercised by SHD will no longer be so exercised in Planning and Programming of projects, and since transit is now eligible, the Governor should be given authority to exercise those policy and planning decisions.●

---

By Mr. FORD:

S. 2954. A bill to amend the Communications Act of 1934 in order to protect the rights of the general public in the television broadcasting of major sports events; to the Committee on Commerce, Science, and Transportation.

TELEVISION BROADCASTING OF MAJOR SPORTS EVENTS

Mr. FORD. Mr. President, today I am introducing a bill that will provide the Federal Communications Commission the authority to respond quickly—when necessary—to situations of imminent or actual sports siphoning by pay television and pay cable.

I feel strongly that major college and professional sports should be television attractions available to all viewers without additional charge. My legislation would eliminate the potential for offering such events to a limited number of pay cable or over-the-air subscription television subscribers for a nominal charge.

For example, by drawing relatively small audiences for selected television attractions, pay television could conceivably outbid broadcast television for popular sports attractions and remove them or "siphon" them from broadcast television. Such siphoning of programs from broadcast television would be detrimental to the public in that some major sports events now available would be restricted to an audience composed of subscribers.

Before the recent HOME Box Office case, the FCC anti-siphoning rules were unnecessarily complicated and potentially restrictive to the future development of cable. Home Box Office, Inc. against Federal Communication Commission, No. 76–1280 (D.C. Cir. March 25, 1977), cert. denied, 46 U.S.L.W. 3216 (U.S. Oct. 3, 1977).

In brief outline, the FCC pay cable rules differentiated between "specific" and "non-specific" events. Specific events such as the World Series, the All-Star Game and the Super Bowl could not be shown on pay cable if they had been telecast in a given market during any one of the last 5 years.

With regard to "non-specific" events, the number of games of a given team available to pay cable turned on that team's telecast experience. The critical element in evaluating the games available for pay cable was whether a "substantial number" (25 percent) of that club's home or away games had been telecast. Where a "substantial number" had not been telecast in any one of the 5 preceding years, pay cable essentially could use all of a team's games not shown on television. Where a substantial number of home or away games had been telecast in any one of the 5 preceding years, pay cable could use only one-half of the "overage"—the games not shown on TV.

A further complication involved the "proportional reduction rule" where the number of games otherwise available to a pay cable system were automatically reduced by the same proportion as any reduction in the current television package of that particular team.

Obviously, these rules, directly limited the number of games undistributed by broadcast television that were available to pay cable. This resulted in loss to the public of untelecast games.

The court in the Home Box Office case found the regulations were invalid because the record failed to establish that an actual problem existed, and furthermore, that the imposed restrictions were greater than necessary to further the Government interests.

According to the language of the case, a regulation envincing a governmental interest unrelated to suppression of free expression has been valid if such regulation furthers an important or Government interest and any incidental restrictions on alleged first amendment freedoms are no greater than essential to furtherance of that interest.

In order to demonstrate these requirements the Commission must convincingly demonstrate by the record that: First, a problem exists and siphoning of programs is a real threat to those not served by cable; second, the regulations are addressed to the problem; and, third, the regulations do not create restrictions "greater than is essential" to address the problem.

My bill statutorily extends the Commission's jurisdiction over the problem.

Any regulations the Commission may issue under such a statute, however, would still have to meet constitutional first amendment requirements:

Where the first amendment is concerned . . . a presumption of siphoning must be clearly supported by the record in order to justify rules to regulate the problem. Prior restraints on speech are heavily disfavored and can be sustained only where the proponent of the restraint can demonstrate a need.

This legislation, requiring an evidentiary finding by the Commission that the programing is actually being withdrawn or denied or imminently withdrawn or denied to substantial segments of the public, would avoid such prior restraints on speech without justification. Further, the legislation is to be limited to such antisiphoning purposes with the burden of proof on the party raising the issue.

The question of potential sports siphoning is one that creates negative feelings toward the pay television industries. By acting on this question now instead of reacting later to a confrontation, the pay television industries will avoid being subjected to an overly negative reaction, and, most importantly, the public interest will be served.

---

By Mr. RANDOLPH (for himself, Mr. STAFFORD, Mr. HEINZ, and Mr. WILLIAMS):

S.J. Res. 127. A joint resolution designating September 10 through September 17, 1978 as "National Rehabilitation Week"; to the Committee on the Judiciary.

NATIONAL REHABILITATION WEEK

● Mr. RANDOLPH. Mr. President, as chairman of the Subcommittee on the Handicapped, I will bring before this body in the very near future the "Rehabilitation Amendments of 1978." It is, therefore, appropriate that I ask your attention to a joint resolution designating September 10–17, 1978, as "National Rehabilitation Week." During this 95th Congress, the subcommittee has held 18 days of hearings on programs for the handicapped which are within the jurisdiction of the subcommittee. As a result of these hearings we must face the fact that the handicapping conditions of Americans in this country are a major national education, health, social, and economic problem. Fifty million Americans have physical, intellectual, or emotional handicaps that noticeably limit their ability to carry on life's functions. The needs of these handicapped Americans deserve a high priority not only in the Congress but with the administration as well. The time has come to develop a national policy that raises excellence in rehabilitation and special education to the level of a moral issue and a good investment. It is my hope that this resolution will foster a cooperative effort to bring all of our resources to bear on providing the services necessary to all handicapped Americans. We must not deprive the Nation of their productivity and creativity.●

● Mr. WILLIAMS. Mr. President. I am pleased to join with my distinguished colleague, Senator Randolph, in introducing a resolution to proclaim the third week in September as "National Rehabilitation Week."

The purpose of this observance would be to make the people of the Nation more aware of the immense reservoir of talent that handicapped persons offer and of the rehabilitation services that make it possible for the disabled to utilize their talents to the fullest.

In recent years, Mr. President, there has been a demonstrated commitment to securing the rights and meeting the needs of disabled Americans. Through such laws as Pubic Law 94–142, the Education for All Handicapped Children Act, and through the nondiscrimination provisions of section 504 of the Rehabilitation Act of 1937, we have affirmed those rights and attempted to meet the most important of those needs. We have declared that disabled persons have the right to receive an education, to become employed, and to have access to a myriad of public services that many able-bodied Americans take for granted.

If these affirmations are to be transformed into reality throughout the Nation, the general public must have a greater understanding of the unique problems and unusual barriers that face disabled persons. A national rehabilitation week observance would provide a forum for developing that understanding and for examining popular perceptions of rehabilitation and of disabled persons.

Through efforts of this kind, the concept of rehabilitation, and the challenges it addresses, will be accepted not as something for people who are "different", but as a wholesome process by which disabled Americans are allowed to reach their full human potential.

I am pleased, therefore, to cosponsor this resolution, and I look forward to the activities that will occur during "National Rehabilitation Week."●

---

## ADDITIONAL COSPONSORS

S. 2540

At the request of Mr. RIEGLE, the Senator from New York (Mr. MOYNIHAN), and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of S. 2540, the Food Amendments Act of 1978.

S. 2627

At the request of Mr. GRAVEL, the Senator from New Jersey (Mr. WILLIAMS), the Senator from Utah (Mr. GARN), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from California (Mr. CRANSTON), the Senator from South Dakota (Mr. ABOUREZK), the Senator from South Carolina (Mr. THURMOND), the Senator from New Mexico (Mr. DOMENICI), the Senator from Wyoming (Mr. WALLOP), the Senator from Connecticut (Mr. WEICKER), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from New Hampshire (Mr. DURKIN) were added as cosponsors of S. 2627, the deferred composition bill.

S. 2726

At the request of Mr. RIEGLE, the Senator from Maryland (Mr. SARBANES), the Senator from Maine (Mr. HATHAWAY), and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of S. 2726, the Housing Conservation Act of 1978.

S. 2921

At the request of Mr. BARTLETT, the Senator from Oklahoma (Mr. BELLMON) was added as a cosponsor of S. 2921, a bill to amend the Internal Revenue Code of 1954 to reduce the excise tax based on investment income of private foundations.

SENATE JOINT RESOLUTION 65

At the request of Mr. KENNEDY, the Senator from New Jersey (Mr. CASE) was added as a cosponsor of Senate Joint Resolution 65, a joint resolution to amend the Constitution to provide for representation of the District of Columbia in the Congress.

SENATE JOINT RESOLUTION 111

At the request of Mr. GLENN, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Alaska (Mr. STEVENS), the Senator from North Carolina (Mr. MORGAN), the Senator from Oregon (Mr. MARK O. HATFIELD), and the Senator from New York (Mr. JAVITS) were added as cosponsors of Senate Joint Resolution 111, a parliamentary exchange with Japan.

SENATE JOINT RESOLUTION 116

At the request of Mr. PROXMIRE, the Senator from Illinois (Mr. STEVENSON) was added as a cosponsor of Senate Joint Resolution 116, to declare June 4 through 10, 1978, to be "National Neighborhood Week."

SENATE JOINT RESOLUTION 118

At the request of Mr. JOHNSTON, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of Senate Joint Resolution 118, to declare an Emergency Medical Services Week.

AMENDMENT NO. 1788

At the request of Mr. MELCHER, the Senator from Montana (Mr. PAUL G. HATFIELD) was added as a cosponsor of Amendment No. 1788, intended to be proposed to S. 2493, the Airline Deregulation Bill.

---

## SENATE RESOLUTION 435—SUBMISSION OF A RESOLUTION AUTHORIZING PRINTING

Mr. RANDOLPH submitted the following resolution, which was referred to the Committee on Rules and Administration:

S. RES. 435

*Resolved*, That the annual report to the Administrator of the Environmental Protection Agency to the Congress of the United States (in compliance with sections 202, 306(e), and 313 of Public Law 91–604, the Clean Air Act as amended) entitled, "Progress in the Prevention and Control of Air Pollution in 1977" be printed, with illustrations, as a Senate document.

Sec. 2. There shall be printed five hundred additional copies of said document for the use of the Committee on Environment and Public Works.

---

## SENATE RESOLUTION 436—SUBMISSION OF A RESOLUTION AUTHORIZING PRINTING

Mr. RANDOLPH submitted the following resolution, which was referred to

the Committee on Rules and Administration:

S. RES. 436

*Resolved*, That the annual report of the Secretary of Transportation to the Congress of the United States (in compliance with section 144, title 23, United States Code), entitled "Special Bridge Replacement Program, Seventh Annual Report," be printed, with illustrations, as a Senate document.

Sec. 2. There shall be printed seven hundred additional copies of said document for the use of the Committee on Environment and Public Works.

## SENATE RESOLUTION 437—ORIGINAL RESOLUTION REPORTED TO PAY A GRATUITY

Mr. PELL, from the Committee on Rules and Administration, reported the following original resolution, which was placed on the calendar:

S. RES. 437

*Resolved*, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Kristin T. Atkinson, widow of Marshall L. Atkinson III, an employee of the Senate at the time of his death, a sum equal to five months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

## NOTICE OF HEARINGS

SUBCOMMITTEE ON ARMS CONTROL, OCEANS AND INTERNATIONAL ENVIRONMENT

● Mr. PELL. Mr. President, the Subcommittee on Arms Control, Oceans and International Environment of the Committee on Foreign Relations will hold a hearing tomorrow on the fiscal year 1979 authorization for the Arms Control and Disarmament Agency. The hearing will be held at 10 a.m., in room 4221. The Honorable Spurgeon M. Keeny, Jr., Deputy Director of the Arms Control and Disarmament Agency, will testify. Subcommittee markup of the ACDA authorization bill will follow Mr. Keeny's testimony.

At that markup, I intend to introduce an amendment to the ACDA bill which will improve and strengthen the arms control impact statement process, which was established in 1975 in an amendmen to the Arms Control and Disarmament Act. Under that provision, the executive branch is required to submit to the Congress arms control impact statements on nuclear and major nonnuclear defense-related programs. In mid-March, the Senate received arms control impact statements on fiscal year 1979 requests for authorization and appropriation of defense and nuclear programs.

As chairman of the Subcommittee on Arms Control, Oceans and International Environment, I have followed the arms control impact statement procedures closely, and have sought ways to make the process more useful to the Congress and the public. Following receipt of the latest package of the arms control impact statements, I asked the subcommittee staff and the Congressional Research Service to study the submissions. On the basis of that study and my own analysis of the statements, I have concluded that, although the new statements are substantially better than the statements received for fiscal years 1977 and 1978 programs, further refinement of the process is necessary.

My amendment would make procedures more manageable and help insure that the executive branch meets the deadlines specified and that unclassified versions of the statements are available at an early date. At present, the Committee on Foreign Relations is still endeavoring to get sanitized versions of these statements printed and available to members of the general public. Under my amendment, these unclassified statements would be available early in the year, so that they can be used to the fullest extent possible by the committees handling authorization and appropriation of the programs involved and by the Senate, when the bills come to the floor. In addition, materials would be available much earlier to interested members of the public.

We have not yet realized the full potential of arms control impact statements. They can be an important ingredient in the decisionmaking process in Congress and the executive branch. In addition, they can serve the general public as a comprehensive and balanced assessment of key nuclear and defense programs.●

SUBCOMMITTEE ON ENERGY CONSERVATION AND REGULATION

● Mr. JOHNSTON. Mr. President, on Friday, April 21, 1978, the Subcommittee on Energy Conservation and Regulation of the Committee on Energy and Natural Resources will hold a hearing on the President's budget request for the Energy Information Administration. The hearing will commence at 10:00 a.m., in room 357, Russell Senate Office Building.

Questions about this hearing should be addressed to Benjamin S. Cooper or James T. Bruce of the subcommittee staff at 224-9894.●

SELECT COMMITTEE ON SMALL BUSINESS

● Mr. NELSON. Mr. President, I wish to announce that the Select Committee on Small Business has scheduled a hearing on Tuesday, April 25, 1978, at 1:00 p.m., in room 424 of the Russell Senate Office Building, on the nomination of Milton D. Stewart, of New York, to be Chief Counsel for Advocacy of the Small Business Administration.●

SUBCOMMITTEE ON RURAL DEVELOPMENT

● Mr. CLARK. Mr. President, I wish to announce that the Subcommittee on Rural Development of the Committee on Agriculture, Nutrition and Foresty will hold oversight hearings on rural development on Tuesday, April 25, beginning at 10 a.m., in room 324, Russell Building. The subcommittee has invited Assistant Secretary of Agriculture Alex Mercure to testify on USDA's efforts in this area. Anyone wishing to further information should contact the committee staff at 224–2035.●

COLLECTIVE RATEMAKING IN THE TRUCKING INDUSTRY

● Mr. KENNEDY. Mr. President, the Subcommittee on Antitrust and Monopoly of the Judiciary Committee will be conducting additional hearings during April and May as part of its continuing investigation of rate-setting practices in this Nation's trucking industry.

The hearing dates are as follows:

April 26, 1978: rm. 2228, 9:30 a.m.

Witnesses include Chairman A. Daniel O'Neal of the Interstate Commerce Commission, and other ICC personnel.

May 15, 1978: 2228 Dirksen: 10 a.m.

Witnesses include representatives of major shipper organizations, and individual shippers.

May 22, 1978: rm. 2228; 10 a.m.

Witnesses include transportation economists and other expert witnesses.

Full witness lists for each day will be available from the subcommittee offices 48 hours in advance of each hearing.●

COMMITTEE ON THE JUDICIARY

● Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I wish to give notice that a public hearing has been scheduled for Thursday, April 27, 1978, at 9:30, in room 2228 Dirksen Senate Office Building on S. 1382, a bill to establish rational criteria for the imposition of the sentence of death, and for other purposes.

Additional information on the hearing may be obtained by calling the committee.●

SELECT COMMITTEE ON SMALL BUSINESS

● Mr. NELSON. Mr. President, I wish to announce that the Select Committee on Small Business will hold a hearing on S. 836 (to amend title IV of the Small Business Investment Act of 1958) on Friday, April 28, 1978, at 9:30 a.m., in room 424 of the Russell Senate Office Building. The Senator from Oklahoma (Mr. BARTLETT) will chair the hearing.

Further information can be obtained from the committee office at 224–5175.●

## ADDITIONAL STATEMENTS

### RELIEF BILL FOR PRANAS AND ALGIRDAS BRAZINSKAS

● Mr. DOMENICI. Mr. President, I wish to bring to the attention of my colleagues the plight of Pranas and Algirdas Brazinskas.

For 30 years Pranas Brazinskas fought for rights of freedom and self-determination in the Lithuanian underground. He has endured torture in the dungeons of the infamous Liublianka Prison; he has survived exile in the barren Siberian wastelands and he has suffered repeated torture and arrests.

Finally in October of 1970, he escaped from a concentration camp and, leaving his wife and daughter behind, but taking his young son, attempted to reach freedom in the West. He hijacked a Soviet jet and forced it to land in Turkey. Sadly, a stewardess was slain and a pilot wounded during exchange of gunfire with KGB agents aboard the craft.

On October 17, 1970, an Istanbul court ruled that the Brazinskases had political motives for their action and were entitled to go free.

March 8, 1971, due to extreme pressure from the Soviet Government, a special commission was formed to deal with the Brazinskas case and it voted to return them to the Soviet Union.

There occurred a change in govern-

ment on March 12, 1971, and the new regime changed the policy on extradition. The Brazinskases would be allowed to stay in Turkey, but in July were imprisoned as a consequence of the hijacking.

May 21, 1974, while incarcerated, general amnesty was declared in Turkey, but as they had no place to go, they were forced to spend the next 2 years in a refugee camp in Turkey, under guard.

Then in early June 1976, amidst the tensions of the Cyprus situation and the rapidly deteriorating relations between Turkey and the West, a Turkish official told the Brazinskases that the Turkish Government had secretly decided to return them to the Soviet Union. That afternoon they escaped from the camp through a trapdoor.

By August 24, 1976, they had made their way to America and in September they had applied for political asylum in the United States.

And what was the response of our State Department and the Immigration and Naturalization Service? The Department of State, referring to an aide-memoir presented by the Embassy of the Union of Soviet Socialist Republics, refused political asylum and both were subject to deportation proceedings. By April 11, 1977, Algirdas Brazinskas appeared before an immigration judge in Boston and was ordered to be deported to Lithuania, pending appeal.

Mr. President, many of us in the Senate for many years have in the advocation of freedom for the Baltic States and other Eastern European nations cited examples of Soviet suppression of rights and offered hope and promise to those oppressed. This country has never accepted Soviet domination of Eastern Europe and the Baltic States. Yet, when those who have suffered and endured the vilest of mankind's physical and mental degradation arrive on our shores, our Government in an inordinate accommodation to the Soviet Union, wants to deport them.

There is an essential point I want to emphasize. The United States unilaterally opposes the use of hijacking tactics for any purpose. As a party to the Hague Convention, we recognize such acts to be criminal and we subscribe to the principle that the perpetrators of such acts should be prosecuted.

In the case of Algirdas and Pranas Brazinskas, they have been arrested, prosecuted, and imprisoned for their acts. Released under a general amnesty they have been judged and have paid their decreed debt. Justice has been served.

Yet, our State Department and the INS want to force them back to the Soviet Union and certain death.

I have introduced private bills for the relief of Pranas and Algirdas Brazinskas which would allow them to remain in this country as lawfully admitted. Congressman DORNAN of California, who has rallied many Members in the House to this cause, has done likewise.

Senator LUGAR is a cosponsor of these bills and I invite my other colleagues to join as cosponsors.

The fate of Pranas and Algirdas, Mr. President, will communicate to the peoples of Europe our dedication as the citadel of freedom and hope for the oppressed. Or it will communicate to what extent this administration is willing to accommodate the Soviet Union. For those who love freedom, there can only be one answer.●

## GASOHOL ATTRACTS ATTENTION

● Mr. CHURCH. Mr. President, over the past year the Senate has become increasingly aware of the significant potential inherent in the use of alcohol/gasoline fuel blends, commonly known as "gasohol."

We have witnessed the unrelenting escalation of our imported oil costs. The detrimental impact of paying billions to foreign countries for our liquid fuel needs is inescapable and simply cannot continue to grow unabated. It is equally clear that the hard times being experienced by our farmers must be faced. It is this pressing mix of farm and energy problems that has focused our attention on the gasohol concept.

Producing alcohol from a wide range of renewable resources is not a new idea. On February 1, 1917, Alexander Graham Bell, one of our Nation's most prolific inventors, delivered an address to the graduating class of the District of Columbia's McKinley Manual Training School. In this address, Bell told the young graduates:

> Coal and oil are going up and are strictly limited in quantity. We can take coal out of a mine, but we can never put it back. We can draw oil from subterranean reservoirs but we can never refill them again.
>
> Alcohol makes a beautifully clean and efficient fuel . . . we can make alcohol from sawdust, the waste product of our mills . . . from cornstalks, and in fact from almost any vegetable matter capable of fermentation. Our growing crops and even weeds can be used. The waste products of our farms are available for this purpose, and even the garbage from our cities.

In today's environment of rising imported energy costs, the need to develop additional farm markets and come to grips with urban waste disposal, Alexander Graham Bell's advice carries the weight of an idea who's time has come.

Mr. President, in February I introduced S. 2533, the Gasohol Motor Fuel Act of 1978. This bill provides for the expeditious introduction of gasohol blends, drawing on renewable resources to produce the necessary alcohol. I am pleased to have been joined in this effort by Senators JAVITS, NUNN, and THURMOND.

Since the introduction of this bill, there has been an increased interest in the gasohol concept. A column which appeared in today's Washington Post by Jack Anderson provides a summary of recent gasohol activities. I ask that this column be printed in the RECORD.

The column follows:

[From the Washington Post, Apr. 14, 1978]

CARTER SERIOUS ABOUT ALCOHOL FUELS

(By Jack Anderson)

In a dramatic turnabout, President Carter is now getting serious about alcohol fuels, which could help solve the energy crisis, stabilize farm prices and reduce the outpouring of dollars to the oil potentates.

Previously, Carter had virtually ignored the proven potential of alcohol fuels. His 103-page energy message devoted only a single sentence to alcohol fuels, giving them the official brushoff.

Deputy Energy Secretary John O'Leary dismissed the concept of alcohol fuels as a "myth," even though they had been used to power jet fighters in World War II and to run automobiles as far back as the 1930s.

But government experts slipped around to see us behind the backs of their superiors. They told us that alcohol could provide 72-cent-a-gallon fuel for American motorists. This would be no more than premium gasoline is expected to cost by the time the alcohol plants are constructed.

The money would also be spent in the United States, thus stimulating prosperity at home instead of enriching the oil sheiks. A blend of alcohol and gasoline, called "gasohol," could compete directly with the conventional product. The new gasohol would also require no engine modifications.

This high-octane product could be produced from alcohol derived from timber wastes, corn stalks, coal, garbage, even sewage. Farm-belt senators would like the priority placed on extracting alcohol fuels from surplus farm products.

The strongest opposition has come from the oil industry, whose lobbyists are maneuvering behind the scenes to block the development of alcohol fuels in the United States. The oil companies, of course, want to keep the nation hooked on oil until their wells have been drained.

Putting profits ahead of the national welfare, the oilmen are whispering into congressional ears that alcohol fuels would create technological and economic problems. A Chevron lobbyist made so many inaccurate statements that a Senate aid drafted a point-by-point response and mailed it to the company.

Mobil Oil issued a detailed rebuttal to a report, favorable to alcohol fuels, from the Senate Republic Policy Committee. Mobil not only blasted the report but offered its own patented process for converting alcohol into gasoline. This process would be so costly that it would become no immediate threat to Mobil's petroleum refineries.

From California to Nebraska, oil lobbyists are actively trying to thwart programs to develop alcohol fuels at the local level.

We wrote a series of articles, meanwhile, suggesting that alcohol fuels might be the most readily available solution for the energy crisis. Our stories stirred up strong support from concerned Americans. A blizzard of mail hit our office, including copies of letters to the White House and Congress. The response from the public is beginning to have its effect. Here's what's happening:

Twenty senators wrote a joint letter to both Energy Secretary James Schlesinger and Agriculture Secretary Bob Bergland, urging them to undertake an "immediate and comprehensive effort to tap the potential of our nation's renewable resources."

Sen. Frank Church (D-Idaho) caught the ear of President Carter at the White House. Church explained that under a bill he was sponsoring, grain alcohol fuel blends could be available at service station pumps by 1981. According to Church, the President was "very interested" in the proposal but skeptical about the marketplace economics.

Nonetheless, the project is belatedly getting some sudden attention inside the Energy and Agriculture departments. The White House has set up a special interagency task force to consider the possibilities of introducing alcohol fuels on the American scene.

Energy officials surprised the Senate Appropriations Committee by testifying they were planning "action oriented" alcohol fuel programs "aimed at making things happen." At long last, they conceded that the new fuel process could also reduce our foreign oil dependency, cut down on air pollution and help eliminate our waste problem.●

## THE SHEEPMEN

• Mr. HANSEN. Mr. President, frugality, industry, and keen business instinct are some of the characteristics for which Wyoming sheep ranchers of Basque ancestry are known. An article in the Friday, April 14, Wall Street Journal focuses on the Iberlin brothers' sheep operation near Buffalo, Wyo., and the economic hardships which the long-depressed sheep industry has suffered. Of special interest are the difficulties which the predator problem has created. I believe the comments made by the Iberlin brothers about the coyote and the animal's effect on their industry are especially noteworthy and deserving of the Senate's attention. I ask that this article be printed in the RECORD.

The article follows:

IBERLIN BROTHERS FIGHT LOW PROFITS, PREDATORS AS SHEEP MARKET RISES

(By Kenneth G. Slocum)

BUFFALO, WYO.—Sheep rancher Simon Iberlin stands near a curiously shaped rock formation where the rugged Big Horn Mountains drop off into rolling brown hills and sagebrushed canyons. Sweeping a tanned hand across the treeless horizon, he says, "We Basques own everything for 50 miles. The sheep has been good to us and is getting better."

Mr. Iberlin's optimistic observation, almost startling for the long-depressed U.S. sheep industry, points up both a current economic trend and a colorful chapter of Western history. The economic lot of sheepmen is considerably improved, although sheep raisers still are plagued with predators, labor scarcity and low profit margins. But sheep ranching here in Johnson County—the leading sheep-raising county in a state second only to Texas in sheep production—is more than just an ailing industry on the mend. It represents survival of a centuries-old way of life for one of America's least-known groups of immigrants, the Basques. And it presents an unusual melding of untouched European tradition with Western savvy and Yankee entrepreneurship.

Sheepmen generally have ample cause for optimism after decades of hard economic times that saw the industry shrink to 12.7 million head of sheep today from 56.2 million in 1942. Now, freshly shorn wool, stimulated by the turn of U.S. fashion to the natural-fiber look, is bringing 72 cents a pound, up from 19 cents a pound seven years ago, and, according to government sources, could reach a record 80 cents to 85 cents in the next few years. Because of the diminished supplies, choice slaughter lambs on the San Angelo, Texas, market sell for about $72 a hundredweight today, up from $56 three months ago and $24 in 1971, even though lamb and mutton consumption in the U.S. is less than half of what it was in the mid-1960s.

"Pricewise, we're in the best shape in 20 years," says William Bonde, president of the National Woolgrowers Association, a trade group. "And there's a real scramble for breeding stock as people move back into the sheep business." For instance, he says, six-year-old breeder ewes, which two years ago would have brought $18 each, went recently for more than $50 each at a sale in Champaign, Ill.

In no place is there more happiness over the sharp economic upturn than in Johnson County, an "open sky" land of 6,000 people where half the 4,175 square miles is owned by 200 immigrant Basques or their offspring. And none here are happier than Simon Iberlin, 55, and his brother John, 48 whose ranch typifies the improvement of the industry as well as the painful problems still facing all U.S. sheepmen.

Like most U.S. sheep ranchers, Simon and John Iberlin grew up on a sheep ranch. Their father, also named John, emigrated in 1905 from the Basque country in the Pyrenees, the mountainous area straddling the border of Spain and France. At the age of 27, he walked off the boat in New York with only his clothes and railroad fare to Wyoming. There, he worked as a sheepherder, sleeping in a sheep wagon, eating company rations and squirreling away his meager earnings. After 10 years of that, he had enough money to buy a few sheep and some equipment. When he died 25 years ago, he left his wife and children 10,000 acres of land and 4,000 sheep.

Simon and John Iberlin picked up the mantle and, through dawn-to-dark work and frugal habits (they buy only used cars and Simon Iberlin put off marriage until he was 39 because, he says, he couldn't afford a wife), they expanded the ranching operation to include 7,000 sheep, 500 head of cattle and 30,000 acres of deeded land, which will be clear of debt in another four years. They lease another 20,000 acres. Including their two modern homes in town, their property all told is worth about $2.5 million.

And yet the Iberlin aren't wealthy men, because raising sheep is clearly a low-profit-margin industry. Even in their best year, 1972, they netted only $46,600, or less than a 2 percent return on their investment. In 1976, the sheep operation showed a net profit of $39,000, and 1977 profits were only slightly higher. Even these small profits would have been lower without a federal program of incentives for sheep ranchers. Under the complex program, which is tied to average wool prices received by the industry, each rancher is paid a certain percentage of what he receives for his wool. Last year Washington paid ranchers only 9 percent, but recently the payments were increased, retroactive to the beginning of 1977.

The brothers are regarded locally as top-notch sheep ranchers and shrewd businessmen. "I don't know how the Iberlins do it but they consistently do better than any other sheep rancher I handle," says Dewitt Terry, a certified public accountant who handles the books for many local ranchers. Indeed, while most U.S. sheep ranchers have had year after year of losses, the Iberlins can count on one hand the years that they have lost money since they went into partnership some 25 years ago.

Simon Iberlin explains their success simply, "We do everything ourselves and we do without." But it's clear the Iberlins combine their willingness for grueling work with business instinct and economic foresight. In 1963, for instance, when all the ranchers here used sheepherders to handle and guard their sheep herds (as sheep flocks are called in the West), the Iberlin brothers were the first in the county to switch to the concept of fenced pastures, stringing 50 miles of wire fence in a single summer. Most county sheep ranchers have since switched to fencing because of the scarcity and rising wage costs of herders.

The Iberlins' foresight resulted in considerable financial savings. They built their fences at a price of about $1,000 a mile, while sheepmen building fences now, because of inflation, pay close to triple that.

Also, unlike most U.S. sheep ranchers, the Iberlins use no permanent outside labor. The peak work periods come in the spring, when the lambs are taildocked and castrated and the adult sheep sheared, and the fall, when the herds are sorted for shipping. At these times, the two brothers and John Iberlin's three grown sons are joined by Simon Iberlin's wife, Dollie, and John Iberlin's wife, Maggie. Even Jeanne Iberlin, the 85-year-old mother of John and Simon Iberlin, helps by cooking the evening meals. "Basque women are terrific," says Sam Rosenthal, the mayor of Buffalo. "They work now like American women did in the pioneer days. They do everything but fight Indians."

The two brothers want to make sure that their ranch remains an Iberlin family business. Because Simon Iberlin's children aren't interested in ranching, he is in the process of selling his share of the sheep and equipment, but not the land, to John Iberlin's three sons.

But whoever succeeds the two brothers will have to deal with a perennial threat to Western sheep ranchers: coyotes. The fences haven't helped the problem. On the one hand they have enabled the Iberlins to graze a third more sheep on the same land by reducing the trampling of pasture by sheep being moved by the herder. On the other hand, they have left the sheep more exposed to predators. One family of coyotes that moved in last spring killed 200 lambs before the Iberlins detected it. "Our two biggest enemies are the coyote and the federal government, and there isn't much we can do about Uncle," says one sheep rancher here.

Indeed, a large part of successful sheep ranching in Wyoming is dependent on doing something about the coyote. Thus Simon Iberlin became chairman of the Johnson County Predator Control Board, which runs one of the toughest, if not the toughest, predator-control programs in Wyoming, according to both the Wyoming Game and Fish Department and the wool growers group.

### HUNTING THE COYOTE

Using a $50,000 annual budget, provided mostly by local sheep ranchers, the board has two full-time trappers, a part-time pilot and a $20,000 Piper Super Cub bought specifically for coyote hunting.

On a recent afternoon, sheep rancher and pilot Gary Gosney demonstrated the county's seriousness about coyote control as he gunned the small single-engine, two passenger plane just 50 feet above the rocky arroyos.

"We'll hang in here at about 50 feet for lookin', but I like to get down to 25 feet for shootin'," he shouts above the roar of the engine; then he dips the left wing of the plane to follow a grassy ravine and begins circling a star-shaped formation of rocky ridges.

"We killed three in here one day this week but I think there's one more," he says. Four antelope bound up a ravine, and five mule deer huddle motionless in the shadow of a huge boulder. But no coyotes appear. Acting on a radio tip from a trapper, he heads for some nearby ravines where coyotes have been sighted, and he lands on a short, bumpy ridge. He cuts the engine and flips on a siren, seeking the answering howl of a coyote (coyotes often respond to piercing sounds). Still no luck.

The two-hour hunt fails to uncover a single coyote, but the aircraft has more than justified itself already. In the past year, it has accounted for 285 coyote kills, while trappers, using steel traps, game calls and rifles, have accounted for another 100.

But predators aren't sheep ranchers' only problem with nature. Like farmers and livestock men everywhere, the Iberlins are vulnerable to the weather, and in some years it hasn't been kind. They're still recovering from the Easter weekend of 1973 when a heavy blizzard pushed by 10-mile-an-hour winds howled down across northern Wyoming. "There was nothing we could do but get out of the wind and say our Hail Marys," recalls Simon Iberlin.

### A "TERRIBLE" LOSS

When the storm abated, the scene was grim. Flocks of sheep, seeking shelter from the shrieking winds in steep-walled canyons, had suffocated under several feet of snow. Many of those that were dug out alive were badly chilled and later died of pneumonia. When the snows melted and the carcasses were counted, the Iberlins had lost 2,500 ewes, 90 head of cattle and 140 calves. "It was terrible," recalled John Iberlin.

With the severe loss in breeding stock, the sheep and cattle operation lost money in 1973, 1974 and 1975, recording a battering $33,000 deficit in the latest year.

Even with the improved market outlook in 1977, which served the Iberlins well, they were hurt again by last spring's snows, which killed 600 ewes and 30 rams.

But the hardships caused by the brutal weather, the plundering of the coyote, the long, long hours of work and the lean economics of ranching fail to dampen the Basques' irrepressible devotion to dancing, wine and song. "The Spanish side (of the Pyrenees) produced great fighters, our side (French), great lovers," explains Simon Iberlin with a roguish grin.

Once the work is done, the life style here becomes anything but Spartan and is marked by a penchant for marathon parties. "When an Irishman drinks, he starts a fight," says Simon Iberlin. "When a Basque drinks, he begins to sing and dance."

And there has been plenty of that around Johnson County since the Basques arrived at the turn of the century. The Basque "party in the mountain," a dusk-to-dawn feast, dance and religious ceremony every August, once attracted much of the county, but it hasn't been held in some years. The local Basques even used to throw mountainside parties on a large open-air concrete dance ficor built into the side of the mountain. But people in Buffalo today prefer smaller gatherings, such as neighborhood and block parties.

But it still takes little to motivate Basques to gather. The arrival of a newsman here on a recent Sunday triggered a Basque party the following night. Observes Mayor Rosenthal, "I've lived among these Basques for 37 years, and I've still to meet one who's afraid of hard work or a big party." ●

## RARE II COLLOQUIUM

● Mr. CHURCH. Mr. President, on April 4, the Senate Energy and Natural Resources Committee, the House Interior Committee, the Forests Subcommittee of the House Agriculture Committee, and the Department of Agriculture sponsored a day-long colloquium on the Roadless Area Review and Evaluation (RARE II) program now underway on the National Forests.

The opening remarks of Representative UDALL, Assistant Secretary of Agriculture M. Rupert Cutler, and myself all look toward the final product to be achieved by RARE II. I commend these statements to my colleagues, and ask that they be printed in the RECORD.

The statements follow:

OPENING STATEMENT OF SENATOR FRANK CHURCH

On behalf of the Senate Energy and Natural Resources Committee, the House Interior Committee, the Forest Subcommittee of the House Agriculture Committee, and the Department of Agriculture, I welcome you to the afternoon session of the Joint Congressional-USDA Colloquium on the National Forest Roadless Area Review.

In addition to a number of members of the House and Senate, we have some distinguished guests with us today, who I will introduce shortly.

Let me state at the outset, and for the record, that this seminar is neither an oversight hearing nor a legislative hearing. Rather, it is an informal session to discuss the present status and future stages of the second Roadless Area Review and Evaluation—the so-called RARE II project—which is presently being conducted by the Department of Agriculture on the National Forests.

This colloquium is a follow-up to a successful experiment which the Senate Energy and Natural Resources Committee conducted last fall. On September 21, the committee called together representatives of various national conservation organizations, forest products groups, and the Department of Agriculture to discuss the roadless area problem and the RARE II project in a roundtable format.

As a result of that first discussion session, some problems with the RARE II process which might not have surfaced, except for the free flow of debate at the roundtable, were subsequently resolved. We felt sufficiently satisfied with the results of that seminar to sponsor this second session today.

The workshops which each of you attended this morning down at the Department of Agriculture have set the stage for the roundtable discussion this afternoon. You have given your consideration to some tough questions, such as: How can a consensus be developed for both the areas to be recommended for wilderness and for the areas to be released from further wilderness consideration and thus made available for nonwilderness uses? What type of legislative package should be sent to Congress upon conclusion of RARE II? How should the decisions made by RARE II be implemented? Are there problems with RARE II which should be resolved before the release of the planned environmental impact statement?

We will discuss these questions and others at length here this afternoon.

As we begin this second roundtable discussion, I want to reinforce a couple of basic points which I stressed at the first of these sessions.

The sole objective of the RARE II program is to arrive at some final decisions about the future use of the remaining roadless areas within the National Forest System. To the degree that we can resolve the allocation decisions on some of these areas, we serve two equally important objectives. First, we remove some of the uncertainty about the land base for non-wilderness forest uses, such as timber harvest, and, secondly, we assure that the wilderness values of key areas are, in fact, recognized, and these areas included within the National Wilderness Preservation System.

The inventory phase of the RARE II program has already identified some 66 million acres of roadless land in 37 states.

We can hope that the evaluation phase of the program will generate enough information and foster a consensus among forest user groups sufficient to settle a fair share of this total.

But we will all be sorry, I think, if we harbor excessive expectations as to how much of the roadless area issue might be "solved" by RARE II.

As it has been set up, RARE II is a reasonable program which can achieve a reasonable result. It can get us well down the road to settling the overall roadless area issue—if we just let it. However, if we ask it to do too much, we are liable to strain the capacity of the process, and strain the politics underlying the process, to such a point that the whole project will end in failure. That is a result no one wants.

Therefore, in terms used by Assistant Secretary Cutler when he announced the program nearly a year ago, we must put the focus on reasonable objectives, and on procedures for arriving at the ultimate decisions to be made.

Another problem area which must be avoided, in my opinion, is the use of extravagant rhetoric. For instance, I have seen some recent advertisements which warn of economic disaster for the Northwest if all of the roadless areas in RARE II become wilderness. Such scare tactics only bewilder and confuse the people. No one has proposed that all of these areas be made statutory wilderness. Furthermore, Congress makes these decisions, and there is no possibility that all the RARE II areas will be designated as wilderness.

Of course, there are areas of roadless land in the national forests which ought to be given full wilderness protection. Because they posses unique ecological values or superlative wilderness characteristics, they should be made part of the National Wilderness Preservation System. Many such areas have minimal resource conflicts, and we should be able to designate them without much controversy.

By the same token, there are other roadless areas which have no particular value as wilderness, and which are not sought for preservation by anyone. They have other important values which we should proceed to utilize—including timber, minerals, and nonwilderness recreational opportunities. For these areas as well, there ought to be a minimum of controversy.

The problem is, we have not been making decisions on these relatively easy areas. To date, we have seen virtually all sides arguing their positions on the basis of general principles, without attention given to the other person's point of view. And that brings me back to my first point.

RARE II, as I see it, has a very simple objective: to let a consensus on such areas be formed in a manner which will make it possible for Congress to take action to implement that consensus.

That objective is reasonable, and it does not require the resolution of the whole roadless area issue in one fell swoop. That is a task which, in my judgment, exceeds the possible.

So, I want to counsel coolness, consensus, and resolution, with reasonable and not excessive expectations.

---

STATEMENT OF MORRIS K. UDALL BEFORE THE RARE II COLLOQUIUM

It has been more than 70 years since the forest reserves of this nation were transferred to the Department of Agriculture's Forest Service. The National Forests, under the wise stewardship of the Service, have played a major role in fulfilling the country's need for timber, minerals, grazing, clean air and water, and recreation during these past 70 years. The first "Use Book" of the Forest Service, published in 1905, stated very clearly the goal of the Forests when it said, "The Forest Reserves are for the purpose of preserving a perpetual supply of timber for home industries, preventing destruction of forest cover which regulates the flow of streams, and protecting local residents from unfair competition in the use of forest and range."

And, today the National Forests are perhaps even more important to the nation than in any other time in our history. The intense interest shown by a wide variety of individuals and associations in the current Roadless Area Review and Evaluation (RARE II) clearly demonstrates this point. In short, the Forest Service has undergone a tremendous effort in the last year to try to determine, in consultation and cooperation with all interested parties, what the highest and best use of the approximately 66 million acres of roadless lands left in the National Forests, are. It is not an enviable task, it is one that will take a great deal of effort by all involved. The purpose of this colloquium is to try to narrow the difference between user, recreational, and conservation groups.

This nation needs more jobs, more timber, more range resources, more opportunities for outdoor recreation. We need to preserve our dwindling stocks of fish and wildlife, our natural heritage.

All of these interests and points of view are well represented here. It is my hope that we can work together in this forum in the spirit of understanding and thrust to meet those objectives.

The Forest Service has a big iob to do, the nation is asking a lot of our National For-

ests. We can help the RARE II process along today only by cooperating; if we fail in this endeavor, the blame will rest squarely on our shoulders.

Thank you.

---

OPENING STATEMENT OF ASSISTANT SECRETARY OF AGRICULTURE M. ROBERT CUTLER

Mr. Chairman, on behalf of Secretary Bob Bergland, Chief McGuire and myself, I thank you very much for once again hosting a public meeting on the status of the Department of Agriculture's second Roadless Area Review and Evaluation, or RARE II, program.

At this stage in the RARE II program, it would be helpful to take stock of what we are doing while we are doing it, and how we expect it to work.

RARE II could be called a reform program within the context of the comprehensive resource use planning process for the National Forests mandated by the Resources Planning Act in the National Forest Management Act.

RARE II is an effort to improve the way we evaluate wilderness potential and to accelerate making those wilderness and nonwilderness allocation decisions which can be made now on the basis of solid resource data and thorough public review.

RARE II is not an effort to work miracles, although seeing the cooperative spirit brought here today makes me wonder if we cannot achieve some miracles in this process. I am very optimistic at this moment, Mr. Chairman, that we will see some new spirit of cooperation.

We do not expect to resolve all of the roadless area allocation issues in all the National Forests this year, but we are committed to removing uncertainty about future uses on substantial parts of the roadless area inventory.

When the Carter Administration took office, it began with a commitment by the President to assure that wilderness opportunities on the National Forests would be more thoroughly evaluated and given more thorough consideration from a national perspective. As the President said in his environmental message last May, the national wilderness preservation system must be expanded promptly before the most deserving areas of federal lands are opened to other uses and lost to wilderness forever.

Without lessening our commitment to other uses, we undertook to improve and strengthen our processes of considering the wilderness and roadless areas. We also began with a commitment by Secretary Bergland who assured that commodity production opportunities on the National Forests will be clarified through an expedited land use allocation process.

The Congress has confirmed in the strongest terms our decision to improve these processes. We have adjusted the Forest Service evaluation criteria to wilderness suitability in order to conform with the interpretations and criteria that the Congress has set in the Wilderness Act in its many decisions since then on wilderness proposals.

In working with the committees, we have developed a new wilderness management policy which helps to remove many of the misunderstandings which made final decisions hard to reach. Having made these reforms and improvements in policy on wilderness evaluation, wilderness management and land use allocation, there was an obvious need to get them into application in the field in a systematic and nationally consistent fashion, hence RARE II.

This is a national program looking at all the roadless areas. RARE I was not national in scope. It did not stress consistency in evaluation of areas. That lack of consistency led to a lot of controversy and to appeals of a kind that will be unnecessary as a result of RARE II. Our land use planning work was so highly decentralized that assuring a high level of quality and full consistency with national policy became difficult and that resulted in challenges to the decisions. The fact that the Chief has upheld a number of land use plan appeals over the past two years demonstrates that we did have a problem that required prompt solution. RARE II is the framework for that solution.

The forest products industry and other groups dependent upon nonwilderness National Forest System lands asked for some process that would accelerate decision making on these land allocation questions. I know of no surer way to avoid controversy over land allocation questions and thus speed final decisions than to assure that our planning is of the highest professional quality, that it conforms fully to the criteria and standards of national policy, that it accurately reflects the policies and criteria that Congress has established and insisted upon, and that it is applied in a nationally consistent fashion. That is what RARE II is all about.

It is USDA's response to the equally valid request of the wilderness groups who wanted our policies reformed and of the commodity and developed recreation groups who wanted our decisions made more promptly and with a better chance of finality.

The next thing I want to say about RARE II is that it is going to work. It is going to be completed on our original time schedule with proposals resulting in early 1979. We know everyone wants the process completed as promptly as possible. I would appreciate it if everyone involved would be confident in our commitment and would not continue pressing this point.

We will complete the program for one good and sufficient reason: that this is a directive Secretary Bergland and I have given the Forest Service and they are leaving no stone unturned in carrying out that directive.

Now, the more difficult question is what will be the results. I can promise that RARE II will be completed on schedule, but I cannot predict the results. Frankly, the quality of the results will depend far more on what those in this room from the various public groups say and do than anything either I or the Forest Service can do. My friends, the effectiveness of RARE II in resolving roadless area issues is up to each of you far more than it is up to me. I will do my part to assure that all the procedures and resources needed to complete the program are provided, but I cannot produce the consensus on which the substantive results of the RARE II program depend. Only you, and others representing National Forest users, can accomplish that.

RARE II is not going to dictate which wilderness areas should be wilderness and which should be used for other purposes. Those results are not preordained. They will not emerge from some smoke-filled room in the Forest Service offices, nor will the Forest Service be able to recommend a set of results until public opinion is obtained as to which RARE II areas should be allocated for which categories: wilderness, nonwilderness or further study. The program will produce results only so far as a genuine consensus of public opinion can emerge. Consensus cannot be dictated. It must emerge through an even-handed process sorting out those things on which people can agree.

RARE II will resolve those roadless areas which by consensus of public input are capable of being resolved. It remains to be seen how much of the roadless land can be resolved as it remains to be seen how far consensus will reach. However, we don't naively expect unanimity, of course, and the Secretary and I are prepared to bite the bullet when the time comes late this year to make our final recommendations regardless of some residual dissidence.

Our part is to assemble the inventory of areas and be rigorous with gathering resource data on each area, so we have a capability of assessing trade-offs and opportunity costs. We have also generated some ideas about what particular kinds of areas are needed to help round out a wilderness system which is well distributed geographically and is representative of the ecosystems, land forms, and wildlife habitat of the National Forests.

We are asking you to take this information and the ground rules of the RARE II process and help us work toward consensus on an area-by-area basis.

Now, let us review the three categories of recommendations which will emerge from RARE II, the so-called instant wilderness is not instant at all, of course. As the Chairman indicated, we will only recommend insofar as some degree of consensus emerges, areas which are suited and desirable for addition to National Wilderness Preservation System. But only Congress designates wilderness, and it will have to consider each of these areas before RARE II is over. Therefore, the Congressional public hearing process lies ahead for any wilderness establishment proposals and state Congressional delegation support is normally required to carry such proposals forward into law.

Similarly, the nonwilderness areas are not going to be released or given away, they will continue to be administered with professional care by the Forest Service under laws which govern us and from the standards of quality management in which we take justifiable pride. RARE II will simply recommend another set of areas under existing and future land planning for which the wilderness option will be considered closed.

There has been some talk about how roadless area designation "locks up" the National Forests. We are protecting roadless areas only until we can fully evaluate them in our planning and for one good reason. The American people, the Congress, and the President want us to. In 1972 the Forest Service completed RARE I. Some 56 million acres were inventoried as roadless under the program and of that about 12 million acres were selected for further wilderness study. Forty-four million acres were not selected.

Now, much of that 44 million acres has gone through land use planning and nearly 12 million acres have been released to nonwilderness forms of management. They are among the most productive for nonwilderness forms of recreation, timber range, water and wildlife uses. Our planning direction focused on the highest value resource lands first.

So, we have been releasing roadless land steadily on the basis of our normal planning procedures, and they have been effectively released because only a small percentage have been subject to further challenge on wilderness grounds, in each case because of the quality of the land use plan involved. In improving the quality of our wilderness evaluations, we will be assuring that such challenges will not be necessary in the future.

A final thought about release of roadless areas for nonwilderness area purposes. These areas must be formally handled at the end of the RARE II process. We could prepare legislation to effect their release or some executive order. I do think the industry groups will want to consider whether legislation to release wilderness areas is desirable. Given the various political circumstances in each state, the potential for delays in passing such release legislation, area by area, may be considerable. Remember that we have successfully released 25 percent of the RARE I areas since 1972; and this, of course, still has much to recommend it.

The other category is further planning, not to be confused with wilderness study. One way we are moving to accelerate decisions on wilderness is to avoid the extra step of wilderness study in those cases where

we have enough public review to convince us that we can make a balanced and well-informed final land allocation recommendation. The further planning category is just what it says. It includes roadless areas for which we are missing important resource data or for which no consensus emerges through the RARE II process. We will utilize our ongoing land management processes to develop the additional information and additional public review to reach a sound decision area by area. We will keep the acreage in this category to a minimum by accepting some criticism for making recommendations which may be unpopular in some corridors.

These lands will not remain in some endless limbo. Congress has given us some clear guidelines for land management processes, and we will soon be promulgating rules and regulations for that process. We will be completing land management plans for every unit under the new guidelines set forth in Section 6 of the National Forest Management Act by October of 1985.

The further planning needed for these wilderness areas will be accomplished within that time frame. We cannot make any predictions now about the number of areas or acreages going into any of these three categories at the end of the RARE II process. We are waiting to see the results of public involvement. The RPA planning target is subject to change within the Administration or by Congress, but it will be kept in mind as we develop our RARE II recommendations.

For RARE II to work, there is going to have to be a high level of thrust among all of us, so that we can get on with our work and keep to the timely schedule. People in every state involved must share that kind of thrust. The tactics of confrontation cannot produce agreement. During the public review period on the draft EIS, we will welcome comments about the alternatives we have developed. The most effective form of input, however, will not be merely choosing your favorite alternative and then getting lots of people to support it. Rather, comments on individual areas, one by one, will be the real driving force of the RARE II decisions.

Let me leave it at this: You may ask how much roadless land we will resolve through RARE II. I have no clear idea today, because we have yet to hear from the people, and we must hear from them. I hope they give us constructive, specific suggestions rather than blanket requests for all wilderness or no wilderness, which will be of no help.

I have faith in this kind of process. I know there are many roadless areas on our inventory which can, by general agreement, proceed to nonwilderness forms of use. I am equally confident we will find some public support that other roadless areas be elevated to full wilderness status, and there are areas where we do not yet know enough or where public controversy is so high, that nothing approaching consensus could possibly emerge during this accelerated program.

What remains is to sort the resource of wilderness areas into these categories. You and your counterparts across America are the key to that process, and we in the Department of Agriculture thank you for your assistance.

Thank you, Mr. Chairman.

Senator CHURCH. Thank you very much, Mr. Secretary.

Chief McGuire, do you have anything you would like to add?

Chief MCGUIRE. This group heard from me this morning. I have nothing to add other than to reinforce what Secretary Cutler has already said.

Thank you to all of you here in Congress for making this session possible.

Senator CHURCH. Senator Hatfield has arrived from Montana. Senator, is there anything you would like to say before we proceed?

Senator HATFIELD. No, I would just like to listen at this time. Thank you, Mr. Chairman.

Senator CHURCH. Now, as I previously mentioned, there are five interest groups represented here at the table, and I understand each one has a spokesman.

If we were to begin with the recreation, range and wildlife group, we have Mark O'Reilly and Marty Morache here.●

## SENATOR HELMS SPEAKS ON MONETARY POLICY

● Mr. BROOKE. Mr. President, last fall the Senate approved a bill which contained an important amendment authored by our colleague, the distinguished senior Senator from North Carolina.

His amendment provided that the joint resolution of June 5, 1933 not apply to obligations entered into after passage of the bill. In other words, after October 28, 1977, when the President signed the bill, Americans could again enter into binding obligations denominated in gold or in dollars measured in gold.

Because of a 1937 Supreme Court decision, the 1933 resolution also made obligations denominated in foreign currencies unenforceable in the courts. The Helms Act now permits such obligations between U.S. citizens, and banks are beginning to look into the new freedom this legislation offers.

Senator HELMS announced recently that the Bank of America had made inquiry to the Federal Reserve Board concerning the ability of member banks to offer credit and to accept deposits denominated in foreign currency.

In his comments to "The Ruff Times National Convention," Senator HELMS said, "the new opportunity may give warning to Federal money managers that the dollar should be made into the currency that people prefer."

Today, the big multinational corporations are the only ones who can conveniently utilize foreign currency deposits in foreign banks. This new freedom may allow smaller business a similar opportunity.

Mr. President, I ask that excerpts of Senator HELMS recent speech in Anaheim, Calif., be printed in the RECORD.

The material follows:

THE RUFF TIMES NATIONAL CONVENTION

We are at the crossroads in terms of what may be America's very survival—and sometimes I confess that I wonder whether we have reached the point at which there is no chance of survival.

But hope springs eternal. America was born of the yearning of men and women to be free, and who were willing to fight to be free, and sacrifice to be free. And as long as there are enough Americans willing to face up to the truth, and to place their faith in God—there will be hope.

It has become the thing to do in this country to look to the government to solve all problems; and we have reached the point where the tentacles of government rules and regulations affect the private lives of everyone of us here tonight. Government cannot solve our problems. Government is the problem.

There have been powerful forces all across the land spreading the festering notion that the fundamental principles of America are no longer relevant—and that traditional values, as they put it, "are no longer applicable to today's problems."

It's a malignant concept, a deep relativism—and it has penetrated and permeated our institutions. Much of our major media, and especially television, fans the flames of cynicism and distrust—and, intended or not, hacks away at the foundations of our society: the family and the church. And, in the process, there is a clear undermining of our economy, as well.

Americans too seldom think of normal relativism when discussing the economy. But can you imagine a more immoral, self-defeating device than inflation itself? The mechanism of inflation insidiously eliminates honesty in business dealings. No longer do we hear the term, "honest dollar", because the dollar is no longer honest.

The fact is that in exchange for a specific amount of resources which you may borrow today in the form of dollars, you will pay back at some future date in unknown amount of resources as measured in the number of dollars and interest paid.

Under such a perversion of economic decency, it is understandable that Americans are hesitant to make long-range investments in machinery, in industry, or in research.

I need not mention that the present economic recovery today contains less than half the volume of long-range capital expenditures than similar recoveries have had in the past. Business is just not putting money into the economy.

Indeed, under the relativism of inflation, it is surprising that we have any economic growth at all.

Let's talk about how we can solve the problem, and restore strength and meaning to the miracle of America.

I like to think that I am a realist, in political terms. I believe that the best solution to a problem can be found only after a thorough understanding of its causes.

All across America, I have met with countless thousands of people—old, young and in-between. I think I perceive what's on the minds of men and women who work in our factories, and on our farms, in our businesses, large and small.

The American people are sick of making a god of government.

The Keynesian emperor has been exposed.

Americans everywhere are beginning to realize that the phony emperor has no clothes!

They are beginning to realize that the use of federal economic intervention serves not the nation, not the people—but only the politician who is vastly more interested in the next election than in the next generation.

For a great while, it was difficult to convince many Americans that inflation is the most cruel hoax ever perpetrated on society.

But no longer: The people know.

The question now is: What can those of us, in Congress, do to thwart the inflationists, and help Americans to cushion, if not avoid, the effects of inflation?

As a starter, I introduced a bill almost two years ago to repeal the prohibition against gold clause contracts, so as to permit binding obligations between Americans denominated in gold, or dollars measured in gold.

That bill passed last October.

The gold clause contract will allow those who believe gold to be a better medium of exchange than paper dollars—and who doesn't?—to enter into obligations linked to gold.

Many people have asked, of course: "How do I do it?" The answer to that is not easy, because we know that the dollar-price of gold fluctuates considerably.

I would emphasize that it is the gold-price

of the dollar that tends to fluctuate. But, the direction of the dollar is one way: Down.

Gold, because its relationship to the dollar is not a day-to-day constant, does have its problems. But, as any historian knows, the relative value of gold to the things man needs and wants, has proven gold to be the only good measure for about 6000 years. There is no indication that the role of gold will significantly change over the next 6000 years.

Gold is disliked by the U.S. Treasury because gold imposes a discipline that makes continuous federal deficits—and inflation caused by these deficits—impossible without official devaluation.

But, now with the gold clause contract freedom, we may see gold become a widespread medium of exchange, as more and more people come to regard it more highly than dollars.

Indeed, as long as the United States Government corrupts the dollar, it is no act of patriotism to stick to dollars. As long as the U.S. dollar is no real store of value, there is no reason to keep it, when alternatives are available. My view is this: People should have alternatives available; but it must be the individual who decides whether to use that alternative.

Getting in and out of an alternative medium of exchange is not easy; but the depreciating, inflating dollar has made it necessary for some, and made it attractive to others.

Now, I have told you about the gold clause contract, which simply says that one party promises to pay the other, in exchange for goods or services, a certain amount of gold—or dollars measured in the market price of gold—on a certain date.

What I have not discussed is that my bill, Public Law 95–147, also makes possible, for the first time since the 1930's, financial obligations in currencies of other nations. Back in 1937, the Supreme Court interpreted the gold clause resolution of 1933 to apply to contracts in the currencies of other nations. Along with gold clause contracts, it is now legal to make a contract in other currencies.

For example, if you paid your rent in deutschemarks, your rent in dollars should have gone up over 20 percent in the past few months. However, if you received rent in that currency, your receipts, measured in dollars, would have gone up.

I do not contend that any other currencies are inflation-proof, or that I would advocate denominating business deals in other currencies.

What is important is that the alternative is now there.

What is important is that we may now see business and individuals exercise a new right and utilize other currencies for financial purposes.

If people utilize such an "economic vote" and get out of dollars, and into another currency, they are not only serving notice on Washington to give them a money worthy of the name, but also, I believe, they are going to make it harder for the inflationists to continue to confiscate the resources of Americans by way of manipulation based on Keynesianism.

Those who advocate sound money can now effectively help in the political fight against federal deficits. It will help in the fight against depreciating the dollar. It will give the advocates of a sound dollar an undeniable argument to back up a demand that the poison of inflation be phased out of the American economic system, if the system is to survive.

Now, I believe that this is important, not only because it may provide a means for Americans to avoid some effects of inflation, but because of the political implications.

I have been in touch with the Federal Reserve System concerning the issuing by banks of gold certificates. They have adopted a wait-and-see policy. I am hopeful that banks will begin offering negotiable gold certificates.

In that connection, and as an important first step, I can announce tonight that a bank has asked the Federal Reserve Board for authorization to begin offering credit and accepting deposits in foreign currencies. In other words, if the federal reserve board goes along—and I believe that it is obliged to go along by Public Law 95–147—then you may soon be able to make deposits, borrow money, and start savings accounts denominated by a currency of your choosing, one that you believe to be a better store of value than dollars.

I am glad that I can announce, here in California, that the institution making this request is the largest bank in the United States, the Bank of America.

I have written to Dr. Arthur Burns, who is still Chairman of the Federal Reserve Board, to encourage approval of this request.

There are problems, of course, and questions which must be answered concerning the regulations under which banks operate and the expertise that banks will need in international currency markets.

But, it is instructive that the Bank of America is the first to take this action.

I believe, if this application is approved, that other banks in our nation will follow, depending on the demand.

I do not contend that this new freedom will provide an easy answer. What I do firmly believe is that if the success achieved by the passage of the gold clause freedom bill can be used to expand the economic freedoms of Americans, then much good has been done.

If the use of that freedom brings us closer to winning the fight against inflation, then we have taken a substantial step toward saving our economy. If the American economy is made stronger, and given more freedom, then there is much to be encouraged about.

The immediate danger is that regulatory agencies will attempt to thwart this new freedom. They may be successful; but I pledge to you that they will have a fight from this senator.

A student of economic history will tell you that freedom in the marketplace is a rare thing. We have the opportunity to effect a political change toward freedom; and I hope you will join the fight. There is no freedom without economic freedom; and for those who join the fight, let me assure you that it will be a rewarding one.

It is a fight that needs your effort. I urge the study of politics in addition to your study of economics. And just as you would exercise economic freedom, I urge you to exercise the political freedom you have, as well.

A society which discards its values surrenders its right to be free.

The inner decadence of the collective state is now demonstrable in New York City and Washington, D.C. It remains for us to teach, to persuade, demonstrate, and, indeed, to lead: To do what we must do to fill the responsibilities we feel to our families, to our communities, to our nation, to our civilization, and to the eternal values in which we believe.●

## QUEEN ISABELLA DAY

● Mr. WILLIAMS. Mr. President, on April 22, 1978, my own State of New Jersey will join 45 States across the Nation to commemorate the 527th anniversary of the birth of Queen Isabella I of Spain. Because she was willing to support Christopher Columbus in his daring and remarkable voyage to the New World, Queen Isabella played a substantial role in shaping our history. This commemoration also serves to remind us of the important role that women have assumed and will continue to assume in determining our Nation's history.

On April 22, 1978, the Governor of New Jersey issued a proclamation declaring Queen Isabella Day in New Jersey. I ask that this proclamation be printed in the RECORD.

The proclamation follows:

PROCLAMATION

Whereas, America's Discovery in 1492 was made possible through support from Queen Isabella, Queen of Castile, wife of Ferdinand of Aragon; and

Whereas, the navigator was able to present his innovative navigational theories to the Spanish Court because Queen Isabella had been moved by his honesty and determination; and

Whereas, that voyage opened North and South America to settlement and development by European nations, laying the foundations for contemporary American societies; and

Whereas, the colonizing of this country and the winning of its independence could have been delayed for many years without Queen Isabella's initiative and the successful voyage of Columbus; and

Whereas, the history of America has direct linkage to the birth of Queen Isabella on April 22, 1451; and

Whereas, the 527th Birthday Anniversary of Queen Isabella occurs on April 22, 1978;

Now, therefore, I, Brendan Byrne, Governor of the State of New Jersey, do hereby proclaim April 22, 1978 as Queen Isabella Day in New Jersey, and do urge all citizens to observe the day and that teachers direct the attention of young students to the history of Queen Isabella.

BRENDON BYRNE,
*Governor.*●

## DISCLOSURE OF INCOME, INCOME TAXES PAID, FINANCIAL HOLDINGS AND OUTSIDE SOURCES OF INCOME FOR 1976

● Mr. SCHWEIKER. Mr. President, as a U.S. Senator, I believe it is in the public interest to make an annual disclosure of my income, Federal income taxes paid, financial holdings, and outside sources of income.

Therefore, today, Mr. President, I am voluntarily disclosing my 1976 income, Federal income taxes paid in 1976, financial holdings, and outside sources of income in 1976. My 1976 honoraria were publicly disclosed in accordance with Senate rules.

For the calendar year 1976, my wife and I had an adjusted gross income of $77,444.75—line 15 of our Federal return—and we paid $23,508.59 in Federal income taxes. In addition, we have paid the Pennsylvania State income tax since its inception, and I have also paid Worcester Township, Montgomery County, Pa., wage tax since its inception.

The only stocks which my wife and I owned in 1976 were Harleysville Life Insurance Co., Merrill Lynch & Co., and National Gypsum Co. My wife and I received dividend income from these stocks. My wife owns Commonwealth of Pennsylvania general obligation bonds from which she receives income.

I am the beneficiary of one-half interest in the estate of Blanche S. Schweiker which in 1976 was in the process of probate and consists of a residence and land at Worcester, Pa., and stock of the Philadelphia National Bank and the Continental Bank and Trust Co.

We held no real estate other than that at Worcester, Pa., and McLean, Va. Our other holdings were life insurance policies, automobiles, and household furnishings.

I hold no business directorship, business position, or partnership, and receive no director's fees, consultant's fees, or salary aside from my U.S. Senate salary. When I was first elected to Congress in 1960, I resigned all such business positions.

## THE BEEF IMPORT ACT OF 1978

● Mr. CHURCH. Mr. President, I am pleased to join as a cosponsor of S. 2895, the Beef Import Act of 1978. This legislation will amend the Meat Import Act in order to provide stability to the domestic cattle market and assure American consumers high quality beef at reasonable prices.

Under existing law, beef imports are increased as domestic cattle production expands and beef imports are decreased as domestic production contracts. This is exactly the opposite of what should occur and has contributed to an extremely volatile domestic cattle market with consumers periodically paying very high beef prices. The existing formula for meat imports is detrimental to both cattlemen and consumers.

This bill will temper the boom and bust cycle in the cattle industry by permitting increased imports during periods of high prices and reducing imports during periods of depressed cattle prices. This countercyclical control of imports will add stability to cattle prices and will help prevent inflationary beef prices during periods of domestic shortages.

No one can question the fact that cattlemen have had a tough go of it in recent years. Imported frozen boneless beef has been allowed to capture 15 to 20 percent of the total U.S. processed beef supply during a period of chronic liquidation in our domestic market. This is not fair to our domestic producers and it is not fair to our consumers who will pay for the chronic liquidation of our domestic cattle in skyrocketing prices in future months.

We must reduce the historical cyclical fluctuations in cattle production and prices. The countercyclical formula in this bill will stabilize profits to ranchers at levels that will assure adequate supplies of beef at reasonable prices.

We have learned that even a small increase in imports can have a negative effect on cattlemen during periods of overproduction. This is particularly true for smaller cattlemen. Added stability in the cattle industry would be particularly beneficial to smaller family-owned farms and ranches, which are less able to withstand the recurrent cycle of boom and bust than larger corporate operations with ready access to financial markets.

Under this legislation, all forms of beef and veal would be subject to a countercyclical beef import formula which is based on per capita supplies of domestic cow beef. The new quotas would be computed as follows:

A×B/C=New Proposed Quota.

A=Adjusted Base Quota as calculated under the 1964 Meat Import Law.

B=Base period average. This is a ten-year moving average of per capita domestic commercial cow beef production. The base period is the 10 years prior to the year under consideration.

C=Average of two-year per capita supply of commercial cow production. It includes the year previous to and an estimate of the year under consideration.

This formula is adjusted to increase the protection of our domestic cattle market during periods of extreme distress.

The legislation also modifies the Presidential authority to suspend quotas under existing law and will prevent disproportionate shipments of imports into any one port.

Mr. President, I urge Congress to enact this legislation, and I ask unanimous consent that a factsheet summarizing the bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD as follows:

FACT SHEET—BEEF IMPORT ACT OF 1978

1. Countercyclical formula.—Beef imports will increase during periods of domestic overproduction. This will help stabilize the cattle market and prevent sharp upswings in consumer prices.

This will be achieved by adjusting the quota in the 1964 Meat Import Act according to per capita domestic commercial cow beef production. The existing quota would be multiplied by a new fraction. The numerator is a ten year average of per capita domestic commercial cow beef production for the ten years prior to the year in consideration. The denominator is the average of two-year per capita supply of commercial cow production. The denominator includes the year previous to and an estimate of the year under consideration.

In addition, during periods of severe overproduction (when the new fraction is .8 or less), imports will be restricted to 2 percent of domestic production.

2. Including all forms of beef.—In order to close a loophole in existing law, processed beef and veal will be subject to the quota as well as fresh, chilled and frozen beef and veal.

3. Quarterly Limitations.—Quotas will be computed on a quarterly basis in order to be more responsive to the domestic cattle cycle. (Under existing law, computations are made on an annual basis.)

4. Modification of Presidential Authority to Suspend Quotas.—Existing law will be modified to make sure that quotas will not be suspended except during periods of real National emergencies or disasters.

5. Port of Entry.—The President will be given authority to prevent disproportionate shipments or imports into any one port.●

## RARE II

● Mr. McCLURE. Mr. President, those of us who have national forest lands in our States are familiar with the roadless area review and evaluation program (RARE II) now being conducted by the Forest Service, USDA. This program is evaluating the 67 million acres of roadless national forest lands for possible inclusion in the Nation's wilderness system.

The Forest Service official in charge of RARE II made a statement before the Western States Forestry Task Force meeting recently in Seattle, reported to me by several in attendance, that a shortfall of up to 33 percent of the national forest timber sale program would occur in the fiscal 1979 and beyond if RARE II is not resolved. The administration has requested funding for the 1979 timber volume program at 11.5 billion board feet. Recent administration statements reported by the press call for increased timber production from Federal forests to help dampen the rising costs of lumber for home construction.

This shortfall prediction is extremely serious and underscores the need to finally resolve the roadless controversy on our national forests so that a balanced program of timber harvest, and other uses can continue without this cloud of uncertainty.

I would like, too, Mr. President, to point to remarks of President Carter before the American Society of Newspaper Editors on April 11, 1978, and ask that excerpts be printed in the RECORD.

The remarks follow:

EXCERPTS FROM PRESIDENT CARTER'S SPEECH TO THE AMERICAN SOCIETY OF NEWSPAPER EDITORS

Housing construction rates have been at a high level and costs have risen rapidly, partly because of sharp increases in raw materials such as lumber. Since lumber accounts for one-fourth of the total cost of a new house, we can obtain some relief by increasing production and using our existing lumber output more efficiently.

Therefore, I have instructed the departments of Agriculture and Interior, the Council on Environmental Quality, and my economic advisors to report to me within 30 days on the best ways to sustain expanded timber harvest from federal, state and private lands and other means of increasing lumber yields in ways that would be environmentally acceptable, economically efficient and consistent with sound budget policies.●

## FOREIGN CURRENCY REPORTS

● Mr. ROBERT C. BYRD. Mr. President, in accordance with the provisions of the Mutual Security Act of 1954, as amended (22 U.S.C. 1754(b)), the Secretary of the Senate submits, for the RECORD, the following reports of the standing committees of the Senate, as well as certain joint, special, and select committees, concerning foreign currencies and U.S. dollars expended during calendar year 1977 in connection with foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL, COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY, EXPENDED BETWEEN JAN. 1 AND DEC. 31, 1977

FRANK CHURCH,
Chairman, Special Committee on Aging.●

Feb. 9, 1978.

## PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that eight such notifications were received on April 14, 1978.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room S–116 in the Capitol.

The notifications follow:

DEFENSE SECURITY
ASSISTANCE AGENCY,
*Washington, D.C., April 14, 1978.*

In reply refer to: I–295/78ct.

Mr. WILLIAM RICHARDSON,
*Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. RICHARDSON: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
*Acting Director,*
*Defense Security Assistance Agency.*

---

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., April 14, 1978.*

In reply refer to: I–296/78ct.

Mr. WILLIAM RICHARDSON,
*Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. RICHARDSON: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
*Acting Director,*
*Defense Security Assistance Agency.*

● Mr. RIBICOFF. Mr. President, terrorism has reached new heights of audacious brutality in Italy.

The Red Brigade has announced the murder of former Prime Minister Aldo Moro. If true this killing completes an episode of murder, kidnapping, forced detention and humiliation of a respected leader of the Western World.

Terrorism is a form of warfare. We are concerned about war in the Horn of Africa, preventing another war in the Middle East, and limiting the proliferating of arms among the superpowers. But we cannot ignore a war that is raging in Europe, Latin America, and the Middle East: terrorism.

Today's New York Times has an excellent column by James Reston entitled "The Meaning of Tragedy." Mr. Reston identifies terrorism as one of the "new forms of warfare loose in the world." He makes a point underscored in Senate hearing on S. 2236—the Omnibus Anti-Terrorism Act—that our cities, power systems, and people are vulnerable to sabotage and terrorism. I agree with Mr. Reston that terrorist chaos threatens all nations and that we must look at such problems "in a totally different way."

S. 2236 offers a fresh look at terrorism and is especially appropriate in light of today's grim news. It ties management of terrorist problems with emergency civil preparedness. And it calls for strong unilateral action including suspension of air traffic and measures affecting commerce and aid against countries which aid and abet terrorist activities. I believe that such measures are necessary to prove our commitment and to strengthen our ability to fight terrorism.

I commend to my colleagues Mr. Reston's column and ask that it be printed in the RECORD.

The article follows:

THE MEANING OF TRAGEDY

(By James Reston)

WASHINGTON, April 18.—The tragedy of former Prime Minister Aldo Moro of Italy is a startling reminder of the fragility of all civilized nations. They are worrying these days about classic wars of invasion across national borders, and they debate endlessly over cruise missiles, Backfire bombers, and neutron artillery shells that can kill fleets of tanks; but in the last quarter of the century, the tyranny of desperate minorities may also be a major threat to world order.

There are new forms of warfare loose in the world: kidnappings of prominent political and business officials; skyjacking of planes; proxy wars in Africa by Soviet mercenary soldiers out of Cuba; and blackmail, terrorism and the taking of hostages.

The Moro case is only a symbol of the problem. Secretary of State Vance, wandering through Africa, is equally vulnerable to this terror. When President Carter goes abroad, he takes along a bullet-proof car.

When you go to any American embassy overseas these days, you are met not by a Foreign Service officer or a smiling hostess, but by a Marine guard, who has more manners than guns. Every U.S. ambassador, in capitals that have political problems with the United States, has to be concerned about his safety and the security of his wife and children.

Even in Washington, the Iranian ambassador has a convoy of security guards to protect him from aggrieved Iranian students; and if you go to lunch here with Israeli officials, they pick their table very carefully and have one or two security guards placed discreetly in the room. So what we are seeing is a very troubling thing: The entire diplomatic community is living under the dominion of fear.

Perhaps more important, we are probably not at the end but at the beginning of this tyranny of militant minorities. The more people crowd into the cities of the world, the more vulnerable cities become to the sabotage of desperate political organizations like the Red Brigades.

For example, any terrorist group, no matter how small, that knows what manholes to go down to get at the electrical guts or switches of any major city, can terrorize the life of that city. And as we move into the age of nuclear electric power, as we are bound to do as petroleum supplies run out, the problem of sabotage is likely to become more serious.

Terrorists can create confusion if they can capture a Moro in Rome or American businessmen in Argentina, or invade the German embassy in Stockholm; but if they control a nuclear energy factory, or even a railroad train carrying nuclear wastes, they can hold whole cities and countries for ransom.

In that event, they can threaten to dump nuclear wastes into the harbor of Stockholm or the rivers of Germany and pollute them for generations. This is not a crazy speculation: It is a practical possibility every country dealing with modern terrorists is now having to face.

One of the hopeful things about all this is that there are an increasing number of problems that no country can resolve by itself. Nations cannot deal with terror on the international airways unless they agree to refuse asylum to the skyjackers. They cannot protect the health of their peoples unless

they agree to stop testing nuclear weapons in the atmosphere. They cannot avoid a new arms race in outer space or under the seas unless they negotiate some rules in the interest of all nations.

This is, one hopes, what Secretary Vance will be talking about to Leonid Brezhnev and Andrei Gromyko in Moscow this week; not only about the control of nuclear weapons, but about the control of terrorism, about the use of Cuban troops in Ethiopia, Angola and elsewhere in Africa.

We will be trying to find out whether the Soviet Union is really serious about trying to work with Washington for a new peaceful order in the world, or whether Moscow wants to go on financing the Red Brigades in Italy and using the Cubans to dominate the strategic naval lanes around the Horn of Africa.

The official view in Washington, if I understand it, is that both the United States and the Soviet Union have more to gain by agreeing to control terrorism and cooperating in Africa than by financing the terrorists and getting into a serious confrontation in Africa, Europe and the Middle East.

Is is not at all sure that Messrs. Vance and Brezhnev will be able to agree. The Communists are making progress in Italy. The terrorists in that country are creating so much chaos that Moscow thinks they may prevail in the end, but Mr. Vance is likely to be very severe on this matter.

The Carter Administration is at a very critical point in both its domestic and foreign policy. It is watching the Vance mission very carefully. It is trying to say to Moscow that what happened to Aldo Moro could happen to anybody, that chaos threatens all nations, and that the time has come to look at the problem of arms, money, trade and terrorism in a totally different way.●

## THE TURKISH ARMS EMBARGO

● Mr. EAGLETON. Mr. President, the administration recently asked Congress to consider lifting the embargo against arms sales to Turkey. We are all familiar with the details of this embargo, which was enacted after Turkey's illegal use of U.S. arms in its 1974 invasion of Cyprus.

The Turkish population of Cyprus amounts to roughly 18 percent of the total population, and still this minority population occupies over 40 percent of the island by force. It would be an irresponsible action to rescind the embargo while the situation on Cyprus remains unresolved.

Mr. President, I submit two excellent editorials discussing the administration's proposal to be printed in the RECORD:

First. "A Strong Case," St. Louis Post-Dispatch, April 8, 1978.

Second. "Replaying the Arguments," Kansas City Times, April 5, 1978.

The articles follow:

[From the St. Louis Post-Dispatch, Apr. 8, 1978]

A STRONG CASE

The Greek political leadership across the spectrum has joined in deploring President Carter's plan to ask Congress to end the arms embargo against Turkey without obtaining some Turkish concessions on the Cyprus question. The Greeks have a strong case. Turks brandishing American weapons continue to occupy 40 percent of Cyprus following the 1974 invasion—an act touched off when Greek Cypriot extremists, acting for the former military junta in Athens, overthrew the Cypriot president, who was subsequently restored.

The roots of the situation on Cyprus are complex and tangled, but there is no question that the Turks are the aggressors, and that their use of U.S. military equipment in the invasion violated agreements with Washington. The Israeli use of U.S. equipment in invading of Southern Lebanon also violated a similar agreement, according to Secretary of State Vance.

Still, Israel has promised to get out of Lebanon as soon as United Nations forces can be positioned along the front. And although the Turks have in fact made some troop withdrawals from Cyprus, the bulk of their forces are still there. Until Ankara demonstrates a willingness to loosen its grip on the island, the case for lifting the arms embargo is anything but strong.

[From the Kansas City Times, Apr. 5, 1978]

REPLAYING THE ARGUMENTS

Three years ago the U.S. imposed a ban on arms sales and military aid to Turkey in the hope of inducing the Turks to end their occupation of the island of Cyprus that had been undertaken with American-supplied weapons The move failed in its intended purpose. The Ankara regime—or rather a succession of them—remained adamant. Turkish-U.S. relations turned bitter. And though talks between Turkey and Greece aimed, in part, at resolving the Cyprus stalemate recently were initiated, no quick end to the occupation is in sight.

Former President Gerald Ford sought to lift the embargo and was rebuffed by Congress, which had voted the original ban. Now the Carter administration, too, has announced its intention to seek a congressional reversal. Military sales would be resumed and a $1-billion unapproved defense agreement would be taken off the shelf and renegotiated.

The elements of the standoff have not materially changed. Only the leadership in Washington has changed. The Turks still hold a disproportionate 40 percent of Cyprus by military force. There still is no reliable sign that the Ankara leaders intend—or feel themselves politically able—to order a withdrawal. Any decision by the U.S. will still have volatile impact elsewhere in the Aegean. For while Mr. Carter's announced proposal contains a major arms aid sweetner for Greece, the opposition in Athens already has begun drumming the intended policy shift into a popular storm against American "perfidy."

The president has based his judgment on a calculation that continued sanctions against the Turks will do unacceptable harm to NATO, of which Turkey remains a sullen and restless member. Mr. Carter evidently feels also that the Greek displeasure can be mollified. These were the same arguments that Gerald Ford offered and that the majority in Congress found unpersuasive. They will be debated again, and perhaps to a different result.

What is plain, however, is the almost total incapacity of the U.S. to influence the behavior or policies of a major aid and arms client. The embargo's end will only formalize the confession of impotence. And, sadly, amid these considerations of petulance and injured pride, the issue that was the origin of it all—the question of a just Cyprus settlement—will have been deftly, almost casually nudged aside.●

## DEFERRED COMPENSATION

● Mr. GRAVEL. Mr. President, recently the Senate Finance Committee Subcommittee on Pivate Pensions and Employee Fringe Benefits held hearings on a proposed Treasury regulation which would effectively terminate all the deferred compensation plans in the United States. In response to the Treasury action I introduced S. 2627, which would require the Treasury to continue its historical treatment of publicly sponsored deferred compensation plans.

These deferred compensation plans allow an employee, in a year prior to the year in which he may be entitled to income, to elect to defer a part of that income until his retirement. Then, in the next year a portion of his salary is held back by the employer. The employee receives instead of the withheld portion of his salary an unsecured claim against his employer. Until February 3 of this year Treasury took the position that the deferred income was not taxable until the employee retired and was paid the money due him. On February 3, after 6 years of rulings the Treasury reversed its position and said that from now on the deferred income will be taxed at the time of deferral, rather than at retirement. This effectively makes such plans pointless, because the employee must take the salary in order to pay the tax rather than defer a portion of his income. If he defers the income he will not have the money to pay the tax. Thus, this important vehicle for the accumulation of retirement income will disappear if the proposed Treasury regulation takes effect.

An important question of tax policy was raised in our hearings. The Treasury Department took the position that the doctrine of constructive receipt justifies their new position on deferred compensation plans. The doctrine of constructive receipt is an interpretive provision of tax policy which says, in layman's terms, that if a person has a right to receive income currently and turns away from that income he will still be treated as receiving it and be required to pay tax on the amount.

Treasury's application of the doctrine in this case is inappropriate and a broad extension of what, up until now, has been a very clear rule of the tax law. During our hearings we received testimony on this issue on behalf of the Rochester Tax Council from G. Kenneth Christrup, director of taxes for Xerox Corp. I ask that an excerpt of Mr. Christrup's testimony discussing the issue of constructive receipt be printed in the RECORD.

The material follows:

EXCERPT

The proposed regulation is inconsistent with published administrative and judicial precedent and exceeds the delegated rulemaking authority.

Although it is well recognized that gross income includes amounts *received* as compensation for services, there is a long line of cases which stand for the proposition that a taxpayer does not currently realize compensation income where he has irrevocably agreed to defer its actual receipt at a time before the date such income was actually payable to him. *Howard Veit*, 8 T.C. 809 (1947) and 8 T.C.M. 919 (1949); *Commissioner* v. *Oates*, 207 F. 2d (1953), affg. 18 T.C. 570 (1952); *Ray S. Robinson*, 44 T.C. 20 (1935). The Internal Revenue Service, after initially testing this proposition through numerous court cases, 18 years ago acquiesced in the decisions and published Rev. Rul. 60–31, 1960–1 C.B. 174, which is consistent with the case law, has not been modified or lim-

ited in any court decision since, and has basically represented the settled doctrine in this area for almost two decades.

The proposed regulation now seeks to reverse this settled doctrine and to take a radically different approach which is not supported by any existing precedent in the field of income taxation of compensation. Furthermore, the proposed regulation is contrary to all of the judicial and administrative precedent in other areas of the tax law dealing with the time of realization of income, such as the law dealing with deferred payment contracts, casual sales of personal property, and deferred interest government bonds. See *J. D. Amend*, 13 T.C. 178 (1949); *Harold N. Sheldon*, 62 T.C. 96 (1974); *Hineman* v. *Brodrick*, 99 F. Supp. 582 (D. Kan. 1951); Rev. Rul. 58–162, 1952–1 C.B. 234; Rev. Rul. 73–210, 1973–1 C.B. 211, Code sections 454 and 1232. It is well settled that a taxpayer is not found to arrange his affairs in such manner as will result in the most severe tax impact. *Gregory* v. *Helvering*, 69 F. 2d 809 (2nd Cir. 1934), aff'd. 393 U.S. 465 (1935).

While it is certainly true that the Secretary can interpret the meaning of sections of the Internal Revenue Code by administrative pronouncements, such interpretative rules must be consistent with the Code and must be made before the statutory interpretation is authoritatively settled by the courts. *Brushaber* v. *Union* P. R. Co., 240 U.S. 1 (1915); *M. E. Blatt Co.* v. *U.S.*, 305 U.S. 267 (1938); *Fawcus Machine Co.*, v. *U.S.*, 282 U.S. 375 (1930); and *Bingham's Trust* v. *Commissioner*, 325 U.S. 365 (1944).

The present proposed regulations are in effect legislation by administrative fiat. Furthermore, the proposed regulation 1.61–16 is not in accord with the express terms of sections 61 and 451 and is contrary to long-standing judicial interpretations of these sections.

It is well settled under section 451 that a cash basis taxpayer is in "receipt" of an item of gross income when he actually receives the element of gross income as cash or the equivalent of cash, or when he constructively receives the element of gross income as cash or the equivalent of cash. Regulation 33, Revenue Act of 1918; Regulation § 1.451; *Old Colony Trust Co.* v. *Commissioner*, 279 U.S. 716 (1928); *Hamilton National Bank of Chattanooga*, 29 BTA 63 (1933); *Ross* v. *Commissioner*, 169 F. 2d 483 (1st Cir. 1948). Until there is actual or constructive receipt of compensation, a cash basis taxpayer does not include such compensation in income.

*A fortiori*, there is no actual receipt of cash until the compensation is actually paid. Therefore, only two theories are available for finding "receipt" of deferred compensation prior to the actual receipt of the cash: 1) the cash equivalency doctrine, and 2) the constructive receipt doctrine.

Invoking the cash equivalency doctrine (or economic benefit theory as it is also called) requires receipt of property rights which are both unconditional and assignable (*Frank Cowden Sr.*, 289 F. 2d 20 (5th Cir. 1961), reversing 32 T.C. 853 (1959)). Receipt of an unfunded and unsecured promise to pay deferred compensation is not property and thus not income to a cash basis taxpayer. See proposed regulation 1.83–3(e). It is difficult to conceive how the cash equivalency doctrine could support an attempt to tax something which is not property as an item of gross income.

The constructive receipt theory results in "receipt" under section 451 only where the taxpayer has an unconditional right to draw on amounts credited to his account or set apart for him (See, *United States* v. *Christine Oil and Gas Co.*, 269 Fed. 458 (1920) and Reg. § 1.451–2(a)). Such an interpretation of the word "receipt" as used in section 451 is suggested by the legislative history to section 213(a) under the Revenue Act of 1921, the precursor of section 451, as set forth in the Conference Committee Report to the Revenue Act of 1924, H. Rep. 844, 68th Cong., 1st Sess., p. 16, which states that "items of gross income should be considered to be received in the taxable year in which they are unqualifiedly made subject to the demands of the taxpayer."

The proposed regulation seeks to expand the meaning of "receipt" beyond any interpretation of that term to date. It is clearly an interpretation inconsistent with all precdent and contrary to the stated Congressional meaning of that term, and therefore beyond the rule-making authority delegated to the Secretary under section 7805. Furthermore, the proposed regulation attempts to stretch the theory of cash receipts to the point where the distinction between the cash receipts and accrual methods of accounting is destroyed.

Nor can the proposed regulation be supported by any application of the assignment of income doctrine, which deals solely with the deflection of income between taxpayers and not with the timing of realization of such income. See *Lucas* v. *Earl*, 281 U.S. 111 (1930); c.f. *United States* v. *Bayse*, 410 U.S. 441 (1973).

It has long been accepted that the language of section 61 was used by Congress to exert "the full measure of its taxing power." *Helvering* v. *Clifford*, 309 U.S. 331, 334 (1939). However, there is weighty authority for the proposition that there is no income until the taxpayer receives something "for his separate use, benefit, and disposal . . ." *Eisner* v. *Macomber*, 252 U.S. 189, 207 (1919); or until there is an instance of "undeniable accessions to wealth, clearly realized, and over which . . . taxpayers have complete domination." *Commissioner* v. *Glenshaw Glass Co.*, 348 U.S. 426, 431 (1955). The proposed regulation goes far beyond any current theory of when gross income is realized by requiring a taxpayer to include as an item of gross income an unrealized amount which he is not yet entitled to receive and over which he has no domination or control. Such a theory of gross income is clearly inconsistent with the constitutional requirement that gross income involves an element of realization. Mere appreciation of value, remote possibilities of gain, and naked promises have never constituted realization under section 61.

We believe that, since the proposed regulation goes well beyond any precedent requiring an inclusion in income prior to the year of actual receipt and reverses a long-standing body of judicial and administrative law, it represents an unreasonable use of the delegated authority to issue rules and regulations and is beyond the delegated rule-making authority. Furthermore, because the proposed regulation attempts to expand the definition of gross income as encompassing amounts over which a taxpayer has no present entitlement, it is certainly inconsistent with any judicially developed theory of gross income defining the parameters of the Congressional mandate.●

## THE NEUTRON BOMB

● Mr. HATCH. Mr. President, I was among those Members of the Senate that expressed surprise and concern when President Carter announced that he was delaying the production of the neutron bomb. I felt at that time, and still do, that this weapon would provide NATO with a valuable addition to its defensive forces in Europe. My concern was echoed by our allies in Europe, allies who are very much aware of the impending Soviet threat.

Mr. President, reports by the media today indicate that France has secretly exploded an experimental neutron bomb at the Mururoa nuclear testing site in the South Pacific. The initial reports of this test were reported by the French newspaper France Soir. They have indicated that the French are about the same place as the United States and about 10 years ahead of the Soviet Union in the area of neutron weaponry. They further reported that French President Valery Giscard d'Estaing had not yet made the decision to continue the development and production of the weapon, but that in all likelihood he would give the go ahead for production.

What now concerns me is that the United States has already made the decision to delay the development of the neutron bomb. With the revelation that the French are on the verge of producing the bomb, is there any doubt that the Soviet Union will step up their own neutron program. I think that it is imperative that the administration reconsider this decision. What good will it do if the United States drops the program and other nations continue to push forward? The people of Europe know full well the need for improved defense systems. The Soviet Union and its Warsaw Pact allies have built up a tremendous advantage in conventional weapons along the borders of Central Europe. They have amassed the largest concentration of armor in the history of the world. Anyone familiar with the tactics of warfare knows that to make effective use of a large number of tanks you must use them in a fast paced offensive that is designed to bring the enemy to its knees in a relatively short period of time. If we learned nothing at all from the horrors of World War II, we learned that a "blitzkrieg" attack can be devastating and almost impossible to stop without a force equal to the attacking force. Since we do not have the conventional strength to match the Warsaw Pact strength, nor do we appear to have the resolve to obtain the strength, it is mandatory that we take the proper steps to use the advantages of technology to delay such an attack. By delaying it, we in effect buy the time needed to organize a counteroffensive against it.

Mr. President, I think that the majority of this body has read about the neutron bomb and heard of what it does and does not do, yet in reality we know very little about this weapon. I have had the opportunity to read a short article about the neutron bomb that explains the process in terms easily understandable to the layman. This article, by a Mr. H. M. Agnew is an excellent summary and explanation of neutron weapons and the combined fission-fusion weapons as compared to conventional and pure fission weapons. I ask that Mr. Agnew's article appear at this point in my remarks.

The article follows:

NEUTRON BOMBS

There has been so much confusion and misinformation and lack of basic information about the "neutron bomb" or "enhanced radiation" weapon that some clarification would appear to be appropriate; if not to as-

sist the bureaucrats, at least as a reference for scholars in the field of political-military science.

I will not attempt in detail to explain why "enhanced radiation" weapons have special tactical utility, but will simply endeavor to explain what the basic facts involved are. First, all fission nuclear weapons emit radiations. These radiations are the identical radiations which nuclear power plants emit. When uranium fissions, it doesn't care whether it is in a bomb or a reactor. When uranium does fission, it produces various forms of radiation such as $\gamma$ rays, x rays, $\beta$-particle or rays, neutrons, alpha particles, and fission fragments which are identical to the nuclear waste products with which people are concerned in nuclear reactors and which sometimes is called fallout in the case of nuclear weapons. The energy released in fission is primarily carried off in the form of kinetic energy of all of these products. Its magnitude can be described in terms of hv for "rays" and as $\frac{1}{2}$ $mv^2$ for the particles (h is Planck's constant, v is the frequency of the radiation, m is the particle mass, and v is the particle's velocity). Now it was realized in the early 50's that it was really possible to produce another nuclear reaction called fusion. This involved putting together isotopes of hydrogen called deuterium and tritium under certain conditions so that they would produce other nuclei and radiation. In the fusion process, the main primary radiations are neutrons, $\alpha$ particles, protons, and tritons. So, in addition to the "radiations," the fusion process also produces nuclear wastes, but they are of a somewhat different nature. But, they are radiation waste products nevertheless. I predict that many of those who so erroneously condemn the fission process for energy production because of the waste disposal problem and are the great Gurus of and proponents for clean fusion power will be more objective when, hopefully, fusion power becomes a reality.

Relevant to this discussion is that when the fusion process takes place between deuterons about 4 MeV of energy is made available, and when fusion between deuterons and tritons occurs about 18 MeV of energy is made available. But when fission takes place about 210 MeV of energy is made available. This energy is carried off by the radiation and particles produced. One can visualize it somewhat like a fourth of July sparkler. Some of the sparkles go further, being bigger, being brighter. The energy being carried off from a central region.

To date, the only practical fusion devices have been thermonuclear bombs, hydrogen bombs, and, to date, in order to produce the fusion energy in any appreciable quantity a fission trigger has been required. So, "hydrogen bombs" have a fission component. However, it has been possible to vary the fission/fusion ration. In practice, it has been possible to produce with relatively little fission a lot of fusion. One should also keep in mind that per a single fission on the average about two neutrons are produced plus 210 MeV of energy. In the fusion process, and let's limit our discussion to the deuteron-triton reaction, one high-energy neutron and about 18 MeV of energy is produced. So, per neutron, the fission process produces about five times more energy and appreciably more waste products since the mass of the inert ingredients is so much larger. In all cases, the "radiations" when they encounter the air of the surrounding media generate heat which produces a blast wave if the heating of the air or medium occurs in a very short time, as in a bomb. In a reactor, the total energy release time is so much longer, that the heat can be carried off for the beneficial purpose of generating electricity. So the fission process produces neutrons, heat, blast, and fallout, and the fusion process produces neutrons, heat, blast, and fallout but produces many more neutrons and, specifically, more high-energy neutrons in relation to the other products than does the fission process.

Now, back to the "neutron bomb" or tactical nuclear weapon. A problem presented to a modern defender of western Europe is that presented by the massive armor component possessed by the Eastern bloc. Tanks are quite immune to small arms, to blast, and to brief exposure to heat. However, some of the products in fission or fusion can readily penetrate the armor of the heaviest tanks. The radiation doesn't bother the tank, but certain of the radiations such as neutrons have what the medical profession call a high LET (linear energy transfer). Meaning they interact with living tissue in a strong manner. When radiation interacts with living tissue, it destroys the cells. This is the same mechanism by which the radiation therapist attempts to treat cancer by selectively destroying more cancer tissue than healthy tissue through a succession of exposures to "bursts" of radiation. Neutrons are one of the most effective means of destroying tissue, healthy or malignant.

Again, back to the "neutron bomb." It was perceived many years ago, and one of the earliest advocates was Sam Cohen who was with the Rand Corporation, that a potential defense mechanism against tanks was neutrons. Not that the neutrons would bother the tank, but they could penetrate through the armor and affect the crew. Unlike a bullet or projectile, they would not cause instant death to a crew member but, in sufficient dosage, could eventually in a matter of a few tens of minutes to hours kill or make the crew completely ineffective. Consequently, the use of tactical nuclear weapons against tanks became a viable option. However, keep in mind that for the most part the heat, blast, and fallout normally associated with nuclear bombs except when encountered in very close proximity have little effect on the tank itself. The radiation, neutrons, and $\gamma$ rays would however affect the crews. So, tactical fission bombs were designed to do just this. However, these bombs also presented problems to the users. In order to produce neutrons in sufficient quantities through the fission process, the total yield of the bomb was of necessity relatively large. This meant they couldn't be used close to troops on the defense because of the heat, blast, and eventually the fallout which are present. These weren't desired in the first place against armor.

These phenomena were called collateral effects and, in general, were not desirable, especially in areas where there might be noncombattants, or in a defensive action which would be taking place on friendly territory. Since the kill mechanism desired was neutrons, it was decided to investigate the possibility of "enhancing" the neutron radiaton from a bomb. This simply meant endeavoring to get more neutrons with less of the other nuclear by-products. It was clear that the way to do this was to employ the fusion reaction made possible by a fission trigger. And, so the "enhanced radiation" or "neutron bomb" was developed.

It clearly has advantage for the military defender as well as for the nearby noncombattant. It can produce the same number of desirable neutrons as the fission bomb which it replaces with five to ten times less collateral effects such as blast, heat, fission waste products (fallout), thereby greatly reducing collateral damage. This allows the defenders to employ the weapon in a much more selective fashion with equal military effectiveness. When neutrons interact with the air, they on occasion produce $^{14}C$, a long-lived radioisotope which is continuously being produced in nature and which is used so beneficially in archeological dating. Fission neutrons produce about twice as much $^{14}C$ as do the fast neutrons from a "neutron bomb." So, if one is worried about any long-range implications of $^{14}C$ production in the atmosphere, the "neutron bomb" is preferable over the common tactical fission bombs.

I feel confident that had the facts been properly explained initially, even those who oppose nuclear weapons would have had to concur in stating that it is better to have this type of tactical fusion nuclear weapon than the conventional pure fission bomb which requires five to ten times greater yield but provides no greater effectiveness against conventional armor.

Mr. HATCH. Mr. President, as I have previously stated, I am very concerned over the administration's decision to delay to production of the weapon. The fact that France has now developed its own weapon now forces the United States, it appears to me, to go ahead with the production of the weapon also. I have written a letter to President Carter expressing this point of view and ask that it be printed in the RECORD at the conclusion of my remarks. I urge everyone of my colleagues to study this situation and take the action that they deem necessary. Hopefully, they will come to the same conclusion that I have come to, that we need to produce and deploy the neutron bomb as a deterrent to the Soviet threat in Central Europe.

The letter follows:

WASHINGTON, D.C.,
*April 19, 1978.*

The PRESIDENT,
*The White House,*
*Washington, D.C.*

DEAR MR. PRESIDENT: I have previously communicated to you my concern over your recent decision to delay the production of the neutron bomb. In my telegram at that time I urged you to reconsider this decision on the basis of the support from our allies in NATO. I do so again with renewed emphasis.

I have read reports in the media that France has conducted tests of its own concerning the use of neutron weapons. Reports indicate that they have already tested an explosion of a neutron bomb at their test site in the South Pacific. The implications of this are evident, they intend to pursue the development and production of neutron weapons. These reports place the French at about the same place as the U.S. in advancement of the weapon, and about ten years ahead of the Soviets. It should now be obvious to all that if France is to continue the development of such a weapon, then the Soviet Union will also continue its efforts to develop a neutron bomb.

In view of the facts before us, I think that it is imperative that the United States proceed with the development of is own neutron bomb. Continued delay will only result in our falling behind in this crucial area. To stop the program now would allow the Soviet Union to catch up and pass us in a sector that we now hold a substantial advantage. I hope that you will give this matter new consideration. I am aware that political considerations are involved, the fact that a reversal of a previous decision may be politically harmful, but I am convinced that the American people realize the need to re-evaluate our position on this issue.

Very truly yours,

ORRIN G. HATCH,
*U.S. Senator.*●

## FREEDOM ON THE RISE

● Mr. PELL. Mr. President, Freedom House recently issued its annual report on the status of freedom in the world.

Its analysis showed that movement in 26 countries toward greater freedom during 1977 reversed a 4-year downward trend.

This turnabout coincided with the completion of President Carter's first year in office and with the new administration's great emphasis on human rights in American foreign policy. I also believe President Carter's initiatives helped to create the climate for significant gains around the world.

According to Freedom House, in January of 1978 close to 35.7 percent of the world's 4 billion people, living in 44 nations and 25 territories are considered free. That is up from 19.6 percent in 1977. Despite this encouraging leap forward—resulting largely from the reappearance of India and Spain in the "free" camp—it is still distressing that 42.9 percent of the world is categorized as "not free," the remaining 21.4 percent being "partly free."

If any further progress is to be made in expanding the number of nations in the free category, a continuing commitment and effort by the United States to support the cause of freedom around the world will be required. I know that President Carter will continue to exercise leadership in this area, and I wish to lend him my full support.

In this connection, some observers have been concerned that the administration's human rights campaign could have a negative impact on our relations with the Soviet Union and Eastern Europe in areas such as arms control. As chairman of the Arms Control Subcommittee of the Foreign Relations Committee and Cochairman of the Commission on Security and Cooperation in Europe, I have been intimately involved in both arms control and human rights issues. It has been my view that arms control and human rights discussions can be discussed with the Soviets and their allies on separate tracks without one interfering with the other.

This view seems to be shared by the administration according to a recent article by the columnist Jack Anderson. In his column of March 21, Mr. Anderson quoted from portions of Presidential Review Memorandum No. 28 in which it is stated that—

> The Soviet Union will continue to pursue its perceived interests in arms control, trade, scientific and cultural exchanges and other areas of our bilateral relations, regardless of our advocacy of human rights.

My own experience in visiting the SALT talks in Geneva and the Belgrade Conference to review compliance with the Helsinki Accord certainly supports the administration's assessment as reported by Jack Anderson. I urge my colleagues to continue their support of the President's human rights policy, for unless America makes it clear that it is serious and united in its determination to support and promote the cause of human rights everywhere, I fear that next year's Freedom House report will not be a cause for rejoicing.

Mr. President, Mr. John Richardson Jr., the president of Freedom House, recently wrote an article on the Freedom House report that was published in the New York Daily News of January 1, 1978. I ask that the full text of that article be printed in the RECORD.

The article follows:

HUMAN RIGHTS

(By John Richardson, Jr.)

WASHINGTON—Concern for human rights is the hallmark of Jimmy Carter's first year as President. His initiatives, in the judgment of Freedom House, helped create the climate for significant gains in political rights and civil liberties in 26 countries of Africa, Asia, Europe, Latin America and the Middle East. The question for 1978: Will Washington be bluffed into muting its human rights appeals?

Not all of the greater freedom for 1.078 billion people, measured in the Freedom House Survey, can be attributed to the President's actions. Liberalizing changes in Spain and Morocco began before President Carter took office.

But the President did create an unusually favorable environment for personal freedom. The limited gains in Iran, Thailand and Taiwan were probably related to the change in attitude in the United States. The vast improvement in India and the gain in Sri Lanka may also have drawn some moral sustenance from U.S. human rights initiatives. The President repeatedly took public and private steps to demonstrate a basic American concern for freedom.

For a while he seemed to frighten friend and adversary alike by persistently invoking human rights. Not only the Soviet Union warned that detente might be jeopardized. The French and West Germans expressed fear that the Russians might retaliate by tightening restrictions in West Berlin or elsewhere in Western Eruope.

Indeed, repressive regimes remain powerful and in the majority. Despite significant gains in some countries in 1977, personal freedoms were further restricted in nine nations with 123 million people (mainly in Africa, Latin America and the Caribbean). Two thirds of all the world's people still suffer political repression, cannot expect relief from the courts and are denied free speech and access to free news media.

It is unlikely that many poor Third World countries will quickly follow the path taken in March by India. She proved that an oppressive system can be reversed; that the poor must not wait for freedom until after ample food, clothing and housing are assured. India, however, had pursued a democratic tradition before it was subverted in mid-1975. Most Third World countries have never extended political rights and civil liberties to their citizens.

Though the Carter human rights initiatives embarrassed many capitals, Americans seem politically comfortable standing before the world on the side of human freedom. And as 1977 progressed, dissident Eastern Europeans encouraged Americans to mix talk about human rights with specific political and economic pressures on oppressive regimes.

At the Belgrade Conference to reassess the Helsinki Accords, the U.S. showed that it was possible to challenge Marxist restrictive systems without becoming belligerent.

SALT 2 and detente have not been endangered at Belgrade. On the contrary, there is the possibility that the U.S. may be bluffed into virtual silence on basic human rights issues.

In 1978, the Carter administration will have the opportunity to act upon the lessons learned during Year One of the new, still feeble Human Rights Era. The administration should have discovered that consistency is not possible for human rights. We can publicly invoke a high universal standard: an end to torture and cruel imprisonment, a call for broader political rights and civil freedoms everywhere. Yet in the interest of our security and others', we shall need to maintain relations and even give support to authoritarian regimes.

That will require the U.S. to act with more sophistication this year than last. We should encourage other democratic countries—especially those in the Third World—to join us in applying moral and other pressures on restrictive regimes.

We should move firmly in UNESCO, with Third World help, to resist establishing governmental control of the news media as a universal standard.

Perhaps most important for the longer term, there should be greater U.S. support for private organizations in cultural, business, trade union and other fields. They should be helped to establish ties with counterparts abroad who are also struggling for freer institutions. Such non-governmental pressures could become the primary thrust in our human rights effort.

There may be no miracles in 1978. Significant achievements are possible, however:

India to strengthen its freedom, several Latin American nations to permit the free elections they promise, small gains to be expanded in several Black African countries, and continued progress toward national elections in Nigeria.

The survivors of 1.2 million Cambodians slain by the communist regime since the war ended, and the 200,000 Vietnamese in Hanoi's "re-education" camps will probably wait still another year for deliverance.

Despite the gains of '77, freedom thrives in barely 35 percent of the world.

It is necessary in '78 to sustain the American human rights effort that began auspiciously one year ago.●

## ENERGY AND EMPLOYMENT: SECRETARY SCHLESINGER'S VIEW

Mr. PERCY. Mr. President, I recently corresponded with the Secretary of Energy, Mr. Schlesinger, on the subject of the employment impact of energy alternatives. I wish to share this correspondence with my colleagues.

I had questioned a statement he made on the positive employment effects of nuclear power. While I agree with Mr. Schlesinger on the need to include nuclear in our mix of energy options, the available evidence I have seen indicates that conservation and solar energy create more employment per unit of energy produced or saved than does nuclear power and other heavy construction.

I am quite pleased that Mr. Schlesinger tells me he has underway several studies of specific employment effects of energy strategies, including regional and skill distribution. The Secretary is to be commended for his leadership in this area. The information these reports will provide is crucially needed. For too long we have made energy policy decisions which gave too little consideration to secondary economic impacts such as employment. I plan to follow with interest the progress of this work.

Mr. President, I ask unanimous consent that Mr. Schlesinger's speech to the AFL–CIO of December 9, which prompted our correspondence, plus my letter of February 6 and his response of March 21, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF ENERGY,
*Washington, D.C., March 21, 1978.*

Hon. CHARLES H. PERCY,
*U.S. Senate,*
*Washington, D.C.*

DEAR CHUCK: Thank you for your letter inquiring about comparative analyses of the labor impacts of energy conservation (i.e., energy end use) and production. We believe that increased investment to improve the energy efficiency of domestic energy consuming capital stocks will create new jobs and promote healthy economic growth, particularly by reducing the heavy drain on our resources caused by oil imports. The conservation initiatives which we propose in the NEP not only contribute to productivity, but will create many new jobs in home supply industries, machine tool and similar fields. Looking beyond the direct stimulus of investment in enhanced efficiency of end use, the funds saved because of lower fuel use will be expended on other needs. These "secondary" effects of conservation would also stimulate economic growth and employment, although total "net" impacts are not easy to isolate.

The resolution of our energy dilemma will require both investments in the development of new domestic supplies and investments in improved efficiency of energy end use. The employment generated by these investments will vary, as you suggest. The mix in amounts of expertise and skill required in jobs created by different investments also will vary, both between conservation and supply investments and within these areas. As you have noted, most end-use sector investments would create jobs at existing points of energy use (cities, communities, etc.) and would not require large influxes of people to new areas where new energy supply plants must be located. The issues you raise concerning relative employment impacts bear more attention, and we already are involved in such studies. We are undertaking two studies of the impacts of the solar and residential retrofit programs of the NEA and are now looking into the data requirements for effort along these lines.

With warmest personal regards,
Sincerely,

JAMES R. SCHLESINGER,
*Secretary.*

---

U.S. SENATE,
*Washington, D.C., February 6, 1978.*

Hon. JAMES SCHLESINGER,
*Secretary, Department of Energy,*
*Washington, D.C.*

DEAR JIM: I have recently received a copy of your speech of December 9, 1977, which touched upon the isseus of economic growth, energy, and employment. I wish to raise several points concerning the arguments put forward.

I am in full and total agreement with you that we must pursue economic expansion, and not let our energy problems interfere with our standard of living. Only a growing economy can provide more jobs and a better life for all. But I fear your speech also implied that increased energy supplies, particularly central station electric plants, are necessary for economic expansion.

It is my understanding that, though energy curtailment disrupts our economy, improved energy efficiency through investments in new and existing buildings, factories, and vehicles is the least costly new source of supply. To install new control systems for heating and cooling systems, or to refit a heat recuperator on an industrial furnace is highly labor-intensive. Furthermore, conservation retrofits not only create jobs in those construction trades hard hit by unemployment, but also produce work in our cities where the unemployment problem is greatest.

In contrast, I am told that centralized coal or nuclear plants rely on a few specialized skills which are in short supply (such as nuclear-qualified welders). They create fewer jobs per dollar invested, since much of the cost of a plant is capital financing charges or pure inflation. And they create jobs in remote locations, causing temporary booms that disrupt those rural areas.

I am of course aware that you endorse conservation on other grounds. But is the Department of Energy working on any analyses of the labor impact of conservation and production options? I anticipate that such an analysis would show an employment bonanza would result from energy efficiency investments. I believe it would provide essential information for our national energy debate.

I look forward to your reply.

Warmest personal regards,

CHARLES H. PERCY,
*U.S. Senator.*

---

ENERGY LEGISLATION

So I turn now to the characteristics of the job that we must do and what the President has proposed in the energy legislation. It is, as I have indicated, complex legislation, touching on every aspect of American life. But there is one fundamental axiom that I want to stress: the entire program is based upon the premise that the economy must continue to expand, that we must provide more jobs, that production must rise, and there must be increased productivity. Unless we have that economic expansion in the face of growing energy difficulties, we will find that we are unable to maintain either the economy or the American way of life. Therefore, energy for economic activity must have first claim upon the available supplies of energy. And there must be adequate energy to keep our factories going.

This brings me to a philosophy of recent years which can only be characterized as an anti-growth philosophy, the feeling that we have expanded too much, that appetites have been whetted that should not have been whetted, that it has endangered the environment, and the like. We can have nothing to do with that kind of unrestrained attitude which is anti-growth.

Restraining growth means restraining the growth of jobs. It means unemployment. It means the failure to provide the best part of the American way of life to a growing number of our citizens. And in this connection, I know that the AFL–CIO has strongly endorsed getting on with the creation of new sources of energy and the building of nuclear plants. We have in the works, and as soon as the Congress has a spare place on its agenda, we will submit a nuclear licensing bill designed to expedite the process of licensing and permit us to make better use of nuclear energy.

We can have no truck with an anti-growth philosophy, because it endangers the living standards of every American.

We must focus upon the expansion of the economy and the expansion of jobs. We are now in a position in which our balance of trade deficit is reaching almost $30 billion a year, principally due to our dependence upon foreign sources of energy supply. If we are able to reverse that, then we will be in a position to use those resources here at home rather than exporting unemployment. * * *

---

## AUSTRALIA: MOVING TOWARD A SOLAR SOCIETY

Mr. PERCY. Mr. President, an article from the Australian Information Service publication, volume 7, 1977, recently came to my attention detailing the steps the Australians are taking toward transforming their society entirely to one run by solar energy. Their progress is impressive.

Australia, blessed with an abundance of sunlight, has always been in the forefront of solar technology development. Twenty years ago, it was the first to produce a solar water heating system. Today, flat-plate solar collectors have become a common sight throughout Australia, heating 30,000 homes as well as numerous hotels, hospitals, and schools.

The United States is clearly lagging behind Australia in this field. In fact, we are presently importing solar energy technology from the Australians. Certain steps have been taken to correct this situation and place the United States on equal footing with Australia and other nations with respect to development and utilization of this technology. Most recently, a package of legislation was introduced by a coalition of Representatives and Senators, to which I belong, designed to promote the use of solar energy both here and abroad. However, while visibility and assistance is growing for our solar industry, there is much we can learn from the Australians.

Mr. President, I ask unanimous consent to place this article on solar energy in Australia in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOLAR POWER FOR A SUNBURNT LAND

(By Jane Ford)

A remote Australian town powered by solar energy—a dream or a reality? Solar energy researcher Dr. Peter Carden believes it could well be a reality in 10 years time.

Dr. Carden, leader of the Energy Conversion Group at the Australian National University has been working on a method of utilising and storing solar energy on a mass scale for the past 4½ years. He and his colleague, Professor Stephen Kaneff, head of the University's Department of Engineering Physics, say their work could lead to the development of a system which could be used to power a small outback town before 1990 and much larger towns before the turn of the century. Any surplus energy would be exported as solar fuels and fertilisers to countries less well-endowed with sunshine.

The basic system, known as the solar-ammonia process, is unique. It involves using the sun's energy to decompose ammonia into nitrogen and hydrogen. This is a heat absorbing chemical reaction and the hydrogen and nitrogen can be transmitted to a central plant where they are resynthesised to ammonia to release energy. This can be used to make steam to power a generator and produce electricity, in the same way as oil or coal does at present.

They envisage harnessing this power from the sun using a large number—about 10,000—paraboloidal mirrors, computer-controlled to follow the sun and housed on tracts of semi-arid land outside the township.

At present the project is at an experimental stage and the university team hopes to get sufficient funds to build a small prototype plant to test its research over the next five years. This would provide the information needed to build a much larger plant which could be operating in a small rural or mining town in 10 years.

Such a plant could be used to power a town of about 7,000 people and would generate about 10 mega-watts of electricity.

The team believes a development of this kind would be a boon to Australia's isolated outback towns, which are already facing huge transport costs for access to their portion of the world's dwindling supply of fossil fuels.

Storage of energy from the sun is one of the

main problems facing the world's solar energy researchers but Dr. Carden and Professor Kaneff believe they have found a solution. They say surplus energy in the form of hydrogen and nitrogen could be stored below the ground, under pressure, in natural or man-made reservoirs, in disused oil or gas wells or very deep water bores.

Another advantage is that the collection mirrors could be made from cheap pressed steel, in much the same way as car bodies are now produced, and then covered by inexpensive aluminum film.

Dr. Carden said there were about 15 different chemical reactions that could be used to harness solar energy in this way but he believed ammonia was the safest and most practical.

Cost calculations by the researchers show that electricity produced by the system could compete with electricity produced in remote areas of Australia from present fuels such as oil and would become more competitive as the prices of conventional fuels rose.

"We believe our system will not only provide a stand-alone source of electric power but also act as the starting point for new solar-powered industrial complexes producing fuels and fertilisers," said Dr. Carden.

The process could be integrated with the ammonia manufacture process. Ammonia, a standard fertiliser, could be sold in conjunction with the electricity production. Profits from the sale of surplus ammonia could be used to reduce electric power costs—an arrangement which could be economically viable before the advent of commercial solar systems devoted entirely to ammonia production.

Ammonia is also the basis of many plastics, resins and adhesives industries, and Dr Carden believes it could even take over from petrol. He says that present day cars could easily be converted to run on ammonia, a non-polluting gas, which evaporates into the atmosphere.

The research team is enthusiastic about the prospects for the project. "We think we have developed one of the best and cheapest ways of collecting solar energy, we cannot really think of a cheaper way. We think we have a good answer to the storage problem," said Professor Kaneff.

"It is adaptable in terms of size and is viable from about one megawatt upwards. It is technologically uncomplex and does not require any additional expertise to what is already available in this country and it is a multi-purpose scheme".

"The output does not have to be electricity, it could be high temperature heat, it could be steam, it could be electricity, it could be hydrogen, it could be ammonia. And it promises to be economical".

However, the solar-ammonia system is a long-term project and if successful, will not make much impression on Australia's energy problems until the 1990's due to the time necessary for development.

By then, it is predicted that Australia's oil supplies will have run out, gas reserves will be dwindling fast and vast coal reserves, which should last well into the 21st century, may be increasingly used to produce fuel for transportation.

Many solar energy researchers believe Australia should concentrate on using known solar energy technology to reduce the use of oil and gas so that remaining supplies can be strung out until alternative fuels are found.

Domestic and industrial solar water heating are seen, at present, as the main ways of achieving this. The Australian Commonwealth Scientific and Industrial Research Organization (CSIRO) produced the first commercial solar water heating unit more than 20 years ago.

Now flat-plate solar collectors are a common sight on homes, schools and hotels in northern Australia and are being more frequently installed by home owners in the southern states. At present, about 30,000 houses throughout Australia have solar water heaters.

Demand is growing so rapidly that production has increased fourfold since 1973 and there is a local industry with an annual turnover of $10,000,000. Export markets for complete systems or components have been found in nine countries including the United States and Japan. One Australian maufacturer has licensed companies in New Zealand, Japan and South Africa to produce water heaters it has developed from CSIRO designs.

Already, solar energy is a competitive way of heating many of Australia's 755,000 suburban home swimming pools and Mr. Roger Morse, the pioneer of CSIRO solar energy research and now director of CSIRO's Solar Studies Unit, says that solar heating can double the swimming season in pools in the southern states. He believes that very soon, local councils will ban the use of oil and gas for pool heating and solar energy will be the obvious alternative.

Solar energy is also moving into the fields of timber drying, space heating and cooling and most importantly into high temperature water heating for industry.

CSIRO is now looking at ways of producing high-grade heat, at temperatures from 60°C to 85°C (140°F to 185°F) for use in industry and an experimental unit has been built at the Division of Mechnical Engineering's Melbourne headquarters. It comprises a large array of collectors mounted on a structure similar to a factory roof. It can heat water to about 95°C (203°F), which is about 40°C (104°F) higher than the normal household unit.

And the CSIRO has recently installed Australia's first commercial solar industrial process heating plant at a soft drink factory near the national capital, Canberra. Forty-nine collectors heat water to 60°C (140°F) and supply most of the heat needed by equipment used to warm cans of soft drink from 1°C (34°F) to about 11°C (52°F) before packaging.

The collectors cover part of the factory's roof and water is pumped through them and stored in a 20,000 litre (4400 gallon) insulated tank and then passed into a can-warming tank and used at temperatures of between 50 degrees and 60 degrees (122 degrees and 140 degrees Fahrenheit).

The collectors, with a total surface area of 77m² (830 square feet) can supply all the heat required by the can warmer in summer months. Over a year the average is expected to be about 80 per cent of the annual requirement. An oil boiler makes up the balance but solar heaters are expected to cut the factory's fuel bill by a considerable amount.

"It is clear that our urgent job is to find a replacement for oil. Where solar energy can do this is in industry, where oil consumption can be reduced and oil made available for more urgent applications," said Mr. Morse.

"There is an urgent need for demonstration installations to be built throughout the country to gain operating experience in a wide variety of industries and spread across the continent to develop professional expertise in the design, construction and operation of these plants".

"The reason we are putting so much emphasis on industry is that industry needs about 40 per cent of all primary energy that the country uses and this compares with about four per cent used for domestic purposes. It's very important for us to save oil," he said.

He believes solar system heating would be of use in mineral processing and especially in food processing, where more than half the annual heat requirement is used at temperatures between 40 degrees C and 80 degrees C (104 degrees F and 176 degrees F).

The CSIRO is now planning to install a number of other demonstration solar industrial heating systems at factories around Australia to show that solar heating in industry is a feasible scheme, and to gain data and further expertise in installing the systems.

The next will be operating at temperatures between 50°C and 70°C (122°F and 138°F), followed by one at between 70°C and 80°C (138°F and 176°F). The next phase will be a steam generator.

To raise collector temperatures, Mr. Morse and his colleagues are investigating new selective surfaces and also a high transmission low-iron glass, imported from Belgium and Japan, which would significantly increase the efficiency of the collectors.

The CSIRO is not the only group in Australia looking at high temperature solar water heating. A team from Sydney University led by Dr. Brian Window and Dr. Geoffrey Harding has developed a solar energy collection system capable of producing temperatures of more than 200°C (392°F).

Its central feature is a bank of evacuated glass tubes, each tube containing, within the vacuum, a smaller tube coated with a fine metallic surface.

The surface is made of a layer of copper and a layer of iron carbide and is applied by a unique 'sputtering' process. This has been developed from plasma physics research in the University's Department of Physics and involves using an electric discharge in a gas to transfer particles of a material from one surface to another.

This surface absorbs 83 percent of solar radiation and remits only three percent of absorbed energy when operating at 200°C (392°F). Temperatures as high as 330°C (626°F) have been reached and new devices still on the research bench have increased absorptivity from 83 to 95 percent.

The researchers believe that the method has vast commercial applications, particularly for industrial uses and the team has been given a $1,080,000 grant over three years by the New South Wales Government to continue their research and build a small pilot plant at the University.

Professor Charles Watson-Munro, head of the University's Energy Research Centre, hopes that one of Australia's large industrial firms will take over the commercial production of the unit and after about three years it will be available on a large scale.

He says the system could be used for heating and cooling buildings, refrigeration, air conditioning and process steam.

'I see solar energy going a long way, particularly in the production of heat for domestic and industrial purposes. But I don't think one wants to jump madly into believing it is the panacea for all energy needs. I would think that by the turn of the century we might have between five and 10 percent of our primary energy in Australia coming from the sun. The rest would come mostly from coal and a certain amount from natural gas,' said Professor Watson-Munro. 'Oil would play a steadily decreasing role from the mid-1980's.'

Solar energy is also being used in a number of other fields.

Recently Telecom Australia—the national telecommunications service—announced that it would use solar cells to power telephones and television services in remote areas of central Australia.

The system, which will go into operation in 1979, will involve 13 repeater stations at intervals of about 45 km (28 miles) along the 560 km (350 miles) route between Alice Springs and Tennant Creek. The cells will be on the roof of each station

A cheaper and more efficient solar cell has been developed by researchers from the Department of Solid State Engineering at the University of New South Wales. It is called the Metal Insulator—Semiconductor (MIS).

The cell has produced some of the highest voltage outputs recorded by solar cells—618 millivolts, compared with other cells produced in the United States and the Soviet Union which have seldom recorded outputs of more than 600mv.

The cells are made from silicon and incorporate a positive-negative junction created by introducing impurities into a thin layer of silicon.

But all this research does not solve, what many scientists believe is the most urgent problem—to find a replacement for petroleum products used for transportation.

Research projects are underway into the production of liquid fuels from vegetations, including trees, crops and crop wastes.

One of the most promising fuels is ethanol (or ordinary alcohol) which can be produced from a variety of plant material, including trees.

There is an increasing interest in Australia's energy resources for the future. In 1973 a committee of the Australian Academy of Science produced a report on solar energy which recommended a greatly increased research effort in the fields of solar heating and production of fuels from plant materials.

The report suggested that Australia should aim at satisfying more than one third of its heat generation needs and about half its liquid fuel needs for transport from solar energy by the year 2000.

In May this year a Senate Standing Committee on national resources which had carried out a year's investigation of solar energy in Australia, recommended that an Australian Energy Commission should be established with overall responsibility for developing and co-ordinating a long-term nation energy policy.

Many scientists in Australia believe that solar energy holds the key to Australia's energy problems and Mr. Morse of the CSIRO says that if more government funds are channelled into research, Australia can develop new industries for solar heat generation and renewable fuels which, together with oil from coal, could make Australia independent of imported fuels.

## THE FUTURE OF SMALL BUSINESS IN AMERICA

Mr. PERCY. Mr. President, I have recently come across an incisive statement prepared by former IBM executive Carter Henderson of the Center for Alternative Futures on the role small enterprises can play in keeping our economy resilient and growing. It was given before the Subcommittee on Antitrust, Consumers, and Employment of the House Committee on Small Business on March 22, 1978. I wish to endorse Mr. Henderson's faith in the entrepreunurial drive of our fellow citizens and the ability of small firms to innovate.

Big is beneficial in many economic circumstances. Few would propose our switching to backyard steelmaking furnaces, or to shutting down existing large electric powerplants. Big business is especially capable of making the investments needed to sustain high productivity in the core of our economy.

Mr. Henderson's statement provides a counterpoint to this, however. He aptly shows that small business makes unique contributions to economic growth. Government cannot create jobs or innovate as more than a stopgap measure, and Government more often serves to frustrate initiative through taxes and regulations. Government must learn when to get out of the way and let business produce.

I am also flattered that Mr. Henderson singled out my proposal for an Office of Small Scale Technology, S. 2732, as an example of a constructive Government initiative for promoting innovation in the energy field.

Mr. President, I ask unanimous consent that Mr. Henderson's statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE FUTURE OF SMALL BUSINESS IN AMERICA

My name is Carter Henderson, and I am Co-Director of the Princeton Center for Alternative Futures, Inc., a deliberately small think tank in Princeton, N.J., devoted to exploring alternative futures for industrial societies.

I have an economics degree from the Wharton School, was an editor of the Wall Street Journal, an executive of IBM, and since the early 1960's have served on the Boards of non-profit organizations such as the Interracial Council for Business Opportunity, the Minority Equity Capital Company, and the Community Investment Fund devoted to strengthening small business in our country.

My testimony this morning is very brief, and in it I will attempt to make just one point which I believe is critical to any examination of the future of small business in America.

The point I want to make is simply this: in the future, small enterprises of every kind from corporations to cooperatives are going to be called upon to play an absolutely vital role in helping the U.S. economy remain strong as it enters an era of slower growth following a quarter century of post-war expansion which the 1978 Report of the Council of Economic Advisors describes as "one of the most successful periods of modern world history."

Economic growth in the United States as measured by the Gross National Product is now being constrained by multiple forces. Among them are the exhaustion of cheap, easy-to-extract resources such as iron ore and petroleum, the need to use capital to pay scores of overdue bills for past indulgences from industrial pollution to industrial diseases (not to mention social abuses such as tobacco smoking and alcoholism currently costing the nation nearly $60 billion a year), the rise of protectionism in world trade, and the failure of macro-economic management techniques including Keynesian growth stimulants.

As the mainstream American economy dominated by the Fortune 1000 experiences less vigorous growth, it will be unable to meet the nation's need for not only more jobs, but for jobs which over the next decade can absorb all the energy and talents of the biggest, best educated, and potentially the most capable labor force in U.S. history.

This is already beginning to occur, and as it does, I think we will increasingly look to small business to pick up the slack by providing opportunities for Americans to earn their daily bread by producing goods and services for what economists call their personal "use" value, as well as for their more traditional "exchange" value in the marketplace.

I want to examine the future of small business in this light. But before I do, I think it might be helpful to disaggregate small business into what I believe are its major component parts embracing all manner of small-scale enterprises from corporations, partnerships and individual proprietorships, to cooperatives, intentional communities and the American home which is our country's single most productive entity.

Most of this country's more than nine million small businesses—a majority of them in the service sector—are as much a part of America's profit-seeking, growth-worshipping mainstream economy as the big industrial, retailing, transportation, banking, life insurance, financial and utility companies which dominate it. A significant percentage of these small enterprises serve big business directly, and an even greater percentage are supported by the wages and salaries it generates.

Perhaps the fastest-growing sector of small enterprise—albeit from an admittedly minute base—is what the Princeton Center calls the "counter-economy" which consists of entrepreneurs who largely reject the "we'll produce anything as long as there's a buck in it" philosophy of the mainstream economy.

These entrepreneurs have embraced New Age values favoring production that is beneficial for people and the planet as America moves into what Professor Daniel Bell of Harvard calls the "post-industrial" era.

New Age entrepreneurs are into organically-grown, chemically-free foods, pollution-free wind and solar-power generating equipment which enables consumers to unhook from the giant energy industry, handcrafted jewelry made in upstate New York or quilts made in Appalachia, the rescue and rehabilitation of old housing stock by groups such as the Renascence Project in Kansas City, Missouri, the publication of self-help books such as "How to Build A Low-Cost House of Stone," or "A Manual of Simple Burial" and so on.

The other two components of small-scale enterprise in America are cooperatives and households which produce goods primarily for their "use" value as opposed to their "exchange" value.

Some 50 million Americans belong to non-profit cooperatives which supply them with credit, insurance, food, health care and other necessities.

An even larger number of people benefit from work done in America's approximately 75 million households whose productive equipment is worth more than $1 trillion, and whose output—if monotized—would equal all the wages paid out by every corporation in the country.

A study released just a few weeks ago by the Worldwatch Institute here in Washington, for example, reported that 32 million American households—about 43% of all U.S. families—raised more than $14 billion worth of fruits and vegetables last year on an area equivalent to approximately seven million acres in backyards, city lots and apartment balconies.

It is interesting to note that as American farmers are taking land out of production in order to raise food prices, American families are putting acreage into production in order to lower them.

Ecological theory holds that the more diversity there is in any biological system, the greater are its chances for survival. I believe this theory also applies to economic systems, and I think we are fortunate to have such a diversity of productive enterprises in the U.S. economy. This is particularly true today with that economy under siege from forces materializing in the form of everything from a plummeting dollar to persistent inflation.

As these forces continue to weaken the economy, I think we will come to appreciate the inherent strengths of small-scale enterprise more than at any time since the Great Depression.

Let me mention a few of these strengths

which could prove to be of immense significance as the U.S. moves into a more uncertain economic future.

First, there is the freedom of entry into small enterprise. If General Motors isn't hiring, if Peabody Coal is on strike, if the Penn Central or W. T. Grant goes into bankruptcy, it is still possible to earn part or all of one's living selling hats on the sidewalks of Washington, D.C., starting up a two-man logging operation in Oregon, working in a food cooperative in Richmond, restoring old houses in Philadelphia's inner city, or working for low wages but high psychic income as a citizen activist battling for a cleaner environment, safe energy, gay rights, or getting rid of violence on TV.

Then there is access to capital, that magical ingredient capable of creating goods and jobs at the same time. While big business can raise capital through retained earnings, bank loans, or financial markets, small entrepreneurs can tap their own unique sources of investment funds such as personal savings, loans from family and friends, or taking a second mortgage on the inflated value of their homes—a mushrooming new source of entrepreneurial financing worth billions.

Perhaps the largest single source of investment capital in America today is what might be called "sweat capital", the willingness of small entrepreneurs to work all the hours that God made thereby saving massive amounts of capital that big business must generate in order to pay its employees' wages.

It is difficult for large organizations to change direction quickly thereby delaying America's progress toward a more salubrious future. We can see this today, for instance, in the glacial slowness with which our colleges and universities are acclimating to the new educational needs of a declining student population, or the automobile industry to the demand for more energy-efficient transportation.

Small entrepreneurs tend to be more innovative as illustrated by their creation of the motorcar, telephone, Xerography, frozen foods and discount retailing, etc., which have done so much to shape our present. Now America's small entrepreneurs are helping to lead us into a less cornucopian, but hopefully more economically-sustainable future with advances in decentralized power generation, intensive agriculture, holistic health, worker self-management, off-campus education, computer-based information networks, resource recycling and so on.

As I said at the outset, I believe small enterprise has a key role to play not only in shaping our country's slower-growing, less materialistic future, but in helping those millions of Americans who can't find jobs in big enterprises to pursue meaningful and productive lives in small ones.

Which raises the question of what can we do to make better use of America's small enterprise economy today, and to strengthen it for the more demanding role it may have to assume tomorrow?

The single best thing we could do to better utilize America's vibrant small enterprise economy today, it seems to me, is to make more people aware that it exists—particularly in our high schools and colleges where students are preparing themselves to find work.

They could be instructed in the fantastic diversity of employment opportunities available to them in small enterprises most of which are rarely posted on school bulletin boards, or listed in the Help Wanted sections of their daily newspapers.

If the schools wanted a text on this subject they couldn't do better than Kathy Matthews' book "On Your Own: 99 Alternatives To A 9-to-5-Job" which describes a delightful potpourri of small enterprise jobs including auctioneer, cartoonist, driving instructor, small town jailer, piano tuner, square dance caller, window washer, worm raiser, and circus clown.

It would be even better, of course, if our high schools and colleges would teach small enterprise economics. If we can offer young people courses in Typing, Computer Key Punching, or Macroeconomic Management, we can certainly educate them to the joys and rewards of gardening, home health care, or even operating a small enterprise of their own since last year over 10% of the new employment growth in the non-agricultural sector came from individuals going into business for themselves.

Small business is considerably more labor intensive than big business which prides itself on constantly raising its so-called "productivity" by substituting scarce and costly capital and energy for abundant and economical labor. The IRS encourages this practice through the investment tax credit, although some of us are beginning to wonder why this tax incentive shouldn't go to companies that put people to work directly.

I think this Subcommittee and its Chairman are to be congratulated, in this regard, for their splendid analysis of the growth in the U.S. civilian labor force from 1969 to 1976 which shows that of 9.6 million new jobs created, the Fortune 1000 accounted for less than 1 percent.

I noticed that Senator Kennedy referred to this study in his testimony before the Joint Economic Committee last Thursday noting that the Fortune 1000 companies that created less than 1 percent of those new jobs received 80 percent of the investment tax credits, while consuming well over half of the industrial energy used throughout the economy.

When it comes to strengthening the small enterprise economy there are a number of things we might consider although it's worth recognizing, I think, that small enterprise is probably less dependent on government assistance than big business, and in the aggregate does a pretty good job of looking after itself.

I think it would be useful, for example, if small entrepreneurs had easier access to outside management advice. Even the best run big businesses use management consultants, and the kind of insights they offer could certainly benefit small companies as well.

Among the lessons I've learned during 15 years of helping minority small business people are (1) that good management is far more important to the success of any enterprise than capital, and (2) that the best consultant to advise a small entrepreneur is one who's already been successful in that business.

Small businessmen and women could also be helped if they were awarded more government contracts in the $25,000 range which are too puny to interest General Electric or IBM, but which could keep a small business humming for weeks. Legislation to broaden this effort, such as Senator Charles Percy's bill introduced last week to create an Office of Small-Scale Technology within the Department of Energy certainly warrants careful consideration in my view.

Small business would also be strengthened by ending special privileges for big business which result in unfair competition such as energy rates which decline as consumption rises.

Finally, it is worth recognizing that small entrepreneurs—if over-stressed by the demands of big government—will frequently go underground in order to survive thereby breaking the law while preserving production and jobs.

This is confirmed, I think, by a recent study done by Prof. Peter Gutmann, Chairman of the Department of Economics and Finance at Baruch College in New York that describes what Prof. Gutmann calls America's growing "subterranean economy". One in which economic transactions among individuals and smaller businesses are handled in cash thereby avoiding government recording, regulation and taxation.

Prof. Gutmann believes the subterranean economy generated an illegal GNP of $176 billion in 1976, and predicts that rising tax rates and increasingly inevitable government regulation efforts to maintain social homeostasis, if not health, will continue to drive more and more of the U.S. economy underground.

Nearly 150 years ago, Alexis de Tocqueville marveled at the self-reliance of the Americans he met as he traveled around this country as it existed in the early 1800's. Today that self-reliance is alive and well in America's small enterprise economy, and I am confident it will continue to be so for as far ahead as any of us can see.

## LABOR REFORM

Mr. THURMOND. Mr. President, I have before me an excellent editorial on the labor reform bill, which is scheduled to come before the Senate during this session.

This analysis of the so-called reform bill is one which each Senator should study with care. It contains timely warnings which point to the dangers of this legislation.

The editorial appeared in the January 25, 1978, edition of the Ledger, Gaffney, S.C.

Mr. President, in order to share this information with my colleagues, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

LABOR REFORM?

The so-called Labor Reform Bill, now being considered in Congress, seems to be, in reality, a push by Big Labor to gain new members.

Union membership has been decreasing steadily over the past several years, so it's not surprising that union leaders would want to do something about this. But the Labor Reform Bill (S. 1883-H.R. 8410) tries to solve labor's membership problems by mandating several new policies which are blatantly unfair to employers.

For instance, the Senate version of the bill would allow unions to call elections within 15 days if a majority of employees seek the election. This hardly seems like enough time for an employer to do an adequate job of presenting his side of the story. The bill would also allow union organizers to talk to employees about the union on company property during company time, if the employer has done so. Unions are already allowed to contact employees at their homes, but employers are forbidden to do this. This prohibition would remain.

The bill also has disturbing punitive provisions. The most disturbing is one which states that employers who willfully violate a National Labor Relations Board order would be prohibited from obtaining federal contracts for up to three years. That is an extremely stiff penalty. It would put many firms out of business, which doesn't even make sense from the union's point of view.

Another provision says that if NLRB finds that an employer has refused to bargain in good faith for a particular period, it can

impose mandatory wage rates on the employer for that period. The wage rates will be based on the average wages paid to bargaining units of 5,000 or more employees—in other words, large firms. The National Federation of Independent Business (NFIB), with a membership of more than 525,000 small business around the country, has noted that this provision would work a real hardship on small businesses, since their wages are normally much lower than big business wages. It would also directly involve the federal government in setting wage rates in the private sector, something that has been carefully avoided in the 42-year history of labor law.

A third provision requires the NLRB to seek an immediate court-ordered reinstatement of any employee believed to be illegally discharged during a union organizing campaign, until the NLRB has time to make a final decision on the merits of the case. This means an employer may be forced to temporarily rehire employees who have been fired for good cause. The senate version of the bill adds that illegally fired employees must be reinstated with double back pay.

If the Labor Reform Bill passes, it could easily have the effect of making employers throw up their hands and allow unionization of their firms, whether their employees want it or not, just to avoid these unreasonable penalties. This, of course, would increase union membership. And this is what Big Labor wants.

## REMARKS OF GENERAL TORRIJOS ON PASSAGE OF PANAMA CANAL TREATY

Mr. THURMOND. Mr. President, the arrogance and untrustworthiness of Gen. Omar Torrijos, the dictator in Panama, was once again demonstrated last night when he defied the Senate and the United States in his Panama City speech.

In effect, he told the United States he would not accept the DeConcini amendment and, if it were ever used by the United States, he would destroy the canal.

Mr. President, these remarks are more than sufficient justification for President Carter to refuse to exchange the resolutions of ratification as the Senate amendment would be meaningless in the face of such ingratitude and defiance.

As I stated yesterday in my closing remarks before the treaty vote, the acceptance by the Senate of the Panama Canal Treaty means trouble ahead for this Nation. Not only will there be trouble in Panama but also serious problems in connection with our economic, financial, and defense programs.

Mr. President, I ask unanimous consent that the article appearing on the front page of the Washington Post, dated April 19, 1978, entitled "Torrijos Would Have 'Destroyed' Canal" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TORRIJOS WOULD HAVE "DESTROYED" CANAL

(By Marlise Simons)

PANAMA CITY.—Panamanian ruler Gen. Omar Torrijos said last night that if the U.S. Senate had not ratified the Panama Canal treaties, "We would have started another struggle for liberation" and possibly closed the canal by force.

As jubilant Panamanians celebrated and sirens and firecrackers went off in the streets of the capital after the vote in Washington, Torrijos appeared on television to declare the treaties "the greatest, the most-awaited and the most discussed triumph" of this country.

He said he accepted the final language approved by the U.S. Senate, but he devoted much of his 20-minute speech to a bitter attack on the "crude, arrogant, interventionist language" that some U.S. senators "wanted to impose on us."

The Panamanian strongman said, "Today the canal was placed within two votes of being destroyed." Had the Senate vote gone the other way, he said, "Tomorrow we would have started our struggle for liberation and possibly tomorrow the canal would not be operating any more."

Panama's armed forces, Torrijos said, "had decided that if the treaty had been rejected or amended in an unacceptable way, then we would not negotiate anymore."

The Panamanian strongman, who had personally campaigned hard for approval of the treaties, both with his countrymen and with U.S. congressmen, warned that Panama would also destroy the canal if the United States tried to intervene under the DeConcini amendment.

Torrijos said that the Panamanian national guard, the country's chief military force, "has the capability of destroying it and we don't intend to lose that capability."

While the United States could intervene, he said, U.S. troops in sufficient numbers are "four to six hours away" and the canal could be "damaged heavily" in that period.

Torrijos, like many other Panamanians, listened to a live broadcast of the U.S. Senate roll-call vote. To stir enthusiasm for the event, the government told employees to stay at work until time for the voting, and then to gather at the Fifth of May Square to celebrate.

The meeting, attended by hundreds of people, coincided with a demonstration by students and lawyers who charged that Panama had been forced to make too many concessions to the United States.

Anti-treaty anger here in recent weeks had also turned into antigovernment demonstrations and Torrijos last night made a strong appeal for national unity.

He made two large political gestures: he announced that all political exiles—more than 100 government opponents from the left, right and center—could return unconditionally and he opened the door in rather vague language for the eventual restoration of political parties, which were abolished after the 1968 military coup that put him in power.

But in his speech and news conference, Torrijos returned several times to the "unacceptable humiliation" that he said his government and Panama had to suffer during the Senate debate.

"I think there has never been a man in Panama so maligned as I, and never been a country so disdained as this one by those conservative voices," Torrijos said.

"But we can live with this treaty . . . it ends the colonial remains in Panama," he said.

Referring to the American Canal Zone police force, which have long been an irritant to Panamanians, he said, "That daring, overbearing example of colonialism will now end."

Yesterday morning some 500 nationalist and leftist students demonstrated angrily in front of Panama's once snow white Foreign Ministry building, now covered with anti-American and anti-treaty scrawlings. They stayed away from the American Embassy, whose drab beige facade had been spattered Monday as demonstrators hurled bottles of paint and left it covered with huge blotches of red, white and blue.

The embassy yesterday took strict security precautions. The staff worked inside with the curtains drawn, the entrance gates were locked and a metal detector was used at its front door.

In the Canal Zone, U. S. troops were put on alert but there was none of the agitation usually seen among the American Canal Zone residents when Panamanians demonstrate. Treaty opponents in the zone say they feel that they have lost their long battle, have been shortchanged by their government and press and are now tired and exasperated.

"We don't care anymore what happens," said a canal company employee who was born in the zone. "Why bother, since no one else in the States does."

Before the treaty goes into effect, the U. S. Congress must pass implementing legislation and both governments must exchange instruments of ratification. Then Panama will get sovereignity over the 533-square-mile zone. Sovereign rights "in perpetuity" were granted to the United States in 1903, for a $10 million flat payment although Panama began hotly disputing them a year later.

To a Panamanian, the new sovereignty means that if he is accused of a crime in the zone, he will no longer be tried in an American court or sent to an American jail in the zone. U. S. police, courts and post offices will be phased out over a 30-month period after the treaty takes effect.

For the American residents of the Canal Zone, called zonians, it means that the world's most complete company town will be dismantling in the 30 months after the treaty takes effect. Americans in the zone will live under Panamanian law and will no longer be able to import duty free articles from the United States or go to a movie house, bowling alley, restaurant or commissary subsidized by the U.S. government.

The ports, docks and the famous Bridge of the America's and Transisthmian Panama Railroad will become Panamanian property.

But despite the despondency among the resident Americans, the zone, which looks like a vast national park, will not look very different for years to come.

A new agency will replace the U.S. government-owned Panama Canal Co. and will run the canal with a mixed U.S.-Panamanian board. It will retain more than one-third of the zone area "for canal operations." Almost half of the zone will be kept by the U.S. military for its bases, which include housing, schools, shooting ranges, and defense sites.

The amount of real estate that will be returned to Panama before the year 2000—when the canal and its operations become fully Panamanian—is actually very little.

The most coveted portion, an unused strip, lies at the canal's Pacific entrance and with its lush vegetation and beaches would make prime residential real estate. Another area at the Atlantic entrance will be used for much needed expansion of the Colon free zone, after Hong Kong the world's largest free zone depot.

## THE PANAMA CANAL TREATY

Mr. DOLE. Mr. President, as one who cast his vote against the Panama Canal Treaty yesterday, the Senator from Kansas acted in accord with his own best judgment of the national interest. That was my duty as a U.S. Senator.

Now the crucial test has been completed in the Senate, and the treaties have been forwarded to the President for final ratification. We accept the fact that the constitutional process has been car-

ried out. We may not agree with the policy, but now that the treaty decision has been made, we accept it.

This does not mean that we should not continue to offer constructive criticism where needed. This does not mean that we in the Senate should not continue to provide policy guidance in the future with respect to Panama. But we acknowledge that the Senate's "consent" function in the constitutional treaty-making process has been carried out.

TREATY OPPONENTS MADE THEIR CASE

The Senator from Kansas, as much as anyone, can vouch for the frustrations that have been encountered in Senate efforts to improve upon the canal treaties. Many of us disagreed with the specific provisions of the treaties negotiated by the Carter administration, although we did not resist the idea of a new canal arrangement, per se. We made our case for treaty amendments as best we could. We offered them in good faith, but time and time again they were rejected out of hand. It was argued that the treaties could not withstand even "one word" of textual change by the Senate. And yet, in order to secure the required 67 votes, it eventually became necessary for the Senate leadership to accept treaty reservations and understandings. That is part of the support-building process.

FUTURE RELATIONS

It is certainly my hope that U.S. relations with Panama, and with the rest of Latin America, will grow stronger in the days ahead. In its efforts to advance the treaties, the administration repeatedly stated that ratification would open a "new era of friendship" with all of Central and South America. We hope that prediction now holds true.

Unfortunately, I do not believe some of the comments made yesterday by Panamanian leaders following the Senate vote were oriented in that direction. Instead, they illustrated some of the very real concerns of Members of this body about the intentions of the Panamanian Government—concerns that were repeatedly minimized by protreaty Senators and the Senate leadership. Those who criticized treaty opponents for "jingoism" should now prevail upon the Panamanian leadership to refrain from jingoistic comments that can only strain future relations.

I can say with confidence that the objections and the reservations that some of us raised were never directed against the Panamanian people themselves. We were concerned about treaty guarantees, and also about the integrity of Panama's leadership and its pledges to honor treaty commitments. But we never challenged the goal of maintaining our traditional good relations with the Panamanian people.

The Senator from Kansas stated repeatedly that he was less concerned about who had "sovereignty" over the Canal Zone, than about protecting the future operation and maintenance of the Panama Canal itself. The canal is vital to American defense, it is vital to American agriculture, and it is vital to our national economy as a whole. Its continued efficient operation is vital to Latin America as well, and it is therefore essential that the treaty provisions be scrupulously honored during the next 22 years, and afterwards.

SPIRIT OF COOPERATION

For my part, I look to the future in a spirit of cooperation. The treatymaking process prescribed by our Founding Fathers has been followed, and I abide by the outcome. We trust that the treaty provisions will be honored fully by both governments throughout the years to come, and that genuine friendship between the American people and the Panamanian people will continue, as firmly as ever.

## HOLOCAUST—NEED FOR RATIFICATION OF THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, as the Presiding Officer well knows, the Genocide Treaty has been pending in the U.S. Senate now for 30 years.

In the last 3 nights on television the American people have been told the story of the genocide of Jews in Germany in World War II. It was a tragic and terrible story, and although there have been critics of the artistic merit of this production, I think no one can watch it without being tremendously moved and without recognizing that this does bear a magnificent message, one we should be very sensitive and conscious about.

Mr. President, whenever millions of Americans, and all indications are literally tens of millions of Americans are watching this remarkable program every night, whenever that happens I find that the people are moved. They want to do something about it. What they can do about it is what the U.S. Senate should do about it.

We permitted that Genocide Treaty to stall year after year after year, and it is time we acted.

Mr. President, I shall read briefly from one of the remarkable statements made about the Holocaust, this one by Israel Shenker, in the New York Times just yesterday.

Mr. Shenker wrote:

Condemned by the Nazi as an inferior race—branded as Bolsheviks and plutocrats, conspirators and enemies, vermin and parasites, devils to be annihilated to allow salvation of the German soul—six million Jews died.

This destruction, this sacrifice, this holocaust, has seared itself into the collective memory of oppressed and oppressors, those who try to forget and those determined to remember. Embers of this past flare anew as peace in the Middle East seems newly distant, as American Nazi seek the right to offend survivors by marching through a Jewish neighborhood in Skokie, Ill., and as a fictional television series, "Holocaust," moves across America's screens.

Incidentally, I think if that program were called "Genocide," it would be more appropriate and maybe more effective as far as this treaty is concerned.

The article goes on later to say:

In 1941, Heinrich Himmler, who zealously ruled a concentration camp empire of shadows and skeletons, relayed his Fuhrer's orders for "the final solution"—organized annhilation of the Jews. He called on killers at death centers to be "superhuman-inhuman."

"NO RIGHT TO LIVE"

"The missionaries of Christianity had said in effect, 'You have no right to live among us as Jews,' " noted Raul Hilberg, the historian. "The secular rulers who followed had proclaimed, 'You have no right to live among us.' The German Nazis at last decreed, 'You have no right to live.' "

Of course, this is what genocide is. This is what we are trying to proscribe in the Genocide Treaty.

Mr. President, I ask unanimous consent that this most moving and eloquent article from the New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOLOCAUST: SYSTEMATIC SLAUGHTER OF SIX MILLION OF EUROPE'S JEWS

(By Israel Shenker)

Condemned by the Nazis as an inferior race—branded as Bolsheviks and plutocrats, conspirators and enemies, vermin and parasites, devils to be annihilated to allow salvation of the German soul—six million Jews died.

This destruction, this sacrifice, this holocaust, has seared itself into the collective memory of oppressed and oppressors, those who try to forget and those determined to remember. Embers of this past flare anew as peace in the Middle East seems newly distant, as American Nazis seek the right to offend survivors by marching through a Jewish neighborhood in Skokie, Ill., and as a fictional television series, "Holocaust," moves across America's screens.

Anti-Semitism had deep roots in European soil. Hitler and his followers drew on medieval and earlier conceptions of Jews to elaborate racist theories devoid of science and political theories bereft of humanity, making Jews scapegoats for German defeats, projecting their own fear and guilt onto people who over the centuries had shown themselves resistant to conversion and assimilation.

GERMANS TURNED TO BARBARISM

Eastern European Jews had traditionally looked to Berlin for civilization and law, but Germany turned instead to barbarism and found many eager to help. Gradually once they took office, the Nazis passed racial laws, removed Jews from the civil service, from universities and professions, encouraged riots to destroy property owned by Jews and fined the owners for the destruction. The Nazis crowded Jews into ghettos and forced them to wear Stars of David so that they would be easier to identify.

To insure the isolation of those labeled criminals, the Nazis established scores of concentration camps; prisoners were packed into boxcars and deported to a regime of slave labor, brutality, starvation, filth and disease.

Many Germans in the elaborate bureaucracy carried out their duties antiseptically, behind desks, expediting papers that expedited Jews, eager to believe in their own dutiful innocence. Even those who kicked prisoners to death, or used them for medical experiments, or threw them to their death from windows, explained that they were merely following orders.

In 1941, Heinrich Himmler, who zealously ruled a concentration camp empire of shadows and sktletons, relayed his Fuhrer's orders for "the final solution"—organized annihilation of the Jews. He called on killers at death centers to be "superhuman-inhuman."

'NO RIGHT TO LIVE'

"The missionaries of Christianity had said in effect, 'You have no right to live among us as Jews.' " noted Raul Hilberg, the historian. "The secular rulers who followed had

proclaimed, 'You have no right to live among us.' The German Nazis at last decreed, 'You have no right to live.' "

Strict secrecy governed the death camps, with severe isolation from the outside world, garden landscaping as camouflage, and euphemisms as further concealment: Killing was "special treatment," gas chambers were "bath houses."

When vans using carbon monoxide proved inadequate to accommodate the influx of the doomed, the Nazis introduced assembly-line methods, with gas chambers for killing and ovens for disposal of the corpses. Because carbon monoxide was too expensive for mass murder, the Germans switched to hydrogen cyanide, which was normally used to kill insects and rodents.

The five crematories at Auschwitz could burn about 15,000 bodies a day. One woman recalled her arrival there: "I saw this big fire and I knew my mother's body was burning, and I was grateful that she would not have to see me burning in front of her or know that I saw her burning in front of me."

WITNESSES DOCUMENTED PERSECUTIONS

In the postwar trial of Nazi leaders, at Nuremberg, witnesses documented the vast enterprise of persecution and murder, each day's testimony summoning the past to haunt the future.

"When the extermination of the Jews in the gas chambers was at its height," S. Szmaglewska, a Polish guard from Auschwitz testified, "orders were issued that children were to be thrown straight into the crematory furnaces, or into a pit near the crematory without being gassed first."

"How am I to understand this?" the Russian prosecutor asked. "Did they throw them into the fire alive, or did they kill them first?"

Szmaglewska: "They threw them in alive. Their screams could be heard at the camp."

Prosecutor: "Why did they do this?"

Szmaglewska: "It's very difficult to say. We don't know whether they wanted to economize on gas, or if it was because there was not enough room in the gas chambers."

RECORDS OF GAS DELIVERIES

The Germans kept meticulous records of gas deliveries to Auschwitz, and Prof. Irving Greenberg of the City University of New York calculated that it cost less than half of one cent per victim. "In the summer of 1944," he concluded, "a Jewish child's life was not worth the two-fifths of a cent it would have cost to put it to death rather than burn it alive."

Since the war ended in 1945, many have wondered why the Jews did not try to escape—until it was too late. But it was harrowing to believe the unbelievable, to think the unthinkable; bound to their homes by ties of family, occupation and experience, the Jews suffered an inertia sustained by desperate rationalizations, by the belief that something would happen to save them. Many clung to illusions of human decency. Those who suspected the truth sought relief in appeals, bribery, attempts to placate and even to collaborate in order to forestall the worst. Some did manage to escape.

"Europe's Jews went to the slaughter, but not like sheep," said Prof. Yehuda Bauer of Hebrew University. "They went because they often had no alternative."

"I never thought a woman who had her child taken out of her arms had gone like a sheep to the slaughter," said Abba Kovner, who led the Vilna resistance and now lives in Israel. "The shame is not that of the victims, but of the murderers."

SOME HAVE BEEN PUNISHED

While the Jews were being slaughtered, the outside world reacted with despair, skepticism, complicity or indifference. The years have brought punishment to some of the guilty, remorse for many and endless inquiry.

Some Christian scholars have blamed Nazi anti-Semitism on Church fathers, while others have distinguished between the malevolence of individual theologians and authentic Christian teaching. There are survivors who kept their faith in God, and others who lost it.

Robert H. Jackson, the American prosecutor at Nuremberg, spoke of the "mad and melancholy record, which will live as the historical text of the 20th century," and for Jews the trauma is never remote. From the weeping, from the ashes, from the abyss, Auschwitz and the final solution speak of the hazards of Jewish existence.

Mr. PROXMIRE. Mr. President, once again I call upon the Senate to at long last take up and ratify the Genocide Convention.

## APRIL GOLDEN FLEECE GOES TO NATIONAL INSTITUTE OF MENTAL HEALTH

Mr. PROXMIRE. Mr. President, I am awarding the "Golden Fleece of the Month" for April to the National Institute for Mental Health (NIMH) for funding a study of behavior and social relationships in a Peruvian brothel. This study was a part of a $97,000 grant which paid for an 18-month field trip to Peru by a researcher and his associate. Ironically, the researcher had just written a book on how to win at academic and grantmanship games.

The $97,000 grant went to Dr. Pierre L. van den Berghe and his associate Dr. George P. Primov to enable them to study ethnic and class relationships among Indians and non-Indians in several communities in the Peruvian Andes.

STUDY OF PERUVIAN BROTHEL

In his article, "The Peruvian Brothel, a Sexual Dispensary and Social Arena," Dr. Primov explains how his 1-year long investigation of the brothel was conducted:

During this time, 21 prostitutes were formally interviewed and many more were interviewed informally. In addition, the staff of the brothel was interviewed, especially the madam. Prostitutes were also observed outside the brothel. By visiting the brothel at various times, it was possible to obtain a good idea of its everyday functioning. (George Primov and Carolynne Kieffer, "The Peruvian Brothel as Sexual Dispensary and Social Arena," *Archives of Sexual Behavior*, Vol. 6, No. 3, 1977, p. 246).*

The article goes on to describe in great detail the brothel's "everyday functioning." Perhaps a better title for the study might be "Everything you wanted to know about a brothel in a large provincial town in Peru but were afraid to ask—if you cared at all."

These Federal tax supported researchers were occupied by things other than brothels during their 18-month stay in Peru. Several articles and two books were produced on various aspects of the subject of ethnic and class relations in Peru. Among them were: "Ethnicity and Social Structure in the Inca Empire"; "The Use of Ethnic Terms in the Peruvian Social Science Literature"; "Aymara-Quechua Relations in Puno"; and "Inequality in the Peruvian Andes, Class and Ethnicity in Cuzco."

OBJECT TO FEDERAL FUNDING OF RESEARCH

I do not object if academic researchers, especially of Dr. van den Berghe's or Dr. Primov's generally high reputation, want to study Peruvian brothels or even ancient Inca Vestal nonvirgins. What I object to is the Federal Government paying for it. With Federal research budgets so tight and the needs for mental health research here at home so great, it is unbelievable that NIMH would give this project such priority and fund the field trip to Peru.

RESEARCHER EXPLAINS HOW TO GET FEDERAL GRANTS

It is very interesting to note that Dr. van den Berghe wrote a somewhat tongue-in-cheek book entitled "Academic Gamesmanship," just before he received his grant from NIMH. In his chapter on grants, Dr. van den Berghe notes that "not all disciplines are in an equally good position to milk the government and foundation" (p. 104).

He explains (on page 108) that "in drafting a research proposal, the primary concern should be to write it in such a way as to appear worthwhile to the evaluators rather than to give a candid description of what you intend or hope to accomplish; hence the need for dishonesty." And on page 107 he says:

In addition to paying part of your basic salary, grants will typically also give you an extra two months of summer salary. You can finance numerous jaunts to domestic and international conferences out of your research money without having to beg your university for it or having to justify your trip by reading a paper. And, if your research calls for going overseas, you can lead the life of an oriental potentate with an American income in a low-cost-of-living country. Should you remain an expatriate for eighteen months or more, you even get a $20,000-a-year tax exemption for waiving the star-spangled banner from the halls of Montezuma to the shores of Tripoli.

At another point (p. 102) he notes that:

Public and private milch cows vie with each other to keep their coteries of academic retainers and to lubricate the scholarly printing press.

At still another point (p. 110) he says,

A good budget must show two qualities: it must be both detailed and extravagant.

Dr. van den Berghe practiced what he preached. The scientific panel which reviewed his original application stated:

The budget seems highly inflated and should be subject to considerable negotiated reduction; in particular, requests for foreign travel for dependents, professional meetings, and consultant cost should be substantially reduced.

To the credit of NIMH, the suggestion of the review panel was followed, and the final budget was somewhat less than Dr. van den Berghe first requested.

*The author acknowledges that "This article is based on fieldwork in Peru undertaken while the first author (Primov) was a field research assistant to Pierre van den Berghe under a research project supported by National Institute of Mental Health Grant M1119712."

NIMH MISMANAGEMENT

What is not to the credit of NIMH is their record of mismanagement and lack of control of taxpayer funds once the grant was issued. It is sad and ironic to report that NIMH officials knew nothing of the brothel research until a member of my staff questioned them about it. NIMH officials never obtained the required final report and copies of all the published works which flowed from the grant from either Dr. van den Berghe or Dr. Primov.

Only after my staff insisted that NIMH obtain a final report did NIMH officials contact Dr. van der Berghe and ask him for the report which was more than 3 years overdue. While Dr. van den Berghe did finally send a very short final report to NIMH last month, he refused to supply NIMH with a copy of the books produced with Federal tax dollars. In an imperious moment he told an official of NIMH that all his books were available for purchase.

For so mismanaging this highly questionable research trip to Peruvian brothels and beyond, I award this month's "Golden Fleece" award to the National Institute for Mental Health.

## FINANCIAL HOLDINGS AND INCOME TAX RETURN OF SENATOR WILLIAM PROXMIRE

Mr. PROXMIRE. Mr. President, in 1963, 1965, 1967, 1970, 1972, 1973, 1974, 1975, 1976, and 1977, I submitted for the RECORD a history of my financial holdings from the time I was first elected to the Senate in August of 1957 until April 1977. In order to bring the full record up to date, I submit herewith the history of my financial holdings since April of 1977.

The bulk of the securities I hold are now in State and municipal bonds totaling $50,000.

My other assets include ownership of my home and furnishings in Washington, D.C., on which I owe a mortgage to the Perpetual Building Association of Washington, D.C.; ownership of a 1972 automobile; ownership of one checking account in a Washington bank, one checking account in a Madison, Wis., bank and one savings account in a Madison bank. The combined balance, as of this date, in these three accounts is $12,153.93.

I also hold a land contract on a house in Madison in the amount of $79,797.75 and a note on my former residence in Washington at 3220 Ordway Street in the amount of $8,733.84.

Trust custody of stock in my children's names has been turned over to them directly as they are over 21.

I estimate my net worth to be about $345,000.

To the best of my knowledge, this is an accurate record of my financial holdings and obligations.

In addition, I herewith submit a balance sheet showing my net worth and how it was arrived at, a copy of my 1977 Federal tax return and a list of all honorariums received during 1977—$24,500.

I paid $29,668 to the Federal Government in taxes on my 1977 income. In addition, I paid $8,077 to the State of Wisconsin on 1977 income.

I ask unanimous consent that the balance sheet, copy of 1977 Federal tax return, and list of all honorariums received in 1977 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FINANCIAL STATEMENT OF SENATOR WILLIAM PROXMIRE

(Net worth as of April 1978)

| | |
|---|---|
| Municipal and State bonds | $50,000.00 |
| 1972 Vega: (blue book trade-in value) | 300.00 |
| Two checking and one savings account: | |
| Washington account-checking | 828.40 |
| Madison account-savings | 9,472.64 |
| Madison account-checking | 1,852.89 |
| 4613 Buckeye Road, Madison, land contract | 79,797.75 |
| Note on 3220 Ordway St., NW, D.C. | 8,733.84 |
| 3097 Ordway Street, N.W., D.C.: | |
| assessed value | 190,000.00 |
| mortgage value | (62,578.33) |
| furnishings | 15,000.00 |

1977 U.S. INDIVIDUAL INCOME TAX RETURN OF WILLIAM AND ELLEN H. PROXMIRE

Your social security number, [redacted].
Spouse's social security no., [redacted].
Occupation:
Yours, U.S. Senator.
Spouse's, Corp. Executive.

Presidential Election Campaign Fund: Do you want $1 to go to this fund? Yes. If joint return, does your spouse want $1 to go to this fund? Yes.

Filing Status:

2. Married filing joint return (even if only one had income).

Exemptions:

6a. Yourself; b. Spouse; c. First names of your dependent children who lived with you: Douglas.

7. Total number of exemptions claimed: 3.

Income:

8. Wages, salaries, tips, and other employee compensation, $76,950.

9. Interest income. (If over $400, attach Schedule B.) $1,469.

11. State and local income tax refunds (does not apply if refund is for year you took standard deduction), $919.

13. Business income or (loss) (attach Schedule C), $24,500.

14. Capital gain or (loss) (attach schedule D), $3,393.

16. Net gain or (loss) from Supplemental Schedule of Gains and Losses (attach Form 4797), $305.

18. Pensions, annuities, rents, royalties, partnerships, estates or trusts, etc. (attach Schedule E), ($3,048).

21. Total income. Add lines 8, 9, and 10c through 20, $104,388.

Adjustments to Income:

23. Employee business expenses (attach Form 2106), $2,669.

28. Total adjustments. Add lines 22 through 27, $2,669.

29. Subtract line 28 from line 21, $101,719.

31. Adjusted gross income. Subtract line 30 from line 29. Enter here and on line 32. If you want IRS to figure your tax for you, see page 4 of the Instructions, $101,719.

Tax Computation:

32. Amount from line 31, $101,719.

33. If you itemize deductions, enter excess itemized deductions, from Schedule A, line 41.

If you do NOT itemize deductions, enter zero, $23,531.

34. Tax Table Income. Subtract line 33 from line 32, $78,188.

35. Tax. Check if from Schedule TC, $28,364.

37. Total. Add lines 35 and 36, $28,364.

47. Balance. Subtract line 46 from line 37 and enter difference (but not less than zero), $28,364.

Other Taxes:

48. Self-employment tax (attach Schedule SE), $1,304.

54. Total tax. Add lines 47 through 53, $29,668.

Payments:

55. Total Federal income tax withheld (attach Forms W-2, W-2G, and W-2P to front), $25,836.

62. Total. Add lines 55 through 61a, $25,836.

Refund or Due:

66. If line 54 is larger than line 62, enter balance due, $3,832.

SCHEDULES A & B—ITEMIZED DEDUCTIONS AND INTEREST AND DIVIDEND INCOME

*Schedule A itemized deductions*

Medical and Dental Expenses:

Taxes:

1. One-half (but not more than $150) of insurance premiums for medical care. (Be sure to include in line 10 below) $150.

10. Total (add lines 1 and 9). Enter here and on line 33, $150.

Taxes:

11. State and local income, $7,380.

12. Real estate, $3,226.

13. State and local gasoline (see gas tax tables), $55.

16. Other: 1975 Wisconsin taxes, $6,400; actual sales tax, $617.

17. Total, $17,678.

Interest Expense:

18. Home mortgage, $5,225.

19. Other: Wisconsin taxes, $696; Finance charges, $1,208.

20. Total, $7,129.

Contributions:

21. a Cash contributions for which you have receipts, cancelled checks or other written evidence, $1,335.

24. Total contributions, $1,335.

Miscellaneous Deductions:

31. Other: professional dues, $20; unreimbursed business expenses, $219; political contributions, $200.

32. Total, $439.

Summary of Itemized Deductions:

33. Total medical and dental—line 10, $150.

34. Total taxes—line 17, $17,678.
35. Total interest—line 20, $7,129.
36. Total contributions—line 24, $1,335.
38. Total miscellaneous—line 32, $439.
39. Total deductions, $26,731.
40. If you checked Form 1040, box: $3,200.
41. Excess itemized deductions (subtract line 40 from line 39). Enter here and on Form 1040, line 33. (If line 40 is more than line 39 see "Who MUST Itemize Deductions" on page 11 of the Instructions.) $23,531.

Dr. Douglas Lowy, $733.
United Bank and Trust, $136.
Kerry O'Brien, $600.
2. Total interest income, $1,469.

SCHEDULE OF CONGRESSIONAL WAGES, REIMBURSEMENTS, AND EXPENSES

A. Salary as a Member (from Form W-2) (Include in amount on Line 8, Form 1040), $55,350.

B. Congressional Reimbursements for Expenses:

1. Reimbursement for travel expenses (other than the special reimbursement to be reported on Line B.2, below), $2,513.
2. Reimbursement (special) at the rate of 20 cents per mile for one round trip to the Home District during each regular session, $331.
3. Reimbursement for other deductible expenses, $4,983.
5. Total reportable reimbursements, $7,827.

C. Expenses Deductible in Computing Adjusted Gross Income:

1. Travel expenses: Living expenses in the Washington, D.C. area. Note: The maximum amount allowable is $3,000. (Attach Member's certificate concerning living expenses.) $3,000.
2. Travel expenses: Other (attach detailed statement), $2,513.
3. Other expenses (limited to amount on Line B.3., above), $4,983.
4. Total travel expenses, $10,496.

E. Deductible expenses, $2,669.

1. Excess home office expenses, $179.
2. Photo fund, $40.
3. Total expenses deductible, $219.

CERTIFICATE

I hereby certify that I was in travel status in the Washington, D.C., area, away from my home in my home State of Wisconsin, in the performance of my official duties as a Member of Congress for 295 days during the year 1977 and that my deductable living expenses while in such travel status amounted to $3,000.

WILLIAM PROXMIRE,
*(Signature of Member).*

PROFIT OR (LOSS) FROM BUSINESS OR PROFESSION

1. Gross receipts or sales, $24,500.
5. Total income, $24,500.
21. Net profit or (loss) (subtract line 20 from line 5), $24,500.

CAPITAL GAINS AND LOSSES

Long-term Capital Gains and Losses—Assets Held More Than 9 Months:

6. Wis. State agencies, Wis. State, Mass. State, Installment Sale (see attached), $6,656.
11. Net gain, $6,786.
13. Net long-term gain, $6,786.
14. Combine lines 5 and 13, and enter the net gain, $6,786.
15. If line 14 shows a gain—a. Enter 50% of line 13 or 50% of line 14, whichever is smaller (see Part IV for computation of alternative tax). Enter zero if there is a loss or no entry on line 13, $3,393.

b. Subtract line 15a from line 14. Enter here and on Form 1040, line 14, $3,393.

SUPPLEMENTAL SCHEDULE OF GAINS AND LOSSES

Section B.—Sales or Exchange of Property Used in Grade or Business and Certain Inovoluntary Conversions:

3. Gain from line 23 being reported on the installment basis (see attached), $6,656.
4. Combine the amounts on line 3. Enter here, and on the appropriate line as follows, $6,656.

Ordinary Gains and Losses:

6. Amount, if any, from line 4(a)(2), $205.
9. Combine amounts on lines 5 through 8. Enter here, and on the appropriate line as follows, $205.

(2). Redetermine the gain or (loss) on line 9, excluding the loss (if any) entered on line 9(b)(1). Enter here and on Form 1040, line 16, $205.

Gain From Disposition of Property Under Sections 1245, 1250, 1251, 1252, 1254—Assets Held More than Nine Months:

(A) Madison house: 1958, 11/15/77.
(B) Furnishings: 1964, 11/15/77.
11. Gross sales price on Property (A) $90,000; Property (B) 0.
12. Cost or other basis and expense of sale on Property (A) $44,636; Property (B) $800.
13. Depreciation (or depletion) allowed (or allowable) Property (A) $16,075; Property (B) $800.
14. Adjusted basis, subtract line 13 from line 12 on Property (A) $28,561; Property (B) 0.
15. Total gain, subtract line 14 from line 11 Property (A) $61,439; Property (B) None.
17. If section 1250 property:
(a) Additional depreciation after 12/31/75, $205.
(b) Applicable percentage times smaller of line 15 or line 17(a) (see instruction G.4) $205.
(i) Add lines 17(b), 17(e), and 17(h) $205.

Summary of Part III Gains:

21. Total gains for all properties (add columns (A) through (D), line 15) $61,439.
22. Add columns (A) through (D), lines 16(b), 17(i), 18(d), 19(f), and 20(b). Enter here and on line 7, $205.
23. Subtract line 22 from line 21. Enter here and in appropriate Section in Part I (see instructions E and G.2) $61,234.

INSTALLMENT SALE OF MADISON HOUSE

| | | |
|---|---|---|
| Selling price | | $90,000 |
| Less: | | |
| Adjusted basis at date of sale: | | |
| Basis | 38,786 | |
| Less accum. depr. | −16,075 | |
| | 22,711 | |
| Selling expenses | +5,850 | |
| Profit to be realized | 28,561 | |
| | 61,439 | |

Contract and selling price are the same.
Gross profit (percent) $61,439 divided by 90,000 equals 68.27 percent.
Payments rec'd in 1977:
Down payment, $10,000 plus Principal $50, equals $10,050 times 68.27 percent equals $6,861.
Gain to be reported:

| | |
|---|---|
| Ordinary income portion | $205 |
| Capital gain portion | 6,656 |
| Total | 6,861 |

SUPPLEMENTAL INCOME SCHEDULE

8. Net rental income or (loss) (from Form 4831), ($3,048).
10. Total rent and royalty inccme (add lines 7, 8, and 9) ($3,048).

Income or Losses from Partnerships, Estates or Trusts, Small Business Corporations:

13. Total (add lines 5, 10, and 12). Enter here on Form 1040, line 18, ($3,048).

RENTAL INCOME

1. Kind and Location of Property: Property A, Madison House, residential; Property B, Sea Pines.

Income:

2. Rents received, property A, $545; property B, $2,045.
3. Total (add amounts on line 2) $2,590.

Deductions:

7. Commissions, on property B, $490.
9. Insurance, on A, $85; on B, $24.*
12. Legal and accounting on A, $339.
13. Management fees, on B, $326.*
15. Repairs (list): maintenance, on B, $257*; heating repairs, on A, $28; window repair, on A, $18.
18. Taxes and licenses on A, $1,416; on B, $213.
20. Utilities, on A, $52; on B, $24.*
22. Add lines 4 through 21 on A, $1,938; on B, $2,274.
23. Total (add amounts on line 22) $4,212.
24. Depreciation expense (from page 2, line 28, column (g)) $1,426.
25. Total deductions (add lines 23 and 24) $5,638.
26. Net income or (loss) from rents (line 3 less line 25). Enter here and in Schedule E (Form 1040), Part II, line 8. ($3,048).

SCHEDULE FOR DEPRECIATION CLAIMED

Code:
(a) Description of property.
(b) Date acquired.
(c) Cost or other basis.
(d) Depreciation allowed or allowable in prior years.
(e) Method of computing depreciation.
(f) Life or rate.
(g) Depreciation for this year.

27. Total additional first-year depreciation (do not include in items below).
(a) House; (b) 1958; (c) 30,565; (d) 13,093; (e) 150 DB; (f) 50; (g) 437.
(a) Improvements; (b) 7/1/64; (c) 1,750; (d) 1,750; (e) S/L; (f) 10; (g) 0.
(a) Furniture; (b) 12/1/64; (c) 800; (d) 800; (e) S/L; (f) 5; (g) 0.
(a) Improvements; (b) Jan. 75; (c) 2,805; (d) 561; (e) S/L; (f) 10; (g) 234.

*Sea Pines:*

(a) Bldg.; (b) 7/1/72; (c) 25,300; (d) 4,554; (e) S/L; (f) 25; (g) 1,012.
(a) Appliances; (b) 7/1/72; (c) 1,150; (d) 518; (e) S/L; (f) 10; (g) 115.
(a) Carpeting; (b) 7/1/72; (c) 600; (d) 540; (e) S/L; (f) 5; (g) 60.
(a) Heat & Air; (b) 7/1/72; (c) 1,450; (d) 653; (e) S/L; (f) 10; (g) 145.
(a) Furnishings; (b) 8/1/77; (c) 710; (e) S/L; (f) 7; (g) 42.
Total Sea Pines, 1,374; less 9% personal usage, 124; equal 1,250; ½ ownership, 625.
(a) Furnishings**; (b) 7/1/76; (c) 1,000; (d) 143; (e) S/L; (f) 7; (g) 143; less 9% personal usage, 13; equal 130.
28 Totals—(g) 1,426.

COMPUTATION OF SOCIAL SECURITY SELF-EMPLOYMENT TAX

Computation of Net Earnings from Nonfarm Self-Employment:

Regular method—5. Net profit or (loss) from:
a. Schedule C, line 21. (Enter combined amount if more than one business.) $24,500.
6. Total (add lines 5a through e) $24,500.
8. Adjusted net earnings or (loss) from nonfarm self-employment (line 6, as adjusted by line 7) $24,500.
9. a. Maximum amount reportable, under both optional methods combined (farm and nonfarm) $1,600.

Computation of Social Security Self-Employment Tax:

12. Net earnings or (loss): b. From nonfarm (from line 8, or line 11 if you elect to use the Nonfarm Optional Method) $24,000.
13. Total net earnings or (loss) from self-employment reported on line 12. (If line 13 is less than $400, you are not subject to self-employment tax. Do not fill in rest of schedule.) $24,500.
14. The largest amount of combined wages

*Expenses have been reduced for 9% personal usage.

**Furnishings were all purchased by Mrs. Proxmire.

and self-employment earnings subject to social security or railroad retirement taxes for 1977 is $16,500.

16. Balance (subtract line 15c from line 14) $16,500.

17. Self-employment income—line 13 or 16, whichever is smaller, $16,500.

18. Self-employment tax. (If line 17 is $16,500, enter $1,303.50; if less, multiply the amount on line 17 by .079.) Enter here and on Form 1040, line 48, $1,303.

TAX COMPUTATION SCHEDULE

Tax Computation for Taxpayers Who Cannot Use the Tax Tables:

1. Enter your Tax Table Income from Form 1040, line 34, $78,188.

2. Multiply $750 by the total number of exemptions claimed on Form 1040, line 7, $2,250.

3. Taxable Income. Subtract line 2 from line 1, $75,938.

4. Income Tax. Check if from: Form 4726, $28,544.

General Tax Credit:

5. Enter $35 multiplied by the total number of exemptions claimed on Form 1040, line 7, $105.

6. Enter amount from line 3, above, $75,938.

7. Enter $3,200 if you are married filing a joint return, $3,200.

8. Subtract line 7 from line 6, $72,738.

9. Enter 2 percent of line 8 (but do not enter more than $180), $180.

10. General tax credit. Enter the larger of line 5 or line 9, $180.

11. Tax. Subtract line 10 from line 4. Enter the difference (but not less than zero) here and on Form 1040, line 35, $28,364.

MAXIMUM TAX ON PERSONAL SERVICE INCOME

A—Personal Service Income: salary, $76,950; schedule C, $24,500.

Total personal service income, $101,450.

B—Deductions Against Personal Service Income: Business expenses, $2,908.

Total deductions against personal service income, $2,908.

1. Personal service net income—Subtract total amount in column B from total amount in column A, $98,542.

2. Enter your adjusted gross income, $101,719.

3. Divide the amount on line 1 by the amount on line 2. Enter percentage result here, but not more than 100%, $.97.

4. Enter your taxable income, $75,938.

5. Multiply the amount on line 4 by the percentage on line 3, $73,660.

6. Enter the total of your 1977 tax preference items, $3,393.

7. Personal service taxable income. Subtract line 6 from line 5 (see instructions), $70,267.

8. If: on Form 1040, you checked box 2 or box 5, enter $55,200, $55,200.

9. Subtract line 8 from line 7 (if zero or less, do not complete rest of form), $15,067.

10. Enter 50% of line 9, $7,534.

11. Tax on amount on line 4 (use Tax Rate Schedule from Form 1040 (or Form 1041) instructions), $29,226.

12. Tax on amount on line 7 (use Tax Rate Schedule from Form 1040 (or Form 1041) instructions), $26,107.

13. Subtract line 12 from line 11, $3,119.

14. If the amount on line 8 is: $55,200, enter $18,060, $18,060.

15. Add lines 10, 13, and 14. This is your maximum tax. (See instructions), $28,713.

Computation of Alternative Tax:

16. Amount from line 4, $75,938.

17. Amount from Schedule D (Form 1040), line 15(a)* (or Form 1041, page 1, line 22), $3,393.

18. Subtract line 17 from line 16—If line 17 does not exceed $25,000, check here, ☒ and omit lines 19 through 22, $72,545.

23. Tax on amount on line 18 (use Tax Rate Schedule from Form 1040 (or 1041) instructions), $27,360.

24. Subtract line 23 from line 11, $1,866.

25. Subtract line 24 from line 15, $26,847.

26. If the block on line 18 is checked, enter 50% of line 17; otherwise, enter $12,500, $1,697.

27. Alternative tax, add lines 22 (if applicable), 25 and 26. (See instructions), $28,544.

Mr. PROXMIRE. I yield the floor.

## TIME-LIMITATION AGREEMENT SENATE RESOLUTION 319

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as it is called up and made the pending business there be a time limitation on Senate Resolution 319, which is Calendar Order No. 539, concerning travel expenses, as follows:

Two hours for debate on the resolution, to be equally divided between Mr. STEVENSON and Mr. SCHMITT, 1 hour on any amendment in the first degree, 30 minutes on any amendment in the second degree, 40 minutes on any debatable motion or appeal or point of order if such is made to the Senate, provided that Mr. CLARK have 2 hours on the resolution and that Mr. HARRY F. BYRD, JR., have 1½ hours, and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

## APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, appoints the Senator from Tennessee (Mr. BAKER) as a congressional adviser to the SALT delegation in Geneva during 1978.

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, appoints the Senator from Kansas (Mr. PEARSON) as a congressional adviser to the SALT delegation in Geneva during 1978.

## EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session for 1 minute to consider the nomination of Mr. Leslie Lazar Kanuk.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I only wish to inform the majority leader that the nomination so identified has cleared on our Calendar. We have no objection to proceeding to its consideration and his confirmation.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

## FEDERAL MARITIME COMMISSION

The assistant legislative clerk read the nomination of Leslie Lazar Kanuk, of New Jersey, to be a Federal Maritime Commissioner.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President. I ask unanimous consent that the President be immediately notified of the confirmation of the nominee.

The PRESIDING OFFICER. Without objection, it is so ordered.

## LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 o'clock tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR THE RECOGNITION OF MR. HARRY F. BYRD, JR. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after Mr. BARTLETT is recognized under the order previously entered that Mr. HARRY F. BYRD, JR. be recognized tomorrow for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER LIMITING TIME OF LEADERSHIP UNDER THE STANDING ORDER TO 5 MINUTES EACH TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time ordinarily allotted to the majority and minority leaders under the standing order be limited to 5 minutes each tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR CONSIDERATION OF S. 1566—WIRETAP BILL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow at 11:30 a. m. the Senate proceed to the consideration of S. 1566, which is the wiretap bill. This has been cleared.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the previous order by which the Senate would

at 11:30 a.m. tomorrow proceed to the consideration of S. 1566 be revised to this extent: That at the conclusion of the two orders aforementioned, the two orders for the recognition of Senators on tomorrow, the Senate then proceed to the consideration of S. 1566.

The PRESIDING OFFICER. Without objection, it is so ordered.

### PROGRAM

Mr. ROBERT C. BYRD. Mr. President, tomorrow the Senate will convene at 11 a.m. After the two leaders have been recognized, each for not to exceed 5 minutes on tomorrow, Mr. BARTLETT will be recognized for not to exceed 15 minutes. He will be followed by Mr. HARRY F. BYRD, Jr., for not to exceed 15 minutes; at the conclusion of which the Senate will take up S. 1566, a bill to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information. There is an agreement on that bill as to time and on amendments and motions in relation thereto. Rollcall votes are expected. It is anticipated that the Senate will complete action on that bill tomorrow.

### RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 11 o'clock tomorrow morning.

The motion was agreed to; and at 7:22 p.m. the Senate recessed until tomorow, Thursday, April 20, 1978, at 11 a.m.

### CONFIRMATION

Executive nomination confirmed by the Senate April 19, 1978:

FEDERAL MARITIME COMMISSION

Leslie Lazar Kanuk, of New Jersey, to be a Federal Maritime Commissioner for the term expiring June 30, 1981.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

# HOUSE OF REPRESENTATIVES—*Wednesday, April 19, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D. offered the following prayer:

*Let me hear what God the Lord will speak, for He will speak peace to His people * * * and to those who turn to Him in their hearts.*—Psalms 85:8.

Eternal Spirit, immortal, invisible, God only wise, in whose presence our hearts find peace and by whose power we receive strength for daily tasks, in this quiet moment we wait upon Thee seeking Thy will for us and Thy way with us this day.

We pray that Thou wilt help the Members of this House of Representatives by giving them insight to see what is right, inspiration to want to do what is right and industry to do it with all their might. By their integrity and sincerity may they be led to decisions that enlarge the borders of good will and build bridges of understanding over the gulfs which separate people and nations from one another. May the actions of this body hasten the glad day when peace, justice, and truth shall blend their creeds in one and Earth shall form one brotherhood by whom Thy will is done. Amen.

### THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

### DATE OF PANAMA CANAL TREATY RATIFICATION CALLED "DAY OF INFAMY"

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute.)

Mr. ASHBROOK. Mr. Speaker, I believe yesterday is a day which will join those which some years ago were referred to as "Days which will live in infamy." On that day the other body approved the so-called Panama Canal Treaty.

I think if there is anything that is needed to prove the phoniness of this treaty, it would be the statement of the dictator of Panama—referred to more politely by the liberal press and the President as the "ruler and leader of Panama"—when he said yesterday:

> Tomorrow we would have started our struggle for liberation and possibly tomorrow the Canal would not be operating anymore.

It is clear that we no longer know what shame is if we stand back and allow those insults and threats to be unanswered by our President.

This is a threat from a Marxist dictator, immediately after the Senate voted the approval of the treaty. While no firearm was involved, I believe this was the first in a long series of holdups that we are going to be faced with as we deal with the consequences of the ratification of this treaty.

While we did not have a vote, the American people well know we do have a vote on ratification because when the votes come up on the appropriations necessary to carry out this infamous treaty, the American people will consider our votes on these appropriations and implementing legislation just as surely a vote on ratification of the treaty as if we had voted on it with the Senate.

### KUDOS TO REPRESENTATIVES ALEXANDER AND BYRON FOR COMPLETING BOSTON MARATHON

(Mr. WRIGHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WRIGHT. Mr. Speaker, those of us who labor here in the vineyards of the House, with its 2-year terms of office, sometimes might feel that we are always running—running in primary elections, running in runoff elections, running in general elections—running, running, running.

So today I would like to offer a special salute to two of our colleagues who run not only as much as the rest of us do, but more, much, much more.

I refer, of course, to our friends BILL ALEXANDER, of Arkansas, and GOODLOE BYRON, of Maryland. Both are accomplished long-distance runners, and both successfully completed this week's Boston Marathon, the oldest and most famous long-distance race in the Nation.

Any of us who have done any jogging at all will be able to appreciate the magnitude of achievement for anyone who is even able to remain conscious after running 26 miles, 385 yards—the course of the Boston Marathon. Indeed, to be able to finish such a race with respectable times, as did BILL ALEXANDER and GOODLOE BYRON, is an achievement of superb physical prowess and mental discipline.

Their records in the Boston Marathon reflect great credit not only on BILL and GOODLOE, but on the House as well. Just let anybody try to accuse us now of shortcomings on energy.

### FLOWERS AND RAILSBACK AMENDMENTS SUPPORTED

(Mr. WHALEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

● Mr. WHALEN. Mr. Speaker, I have accepted the presidency of New Directions, a citizen interest foreign policy lobbying organization, effective July 1. I will devote full time to the organization beginning January 1, 1979, at which time I will begin to receive a salary. I think this information should be provided to my colleagues and to constituents as we begin consideration of H.R. 8494, the Public Disclosure of Lobbying Act of 1978.

I long have believed that our lobbying laws should be strengthened and I readily agreed to cosponsor H.R. 8494. I intend to vote in favor of the bill as well as several amendments which will tighten restrictions on organizations such as New Directions—which, incidentally, played a major lobbying role in support of the Panama Canal Treaties.

Specifically, I support the amendment by the gentleman from Alabama (Mr. FLOWERS) requiring registered lobbying organizations and their affiliates to re-

port indirect or "grassroots" lobbying efforts. Business, trade, labor, farm, and environmental groups make substantial use of mailings urging constituents to contact their legislators. By requiring reports from organizations involved in these efforts, this amendment provides the public open access to the scope of such organized lobbying efforts. At the same time, no requirement is made for disclosure of the names of those being requested to lobby.

Also, I support the amendments being offered by Mr. RAILSBACK: First, to require reporting by unpaid chief executive officers of lobbying groups; and second, to require disclosure of an organization's major financial backers. The latter amendment does not require a lobbying organization to disclose its complete membership list, but addresses the public's need to know who is behind major lobbying efforts.

Mr. Speaker, our existing lobbying laws are riddled with loopholes and ambiguities. The legislation before us today will open the lobbying process to public scrutiny without impinging on first amendment rights of individuals and groups to petition the Government.●

## JOINT REFERRAL OF H.R. 11245, NATIONAL INTELLIGENCE REORGANIZATION AND REFORM ACT OF 1978, TO COMMITTEE ON THE JUDICIARY

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the bill (H.R. 11245) the National Intelligence Reorganization and Reform Act of 1978, which has been referred solely to the Permanent Select Committee on Intelligence, be jointly referred to the Committee on the Judiciary.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

## PERMISSION FOR SUBCOMMITTEE ON PUBLIC BUILDINGS AND GROUNDS OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO MEET DURING 5-MINUTE RULE TODAY

Mr. AKAKA. Mr. Speaker, I ask unanimous consent that the Subcommittee on Public Buildings and Grounds of the Committee on Public Works and Transportation be allowed to sit during the 5-minute rule today, April 19.

The SPEAKER. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11504, AGRICULTURAL CREDIT ACT OF 1978

Mr. MEEDS, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1068) on the resolution (H. Res. 1140) providing for consideration of the bill (H.R. 11504) to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act, which was referred to the House Calendar and ordered to be printed.

## PROVIDING FOR CONSIDERATION OF H.R. 8494, PUBLIC DISCLOSURE OF LOBBYING ACT OF 1978

Mr. MEEDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1139 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1139

*Resolved*, That upon the adoption of this resolution it shall be in order to move, clause 3 of rule XIII to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 8494) to regulate lobbying and related activities. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Washington (Mr. MEEDS) is recognized for 1 hour.

Mr. MEEDS. Mr. Speaker, I yield the usual 30 minutes for the minority to the distinguished gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1139 is the rule providing for the consideration of the bill H.R. 8494, the Public Disclosure of Lobbying Act of 1978.

It is a 1-hour, open rule waiving points of order against the consideration of the bill for failure to comply with the provisions of clause 3, rule XIII (the Ramseyer rule). The committee report does contain the information required by the rule; this technical waiver is necessary only because the report does not comply with the rule's precise typographical requirements.

The rule for consideration of this bill also provides that the committee amendment in the nature of a substitute be considered as an original bill for the purpose of amendment, and it makes in order one motion to recommit with or without instructions.

Mr. Speaker, H.R. 8494, the Public Disclosure of Lobbying Act of 1978, is legislation reported by the Judiciary Committee to replace the present 32-year-old lobby disclosure law. The bill sets forth new requirements for annual registration and quarterly reporting by lobbying organizations, if those organizations pass certain thresholds of time and money devoted to lobbying communications in any given quarter.

H.R. 8494 does not affect individuals, organizations that are strictly volunteer, or organizations based in a Member's district that communicate only with that Member or his staff. The purpose of the legislation is to inform the public and the Members of Congress themselves on the nature of lobbying activities. That information includes three major parts: Who lobbies, how much they spend, and the issues on which they concentrate their efforts.

Mr. Speaker, I support the rule and urge the adoption of House Resolution 1139 in order that H.R. 8494 may be considered.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I agree with the statement just made by the gentleman from Washington (Mr. MEEDS) about this bill as far as the rule is concerned. It is a 1-hour, open rule. There is one waiver, and that is of the Ramseyer rule.

Mr. Speaker, let me say that this lobbying bill which we will be debating shortly takes a new approach. Rather than focusing on the lobbyist, it focuses on the organizations or the companies which might be hiring a lobbyist.

Mr. Speaker, I was amazed to learn yesterday in the Committee on Rules that if a person visits a store having nationwide branches and if that company spends more than $2,500 on lobbying activities during the year, that visit by a Member of Congress will have to be reported and the amount of time and expense the visit cost the company will have to be reported.

Mr. Speaker, this is a sort of scary thing, because every Member of Congress is invited into the various plants and facilities in his or her district at some time during the year to view the working conditions, inspect their products, talk with their employees, and to listen to their problems.

The question is whether or not these companies are going to have to report the cost to the company of having various employees meet with the Member to discuss these matters, or not. Certainly, this should be clarified. If they would have to report such visits, I think the bill goes too far in this direction.

I do not think it goes far enough, however, in the area of attempting to bring under control and within the confines of the statute these so-called volunteers who are periodically sent various messages from Washington to send to the Members as something purporting to have originated with them. I hope that these so-called volunteers will be brought under the provisions of this act when we get into the amending process.

Mr. DEVINE. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to my colleague from Ohio (Mr. DEVINE).

Mr. DEVINE. I thank the gentleman

for yielding to me. In connection with what the gentleman from Ohio (Mr. LATTA) was just saying, I wonder, in the testimony before the Rules Committee, whether it is true that organizations such as Mr. Nader's, and organizations that are promoting this legislation such as John Gardner's Common Cause, whether they are included or exempted under this proposed Lobby Disclosure Act.

Mr. LATTA. Well, as I just mentioned, if the volunteer business is not properly addressed during the amending process, certainly Mr. Nader's volunteers or the volunteers of Common Cause throughout the country may not be covered under this legislation, and I think they should be.

Mr. DEVINE. If the gentleman will yield further, I think it is passing strange that probably two of the most active organizations that lobby the Members of Congress and presume to position themselves between the public and the public officials should find it very convenient to exclude themselves from the terms of this bill, which they want so badly.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. During the general debate and the amending process under the 5-minute rule, of course, there will be ample opportunity to debate the issue that has been discussed just now, but I would like to clarify the record for the gentleman from Ohio (Mr. DEVINE). The organizations he mentioned will be covered under the bill, although the individuals who have first amendment rights to speak for themselves will not be covered per se. The bill only covers organizations, and not individuals.

Mr. LATTA. I am glad the gentleman mentioned they could speak for themselves. Certainly, they will not be covered if they speak for themselves, but if they are speaking for an organization, under the direction of that organization, then in my humble opinion they should be covered.

Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Ladies and gentlemen, if I can have your attention, I am going to tilt at windmills for the next 2 minutes, I suspect, but I must do so because the issue is much too important to slide over. I am going to urge that the Members vote against this rule and send back a very bad bill to the Judiciary Committee to be reworked.

This bill regulates lobby communications, and lobby communication is an oral or written communication to a legislator. The bill subjects it to a burden, a reporting burden of some magnitude.

The kind of speech that is involved here is the most valued under the first amendment. It is political speech. There is every reason in the world why we should subject it to no regulation. Now, I do not contend for a moment that it is beyond the power of this Congress to regulate even sensitive speech involving communications with legislators, but we should only do so upon a clear showing that there is a public abuse or a public evil involved.

The Judiciary Committee has not identified anything that is wrong with communicating with a legislator, and I can think of nothing that is wrong with the practice. I urge the Members to look to their own experience.

Do Members know of anything that is evil or worthy of regulation by reason of an organization talking to a Member about legislation? I am not aware of any such evil. This bill ought to be sent back to the Judiciary Committee with a clear message from the House of Representatives that it should focus upon identifiable evils. And the evils are gifts, of course. The evils are direct business relationships between business and organizations and Members. Of course that is a proper subject of disclosure and regulation. But the mere fact of a political speech ought not by this House to be submitted to the regulations imposed in this bill.

I strongly urge—and I feel as strongly about this as any bill that has come before the House of Representatives in my experience—I urge Members strongly to defeat the rule on this unfortunate legislation.

Mr. LATTA. I thank the gentleman for his comments.

In conclusion, Mr. Speaker, I would like to mention that the gentleman from Ohio (Mr. KINDNESS) has just informed me he will offer an amendment during the amending process to clarify and correct the matter that was brought before the Rules Committee yesterday on visitations within one's district, that I mentioned earlier. Hopefully the House will see fit to adopt that amendment.

Mr. Speaker, I have no further request for time.

Mr. MEEDS. Mr. Speaker, whether we agree or disagree with the position of the gentleman from California, the question before the House here is the rule. What the gentleman is addressing himself to is the merits of the bill, so I would suggest we pass the rule and get along with the debate where the gentleman can stress his points, and then we can vote the bill up or down.

Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SYMMS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 15, not voting 40, as follows:

[Roll No. 235]

The Clerk announced the following pairs:

Mr. Rodino with Mr. Aspin.
Mr. Howard with Mr. Bonker.
Mr. Teague with Mr. Watkins.
Mrs. Burke of California with Mr. Thornton.
Mr. Chappell with Mr. Goldwater.
Mr. Krueger with Mr. Beard of Tennessee.
Mr. Dellums with Mr. Don H. Clausen.
Mr. Runnels with Mr. Cederberg.
Mr. Rose with Mr. Kostmayer.
Mr. Whitley with Mr. Pursell.
Mr. Ambro with Mr. Fraser.
Mr. Conyers with Mr. Cornwell.
Mr. Robert W. Daniel, Jr., with Mr. Hefner.
Mr. Diggs with Mr. Tucker.
Mr. Phillip Burton with Mr. Cochran of Mississippi.
Mr. Mathis with Mr. Walgren.
Mr. LaFalce with Mr. Charles Wilson of Texas.
Mr. Nedzi with Mr. Cunningham.
Mr. Kazen with Mr. Solarz.

Mr. HANSEN changed his vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## PERMISSION FOR SUBCOMMITTEE ON CRIME OF COMMITTEE ON THE JUDICIARY TO SIT TODAY DURING 5-MINUTE RULE

Ms. HOLTZMAN. Mr. Speaker, I ask unanimous consent that the Subcommittee on Crime of the Committee on the Judiciary may be permitted to sit during the proceedings under the 5-minute rule today.

The SPEAKER. Is there objection to the request of the gentlewoman from New York?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, why does this have to be done today? Is it because the gentlewoman is testifying?

Ms. HOLTZMAN. Mr. Speaker, if the gentleman will yield, that is one of the reasons, I will say to the gentleman. This is a continuation of hearings that are being held on an important subject.

Mr. ROUSSELOT. The Members will not be marking up any bill?

Ms. HOLTZMAN. No, they will not.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentlewoman from New York?

There was no objection.

## PERMISSION FOR SUBCOMMITTEE ON CEMETERIES AND BURIAL BENEFITS OF COMMITTEE ON VETERANS' AFFAIRS TO SIT TODAY DURING 5-MINUTE RULE

Mr. CARNEY. Mr. Speaker, I ask unanimous consent that the Subcommittee on Cemeteries and Burial Benefits of the Committee on Veterans' Affairs may be permitted to sit today during proceedings under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman assure us that there will not be marking up of any bill?

Mr. CARNEY. Mr. Speaker, if the gentleman will yield, we have some subcommittee bills, and both sides have agreed that they may be reported out. The gentleman from Indiana (Mr. HILLIS), who is the ranking minority Member, has agreed to this. We are trying to get some bills on which we have held hearings some time ago reported out for a meeting tomorrow.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

## PUBLIC DISCLOSURE OF LOBBYING ACT OF 1978

Mr. DANIELSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 8494) to regulate lobbying and related activities.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. DANIELSON).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 8494, with Mr. MEEDS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from California (Mr. DANIELSON) will be recognized for 30 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill we have before us today, H.R. 8494, the Public Disclosure of Lobbying Act of 1978, is a bill which is intended to repeal and totally revise the lobbying law which is presently on our books. It is designed to give us a law which is workable and which will enable the American people and the Members of the Congress to know what type of activity is taking place in the field of lobbying here in the Congress.

This bill is entirely limited in its application to lobbying in legislative matters.

I would like to point out that since 1946 we have had on the books a so-called lobbying regulation law which has for practical purposes been ineffective. There is a rather broad public feeling that we should have an updated, modern, serviceable lobbying bill, and this bill is our offering to meet that need.

The Members will recall that during the 94th Congress a bill was reported by the Subcommittee on Administrative Law and Governmental Relations of the Committee on the Judiciary, which was then under the chairmanship of the gentleman from Alabama, the Honorable WALTER FLOWERS. That bill was passed by this House, but it perished because the session expired before the other body could act upon it.

The bill that we have before us today started with the good work of the subcommittee chaired by the gentleman from Alabama (Mr. FLOWERS) and is based upon many days of hearings and markup which followed that work. It is the product of a very considered judgment.

I would like to point out, first of all, that the committee at all times recognized that lobbying is a constitutionally protected right. It is protected by the very same first amendment as protects the right of freedom of speech, freedom of religion, freedom of peaceable assembly. And bearing that in mind, we have labored carefully to try to bring about an adequate disclosure of lobbying activities without at any time treading upon the constitutionally protected rights of the people to petition their Government for redress of grievances.

I would like to point out that this bill does not regulate lobbying. It does not prohibit lobbying. What it does is require that lobbyists, whom I am going to refer as reference to those who lobby on a commercial scale, be required to report and to register and to identify themselves as being in the business of lobbying, and and to file periodic reports as to their lobbying activities, the funds they spend, and what they are working on, and the like. They are not prohibited from carrying on lobbying activities, as they should not be under the first amendment. The bill provides, first of all, a series of definitions in section 2, which are very important to the substance of the bill. They define "lobbying communications" as one which I wish to touch upon very briefly. A lobbying communication is a commu-

nication directed to a Member of the Congress or a Federal officer or employee—but in the context of the bill, that would be a Member of Congress, a Member or staff of the Congress—and certain executive department employees with reference to pending legislative matters. The covered communication would be intended to influence the content or disposition of any bill, resolution, treaty, nomination, hearing report, or investigation which is either pending before the Congress or in the report thereof. Thus, it is limited to legislative activity. The bill does not define the term "lobbyist." It defines a type of activity of making lobbying communications.

Who must register? First of all, the bill will require registration only of organizations which are engaged in making lobbying communications. The organization necessarily will be two or more persons. It encompasses practically any kind of business or other organizational association of people. Exempted, basically, by the provisions of the bill are individuals. No individual acting as a person need register or report. Why? Because under the first amendment he has an absolute right to petition his Government. He also has the right of freedom of speech. In our committee review of the bill, we felt that if we brought in individuals we would be infringing upon this constitutionally protected right. There is one category of individual who will have to register and report, but that is because of the unique position which he would fill, namely, the registered agent of a foreign principal. A person who is working as the agent for a foreign principal must register under this act if he engages in lobbying communications, but that is the only individual who would be covered. The bill provides that the registration shall be with a Comptroller General. The terms of registration are spelled out in the bill, but they are really quite simple—the identification of the person, his address, and the like.

The bill also provides that periodically, each quarter, the registered organization must file with the Comptroller General the statement of his expenditures and activity carried out in conducting a lobbying communication. The Comptroller General is required to make these records available to the public, to make copying available, if need be, and periodically to compile a report summarizing the data in the reports themselves.

The Comptroller General also will have the power to promulgate and issue rules and regulations in accordance with the bill and to carry out the purposes of the bill. Such rules and regulations must be promulgated in accordance with the Administrative Procedure Act.

There is a legislative veto provision in the bill giving either House of the Congress the power to veto a proposed rule or regulation.

The Comptroller General, although he would act as the repository or the collector of these registrations and reports and would publish compilations from time to time, would not have the enforcement responsibility.

We decided in this bill to revert to the time-tested American principle of recognizing that the Attorney General is the chief law enforcement officer of the United States of America; and if any alleged or purported violations of this law should come to the attention of anyone, the remedy would be to report them to the Attorney General for his attention.

The Attorney General has jurisdiction under the enforcement provisions of the bill to investigate alleged violations of any provision or act or rule or regulation. He shall also notify the alleged violator of the alleged violation unless he finds that such notification would interfere with the effective enforcement of the law.

He shall then make such investigation as he considers appropriate. It is required that the investigations be conducted expeditiously and with due regard for the rights and privacy of the individual or organization involved.

If the Attorney General determines, after conducting that investigation, that there is some reason to believe that a civil violation of the act has taken place, then he shall try to correct that by means of conference or conciliation. If that fails, then he has the right to institute a civil action to enforce the law and has the right to ask for a permanent or temporary injunction or other appropriate relief.

If after the investigation he feels there is reason to believe that the individual or organization has engaged in a criminal violation of the law, then he may institute a criminal proceedings, as provided in title 18 of the United States Code. These actions shall be brought in the U.S. district court.

The sanctions to be applied in the case of a criminal violation would be a fine of not to exceed $10,000 or confinement for a period of not to exceed 2 years.

Mr. Chairman, we have purposely brought into the bill a provision that criminal intent would follow the rule of willfulness. That is in an effort to avoid any possibility that a person might innocently or through ignorance or carelessness find himself athwart the criminal provisions of the bill. We have modified the intent by incorporating the term "willful."

Mr. Chairman, I would like to point out that the Supreme Court has construed that word very carefully; and I would like to point out that in the committee report, on pages 40 and 41, we have made a record of this. We state as follows:

> By the use of the term "willful" it is the purpose of the committee to require the highest degree of criminal intent as an essential element of any criminal violation of this Act. To satisfy that requirement the acting person must know that his action is in violation of the law and nevertheless persist in his action for the purpose of violating the law.
>
> In adopting this language the committee invoked the highest standard for criminal intent as stated by the Supreme Court (in the case of the *United States* v. *Murdock*, 290 U.S. 389), that "willful" as used in a criminal statute, refers to an act done with a bad purpose, without justifiable excuse, stubbornly, obstinately, perversely, and with an evil intent. In short, to constitute a criminal offense the actor must have the specific intent to violate the law.

Now, there are two or three myths floating around about this bill which I hope I can dispel. First, there is no provision in this bill requiring people to report the amount of any contributions they may have made to a lobbying organization, and thereby to identify themselves. This was done for two very good reasons. First, the Supreme Court has declared that this is an unwarranted invasion of privacy, and has a chilling effect on freedom of speech, and I can readily understand that it would.

For example, suppose that someone working for a large oil company has a deep and abiding feeling for the environment and wishes to protect it. He might wish to make a contribution to an organization whose work is concerned with the elimination of smog. Yet, he does not wish to do so and make it public because he is working for a large oil company, which in itself is doing the polluting. This kind of thing might well be prominently displayed in the press.

There are those who advocate certain rights for homosexuals. Suppose someone felt that this was a subject that ought to be discussed, so he wishes to make a contribution to such an organization. In that event, obviously he probably would not wish to have his contribution and identity disclosed. He certainly has a right to disclose it voluntarily if he feels like it, but it might cause difficulties for him. For these reasons, we have left out a reporting requirement as to disclosure of dues or contributions.

One other thing we have left out is solicited lobbying. Obviously, if an individual has a right to petition Congress for redress of his grievances, we cannot do anything which would chill or impede the willingness of people so to communicate. For that reason, we have left that particular requirement out.

Again, I would like to point out that no individual, no one in America will ever be denied the right to communicate with his Congressman or with public officials under the terms of this bill. The right of the individual to communicate with the Congress, with his Government, is safeguarded in the first amendment, and there is nothing in this bill to impede that right.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I will be pleased to yield to the gentleman from California.

Mr. WIGGINS. Are not organizations entitled to similar first amendment protection?

Mr. DANIELSON. In my opinion, they are not. They are entitled to communicate, but the restrictions imposed by this bill are justifiable restrictions within the meaning of the first amendment. Yes, everyone has a right to communicate, but in the individual we have it absolutely unhampered in this case.

Mr. Chairman, I reserve the balance of my time.

Mr. MOORHEAD of California. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, the legislation that we are considering today should be most familiar to the Members of this House.

During the 94th Congress, the issue of full disclosure of lobbying activities was hotly debated both in the Judiciary Committee and on the floor of the House.

When we seek to regulate lobbying activities in any form, we are directly affecting the basic first amendment rights of individuals—the right to petition, the right of free speech, and the right of free association. Consequently, extreme legislative caution is essential.

The bill you see before you, H.R. 8494, is the work product of 15 days of markup in the Subcommittee of Administrative Law and Governmental Relations and 3 days of markup in the full Judiciary Committee. The fact is that our subcommittee has labored over this subject—off and on—for the last 4 years.

This year's version contains some important improvements over its predecessors. Most significant, are the improvements made in comparison to the bill (H.R. 15) which this House passed in 1976. H.R. 8494 does not contain the constitutionally questionable dues or contributions reporting feature. Similarly, there is no requirement that an organization track and report upon grassroots lobbying efforts. In both cases, our committee determined that such reporting requirements might violate basic first amendment rights. Finally, H.R. 8494 deals with lobbying in its generally accepted sense—attempts to influence legislation.

But while there have been significant improvements in the content of proposed lobbying disclosure legislation, H.R. 8494 is still far from being a perfect product. Hopefully, these deliberations will result in even further improvements.

Allow me now to quickly cite some of my main areas of remaining concern. A basic problem with this legislation is the definition of lobbying communication. Under its present terms, an organization could be required to register and report solely on the basis of written communications. In fact, 13 letters or telegrams written on different days in a 3-month period would result in the automatic coverage of an organization. It is my view that a lobbying statute should be limited to direct, oral communications. An organization should only be deemed to be across the lobbying threshold through direct contacts and conversations with Members of Congress, their staffs, or committee staff personnel.

H.R. 8494 also imposes both civil and criminal penalties for violations of certain provisions of the bill. The imposition of criminal penalties means that the strict standards of due process must apply. It seems to me that it would be far preferable to limit penalties in this disclosure statute to civil fines. To impose criminal sanctions on those who are arguably exercising their first amendment rights under the Constitution is both harsh and unwise.

This measure also concerns itself solely with lobbying for pay. But the size of one's salary or retainer is not the only way to measure the seriousness or effectiveness of a lobbying effort. This legislation should not implicitly make a distinction between "good" lobbyists and "bad" lobbyists. That is a subjective judgment. This bill should cover any organizational effort that results in continuous or systematic lobbying. Expenditures are only one means of measuring such an effort.

In H.R. 8494, organizations which rely heavily on volunteer assistance are given an advantage over those organizations which completely rely on employees or outside retained help. The activities of "professional volunteers" such as the renowned Mr. Nader, should be covered in this legislation. Again, genuine, fair lobby disclosure legislation should cover anyone who carries on continuing, systematic lobbying activity, whether they are salaried or not.

It is my understanding that during the 5-minute rule an amendment will be offered by the gentleman from Illinois (Mr. RAILSBACK) aimed at dealing with this inequity. Specifically, it would require organizations to report upon significant lobbying efforts made on their behalf by an unpaid "principal executive officer." This is an important step in the direction of fairness and I urge a "yes" vote on this amendment.

In conclusion, I again want to emphasize my general support for H.R. 8494. Even given the aforementioned defects, the 95th Congress' version of this bill is far less burdensome than its constitutionally suspect predecessors. For that reason, I strongly urge the Members of this House to oppose any damaging amendments that could upset the delicate constitutional balance now in this legislation. Oppose the effort to reinsert dues and contributions reporting; oppose grassroots or "solicitations" coverage; and oppose any naive and misdirected effort to include Government contract activity in a lobbyists' reporting bill.

This time around, we have a bill which virtually every major lobbying organization—except common cause—feels it can support. We should not let this chance go by. Oppose amendments to the Public Disclosure of Lobbying Act which would serve to undermine its constitutional validity.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD of California. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, first of all I want to congratulate the gentleman for the time and the effort that he has put into trying to construct a very meaningful, worthwhile, and effective lobbying bill.

The gentleman is correct that I am going to introduce an amendment which is designed to do exactly what he has suggested, and that is to simply recognize where we have a chief executive that actually is a lobbyist of a particular organization, and where he is speaking on behalf of that organization, that individual's name ought to be disclosed—and we are talking about the Ralph Naders and perhaps the Irving Shapiros, people that actually do lobbying, they are lobbyists, and they are chief executives, and if we do not have an amendment they may not be covered.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Chairman, I want to congratulate the gentleman from California (Mr. DANIELSON) and the gentleman from California (Mr. MOORHEAD) on the diligent scholarly work they have done on this bill. This legislation was dealt with with great trepidation and with great care by the House Committee on the Judiciary because, as has been pointed out by the two previous speakers, there are at least four specific American freedoms that are involved in this bill, the freedom to redress the Government for grievances, the freedom of speech, the freedom of association and the right of privacy.

I believe the bill, after considerable amendment both in the subcommittee and in the full committee meets minimum constitutional standards and I am going to support the bill and I trust that it is enacted. It is a tough bill but it gets the job done.

The purpose, of course, is to require public disclosure of professional lobbying organizations where there is direct communication with Members of Congress, members of our staff and a limited number of high ranking Federal emloyees. That is just what the bill does. The threshold is high enough to cover these professional lobbyists and will not affect the volunteer grassroots-type of organizations that we also wish to encourage and which have their constitutional rights also.

Insofar as the professional lobbyists are concerned, the bill would require that they tell us who they are, the money they spend; they must report their gifts or expenditures of $35 or over for the benefit of Members of the Congress or a Federal officer. It has civil and criminal sanctions that are enforceable, unlike the present lobbying law.

So, Mr. Chairman, in my view the bill is supportable as reported—and I emphasize "as reported"—because the bill is not supportable if any one of certain major amendments is adopted, and I believe that the gentleman from Illinois (Mr. RAILSBACK) has several in mind. In particular, mechanism, if the grassroots lobby solicitation amendment is adopted, the bill would not be supportable on constitutional grounds. This part of the bill, solicitation, was eliminated by an overwhelming vote of 26 to 8 in the full Committee on the Judiciary.

I would refer the Members, Mr. Chairman, to a letter dated April 18, 1978, signed by all seven members of the House Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary which I have the privilege of chairing, pointing out to the membership of the House of Representatives the constitutional difficulties with the solicitation amendments. It is both unwise and, in our view, unconstitutional.

Other amendments which, if accepted by the committee, would make the entire bill unacceptable in my view and unconstitutional, and other grounds include the contribution requirement mentioned by both gentlemen from California (Mr. MOORHEAD and Mr. DANIELSON). Here

again we have an unconstitutional and unwise amendment lowering the threshold so that volunteer grassroots groups would be covered.

With those caveats, Mr. Chairman, I would like to point out again that I support the bill as it is and I would urge the membership to resist the various amendments that I have mentioned.

Mr. MOORHEAD of California. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Chairman, the House Committee on the Judiciary has wrestled with the subject of lobbying legislation for over 3 years, and I think it is fair to state that this bill before us today, H.R. 8494, is the most generally acceptable one we could have come up with, and certainly the most acceptable one we have come up with yet. At the outset I think it should be emphasized that H.R. 8494 is considerably different from the bill that we had before the House some 2 years ago and which passed the House. That was H.R. 15 in the 94th Congress. This legislation has a higher threshold for coverage. Less reporting is required of covered organizations; consequently, the reporting provisions are less burdensome. The enforcement provisions are less onerous and are simplified. In short, this bill is not as constitutionally suspect as its predecessors. It is important to stress that H.R. 8494 is a legislative lobbying bill. As has been pointed out, there is not executive branch coverage except in the case of contact by lobbying communications with designated high level executive branch officials on legislative matters where it is sought to influence the outcome of legislation, or treaties, or what have you.

There is next an important point that has been made here, which bears emphasis, that only organizations, not individuals, can be lobbyists under this legislation. An organization will file the annual registration and quarterly reports on lobbying activities. Individuals either retained by a covered organization or employed by the covered organization will be listed on their registrations and reports if they carry on systematic and sustained lobbying.

Certain activities are made exempt from the coverage of this act and should be zeroed in on, I believe. They are not lobbying communications. These include communications made at the request of a Federal officer or employee, or testimony at a public hearing. They include communications made in a speech or in a newspaper, book, magazine, radio, or television appearance, and communications by an individual for redress of grievances, or to express his personal opinion. Also exempt are communications made by an organization with the two Senators representing the State where the organization has its principal place of business, along with communications with any Congressman whose district is in the county where the organization has its principal place of business. This is known as the "geographic exemption." Frankly, this feature of H.R. 8494 is the one, in my view, most deserving of criticism and in need of refinement. The principal place of business standard is far too narrow. It would not assure the unhampered communication between constituents and Members of Congress that we all seek. Consequently, during the 5-minute rule I will offer an amendment to exempt any communication made by an individual with a Member of Congress who represents the area where the individual lives, or where he works. Our constituents should feel free to communicate with us on any matter, whether it relates to personal beliefs, their jobs, or a business.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield just briefly?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. WIGGINS. I thank the gentleman for yielding.

I am curious to know why the gentleman feels it necessary to provide any geographic limitation on communications with legislators? It is my understanding that the first amendment applies to petitions to Government, not to one's own Congressman.

Mr. KINDNESS. The gentleman is mixing up two concepts, I believe. A person can certainly freely communicate with anyone in Government, petition Government with respect to his own opinions, or redress grievances.

Mr. WIGGINS. Organizations, too, I will say to the gentleman.

Mr. KINDNESS. The point that I am addressing here is where an organization which is involved in the lobbying process and thus comes under the coverage of the bill has someone speaking in its behalf within one's congressional district, or the State in the case of a Senator. That really should be exempt, in my opinion, and I think we should put that to a test of the vote of the House.

Once an organization is a lobbyist under H.R. 8494, it must file an annual registration with the Comptroller General. As has been pointed out, the administration of the act is to be carried out by the Comptroller General, the quarterly reports as well; but what is more significant, perhaps, about H.R. 8494 is to note what need not be reported. What need not be reported is particularly important, compared to the last time around. There is a need to retain these features of the bill, as has already been mentioned: no requirement that an organization disclose contributions or dues, nor any grassroots or indirect lobbying efforts.

I want to emphasize those things are important to the integrity of a bill that I believe has reasonable balance and they are important to the support of the bill, which is relatively widespread at this point.

I would like to point out to those who are concerned with Federal officials lobbying, there is already a provision in the United States Code, title 18, section 1913, which says that no part of the money appropriated by any enactment of Congress shall be used in the absence of express authorization by the Congress to directly or indirectly pay for any personal service or other forms of remuneration to influence legislation before the Congress. The fact that that part of the Criminal Code is not enforced is not directly at issue before us today, but that troublesome problem exists.

Mr. MOORHEAD of California. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Chairman, I, too, join in saluting the chairman and the ranking minority member of the subcommittee which has produced this extremely important legislation and I am hopeful that in general it will be enacted as presented to the House, with a few exceptions to which I will make reference in my statement.

Mr. Chairman, I rise in support of the Public Disclosure of Lobbying Act (H.R. 8494). To my mind, this is the most reasonable, fair proposal that has been put forth on this subject in recent years.

The enactment of this legislation would result in a far more effective lobbying statute than is presently on the books. The notorious "principal purpose" doctrine would be discarded, so that virtually all organizations which carry on continuing lobbying efforts would have to register and report. For the first time, this bill would assure effective enforcement of a Federal lobbying statute through powers given to the Justice Department. Covered organizations will register annually, and supply detailed quarterly reports to the General Accounting Office. Among other things, these reports would disclose the significant lobbying activities undertaken by the organization, as well as the total expenditures made in support of such efforts.

We all know that the existing Federal Regulation of Lobbying Act (2 U.S.C. 261–270; 60 Stat. 839–849) is unworkable and unenforcible. In a desperate balancing act in the Harriss case, the Supreme Court attempted to salvage the constitutionality of the unfortunate 1946 law. But in doing so it laid to rest forever the possibility that that statute might ever be meaningful. *Harriss* v. *United States*, 347 U.S. (1954).

But while I certainly support this proposed stringent new law, I still believe that we as legislators have a responsibility to closely scrutinize any replacement for the 1946 law. Drafting effective legislation in this area is a difficult and a delicate business. We deal here with basic first amendment rights—the right "to petition the Government for a redress of grievances." We must be careful to insure that any new statute does not result in an unwarranted "chilling effect" on the rights of individual citizens to express themselves. Beyond that, organized lobbying has consistently been judicially recognized as a right protected by the first amendment. See: Harriss, supra; *Liberty Lobby* v. *Pearson*, 390 F. 2d 489 (1968). What this means is that every aspect and every provision of a law which regulates, interferes with, or infringes upon this right, must be justified by a "compelling state interest."

This brings me to my first specific area of concern—contributions disclosure. Many of the bills introduced on lobbying would have required some form of disclosure, by organizations which lobby,

with respect to the amount of contributions or dues. These versions also would require the organization to supply the identity of the individuals making contributions above a certain level. In 1976, the House-passed bill (H.R. 15) would have required the disclosure of any contribution in excess of $2,500 and the identity of each individual contributor. This year the Judiciary Committee rejected this idea and I supported this decision.

While, on its face, this seems to be a perfectly plausible and reasonable means of determining where large interest groups get their money, there is some serious constitutional "fallout" with such a provision. What, for example, will be the impact of this type of provision on a church or other large charitable organization? Will we be directly affecting their ability to raise funds for good causes? Most of these provisions contain no requirement that the contribution actually be used for lobbying purposes—only that it be given to an organization that sometimes or occasionally lobbies.

Further, if the disclosure threshold is easily reached, we might end up with a complete or partial membership list of an organization. What are the constitutional implications of this? In a number of decisions the Supreme Court has found the requirement of disclosure of membership lists to violate the first amendment rights of privacy and associational freedom. *NAACP* v. *Alabama*, 357 U.S. 499 (1958); *Bates* v. *Little Rock*, 361 U.S. 526 (1960); *NAACP* v. *Button*, 371 U.S. 415 (1963); *Gibson* v. *Florida Legislative Committee*, 372 U.S. 539(1963). The test laid down by the Court is: Whether or not there is a substantial relationship between the information sought—for example the list—and a compelling, overriding State interest, so as to justify such an intrusion into, and modification of, first amendment rights.

I would urge this House to reject the effort to put dues and contributions reporting back in H.R. 8494. An unnecessary and unreasonable burden should not be placed on religious and other charitable organizations by such a reporting requirement—even with a waiver for churches from the Comptroller General because the waiver might not be granted and it would be too late for the contributor. He has been effectively chilled or deterred from exercising his first amendment rights.

My next concern has to do with insuring coverage of a class of individuals that I would describe as "professional volunteers." H.R. 8494, as it is presently constituted, is applicable only to organizations which employ or retain individuals to lobby. So, for example, Congress Watch would register as a lobbyist and report on the lobbying activities of its salaried employees, paid officers, and directors. But the activities of Mr. Ralph Nader, the founder and principal spokesman for the organization, would not be fully reflected in the "total expenditures" figures required in their quarterly report. Why? Because Mr. Nader receives no salary for his services to organizations such as Congress Watch or Public Citizen.

Now, none of us want to inhibit genuine volunteer activity of individuals who are exercising the right to petition without reference to a particular organizational policy or interest. But, if expenditures alone are the criterion for triggering coverage of an organization—we are oversimplifying and distorting how effective lobbying can be accomplished. A big salary or large expenditures are not always the best way to determine the quality or effectiveness of a lobbying effort. They are only one way of measuring such efforts. We must insure that individuals with financial resources independent of the organization or interest groups they serve will be covered if they are consistently active as lobbyists. Any individual, who, without pay, expends substantial amounts of time and effort to influence the legislative process should be covered provided he meets a reasonable threshold of substantive activity.

The failure to cover Ralph Nader, and others like him, has become the most notorious "loophole" in H.R. 8494. I urge support for an amendment to be offered by my colleague from Illinois (Mr. RAILSBACK) which would remedy this loophole.

My final area of concern has to do with so-called grassroots lobbying. Here again, the arguments for such coverage appear to be most reasonable and valid on their face. However, the Judiciary Committee overwhelmingly voted to delete a grassroots or solicitations reporting feature from the bill based upon genuine constitutional concerns.

I strongly feel that any provision requiring disclosure of lobbying solicitations should be kept out of H.R. 8494. If such a provision is included, virtually all communications between an organization and its members relating to legislative matters would have to be disclosed and reported. The pervasive sweep of this requirement coupled with the threat of substantial penalties for failure to report will have a chilling as well as burdensome effect on the legitimate information and educational activities of an organization and its members.

An objective of any bill to regulate lobbying should be to further open up the political process, to encourage more and different points of view, and to facilitate an informed exchange between the public and Congress. The amendment to put grassroots coverage back in H.R. 8494 would have the opposite effect; it would deter organizations from using their newsletters and other channels of information to inform their members about legislative issues, and would serve to restrain such organizations and members from engaging in legislative activities. What possible benefits can derive from reporting requirements which: First, tell you what you already know; and second, serve as a barrier or deterrent to citizens exercising their constitutional rights? I urge a "no" vote on the Flowers amendment.

Again, I emphasize that the Judiciary Committee version is a reasonable piece of legislation which also represents a significant improvement over the existing law. I urge the Members of this House to support the Judiciary Committee version of the bill with the addition of the professional volunteer coverage.

Mr. DANIELSON. Mr. Chairman, I yield 4 minutes to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Chairman, as we consider today H.R. 8494, the Public Disclosure of Lobbying Act, I urge my colleagues to ask themselves what I consider to be the two basic questions for determining whether this bill will provide us with an effective lobbying law:

First. Will it include a clear and enforceable threshold provision to make sure that large, well-financed organizations must register?

Second. Will it provide us with an accurate record of not only what organizations spend on their lobbying efforts, but also who is financing an organization's major lobbying activities?

In order to provide a meaningful record of how lobbying influences public policy, I believe that a lobbying bill must be tough enough to provide a complete picture of organized lobbying efforts, without being so tough as to discourage these efforts, when they are appropriate. In my view, without the addition of two key provisions, namely, a more workable threshold provision and a requirement for the disclosure of major contributors to an organization, H.R. 8494 will fail to meet this objective.

Finding the proper threshold for identifying those organizations that spend a significant amount of time and money on lobbying is the most crucial element in any lobbying legislation. If it is to be effective in determining which organizations must register, a threshold must meet the following two tests:

First. It must be clear and simple enough so an organization can understand readily whether or not it must register; and

Second. It must be specific enough so that major lobbying organizations, or operations, will not be able to avoid registration.

I feel that the current threshold in H.R. 8494 is both too vague and too lenient to compel the coverage of many major lobbying organizations.

As originally adopted in subcommittee, the threshold covered organizations that spent $2,500, and an aggregate of 13 days, on lobbying communications in any quarterly filing period. The primary attribute of this threshold is its simplicity: It bases coverage on a significant level of lobbying expenditures and employs a reasonable and easy-to-calculate days test to determine how much time was spent on lobbying. Moreover, this threshold is effective: It is designed to cover the larger, better-financed lobbying organizations without requiring tedious recordkeeping or forcing the compliance of smaller organizations.

The threshold provision in H.R. 8494, on the other hand, establishes a complicated and impractical two-tiered days test for triggering coverage, whereby an organization must register only when one employee engages in "lobbying com-

munications" for 13 days per quarter, or two or more employees engage in such activities for 7 days per quarter. By so doing, this threshold is not only far more difficult to understand, but it opens a tremendous loophole through which major lobbying organizations can escape registration. Today I plan to offer an amendment which will restore the meaningful and effective threshold originally adopted in subcommittee to H.R. 8494, and I urge my colleagues to support this amendment.

I also believe that H.R. 8494's effectiveness can be greatly improved through the addition of a contributor disclosure amendment. Without such a provision, this legislation will provide only a partial record of how lobbying influences public policy.

A few large organizations can finance a significant portion of an organization's lobbying efforts, and can control an organization's position on a particular issue. For instance, the fact that the Electric Consumers Utility Council is financed by industry, rather than consumers, can make a big difference in understanding and evaluating that organization's lobbying interests. In my view, information on who is financing an organization's lobbying efforts should be a matter of public record.

An amendment is to be offered today which will require the disclosure of major contributors to an organization. I feel that this amendment will serve to preserve integrity and openness in government, while greatly improving the effectiveness of this legislation in providing an accurate public record of the lobbying process. I urge my colleagues to support this amendment.

In summary, I believe that H.R. 8494 has the potential to become a sound and workable lobbying law. However, it cannot be effective without the restoration of a meaningful threshold provision, and it will not be complete without a provision requiring the disclosure of major contributors to a lobbying organization. I believe that the adoption of these provisions will help H.R. 8494 meet its potential.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I am happy to yield to my colleague, the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I thank the gentleman for yielding.

I am concerned that maybe the point that is made about the lobbyists not wanting to register is not exactly as accurate as the point relating to the concern that lobbyists have about the weight of reporting and the volume of reports.

A few weeks ago on the House floor we had a bill which was an attempt to relieve Members, and candidates from so much reporting, no doubt because of the fact that reporting is really a burden.

Mr. HARRIS. If my colleague will let me recapture my time, I would be happy to hit on those points, because I think it is essential that the threshold under which the organization has to register as a lobbyist is very important. It is also very important to have the reporting requirements simple enough so that it is not an undue burden to register as a lobbyist. We should know what lobbyists are doing, how much they are spending, but we should not also burden them with so much reporting that it would be an undue hardship. I will offer one amendment to have a threshold clear and simple and enforceable. Under the current threshold provision, an organization could make 600 contacts per quarter and not have to register as a lobbying organization. I doubt if anyone is going to treat such an act very seriously. I would hope that we can at least put the threshold in that we adopted in subcommittee which says that when an organization spends $2,500 per quarter, when they make 13 days of direct contacts per quarter, then they have to register. It is a simple test. It is a clear test. But, more importantly, it is an enforceable test.

This law will be of no purpose unless the rules can be enforced with regard to organizations which are highly involved in lobbying activity.

Mr. MOORHEAD of California. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. WIGGINS).

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. I thank the gentleman for yielding.

Mr. Chairman, I just wanted to make one point on the previous speaker's concern.

After the last Congress failed to enact the Lobbying Disclosure Act, I instituted a lobbying system in my own office in which each person who comes to lobby either me or members of my staff or employees is asked to sign so that we have a permanent record of lobbying contacts with our office.

I would like to say for the record that I know of no objection by any lobbyist who came to my office to signing and revealing the fact that he was a lobbyist. I think it reinforces my attitude that most lobbyists do not object to being identified as lobbyists, but they are concerned with the burdens of reporting.

Mr. WIGGINS. I appreciate the gentleman's comments.

Mr. Chairman, let us get the facts clearly on the table. There has been discussion here that this bill impacts professional lobbyists, and yet it is acknowledged that the term "lobbyist" is not defined in the bill.

Let me tell the Members who are lobbyists in this bill. They are organizations; every business organization in America, every fraternal association in America, every social and charitable association in America, and every church in America, every school, educational institution in America is made a lobbyist under this bill if those organizations have the temerity, mind you, the gall, to communicate with their legislator.

That is what we are regulating. And those Members who want to stampede into regulating lobbyists, at least understand who you are regulating. This is a more pervasive piece of regulatory legislation than OSHA, for example. Far more pervasive than that. So let us not cry crocodile tears over professional lobbyists. They need do nothing directly. It is the organization that is covered; and all organizations, save a very narrow, discreet exception, such as organizations of Members of Congress, are exempted from the scope of this bill.

I have already expressed by opposition to the bill in conceptual terms. I do not believe it can be amended to meet my objections to it. And so I will not trouble the Members with arguments which I think are wholly self-evident.

Mr. Chairman, I would like, rather, to use my time to ask the gentleman from California (Mr. DANIELSON), who is handling the bill, to respond to several questions which I previously submitted to him.

The first question which I wish to ask the gentleman from California (Mr. DANIELSON) is this:

Section 9 of the bill defines the term "lobby communication." The definition restricts the scope of the bill to those communications which are "directed to" Federal officials. Exempted from such communications are those made through a speech or print media distributed to the general public.

Why is an exemption for a communication made which is not covered at all, since if made in a print media or distributed to the general public, it would not be "directed to" a Federal official?

Mr. DANIELSON. If the gentleman will yield, Mr. Chairman, we put these exemptions in because we wanted to make it crystal-clear that certain types of commmunications should not under any circumstances be considered to be lobbying communications.

The exemption may be almost redundant or surplusage; but at the same time, it is a direct statement of negation, so there is no reason that anyone would try to include them.

Mr. WIGGINS. If that exemption is removed with respect to paid advertisements which are also not "directed to" a Federal official, what is the effect of that?

Mr. DANIELSON. There might be a situation—and I hope the gentleman will not strain me to give him an example—in which a paid advertisement is directed to Federal officers or employees. In that event, that paid advertisement would, of course, constitute a lobbying communication if made and paid for by a registered organization.

I cannot, as I stand here, provide the gentleman with an example; but it could very well take place.

Mr. WIGGINS. It is clear, then, that all paid advertisements, even if their purpose is to affect the disposition of legislation, are not covered; is that correct?

Mr. DANIELSON. No, all of them are not covered. The only ones that would be covered are those defined in section 2(9) as lobbying communications.

Mr. WIGGINS. If a committee of Congress announces that public hearings are to be held on pending legislation, is any communication directed to the committee on the subject of the hearing, "at the request of" the committee?

Mr. DANIELSON. If the gentleman

will yield further, if the committee requests the communication, obviously, it is at the request of the committee. If it does not request it, it would not be at the request of the committee. In any event, we have an exemption in section 2(9)(a) that a communication made at the request of a Federal officer or employee or submitted for inclusion in a report of a hearing or in the record of a public filing of the hearing is exempt.

The CHAIRMAN. The time of the gentleman from California (Mr. WIGGINS) has expired.

Mr. MOORHEAD of California. Mr. Chairman, I yield 2 additional minutes to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I thank the gentleman for yielding.

To continue, Mr. Chairman, then the gentleman does agree, as I understand it, that if the author of the communication directs that it be added to the record, it is an exempt communication?

Mr. DANIELSON. That is my understanding.

Mr. WIGGINS. Finally, a corporation is included, but a "government corporation" is not. Is the scope of the term "government corporation" confined to the definition of that term in the report which says that it means a U.S. Government corporation? Is that the intent of those words in the bill?

Mr. DANIELSON. That is the intent, and that was the subject of discussion in subcommittee and, I believe, in full committee.

Mr. WIGGINS. Finally and quickly, would the gentleman discuss the interrelationship between 18 U.S.C. 1001, and section 11 of the bill.

Mr. DANIELSON. I thank the gentleman for raising that point.

It is my intention, and I am convinced that it was the intention of the subcommittee and the full committee, that the specific criminal sanction provided in this bill shall be the criminal sanction applied to any criminal violations of this bill.

I recognize that title 18, section 1001, does apply to similar types of statements; that is, if falsely made; but it was my intention and it was the tenor of the discussion throughout the work on this bill that the criminal provisions included within this bill, H.R. 8494, mean that those sanctions are the ones to be applied in the event of criminal violation of the law.

Mr. WIGGINS. And in effect, the gentleman is sending the Attorney General a message that he is not to use these sections as cumulative offenses; is that correct?

Mr. DANIELSON. That is correct.

Mr. WIGGINS. Mr. Chairman, I thank the gentleman.

Mr. DANIELSON. Mr. Chairman, I am pleased to yield 3 minutes to the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. Mr. Chairman, we have talked about what this bill does and what it does not do. I think it ought to be made clear, Mr. Chairman, that this bill is not going to render some evil holy. It is not going to right any wrong that we know about right now. It is not going to assuage any fear which the people may now have about lobbying. It is not going to regulate lobbyists. It is not going to cause lobbyists to wear cheaper suits, I say to the gentleman from Virginia.

So, what does the bill do? Why have it at all? Well, in 1946 Congress decided that it ought to try to do something about lobbying. Now, if we make the assumption that the Congress of the United States only passes legislation when there is a need for it, then we would assume that in the collective judgment of the Congress of the United States there was a need to say something about lobbyists. We said it—the Congress at that time, in 1946—and the bill was not really worth the paper it was written on. It was totally ineffectual. It was rife with loopholes, and it really did not do anything to bring any degree of accountability to the whole area.

So, if the bill we are considering today does anything, we are going to make the pronouncements on lobbying activity effectual rather than ineffectual. We are going to close some of the loopholes. We are going to say, "Members of the public, because you perceive that there is an undue influence exercised upon Members of Congress by people designated as lobbyists; because you, Mr. and Mrs. Public, perceive that, we are going to require these organizations to disclose to you exactly what they are doing."

That is what we purport to do in this bill; not regulate but register, report, disclose. One thing that this bill may do, if we keep it intact, is to let the public know that Members of Congress can at least withstand the pressure of cards and letters. Are you so fearful, Members of this House, that if there is an organized effort on the part of some organization to send you cards and letters, that you are going to cave in? Surely, you are stronger than that.

I support the bill, and I urge that we support it as is, without crippling amendments.

Mr. DANIELSON. Mr. Chairman, I am pleased to yield 1 minute to the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Chairman, the issue of the disclosure of lobbying activities by those who seek to influence the Federal Government decisionmaking process is a multidimensional and complex one. The Judiciary Subcommittee on Administrative Law and Governmental Relations, under the chairmanship of our distinguished colleague from California, GEORGE DANIELSON, is to be commended for its careful consideration and conscientious, diligent effort in reporting H.R. 8494 to the Judiciary Committee. For several months, the subcommittee labored to produce a lobbying reform measure which we can support that protects the constitutional rights of citizens to express their opinions to the Government while, at the same time, opens the lobbying process to full public view.

A healthy democracy demands that the business of the people be conducted in an open manner. The distinguished historian, Henry Steele Commanger, reminded us that—

> The generation that made the nation thought secrecy in Government one of the instruments of old world tyranny and committed itself to the principal that a democracy cannot function unless the people are permitted to know what their Government is up to.

As we all know, however, this principle of open government, as it relates to lobbying activities, has been and is ignored.

The events of the past several years have made the American people more conscious of the dangers of secrecy in matters relating to the conduct of Government than at any time before. A number of reforms have already taken hold. We have responded to the need to remove concealment in matters affecting the conduct of the people's business, and the reforms which have been enacted are improving the performance of our Government and our political processes. Lobbying reform is another necessary and essential reform which we must address.

Lobbying activities with the Government are sanctioned by the first amendment to the Constitution as an exercise of the "right of the people—to petition the Government for a redress of grievances," and the efforts of organized interests and individuals to influence Government have always been an inseparable part of the American political process.

Pressure groups traditionally have had considerable impact upon our form of government, going back to the early days of our Republic, and although legislative and policymaking decisions have been extensively influenced by lobbying groups, this does not necessarily make lobbying an unhealthy or objectional practice. Lobbying does provide a legitimate means for the wide variety of interest groups to present to the Government the opinions of their membership or clients.

As legislators, we all have received and benefited from the advice and information given to us by lobbyists, and in no way does H.R. 8494 seek to interfere with the right of any citizen or interest groups to communicate or exercise free speech with Government officials.

There are those lobbying practices, however, which have given lobbying a bad name. Too much of the lobbying that occurs is shrouded in secrecy and there is virtually no accountability for the large sums of money that are expended in the conduct of lobbying activities.

In the public mind, the presumption of corruption is often attached to the term lobbying and the lobbyist personifies the influence problem. All too often the public does not understand the informational role of the lobbyist in the legislative process. Instead, the public sees lobbying as a process by which special interests obtain favors, generally at the expense of citizens, from the Government. Lobbying is considered an underhanded process, associated with the liberal use of money, the wining and dining of legislators and Government bureaucrats, the free airplane trips, weekends as a guest at a corporation-owned lodge, and other ways of conducting influence peddling in Washington. The public cannot be blamed for looking with such disfavor and suspicion upon lobby-

ing. The lack of accountability in the reporting of money spent on behalf of lobbying activities, lobbying secrecy and occasional flagrant abuses all have contributed to this environment.

Mr. Chairman, the public and the Congress should be entitled to know how much money is being spent to influence the decisionmaking processes in the Government and who is paying the cost of such efforts to influence Government decisions. One of the most important lessons we should have learned from Watergate and its related scandals is that the secret lobbying with the Government and the concealed use of money must be ended.

The main reason why the public lacks substantive information about lobbying activities is because the Federal Regulation of Lobbying Act, part of the 1946 Legislative Reorganization Act, is vague in its wording and ill-defined in its definitions.

The 1954 Harriss decision, by the U.S. Supreme Court, held that the 1946 act was constitutional and that Congress could compel the disclosure of lobbying activities. The majority report of the Court, written by Chief Justice Warren, said that to hold otherwise, "would be to deny Congress in large measure that power of self-protection." Warren went on to write:

> Present day legislative complexities are such that individual Members of Congress cannot be expected to explore the myriad pressures to which they are regularly subjected. Yet full realization of the American ideal of government by elected representatives depends to no small amount on their ability to properly evaluate such pressures. Otherwise the voice of the people may all too easily be drowned out by the voice of special interest groups seeking favored treatment while masquerading as proponents of the public weal. This is the evil which the lobbying act was designed to help prevent.

Having said that, however, the Court, based upon its reading of the legislative history of the 1946 act, prepared the way for several major loopholes to take effect, thus enabling individuals to avoid registering or reporting on their activities.

The Court ruled that in order to be subject to the provisions of the lobbying law, a person must solicit, collect, or receive contributions, that one of the main purposes of such person or such contributions must be to influence the passage or defeat of legislation and that the intended method of influencing legislation must be through direct communication with Members of Congress.

All three tests have to apply before an individual or organization is required to register and report. If the individual or group came under one test, another might not apply, and in many cases that is exactly what has happened.

As we know, a number of groups contend that influencing Congress is not the main or substantial purpose for which they collect or receive funds, and thus they maintain they are not covered by the 1946 act, regardless of the extent of their lobbying activities.

Further, by limiting the disclosure requirement to sums spent on direct communication with the Congress, the Court exempted grassroots lobbying, one of the most effective means of lobbying, from the reporting requirements of the 1946 act. Although the Court did define letter campaigns as a form of direct lobbying, the test apparently is whether the letter campaign material is merely informative in tone or specifically urges the recipient to write to a Member of Congress on a piece of legislation.

In addition to these problems, another difficulty with the present law is that it places the responsibility of each lobbyist or organization to determine what portion of expenditures should be reported as spending for lobbying activities. This situation has allowed many large and powerful groups to either make no report or to report only small amounts of funds for which the group claimed was used, notwithstanding its extensive operations, for lobbying purposes.

Those who do register report that only a very small portion of their salary, or perhaps none at all, was paid for the principal purpose of lobbying. Their expenses are treated in the same modest manner.

Lastly, the current law only applies to lobbying with the legislative branch, although some of the most important and intensive lobbying is practiced with the executive branch.

In summary, the present lobbying act is a thoroughly deficient law.

Two years ago, in the closing days of the 94th Congress, the House passed H.R. 15, which, had it been enacted into law, would have repealed the present lobbying law and would have replaced it with a comprehensive lobbying disclosure law providing for the public disclosure of the activities of those organizations that lobby with the Congress and the executive branch. Unfortunately, the late date of the House action prevented any chance that differences with a Senate-passed bill could have been reconciled before adjournment.

We are now considering H.R. 8494. As reported by the Judiciary Committee, this bill, unfortunately, represents a retreat from the measure which the House acted upon on September 28 and 29, 1976. The threshold provisions are somewhat weakened. There is no coverage of grassroots lobbying which has been described as "the only lobbying that counts." There is no coverage of lobbying with the executive branch for contracts. There is no requirement for the disclosure of large financial contributors to lobbying organizations. If we are looking for an effective lobbying disclosure law to provide useful information on lobbying activities, then we must strengthen H.R. 8494 by adopting such provisions on the House floor. Otherwise, it would be ironic if lobbyists can be successful in their efforts to limit a lobbying disclosure bill so that it cannot have the potential of being as effective as it should be.

The fears expressed by many organizations against a strong law requiring disclosure of lobbying activities are groundless. Lobbying disclosure is not meant to curtail any activities, and to have a record of the activities undertaken by a lobbying organization is not to suggest that such conduct is wrong.

The purpose of a lobbying disclosure law is to give citizens an idea of lobbying activities with the Government and to provide them with a yardstick by which they can measure the influence that lobbying organizations have upon the formulation of public policy.

Mr. Chairman, let us recall the commitment our Founding Fathers made to the principle of open government and do our utmost to bring openness to the affairs and conduct of Government. I urge the House to strengthen H.R. 8494 and pass it.

Mr. MOORHEAD of California. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, I would like to begin by commending the distinguished chairman of the subcommittee, the gentleman from California (Mr. DANIELSON), the gentleman from Alabama (Mr. FLOWERS), my friend on the minority side of the committee, the gentleman from California (Mr. MOORHEAD), and the other members of the subcommittee for doing what I think was a splendid job in trying to create a reasonable and yet effective lobby bill.

May I just say, Mr. Chairman, that the gentleman from Wisconsin (Mr. KASTENMEIER) and I about 3 or 4 years ago introduced a lobby bill that had something like 155 cosponsors. We were successful in having passed through the House by a vote of 307 to 14 a bill, H.R. 15, in the closing days of the last Congress but we were unable to get an agreement with the other body, so that particular lobby legislation died.

Today we will be voting again on a new lobby bill, H.R. 8494, and I would hope we would be successful in enacting it into law.

I cannot shed crocodile tears for some of the statements that have been made about the onerous requirements that we are seeking to impose on special interest groups or lobbyists. I would like to say at the outset, however, that I think it is perfectly proper for a company, a labor union, an association, a cooperative, or for that matter any other organization to contact Members of Congress to urge a certain course of action. But in this case where by reason of its resources that entity is going to exert a disproportionate or an inordinate influence, I think it is in the interest of the public to require disclosure—and that is what we are talking about, disclosure of that organization's activities.

There are many issues that affect the general public where the general public does not know what is going on. They have no paid Washington representative. In addition they are not schooled in how to influence legislation. There is simply no way that they can have an equal voice with the organization that has paid researchers, lawyers, writers, and lobbyists. And yet this is supposed to be a representative government.

I want to get back to the crocodile tears that I cannot shed. We have some people who are trying to indicate that this legislation may be unconstitutional. Let me remind the Members of the House of something we are inclined sometimes to forget, and that is that right now there are 50 State laws re-

lating to lobbying. There were 17 States in the last year that enacted a new lobby law. As far as I know there has never been one that has been successfully challenged on the constitutional merits. That question has been laid to rest. In my opinion we will strengthen our democracy by requiring disclosure so that people will have some idea of what influence took place, what pressures we were under, and in my judgment it will also serve to make those of us in Government, as well as lobbyists, more accountable.

Since there already is a lobby disclosure law on the books, some may ask why we need the bill we are considering today. Very simply, the current law is a sham and a fraud on the public. This law, as interpreted by the courts, requires a lobbyist to register and make periodic reports only if the lobbyist's "principal purpose" is to make direct communications with a Member of Congress to influence legislation.

Let me just suggest to you what that means. That means that many, many Washington lawyers who do not have as their principal purpose being engaged in lobbying, although they may lobby extensively, if lobbying is not their primary purpose they are not legally required to even register, report or to keep records.

Indirect contacts (such as through staff) are not covered. There is virtually no enforcement of the law; there have been only a handful of cases and never a successful prosecution. An indictment of the law came in 1975 when a GAO report found, in reviewing nearly 2,000 quarterly lobbying reports, that 48 percent were incomplete and 61 percent were received late.

In discussing the failures of the current law, it is also of interest to note that the number of those filing fluctuates, often merely reflecting changes in the political atmosphere rather than the true number of lobbyists. For example, Watergate was investigated by Congress from about early spring 1973 through the impeachment inquiry which ended in the summer of 1974. Available lobby registration figures disclose that for the period October 1972 through December 1973, 799 persons registered as lobbyists as compared against 374 persons who registered during the time period December 1971 to October 1972. This was a more than two-fold increase in registrations.

Available compilations of current lobby registrations show that registrations jumped dramatically in 1976, when we again investigated reform of the Lobby Act.

The American people deserve and want a better lobby law. Louis Harris polls indicates that Americans, by a wide margin, believe that the special interest groups get more from Government than the people not represented by a lobbyist and that Congress is too much under the influence of special interest lobbyists. A recent poll shows that over three-quarters of the people surveyed want public disclosure of lobbyists' activities.

Who can blame them when they read that in a 3-month period the manager of the Washington office of one of the world's largest oil companies (Standard Oil of Indiana) spent $2.16 on lobbying expenditures? Or that Ralph Nader does not even have to register as a lobbyist? I happen to respect the job that Ralph Nader has done. For the most part, he has performed valuable service. Where he lobbies, however, even though not paid for, his organization, his name should be reported.

Our situation is even more embarrassing when you look and realize that the States are far ahead of us in this area. All 50 States have a lobbyist disclosure law; almost all of them provide more meaningful information than our Federal law. Last year alone, 14 States adopted new laws or amended their current laws.

The bill we are going to vote on is a good bill. It is fair; it is even-handed; and it does not regulate or prohibit anything. It gives us information only about those whose profession is lobbying or those who spend a very significant amount of time and money on lobbying the Congress.

Although I will be offering two amendments this afternoon to improve the bill and supporting others, H.R. 8494, in general, is a good bill. I urge its support and passage.

Mr. DANIELSON. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Chairman, I rise in support of H.R. 8494, the Public Disclosure of Lobbying Act of 1978. It is the product of years of hard work—our Judiciary Committee has engaged in endless debate, hearings, and draft sessions and all in all I feel H.R. 8494 is a sound and workable proposal.

It strikes the necessary balance between the public's right to know and citizens' right to petition their Government for redress of grievances.

There are some areas which need to be strengthened, however, and I urge the adoption of amendments to correct the deficiencies in H.R. 8494.

There is a very wide loophole in the Lobbying Disclosure Act. It fails to cover the reporting of solicitations—so-called grassroots lobbying activities. It is at the grassroots level where the most effective lobbying takes place.

We have all seen the effectiveness of grassroots lobbying. When controversial subjects come before the House, we are deluged with mail which is organizationally generated. It is imperative that disclosure of such efforts is mandated if our lobbying bill is to be effective—if the public is to accurately gage special interest influence on the Congress. I support the adoption of the Flowers amendment to require the reporting of lobbying solicitations.

Second, the bill does not require reporting by lobbying organizations of their major contributions, those most likely to have the greatest impact on the decisions of the organization. The Supreme Court has upheld the constitutionality of requiring disclosure of contributions. The current lobbying disclosure law requires disclosure of contributions and our failure to provide for contributor disclosure in H.R. 8494 is a step backward from the 1946 act.

I urge the adoption of the Railsback/Kastenmeier amendment to require registered organizations to disclose the names of persons who contribute more than $3,000 annually, provided that the organization spends at least 1 percent of its budget on lobbying activities.

Thirdly, H.R. 8494 comes before us with an overly vague and lenient threshold which must be met to require reporting of "in-house" lobbying activities.

The "in-house" lobbying threshold which was adopted in our Administrative Law Subcommittee would have covered organizations that spent $2,500, and retained at least one employee who devoted an aggregate of all or part of 13 days on lobbying communications in any quarterly filing period.

That threshold was altered in the full Judiciary Committee. The language of H.R. 8494 now requires organizations that spend $2,500 and retain at least one employee who devotes at least 13 days of a given quarter making lobbying communications, or two or more employees who make such communications 7 days in a quarter.

Besides being difficult to understand, this two-tier threshold opens a large loophole for lobbying organizations with big staffs. An organization could escape coverage by limiting lobbying communications by one employee to 12 days per quarter and limiting communications by any number of other employees to 6 days per quarter.

I support an amendment to return the "in-house" lobbying threshold to the language adopted by the Administrative Law Subcommittee.

Finally, H.R. 8494 does not require reporting of activities of major, unpaid policy formulators, who are most likely to have the greatest impact on the decisions of the organization.

The Railsback amendment to add another provision to the reporting of issues requirement should be adopted. That amendment would require that reporting organizations name the employee or retainee who lobbied on each of the issues reportable. In addition, the amendment would require that reporting organizations name their principal officer, whether pair or unpaid, and the issues on which he or she lobbied.

We must enact legislation to let the public know of the influence of powerful special interests on the Congress, but at the same time protect the right of all citizens to express their views. H.R. 8494—with the amendments I feel must be added to strengthen and improve it—will achieve those very important goals.

● Mr. FRENZEL. Mr. Chairman, the Congress has been playing with revisions of lobby disclosure law since I came here in 1971, and probably long before that. Our 32-year law is a notorious joke. We can stop playing today if we pass H.R. 8494.

However, we can improve H.R. 8494 by the adoption of important amendments. I believe we should pass amend-

ments: First, to cover reporting of solicitations made by lobbying organizations; second, to require reporting of major contributions to lobbying organizations; and third, to require reporting of activities of individuals who are major policy formulators of lobbying organizations.

With the addition of these three amendments, I believe the bill will be as effective as possible without unnecessarily restricting lobbying activity.

I believe the constitutionally protected practice of petitioning the legislature is a good one and a great help in the legislative process. I believe the Constitution does not differentiate between good lobbying and bad lobbying.

I have never been concerned by so-called "undue influence." I have been lobbied hard and often, by every sort of interest, expensively and cheaply.

I have been lobbied by teachers, union members, senior citizens, community groups, mayors, corporations, housewives, doctors, lawyers, merchants, and chiefs. Some of these efforts occasionally make the Congressman uncomfortable, but all of them are helpful and useful in the representative system.

H.R. 8494 is not intended to make lobbying difficult, nor do I believe it will do so. It is not intended to have a "chilling effect" on lobbying, and I doubt that it will have.

It is, purely and simply, intended to disclose the nature and extent of the various lobbying efforts which cost more than the threshold amounts.

I believe H.R. 8494 is a reasonable bill which imposes reasonable reporting requirements on lobbying organizations. It should be passed.●

● Mr. DRINAN. Mr. Chairman, "lobbying" is one of those political words which, through the years, has acquired a number of negative connotations. It conjures up an image of well heeled representatives of well financed special interests using their wealth to influence unduly the behavior of Members of Congress. We think of public officials receiving gifts, free trips, uncompensated use of resort facilities, and other largesse from the coffers of those seeking to undermine congressional efforts to legislate for the public good.

In some instances, the popular perception of lobbying is accurate. Indeed the recent revelations of congressional improprieties have reinforced the negative connotations. Frequently overlooked, however, is that many unethical practices associated with lobbying are in fact illegal. Federal statutes impose criminal sanctions for bribery, corruption, and other acts related to official misconduct. Additionally the rules of both Houses proscribe other practices which have the appearance or reality of impairing the rationality, objectivity, and fairness of the decisionmaking process.

In order to analyze the essence of lobbying, we must clearly identify, separate out, and vigorously prosecute unlawful conduct which we associate with it. Once that is done, then we are able to focus on lobbying as the attempt to influence the congressional process through oral and written contacts by individuals and organizations seeking to advance their interests. Viewed in that light, the propriety of H.R. 8494 to regulate lobbying emerges vividly. When the corrupting influence of direct monetary exchanges are excluded from consideration as covered by other criminal statutes and rules, then we must confront the very real first amendment considerations involved in the type of lobbying regulated by H.R. 8494.

It must be recalled that the first amendment expressly forbids Congress from enacting any law which abridges the "right of the people * * * to petition the Government for a redress of grievances." A great deal of lobbying includes precisely the protected activity encompassed by this amendment. When Common Cause, the Consumer Federation of America, the Chamber of Commerce, or any other group solicits our vote on any particular matter, that action, it seems to me, is at the heart of the first amendment protection.

Thus Congress bears a heavy burden to justify any regulation of lobbying in the sense that I have described it. Although the Supreme Court has sustained the constitutionality of the present law, it cautioned against excessive intrusion into an area protected by the Constitution.

In my view H.R. 8494 does not exceed the constitutional limits of congressional authority in this sensitive area. When the Judiciary Committee examined the bill, we carefully considered the constitutional limitations of our power. Indeed the committee adopted several amendments which cut back on the intrusiveness of this measure into the right of the people to petition their Government.

First, we eliminated the provision which would have required organizations covered by the bill to report so-called "grassroots" solicitations. Under this section, reporting groups would have had to describe in some detail their communications with members and other interested parties about legislative matters of concern to them. Even though the decision to contact a Member of Congress would be entirely within the discretion of the recipient of the solicitation, the group would nonetheless have to report the solicitation. Such indirect lobbying hardly rises to the level necessary to justify intrusion into activity protected by the first amendment.

Second, the committee removed a provision requiring certain reporting of the contributors to lobbying groups. Apart from the serious question whether too much reporting was required, we must address the more fundamental question whether Congress has the right to compel disclosure of such information consistent with the first amendment. This provision of the bill which the committee had before it implicated constitutional concerns extending beyond the right to petition the Government. It implicated free speech considerations as well.

It has been a long and noble tradition in our country to engage in political activity anonymously. Since the early days of the Republic, citizens have contributed to the political dialog without revealing their identities. In some instances, anonymity is assumed to protect the individual from reprisals, not only those coming from Government but those coming from private individuals who do not share their views. In other cases, anonymity may be used out of the highest motives of good will and philanthropy. In these days of sinister and clandestine activity by Government against its citizens, we have come to identify anonymity with evildoers. These recent revelations of governmental improprieties have colored our view of the role of anonymous political activity, thus distorting a noble, historical tradition. Indeed, it was not very long ago that the Supreme Court reminded us of that tradition in striking down a California law which sought to require every political pamphlet to identify its source.

Third, the committee adjusted the threshold provisions of the bill which determine what kinds of lobbying activities fall within the purview of H.R. 8494. It sought to limit coverage only to those groups which present a real threat to democratic decisionmaking in Congress by asserting an undue influence on the legislative process. Contacts from small organizations or those which engage only incidentally in lobbying are hardly the kind of actions which we must fear for their corrupting impact.

The committee adopted other amendments to the bill which further narrowed its scope to assure consistency with constitutional principles. Because of these positive actions by the committee, I voted to report H.R. 8494 to the full House for its consideration. If the House does not alter this bill adversely to first amendment interests, I intend to support it fully after this body has worked its will.

Before concluding, I should note that a wide variety of interest groups have written to me, as they undoubtedly have to other Members, urging my support of H.R. 8494 as it was reported by the Judiciary Committee. While this bill is probably not perfect, I think it does reasonably and, more important, constitutionally accommodate the competing interests. I hope the House will reject all amendments which would intrude into the sensitive area of the first amendment and which would disturb the delicate balance in H.R. 8494.●

● Mr. WEISS. Mr. Speaker, it is with great reluctance that I must vote against H.R. 8494, the Public Disclosure of Lobbying Act, as amended.

I do so, having fully intended to vote for the bill as it was reported out of Committee, because of the inadequacies of the existing law regarding lobbying. The 1946 Legislative Reorganization Act is essentially ineffective because of ambiguities regarding who must register and report and the lack of meaningful enforcement provisions. Although there is a need to replace the present law, we must nonetheless ask whether the proposed bill will on balance be an improvement.

Admittedly, it will correct some of the deficiencies in the existing law. However, I believe that as amended, the bill

poses a serious threat to our civil liberties.

In my view, encouraging people to express their views to their representatives is an inherent, and most important part, of the political process. Thus, any bill which attempts to apply regulations to lobbying organizations must be not only strong enough to insure registration and reporting by all major organizations, but must also safeguard first amendment rights. H.R. 8494, as amended, does not meet this standard.

The organization would have to describe how it solicits and on what issue, the number of persons solicited, and the identity of persons solicited. I fear that this type of reporting might well have consequences other than the ones we intend. Instead of providing information on attempts to lobby the Government, this measure might actually deter people from exercising the legitimate right of petitioning their Government. Reporting requirements should be reasonable and practical, and should not be so onerous that they inhibit people from contacting their representatives because of the time and cost which compliance would involve.

The amendment requiring contributor disclosure is equally as threatening to an individual's free exercise of first amendment rights. As the American Civil Liberties Union has made clear, contributors to a controversial organization would have their names published in the Federal Register. Surely, this would have a devastating effect on the individual and on the organization's ability to secure funds. The Railsback amendment will interfere with these individuals' freedom to participate anonymously in the organizations of their choice.

If we are to believe that the purpose of a lobbying bill is not to regulate the practice, but merely disclose lobbying activities, then this legislation is a failure. The practical effect of H.R. 8494 will be to restrict legitimate lobbying activities by citizen groups. In the final analysis, this is a far greater danger than unreported lobbying, and thus, I urge my colleagues to join me in opposing its passage.●

The CHAIRMAN. All time has expired. Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Public Disclosure of Lobbying Act of 1978".

DEFINITIONS

SEC. 2. As used in this Act—

(1) the term "affiliate" means—

(A) an organization which is associated with another organization through a formal relationship based upon ownership or an agreement (including a charter, franchise agreement, or bylaws) under which one of the organizations maintains actual control or has the right of potential control of all or a part of the activities of the other organization;

(B) a unit of a particular denomination of a church or of a convention or association of churches; and

(C) a national membership organization and any of its State or local membership organizations or units, a national trade association and any of its State or local trade associations, a national business league and any of its State or local business leagues, a national federation of labor organizations and any of its State or local federations, and a national labor organization and any of its State or local labor organizations;

(2) the term "Comptroller General" means the Comptroller General of the United States;

(3) the term "direct business relationship" means the relationship between an organization and any Federal officer or employee in which—

(A) such Federal officer or employee is a partner in such organization;

(B) such Federal officer or employee is a member of the board of directors or similar governing body of such organization, or is an officer or employee of such organization; or

(C) such organization and such Federal officer or employee each hold a legal or beneficial interest (excluding stock holdings in publicly traded corporations, policies of insurance, and commercially reasonable leases made in the ordinary course of business) in the same business or joint venture, and the value of each such interest exceeds $1,000;

(4) the term "employ" means the utilization of the services of an individual or organization in consideration of the payment of money or other thing of value, but does not include the utilization of the services of a volunteer;

(5) the term "exempt travel expenses" means any sum expended by any organization in payment or reimbursement of the cost of any transportation for any agent, employee, or other person (but not including a Federal officer or employee) engaging in activities described in section 3(a), plus such amount of any sum received by such agent, employee, or other person as a per diem allowance for each such day as is not in excess of the maximum applicable allowance payable under section 5702(a) of title 5, United States Code, to Federal employees subject to such section;

(6) the term "expenditure" means—

(A) a payment, distribution (other than normal dividends and interest), salary, loan (if made on terms or conditions that are more favorable than those available to the general public), advance, deposit, or gift of money or other thing of value, other than exempt travel expenses, made—

(i) to or for the benefit of a Federal officer or employee;

(ii) for mailing, printing, advertising, telephones, consultant fees, or the like which are attributable to activities described in section 3(a), and for costs attributable partly to activities described in section 3(a) where such costs, with reasonable preciseness and ease, may be directly allocated to those activities; or

(iii) for the retention or employment of an individual or organization who makes lobbying communications on behalf of the organization; or

(B) a contract, promise, or agreement, whether or not legally enforceable, to make, disburse, or furnish any item referred to in subparagraph (A);

(7) the term "Federal officer or employee" means—

(A) any Member of the Senate or the House of Representatives, any Delegate to the House of Representatives, and the Resident Commissioner in the House of Representatives;

(B) any officer or employee of the Senate or the House of Representatives or any employee of any Member, committee, or officer of the Congress;

(C) any officer of the executive branch of the Government listed in sections 5312 through 5316 of title 5, United States Code; and

(D) the Comptroller General, Deputy Comptroller General, General Counsel of the United States General Accounting Office, and any officer or employee of the United States General Accounting Office whose compensation is fixed by the Comptroller General in accordance with section 203(i) of the Federal Legislative Salary Act of 1964 (31 U.S.C. 52b);

(8) the term "identification" means—

(A) in the case of an individual, the name, occupation, and business address of the individual and the position held in such business; and

(B) in the case of an organization, the name and address of the organization, the principal place of business of the organization, the nature of its business or activities, and the names of the executive officers and the directors of the organization, regardless of whether such officers or directors are paid;

(9) the term "lobbying communication" means, with respect to a Federal officer or employee described in section 2(7)(A) or (B), an oral or written communication directed to such Federal officer or employee to influence the content or disposition of any bill, resolution, treaty, nomination, hearing, report, or investigation, and, with respect to a Federal officer or employee described in section 2(7)(C) or (D), an oral or written communication directed to such Federal officer or employee to influence the content or disposition of any bill, resolution, or treaty which has been transmitted to or introduced in either House of Congress or any report thereon of a committee of Congress, any nomination to be submitted or submitted to the Senate, or any hearing or investigation being conducted by the Congress or any committee or subcommittee thereof, but does not include—

(A) a communication made at the request of a Federal officer or employee, or submitted for inclusion in a report of a hearing or in the record or public file of a hearing;

(B) a communication made through a speech or address, through a newspaper, book, periodical, or magazine published for distribution to the general public, or through a radio or television transmission, or through a regular publication of an organization published in substantial part for purposes unrelated to engaging in activities described in section 3(a): *Provided,* That this exemption shall not apply to an organization responsible for the purchase of a paid advertisement in a newspaper, magazine, book, periodical, or other publication distributed to the general public; or of a paid radio or television advertisement;

(C) a communication by an individual for a redress of grievances, or to express his personal opinion; or

(D) a communication on any subject directly affecting an organization to (i) a Senator, or to an individual on his personal staff, if such organization's principal place of business is located in the State represented by such Senator, or (ii) a Member of the House of Representatives, or to an individual on his personal staff, if such organization's principal place of business is located in a county (including a city, city-and-county, parish, and the State of Alaska) within which all or part of such Member's congressional district is located;

(10) the term "organization" means—

(A) any corporation (excluding a Government corporation), company, foundation, association, labor organization, firm, partnership, society, joint stock company, organi-

zation of State or local elected or appointed officials (excluding any Federal, State, or local unit of government other than a State college or university as described in section 511 (a)(2)(B) of the Internal Revenue Code of 1954, and excluding any Indian tribe, any national or State political party and any organizational unit thereof, and any association comprised solely of Members of Congress or Members of Congress and congressional employees), group of organizations, or group of individuals; and

(B) any agent of a foreign principal as defined in section 1 of the Foreign Agents Registration Act of 1938, as amended (22 U.S.C. 611);

(11) the term "quarterly filing period" means any calendar quarter beginning on January 1, April 1, July 1, or October 1; and

(12) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

APPLICABILITY OF ACT

SEC. 3. (a) The provisions of this Act shall apply to—

(1) any organization which makes an expenditure in excess of $2,500 in any quarterly filing period for the retention of an individual or another organization to make lobbying communications, or for the express purpose of preparing or drafting any such lobbying communication; or

(2) any organization which (A) employs at least one individual who, on all or any part of each of thirteen days or more in any quarterly filing period, or at least two individuals each of whom on all or any part of each of seven days or more in any quarterly filing period, makes lobbying communications on behalf of that organization, and (B) makes an expenditure in excess of $2,500 in such quarterly filing period on making lobbying communications,

except that the provisions of section 4 and section 6 of this Act shall not apply to an affiliate of a registered organization if such affiliate engages in activities described in paragraphs (1) and (2) of this subsection and such activities are reported by the registered organization.

(b) This Act shall not apply to practices or activities regulated by the Federal Election Campaign Act of 1971.

REGISTRATION

SEC. 4. (a) Each organization shall register with the Comptroller General not later than fifteen days after engaging in activities described in section 3(a).

(b) The registration shall contain the following, which shall be regarded as material for the purposes of this Act:

(1) An identification of the organization, except that nothing in this paragraph shall be construed to require the disclosure of the identity of the members of an organization.

(2) An identification of any retainee described in section 3(a)(1) and of any employee described in section 3(a)(2).

(c) A registration filed under subsection (a) in any calendar year shall be effective until January 15 of the succeeding calendar year. Each organization required to register under subsection (a) shall file a new registration under such subsection within fifteen days after the expiration of the previous registration, unless such organization notifies the Comptroller General, under subsection (d), with respect to terminating the registration of the organization.

(d) Any registered organization which determines that it will no longer engage in activities described in section 3(a) shall so notify the Comptroller General. Such organization shall submit with such notification either (1) a final report, containing the information specified in section 6(b), concerning any activities described in section 3(a) which the organization has not previously reported or (2) a statement, pursuant to section 6(a)(2), as the case may be. When the Comptroller General receives such notification and report or statement, the registration of such organization shall cease to be effective.

RECORDS

SEC. 5. (a) Each organization required to be registered and each retainee of such organization shall maintain for each quarterly filing period such records as may be necessary to enable such organization to file the registrations and reports required to be filed under this Act, except that, in those situations where a registered organization elects to report as to the lobbying activities of its affiliates pursuant to section 3(a), such affiliates shall be responsible for maintaining such records as are necessary to enable the registered organization to fully discharge its reporting obligations as they pertain to such affiliates. The Comptroller General may not by rule or regulation require an organization to maintain or establish records (other than those records normally maintained by the organization) for the purpose of enabling him to determine whether such organization is required to register.

(b) Any officer, director, employee, or retainee of any organization shall provide to such organization such information as may be necessary to enable such organization to comply with the recordkeeping and reporting requirements of this Act. Any organization which shall rely in good faith on the information provided by any such officer, director, employee, or retainee shall be deemed to have complied with subsection (a) with respect to that information.

(c) The records required by subsection (a) shall be preserved for a period of not less than five years after the close of the quarterly filing period to which such records relate.

REPORTS

SEC. 6. (a)(1) Each organization which engages in the activities described in section 3(a) during a quarterly filing period shall, not later than thirty days after the last day of such period, file a report concerning such activities with the Comptroller General.

(2) Each registered organization which does not engage in the activities described in section 3(a) during a quarterly filing period shall file a statement to that effect with the Comptroller General.

(b) Each report required under subsection (a)(1) shall contain the following, which shall be regarded as material for the purposes of this Act:

(1) An identification of the organization filing such report.

(2) The total expenditures (excluding salaries other than those reported under paragraph (5) of this subsection) which such organization made with respect to activities described in section 3(a) during such period.

(3) An itemized listing of each expenditure in excess of $35 made to or for the benefit of any Federal officer or employee and an identification of such officer or employee.

(4) A disclosure of those expenditures for any reception, dinner, or other similar event which is paid for, in whole or in part, by the reporting organization and which is held for the benefit of any Federal officer or employee, regardless of the number of persons invited or in attendance, where the total cost of the event exceeds $500.

(5) An identification of any retainee of the organization filing such report and of any employee who makes lobbying communications on all or part of each of seven days or more, and the expenditures made pursuant to such retention or employment, except that in reporting expenditures for the retention or employment of such individuals or organiaztions, the organization filing such report shall—

(A) allocate, in a manner acceptable to the Comptroller General, and disclose the amount which is paid to the individual or organization retained or employed by the reporting organization and which is attributable to engaging in such activities for the organization filing such report; or

(B) notwithstanding any other provision of law, disclose the total expenditures paid to any individual or organization retained or employed by the organization filing such report.

(6) A description of the issues concerning which the organization filing such report engaged in activities described in section 3(a) and upon which the organization spent a significant amount of its efforts.

(7) Disclosure of each known direct business relationship between the reporting organization and a Federal officer or employee whom such organization has sought to influence during the quartely filing period involved.

DUTIES OF THE COMPTROLLER GENERAL

SEC. 7. (a) It shall be the duty of the Comptroller General—

(1) to develop filing, coding, and cross-indexing systems to carry out the purposes of this Act, including (A) a cross-indexing system which, for any retainee described in section 3(a)(1) who is identified in any registration or report filed under this Act, discloses each organization identifying such retainee in any such registration or report, and (B) a cross-indexing system, to be developed in cooperation with the Federal Election Commission, which discloses for any such retainee each identification of such retainee in any report filed under section 304 of the Federal Election Campaign Act of 1971 (2 U.S.C. 434);

(2) to make copies of each registration and report filed with him under this Act available for public inspection and copying, commencing as soon as practicable after the date on which the registration or report involved is received, but not later than the end of the fifth working day following such date, and to permit copying of such registration or report by hand or by copying machine or, at the request of any individual or organization, to furnish a copy of any such registration or report upon payment of the cost of making and furnishing such copy; but no information contained in any such registration or report shall be sold or utilized by any individual or organization for the purpose of soliciting contributions or business;

(3) to preserve the originals or accurate reproductions of such registrations and reports for a period of not less than five years from the date on which the registration or report is received;

(4) to compile and summarize, with respect to each quarterly filing period, the information contained in registrations and reports filed during such period in a manner which clearly presents the extent and nature of the activities described in section 3(a) which are engaged in during such period;

(5) to make the information compiled and summarized under paragraph (4) available to the public within sixty days after the close of each quarterly filing period, and to permit copying of such information by hand or by copying machine or, at the request of any individual or organization, to furnish a copy of such information upon payment of the cost of making and furnishing such copy; and

(6) to prescribe such rules and regulations and such forms as may be necessary to carry out the provisions of this Act in an effective and efficient manner.

(b) The duties of the Comptroller General described in subsection (a)(6) of this section shall be carried out in conformity with chapter 5 of title 5, United States Code,

and any records maintained by the Comptroller General under this Act shall be subject to the provisions of sections 552 and 552a of such chapter.

ENFORCEMENT

SEC. 8. (a) It shall be the duty of the Attorney General to investigate alleged violations of any provision of this Act, or any rule or regulation promulgated in accordance therewith. The Attorney General shall notify the alleged violator of such alleged violation, unless the Attorney General determines that such notice would interfere with the effective enforcement of this Act, and shall make such investigation of such alleged violation as the Attorney General considers appropriate. Any such investigation shall be conducted expeditiously, and with due regard for the rights and privacy of the individual or organization involved.

(b) If the Attorney General determines, after any investigation under subsection (a), that there is reason to believe that any individual or organization has engaged in any act or practice which constitutes a civil violation of this Act as described in section 11 (a), he shall endeavor to correct such violation by informal methods of conference or conciliation.

(c) If the informal methods described in subsection (b) fail, the Attorney General may institute a civil action, including an action for permanent or temporary injunction, restraining order, or any other appropriate relief, in the United States district court for the judicial district in which such individual or organization is found, resides, or transacts business.

(d) If the Attorney General determines, after any investigation under subsection (a), that there is reason to believe that any individual or organization has engaged in any act or practice which constitutes a criminal violation of this Act as described in section 11(b) or 11(c), the Attorney General may institute criminal proceedings in a United States district court in accordance with the provisions of chapter 211 of title 18, United States Code.

(e) The United States district courts shall have jurisdiction of actions brought under this Act.

(f) In any civil action brought pursuant to subsection (c), the court may award to the prevailing party (other than the United States or an agency or official thereof) reasonable attorney fees and expenses if the court determines that the action was brought without foundation, vexatiously, frivolously, or in bad faith.

REPORTS BY THE COMPTROLLER GENERAL

SEC. 9. The Comptroller General shall transmit reports to the President of the United States and to each House of the Congress no later than March 31 of each year. Each such report shall contain a detailed statement with respect to the activities of the Comptroller General in carrying out his duties and functions under this Act, together with recommendations for such legislative or other action as the Comptroller General considers appropriate.

CONGRESSIONAL DISAPPROVAL OF RULES OR REGULATIONS

SEC. 10. (a) Upon promulgation of any rule or regulation to carry out the provisions of section 4, 5, or 6 under the authority given him in section 7(a)(6) of this Act, the Comptroller General shall transmit notice of such rule or regulation to the Congress. The Comptroller General may place such rule or regulation in effect as proposed at any time after the expiration of ninety calendar days of continuous session after the date on which such notice is transmitted to the Congress unless, before the expiration of such ninety days, either House of the Congress adopts a resolution disapproving such rule or regulation.

(b) For purposes of this section—

(1) continuity of session of the Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain shall be excluded in the computation of the ninety calendar days referred to in subsection (a).

SANCTIONS

SEC. 11. (a) Any individual or organization knowingly violating section 4, 5, or 6 of this Act, or any rule or regulation promulgated in accordance therewith, shall be subject to a civil penalty of not more than $10,000 for each such violation.

(b) Any individual or organization who knowingly and willfully violates section 4, 5, or 6 of this Act, or who, in any statement required to be filed, furnished, or maintained pursuant to this Act, knowingly and willfully makes any false statement of a material fact, omits any material fact required to be disclosed, or omits any material fact necessary to make statements made not misleading, shall be fined not more than $10,000 or imprisoned for not more than two years, or both, for each such violation.

(c) Any individual or organization knowingly and willfully failing to provide or falsifying all or part of any records required to be furnished to an employing or retaining organization in violation of section 5(b) shall be fined not more than $10,000, or imprisoned for not more than two years, or both.

(d) Any individual or organization selling or utilizing information contained in any registration or report in violation of section 7(a)(2) of this Act shall be subject to a civil penalty of not more than $10,000.

REPEAL OF THE FEDERAL REGULATION OF LOBBYING ACT

SEC. 12. The Federal Regulation of Lobbying Act (2 U.S.C. 261 et seq.), and that part of the table of contents of the Legislative Reorganization Act of 1946 which pertains to title III thereof, are repealed.

SEPARABILITY

SEC. 13. If any provision of this Act, or the application thereof, is held invalid, the validity of the remainder of this Act and the application of such provision to other persons and circumstances shall not be affected thereby.

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. There are authorized to be appropriated to carry out this Act $1,600,000 for the fiscal year beginning on October 1, 1978; $1,600,000 for the fiscal year beginning on October 1, 1979; and $1,600,000 for the fiscal year beginning on October 1, 1980.

EFFECTIVE DATES

SEC. 15. (a) Except as provided in subsection (b), the provisions of this Act shall take effect on October 1, 1978.

(b) Sections 4, 5, 6, 8, 11, and 12 shall take effect on the first day of the first calendar quarter beginning after the date on which the first rules and regulations promulgated to carry out the provisions of sections 4, 5, and 6 take effect, in accordance with section 10.

Mr. DANIELSON (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be deemed as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Does the gentleman ask unanimous consent that the entire committee amendment in the nature of a substitute be deemed as read?

Mr. DANIELSON. I ask unanimous consent that the entire committee amendment in the nature of a substitute be deemed as read.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Are there amendments to the committee amendment in the nature of a substitute?

PARLIAMENTARY INQUIRY

Mr. DANIELSON. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DANIELSON. Mr. Chairman, under the rule, should not amendments be offered section by section, or to the entire bill?

The CHAIRMAN (Mr. MEEDS). That is why the Chair asked the question. The gentleman's unanimous consent request was that the entire committee amendment in the nature of a substitute be deemed as read, printed in the RECORD, and open to amendment at any point. Amendments may now be offered to any section.

Mr. DANIELSON. I thank the Chair.

AMENDMENT OFFERED BY MR. KINDNESS

Mr. KINDNESS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KINDNESS: On page 32, strike lines 6–16, and insert the following language in lieu thereof:

"(D) a communication on any subject by an individual on behalf of an organization to (i) a Senator, or to an individual on his personal staff, if the individual making the communication lives or works in the State represented by such Senator, or (ii) a Member of the House of Representatives, or to an individual on his personal staff, if the individual making the communication lives or works in the congressional district represented by such Member, or in a county or standard metropolitan statistical area, all or part of which is within such Member's congressional district;"

Mr. KINDNESS. Mr. Chairman, the amendment before us is the one referred to during the general debate which would clear up some problems that were brought up by the members of the Committee on Rules yesterday when this matter was before that committee. Members of the Committee on Rules were asking questions about what happens if you are invited to visit a plant or a store in your district and people want to talk to you while you are there about legislative topics. Some of them may not live in your actual district. They may work there, but they may live across the line that may not be very distant, and it is difficult to differentiate. They are all part of one community more or less in many cases.

This amendment would make it clear that anyone who lives or works in your district, or in a county of which your district is a part, or in a standard metropolitan statistical area, all or part of which is included in your congressional district, he may communicate with you without that being part of the covered type of lobbying communications, that is, this would be one of the exemptions from lobbying communications.

You can imagine how disconcerting it would be to find that you as a Member of Congress are no longer being invited to visit places in your community where people are employed or would be likely to talk to you in the course of such a visit about legislative matters. I would certainly urge that this amendment, when considered in the subcommittee and the full committee, was perhaps not as fully considered as might have been the case, although a lot of discussion was had about it. I think we wound up with something less than perfection in this part of the bill, and I believe this amendment would come very close to meeting the problems that were raised by members of the Committee on Rules yesterday about this part of the bill, and it would not be a barrier between Members of Congress and their constituents who either live or work in one's area.

Right now the rule is that it has to be the principal place of business of the organization, which may be in some far distant State, before this would be an exempt communication. We are talking here not about where an individual speaks his own opinion or petitions for redress of a grievance, but rather where the individual is talking, perhaps, in behalf of an organization, which is to be distinguished from speaking his own opinion; but even in that way, there are people of all kinds communicating with you in your district on the effect the legislation might have in the place where they work or on their jobs. It is a very valid type of communication, but hardly the standard sort of lobbying communication to which this bill is directed so as to require all the recordkeeping and reporting; so I certainly would urge adoption of the amendment to clarify the geographic exemption.

Mr. DANIELSON. Mr. Chairman, I oppose this amendment. At the inception, I want to point out that this amendment was considered and was rejected both in the subcommittee and in the full committee as the bill was being considered.

This amendment, if adopted, would greatly extend the so-called geographical exemption which we have in the bill and which permits any person to communicate with his or her Representative or to communicate with his or her Senator. It would extend it to the point where it would truly wipe out any need for anybody to report at any particular time. The present geographical exemption reaches the point where a communication by a person who is the retainee or employee of a registered organization, residing in the county or counties in which all or any part of your congressional district is located are exempt from being included as lobbying communications.

For example, we have within my State one of our Members, the honorable gentleman from California (Mr. JOHNSON), who represents about 18 counties. Anybody in those 18 counties can communicate with him directly under the geographical exemption and there is no need to include this as a lobbying communication.

When I say anyone, I want to point out that anyone in the United States can communicate with anyone else, as long as he is communicating on his own behalf; but if an employee or retainee of a lobbyist does live within that geographical area, the communication is exempt, because we simply do not want to restrict the first amendment.

Now, this amendment, by its own terms, refers to an individual speaking or communicating on behalf of an organization. Therefore, that individual must be either the employee or retainee of the organization. Organization is a word of art in this bill. It means an organization which qualifies and is duly registered.

Now, under this amendment, if that individual either lives or works in the State or the congressional district or the county or the standard metropolitan statistical area, he can still communicate and is exempted.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Chairman, why could not that individual that came in be a part of a volunteer association?

Mr. DANIELSON. They can.

Mr. BIAGGI. Are they exempt?

Mr. DANIELSON. Certainly. There is no reason why they cannot come in and communicate.

Mr. BIAGGI. And they do not live in the gentleman's community?

Mr. DANIELSON. Any human being in the United States can come in and talk to you, whenever he wants to, and that he specifically exempted in subparagraph (C) starting on page 32 of the bill.

Mr. Chairman, I would like to get back to the standard metropolitan statistical area. We considered this while in the committee, but we found we were considering something that was totally unworkable. Most parts of the United States are not parts of a metropolitan statistical area. These areas have been set up to cover the larger metropolitan areas. They disregard county and State lines.

One of our members on the committee lives in a standard metropolitan statistical area that is partly in Kentucky and partly in Ohio.

We have found vast areas of the country are not included at all. This is simply not a workable geographic area for the purposes of legislation.

The other and most important point I want to make is this: We would expand the geographical exemption under this amendment to the point where any registered organization or any lobbying organization could simply place an employee in every standard metropolitan statistical area of the country and it no longer would have to report anything. The communications would be exempt from regulation.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield ?

Mr. DANIELSON. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, the gentleman will note, of course, that the standard of the county, as well as the standard metropolitan statistical area, is included in this amendment. This includes not just SMSA but also the county.

The gentleman has sought to take care of his county of Los Angeles, but we have a lot of other areas in the country that do not follow the Los Angeles, Calif., pattern.

Mr. DANIELSON. No, but under the bill as it is printed the geographical exemption extends to any county in which all or part of the congressional district is located.

We do have in my county a district in which a portion of the area is in Los Angeles County and a portion of the area is in Orange County, so that organization could make exempt communications from either of those counties. I mentioned the fact that the gentleman from California (Mr. JOHNSON) has 18 counties; they are all within his district, and they are all exempt.

Mr. WIGGINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the pending amendment deals with that section of the bill which defines a lobby communication, and, more particularly, it relates to the exemptions from a lobbying communication.

A communication by an individual acting on his own behalf may be made to anyone. That is exempt, and I think that is as it should be.

The problem to which this amendment is addressed relates to communications not by individuals but, rather, by individuals who are acting in a representative capacity on behalf of organizations. They are not given a similar freedom, to which they are entitled, of course. Their communication is exempt only if it is: First, with respect to a subject directly affecting the organization; and second, if it is to their representatives, that is, to their Senator or their Congressman, or any Congressman within the county in which the principal place of business of the organization is situated.

This amendment helps the bill a bit by expanding the geography, but, of course, it does not go anywhere near far enough. I was not aware that there were any geographic limitations to the absolute right of an organization to speak to Members of Congress with respect to any matter.

Mr. HARRIS. Mr. Chairman, will my colleague yield on that point?

Mr. WIGGINS. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, my colleague, the gentleman from California, does not mean to indicate that there is anything in this bill that would restrict the right of any organization to correspond with or contact any Member of this Congress or the Senate, does he? He does not mean to indicate that, I am sure.

Mr. WIGGINS. Mr. Chairman, I mean to indicate that the bill imposes a burden which I will characterize as a chilling

effect, but I do not wish to debate that point at the moment.

Mr. HARRIS. As my colleague said, he thought that everyone had that right, and we do respect that right, do we not?

Mr. WIGGINS. I would like to think that right exists free from any unnecessary governmental regulation.

But, Mr. Chairman, let us remember the limitations. First of all, the subject matter of the communication must be with respect to an issue directly affecting the organization.

Let us suppose that a business entity or an association in my district wants to talk to me about SALT, the strategic arms limitation talks, about troop reductions in Korea, or about the neutron bomb. Can it be said with intellectual honesty that is an issue directly affecting the organization?

No, I think the effect is indirect, just as all citizens may be indirectly affected by such governmental decisions.

There is no rational justification at all for imposing a "directly affecting" limitation upon the content of the communication, and there is no rational reason at all for imposing any geographic limitation on the right of an organization to communicate with its government without reference to whether we may individually represent that particular constituent.

I am going to support the amendment because it broadens the scope of the exemptions.

Mr. HARRIS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I will attempt to be very brief here. I think my colleague has just put his finger on the effect of the amendment. If in fact we adopt an amendment that gives a broad-gage exemption by standing metropolitan statistical areas as we look at them on the map, we would in fact not have this bill apply to the vast majority of lobbying communications in this country, nor in fact to the vast majority of lobbying organizations in this country.

When my colleague indicates that he would like to have an unlimited exemption, my colleague indicates that we should not have a bill at all. What it exempts is even the standards of this act, and even the reporting requirements of this act, with all of the safeguards, do not apply with respect to any communication made by a constituent to his Congressman or to his Senator, and, more importantly, even if it is made to a Congressman who may represent the city, the county that that constituent lives in, but is part of that Congressman's district, it still does not apply. This language was carefully worked out in subcommittee to give the broadest possible scope to any requirements with respect to reporting, at the same time retaining some element of registration with respect to nationwide lobbying efforts.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to my colleague, the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

Mr. Chairman, surely the gentleman would not want to mislead the members of the committee into thinking that this bill as it presently stands allows free communication, that is, allows a constituent to freely communicate on behalf of an organization for which he works, because it does not, right?

Mr. HARRIS. Mr. Chairman, if my colleague will allow me to respond, if he is not communicating on behalf of that organization, he still may communicate to his or her Congressman without any restriction.

Mr. KINDNESS. Not unless the principal place of business is in the district; is that right?

Mr. HARRIS. In the district or county or city of which the district is a part.

Mr. KINDNESS. But only the principal place of business. If he happens to work for a company with a distant headquarters, he cannot talk to you?

Mr. HARRIS. He can talk to you, but he cannot talk to you on behalf of that organization unless he goes ahead and has that included as a part of the total lobbying operation of that organization.

Mr. KINDNESS. Would not the gentleman concede that is a chilling effect on communication between Members of Congress and their constituents?

Mr. HARRIS. I really cannot see how it could be a chilling effect to have a reporting requirement like this if you do it on behalf of an organization. I would like to know, when my constituent is talking to me, whether he is talking on his own behalf or whether he is talking on behalf of the Ford Motor Co.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

If I understand the debate correctly, the gentleman from Ohio is correct and the gentleman from Virginia is correct.

An individual, who happens to work for the XYZ Corp. and lives in our congressional district, may, because of an entreaty on the part of his company, correspond with his Congressman and say, "Please oppose bill 1442."

That would, in my judgment, be an exempted lobbying communication, because that individual undoubtedly believes in what he says, and under the terms of item (C) on page 32, he is expressing a personal point of view.

If I understand correctly, in our committee we did not expect that a personal point of view would necessarily be spontaneous or something which comes by divine insight. It may well be a conditioned personal viewpoint, conditioned upon the success or failure of his company and the existence or nonexistence of his plant. So I would think, under the circumstances, the point of the gentleman from Ohio would be covered by section (C).

Mr. HARRIS. I thank my colleague for his comments.

Mr. ROBERTS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and my colleagues, I am going to support this amendment; but that is not the purpose of my discussion.

This whole bill scares me to death for the simple reason that if we take the Veterans of Foreign Wars, the American Legion, the DAV, or any other service organization that has a headquarters here, they would be covered down to the local posts, because they spend a lot of money in Washington.

When we speak to the VFW or the DAV or whatever organization we speak to in our district, and they say, "We want to talk about bill number so-and-so," regardless of what the sponsors say, those veterans are covered and you are covered. The only way to stop this thing is to kill it.

Mr. Chairman, I am going to help to do that, and I will yield to my friend, the gentleman from California, who is on the Committee on Veterans' Affairs. I do not think there is any way by which we can get around making local veteran groups and others make the reports required by this bill.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I am happy to yield to the gentleman from California.

Mr. DANIELSON. Mr. Chairman, I am glad that the gentleman from Texas (Mr. ROBERTS) has asked the question, because the problem which the gentleman presents is not a real one.

The local VFW, American Legion, or whatever it may be, we talk to; the gentleman and I will go to the post and talk with them in our districts. They have every right to communicate with us concerning their grievances or whatever it may be that they want to talk to us about, and these are not lobbying communications.

Mr. ROBERTS. They want to talk to me about a message that I just sent out, a message that the Veterans Administration is cutting 3,130 beds out of the budget. We want to stop it, and that is lobbying.

Mr. DANIELSON. No. They are permitted to talk to you about that, and it is not a lobbying communication.

Mr. ROBERTS. Will the gentleman accept an amendment exempting those service organizations?

Mr. DANIELSON. No. There is no point in having amendments in this bill that exempt organization A and include organization B or C, because the general terms of the bill already provide for who is required to register.

Mr. ROBERTS. Will the gentleman give me any statement as to how they would be exempt? They meet every qualification. They are spending more than $2,500 a month here in town. They are acting at the behest of the national headquarters.

How would they be exempt?

Mr. DANIELSON. In the first place, the type of situation the gentleman refers to is with respect to the local chapter. Let us just say the VFW is the local chapter. In that event, it very probably is an affiliate of the Washington office,

the national office of the VFW. The affiliate need not register and report, provided that the registering and reporting is done by the superior organization, which would be the Washington, D.C., chapter or the national headquarters of the VFW.

Therefore, the local organization need not do so.

Second, in view of the fact that the organization is within the geographical exemption, one's own hometown, one's district, VFW's and American Legion posts may communicate with absolute impunity.

Mr. ROBERTS. The gentleman makes one erroneous assumption.

One, we charter the national organization. These are State departments. They would not qualify as affiliates, although in the gentleman's and in my own terms they certainly are, because the gentleman and I deal with them every day. Nevertheless, they would be covered, in my opinion, in this bill.

The only way to get around it is to knock it in the head.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I am happy to yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I would have two points, one, that the gentleman from Texas might read page 26 starting at line 24 of the bill.

It talks in terms defining "affiliate" as being a national organization and any of its State or local membership organizations or units that might be covered under the definition of "affiliate," in which case the Texas VFW would not have to report.

Furthermore, I would say to the gentleman that the $2,500 is not $2,500 spent on maintaining a post by providing salaries for the bartenders or for the club manager, but it is $2,500 on lobbying communications.

In essence, that means that the gentleman from Texas (Mr. ROBERTS), the chairman, might discuss cutbacks on hospital space in VA hospitals with his veteran organizations and, unless the cost to the affiliate would be $2,500 or more, the affiliate would not be covered, and it would not have to report.

Mr. ROBERTS. What the gentleman is saying is that if it states $2,500, they would be covered. In my State that certainly would. If it is so clear that we do not do it, let us figure out some way to exempt these service organizations.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I think the gentleman has received at least some misleading information.

Clearly, the veterans' organizations to which the gentleman refers are covered organizations. They are not exempted at all. It is possible that local chapters of a veterans' organization would constitute an affiliate and I think probably it would.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

(On request of Mr. WIGGINS and by unanimous consent Mr. ROBERTS was allowed to proceed for 2 additional minutes.

Mr. WIGGINS. If the gentleman will yield further, to characterize a local chapter as an affiliate is the worst of all worlds, because the parent organization must accumulate the expenditures of all of its affiliates for purposes of meeting the $2,500 threshold. That would require the local chapters of the VFW to make a notation of their communication with us, and any minimal expenditures related to that, report it—and a criminal burden is imposed upon them if they fail to report—to the parent organization so that it can add them up from all around the country and reach a $2,500 threshold. That is outrageous regulation, and I think the gentleman's comments are totally appropriate.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield further?

Mr. ROBERTS. I yield to the gentleman from California.

Mr. DANIELSON. What I previously said does, in my opinion, exempt these organizations. But I want to add this: The gentleman's organization is not even going to cross the threshold to become an organization which is required to register. In order to cross the threshold, as provided in section 3, the organization must make an expenditure in excess of $2,500 in any quarterly filing period assuming a retention for the retention of an individual or organization to make lobbying communications or preparing or drafting them or, in the alternative, it must employ one individual who works all of 13 days in that quarter making lobbying communications; or two or more, working 7 days apiece, plus expending $2,500.

The gentleman's organization is not retaining anybody to make lobbying communications. They are giving you and me a bad time for not having more hospital beds. That is what they are doing. They are not retaining anybody to make lobbying communications. They are doing it themselves, and they do not cross the threshold. They do not have to register and do not have to report.

I commend the gentleman for being sensitive to the needs of these organizations, but I want to assure him that in this case his fears are groundless.

Mr. ROBERTS. I would like to think the gentleman is correct, but I am afraid he is not.

Mr. MOORHEAD of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Ohio. I think that actually the debate has been far afield from this particular amendment, but it is put in specifically to alleviate the kind of confusion that comes about in metropolitan areas where the counties and cities run together; where people who work in one community and live in the next-door community, which may be across a county line, really do not realize that they are in somebody else's congressional district; where there are employees who work in one establishment but live in a number of communities surrounding it.

I think that this amendment would alleviate a lot of difficulty that we will have under this act if it is enacted, and will strictly be used to cut out the confusion that we will otherwise have. It is a good amendment, and I urge an aye vote.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD of California. I am happy to yield to my colleague.

Mr. DANIELSON. I thank the gentleman. The gentleman has described a situation that is apparent, but is not real. Under the geographical exemption, the gentleman must remember that we are only referring to retained people, or employed people of registered organizations who are making those communications. An individual citizen, an individual resident of the United States, whether he is in Bangor, Maine, or Phoenix, Ariz., can communicate with us with absolute impunity. That is never forbidden under this bill.

The only restriction is where we have the retainee or employee of a registered organization acting on behalf of that registered organization to make lobbying communications. Even they are exempted within the area of the geographical exemption. The situation described does not pertain to this bill.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD of California. I yield to the gentleman from Ohio.

Mr. KINDNESS. The gentleman from California, the chairman of the subcommittee, continually and continually and continually misunderstands about where people live and where they work. They do not all work at the principal place of business of their employer. The way the bill is set up at the present time, it precludes free communication between people who are constituents and speaking in behalf of the organization for which they work, and their Congressman. There is no reason to put a damper on that kind of communication.

I certainly would urge that the gentleman carefully consider the fact that the bill currently precludes that kind of communication without gathering all that information in and reporting it to wherever that principal place of business is so that some report can be filed.

I think that is the point we have here. We ought to be able to talk to our neighbors and they ought to be able to talk to us, whether they just happen to work in our district and live across some imaginary line or live in our district and they want to talk about the place where they are employed.

Let us remember there are people who write letters to us on the letterhead of their employer and there are going to be close factual questions about whether they are speaking about their problems or the problems of their employers. If they are concerned about their jobs and they may write to us on the employer's letterhead and the employer may not know about it, that is one problem. We talked about all this in the subcommit-

tee, and I just hope we will adopt the amendment and preclude all this.

Mr. MAZZOLI. If the gentleman will yield, I would like to talk to the gentleman from Ohio. It seems to me he is saying we are confusing apples and oranges. I think the gentleman is mixing up the metaphors today too. The reason our subcommittee—and the gentleman is a valuable member of that subcommittee—suggested in item (D) on line 6 of page 32 this—

. . . . a communication on any subject directly affecting an organization—

Is because we said in our debates that Item (C) covers:

a communication by an individual—

For any reason, for whatever particular motive, whether under duress by a plant manager or because of some spontaneity on his part; we said it was regardless of motive or beginning or origin, that communications from individuals were sacrosanct and exempt from any coverage of this bill. Thereafter we added in the next item and talked about other kinds of communications which were generated by organizations, mass mailings, what-have-you, so long as they were from within the organization's principal place of business is one's district, or I join the gentleman in saying it could be extended to the SMSA, they would be exempt.

The CHAIRMAN. The time of the gentleman from California (Mr. MOORHEAD) has expired.

(By unanimous consent, Mr. MOORHEAD of California was allowed to proceed for 1 additional minute.)

Mr. MAZZOLI. Mr. Chairman, if the gentleman will yield further, let me wrap up in just 10 seconds and say we have one case of an individual always exempt, and the other case of organizations from within their principal place of business within one's county, they are exempt.

Mr. KINDNESS. The gentleman is not correct. I refer him to page 22 of the report at the bottom where it says:

A communication by person representing an organization could therefore be covered even though he failed to state that his communication was made in behalf of the organization. The general test would be whether the communication is made for the organization pursuant to the employee's general or specific responsibilities as an employee.

If the employee appeared to be working in public affairs and was a constituent, how are we going to decide whether he is speaking in his own behalf or that of an organization? We do not want to test these things in court. That is the chilling effect we are talking about that this legislation could bring about. We do not want to bring that about. We do not want to chill the abilities and willingness of the people to communicate with us about matters of importance to him.

Mr. MAZZOLI. On page 22 I refer the gentleman to this, where it says:

Thus, a plant manager or assembly line worker or the head or member of the local chapter of a public interest organization could communicate to Congress in response to a central office letter or call without having to report the communication to the central office, so long as the individual agrees with the views he is expressing and does not represent them as being made on the organization's behalf.

I think what the gentleman from Kentucky has said is true, whether they arise spontaneously or were the result of an entreaty. And this communication with Congress they are free to do and that is clear, because that is an individual and he can communicate with his Member of Congress because he is an individual and that is his constitutional prerogative.

Mr. KINDNESS. Mr. Chairman, if the gentleman will yield still further, the gentleman from Kentucky (Mr. MAZZOLI) stopped reading too soon because the paragraph following, and the one he was quoting from, and the other paragraph, says that (c) does not cover it.

The CHAIRMAN. The time of the gentleman has again expired.

The question is on the amendment offered by the gentleman from Ohio (Mr. KINDNESS).

The question was taken; and on a division (demanded by Mr. KINDNESS) there were—ayes 20, noes 9.

Mr. DANIELSON. Mr. Chairman, I demand a recorded vote, and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from California (Mr. DANIELSON) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 195, noes 212, not voting 27, as follows:

[Roll No. 236]

| Cederberg | Krueger | Walgren |
| Clausen, Don H. | Nedzi | Watkins |
| | O'Brien | Whitley |
| Cochran | Pepper | |
| Conyers | Pettis | |

The Clerk announced the following pairs:

On this vote:

Mr. Runnels for, with Mr. Dellums against.

Mr. Breaux for, with Mrs. Burke of California against.

Mr. Whitley for, with Mr. Krueger against.

Mr. Brown of Ohio for, with Mr. Walgren against.

Mr. Cederberg for, with Mr. Conyers against.

Mr. Don H. Clausen for, with Mr. Pepper against.

Mr. Robert W. Daniels, Jr., for, with Mr. Rodino against.

Mrs. COLLINS of Illinois, Messrs. LE FANTE, LEACH, YATRON, BURKE of Massachusetts, MINISH, Mrs. HECKLER, and Mr. RINALDO changed their vote from "aye" to "no."

Mr. APPLEGATE and Mr. JACOBS changed their vote from "no" to "aye."

Mr. NEAL changed his vote from "present" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. PEPPER. Mr. Speaker, on account of being at an appointment at the White House this afternoon, I missed the vote on rollcall No. 236. Had I been present, I would have voted "aye." I ask unanimous consent that my statement appear immediately following rollcall 236 in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MR. HARRIS

Mr. HARRIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARRIS: Page 33, line 25, strike out "at least" and all that follows through "and" on page 34, line 6, and insert in lieu thereof the following: "one or more individuals who, on all or part of each of thirteen days or more, in the aggregate, in any quarterly filing period, make lobbying communications on behalf of that organization, and".

Mr. HARRIS. Mr. Chairman, the amendment that I have offered today will change the threshold provision, which determines those organizations that must register under the bill. I urge you to vote for this amendment.

Specifically, under my amendment organizations would have to register if:

First. One or more individuals employed by an organization engaged in lobbying communications for 13 days, in the aggregate, in any quarter; and,

Second. Expenditures for lobbying communications exceeded $2,500 in a given quarter.

This threshold is preferable to the bill's threshold for the following reasons:

It has a simpler test for determining who is covered by the bill, so an organization can readily see whether or not it must register;

It would completely cover large, well financed lobbying organizations; and

It would simplify recordkeeping for all who register.

The threshold in H.R. 8494 has a tremendous loophole through which many large organizations could avoid registration. In addition to the $2,500 expenditures test, this threshold includes a complicated and impractical two-tiered days test for triggering coverage. Under the bill, an organization is covered if one of its paid employees makes lobbying communications on 7 days per quarter, or if two or more employees make such communications on 7 days per quarter.

To illustrate how easy it would be for an organization to escape registration under the bill: An organization with 15 lobbyists could spend $100,000 on lobbying in a quarter and make lobbying communications on every day of that quarter and still not have to register. Such an organization would only need to make sure that one employee lobbied no more than 12 days per quarter, while the other 14 lobbyists limited their lobbying activities to 6 days per quarter. Discounting weekends as lobbying days, an organization would only need 10 employees to escape registration in the same fashion.

The provision in my amendment was in the bill reported by the subcommittee, but was changed in the full Judiciary Committee at the behest of several large lobbying organizations.

It is argued that eliminating the two-tiered days test from the bill would force small, local organizations to register as lobbyists. This argument is unfounded for two reasons. First, H.R. 8494 already has a "home district exemption," that is, a provision whereby contacts with "local" Congressmen and Senators are not counted. Second, a small organization does not spend $2,500 on lobbying efforts in a quarter, nor does it have paid employees who lobby 13 days per quarter.

As a member of the subcommittee that drafted the bill, I feel that it is more than a coincidence that the two-tiered threshold in H.R. 8494 was not only written—but actively promoted—by some of the largest lobbying organizations across the country. These same organizations are arguing against the threshold because they say it will restrain the activities of smaller organizations. Ironically, relatively few, if any, of these "small" organizations have voiced objections to the subcommittee threshold provision. What we have now is a bill whose threshold has been designed by several large, well-financed organizations.

Having an effective threshold provision is the heart of a meaningful lobbying law. It answers the question: "Who must register" The answer should be clear and enforcible. Otherwise, we have accomplished nothing more than a voluntary program to expand Government paperwork. I hope you will support my amendment to restore an effective and meaningful threshold to H.R. 8494.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

May I ask the gentleman to see if we cannot clear up what I think is a problem that is bothering several of us, whether it is the gentleman's intention as part of his amendment, or even whether he believes that under the committee bill the employees of an affiliate and their activities may somehow be aggregated to require parent organization reporting?

Mr. HARRIS. My amendment would not, in fact, cause this, nor do I think would the bill cause this; but my amendment would not deal with that problem.

Mr. RAILSBACK. Mr. Chairman, if the gentleman will yield further, is it the gentleman's understanding that what we are talking about really is an organization's employees and under the bill one of them would have to work for 13 days, or parts thereof, and two or more would have to work at least 7 days or more each; is the gentleman changing that?

The CHAIRMAN. The time of the gentleman from Virginia has expired.

(By unanimous consent, Mr. HARRIS was allowed to proceed for 2 additional minutes.)

Mr. HARRIS. Mr. Chairman, if I may respond to my colleague, the gentleman from Illinois, currently the bill says two things: No. 1, if an organization hires an outside agency, an attorney or public relations firm for $2,500 or more per quarter to do lobbying, that organization must register.

Mr. RAILSBACK. Within the quarter?

Mr. HARRIS. Within the quarter.

No. 2, if within a quarter an organization spends $2,500 on lobbying and, in addition, has paid employees that make 13 days a quarter of contact, they must register, if they had two employees that made more than 7 days contact per quarter.

Mr. RAILSBACK. Seven days each?

Mr. HARRIS. Seven days each; that is the way the bill is now. The two-tier provision which the committee put in really is going to make unclear the threshold and, as I see it, serve no purpose.

What my amendment says is that if they go over the $2,500 a quarter, and if they have a paid employee or more than one employee which make 13 days in the aggregate, of lobbying contacts, then they have to register. That is the only change.

Mr. RAILSBACK. The gentleman is not suggesting that employees of af-

filiates, such as in the case of a veterans' organization, say a State chapter, that they would trigger the requirement; that is not meant to trigger that requirement?

Mr. HARRIS. No, certainly it would not trigger it.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I have asked the gentleman to yield, because the gentleman from Illinois and I have had a discussion off the floor concerning the question of whether the activities of affiliates must be accumulated for purposes of reaching the threshold. I stated earlier in the debate my opinion that accumulation was required. After rereading the bill and the committee report I am satisfied they are not to be accumulated and each affiliate must separately meet the threshold test.

Mr. HARRIS. I thank my colleague, because that point was confused by some.

Mr. KINDNESS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. The concept of the Harris amendment has been debated quite a bit in the subcommittee and in the full committee. It goes right to the heart of this bill in terms of balance. As has been pointed out by several who have spoken in favor of this bill, the threshold is higher in order to bring about coverage, as compared to previous brands of this legislation that have been dealt with in the committee and before the House. If we tinker with this threshold measurement, as suggested by the amendment of the gentleman from Virginia (Mr. HARRIS) here, thus bringing the threshold down to the point where more organizations, particularly volunteer organizations, are going to come under coverage, then I think we will have destroyed some of the support for this bill.

I suggest that maybe some may say, "Well, it has such broad support now that we can afford to lose a few."

I believe that is the way in which we might get this bill into real trouble, and let me illustrate with one example of how we are likely to get this bill into real trouble.

Let us imagine that any organization would be foolish enough to lobby through a greater number of people in an inefficient manner just to avoid crossing the threshold that exists in the bill right now. Right now there must be 13 days' contact by one person representing the lobbying organization or 7 days by more than one person.

Now, obviously it can be argued that a lobbying organization might say, "Well, we will spread this out, and we will have 10 people or 15 people, each making contacts on 6 days within a calendar quarter, and nobody will cause us to cross the threshold."

I would rather have us take that risk than have us lower the threshold, because we are going to be pulling in all kinds of efforts by lobbying organizations that exist around the country which do not really come under this and are not likely to cross that threshold.

Mr. EDWARDS of California. Mr. chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, this amendment lowers the threshold to an unbelievably low area and would make hundreds of thousands of organizations susceptible to the triggering device in the bill under the provisions that are in it now. It would certainly discourage members of hundreds of thousands of American organizations from carrying on any communication with Congress, or even with Washington indeed.

Mr. KINDNESS. Would the gentleman agree that the present threshold already comes down to a fairly low point?

Mr. EDWARDS of California. The present threshold is actually lower than what I would personally have liked. I would like to have it higher than it is now, but this amendment lowers it to an unacceptably low level.

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for his comments, and I think he has made an excellent point.

I believe we have gone about as far as we can go. Just like "Kansas City," "everything is up to date" in this bill if we leave this alone.

Mr. Chairman, I urge the defeat of the amendment, and I yield back the balance of my time.

Mr. FLOWERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I will be very brief. Basically, I agree with almost everything that has been said here. This would enlarge the coverage to a quantum extent over what we should have here and, I think, enlarge it to the point where the bill would and should lose some of the support that it now has on this floor. I do not think this House wants to do that.

We want to have a fair and a moderate approach to this problem, and we want to have a bill that means something. We do not want to have a bill or statute that requires every organization in this country to try to keep up with everything that every single employee thereof is engaged in, because that would have a disastrous effect, I think, on not only the business community but on every other sector we can imagine that would be covered.

Mr. Chairman, I oppose the amendment offered by the gentleman from Virginia (Mr. HARRIS), although I know that he offered it in good faith, and that it was considered in the subcommittee and on the full committee level. I do think, however, that it would have an undesired impact on the legislation.

Mr. MOORHEAD of California. Mr. Chairman, will the gentleman yield?

Mr. FLOWERS. I yield to the gentleman from California.

Mr. MOORHEAD of California. Mr. Chairman, I also rise in opposition to the amendment.

The organization in question would adjust to the reduction under the rule, so that under the bill where we have required at least 7 communications each by two different people or a total of 13 by one. If we reduce that to the point where we can have 13 letters by 13 different people and bring them under the coverage, those people are going to be very, very "small potatoes." This would not really catch the people we are interested in.

Mr. Chairman, this would not bring to the attention of the public any kind of lobbying activity we wish to cover, and I ask for a "no" vote on the amendment.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. FLOWERS. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I just wish to associate myself with the remarks of the gentleman from California (Mr. MOORHEAD) and the gentleman from California (Mr. EDWARDS).

This should not be accomplished by lowering the threshold, and I urge a "no" vote on the amendment.

Mr. FLOWERS. Mr. Chairman, I thank the gentleman for his contribution.

At the appropriate time I contemplate offering an amendment to strike the words beginning with "and" on line 6 of page 34 through the rest of that paragraph. In other words, the 3 lines, basically lines 6, 7, and 8, on page 34, which would make the $2,500 conjunctive with the other threshold.

I think that this would bring the legislation more in line by not requiring a two-tier internal accounting on the part of organizations. It would probably not make any difference in the long run in terms of who is covered, but it would say to the organization that "you have to look at one thing, and one thing alone."

I thank the gentleman for his participation in this. I oppose the amendment.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I will not take my 5 minutes, but I do rise in support of the gentleman's amendment. I think it would be well to note to the House, because of the steady drumfire of opposition to this amendment which has been announced today, that this amendment that the gentleman from Virginia offers is the position that the subcommittee itself took.

The full committee took a contrary position. But the subcommittee on which the gentleman from Virginia serves, as does the gentleman from Kentucky, did take the position that the 13-day figure should be our figure and not this rather complex and difficult two-tier system.

Mr. Chairman, I will yield to the gentleman from Virginia because maybe some Members have just joined us in this debate this afternoon, and I think it would be very instructive for the gentleman to remind some of the newly arrived Members here as to just exactly what would occur in the event the House rejects the gentleman's amendment and sticks with the committee with regard to this two-tier threshold arrangement.

Mr. HARRIS. Yes. As you get into this, it becomes very clear, with the little addition we have added in the full committee, the reasons we should go back to the 13-day accumulation are because of examples that are quite clear. If for example owners of large oil companies, should get together on an ad hoc organization and decide to fund that ad hoc organization with $500,000 for some "noncontroversial" thing such as deregulation of natural gas, if in fact they spend that $500,000 in a quarter of activity, they are still not covered. If in fact they have 20 employees working a total of 5 contacts a day for 6 days a quarter, which is in fact a very common way of lobbying—we are not talking about working with other groups, we are not talking about research, and what have you, that goes into letters and cases, we are talking about direct contact—lobbyists can make 5 contacts a day, or more if we have 20 employees we can make 600 contacts per quarter, spend $500,000 and not register.

Mr. MAZZOLI. The gentleman says that if his amendment is not adopted there could be as much as one-half million dollars spent and as many as 600 contacts made in a quarter and still that activity would not be covered and not have to be reported.

Mr. HARRIS. That is correct.

Mr. MAZZOLI. I think the gentleman has said all that needs to be said. I think his amendment is entirely welcome and needs the support of this House.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from New York.

Mr. FISH. I thank the gentleman for yielding.

Mr. Chairman, the gentleman has been emphasizing that this is the subcommittee's position. I do not think we should lose sight of the fact that the full Committee on the Judiciary reversed that position. The final language on the threshold, which is the version the gentleman from Alabama and I presented parts of, was actually written by the ACLU, Congress Watch, and Common Cause. Why should they have an interest in the higher threshold unless it was for the reasons given earlier by the gentleman from California that lowering the threshold, opens up the coverage to much—too broad a spectrum of entities which would never even realize that they were considered lobbying organizations.

I think the conversation should get back on that point.

Mr. MAZZOLI. Mr. Chairman, I would say the reason in bringing up the fact was that this was the subcommittee's position and to assure the House that the gentleman's amendment was not a capricious move. Rather that this was well thought out and was indeed the subcommittee's position, although it was reversed by the full committee.

Second, the gentleman suggests certain organizations whose views I do not always subscribe to, and I would therefore not be particularly persuaded if they are for that amendment that I have to be for that amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. HARRIS).

The amendment was rejected.

AMENDMENT OFFERED BY MR. FLOWERS

Mr. FLOWERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FLOWERS:

On page 39, after line 2, add a new paragraph (7), and renumber the following paragraph accordingly:

"(7) in the case of written solicitations, and solicitations made through paid advertisements, where such solicitations reached or could be reasonably expected to reach, in identical or similar form, five hundred or more persons, one hundred or more employees, twenty-five or more officers or directors, or twelve or more affiliates of such organization,

(a) a description of the issue with which the solicitation was concerned: Provided, That the reporting organization may, in its own discretion solely, satisfy this requirement by filing a copy of the solicitation;

(b) a description of the means employed to make the solicitation and an indication of whether the recipients were in turn asked to solicit others;

(c) an identification of any person retained to make the solicitation;

(d) if the solicitation is conducted through the mails or by telegram, the approximate number of persons directly solicited; and

(e) if the solicitation is conducted through a paid advertisement and the total amount expended exceeds $5,000, an identification of the publication, or radio or television station where the solicitation appeared and the total amount expended on any solicitation conducted through one or more such advertisements."

For purposes of this paragraph, the term "solicitation" means any communication directly urging, requesting, or requiring another person to advocate a specific position on a particular issue and to seek to influence a Member of Congress with respect to such issue, but does not mean such communication by one organization registered under this Act to another organization registered under this Act."

Mr. FLOWERS. Mr. Chairman, this amendment is offered in my behalf and in behalf of the distinguished gentleman from Illinois (Mr. RAILSBACK) and others. It has bipartisan support, I am happy to say; and I think it has wide support.

Mr. Chairman, what the amendment goes to is clearly and simply the reporting requirements under the bill. It has absolutely nothing to do—and I want to underline that statement—nothing to do with the coverage of the bill. In other words, this does not constitute a threshold test. No organization that simply engages in solicitations for lobbying and nothing else, is going to be covered by virtue of that; but if an organization otherwise meets the threshold test under the bill, which I support, then in the reporting there will be required this simple accounting of the lobbying solicitations that it engages in.

Mr. Chairman, I think it makes eminent good sense. I think that it is information that certainly should be included in reports required under this bill.

If we do not cover solicitations, we are leaving out one of the most glaring examples of current lobbying activity.

In fact, the Common Cause organization, which supports this amendment reports that 70 percent of their activity in lobbying is covered or would be covered only under this reporting requirement. If we leave this out, I think that there is a loophole in reporting that would be detrimental to the overall effect of the bill.

This would require Common Cause to report more. It would require the Nader organization to report more. It would require the Chamber of Commerce to report more. It cuts evenly for everybody. Yet, if there is anything that is going to be worthwhile in what is reported, I think we ought to have this.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. FLOWERS. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, I thank the gentleman for yielding.

As I understand it, this amendment does not prohibit solicitation, does it?

Mr. FLOWERS. Absolutely not.

Mr. HARRIS. It does not even attempt to regulate solicitation, does it?

Mr. FLOWERS. It does not even attempt to regulate solicitation.

Mr. HARRIS. An organization does not even have to register because it is soliciting; is that right?

Mr. FLOWERS. It does not even have to register.

Mr. HARRIS. This amendment just means that if one is registered, the organization has to go ahead and report something; is that correct?

Mr. FLOWERS. The gentleman has hit the nail on the head.

Mr. HARRIS. My colleague makes the point, does he not, that an awful lot of today's——

Mr. FLOWERS. If I may interrupt the gentleman, I feel as though he might be leading me down the primrose path.

Mr. HARRIS. I never do that. My colleague shares with me an aversion to soliciting.

Mr. FLOWERS. Not necessarily; not if it is soliciting to lobby.

Mr. HARRIS. Well, my colleague will maintain his position, and I will maintain mine. I think the point my colleague makes is that a great amount of lobbying is done through solicitation and not through direct contacts, is that not correct?

Mr. FLOWERS. That is absolutely right.

Mr. HARRIS. That is why, if we are going to have the large organizations reporting, that we ought to include the amount of the activity, to some extent, that they do through solicitation.

Mr. Chairman, I think this is a good amendment.

Mr. MILFORD. Mr. Chairman, will the gentleman yield?

Mr. FLOWERS. I yield to the gentleman from Texas.

Mr. MILFORD. I just wanted to ask one question that I was concerned about as I listened to the gentleman.

How would this affect certain people, patriots and other types, that, for exam-

ple, make regular broadcasts, and who will from time to time make appeals for what they believe to be patriotic matters, but nevertheless would be appeals to their listeners or viewers to write their Congressmen on the particular view of the commentator?

Mr. FLOWERS. If an organization made such a direct appeal for people to contact their Congressmen, and it was done over a paid advertisement, over radio or television, it would be treated as a written solicitation and it would have to be reported. But, that in and of itself would not require them to report. They would have to otherwise, as the gentleman from Virginia says, be covered under the bill.

Mr. MILFORD. Here again I am not even sure whether this bill might mandate it. Let me give the gentleman an example. It is not our party, but we hear a gentleman on the radio quite often who is the ex-Governor of California, and who makes speeches and makes appeals for various issues, and asks his listeners or viewers to write to Congress. Someone is paying for that broadcast time. It may be a sponsor.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

(On request of Mr. MILFORD and by unanimous consent Mr. FLOWERS was allowed to proceed for 2 additional minutes.)

Mr. MILFORD. The question I was trying to resolve here is, does the sponsor of that program have to register because he is sponsoring this particular broadcast, or would the commentator have to register, or would it be either?

Mr. FLOWERS. Not because he was sponsoring a particular broadcast, but if the sponsor of the program were otherwise covered under the bill—it would have to be an organization—if it had one individual who spent all or part of 13 days in the calendar quarter lobbying, or two employees who spent all or part of 7 days lobbying, or retained outside people and paid $2,500 a quarter for lobbying activities, then it would have to register and report. Along with other things, they would have to report solicitations.

Mr. MILFORD. As a participant in forming this bill, would the gentleman say that the bill itself requires registration of that type of program?

Mr. FLOWERS. Not just for the program itself, but it would go to the other activities. I think we have to look at each individual situation on the basis of what is contained in it. No individual person is covered under this bill.

Mr. MILFORD. I thank the gentleman.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. FLOWERS. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Is it correct to say that we are not talking about a case where the solicitation would trigger any kind of a threshold? We are talking about an activity of a registered organization only that sends out a mailing to more than—I believe it is 500, and a different figure with respect to officers and directors? But, the idea is also that we have simplified the procedure so that all they must do is actually attach a copy of that solicitation letter.

The CHAIRMAN. The time of the gentleman from Alabama has again expired.

(By unanimous consent Mr. FLOWERS was allowed to proceed for 1 additional minute.)

Mr. FLOWERS. Mr. Chairman, to further comment on the remarks of my friend the gentleman from Texas (Mr. MILFORD) permit me to say that there is another level, you could call it, requiring an expenditure of $5,000 that it would have to cost the registered organization before they would have to report it. In other words, it would have to be a significant solicitation campaign before there would be any reporting required.

Mr. MILFORD. Mr. Chairman, if the gentleman will yield, that just gets to the very heart of what I am talking about because $5,000 used in today's radio or television advertising does not mean much money, when you consider that much time involved for 5 days a week in the program referred to, that can eat it up in a hurry.

Mr. FLOWERS. If it is something having to do with their lobbying activities, I would say if they report on anything they ought to have to report on that also.

Mr. MILFORD. I am not arguing with the gentleman, I am merely asking.

Mr. FLOWERS. If they are otherwise covered they would have to report this, too, along with their other reporting.

Mr. MOORHEAD of California. Mr. Chairman, I move to strike the last word, and I rise in opposition to this amendment.

Mr. Chairman, I urge the defeat of this amendment which is an unprecedented and unnecessary intrusion by Congress into the rights of individuals and organizations to lobby persons outside the Government. On two separate occasions, in United States against Rumely and United States against Harriss, the Supreme Court has narrowly defined lobbying only to include direct lobbying of Members of Congress in recognition that coverage of grassroots activity is of dubious constitutional validity.

We must encourage participation in the political process and the requirement that organizations report their efforts in this area will merely inhibit that participation. Furthermore, there is no sufficient and compelling reason to justify this intrusion into the area protected by the first amendment. There are no abuses—letter writing campaigns and citizen participation are the essence of democracy. The mere fact that organizations engage in grassroots lobbying is not a sufficient reason to justify this infringement upon first amendment rights.

The House should reject this amendment.

Mr. ROSENTHAL. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment offered by the gentleman from Alabama (Mr. FLOWERS).

Mr. Chairman, I think his is an extraordinarily important, essential and very, very useful amendment.

My Subcommittee on Government Operations has, for the past 6 months, been looking into the enormously mushrooming efforts of grassroots lobbying and we have turned up many examples of major grassroots lobbying campaigns which have sought to influence decisions in the 94th and 95th Congresses which have escaped reporting under the existing lobbying disclosure bill and would have escaped reporting under this bill if the amendment offered by the gentleman from Alabama (Mr. FLOWERS) is not adopted.

I have two examples.

In 1977, the automobile companies spent more than $1 million on a massive grassroots campaign against strengthening amendments to the Clean Air Act. So far as I have been able to determine these expenditures were not reflected in any present lobbying reports and would not be disclosed under the committee-reported bill.

Also in 1977, the National Maritime Council, a trade association to promote Merchant Marine activities, spent approximately a half million dollars on grassroots advertising to influence the Congress on "cargo preference" legislation. But this activity and these expenditures escaped detection under the existing disclosure bill and would have escaped detection under the committee-reported bill, unless the Flowers amendment is agreed to.

Grassroots lobbying activities, Mr. Chairman, already comprise and account for nearly half of all expenditures for lobbying activities nationwide. I am overwhelmingly convinced that in the future they will assume a majority share of lobbying expenditures. To exclude major grassroots campaigns from coverage under this bill is, in reality, to nullify the purposes for which this bill is intended.

All of us, the sponsors of the bill and supporters of this amendment, are obviously sensitive to first amendment privileges and rights. In my judgment, the committee has misread what the law is. The committee in its report brands disclosure of solicitations to lobby as disclosure of indirect lobbying, a form of regulation criticized by the U.S. Supreme Court on several occasions. In the language of the relevant court opinions, information regarding direct lobbying may be required to be disclosed, while information regarding indirect lobbying may not be, such as grassroots lobbying. Thus, the characterization of grassroots lobbying as indirect leads the committee to the mistaken conclusion that disclosure of information regarding such lobbying would be unconstitutional. The characterization of grassroots lobbying as "indirect" is, however, flatly contradicted by the relevant Supreme Court de-

cisions, and the committee's conclusions regarding its constitutionality are without foundation.

In the Harriss case the Supreme Court upheld the constitutionality of the Federal Regulation of Lobbying Act to the extent that it required the disclosure of information by persons engaged in what the Court called "direct" lobbying. In my judgment, Mr. Chairman, as a result of reviewing the pertinent relevant Court decisions, this amendment certainly meets the constitutional restraints of the first amendment. Thus, I actively and wholeheartedly support it. It is absolutely essential, taking into account that this amendment does not expand the requirements of the bill. All it would do is require those that are covered by the bill report their activities. Those activities are growing at a phenomenal rate. They are having an enormous influence on the legislative process here in Washington, and to permit the escape of this major effort of lobbying of the U.S. Congress would demean the progressive intention of the bill. I urge support for this very important amendment.

Mr. KASTENMEIER. Mr. Chairman. will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding.

I would like to commend the gentleman from New York for his observations and express my own support for the Flowers amendment.

Mr. ROSENTHAL. I thank the gentleman.

Mr. McCLORY. Mr. Chairman, I rise in strong opposition to this amendment, and I am pleased, indeed, to be associated with my colleagues, the gentleman from California (Mr. EDWARDS), the gentleman from Ohio (Mr. SEIBERLING), the gentleman from Missouri (Mr. VOLKMER), the gentleman from Virginia (Mr. BUTLER), the gentleman from California (Mr. BEILENSON), and the gentleman from Massachusetts (Mr. DRINAN), in expressing opposition to this amendment. In other words, I think we have here a broad spectrum of political philosophy in opposition to this amendment. As I envision it, while it might not convert employees of organizations, or officers of organizations, into lobbyists, it would require the filing, and if there were not any filing, then they would be in violation of this law.

It seems to me that a company which has 100 employees, if the Congress is doing something that is going to impair their jobs, the employer had better get after the employees and notify them in writing and have them write to their Representatives in the Congress. I think that this amendment, if adopted, would discourage employers and employees from doing that.

This amendment is unnecessary and, it seems to me, very unwise. I think what we should be doing is to encourage people to communicate with respect to legislation. This could affect religious and charitable organizations and all kinds of organizations of people who are concerned about legislation. It is true that many of these organizations may have special interests, pecuniary interest. Others may have merely political or philosophical types of interests that are involved.

But to put a damper on these expressions, this free expression to write, to petition the Government, it seems to me hits at the very roots of our constitutional right to petition the Government.

Mr. Chairman, I am hopeful that the amendment will be resoundingly defeated.

Mr. EDWARDS of California. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I have been authorized by the gentleman from New Jersey, Chairman RODINO, whose wife is unfortunately ill and who cannot be present here today, to advise the Committee that the gentleman from New Jersey (Mr. RODINO) is against the amendment and supports the position that I am going to take right now against the amendment.

Mr. Chairman, this is the big amendment. This is the key amendment, probably the most important one that will be considered today. I refer to the statement made by our colleague, the gentleman from Alabama (Mr. FLOWERS) that we have a fragile coalition here. This amendment could blow the fragile coalition out of the water if it were approved, I assure you.

I might also say that it would result in mountains of paperwork in all the 50 States, if this amendment were agreed to and became a part of the law.

This is a key amendment. As a matter of fact, I offered it in the full committee. It was adopted by the full committee by a vote of 26 to 8. If adopted and made a part of this bill, it would make this bill not only not acceptable to many of us, but we think also unconstitutional.

As a matter of fact, the members of the Subcommittee on Civil Constitutional Rights of the Committee on the Judiciary, all seven members wrote a letter to all the Members pointing out what in their judgment were the unconsitutional aspects of this amendment.

Let us see how it would work. Let us suppose it became a part of the law. We know that a Sears store qualifies on a nationwide basis as a lobbyist. They spend over $2,500 a quarter and certainly individuals there do more than 13 days in a single quarter of lobbying. Let us say a Sears store in my hometown of San Jose, Calif., wanted to put something on their bulletin board to encourage their employees to get in touch with their Member of Congress to encourage a vote on a tax matter that might be beneficial to Sears and to their employees, perhaps on their pension plan or something like that. Well, this would be triggered and all of the provisions in the amendment of the gentleman from Alabama (Mr. FLOWERS) would go into effect. Certainly, it would hit more than 100 employees, but they have to keep records all over the country to see if it were going to pass the threshold of 100 employees. Untold people walking by the bulletin boards across the country, and all this would have to be reported, a description of the issue, a description of the need, identification of the person and so forth. Think of the mountains of paperwork that would result in just the Sears stores alone around the 50 States.

Let us take a local church, a Catholic church in California with an active priest who is devoted to a certain issue, say the Hyde amendment. We will assume that the church has spent $2,500 in a quarter and that the priest has lobbied for the requisite 13 days, so he asks the church volunteers to go out and ask their neighbors to write to Members of Congress to vote for the Hyde amendment. Under this amendment records would have to be kept by these volunteers, certainly an identification of any person retained to make the lobbying solicitation, a description of the need, and all that would have to be reported.

Do the Members not think this is quite a burden to put on a little local church that is interested in Government and in good Government, in the view of the church?

Then we talk about these quarterly reports as though somehow or other they are going to give us a lot of information. These quarterly reports are going to come in long after the vote. But when these lobbying solicitations go out—and this is something we want to encourage in this country, lobbying solicitations to Members of Congress—they are going to go out a couple of weeks before the vote is going to take place in the House or in the Senate, and then at the end of the quarter all the information is gathered. Nobody is going to read that information then. The vote is finished; the Panama Canal Treaty consideration was yesterday.

What good would it do at the end of the quarter to have reams and reams of paper about who wrote to Members of the Senate to vote "yea" or "nay" on the Panama Canal Treaty?

The CHAIRMAN. The time of the gentleman from California (Mr. EDWARDS) has expired.

(On the request of Mr. WAXMAN and by unanimous consent, Mr. EDWARDS of California was allowed to proceed for 2 additional minutes.)

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, as I understand the purpose of this legislation, it is so we can inform the American public as to how much money is being spent by organizations that want to influence legislation that is before us in the Congress.

If an organization is spending money to try to influence Congressmen through this indirect means, is that going to be reported and disclosed?

Mr. EDWARDS of California. The expenditure of the money must be disclosed pursuant to the provisions of the bill. All

the information about the solicitation need not be disclosed unless this amendment is agreed to. I forget on what page of the bill this appears, but it is provided in the bill that all expenses of mailing, postage, and items of that kind must be reported.

So the answer is, yes.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield further?

Mr. EDWARDS of California. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, the gentleman used Sears as an example.

If a Sears employee decides to put up a notice for all other employees to take note of encouraging fellow employees to write to Congress, not on behalf of legislation that benefits Sears but, let us say, for a tax credit bill that benefits employees who send their children to private schools, would that trigger the reporting mechanism under the Flowers amendment?

Mr. EDWARDS of California. Sears is a lobbyist. We know that Sears is a registered lobbyist, and the company would have to register under this bill. Sears would be a lobbyist, and the answer is, yes.

Mr. FLOWERS. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Chairman, I know the gentleman did not intend except through inadvertence to misstate himself, but I do not think that any kind of solicitation expenses would be covered in this bill. Without this amendment anything that is done in the line of soliciting lobbying communications, is not covered and no reporting would be required.

Mr. EDWARDS of California. Mr. Chairman, I disagree with the gentleman, and I refer to the chairman of the subcommittee and will ask him to read that portion of the bill that states that lobbying expenses must be reported.

The CHAIRMAN. The time of the gentleman from California (Mr. EDWARDS) has again expired.

(By unanimous consent, Mr. EDWARDS of California was allowed to proceed for 2 additional minutes.)

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Chairman, I believe we are talking about two different things.

The hypothetical question put by the gentleman from California (Mr. WAXMAN) was concerning a Sears employee who posts something on the bulletin board asking people to write to Congress about a tax credit bill of some kind.

Unless that Sears employee is himself a registered organization—and he cannot be one if he is acting alone—obviously we do not have solicitation of lobbying communications. So the example just would not fit the bill, because no individual is covered under this bill.

No individual is covered. In fact, that is a point that seems to be hard to get across. Under this bill no individual in the United States ever has to register or ever has to report for making lobbying communications.

As to the other half of the question, there is a provision that a registered organization must report quarterly, and in reporting it must include expenditures. "Expenditures" is a word of art under the bill. It is defined under section 2(6), and that includes expenditures for mailing, printing, advertising, telephone, consultant fees, and the like.

Mr. FLOWERS. Or lobbying activities.

Mr. DANIELSON. Well, to costs attributable partly under the activities described in section 3(a).

Mr. EDWARDS of California. Mr. Chairman, if I may reclaim my time, I see no exception there. There is no exception for expenses that might be connected with solicitation.

Mr. DANIELSON. Mr. Chairman, if the gentleman will yield further, I can only say that is how the bill reads at the top of page 29.

Mr. FLOWERS. Mr. Chairman, if the gentleman will yield further, these last gratuitous comments on the grassroots solicitation communications as they relate to lobbying are not otherwise covered under this bill?

Mr. DANIELSON. That is correct, they are not.

Mr. FLOWERS. So they are not reportable and they are not covered. There is no report required.

Mr. EDWARDS of California. Mr. Chairman, I assure the gentleman that what the chairman of the subcommittee, the gentleman from California (Mr. DANIELSON), just read requires that expenses be included in the report.

Mr. FLOWERS. Expenses that are attributed to lobbying activities.

Mr. EDWARDS of California. Yes.

The CHAIRMAN. The time of the gentleman from California (Mr. EDWARDS) has again expired.

(On request of Mr. BROWN of Michigan and by unanimous consent, Mr. EDWARDS of California was allowed to proceed for 1 additional minute.)

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, the problem we are having here, it seems to me, is that we are not looking at who is being lobbied.

Grassroots lobbying, basically, is directed against the public at large, not public officials as such. And to the extent that you engage in spending postage in grassroots lobbying, it would not be reported, and should not be reported, I think.

Mr. RAILSBACK. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I really get the feeling that we still may not be making very clear exactly what the amendment does.

No. 1, using a church as an example, the fact that a church sends out a letter, under the Flowers amendment unless that church is a registered organization, that activity in itself is not going to trigger the formula threshold that would bring that church under the terms of what we hope will become a law. We are talking about a lobbyist organization that sends out a solicitation letter or buys a paid advertisement. As I understand the Flowers amendment, it is rather easy to comply with, not hard to conform to. Where you are sending out a mailing to more than 500 people, you are even permitted under the Flowers amendment to simply attach a copy of that solicitation letter.

Second, you are not, under the Flowers amendment, required to disclose any membership list. You are not required to identify any of the people that are being solicited.

Third, we are talking about solicitations on behalf of a lobbyist organization to a membership, urging that they contact a Federal officer or a Member of Congress, and so forth.

May I further just point out that a solicitation provision was contained in the law that this House passed in the last session. As a matter of fact, there was one bill that would have made soliciting a triggering device to actually cover an organization that was engaged only in soliciting. That is no longer true.

The gentleman from Alabama made the point that right now there is a glaring omission, a glaring loophole. I agree with him. Common Cause has admitted that 70 percent of its lobbying effort is conducted through soliciting members of its membership to write and lobby Members of Congress.

The National Rifle Association has engaged for years in what has been really unmatched lobbying soliciting without ever sending any lobbyists into our office, but they have inundated us with letters from back home.

Now we have the labor movement very much involved in it. We have the National Chamber of Commerce. We have diverse groups. We have the oil companies that are doing it.

Mr. Chairman, I think that if we omit from this lobbying bill that major part of the lobby function, we are doing a disservice to the American people. We are being really blind to the true facts of life, which are that this is now about the single most effective way to lobby.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, I am sure the gentleman from Illinois (Mr. RAILSBACK) heard the remarks of the gentleman from California (Mr. EDWARDS) in which he suggested that the employees' posting of a statement on the bulletin board at a Sears store, for example, would trigger this particular amendment and would require reporting of that particular posting.

Would the gentleman comment on the accuracy of that statement?

Mr. RAILSBACK. What I think the gentleman may be referring to is the first part of the language which says

that in the case of written solicitations and solicitations made through paid advertisements, where such solicitations reach or could reasonably be expected to reach in identical or similar form 500 or more persons, 100 or more employees, 25 or more officers or directors, or 12 or more affiliates of such organization, then that would trigger it and would require compliance.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(On request of Mr. BUTLER and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 1 additional minute.)

Mr. BUTLER. Mr. Chairman, will the gentleman yield further?

Mr. RAILSBACK. I yield to the gentleman from Virginia.

Mr. BUTLER. Then, Mr. Chairman, the representation by the gentleman from California (Mr. EDWARDS) that the mere posting of a solicitation for activity with reference to legislation on the bulletin board of a store would require reporting?

Mr. RAILSBACK. I tried to answer the gentleman as truthfully as I could.

However, let me add further that we are talking about a solicitation made by a lobbying organization. What they are saying is that when the lobbying organization posts something or put something up on a bulletin board, then, that does trigger the formula and that does not seem onerous at all to me. What they would be required to do, if that particular posting was going to reach more than 500 people, is to attach a copy of it and then answer the other very brief requirements called for in the report.

Mr. FLOWERS. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Chairman, I think the gentleman is exactly right. If the national headquarters of Sears sent out requirements to their local stores and said, "You have to post this on the bulletin board," then they would obviously, under this amendment, have to report it.

Mr. WIGGINS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this is an amendment only to the reporting section. That has been emphasized; and, of course, the amendment does not affect the trigger or the oragnizations covered. However, if an organization is covered, this will affect what it must report.

Frankly, Mr. Chairman, the reporting of solicitations tells us far more than we need to know. It compels the disclosure of information, forces it out against the wishes of its possessor, for no ascertainable public purpose known to me.

Mr. Chairman, the bill has heretofore dealt with lobby communications to Congress affecting legislation. This requires reports on solicitations to other people; that is, from one private organization to its employees or to the public, lobbying them, as distinguished from lobbying Congress.

I realize that some Members recognize that this is pretty effective lobbying. It is a good, loud, healthy, and robust speech. That is what it is. Of course, it is effective.

However, Mr. Chairman, what public purpose is served by compelling the disclosure of this effective speech? We require in the bill a report on the effect of the solicitation as it comes back to us in the form of a lobby communication, but for what earthly reason do we require reports with respect to a solicitation itself?

I will tell the Members who the effective solicitors are, Mr. Chairman. We are. I think Members of Congress solicit more lobby communications than probably anybody else. We are not covered, of course.

The Administration goes on the tube and solicits the public to take a position with respect to legislation. It is not covered, and it should not be.

Why, then, should not a private organization have the right to talk to the people and urge that they take a position on legislation without being compelled to make a public disclosure of such activities? I do not know of any reason to submit them to that burden. It is just another burden imposed on speech by this bill.

Mr. ROSENTHAL. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from New York.

Mr. ROSENTHAL. Mr. Chairman, I would be curious to know how the gentleman feels about a slightly peripheral issue. These expenditures that commercial organizations make to solicit support or opposition to legislation, does the gentleman think that should be tax deductible?

Mr. WIGGINS. Well, I do not know that the issue is at all relevant to this bill.

Mr. ROSENTHAL. It is not.

Mr. WIGGINS. I have not made a legislative judgment on that issue, and I am loath to give the gentleman an opinion off the top of my head with respect to such a delicate question.

Mr. ROSENTHAL. Assuming for the sake of discussion that it is not tax deductible, one of the tools—and it is only peripheral—one of the tools the IRS could use is this kind of reporting requirement. The fact is that grassroots lobbying has grown by astounding proportions.

Mr. WIGGINS. Let us hope so.

Mr. ROSENTHAL. It has, and it is being used by many American corporations, and they have not been paying taxes on this as an ordinary business expense. The lobbying activity is being supported in a way that I do not think anyone ever intended that it should be.

Mr. WIGGINS. I urge the gentleman to take it up with the Ways and Means Committee. I do not know that it is at all relevant to this bill.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to my colleague from California.

Mr. EDWARDS of California. I think we ought to point out that the purpose of this bill is not to discourage grassroots lobbying or to discourage political action groups. The purpose of this bill is registration and public knowledge of what larger lobbying organizations are doing.

Mr. WIGGINS. Would the gentleman not agree that this adds at least some burden to those reporting organizations which engage in grassroots lobbying, and to some extent may inhibit that type of activity?

Mr. EDWARDS of California. That is correct. Yes.

Mr. KINDNESS. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, I will be brief because a lot has been said that needs to be said on this, but I just suggest that the supporters of this amendment do not give the average American credit for having as much commonsense as he certainly has. We are talking about solicitations of the American people to make a decision, No. 1, about whether they are going to be influenced by this solicitation. Or, perhaps No. 1 should be whether they are going to listen to it or read it at all; No. 2, whether they are going to be influenced by it; and No. 3, whether they are going to take any action pursuant to that request.

All those are independent decisions made by individuals throughout our Nation, and they constitute a dividing line between what action is taken by a reporting organization and what results in terms of communications that may be made to Members of the Congress. There is independent judgment exercised. That is the dividing line we ought to recognize here, and that dividing line belongs to the American people. It does not belong to us, and we have no business legislating with respect to it.

What is lobbying anyway? It is obvious that it is a matter of communicating with those people who are going to be making the decisions about policy or legislative matters, and the people who make the communications to their elected representatives in the Congress have every right to do it under the first amendment. The exercise of that right ought not to be chilled or dampened by the imposing of some reporting requirements that somehow relate to this. It is every bit as important for organizations that may be lobbying organizations to be heard on these matters as it is for us to preserve the right of freedom of the press and the transference of that to the electronic media, because it is one other way for someone to speak up about a matter of public interest. If they cannot influence members of the public to act in response to their entreaties, OK, so be it, but if people do act it is their act, and it is their exercise of their first amendment rights.

I certainly hope we will defeat this amendment and retain a reasonably good bill and not kill the bill, in effect, by incorporating this amendment in it.

Mr. ROSENTHAL. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from New York.

Mr. ROSENTHAL. Mr. Chairman, in essence I agree with almost everything the gentleman has said other than the gentleman's objection to this amendment. However, what has been happening in the last 2 years is that those with unusual resources have taken the opportunity to exercise the right of petition. One could say, of course, that there is nothing wrong with it, and so be it, but we live in a country that is not only saturated with advertisements but also because of the uniqueness of the fifth amendment and we are now reaching what I consider to be an improper balance in the opportunity to exercise this right, especially in grassroots lobbying. Therefore I believe we ought to know what is happening in that area.

As I say, I agree almost 99 percent with what the gentleman from Ohio (Mr. KINDNESS) says but I do not think the gentleman should be opposed to having the people telling us what they are doing.

Mr. KINDNESS. I would suggest to the gentleman from New York (Mr. ROSENTHAL) that he and his party have been attempting to reallocate the resources of some of the people for quite some time and have not been successful about it. So, therefore, let us leave what the American people have in their package of freedoms as it is, let us leave that with them, and not be concerned about whose resources are being used, who has resources and who has not. We want to have a resourceful nation in order to be able to communicate with them and they with us.

Mr. ROSENTHAL. Is there something predominantly wrong about the Flowers amendment in that respect?

Mr. KINDNESS. I hope that the gentleman does not just want to have done with grassroots lobbying. A great deal of effort and time can be spent in gathering the information that is used in effecting indirect lobbying communications. If the gentleman wants to kill it I do not agree with him on that. I do not believe one can readily collect the necessary and reliable information on that sort of thing because it is too diverse, too widely spread.

Mr. ROSENTHAL. May I say that in some of these major grassroots campaigns that the people communicated with may not agree with what they are asked to do.

Mr. KINDNESS. The gentleman may have forgotten what we are talking about. We are talking about communications that go out to a broad range of people who are probably practical people in many instances, maybe it only goes to members of an organization, but you cannot hide this light under a bushel basket, it is out in the open.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. ROSENTHAL and by unanimous consent, Mr. KINDNESS was allowed to proceed for 1 additional minute.)

Mr. ROSENTHAL. Mr. Chairman, will the gentleman yield further?

Mr. KINDNESS. I yield further to the gentleman from New York.

Mr. ROSENTHAL. Mr. Chairman, I thank the gentleman for yielding. What we are talking about, just to cite an example is say the A.T. & T. Co. sends out a communication to their stockholders, and they say, just for an example, "If you don't return the postcard, then we will withhold 1 percent from every share you own on each dividend for our political action uses, and that it will be used as we see fit." I think that that kind of a communication is useful for us to know about.

Mr. KINDNESS. I think the gentleman has a misconception if the gentleman believes that this amendment would bring that out in the reporting.

Mr. ROSENTHAL. There would be no further requirement for any further additional information.

Mr. KINDNESS. Then that is not a communication that would be affected by this amendment.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment and to comment on the remarks of the gentleman from New York (Mr. ROSENTHAL).

As the gentleman from New York indicated, the Commerce, Consumer and Monetary Affairs Subcommittee, on which I am the ranking minority member, has been studying the adequacy of IRS enforcement of the provisions of the Tax Code which apply to grassroots communications on public issues, including grassroots lobbying. However, I must inform the Members of this body that the preliminary findings of that investigation do not support the conclusion that we should regulate such activities; nor do those findings suggest an override of the constitutional prohibition against Government infringement on the right of free speech, and the right of people to petition the Government.

The subcommittee investigation is directed primarily at IRS enforcement of section 162(e) of the Tax Code which permits all businesses, union members, and others to deduct expenses or organization dues for direct lobbying of Congress, but which provision denies deductions for expenses incurred to "influence the public on legislative matters, referendums or elections." That distinction between direct and indirect lobbying may be illogical but it is existing law. The subcommittee investigation has been conducted in large part by means of questionnaires addressed to business, trade associations and a few unions—with a high degree of voluntary compliance by the private sector.

There are three preliminary findings of the investigation. Grassroots communications are a significant and growing technique for debating public issues. Grassroots communications include: First, informative and educational public messages on current issues being considered in the legislative or executive branches of the Federal Government; second, communications on legislative issues between trade or union organizations and their members throughout the country; and third, the advocacy advertisements and mass mailings aimed at influencing the general public on legislative matters. Only the last of these three types of communications is subject to the limitation on deductions in the Tax Code.

The second preliminary finding is that some taxpayers are taking improper deductions for expenses which are not deductible under existing law. In response to the subcommittee questionnaires, some corporations have reviewed the records with a clearer understanding of the issue and if improper deductions were found they have admitted the existance of the problem. Other corporations denied doing any grassroots lobbying in spite of evidence to the contrary, suggesting that they have not adequately reviewed their practices and segregated out the nondeductible expenses. However, such improper deductions are not limited to corporate entities. I plan to raise questions at our subcommittee hearings about a Federal Election Commission suit against the AFL–CIO for using $392,000 of general funds from union dues for the improper purpose of financing election activities. If the FEC case is sustained in court, it could result in a determination of improper tax deductions for many of the union's dues paying members.

The third preliminary finding is that the IRS has failed to effectively enforce the existing law in this area. It is clear that IRS has not heretofore given this provision of law much attention, and that both taxpayers and IRS agents have not had sufficient guidance through regulations or rulings to distinguish deductible expenses from nondeductible. IRS has taken some steps recently to improve this situation by issuing four rulings, revising the auditors manual, and initiating an audit survey to determine the level of noncompliance. However, I believe that IRS will find it impossible to make any significant improvements to correct the present chaos of interpretation of the law. Prof. S. Prakash Sethi, author of a major study on this topic entitled "Advocacy Advertising and Large Corporations" and whose works and study have been cited with approbation by none other than the gentleman from New York, Mr. ROSENTHAL, agrees with my assessment. In reviewing some proposals by IRS critics for clarifying the existing interpretation of section 162(e)(2), Professor Sethi wrote:

> The good intentions of the critics notwithstanding the proposals outlined earlier are of doubtful value both on grounds of operational effectiveness and achievement of objectives. The proposals would impose a heavy burden on the IRS in terms of setting precise rules for determining deductibility that would be general enough to cover broad areas of advertisement content and yet specific enough to be operational. The IRS has had considerable difficulty in determining when to disallow deductions for business expenses in apparently simple cases such as payment of fines. To think that rules could be developed to cover an activity with a high degree of subjectivity of interpretation is to show a lack of understanding of the complexity of the problem and the nature of advertising. Consider, for example, the testi-

mony of Lester Fant, a tax attorney, before Senator Hart's subcommittee. In elaborating on the three tests referred to earlier, he stated that the same ad could be classified as either deductible or nondeductible depending on the specific circumstances of the case, what preceded that particular ad, and the overall communication context within which the ad was presented. Furthermore, he concedes that, given the same set of rules, two experts could classify the same ad differently. (p. 246)

There is a more serious problem which arises if IRS adopts subjective tests for distinguishing deductible product or goodwill ads from nondeductible grassroots lobbying ads. Two examples of the proposed tests are:

First. Whether the ad discusses both the pros and cons of the public policy issue addressed.

Second. Whether the subject of the ad is treated in a polemical or controversial manner.

In my opinion, the adoption of any subjective criteria such as these will raise a serious first amendment problem. These vague criteria could only be applied in an arbitrary and inconsistent manner—and thus have a chilling effect on public comment on important issues. The Supreme Court has been very sensitive to the application of subjective standards to the exercise of the freedom of speech. See for example *Shuttlesworth* v. *Birmingham* 394 U.S. 147 (1969).

As I mentioned at the outset, I believe that the preliminary findings of our subcommittee investigation of grassroots lobbying do not have any significance when considered vis-a-vis the constitutional prohibition against Government infringement on the right of free speech and the right to petition the Government. This constitutional issue traced through the Supreme Court rulings in U.S. against Harriss, U.S. against Rumely and the Court of Appeals ruling in Buckley against Valeo is very ably discussed in the Judiciary Committee report. I believe that this amendment should be rejected as an infringement on first amendment rights with no countervailing, "substantial Government interest." After this body rejects the amendment, it should in the near future take up the question of whether the existing provisions of the tax code are similarly defective. Indeed, the public interest tax group, tax analysts and advocates referred in our hearings and characterized the current problems of the existing tax law on grassroots lobbying this way:

The ultimate blame for the Service's dilemma and the resulting inequities lies with Congress for enacting an unenforceable and untenable rule to begin with. It is perhaps unwise to continue allowing the type and amount of lobbying activity to determine the deductibility of contributions and expenditures. Indeed, an all-or-nothing rule would go a long way toward solving these problems and clear up constitutional questions clouding the existing distinctions. Perhaps the Rosenthal hearings will provide the impetus for Congressional action that will make the law in this area evenhanded, fair, and administerable.—Tax Notes, February 13, 1978

Mr. Chairman, I urge the defeat of the amendment.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wonder if I might have the attention of the gentleman from Alabama, my friend (Mr. FLOWERS). I would like to take my time here to ask the gentleman a couple questions. I might say, I do support the gentleman's amendment, as the gentleman is well aware. I think unless the gentleman's amendment carries, this bill will be the same toothless-tiger lobbying bill, circa 1946, that is on the books today.

Let me ask the gentleman this question. Was there not a provision in the subcommittee version of this bill somewhat similar to what the gentleman offered to us today?

Mr. FLOWERS. Mr. Chairman, if the gentleman will yield, the subcommittee had such a version in almost identical language.

Mr. MAZZOLI. Mr. Chairman, let me ask this question also. In the subcommittee version of the bill, which was later changed in the full committee, but which the gentleman seeks to reinstate, was its version like the gentleman's in that this provision, if carried, would not affect the threshold, but would, indeed, only affect the reporting after the threshold is crossed?

Mr. FLOWERS. The gentleman is absolutely correct.

Mr. MAZZOLI. Would the gentleman perhaps give us a few words for some of the people who may have just come on the floor on the vital distinction between having his proposed amendment as part of the threshold which would trigger the coverage of the bill and having it as a part of the reporting requirements?

Mr. FLOWERS. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I am happy to yield to the gentleman from Alabama.

Mr. FLOWERS. What the gentleman is getting at, this would only enter into the reporting requirements. The organization would have to otherwise be covered before this would have any application whatever.

Let me add just one further note. This was very much a part of the bill that passed this House 2 years ago and which, because of the end of the session, we were unable to get to conference with the Senate, but it has generally been thought of as a part of the lobbying bill that would come out of Congress. I hope it will be. The administration supports the inclusion of it.

As I said earlier, it has very wide and bipartisan support.

Mr. MAZZOLI. Mr. Chairman, if the gentleman from Alabama will continue, if I understand what the gentleman said correctly, there could be any amount of indirect lobbying, it could go on from now to doomsday; an organization could spend millions and millions of dollars in generating responses from the grassroots to flutter down on Capitol Hill. If I understand the gentleman correctly, that would still not trigger the application of this bill; is that correct?

Mr. FLOWERS. It would not trigger it, that is correct.

Mr. MAZZOLI. So if the gentlemen would proceed further, it would seem we are not really preventing, as have been the declamations on the floor today, a small group of persons from getting involved in Government and we have not put a chilling effect on the grassroots, because any individual could lobby on Capitol Hill and never have to worry about filing a single paper with the Congress; is that correct?

Mr. FLOWERS. Absolutely.

Mr. MAZZOLI. And the only reason they would have to ever file a paper would be if they trigger, that is, spend $2,500 in lobbying communications, which means direct communication, direct oral or direct written communication with the Congress.

Mr. FLOWERS. If they were otherwise required to register under the bill.

Mr. MAZZOLI. Mr. Chairman, may I ask the gentleman one further question?

Under the gentleman's amendment, if it carries, is any individual human being, any U.S. citizen, required to file any paper or any report whatsoever with the Congress of the United States because he or she wishes to communicate a personal opinion to his or her Federal elected official?

Mr. FLOWERS. No.

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman for his answer.

I would like to add one thing to my comments, Mr. Chairman.

In the New York Times of April 17, 1978, 2 days ago, an article by Mr. Charles Mohr appeared. I would like to read the two lead paragraphs which I think most succinctly state the case for the amendment offered by the gentleman from Alabama (Mr. FLOWERS).

Paragraph 1 is as follows:

"Congressmen first learn how to count and then to think," said Thomas J. Donohue, executive vice president of Citizen's Choice, a recently formed conservative political action organization.

Paragraph 2 is as follows:

Although some might not state it with such blunt cynicism, a widespread belief in that theory across the entire spectrum of special-interest groups in America has led to significant changes in the methods used to influence Congress.

Whether the group is a liberal or a conservative group is totally incidental. The important point is that there is a whole new method in the country as to how to affect and influence the Congress. It seems to me, at the very least, that, when the new method—grassroots lobbying—becomes sizable enough, it ought to be covered and ought to be reported.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I rise in strong support of the amendment. I think it is absolutely essential.

There is no question here of regulating anybody or denying anybody the right to communicate. All lobbyists have to do is to attach a copy to the report that they have already made.

Mr. DANIELSON. Mr. Chairman, I ask unanimous consent that all debate on this amendment and any amendments thereto terminate at 4:40 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous request was agreed to will be recognized for 6½ minutes each.

The Chair recognizes the gentleman from South Dakota (Mr. ABDNOR).

Mr. ABDNOR. Mr. Chairman, I intend to be brief. I will only take a couple of minutes of my time.

I rise in strong opposition to this amendment or any other amendment containing the same principle that would discourage grassroots participation in our democratic process of government.

Far from being abuses, such grassroots lobbying campaigns are a means of giving voice to the "silent majority." I have been waiting for a long time for our people back home to become concerned and to be interested in the issues of the day, and something has transpired over the past few months and the past year that has shown there is a great deal of interest on the part of our constituents.

I think that is good, and we should not do anything under any conditions that would in any way destroy this trend.

I think to imply that there is something sinister about fostering such communication is actually an insult to the intelligence of the general public. I am convinced that the average citizen—I do not care whether he is a member of the chamber of commerce, the Sierra Club, or Common Cause or any other organization—would never lend his name to any kind of a campaign or put his name on a letter if he did not believe in the issue the organization was sponsoring.

Sometimes I wonder if our concern is because of the extra workload this is making for us here in Congress. Maybe some of us are a little concerned about having to write some extra letters. When we think about how good we have been to ourselves, making sure that we now have sophisticated office equipment to assist in answering our mail, I think we have the time to write our citizens and our constituents in order to state our views on how we feel and where we stand on issues.

Mr. Chairman, this is a bad amendment. Let us encourage people and organizations to involve our citizens in the consideration of the issues of the day.

Mr. Chairman, I yield back the balance of my time.

● Mr. EDWARDS of California. Mr. Chairman, the gentleman from Alabama has offered an amendment to the lobby disclosure bill which I fear will have a serious chilling effect on the right of organizations to communicate with their members on the public or political issues. If included in this bill on final passage, the Flowers amendment will require groups covered by the bill's threshold to report almost every written contact they have with their membership or employees where political action is urged.

The amendment provides that whenever such a group makes a grassroots communication urging others to contact Congress, they must report a description of the issue with which the solicitation is concerned, a description of the means employed to make the solicitation and what action was urged upon the recipient, the identification of any person retained to make the solicitation, the number of people expected to receive the message if sent by mail or telegram, and if made through a paid advertisement costing over $5,000 the amount spent and where the ad appeared.

Now, I would submit that for any of the smaller lobbying organizations which will be covered by this bill, the expense and effort of complying with this amendment each time they send out a newsletter monthly magazine, or legislative alert will be very high indeed. Where the group maintains a lobbying arm in Washington staffed with just a few people, they may have to curtail their communication with their members. In fact, I predict that if the lobby disclosure bill is passed with this provision, we will begin to see a significant decrease in the mail which our offices receive from smaller organizations. Naturally, the large, well established lobbies will be able to easily comply with this requirement by hiring more clerks. Thus we will have managed, by the passage of the Flowers amendment, to soften the political voices of smaller organizations, and those which do not have well staffed, well funded lobbying offices in Washington.

It is particularly disturbing to me that Congress may be willing to place such a burden on the exercise of First Amendment rights without even establishing a legislative record of lobbying abuses by which to demonstrate a compelling governmental interest to regulate this type of speech.

The constitutional issues raised by the requirements of the Flowers amendment are so important that I hope my colleagues will very seriously consider the arguments put forth in the following memorandum on the amendment prepared by the American Civil Liberties Union:

AMERICAN CIVIL LIBERTIES UNION,
*Washington, D.C., April 19, 1978.*

MEMORANDUM: H.R. 8494—CONSTITUTIONALITY OF FLOWERS AMENDMENT ON LOBBYING SOLICITATIONS

This memorandum concerns the constitutionality of the Flowers Amendment to require that lobbying organizations under H.R. 8494 disclose their solicitation efforts. It is our conclusion that this amendment is unconstitutional.

"Lobbying solicitations" typically include the efforts by organizations to require, encourage or solicit their members and others to make their views known to members of Congress or their staffs. The Supreme Court has never permitted government regulation of such indirect efforts to influence the legislative or elective process. Decisions of the present Court as well as earlier cases make it quite likely that the Court would strike down Congressional efforts to regulate lobbying solicitations.

In *United States* v. *Rumley*, 345 U.S. 41 (1953), the Court considered the scope of the authority of the House Select Committee on Lobbying Activities to investigate the adequacy of the lobbying Regulation Act. One group under investigation refused to comply with a Committee subpoena which purported to require disclosure of bulk purchasers of their books. The group's main purpose, in the words of the Committee, was "distribution of printed material to influence legislation indirectly." To avoid raising serious constitutional questions, the Court drastically narrowed the scope of the House resolution authorizing the investigation of "all lobbying activities intended to influence, encourage, promote or retard legislation." It did so because " . . . the power to inquire into all efforts of private individuals to influence public opinion through books and periodicals, however remote the radiations of influence which they may exert upon the ultimate legislative process, raises doubts of the constitutionality in view of the prohibitions of the First Amendment." 345 U.S. at 46. Adopting the language of the Court below—which had held the resolution unconstitutional—the Supreme Court read the phrase "lobbying activities" to mean " 'lobbying in its commonly accepted sense,' " that is "representations made directly to the Congress, its members, or its Committees'." *Id.* at 47.

One year later, the Supreme Court, in *United States* v. *Harriss*, 347 U.S. 612 (1954), applied the same construction to the language of the Federal Regulation of Lobbying Act itself. Several persons had been indicted under the Act for failure to report expenditures related "to the cost of a campaign to communicate by letter with members of Congress on certain legislation." 347 U.S. at 615. The Court took care not "to deny Congress in large measure the power of self-protection" by preventing Congress from any regulation of lobbying. 347 U.S. 625. But, as in *Rumely*, Chief Justice Warren limited the reach of the Act to cover only " 'lobbying in its commonly accepted sense'—to direct communication with members of Congress on pending or proposed Federal legislation." 347 U.S. 620.

The Supreme Court has not faced the issue of lobbying since the *Harriss* decision. The issue of regulation of efforts to influence public opinion has been addressed, however, by several lower courts.

The Court of Appeals in *Buckley* v. *Valeo*, 519 F.2d 821 (D.C. Cir. 1975), dealt with an analogous provision in the original Federal Election Campaign Act. Section 308 of FECA required disclosure by any group that committed "any act directed to the public for the purpose of influencing the outcome of an election or publication or broadcast of any material that is designed to influence individuals to cast their votes for or against such candidate or to withhold their votes from such candidate." 519 F.2d at 870.

The section was held flatly unconstitutional by the Court of Appeals. As part of the rationale, the Court cited the Second Circuit opinion in *United States* v. *National Committee for Impeachment*, 469 F.2d 1135 (2d Cir. 1972). In that case the Second Circuit had narrowly construed the section of the 1971 FECA requiring disclosure of activities aimed at the public by political committees. The Second Circuit said a broader reading of this section would result in an enormous interception of activities protected by the First Amendment:

". . . every position on any issue, major or minor, taken by anyone would be a campaign issue and any comment upon it, in, say, a newspaper editorial or an advertisement, would be subject to proscription unless the registration and disclosure were complied with. Such a result would, we think, be abhorrent; . . . Any organization would be wary of expressing any viewpoint lest under the Act it be required to register, file reports, disclose its contributors, or the like. On the Government's thesis every little Audubon Society Chapter would be a "political committee" for "environment" is an issue in one campaign after another. On this basis, too, a Boy Scout troop advertising for membership

to combat "juvenile delinquency" or a Golden Age Club promoting "senior citizens rights" would fall under the Act. The dampening effect on First Amendment rights and the potential for arbitrary administrative action that would result from such a situation would be intolerable." 469 F.2d 1142.

Similarly, in *ACLU* v. *Jennings*, 366 F. Supp. 941 (D.D.C. 1975), vacated as moot *sub nom., Staats* v. *ACLU*, 422 U.S. 1030 (1975), a three-judge district court was faced with a challenge to the 1971 FECA. The court perceived the same constitutional obstacles and adopted the same narrow interpretation propounded in National Committee for Impeachment.

Applying the principles in these decisions to the solicitation disclosure requirement of the Flowers Amendment, we submit that Congress has not met the burden of justifying these provisions.

First, there is no demonstrated compelling governmental interest in the requirements because there is no factual record of abuse in lobbying solicitations. On the contrary, such efforts are beneficial. A lobbying solicitation begins with the effort to inform and educate the public on federal legislation. This public debate on issues is protected by the First Amendment and any regulation of it would interfere with the exercise of Constitutional rights. If an organization at the same time asks others to support its views and to write Congress saying so, that is also public debate protected by the First Amendment.

This type of actvility ought to be encouraged, not regulated. Civil rights, anti-Vietnam war and impeachment movements all relied heavily on this type of activity to generate public support. Even the passage of the Constitution was spurred by anonymous grassroots lobbying such as the essays published as the Federalist Papers. If people respond to such a campaign, even if with a form letter, these people must believe in the position offered or at least sufficiently believe in the general goals of that organization initiating the solicitation to trust its judgment. Congress should not pass judgment on the value of these views. This individual response to a lobbying solicitation is the purest form of the right to petition the government.

Moreover, the lobbying solicitation provision will force overwhelming recordkeeping upon organizations, thus causing them to curtail or even halt their attempts to inform the public on vital public policy issues. Tracking of grassroots lobbying is virtually impossible, yet organizations would be under the threat of criminal sanctions for not filing accurate reports. The Flower Amendment therefore fails to utilize the least drastic means to effectuate the purpose of the statute, another requirement the Supreme Court imposed on legislation affecting First Amendment rights. Accordingly, disclosure of lobbying solicitations is unconstitutional and the Flower Amendment should be rejected.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama (Mr. FLOWERS).

The question was taken; and on a division (demanded by Mr. EDWARDS of California) there were—ayes 35, noes 26.

RECORDED VOTE

Miss JORDAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 245, noes 161, not voting 28, as follows:

[Roll No. 237]

NOT VOTING—28

| | | |
|---|---|---|
| Alexander | Dellums | Runnels |
| Bonker | Howard | Teague |
| Burke, Calif. | Kazen | Thone |
| Burton, John | Krueger | Thornton |
| Cederberg | McEwen | Walgren |
| Clausen, Don H. | Mann | Watkins |
| Cochran | Michel | Whitley |
| Conyers | Nedzi | Whitten |
| Daniel, R. W. | Risenhoover | Wilson, C. H. |
| | Rodino | |

The Clerk announced the following pairs:

On this vote:

Mr. Howard for, with Mr. Krueger against.

Mr. Runnels for, with Mr. Rodino against.

Mr. Whitley for, with Mr. Dellums against.

Mr. Walgren for, with Mrs. Burke of California against.

Mr. Teague for, with Mr. Conyers against.

Mr. John L. Burton for, with Mr. Michel against.

Messrs. BEARD of Tennessee, KELLY, SYMMS, PANETTA, WAMPLER, FINDLEY, LLOYD of California, McDONALD, GLICKMAN, MARRIOTT, HAGEDORN, and ROUSSELOT changed their vote from "aye" to "no."

Messrs. ECKHARDT, MOAKLEY, and POAGE changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there further amendments?

AMENDMENT OFFERED BY MR. RAILSBACK

Mr. RAILSBACK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAILSBACK: At page 38, lines 24 and 25 and page 39, lines 1 and 2, strike existing subsection (6) and substitute the following new subsection (6):

"(6) a description of the issues concerning which the organization filing such report engaged in lobbying communications and upon which the organization spent a significant amount of its efforts, disclosing with respect to each issue any retainee or em-

ployee identified in paragraph (5) of this subsection and the chief executive officer, whether paid or unpaid, who engaged in lobbying communications on behalf of that organization on that issue: *Provided, however*, That in the event an organization has engaged in lobbying communications on more than fifteen issues, it shall be deemed to have complied with this subsection if it lists the fifteen issues on which it has spent the greatest proportion of its efforts. For purposes of this paragraph the term "chief executive officer" means the individual with primary responsibility for directing the organization's overall policies and activities;"

Mr. RAILSBACK. Mr. Chairman, H.R. 8494 as written does not require reporting about individuals who, though they may receive no pay for their services, are the major policy formulators of an organization and are active in arguing their case before public officials. We recognize that on this issue we must be especially wary. We are dealing with important first amendment rights. However, reporting about the lobbying activities of a covered organization's principal executive officer, whether paid or unpaid, must be included in any fair lobby reform bill. To provide such coverage, our amendment will require reporting of the major issues on which these individuals lobbied. This would assure that the public would be able to know of the lobbying activities of such influential persons as Ralph Nader of Public Citizen, Irving Shapiro of the Business Roundtable, and the heads of various trade associations who may not be paid. We certainly have no intention of covering the myriad of volunteers who, from time to time, take an active interest in issues before Congress.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

The question was taken; and on a division (demanded by Mr. RAILSBACK) there were—ayes 33, noes 22.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. WIGGINS

Mr. WIGGINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGINS: On page 34, on line 18, strike the word "fifteen" and insert the word "thirty".

Mr. WIGGINS. Mr. Chairman, this is a simple amendment which is technical in nature, and it is one on which there ought to be no dispute.

The bill presently requires an organization to register 15 days after it engages in the activities which are covered. My amendment merely gives the organization 30 days within which to do that rather than 15.

Fifteen days is hardly adequate for any person to compute whether the organization has been covered, and it is hardly adequate to get the legal advice necessary to determine if it should register and complete and file the forms. Given the broad scope of coverage in the bill to all organizations in America and the lack of sophistication on the part of many people, I think this amendment is needed.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Chairman, I have looked the amendment over, and I certainly have no quarrel with it. I would be willing to accept the amendment.

Mr. KINDNESS. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Chairman, I see no objection to the gentleman's amendment on this side, and I urge support of the amendment.

Mr. WIGGINS. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. WIGGINS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SANTINI

Mr. SANTINI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SANTINI: Page 32, line 21, strike out "organization" and all that follows through "employees)," on page 33, line 5.

Page 33, line 6, insert the following after "individuals": ", except that the term 'organization' does not include any organization of State or local elected or appointed officials, any Federal, State, or local unit of government (other than a State college or university as described in section 511(a)(2)(3) of the Internal Revenue Code of 1954), any Indian Tribe, any national or State political party or any organizational unit thereof, or any association comprised solely of Members of Congress or Members of Congress and congressional employees".

Mr. SANTINI. Mr. Chairman, I rise to offer an amendment to H.R. 8494 on behalf of myself and Mr. SEIBERLING of Ohio. This amendment will exempt from coverage under this bill associations of State and local government officials.

As reported by the Judiciary Committee, the bill exempts officials of State and local governments. The authors of the legislation recognize that State governments are equal partners in our federal system and should be accorded the same treatment as that given to the Federal Government. Unfortunately, the committee did not address the specific problems facing State and local officials who cannot afford the luxury of hiring their own representatives to conduct lobbying activities here in Washington, D.C. The only method these counties and municipalities have by which they can conduct such activities is through membership in organizations such as the National Association of Counties, the League of Cities, National Governor's Conference, and the Conference of Mayors.

The issue involved is not one of disclosure. As public representatives, these organizations already disclose more information about their membership and activities than this bill would require of anyone. The issues which are supported by these groups are discussed in open session within the local communities and are known to the public and the media. What is the net gain by requiring a duplication of this effort through this bill?

There is another issue implicit in this legislation. There is a perception in the minds of some State and local officials that the National Government is somehow condescending, indifferent or hostile to local government. For the Congress of the United States to require that they register under a lobbying act designed to affect private interests while not calling for registration by the 675 Federal lobbyists is an affront to the federal system of government.

I am concerned that the impact of the bill will be to encourage local governments to hire, at additional expense, Washington, D.C. lobbyists to express their views. This would be a serious burden on many local units in my State, and I am sure it will prove to be burdensome in many of your districts as well. In Lincoln County, Nev., the trial of one murder suspect almost bankrupted the county. Are the Members of this body ready to tell Ed Arnold, chairman of the board of county commissioners of the rural community that he needs to hire a D.C. lobbyist in order to be exempt from the bill? While Ed Arnold's representatives would have to register as lobbyists under the bill, the Federal Government's lobbyists are exempted. Thus, the Department of Agriculture employee who called my office to ask support of the consumer bill would have no obligation under this legislation.

The prestigious Advisory Commission on Intergovernmental Relations, created by Federal law, and composed of Members of the Senate, House, private citizens and local and State officials passed a resolution asking that the entire range of governmental activities involving lobbying be studied. It also asked that Congress not require registration of the associations until such time as the study is complete.

I am advised that Chairman RODINO is in support of my amendment and will be paired in favor of it.

Thank you for your consideration.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from California.

Mr. DANIELSON. I thank the gentleman for yielding.

Mr. Chairman, I have looked over the amendment, and I have no opposition to it.

This amendment simply includes within the exempt groups, exempt from being classified as an organization, organizations of State or local or elected or appointed officials, such as the County Supervisors Association. And inasmuch as we do exempt units of State and local government, there seems to be no practical reason to include the organizations of those very same people.

Mr. SANTINI. I thank the chairman for his remarks. The gentleman could have saved me some time. I appreciate that very much.

Miss JORDAN. Mr. Chairman, would the gentleman yield?

Mr. SANTINI. I yield to the gentlewoman from Texas.

Miss JORDAN. I thank the gentleman for yielding.

Mr. Chairman, is it not also correct that the gentleman stated that these entities of State and local government do report their expenditures of funds and the reasons for which the funds were spent?

Mr. SANTINI. The gentlewoman summarizes it very well.

Miss JORDAN. Is it not also the case that the gentleman from Nevada sees some degree of unfairness in the exemption which is allowed various Federal agencies and entities which are financed, to a large extent, and who lobby on the Hill every day, and that they certainly are exempt, and does it seem to be a bit unfair to the gentleman for these Federal entities and agencies to be exempt and State and local governments to be covered?

Mr. SANTINI. The gentlewoman has expressed it so well I wish I would have included it in my remarks.

Miss JORDAN. Mr. Chairman, I support the gentleman's amendment.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from California.

Mr. WIGGINS. I thank the gentleman for yielding.

Mr. Chairman, I would like to engage in a little discussion with the gentleman as to the scope of appointed officials.

The CHAIRMAN. The time of the gentleman from Nevada (Mr. SANTINI) has expired.

(On request of Mr. WIGGINS and by unanimous consent, Mr. SANTINI was allowed to proceed for 2 additional minutes.)

Mr. WIGGINS. Mr. Chairman, if the gentleman will yield further, does the term "appointed officials" include an association of the chiefs, for example?

Mr. SANTINI. It would not.

Mr. WIGGINS. Even if they be appointed?

Mr. SANTINI. Even if they be appointed.

Mr. WIGGINS. Would it include an association of chiefs of police?

Mr. SANTINI. It would not.

Mr. WIGGINS. Would it include an association of city administrators?

Mr. SANTINI. It would not.

Mr. WIGGINS. Or planners?

Mr. SANTINI. No.

Mr. WIGGINS. Engineers?

Mr. SANTINI. No.

Mr. WIGGINS. And it would clearly not include any employee organization; is that correct?

Mr. SANTINI. That is correct.

Mr. WIGGINS. It would not include, for example, teachers; is that correct?

Mr. SANTINI. That is correct.

Mr. WIGGINS. Or municipal employees?

Mr. SANTINI. Correct.

Mr. WIGGINS. I think that is the important addition to the legislative history because, like the gentleman in the well, I do not wish the appointive position to be too broad; but now I am curious as to who is included.

Mr. SANTINI. Included within it are all of the elected or appointed officials, as stated in the amendment, to and including city officials, elected or appointed officials. Under that designation, if we had a mayor appointed to replace another mayor because of a vacancy, he would qualify, but a city planner would not qualify. It would include a commissioner, elected or appointed to fill a vacancy.

Mr. WIGGINS. As I understand it, the word "appointed" modifies the "elected official" language; is that correct?

Mr. SANTINI. Correct.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Chairman, I want to congratulate the gentleman from Nevada (Mr. SANTINI) for an outstanding amendment.

What about a situation in which there was a city manager? Would a city manager be able to be covered under the gentleman's amendment?

Mr. SANTINI. The city manager would not be covered under the language of my amendment.

Mr. DICKS. Would not be?

Mr. SANTINI. Would not be, but the city representatives, councilmen, commissioners, whatever their title might be, would be.

Mr. DICKS. Mr. Chairman, I want to congratulate the gentleman on his amendment.

The CHAIRMAN. The time of the gentleman from Nevada (Mr. SANTINI) has expired.

(On request of Mr. HARRIS and by unanimous consent, Mr. SANTINI was allowed to proceed for 2 additional minutes.)

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I yield to the gentleman from Virginia.

Mr. HARRIS. Mr. Chairman, the wording of the gentleman's amendment says "local elected or appointed officials."

It seems to me that the gentleman ought to be saying that he did not mean to include all appointed officials, but just those officials appointed to elective positions; is that not correct?

Mr. SANTINI. That is correct.

Mr. HARRIS. I presume, then, that the gentleman would accept an amendment stating "local elected officials or officials appointed to elective positions"; is that correct?

Mr. SANTINI. If that would be a contribution beyond that we have already arrived at in the legislative history, I would not object to such an amendment.

Mr. HARRIS. Then, Mr. Chairman, I ask unanimous consent that the wording of the amendment of the gentleman from Nevada (Mr. SANTINI) be changed to reflect the previous colloquy.

The CHAIRMAN. The gentleman from Virginia (Mr. HARRIS) asks unanimous consent to amend or to change the amendment of the gentleman from Nevada (Mr. SANTINI).

Is there objection to the request of the gentleman from Virginia?

Mr. WIGGINS. I reserve the right to object, Mr. Chairman.

I shall continue to reserve the right to object and to pass the time pleasantly as the gentleman from Virginia (Mr. HARRIS) perfects his amendment in writing.

Mr. Chairman, let me say this about the idea of excluding State and local elected officials. If a bill is bad—and I regard this bill to be bad—a virtue in that is that it is universally bad and uniformally bad. If, however, it is selectively bad, there is another reason to oppose it, because it seeks then to intrude on fifth amendment values as well as on first amendment values.

Having obfuscated that issue, Mr. Chairman, how is the gentleman from Virginia coming?

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I wanted to ask why the organization of congressional employees is exempted.

Mr. WIGGINS. Why are they? Not being an author of the bill and being reluctant to answer that question. I think the probable answer is that Members of Congress felt that we should not be compelled to disclose our own lobby activities.

Mrs. FENWICK. If the gentleman will yield further, Mr. Chairman, it says Members of Congress or congressional employees. Therefore, why are not congressional employees involved?

Mr. WIGGINS. The gentlewoman from New Jersey knows that some of the more effective lobby organizations within Congress are composed of Members of Congress. I understand that some of them are also open for the admission of congressional employees.

Mrs. FENWICK. It seems curious to me.

Mr. SANTINI. Mr. Chairman, I would like to reclaim my time, if I might.

Mr. WIGGINS. Mr. Chairman, I withdraw my reservation of objection.

POINT OF ORDER

Mr. McCORMACK. Mr. Chairman, I have a point of order.

The CHAIRMAN. The gentleman from Washington will state his point of order.

Mr. McCORMACK. Mr. Chairman, we are on a unanimous-consent request. I was reserving the right to object.

The CHAIRMAN. The Chair is going to insist, however, that the modification be made in writing because of the confusion that exists, and was going along with the gentleman from California until the time was provided to do that.

Does the gentleman from Nevada have a modification to his amendment?

Mr. SANTINI. Mr. Chairman, it appears to me that we are creating more of an impediment than a resolution at this point. I would resist the attempt at this point to modify by the gentleman's amendment. I feel that we have made a sufficient contribution in terms of both legislative history and intent at this point to suffice.

I do not feel the language will contribute anything to the clarification, or to the extent that it would, we would find ourselves impeded in a tangential manner that will consume a great deal more time than I intended to devote to this.

The CHAIRMAN. The Chair will in-

terpret the remarks of the gentleman from Nevada as an objection to the unanimous-consent request of the gentleman from Virginia (Mr. HARRIS).

Objection is heard.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, of necessity I rise in opposition to this amendment. The purpose of H.R. 8494, we say in the committee in which I serve, is to insure that major lobbying organizations register and report their lobbying activities. Well, if there is any lobbying operation around here that is more major than that of the State, county and local public officials, I have not come across it yet, and I hope I never do.

When the mayors and the city councils and county supervisors and the governors' folks get together and put on a lobbying effort, I can tell the Members that for sure it is a major effort. This bill is not telling State and local officials that they cannot lobby. It is simply going to include them in with the other major interest groups that come to Washington and spend their time and money trying to influence legislation. It says that they should register and report.

If we are going to talk about ethics and not include them, we are just not being realistic. They should be included. Not only do they make up one of the largest, best organized, most effective lobbies in Washington, they also have a bigger stake in what Government is doing than any other lobbying organization.

The outlays for Federal grants in aid to State and local governments are estimated to total $80.3 billion in 1978, and $85 billion in 1979. In 1979, that will account for 26 percent of total domestic outlays, and more than 26 percent of all State and local expenditures.

One of the biggest single functions of that money comes from the general revenue sharing program, which pumped out $8.5 billion last year. We were concerned enough about the lobbying effect of the State and local officials when we extended that legislation the last time that we included a provision in it barring the use of any of the funds received from revenue sharing for lobbying. But, whether they are using revenue sharing funds or not, they are using public funds. They are using public funds, and it is entirely proper that they should be required to maintain records and report expenditures, as H.R. 8494 requires.

Mr. Chairman, I would urge defeat of this amendment and support of the Judiciary Committee position.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from New York.

Mr. FISH. I just want to congratulate my friend from Texas on bringing us back to our senses on this. I am sure he shares with me a high regard for the Conference of Mayors and League of Cities.

Mr. BROOKS. I certainly do. They are wonderful people.

Mr. FISH. But, it is quite another thing to leave them out of the coverage of this amendment when, as the gentleman says, they come to Washington and the result of their efforts in entertaining the Congress and lobbying through our offices is literally billions and billions of dollars through expenditures by HUD and so on. I see no reason for them in their interests—and legitimate interests—not to be part of the coverage of this bill.

Mr. MOORHEAD of California. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from California.

Mr. MOORHEAD of California. Mr. Chairman, it is obvious that no one really wants to be covered by this particular piece of legislation, but if we are going to have a bill we cannot start exempting one group after another from coverage.

The group that is concerned here, the Organization of Governors and Mayors, and various city and county officials, is a very effective lobbying unit. If we are going to have a true picture of lobbying before the Congress and in the United States we must have them covered as well as others.

So I ask for a no vote on the amendment.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, I thank the gentleman for yielding, and I want to congratulate the gentleman from Texas (Mr. BROOKS) on the statement he has made. The most important thing we can do with this particular legislation is recognize that where somebody retains a lobbyist, regardless of whether they are a labor union, a business group or whoever they are, we should treat them all the same.

I agree with the remarks of the gentleman from Texas (Mr. BROOKS). I believe he is right on target and I urge defeat of the amendment.

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, I certainly want to join the gentleman from Texas (Mr. BROOKS) in opposition to the pending amendment. It would seem to me it would gut the entire purpose of this bill if the pending amendment were adopted by exempting such a large part of the lobbying activity which ought to be within the purview of the legislation.

I urge that we reject the amendment.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. SANTINI, and by unanimous consent, Mr. BROOKS was allowed to proceed for 2 additional minutes.)

Mr. SANTINI. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Nevada.

Mr. SANTINI. Mr. Chairman, I regret that the distinguished chairman the gentleman from Texas (Mr. BROOKS) has used this particular forum to rehash his longstanding enthusiasm for hassling with county and municipal governments because I do not think that is remotely relevant to the issue we are trying to raise here.

That 2-foot or 3-foot pile of books over there is illustrative of the disclosure that they already engage in. What we are talking about is asking them to double, treble or quadruple, at least, all of that disclosure, evidently, that presently goes on. We are doing it in the context of exempting the Washington lawyers if that Washington lawyer represents the city or represents the county or represents the State on an individual basis, but we are imposing the obligation on the associations' representatives that are already encumbered with substantial reporting obligations, as it now exists.

Mr. BROOKS. I appreciate your question.

But I do want to reiterate that it is my determined feeling that these are as big as any animal in the park. This is one of the most effective lobbying groups in the United States. I know because I have fought with them and they whipped me all over this Congress. I bleed from them. They are always working because they are hustling for the $85 billion that they want in 1979—26 percent of the total domestic outlays. These people have a real interest down here, and they come down here. When they do I am glad to see them. I like to visit with them. I like them. We have a new mayor in my hometown. As a matter of fact a fine man. Nobody is going to stop them from lobbying. We just want to let them keep an account of it, maintain records like everybody else does that comes and lobbies. There is nothing wrong with it. They are welcome to come. As I say I like to see them.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I always thought that the gentleman from Texas (Mr. BROOKS) was a great supporter of States rights and local government and local autonomy and home rule. That is the philosophy under which the bill itself exempts State and local elected officials.

It seems to me that it does not make much sense to say on the one hand, that they are exempt from the coverage of this bill because we do not want them spending public funds, including some of the money that the Federal taxpayers give to the State and local governments, filling out report forms under a lobbying law, and then to turn right around and say that if they organize to make their lobbying a little more effective we are now going to make them fill out the reports. Pretty soon we will find them coming in for more grants to spend more money because we are making them fill out more report forms.

So I think that Mr. SANTINI's amendment makes a great deal of sense, if exempting State and local elected officials makes sense, and I submit that it does. This bill raises serious constitutional problems involving first amendment

rights—which I happen to think the bill infringes upon a little too much. It also involves a question of comity between the Federal and State governments and between elected officials in these governments, who are accountable to their constituents and who are audited for their official activities. It is a matter of comity between the Federal Government and those governments and officials, which also involves a constitutional principle in a federal system such as ours.

I do not think that the gentleman from Texas (Mr. BROOKS) is really hitting the mark when he implies that there is something nefarious about these people coming down and lobbying Congress. Of course, we ought to know what they are doing and who they are. We do know, and the people who are going to know about it most are the people who elected them and who pay their State and local taxes. So I see nothing wrong with exempting them, and I would hope that the gentleman's amendment would pass.

Mr. KINDNESS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment. I think the gentleman from Texas (Mr. BROOKS) very well stated the heart of the issue. In the subcommittee and committee stages of consideration of this bill, an attempt was made to straighten out the inequity, or the apparent inequity, that exists whereby a large city can send its people down to Washington and lobby full time—in behalf of the city of New York, for example, as compared to a smaller city. That does not seem quite fair. I attempted to get an amendment in the subcommittee that would bring those Washington offices of States or cities under the coverage of the bill.

I think instead of creating more exemptions, we should try to cover everyone in equitable fashion. I am not offering that amendment at this time because I do not think there is enough support for it, but I would strongly urge that we not go further and exempt the National Association of County Officials, the National League of Cities, the Conference of Mayors, and so on, from the coverage of this legislation for the reasons that have been well stated here. They are very effective lobbying organizations.

The difference is that this bill is directed toward organizations, and if we equate a municipality or a county with an individual, for the moment for purposes of argument, it is only when they get together and form an organization for the purpose of making lobbying communications that this bill is intended to take effect. Let us leave them covered, those who gather together in organizations. They are not acting as governments of State and local stature. They are acting as organizations representing people who are serving in office.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Virginia.

Mr. HARRIS. I thank the gentleman for yielding.

Just as my colleague was talking, I was reflecting upon the discussions we had in subcommittee as we got into these various areas of exemptions. I recall, as I think my colleague must have, where you go if you exempt organizations of public officials. I think the next question was, How about college professors, university professors? And if you exempt public university professors, then do you exempt private university professors? Then if you are going to do that for education, you really should do that for hospitals, and then down the line we went. I think it was the conclusion of those who studied this that if we once opened up the door to this sort of avenue of exemptions that there would be no end to it, and there would be no real bill.

Does my colleague recall similar discussions?

Mr. KINDNESS. I recall it exactly the same way. The gentleman is quite correct.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from New York.

Mr. FISH. I thank the gentleman for yielding.

I would just like to address one point, because an effort has been made here in the last few minutes to equate the exemption for State and local officials as individuals to the proposal that we also exempt organizations of State and local officials.

Mr. Chairman, it seems to me that the two are quite distinct, that in the case of Federal or local elected officials we are talking about in most cases, if not our constituents, our partners in government in the State for which we are all officials of the same area. I think that is far more in keeping with the present exemption to the extension of the personality of our mayor or Governor in the District of Columbia. But when we are talking about a tremendous national organization with an influence of over tens of billions, we are talking about clearly a lobby effort that is unrelated to any partner in government.

On top of that, we are more than likely talking about a representative for an organization, such as the League of Cities. No matter how qualified he is, such a representative is not on the same basis as the mayor of a city that you or I represent or the Governor of our State who might have an office in Washington; so I think these cases are clearly distinguishable.

Mr. Chairman, I join with my colleague in calling for a "no" vote on this amendment.

Mrs. SPELLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I was very happy to hear the gentleman from New York recognize that we are talking about our partners in government, because that is what State and local officials are. They are our partners in government. We are helping each other in the job of serving our constituents. I feel that we should very strongly support the amendment of the gentleman from Nevada (Mr. SANTINI) to the Lobby Disclosure Act. This amendment rightly recognizes the important role of the States and the counties and the cities as our copartners in governing our large and diverse Nation. We learned long ago that Congress cannot make all the decisions in this country. The concept of federalism requires that elected officials and their staffs at every level of government work closely with one another to improve our programs and our services to our mutual electorate.

I know when I was a county official it was easy enough for me to contact the Members of Congress. I was right outside of Washington; but that is not the same with people all around the country. The small counties just do not have the wherewithal to have people down here in Washington to represent them all the time. So it is an important component of this intergovernmental communication that we would be preserving.

Now, we are all familiar with the organizations that we are talking about. They are performing essentially the same functions as persons from the Federal executive branch who are referred to as congressional relations staff. Judge Gerhard Gesell of the D.C. District Court described these activities as "lobbying solely 'in the public weal'."

I think that is a very good way to put it. Yet we seem to be trying to draw a dichotomy between Federal lobbyists and State and local lobbyists. We exempt Federal lobbyists from the bill and we do not exempt the organizations of the other levels of government.

I think it is very important that these national organizations, which are extensions or instrumentalities of the States and the localities, be involved in this Government. They compliment the work being done by many individual State, county, or city offices in Washington. This bill exempts individual State or local government representatives and yet it includes the organizations which serve as a collective office in Washington for those smaller jurisdictions who cannot afford special representatives.

The Santini amendment will preserve the public-private differentiation by excluding all associations financed by public funds. I can attest that one organization—the National Association of Counties—fully discloses all its finances and activities. As the former president of NACo, I became very familiar with the association's activities, and of the activities of the other associations of public officials. These groups are accountable to their elected officers and hide nothing from public scrutiny.

Mr. Speaker, I believe it is significant that the Advisory Commission on Intergovernmental Relations, has undertaken a study of lobbying by public bodies at all levels of government. This study will include recommendations for appropriate actions by Congress and State legislatures. The ACIR has asked the Congress to exempt national organizations

of State and local government officials until they have completed their study.

Mr. Chairman, I believe the Santini amendment is extremely important, and because he stated it so articulately, I would like to quote a statement of Judge Gesell, in a case involving the current lobbying act.

The involvement of cities, counties and municipalities in the day-to-day work of the Congress is of increasing and continuing importance. The court must recognize that the voice of the cities, counties, and municipalities in Federal legislation will not adequately be heard unless through cooperative mechanisms such as plaintiff organizations they pool their limited finances for the purpose of bringing to the attention of Congress their proper official concerns of matters of public policy.

For goodness sake, let us not turn our backs on the people who are serving the very same people who elected us to this Congress. We here do not have all the answers. They do not have all the answers. We need to be working together.

Mr. SANTINI. Mr. Chairman, will the gentlewoman yield?

Mrs. SPELLMAN. I am delighted to yield to the gentleman from Nevada.

Mr. SANTINI. First of all, Mr. Chairman, I wish to commend the gentlewoman for presenting an excellent statement. I think she is right on target.

I would like to reiterate the fundamental issue, at least as this Member in his limited intellect perceives it.

We are talking about disclosure, disclosure that is the thrust of this entire legislation.

When we consider disclosure, that is what is being carried out by these associations day in and day out, week in and week out, and month in and month out. Nothing in this bill goes any further than the present disclosure activity and actions of all these associations.

If it is necessary to have disclosure, that is what is being done. What we are asking for here is to have them do it twice.

What the opponents of the amendment, I feel, are doing is to allow their judgments in terms of the logic of either supporting or not supporting the amendment become influenced by long-standing grievances or antagonisms or hostilities to local government.

Mr. Chairman, I do not think that ought to be the issue. I think the issue is whether or not we have disclosure, and the fact is that we have abundant disclosure.

The CHAIRMAN. The time of the gentlewoman from Maryland (Mrs. SPELLMAN) has expired.

(By unanimous consent, Mrs. SPELLMAN was allowed to proceed for 1 additional minute.)

Mrs. SPELLMAN. Mr. Chairman, may I point out that I was president of the National Association of Counties, and as a result of my service in that office I can tell the Members there is no question of disclosure and there was nothing hidden from the public. There is nothing hidden from the public by elected officials around the country.

So if it is the word, "disclosure," we are talking about, we are wasting our time. That disclosure is already being carried out by all these organizations with which we are concerned.

Mrs. FENWICK. Mr. Chairman, will the gentlewoman yield?

Mrs. SPELLMAN. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I thank the gentlewoman for yielding.

If what the gentlewoman says is true, why do the associations object to registering as lobbyists? Nobody would stop them from lobbying.

Mrs. SPELLMAN. The answer is because we are already spending public funds for the disclosure in which we are involved now. Why should we continue to waste public funds?

Mrs. FENWICK. Why are we wasting public money? We are spending money apparently for an organization down here, and I do not see any reason why the organization should not report what it is doing.

Mrs. SPELLMAN. That is just the point. The organization down here is already telling the public what it is doing.

Mrs. FENWICK. If this were required, it would not cost a dime. They could simply duplicate the information and send it to the other place.

Mrs. SPELLMAN. Certainly my colleague, the gentlewoman from New Jersey (Mrs. FENWICK), knows that the more forms that are involved, the more money it costs. We are not talking about dimes. This is just another poor excuse for reaching into our taxpayers' pockets.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in order to ask the sponsor of the amendment a question.

Are the people, those who would be exempted under the gentleman's amendment, elected officials?

Mr. SANTINI. Mr. Chairman, if the gentleman will yield, they are representatives of elected officials.

Mr. FASCELL. Are they employees of either the municipality, the county, or the State under the regular system of employment of those political units?

Mr. SANTINI. No.

Mr. FASCELL. Are they private contractors?

Mr. SANTINI. Mr. Chairman, if I may elaborate on this, if they were employees, they could hire an attorney downtown to represent city "X" and have the attorney come in and lobby, and he does not have to disclose a thing. But we could not have the association do it, and I do not find that inherently logical.

Mr. FASCELL. I do not find that to be awkward at all. Lobbying is lobbying, and that does not bother me. Whether it is lobbying does not bother me.

Mr. SANTINI. One does not have to disclose anything at all, and the other is making disclosures every day.

Mr. FASCELL. I am not going to the thrust of the bill; I am just asking the gentleman about his amendment.

So the people who are being exempted are private contractors; is that correct?

Mr. SANTINI. No, they are associations.

Mr. FASCELL. Associations or private contractors?

Mr. SANTINI. I think there is a difference between associations and private contractors. I am sure the gentleman would agree with that.

Mr. FASCELL. It depends upon, of course, who is paying and how they are getting paid and who we are talking about having to be covered. The gentleman is talking about the association being exempt?

Mr. SANTINI. Yes.

Mr. FASCELL. The persons who would be exempt are not elected officials or government employees, in the sense that we understand it?

Mr. SANTINI. Correct.

Mr. FASCELL. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nevada (Mr. SANTINI).

The question was taken; and on a division (demanded by Mr. SANTINI) there were—ayes 28, noes 33.

Mr. SANTINI. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. RAILSBACK

Mr. RAILSBACK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAILSBACK: On page 39, after line 7, add a new paragraph:

(c) The report covering the fourth quarter of each calendar year shall also include a separate schedule listing the name and address of each organization or individual from which the registered organization received an aggregate of $3,000 or more in dues or contributions during that calendar year and listing the amount given, where (i) the dues or contributions were expended in whole or in part by the registering organization for lobbying communications and solicitations and (ii) the total expenditures reported by the organization under section 6(b)(2) during the year preceding the year in which the registration is filed exceed 1 percent of the total annual income of the organization: *Provided*, That the organization may, if it so chooses, instead of listing the specific amount given, state the amount, in the following categories: (A) amounts equal to or exceeding $3,000, but less than $10,000; (B) amounts equal to or exceeding $10,000, but less than $25,000; (C) amounts equal to or exceeding $25,000, but less than $50,000; (D) amounts equal to or exceeding $50,000. *Provided further*, That any organization registered under this Act or any organization or individual whose contribution to a registered organization would otherwise be disclosed under this paragraph may apply for, and the Comptroller General may grant, a waiver of the reporting requirements contained in this paragraph upon a showing that disclosure of such information would violate the privacy of the contributor's religious beliefs or would be reasonably likely to cause harassment, economic harm, or other undue hardship to the contributor."

Mr. RAILSBACK. Mr. Chairman, H.R. 8494 does not require reporting by lobbying organizations of their major con-

tributors, those most likely to have the greatest impact on the organization's decisions. In this respect, the bill represents a step backward from the 1946 act, which requires disclosure of contributions $500 or more. It invites the establishment of front organizations that mask the real source of lobbying activities. Without disclosures of major contributors, for example, it would be difficult to know that the Calorie Control Council is an organization which receives its principal financial backing from soft drink manufacturers opposing the saccharin ban; or that the Electric Consumers Resource Council is financed by the big electric industry; or that the Natural Gas Supply Committee is supported by the major oil companies. Without a requirement that major contributors to lobbying organizations be disclosed, there will be no way to identify the major backers of Citizen's Choice, Common Cause, or Ralph Nader's Congress Watch—organizations which purport to represent a broad public interest.

To us, the constitutionality of such a requirement is clear. Speaking for the majority, Chief Justice Earl Warren wrote in the 1954 Court decision upholding the constitutionality of the 1946 act:

> Congress has not sought to prohibit (any lobbying activities) . . . It has merely provided for a modicum of information from those who for hire attempt to influence legislation or who collect or spend funds for that purpose. It only wants to know who is being hired, who is putting up the money, and how much . . . United States v. Harriss, 347 U.S. 612, 625, 74 S. Ct. 808, 816 (emphasis added).

Indeed there is ample precedent for such a requirement in the Federal campaign laws which require each of us to disclose our major contributors.

During consideration of a similar lobby bill in the 94th Congress, an amendment was adopted on the House floor which required disclosure of significant contributions in an effective, even-handed fashion. Our language is along these lines, applying only to those organizations spending more than 1 percent of their budget on lobbying.

Further, our amendment limits disclosure to major contributors; only those $3,000 and above. In addition, disclosure in ranges of amounts will be permitted, rather than specific dollar figures. Thus, the magnitude of contributions will be revealed, but proprietary information will not be disclosed as might result if the dues schedule and the precise dues paid to the lobbying organization were made public.

Mr. McCLORY. Mr. Chairman, I rise in strong opposition to the proposed amendment to require a lobbying organization to disclose its members and major contributors.

This amendment is unwise, unnecessary and, very likely, unconstitutional. It would have a severe chilling effect on the ability of numerous organizations—including churches, educational institutions, business groups, public interest groups, civil rights organizations, and others—to raise needed funds.

Today as public faith and trust in the Government continues to decline, we should be encouraging participation in the legislative process by all groups in our society. Yet this amendment will have the opposite effect—it will discourage participation.

In NAACP against Button and numerous other cases, the Supreme Court has recognized the importance of the confidentiality of membership lists and the severe chilling effect compulsory disclosure can have upon groups that advance unpopular positions.

The proposed disclosure provisions cannot survive the exacting scrutiny which the Court has held is necessary in order to be constitutional. People join and contribute to organizations for a variety of reasons—many of which are unrelated to the lobbying activity of the organization.

The only justification that has been advanced is that the public has a right to know who are the major backers of the organization. But standing alone this right to know is not sufficient to overcome basic first amendment rights. In Talley against California the Supreme Court upheld the right of anonymous speech and pointed out that the Federalist Papers, supporting the adoption of our Constitution, were written anonymously.

The decision in Buckley against Valeo, and the disclosure provisions in the campaign laws, does not provide support for this amendment. Indeed, Buckley recognizes that compulsory disclosure is permissible only when there is an overriding and compelling need to be served by such disclosure. There have been no findings of corruption and illegal activities such as those which justified the disclosure provisions of the campaign laws. We merely have people who organize to petition the Government. This is a right protected by the first amendment—one that should be encouraged, not prohibited or restricted.

Mr. Chairman, this is a very, very bad amendment. The maliciousness of it is indicated in the last part where it says that if a person feels that he would be subject to harassment or some kind of retribution because of the disclosure which is required, that there might be a waiver accorded to such a person. In other words, the implication is that disclosure could very well threaten harassment of a person; it could embarrass, perhaps, his religious beliefs, or could cause economic harm or undue hardship to the individual.

Someone suggested to me the possibility that if a person was employed by a large lumber company, for instance, and decided that he wanted to contribute $5,000 or $3,000 to preserve the redwoods, he would have his name disclosed in the public record, unless he was able to get a waiver and thereby be subject to harassment in his employment—along with a good possibility of losing his job. All this simply because he was responding to his conscience.

But, there is no reason, just because persons decide that they want to contribute to any type of organization, that we have to require them to be subjected to public scrutiny. This is not the purpose of this legislation. It is not intended to invade the privacy of individuals with regard to whatever their motivations might be.

Church groups, public interest groups, colleges and universities, and businesses have all expressed their concern over the adverse impact of such a provision. Indeed, if this amendment is successful, any group which supports an unpopular cause will find it difficult to obtain financial supporters.

Finally, I do appreciate the fact that the gentleman has tried to overcome the religious implications which this amendment would otherwise have, but I do not think that his attempt to accomplish this goal is adequate, because the person may get a waiver or he may not get a waiver.

Mr. Chairman, simply stated, this is a very bad amendment, and I urge that it be defeated.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from California.

Mr. PANETTA. Mr. Chairman, I have a question. I support many of the arguments that have been made by the gentleman. The question that bothers me is the fact that the argument has been made about looking backwards to the 1946 law, which requires disclosure of contributions in excess of $500. I am wondering if the gentleman could explain whether, in fact, we are wiping out that requirement, or what exact change has been made with regard to this bill and that requirement.

Mr. McCLORY. I think that, in effect, what we are doing in this legislation is substituting this legislation for the existing legislation. But, this would be a violation of the decision made in the NAACP case, where an attempt was made to force the NAACP to disclose its membership list. I think the Supreme Court sustained their right to retain the privacy of it.

Mr. PANETTA. Do I understand that a court decision has in fact invalidated the 1946 law?

Mr. McCLORY. Yes, effectively this is true. Only if the principal business of an organization is lobbying would it have to disclose a contribution. Otherwise, with regard to a religious or charitable organization that might incidentally do some lobbying, it would not be required to disclose under this legislation unless this amendment is adopted.

Mr. PANETTA. My point would be this: Are organizations or contributors under the 1946 law being required to disclose those contributions?

Mr. McCLORY. Only if they are just strictly lobbying organizations. That is my understanding.

Mr. DANIELSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I rise in opposition to the amendment by the gentleman from Illinois. In my opinion, the constitutional issue here is very clear. The Supreme Court has stated, in NAACP against Alabama, that "compelled disclosure of affiliation with groups engaged in advocacy may constitute an effective restraint on freedom of association."

During the course of the Commerce, Consumer and Monetary Affairs Subcommittee investigation which I mentioned earlier today, the issue of disclosure of membership and contributor list came up. The questionnaires which were sent out to the business community to further this oversight investigation of the IRS asked for voluntary responses concerning trade association membership as it may affect the tax deductions of the corporation. This question was designed to focus on the dollar magnitude of the possible nondeductible portion of dues paid to trade associations which are active in grassroots lobbying. However the subcommittee had no authority to compel disclosure of these memberships, in light of the Supreme Court decisions. Indeed a better method for obtaining this information, which was subsequently adopted by the subcommittee, was to send a request to the trade associations directly, asking whether a substantial part of their activities is devoted to grassroots lobbying and if so, what percentage did it constitute and what was the total amount of dues received. This enabled the subcommittee to determine the total nondeductible portion of dues paid by corporations and accomplish the result without any improper inquiry into membership lists.

It is clear that such memberships are disclosed by the dues payer to the Internal Revenue Service in support of a tax deduction for the membership dues. However, disclosure to the IRS, with all the attendant protections for taxpayer information is a very different matter from disclosure to the public as is proposed in this amendment. Just as our subcommittee had no authority to compel answers to the question concerning trade association memberships, this body cannot compel disclosure of member and contributor lists in this bill.

Mr. DANIELSON. Mr. Chairman, I rise to oppose this amendment reluctantly because my good friend the gentleman from Illinois, TOM RAILSBACK, and I have worked very long and hard on this legislation. Generally, we see eye to eye but I must respectfully submit that there are at least two or three things that are wrong with the amendment.

First of all, Mr. Chairman, I seriously question the constitutionality of the amendment, if it were adopted, simply because the requiring of the disclosure of the name and address of the organizations and individuals from whom the registered organization receives an aggregate of $3,000 or more. Of course, that would exclude the small donors but, at the same time, it would cut off, it would effectively dampen the enthusiasm of somebody in their willingness to do so, or the willingness of someone who would like to make a more substantial contribution to the organization, particularly if the cause might be a popular one. Let us face it, when a cause is popular you do not need much lobbying to bring in all the necessary funds. It is the unpopular causes that need to have some public support and that therefore need lobbying.

Further, as the legislation is drafted the amendment is truly ineffective because you will note there is a proviso in the last portion of the amendment that states:

*Provided further,* That any organization registered under this act or any organization or individual whose contribution to a registered organization would otherwise be disclosed under this paragraph may apply for, and the Comptroller General may grant, a waiver of the reporting requirements contained in this paragraph upon a showing that disclosure of such information would violate the privacy of the contributor's religious beliefs or would be reasonably likely to cause harassment, economic harm, or other undue hardship to the contributor.

Who is going to determine precisely what a contributor's religious beliefs are? Who is going to be able to explore what somebody means in order to find out whether he has a valid religious belief that should be honored by the Comptroller General, or who has a religious belief that the Comptroller General can ignore?

Further, I respectfully submit who is responsible for a person's claim that this would be reasonably likely to cause harassment, economic harm, or other undue hardship to the contributor?

I respectfully submit that anybody could draw up a petition pointing out how the disclosure of his name and address and the amount of his contribution is reasonably likely to cause harassment, economic harm, or other undue hardship. They can show that they are likely to cause any one or more of these various contingencies.

Clearly, inasmuch as we do have a provision, first of all, of a threshold of $3,000, and, secondly the specific exception above that what we really have is simply a gesture rather than an amendment because what it amounts to is it is voluntary. If anybody wants their name and address to be disclosed, or their contribution to be disclosed, they can do so but, if it does not want this disclosed then he can seek privacy through an expenditure of less than $3,000, or the fourth contingency in the amendment.

I, therefore, respectfully submit that the amendment should be turned down.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman, I thank the gentleman for yielding. Would the gentleman care to speculate on how the situation would be handled where a corporation who chose to make a decision not to handle their activities in the normal way they do today but decides to set up a funding organization and bankroll this in order to have its special interests presented to Members of the House and the Senate, would they escape the whole impact of real disclosure if we do not pass this amendment?

Mr. DANIELSON. They probably would but, at the same time, if they are going to be devious enough to work out such an arrangement, as you mention, what is to keep them from seeing to it that a number of people contribute an amount less than $3,000 each, or that any or all of them rely upon the privacy of the individual contributors beliefs, et cetera?

Mr. GARY A. MYERS. Does the gentleman then say that they probably would be able to escape?

Mr. DANIELSON. Yes; it is my cynical opinion, in this day and age that a person can work his way around almost any law or regulation if he works hard enough at it. I do not think that it impossible to find a way around that provision that is referred to in the hypothetical situation posed by the gentleman from Pennsylvania (Mr. GARY A. MYERS).

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. GARY A. MYERS and by unanimous consent, Mr. DANIELSON was allowed to proceed for 1 additional minute.)

Mr. GARY A. MYERS. If the gentleman would yield further, the concern I have is that everyone has been speaking in terms of individuals, and I can agree there is some concern that should be expressed that way, but it would appear that if we recognize there is a large loophole for corporate evasion of this whole act, absent some sort of provision like this, then we cannot argue the merits of this amendment solely on the basis of individual rights to privacy, and so forth. We ought to recognize that potential loophole as well.

Mr. DANIELSON. It has been very difficult to put this bill together, because we are treading close to the zone of the first amendment. But I think the way we now have it structured, it meets those requirements. It is perfectly valid. I am most reluctant to see us put in amendments that push us into the first amendment protected area, and I submit that this could be one of those.

Mr. GARY A. MYERS. I thank the gentleman.

Mr. MOORHEAD of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I believe this amendment to be one of the worst that we will face during the time that we consider this legislation. It will have a severe chilling effect on groups that support unpopular causes, that is, civil rights groups, environmentalists, business groups, colleges and universities, and

others that are even more exotic in nature than those. It will discourage them from forming into groups for the purpose of lobbying efforts.

The Supreme Court has recognized the sanctity of membership lists and the right of anonymous speech, for example, in the NAACP case of Bates against Little Rock and Talley against California. There is no overwhelming or compelling Government interest that would permit such an intrusion into the area protected by the first amendment to the Constitution. There is no rational relationship between disclosure of contribution and position taken by an organization on any particular issue.

People join groups for a variety of reasons, many of which may be unrelated to the lobbying activities. For example, under this amendment we have exempted people who could show that they would violate the rights of privacy of the contributors' religious beliefs, or would reasonably likely cause harassment, economic harm, or undue hardship. At the same time if a person belonged to the Presbyterian Church, if he believed in the basic tenets of that church and yet he was opposed to the lobbying efforts of the church, he might not want to be listed as a tither or a basic contributor to the church organization in regard to lobbying activities, but he might believe 100 percent in the tenets of the church as far as his religious beliefs were concerned.

The same thing would be true of the Catholic Church or any other major religious organization that would not be able to be exempted under this clause, and yet their listing of contributions to that organization would make it appear that they stood for things that they did not stand for, and this could cause them embarrassment.

Other organizations that are opposing this legislation, such as the ACLU, Congress Watch, U.S. Chamber of Commerce, Consumer Federation of America, National Urban League, the National Association of Manufacturers, Environmental Defense Fund, and other religious organizations, have many people belonging to them who do not support all of their lobbying efforts but support the basic thrust of the organization itself. Many people belong to the Sierra Club who contribute large amounts to it because they like their program of helping to save the environment, of building trails in the mountains, and encouraging outdoor activity, but they may very drastically disagree with them on some of their lobbying proposals.

I think that to require the reporting of contributions to organizations not only distorts the basic situation, but it takes away some basic constitutional rights that individuals have in this country. It contributes nothing to the legislation and creates great harm.

Mr. Chairman, I ask for a "no" vote.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. MOORHEAD of California. I yield to the gentleman from California.

Mr. WIGGINS. I thank the gentleman for yielding.

I fully endorse the gentleman's remarks and wish to associate myself with them. This is as bad as any amendment that has been proposed to the bill.

Miss JORDAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

We have heard summarized many of the deficiencies which are apparent in this amendment. I would repeat one or two of them. The Members heard some mention of how this applies in the teeth of the standard that was set in NAACP against Alabama. What was that standard, in plain English?

The court said that if the State has an interest in the activity being considered legislatively that that State interest must be subject to such exacting scrutiny that hardly anything gets through the door. In other words, there must be a relevant correlation between the interest of the State and the information which must be disclosed.

The Railsback amendment says that we require disclosure of a list of contributors. Where is the State's interest in this probing into a list which ought to remain private? It is not there.

There was no testimony whatsoever before the subcommittee in consideration of this bill that contributors to organizations had somehow unduly influenced the policies of those organizations and ought to be subject to some regulation on the part of the State.

Shelton against Tucker is another case we ought to keep in mind. What did the Supreme Court say in that case? Even though the governmental purpose be legitimate, let us say that it is legitimate for us to require disclosure of lobbying activities, the Court said that even if what the Government is doing is legitimate, the purpose cannot be pursued by means that stifle fundamental personal liberties. The Court said that we had to be so exacting, so careful that the personal liberties of not one single individual in this country would be subjected to the kind of harassment and invasion that could occur if this amendment were to come about or to be attached to this bill.

What are some of the other deficiencies? Out of the air we have the figure of contributions of $3,000 or more to be revealed. There is nothing that requires that that contributor of the $3,000 or more have any influence on the policy of the organization. The 1-percent figure, $3,000 contribution, provided the contributor contributed at least 1 percent of the total annual budget of the organization, how in the world is the Comptroller General going to be able to determine which constitutes 1 percent of total budget immediately upon the time of filing being required under this amendment?

It would be well nigh impossible until the organization had been in existence some 2 or 3 years before you could ever decide this figure constituted 1 percent of the total budget, because that would not be known at the time of the first registration.

Also, 1 percent of a budget of say $250,000 would be one figure. One percent of a budget of $100,000 would be another figure. We are requiring disclosure of all of these contributors, whether they impact one way or the other on the policy of the organization.

Then the final part of this argument turns the Constitution on its head.

The CHAIRMAN. The time of the gentlewoman from Texas (Miss JORDAN) has expired.

(By unanimous consent, Miss JORDAN was allowed to proceed for 3 additional minutes.)

Miss JORDAN. So, Mr. Chairman, we have listened to what the Supreme Court had to say to us. We have said that we are going to be exacting in what we require when we begin to abrogate certain freedoms people have, and then we come to a part of the language in this amendment that says even though we have been exacting, we Members of Congress, we representatives of the people, say to the Comptroller General, "If you feel in your discretion that this is not a good idea for the contributor to reveal himself, then you may waive that requirement under this amendment."

Whoever heard of the Comptroller General sitting as the decider, the final arbiter, of whether our personal freedoms are going to be violated by some law that was passed by the Congress of the United States?

Mr. Chairman, I would like at this time to yield to the gentleman from California (Mr. EDWARDS), a member of the Committee on the Judiciary, for some remarks on this amendment.

Mr. EDWARDS of California. Mr. Chairman, I thank the gentlewoman for yielding.

I wish to compliment the gentlewoman from Texas (Miss JORDAN) on her remarks, and I would like to be associated with them.

I wish to say a word with regard to what the gentleman from Illinois (Mr. RAILSBACK) said in quoting Justice Warren in U.S. against Harriss. I most respectively suggest that Chief Justice Warren cannot be quoted in support of this provision.

The Chief Justice in U.S. against Harriss was talking about paying those people who directly lobby Congress and about how much they are paid, rather than about contributing to a group which, among other things, lobbies Congress.

For example, under the Harriss language, there certainly is an interest in Congress knowing whether the National Rifle Association hires or retains a lobbyist to lobby for it and in knowing how much he is paid. Likewise, it is within the opinion's scope to require an organization covered by the lobby bill to report which of its lobbies lobbies for it and how much it is paid. These matters are covered by the requirements of the committee bill.

The language of the Chief Justice in the Harriss case does not means that

Congress has a right to require whoever contributes to the organization must fall within the requirements of the lobby bill, and the Chief Justice should not be quoted in support of this amendment.

Mr. Chairman, I thank the gentlewoman for yielding, and I urge a no vote on the amendment.

Mr. RAILSBACK. Mr. Chairman, will the gentlewoman yield?

Miss JORDAN. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, I thank the gentlewoman for yielding.

I listened to the gentlewoman's rather serious and scathing indictment of the amendment.

The CHAIRMAN. The time of the gentlewoman from Texas (Miss JORDAN) has expired.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, may I just say that in reference to the scathing indictment that was just given by the gentlewoman from Texas (Miss JORDAN) concerning the amendment and her reference to the $3,000, I really wonder if the gentlewoman knows exactly what is on the books.

This gets back also to the question asked by my friend, the gentleman from California (Mr. PANETTA): Does it change the existing law?

The answer to that question is that under the 1946 law which is now in effect the following must be reported each quarter: The name and address of each person who has made a contribution of $500 or more, the name and address of each person to whom an expenditure has been made in excess of $10, and the total number of all expenditures and contributions.

I am sorry that I did not get a chance to reply to the gentleman from California (Mr. EDWARDS), but I know he did not have sufficient time. However, I would say to the gentleman from California that all any of the Members have to do is pick up the Harriss case which I cited, and they will find it says this:

> Present day legislative complexities are such that individual Members of Congress cannot be expected to explore the myriad pressures to which they are regularly subjected. Yet full realization of the American ideal of government by elected representatives depends to no small extent on their ability to properly evaluate such pressures. Otherwise the voice of the people may all too easily be drowned out by the voice of special interest groups seeking favored treatment while masquerading as proponents of the public weal. This is the evil which the lobbying Act was designed to prevent.
>
> Toward that end, Congress has not sought to prohibit these pressures. It has merely provided for a modicum of information from those who for hire attempt to influence legislation or who collect or spend funds for that purpose. It wants only to know who is being hired, who is putting up the money, and how much.

That is the majority decision.

And then there has been a more recent decision that dealt with exactly the same issue, and which is a State court decision. They cited the Harriss case to the effect that there is nothing wrong and nothing unconstitutional about requiring disclosure of contributors. I will cite that case when I can find it.

But it bothers me that so much is being made out of this amendment with the exemptions that are contained therein, where the existing law actually requires contributors of more than $500 to report right now.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, the Chief Justice was talking about people who pay a lobbyist. The gentleman from Illinois (Mr. RAILSBACK) is talking about contributions to an entire organization, not just to pay a lobbyist. It is entirely different, and the quote from the Chief Justice should not be used in support of the amendment.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman for his contribution. I am not certain myself whether I support or do not support the amendment offered by the gentleman from Illinois. But I think in some situations it has some merit. As an example, there are organizations that are formed with a fine title that indicates that they represent the interests of the elderly. It turns out that it really is a group of labor organizations which has a front organization that rates Members of Congress and then sends out to the voters in the district of the Members so-called ratings based on their voting record supposedly as to whether they favor the elderly or people in favor of conservation issues, and so forth. There have even been rumors that some political parties have tried this device of having front organizations rate Members of Congress on what appear to be very important issues, like the elderly and conservation, when really the whole exercise is a political exercise to try to discredit incumbent Members.

For that reason, maybe this is a good idea.

Mr. WIGGINS. Mr. Chairman, I move to strike the requisite number of words, and I would be glad to yield to the gentleman from Iowa (Mr. BLOUIN) not more than 2 minutes.

Mr. BLOUIN. I thank the gentleman for yielding.

Mr. Chairman, I would like to put a question to my friend, the gentleman from Illinois (Mr. RAILSBACK), in regard to the comment that the gentleman from California (Mr. EDWARDS) just made, if the gentleman will yield for a question only.

Mr. WIGGINS. I yield to the gentleman from Iowa.

Mr. BLOUIN. Mr. Chairman, does the gentleman's amendment speak to, as has been stated, all contributions to the organization across the board, or is it just addressed to those funds that go into lobbying? I think that is a very important point, and I would like to be able to give the gentleman time to clarify that.

Mr. RAILSBACK. Mr. Chairman, if the gentleman will yield, it really does not require the reporting of expenditures. But, as I am sure the gentleman knows, it relates to the reporting of certain major contributors, and it would be where the dues or contributions were expended, where they were expended in whole or in part, by the registering organization for lobbying communications and solicitations. And then the total expenditure is reported by the organization under 6(b)(2) during the year preceding the year in which the registration is filed exceed 1 percent of the total gross income of the particular organization. So at least some of the money has to be spent for lobbying.

Mr. BLOUIN. Just to make sure that I understand and then I will be finished. If 1 percent of the total budget of whatever the organization is, is spent on lobbying, then any person who contributes $3,000 or more to the organization, per se, shall be subject to this disclosure, and only that; is that correct?

Mr. RAILSBACK. If the gentleman will yield further, the way it would work is that it would relate to more than 1 percent of the gross income, not the budget, but the gross income of the particular organization. In addition, because there were some objections by Ralph Nader, frankly, the public citizen, and some of the other organizations that are against the concept, we decided to permit a waiver where there could be a disclosure of a religious preference.

Mr. WIGGINS. Mr. Chairman, I reclaim my time. I refuse to yield any further.

The gentleman's question has been answered. The answer is "Yes."

Mr. BLOUIN. Mr. Chairman, I ask unanimous consent that the gentleman from California (Mr. WIGGINS) be given whatever time we have used up.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The CHAIRMAN. The gentleman from California (Mr. WIGGINS) is recognized for 3 additional minutes.

Mr. WIGGINS. Mr. Chairman, I hope not to use all of that time.

I did want to make the very point that was just made. We are requiring a disclosure of major contributions if only 1 percent of the activities are lobbying in nature, which distinguishes it clearly from the 1946 act.

The 1946 act is what we, the Congress, said it was; but it was interpreted by the Supreme Court. The Court strained to the utmost to save that act from a declaration of unconstitutionality. The Court confined the act to those individuals who engage primarily in lobby activity. Accordingly, under the 1946 act, 100 percent of the amount contributed and reported was directed to lobby activities.

Under the Railsback amendment, only 1 percent must go to such activities.

Mr. Chairman, my friend from Texas, Congresswoman JORDAN, quoted several opinions that I wish I had quoted because they are equally applicable to this bill as a whole, not just to the Railsback amendment. This entire bill is required to be subjected to the most exacting scrutiny to identify a compelling public interest, as the gentlewoman from Texas has said. More over the bill must be carefully drafted to serve that identified interest.

The bill fails, just as the Railsback amendment fails, a test of casual scrutiny, let alone exacting scrutiny. I hope the Railsback amendment is defeated as well as the bill.

Mr. WRIGHT. Mr. Chairman, I move to strike the requisite number of words.

(By unanimous consent, Mr. WRIGHT was allowed to speak out of order.)

FURTHER LEGISLATIVE BUSINESS FOR TODAY AND TOMORROW

Mr. WRIGHT. Mr. Chairman, I take this time merely to announce my understanding that it is the intention of the manager of the bill, upon the disposition of this amendment, to move that the Committee shall rise. That would conclude the legislative business for today.

It would be the purpose of the leadership on tomorrow, coming in at 11 o'clock a.m., to complete consideration of this bill and to complete action on the farm credit bill.

Having done those two things tomorrow, the business of the week would have been concluded.

Mr. DANIELSON. Mr. Chairman, I ask unanimous consent that all debate on this amendment and any amendments thereto conclude at 6:40 p.m. today.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was made will be recognized for approximately 1 minute and 15 seconds each.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, I mentioned that there had been a recent State court case, and at the time I mentioned it I did not have the name of that case. Now, I would like to cite it.

It is in *Fritz* v. *Gorton* (83 Washington 2d, 275), in which there was an appeal to the Supreme Court, which was dismissed in 1974.

The Supreme Court confirmed that decision in sustaining the State court decision upholding the disclosure of major contributors to lobbying organizations. This involved a lobby disclosure act of the State of Washington, which required the disclosure of contributors of more than $500 annually to a lobbying organization. It held that that requirement was constitutional, and it seems to me that that, in addition to the language of the Harriss decision, really should lay to rest—or I hope lay to rest—the constitutional question.

(By unanimous consent, Mr. VOLKMER yielded his time to Mr. DANIELSON.)

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I think some of the objections to this amendment have already been taken care of in the debate. The $3,000 annual contribution is not going to amount to more than the reporting of numerous individuals who hardly are in a position to control the policies or lobbying efforts of the organization they choose to support. It also has been established eloquently, and with great scholarship, by the gentlewoman from Texas (Miss JORDAN) that the Supreme Court has consistently recognized the sanctity of membership lists, and rights of anonymous free speech.

Mr. Chairman, I rise in opposition to the amendment. While I have the utmost respect for the gentleman from Illinois (Mr. RAILSBACK), this amendment is ill advised from both a practical and a constitutional standpoint. I am mindful of a similar amendment passed by a larger margin the last Congress and with my support, but iet me state briefly the reasons for my opposition.

First, Mr. Chairman, proponents of this amendment argue that the public should know who are the major financial backers of various lobbying efforts. They talk of control behind a given organization. But if that is the case, why is the threshold level in this amendment set so low? A $3,000 annual contribution figure is certainly going to result in the reporting of numerous individuals who are hardly in a position to control the policies or lobbying efforts of the organization they choose to support.

Second, the figure is set so low that in the case of some organizations, a complete membership list might be required to be disclosed. The Supreme Court has consistently recognized the sanctity of membership lists and the rights of anonymous free speech in such cases as: NAACP against Alabama; Bates against Little Rock; Shelton against Tucker; and Talley against California.

I am also deeply concerned about the impact that this amendment could have on the ability of organizations to raise money. This amendment would undoubtedly discourage contributions to churches, colleges and universities, environmental groups, public interest groups, and civil rights groups. Does disclosure justify such a serious adverse side effect?

Further, there is no rational relationship between disclosure of a contribution and the position taken by the organization on any particular issue. Our constituents join groups for a variety of reasons—many of which may be totally unrelated to the lobbying activities of the organization. Churches, environmental groups, and public interest groups are all multipurpose organizations. Thev will register and report under this bill. But are all the contributions they receive over $3,000 specifically intended to support their lobbying efforts? Of course not—the contribution in most instances is in the nature of general support for an organization's overall purpose.

Finally, Mr. Chairman, I would state that this amendment is not prompted by any evidence of corruption or illegality, such as that which justified the campaign financing disclosure laws. So, there is no compelling governmental interest that would permit such an intrusion into an area protected by the first amendment.

I urge a "no" vote on the amendment.

The CHAIRMAN. The Chair recognizes the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. Mr. Chairman, I just urge a no vote on the Railsback amendment. Commonsense, good sense, judgment, requires that we vote no on this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Chairman, I wish to associate myself and agree with the remarks of the gentlewoman from Texas (Miss JORDAN) and the gentleman from California (Mr. EDWARDS) in earlier debate on this amendment. We have already done this bill bodily harm by including grassroots lobbying in the coverage of the bill. If this amendment were to be added to it, the bill would be worthless, and would go nowhere because it would not ever become law and be upheld by the courts.

I would certainly say that when we are trying to balance constitutional considerations, as we are in this matter, that if we are going to be in error, let us be in error in the direction of preserving the individual liberties and constitutional rights of individual Americans. By defeating this amendment, we can assure ourselves of being on the right side.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Chairman, I regret very much the conflict that has been set up between elements that, frankly, I am sympathetic with. I do not know how we can have an effective disclosure bill with regard to lobbying without disclosing who it is that is financing the lobbying. I just do not know how we can do it.

But I have been given a moment for thought by my good friends that even the invasion of privacy, that they are afraid of is involved here. I do not understand how you can pass a law that permits anybody to contribute $100 to a candidate, even an unpopular candidate, why we cannot require an organization to report that they contribute 1 percent of their budget. This amendment is not drawn exactly the way I offered the amendment in the subcommittee, but it is drawn carefully enough that it deserves support. I think that an effective lobbying and registration act requires that we know who is financing the lobbying.

The CHAIRMAN. The Chair now recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Chairman and members of the committee, I urge a no

vote on this amendment, and I yield back the balance of my time.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not wish to take the full 5 minutes, but there was a concern that I thought ought to be expressed. It is the concern that an organization that is engaged in a mixture of lobbying activities and other activities that it would seem to me that even if this amendment were to pass, that that organization would have the right to form itself in such a way that it could identify itself specifically to handling its lobbying activities through a subsidiary organization, keep those lobbying activities in that subsidiary and have all of their other activities carried out in another organization and that then that subsidiary organization would lobby and contribute toward certain aims and that that could be preserved and protected.

I hope that that would be taken into consideration.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

The question was taken; and on a division (demanded by Mr. RAILSBACK) there were—ayes 26, noes 41.

So the amendment was rejected.

Mr. DANIELSON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore, Mr. NATCHER, having assumed the chair, Mr. MEEDS, Chairman of the Committee of the Whole House on the State of the Union reported that that Committee, having had under consideration the bill (H.R. 8494) to regulate lobbying and related activities, had come to no resolution thereon.

## VA-HOSPITAL SYSTEM AT CROSSROADS

(Mrs. SPELLMAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SPELLMAN. Mr. Speaker, today, the VA hospital system is at a crossroads. The budget proposal for fiscal year 1979 forces us to consider the future role of the VA in providing medical care. Are our veterans, who have served the Nation faithfully, to be rewarded with inferior institutions, which will eventually turn into medical slums? The question is not rhetorical, but I sincerely hope it conveys a sense of the severity of the cutbacks contained in the proposed VA budget.

Certainly, I am concerned about the beds which would be lost in the State of Maryland, and I am alarmed about the consequences of 3,132 fewer beds and the equivalent of 1,500 lost employees throughout the Nation. But the problems with the budget run much deeper.

I believe a review of past funding and a consideration of present and expected future demand make it clear that this budget cut will have a serious impact on the quality and availability of medical care at VA centers.

Since 1975 the percent of the total Federal budget for the VA has declined from 5 to 3.8 percent, the lowest in a decade. Yet there has been a great increase in the veterans population due to the war in Vietnam. Additionally, older veterans are now requiring more treatment. Is it any wonder, then, that the national rejection rate for VA hospital applicants is 18 percent, and in some areas has reached 40 to 50 percent. Have we not all heard stories of excessive delays in receiving treatment, of jammed waiting rooms? Dr. Herbert M. Rose, national president of the National Association of VA Hospitals has stated firmly that these budget limitations would mean fewer services and diminished quality of care.

The picture that emerges is bleak. The unmistakable institutional stress signs have appeared. Exacerbated by an austere budget, the VA health care system could no longer be expected to continue to provide the exceptional service for which it has become known.

Another example is telling. There have been no new starts this year for VA domiciliaries. Yet a recent GAO report demonstrated the need for these facilities. In this light, it is hard, if not impossible, to justify abandoning 35 construction projects, including the 480-bed nursing home and outpatient complex in Camden, N.J.

There are two other features of the fiscal year 1979 budget about which I have great reservations. The first concerns the elimination of all medical research activities in 64 hospitals, that is, in one-third of all VA hospitals. In medical circles, the connection between research programs and first-rate medical attention is an undisputed truth. The VA, which administers the Nation's largest medical research program has long taken pride in its scientific endeavors which have brought comfort and hope to millions. As you know, just last year this program produced two Nobel Prize recipients, the first time this has ever happened.

But we cannot expect this to continue. The research budget has declined steadily over the past 7 years. Further reductions in personnel and facilities can only hinder the progress of medical science in the Nation, and reduce the level of care at VA institutions.

Finally, I find especially troublesome the proposal to eliminate 667 personnel spaces from the Department of Veterans Benefits. This group handles veterans' claims and processes paperwork to approve schooling and loan programs. A major challenge for us is to lower the very high unemployment rate for Vietnam-era veterans. Undoubtedly, this cutback would be a terrible blow to these men. How can we properly help our young veterans, if we deprive them of a responsive Department to administer the programs established for their benefit?

There is an irony about the fiscal year 1979 budget. The cutbacks were chiefly mandated by the Office of Management and Budget. I share the concern of many of you in containing expenditures, and I welcome the administration's efforts in this area. However, I seriously doubt that the VA budget is the proper place to wield the budgetary axe. Their programs are well run, and are free of scandals. They provide excellent medical attention at a fraction of the cost per bed charged at private hospitals. I, therefore, urge you to restore the budget to adequate levels, so that some of our most deserving citizens can continue to receive the quality medical care for which the VA is known throughout the world.

## TIME FOR A TAX CUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. EDWARDS) is recognized for 5 minutes.

● Mr. EDWARDS of Oklahoma. Mr. Speaker, we are going to hear a lot about tax policy in the weeks and months to come, and through it all there's one question to keep in mind: What has happened to that uniquely American idea of creating economic progress by rewarding those who are willing to work, save and invest—an idea so powerful that it drove our Nation to create more wealth, more evenly divided, than any other in the history of the world?

Most Americans still believe in human progress through individual opportunity, but the runaway growth of Government has just about destroyed the American dream for many small businessmen.

Take a look at the results of the hundreds of Government programs created in the last 15 years—all under the guise of helping the so-called little man. When President Kennedy first took office only about 5 percent of all tax returns were subject to the marginal tax rate of more than 30 percent. Today, Government at all levels takes away in taxes nearly 45 cents of every dollar earned by the American worker. Every increase of 1 percent in the Consumer Price Index raises the rate of taxation by 1.5 percent and, at the rate inflation is pushing people into higher tax brackets, by the early 1980's taxpayers who are now earning $12,000 a year will be paying taxes at a 50-percent rate.

As Government continues to multiply the number of suffocating regulations, siphoning away more wealth every year for its own nonproductive spending, individuals and businesses have that much less to spend on goods and services and to invest in new and more efficient plants and equipment. Government borrowing now soaks up over 70 percent of all the available funds in the Nation's money markets. Is it any wonder that we have a weakened stock market, that we have an inflation problem, that we are losing our markets to the Japanese, whose rate of capital investment is twice our own? Should anyone be surprised that with some U.S. plants nearly a century old, Japanese steelworkers produce, an average, 60 percent more per year than American steelworkers? In America today we are taxing work, growth, consumption, welfare and debt.

The way to stimulate the economy is not through government spending, but through private spending and invest-

ment, and through putting money into savings accounts to increase funds available for private borrowing.

We need a tax relief program of across-the-board tax reductions. I'm supporting a bill that would provide tax cuts averaging 33 percent over the next 3 years in personal income taxes, a 3-percent reduction in corporate taxes, and an increase in the surtax exemption for small businesses from $50,000 to $100,000.

There is a valid argument that we ought not cut taxes until we reduce the national debt, but big government continues to drag the economy down and we've simply got to break the chain. We've got to get the private economy back on its feet. I am convinced that a tax cut is needed now to stop the effects of inflation pushing individuals and businesses into higher tax brackets, and to breathe some new life into our free enterprise system. And I believe these reductions would succeed, in fact, in stimulating even greater Federal revenues instead of increasing the debt—just as they did under President Kennedy—if combined with a serious effort to slow down government spending.

I was delighted to hear the President finally endorse the idea of tax cuts to strengthen the economy, but I was surprised when he said that he and the congressional leadership are "committed" to tax cuts. That same leadership has rejected six separate opportunities during the 95th Congress to pass a tax cut. In fact, just a few months ago the President went on national television to announce he would veto any effort to pass permanent tax relief. (But of course this isn't the first time he's changed his mind.)

Obviously what is important is what kind of tax cut the administration endorses. Right now, it appears that the President's idea of a tax cut is one that will be granted somewhat selectively to partially offset the projected increases in social security and energy taxes, which of course would destroy the whole idea of using a tax cut to stimulate the economy.

And the administration must avoid "tax reform" measures that harm productive sectors of our economy. For example, repealing the tax deductability of home mortgage interest is one of the most shortsighted "tax reform" ideas of all. The housing and real estate sector is growing and "tax reform" at its expense will only fuel inflation while crippling the housing and real estate market.

What it really boils down to is this. Which do we want more, a bigger and more powerful Government, or more individual opportunity in a healthy expanding private economy? That's what the tax debate is all about.●

## SENSELESS SLAUGHTERING OF SEALS MUST STOP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

● Mr. KEMP. Mr. Speaker, I join my colleagues today in expressing my deep concern over the senseless slaughter of the harp seal pups in Canadian waters.

Last year, the Congress sent to the Canadian Government a strong message of opposition to the Canadian Government's continued policies permitting this annual harp seal hunt. Yet this year the total allowable catch has increased by 10,000—up to 180,000. Even the Canadian Government admits that approximately 80 percent of this quota will be filled by "whitecoats"—that is, pups under 10 days old who still have the transparent, pure white fur that will be sold for trinkets and boot trim.

I have introduced new legislation, House Concurrent Resolution 532, which again expresses the U.S. Congress serious reservations over Canada's harp seal policies. This bill has 67 cosponsors, and specifically draws attention to the increased quota.

The arguments against the harp seal hunt are many, and frankly, stem from a sense of the inhumaneness associated with killing defenseless pups less than 10 days old. Even regulated sport hunting does not allow the mass killing of wild animals' young. The obvious counter to this, and the argument that the Canadian Government makes in return, is that the inhabitants of the Canadian Arctic and Greenland and the landsmen of Newfoundland need the revenue from this annual seal hunt to exist during the winter months. What the Canadian Government fails to point out is that less than half of the seal pelts taken in 1977 went to these people. More than one-half were harvested by large Canadian and Norwegian commercial ships. This year the Norwegian quota alone was 35,000 pelts. None of these pelts, or the revenue from them, returns to Canada.

These pelts return to Norway, where they are prepared for the European market. Yet there is strong evidence that the market for seal pelts is severely decreasing due to environmental group protests, even though the Canadian quota for 1978 was increased. In fact, there are numerous reports of 1976 pelts still in storage for lack of buyers, and whitecoat pelts being dyed before they go to auction.

Because of the lack of complete data on the seal population, there are differences of opinion as to the total size of the herds. One thing, however, is known—that the total harp seal population has dropped by approximately two-thirds within the last 20 years. Herds that used to number approximately 10 million at the beginning of the century are now reduced to roughly 1.3 million. "Subsistence" harvest levels now announced by the Canadian Government attempt to keep the seal population at around the 1.3 million level. Yet there is no guarantee that this harvest plan will keep the herd at a healthy size. Observers at the 1977 and 1978 hunts have witnessed seal dams aborting their pups on the ice before their time. It is theorized that these dams, who bear new pups each spring, may be responding to the repeated slaughter of their pups by sealers in previous years. If this situation becomes prevalent, the outlook for the harp seal herds will indeed be grave. Dr. David M. Lavigne, the noted scientist widely quoted by the Canadian Government for his work on the infrared tracking of harp seal populations, stated in the January 1976, National Geographic:

> Although it is still too early to give a definitive answer (about the total harp seal population), it seems clear that the harp seal is in trouble. . . . As our census continues, we see increasing evidence that the western Atlantic harp seal population cannot survive continued harvesting by big factory ships. Perhaps the landsmen, under strict rules, may still go out on the seasonal hunts. But we must work fast to provide reliable figures to hunters and conservationists alike. The survival of the harp seal hangs in the balance.

I strongly urge the Canadian Government to take another look at their policies of encouraging this annual harp seal slaughter. To slaughter a vulnerable species for trinkets and toys is a cruelty beyond belief.●

## "DIRTY DOZEN": A DISCREDITED RATING SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 10 minutes.

● Mr. CLEVELAND. Mr. Speaker, on Saturday, April 8, 1978, the Washington Post was kind enough to publish on its opposite-editorial page a signed column by me dealing with press treatment of campaign activities of Environmental Action's Dirty Dozen Campaign Committee.

And last Monday, April 17, the Post carried a response by Environmental Action's legislative director which represented a nolo contendere plea concerning most of the charges I had raised, and a weak defense to others. At the conclusions of these remarks, I shall introduce both items for the record to enable Members to draw their own conclusions from a point-by-point comparison.

However, the response contained two allegations which further call into question the credibility of the Dirty Dozen Campaign Committee.

First, we find this assertion:

> The votes we use to assess a Congressman's record are selected only after consultation with the national environmental organizations that are the most active and knowledgeable on the subject legislation.

I find this hard to swallow. If we look back a few years—as Enviornmental Action does in attacking those Members on its list—we find that in 1972, the list of votes included:

Five dealing with military spending and the Vietnam war, and 11 votes on miscellaneous "social" issues such as Rhodesian chrome, a consumer protection agency, education appropriations, an OEO extension bill (including child care and legal services), the Equal Rights Amendment, food stamps for

strikers, farm subsidies, House reorganization, health program financing, equal employment opportunity, family planning and contraception research, and campaign practices legislation.

Issues? Yes. Environmental issues? Come on.

Then we find an assertion that in some instances, being named to the Dirty Dozen list prompts a Member to clean up his act, citing my own record since my designation—a nice suggestion that their selections were right in the first place. I find this both offensive and easily disposed of.

Since my designation, I continued to pursue the same balanced concern for both environmental, energy, and economic interests that have characterized my legislative career. In the course of so doing, I merely continued with a number of interests Environmental Action ignored—and indeed was probably unaware of—despite its claim to close scrutiny of Members' activities.

(One of its "good-guy" votes on its 1974 list was for a bill which I personally authored, but which was attributed to another sponsor when it was reintroduced after amendment in subcommittee.)

But more to the point, since my designation I have done the unforgiveable—I have fought back. My efforts have included preparation of a paper on the dirty dozen for the fair campaign practices committee, an op-ed piece in the New York Times and the Post article mentioned above.

Far from trying to ingratiate myself with this fraudulent operation, I have thus courted its continuing hostility. So much for the salutary effects on my voting habits.

A third point relates to my assertion that environmental action has no membership, a conclusion coinciding with that of the Republican Research Committee. Individuals who subscribe to the publication "Environmental Action" are listed by the group as "members." Now, I suppose environmental action can call a subscriber a member, a ring-tailed orangutang or anything else; P. T. Barnum might have had another term for it; I prefer subscriber.

A final and potentially more serious point arises from the fact that the response came not from the Dirty Dozen Campaign Committee but from the legislative Director of Environmental Action, which claims to keep the two organizations separate from the standpoint of compliance with requirements of Federal election law.

This is just one of many instances suggesting that such separation is a fiction, which further raises the question of the legal status of contributions by members if indeed that is how one describes those who sign up for the magazine and send in a check. This bears further examination.

Mr. Speaker, following are the article and the letter to the editor mentioned above:

"DIRTY DOZEN": A DISCRIMINATED RATING SYSTEM

(By James C. Cleveland)

A group known as Environmental Action will soon issue its 1978 "Dirty Dozen" list of House members whose defeat it seeks on allegedly environmental grounds. Response by the press, if it repeats past performance, will be mixed. Most reporting will serve as the uncritical conduit for the charges, while some will provide probing news coverage and commentary discrediting the accusations and their source.

I observed both varieties of coverage as a member of the Dirty Dozen in 1976, which leads me to suggest that, next time around, the press stiffen its skepticism in handling political material from Environmental Action.

After the last election, National Journal's Michael J. Malbin examined charges by House Minority Leader John J. Rhodes (R-Ariz.), also on the 1976 hit list, that rating procedures of most groups were unfair and Environmental Action was the worst offender. Reviewing materials assembled by the Fair Campaign Practices Committee for symposium on political rating groups, he concluded that "they tend to support Rhode's charges."

As to the press, Malbin observed, "the problem with all this is that it is easy in the heat of a political campaign for an opponent—or the news media—to latch onto a label and assume that there is something solid behind it." And Chris Black, Washington correspondent of the Lowell (Mass.) Sun:

"The 'Dirty Dozen campaign' plays upon institutional weaknesses in the press. The gimmicky charge receives page-one play but the denial is buried on the obituary page. And the group uses the widespread assumption that environmental groups are somehow above politics and reproach, although Dirty Dozen proved to be quite different from this perception."

Unintended distortion came with initial coverage strongly suggesting that the 12 on the list were selected on the basis of their environmental voting records. That impression was conveyed by AP, UPI, The Washington Star and particularly The Post, which plugged that line in its headline and lead paragraph. Yet those vote rankings were absolutely meaningless in Environmental Action's own selection process. I made the list although more than 100 others voted equally "wrong" or worse on the votes used. Environmental Action itself concedes that other factors are considered, a fact scarcely alluded to in Washington coverage.

A key factor was vulnerability, Environmental Action argued that it didn't waste time going after occupants of safe seats. But had reporters examined that factor, they would have learned that eight members of the 1976 list won elections in 1974 with a scant 53 percent of the vote or less; one won his 1974 primary with only 55 percent of the vote and the general election with 53 percent, and faced another tough primary in 1976. Those members aren't just unsafe; they're the walking wounded.

Rhodes blasted the ratings, requesting the Fair Campaign Practices Committee to monitor and expose the unfairness involved. That received prominent, fair and balanced coverage in Washington and presumably elsewhere. Later, the press here and across the country gave good exposure to a study entitled "The Rating Game," by the House Republican Research Committee, which for all its overtly partisan origin was an excellent critique of rating groups in general and Environmental Action in particular.

Meanwhile, one of the most perceptive pieces I saw on an individual member was done by Paul Houston of the Los Angeles Times in the case of Burt Talcott (R-Calif.). He found "considerable evidence that, in placing Talcott on the list, Environmental Action had accused Talcott wrongly on several points." Houston added that "there is some merit to his claim that his low Environmental Action rating, which was based on 14 selected votes among dozens last year, distorted his record" (Talcott lost anyway, one of the three on the list to do so.)

Easily the worst in terms of swallowing Dirty Dozen propaganda whole were a patty-cake piece in The New Yorker and a column by Clayton Fritchey, appearing in The Post, which rhapsodized that the Dirty Dozen gimmick ought to be adopted by other interest groups.

In New Hampshire, my designation as one of the Dirty Dozen received prominent play that ultimately proved not damaging. Three solid editorials in New Hampshire dailies bracketing the political spectrum denounced my selection as a dirty deed. Then Chris Black of the Lowell Sun exposed the fact that the Dirty Dozen campaign coordinator had worked for my opponent-to-be in a McGovern campaign. They had discussed the list at least a month before it was issued with the general understanding that I would be included only if he were likely to run. Environmental Action claimed it was misquoted.

My opponent made no issue of the Dirty Dozen or my environmental record in the campaign; he walked away from the issue, saying the Dirty Dozen Campaign Committee was doing its own thing. (I later won with 61 percent of the vote.)

In New Hampshire, Environmental Action's remaining credibility died. The group claimed to have enlisted a number of environmental organizations against me. That made headlines, as did subsequent disclosure that the claim was phony. (Environmental Action again claimed it was misquoted.)

Environmental Action seeks to be a continuing and credible presence on the scene, though it consists mainly of a magazine staff of roughly a dozen, lobbies sporadically and ineffectively, and has no membership. Its political operation is a floating media event. It thus deserves scrutiny in its own right in the interests of a cleaner political environment.

---

DEFENDING THE "DIRTY DOZEN" AWARDS

Rep. James Cleveland (R-N.H.), in his April 8 op-ed page article, "Dirty Dozen": A Discredited Rating System," claims that the Dirty Dozen designation unfairly portrays an incumbent's stance on environmental issues because 100 other congressmen have similar or worse voting records. The fact that a third of the House of Representatives votes against the protection of environmental values, often blocking needed legislation, distresses us, but in no way exonerates those incumbents named to the Dirty Dozen. If we wanted to name the 12 incumbents with the worst voting records, we would have named them the "Dirtiest" Dozen. The votes we use to assess a congressman's record are selected only after consultation with the national environmental organizations that are most active and knowledgeable on the subject legislation. Since 1970, no national environmental organization has ever criticized the campaign for naming an incumbent to the Dirty Dozen because he did not have a miserable enough voting record on environmental issues.

Mr. Cleveland criticizes us because we choose candidates who are "vulnerable." Logic dictates that we try to defeat the most defeatable, so long as their voting record mean its such an effort. Even the National

Republican Congressional Committee on which Mr. Cleveland serves, targets its efforts against the weakest of those incumbents with whom it disagrees (principally Democrats). Indeed, conservative campaign committees have used that technique to target thousands of dollars in campaign funds for opponents of weak Democratic incumbents.

Vulnerable incumbents can only survive the electoral process if their voting satisfies a coalition of supporters with varying viewpoints. If an incumbent repeatedly fails to vote to protect environmental values, we have a fundamental right to advise environmentalists to withdraw their support from such a coalition.

Significantly, our effort sometimes has a favorable effect on those Dirty Dozeners who do survive the campaign. For example, Mr. Cleveland, who was chosen for the Dirty Dozen in April 1976, three months later attempted (unsuccessfully) to defeat legislation that would remove protection from the nation's diminishing marshes and wetlands. We truly wish more of his colleagues had voted with Mr. Cleveland on that vote. Moreover, the League of Conservation Voters, an independent environmental organization that also rates congressmen's environmental voting records, rated Mr. Cleveland at only 29 out of a possible 100 in 1975, while in 1976 he climbed to 52.

We note that Mr. Cleveland's concern for accuracy in media did not extend to the last paragraph of his article, which erroneously reported that Environmental Action had no membership (there are 22,000 EA members at present), and noted that our entire staff consists of 12 magazine editors. The frequently overworked magazine staff would like Mr. Cleveland to know that EA employs only four editors, five lobbyists, and three administrative personnel.

We think the Dirty Dozen Campaign promotes operation of the finest traditions of American politics. It stimulates voters to query the incumbents on important issues and stimulates the challenges to persuade the voters they can do better. Since 1970, the voters in 53 percent of Dirty Dozens' districts appear to have decided that the challenger could represent their environmental interests better.

A. BLAKEMAN EARLY,
*Legislative Director,*
*Environmental Action.*●

## LIBERAL LINE: COMMUNISTS CAN IGNORE "SO-CALLED HUMAN RIGHTS"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 10 minutes.

Mr. ASHBROOK. Mr. Speaker, in the first sentence of his April 2, New York Times column on human rights in China, Robert W. Barnett put the liberal view on human rights in Communist countries perfectly. Barnett says that the question is:

> Should we make Peking's record in handling *what Americans call the "human rights" of the Chinese people* an obstacle to normalizing our relations with that country? (The italics are mine.)

Liberals simply are not concerned about human rights in a Communist country. They fall for the Red line that economic, not political, rights are the test. Conservatives believe that human rights are universal, and that the hammer and sickle does not change the nature of murder, oppression, and robbery one whit. On this moral point, there is no room for compromise. Nor is there common ground for discussion with those who hold humanity to be a relative matter. Barnett repeatedly emphasizes the liberal view that the actions of a Communist state cannot be questioned:

> We should hesitate to condemn them as less moral merely because they are different from those of other societies.

Different? Only a color blind apologist could use that terminology.

The operating statement of Mr. Barnett's piece in understanding his liberal doublethink is contained in the second paragraph. In answering the question whether or not we should make an issue of human rights in Red China, he answers in the negative and with this strange reasoning:

> We should want to seek better understanding of the moral content in how and why Peking has sustained the legitimacy of its authority through means alien to the political experience of the Western world.

Read that one several times. He refers to their means of ruling as having a moral content. Really, now? Lining people up against the wall and shooting them? Local trials of owners of one-tenth of an acre as enemies of the people? Repression? Brainwashing? Suppression? Purges? These are some of the means the Red Chinese have used in sustaining the legitimacy of their authoritarian government. Those who disagreed with the ruling elite were shot, exiled, or imprisoned. Some were lucky enough to flee their country. In all of this only a liberal can see a moral basis.

Barnett also builds on the other pillar of the lefist attitude toward communism, that we must strive to be like them:

> China could be giving clues to perception of moral necessities that we may be obliged to recognize if we begin to believe that we cannot assuage our economic and social dissatisfactions merely by the perpetual opening up of new resource-frontiers, geographical and technological.

The fact is that China is devoting itself entirely and with total ruthlessness to this same perpetual opening up of new resource frontiers.

Economic success has always been the only Marxist criterion of success, from the theory of dialectic materialism to Stalin's 5-year plans to the Great Leap Forward. The reason we forget that material production is the only goal of Marxist materialism is that they have failed so utterly in its accomplishment. As to resource frontiers, China is in a continuing struggle with Russia and the West to take over African and Asian countries, mainly for their resources. The fact is that Communists would kill anybody to reach a Western level of production. But the slave driver's whip can get an economy only so far in the modern world. Faced with this, Mr. Barnett has striven to transform Communist inability to advance into a virtue.

Mr. Barnett's praise of Chinese "moral imperatives," as well as his sneers at "so-called human rights," are almost exact copies of comments by his liberal predecessors on Stalin's Russia in the 1930's. But in Stalin's time, liberals also praised communism for its opening up of new resource frontiers. All that is past, now that the limits of copying Western technology and working millions of slave-driven people to death have obviously been reached. Faced with this, Mr. Barnett must either admit the real nature of communism, or else declare that China is just too good to be obsessed by mere material advancement. It is interesting to note that this transformation of China's failure into a virtue has taken place throughout the liberal establishment.

While over a million Cambodians are slaughtered in utter media silence—this slaughter is continuing while I write, as is the silence—Barnett assures us that China is Communist only because of the "mobilization of the moral support of a population committed to egalitarianism in the way it talks, looks, and behaves." He blithely passes over the killing of at least 15 million Chinese under the Red regime. After all—

> There has been a remarkable continuity of Chinese commitment to self-reliance and egalitarianism—China's moral accommodation to the necessity of survival.

Having dismissed the dead dissidents, Barnett heaps the leftist's traditional praise on the fanatical true believers who killed them:

> Visitors from other parts of the developing world . . . cannot imagine infusing their own people with the moral devotion upon which the Chinese system appears to be built.

He is right: Freedom is not based on mindless fanaticism. Nor is anything decent based on an oppression of mind and body more intense and suffocating than the Inquisition at its height. Freedom requires the kind of people who would die rather than use a phrase like "so-called human rights" and whose hearts are sickened by those who do.

Mr. Speaker, I include the Barnett whitewash of a murderous regime at this point in the RECORD:

[From the New York Times, Apr. 2, 1978]
Apr. 2, 1978]

MAKE AN ISSUE OF RIGHTS IN CHINA

(By Robert W. Barnett)

WASHINGTON.—The nation is putting before itself a practical question: Should we make Peking's record in handling what Americans call the "human rights" of the Chinese people an obstacle to normalizing diplomatic relations between the United States and the People's Republic of China?

We should not. I go further. We should want to seek better understanding of the moral content in how and why Peking has sustained the legitimacy of its authority through means alien to the political experience of the Western world.

The psychic and philosophical premises upon which the Chinese system operates differ from those of other countries, whether or not Marxist, affluent or developing. But we should hesitate to condemn them as less moral merely because they are different from

those of other societies. In fact, China could be giving clues to perception of moral necessities that we may be obliged to recognize if we begin to believe that we cannot assuage our economic and social dissatisfactions merely by perpetual opening up of new-resource frontiers, geographical and technological.

After World War II, Chiang Kai-shek was supported by friends at home and abroad in an effort to restore pride and effectiveness to a Chinese system crippled and demoralized by 150 years of humiliation and catastrophe. But the tragic fallacy in Chiang's leadership was that its legitimacy and moral sanction had stronger roots abroad than within his own Chinese environment.

The People's Republic of China won its civil war because its authority was based upon strictly Chinese resources; its leaders achieved total national self-reliance through mobilization of the moral support of a population committed to egalitarianism in the way it looks, it talks and behaves.

Visitors from many other parts of the developing world, awed by that achievement, can identify administrative mechanics, but cannot imagine infusing their own people with the moral devotion upon which the Chinese system appears to be built.

Harsh national necessity shapes China's assessment of "human rights." The first right is to survive. With China's population of 900 million to 950 million growing at a thundering rate of 15 million to 20 million year after year, the challenge to China's survival has been pervasive, sustained and profound.

China's responses, both voluntary and directed from Peking, reverse the stress in the freedom-and-duty matrix upon which Western democratic traditions are built. But in Korea, Vietnam, Taiwan, Hong Hong, Japan and in China there seems to be utterly natural acceptance of the age-old Confucian tradition of subordinating individual liberty to collective obligation—for example, to the family. So here may be the clue to what deep in the imagination of Chinese everywhere is their moral equivalent to the individual human rights that Americans believe are sanctified by the Holy Bible, the Declaration of Independence, and the Bill of Rights in our Constitution.

From the days when China's leaders lived in Yenan caves to the establishment of national authority in Peking, through the Great Leap Forward, through the Cultural Revolution, through the arrest of the Gang of Four, and the re-emergence of the twice-humiliated First Deputy Prime Minister Teng Hsiaoping, there has been a remarkable continuity of Chinese commitment to self-reliance and egalitarianism—China's moral accommodation to the necessity of survival. China's unshackling of its women, the "barefoot doctor," the mass participatory harnessing of China's rampant rivers, and what Norman Macrae, deputy editor of The Economist, calls China's present-day rural Keynesianism are expressions of that compulsion.

Washington and Peking will enter into normal diplomatic relations with each other because doing so serves the self-interest of both countries. Neither should entertain expectation that it can reform the other. We must respect China's right to be different, or, doing otherwise, expose ourselves to charges of self-righteousness, demagoguery, and possibly even of imperial intent.

China's now-emerging personalities, procedures and political vocabulary offer promise of greater readiness by China to deal more forthrightly with other countries around the world. With respect and curiosity, Washington should hasten toward establishing normal diplomatic relations with Peking so as to ease exchanges of ideas, persons and goods from which the two countries can mutually benefit together and in their relations with other countries of the world community.

## H.R. 7744, ESTABLISHING THAT CORPS OF ENGINEERS CONTRACT DREDGING WORK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. JOHNSON) is recognized for 5 minutes.

● Mr. JOHNSON of California. Mr. Speaker, on April 13 of this year, the House passed and sent to the President H.R. 7744, a bill which originated in our Committee on Public Works and Transportation.

H.R. 7744 establishes the policy that dredging work on Corps of Engineers navigation projects should be accomplished by contract if it can be done by the private dredging industry at reasonable prices and in a timely manner.

This legislative declaration of policy is designed to encourage the private dredging industry to build modern, technologically advanced equipment so that it will have the capability to meet more of the Nation's dredging needs.

The Corps of Engineers has instituted a "testing of the market" program, which involves advertising work, presently accomplished by Government dredges, in which private industry expresses an interest and on which it desires to submit bids.

One of the primary purposes of this program is to induce an increase in industry capability.

However, a legislative declaration of policy, as opposed to one established by agency regulation, is necessary to provide the incentive for private industry to invest large sums of money in new equipment.

The bill protects the interests of the United States by providing for a gradual reduction in the Federal dredge fleet through retirement of plant as private industry's capability increases and by providing for the retention of a minimum Federal fleet of modern, efficient dredges to perform emergency and national defense work.

Retirement of plant is to be accomplished either through scrapping or for sale on the understanding that the plant will be used only outside the United States. This will assure that obsolete plant will not inhibit the industry investment in new equipment.

I would express my appreciation to Congressman RAY ROBERTS, the chairman of the Water Resources Subcommittee, the ranking minority member of the subcommittee, Congressman DON CLAUSEN, and the ranking minority member of the full committee, BILL HARSHA, for their excellent leadership in the handling of this legislation.

I would also commend the chairman of the Senate Environment and Public Works Committee, Senator JENNINGS RANDOLPH, and the ranking minority member of the Subcommittee on Public Works of the Senate Committee on Appropriations, Senator MARK HATFIELD, for their cooperation and active participation in the formulation and enactment of this very important legislation.●

## CONSUMER CO-OP BANK WILL AID CITY REVIVAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 5 minutes.

● Mr. REUSS. Mr. Speaker, the creation of a National Consumer Cooperative Bank is finally at hand after years of persistent effort by those interested in the consumer movement and concerned with the need for more cooperative and nonprofit ventures in our urban areas. When the President signs the National Consumer Cooperative Bank Act, H.R. 2777, into law sometime in the near future, those responsible for this legislation will deserve great credit.

The bill passed the House July 14, 1977, and was approved by the Senate Banking Committe on April 6, 1978. It is my understanding that the Senate will take it up soon, now that the Panama Canal Treaty has been approved. Since there are only minor differences between the House and Senate versions, and since President Carter has hailed the bank in his urban policy statement on March 27 as an essential element in his program for the cities, enactment of the legislation seems assured.

Cooperatives and nonprofit institutions have been part of the American economic scene since the beginning of our country. They have been an important part of the agricultural sector, for electric power, telephone service and marketing services. They have played an essential role in housing, health, food, and other services in both rural and urban areas. But particularly in urban areas, they have been handicapped by a lack of credit and a lack of understanding or support from traditional financial institutions. This new bank will fill the existing credit vacuum, and make possible a major expansion of cooperative and nonprofit businesses of many kinds.

The bank will make direct loans or guarantee such loans. A self-help development fund for low-income cooperatives will be especially helpful to inner city areas which lack services and where traditional financing is particularly lacking. The bank is designed to be self-sustaining.

I particularly commend my colleague, Representative FERNAND J. ST GERMAIN, chairman of the House Banking Committee's Subcommittee on Financial Institutions Supervision, Regulation and Insurance, whose perserverance has been the indispensable element in the bill's success.

Finally, the President deserves the most heartfelt gratitude from all of us for studying the proposal with an open mind and giving it, at this time, his full support. When the bank is funded and in operation, the Nation's consumers will

have an important new institution working in their behalf, and the cities will have a new source of financing for the kinds of businesses that help nourish neighborhoods.●

## LIBERIA OR BRAZIL OR BOTH?

(Mr. SIKES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SIKES. Mr. Speaker, the current emphasis on human rights has skipped lightly over U.S. State Department policy on Liberian racial segregation. Liberia was one of the countries visited by President Carter in Africa recently. The State Department has said:

Liberia has one of the best human rights records in Africa.

And in the same statement said:

In January 1977, public flogging of convicted thieves as a deterrent measure was reinstituted.

The State Department also says the democratic process is open to all who meet the age and citizenship requirement. Then it goes on to say that there is only one registered national party. There is also only one national party in most Communist and other totalitarian countries. The State Department did not bring out the fact that the Liberian Constitution also says:

None but Negroes, or persons of Negro descent shall be eligible to citizenship in this Republic.... No persons shall be entitled to hold real estate in this Republic unless he be a citizen of same.

I do not propose that we seek to reform Liberia, nor do I believe that we should censure Brazil and other friendly nations for faults that we gloss over elsewhere. Brazil is the largest country in South America and has been our steadfast friend. The President's confrontation with Brazilian leaders as a part of his African trip made no progress and gained us no friends. Brazil has abrogated three treaties with us and withdrawn their support of the Inter-American School in Panama as the result of U.S. policies toward them.●

## WHY NOT GIVE THE NEW GOVERNMENT OF RHODESIA A CHANCE?

(Mr. SIKES asked and was given permission to extend his remark at this point in the RECORD and to include extraneous matter.)

● Mr. SIKES. Mr. Speaker, the continuing efforts spearheaded by the United States to bring the guerrilla terrorist factions based in Zambia and Tanzania into a new black-dominated coalition government of Rhodesia is one that can scarcely be considered in the best interest of the United States. This is particularly true in light of recent developments. U.N. Ambassador, Mr. Andrew Young, has spent considerable time attempting to achieve a meeting of the minds between the two groups. He has failed because of the recalcitrant attitude of the Communist-backed Patriotic Front. They simply refuse to participate unless they can be assured a takeover in Rhodesia. The guerrilla leaders have been given the run of the United Nations and played up to in the United States, while black representatives from the Rhodesian Government have been cold-shouldered and shunted aside.

Now, we have seen what Newsweek of April 17 called A Mission Impossible. U.S. Secretary of State, Cyrus Vance, spent 2 days trying to coax the guerrilla leaders into a stance approximating reason without success. He then spent 9 hours in Rhodesia, apparently accomplishing little more than with the guerrillas. This situation is made more distasteful by the obvious fact that supporting the guerrillas is tantamount to advancing Russia's aims on the continent of Africa. It is known that they are supplying the weapons and the guidance for guerrilla activities. Cubans are being used to train them. Possibly the Cubans will participate in an attempt to conquer Rhodesia.

The efforts of Mr. Young and Mr. Vance are commendable to a point. It would appear that their efforts are ineffective and that it is now time to extend reasonable cooperation to the new government in Rhodesia. That government has accomplished something the United States and Britain have long demanded. They have a black majority coalition government. In January they will have a black Prime Minister. The coalition will attempt to maintain peaceable relations between blacks and whites and to insure Rhodesia the availability of white industrial and agricultural expertise which has contributed very significantly to develop a strong economy. That economy is now weakened only because of sanctions imposed by the U.N. and pushed by Britain and the United States. It would appear to be time to stop playing games and calling names and cooperate with a government that is in a position to bring about a transition long sought by the U.N. and some Western powers.

The lofty, liberal Washington Post called the coalition government in Rhodesia more democratic, moderate, and multiracial than any government the guerillas might construct. The Post also said the President appeared to be holding Salisbury "to lofty moral and political standards, while often appearing to wink at the failings of the Popular Front." It is very difficult to comprehend Washington's infatuation with the terrorists while refusing to recognize the potential of a coalition black majority government achieved peaceably in Rhodesia.

A critical, yet apparently accurate portrayal of the general picture in that area was carried in the Washington Star on Tuesday, April 4. It is entitled "A Dowry for Nigeria." I submit it for the CONGRESSIONAL RECORD.

A DOWRY FOR NIGERIA

You may think it odd that the latest American call for "a genuine transfer of power to the majority" in Rhodesia issued from Nigeria, a nation ruled by its army for the past dozen years.

But that is not the greatest oddity. If one looked more deeply into the status of democracy in Africa, it would emerge that Nigeria is so deeply driven by tribal and religious factionalism that military rule could easily continue there long after blacks and whites compose their differences inside Rhodesia.

So the use of Nigeria, during President Carter's state visit, as a platform for reiterating our strange Rhodesian policy must be explained otherwise than by the host country's solicitude for democratic elections.

Nigeria, it so happens, is very large, very influential in African councils, and—this is probably the most important single factor—the world's seventh largest oil producer. Nigeria is, then, a country to be on good terms with; and since the U.S. took an unenthusiastic view of the bloody suppression of Biafran separatism 10 years ago, relations have not been at their best.

With relations obviously under repair, the question is this: At what cost to political principle, good sense and vital strategic interests will Nigeria's friendship be purchased? The delivery of Rhodesia to a guerrilla takeover? Possibly. Until last week, it was difficult to divine the official U.S. attitude toward the recent "internal" agreement in Rhodesia, which looks to a substantial transfer of power from Prime Minister Ian Smith to black moderates. U.S. pronouncements on that subject were tissues of contradiction and hesitancy. Glimmerings of sympathy vied with dark warnings that the new regime would be attacked and dismantled by the Nkomo-Mugabe guerrilla forces, the so-called Patriotic Front, who are armed and backed by the Soviet Union and China.

But as President Carter's state visit to Nigeria neared, blunt talk of the "illegality" of the Rhodesia government intensified, notwithstanding the impending internal transfer of power. President Carter, it seems, had to have something for the Nigerians, and the sacrificial offering seems to be one internal solution for Rhodesia, well scorched.

The U.S. position on the "illegality" of the Rhodesian government needs a closer look, incidentally. It rests not on the traditional Wilsonian conception of "self-determination," but on the notion that Great Britain retains a ghostly "sovereignty" in Rhodesia even though she has exerted no control there since 1965 when Rhodesia ceased to be a British crown colony. Yet the hostility to the recent "internal" settlement between Mr. Smith's secessionist white regime has been sharper in Washington than in London because U.S. policy in Southern Africa is largely the extension of UN Ambassador Andrew Young's personal sympathy for the guerrilla leaders and their "front-line" patrons. It leads to the oddity that the U.S. is more of a stickler for stale colonialist assertions about Rhodesian sovereignty than the former colonial power itself.

To a dangerous degree, and indeed to the neglect of other important considerations, U.S. policy on Rhodesia remains the exclusive hobby-horse of one official, Ambassador Young, who for domestic political reasons exercises great influence with President Carter. "Seldom," as Mr. Julian Amery recently observed, "can any president have given such a hostage to fortune as in (Mr. Young's) appointment. It is difficult to imagine any circumstances in which Mr. Young could be dismissed without alienating the black vote in America and black opinion worldwide." Like Mr. Young, like his African policy. That is about the size of it.

Having chosen Nigeria as the chief object of American courtship in Africa, and shrinking from outright endorsement of Nigeria's extremist views on South Africa, the U.S.

seems to be offering, as dowry, hostility to an internal settlement in Rhodesia. The policy is perverse and pusillanimous. President Carter, with the Nigerian despot Gen. Olusegun Obesanjo listening with approval, said the U.S. "will move as quickly as possible to call together the parties who are in dispute in (Rhodesia)." But the dispute "in" Rhodesia is largely at an end. The remaining dispute is between those who seek a stable biracial regime inside the country and the guerrilla leaders who swear to overthrow it from the outside. It is one-sided as well, since the call has gone out to Messrs. Nkomo and Mugabe to come home and enter the internal process. To call for negotiation between the two is, in effect, to side with those who avow total hostility to the internal settlement and would probably install a uniracial regime in Rhodesia under Russian influence.

This policy not only sacrifices political negotiation to military force, and principle to expediency; it importantly advances the ultimate Soviet design of controlling the politics, ports and mineral resources of Southern Africa. In that respect, it could be an expensive policy. It may for a time win friends in Lagos and Lusaka. We cannot imagine that it will win the U.S. the respect of anyone else, anywhere.

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RODINO (at the request of Mr. WRIGHT), for today, on account of illness in the family.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KINDNESS) to revise and extend their remarks and include extraneous material:)

Mr. EDWARDS of Oklahoma, for 5 minutes, today.

Mr. DORNAN, for 10 minutes, April 20, 1978.

Mr. KEMP, for 10 minutes, today.

Mr. CLEVELAND, for 10 minutes, today.

Mr. ASHBROOK, for 10 minutes, today.

(The following Members (at the request of Mr. VOLKMER) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. D'AMOURS, for 5 minutes, today.

Mr. JOHNSON of California, for 5 minutes, today.

Mr. REUSS, for 5 minutes, today.

Mr. RYAN, for 60 minutes, on April 24.

Mr. RYAN, for 60 minutes, on April 25.

## EXTENSIONS OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. KINDNESS), and to include extraneous matter:)

Mr. ROBINSON.

Mr. HAGEDORN in two instances.

Mr. YOUNG of Alaska.

Mr. DICKINSON.

Mr. TREEN.

Mr. GRADISON.

Mr. KEMP in three instances.

Mr. LEACH in two instances.

Mr. FINDLEY.

Mr. BADHAM.

Mr. DORNAN.

Mr. HYDE.

Mrs. HOLT.

Mr. MADIGAN.

Mr. DERWINSKI.

Mr. KETCHUM.

Mr. ABDNOR in three instances.

Mr. ASHBROOK in two instances.

Mr. GILMAN.

(The following Members (at the request of Mr. VOLKMER) and to include extraneous matter:)

Ms. OAKAR in two instances.

Mr. VENTO.

Mr. BENJAMIN.

Mr. DOWNEY.

Mr. WATKINS.

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. UDALL.

Mr. ASHLEY in two instances.

Mr. CHAPPELL.

Mr. ROE.

Mr. SOLARZ.

Mr. MURPHY of New York.

Mr. HAMILTON.

Mr. DRINAN.

Mr. GORE.

Mr. ROSENTHAL.

Mr. EILBERG.

Mr. WOLFF.

Mr. RISENHOOVER.

Mr. ULLMAN.

Mr. DELANEY.

## ADJOURNMENT

Mr. VOLKMER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 40 minutes p.m.) the House adjourned until Thursday, April 20, 1978, at 11 o'clock a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3896. A letter from the Manager, Federal Crop Insurance Corporation, Department of Agriculture, transmitting the Corporation's annual report for the year 1977, pursuant to 61 Stat. 719; to the Committee on Agriculture.

3897. A letter from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting a report of officer's and employee's defense-related employment, pursuant to section 410(d) of Public Law 91–121; to the Committee on Armed Services.

3898. A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting the Air Force's report on the recycling of materials, pursuant to section 612 of Public Law 93–552; to the Committee on Armed Services.

3899. A letter from the Secretary of Labor, transmitting a draft of proposed amendments to legislation to reauthorize the Comprehensive Employment and Training Act of 1973 (CETA) for another 4 years; to the Committee on Education and Labor.

3900. A letter from the Assistant Secretary for Education, Department of Health, Education, and Welfare, transmitting the third annual report of the Advisory Council on Education Statistics for calendar year 1977, pursuant to section 406(d)(1) of the Education Amendments of 1974; to the Committee on Education and Labor.

3901. A letter from the Acting Deputy Attorney General, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3902. A letter from the Director, National Science Foundation, transmitting notice of a proposed new system of records for the Foundation, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

3903. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of certain major defense equipment and a proposed amendment to the agreement for coproduction in Iran (MC–20–78), pursuant to section 36(c) and 38(b)(3) of the Arms Export Control Act; to the Committee on International Relations.

3904. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Ambassador-designate William B. Edmondson and his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

3905. A letter from the Secretary of Energy, transmitting the second annual report on the weatherization assistance program, pursuant to section 421 of Public Law 94–385; to the Committee on Interstate and Foreign Commerce.

3906. A letter from the president, Corporation for Public Broadcasting, transmitting the annual report of the Corporation for Public Broadcasting for fiscal year 1977, pursuant to section 396(i) of the Communications Act of 1934, as amended (81 Stat. 371); to the Committee on Interstate and Foreign Commerce.

3907. A letter from the Administrator of Veterans' Affairs, transmitting a report on the reevaluation by the Chief Medical Director on the need for special pay agreements with physicians and dentists, pursuant to section 3(b)(1) of Public Law 95–201; to the Committee on Veterans' Affairs.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SISK: Committee on Rules. House Resolution 1140. Resolution providing for the consideration of H.R. 11504. A bill to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act (Rept. No. 95–1068). Referred to the House Calendar.

Mr. BROOKS: Committee on Government Operations. House Resolution 1049. Resolution to disapprove Reorganization Plan No. 1, transmitted by the President on February 23, 1978 (Rept. No. 95–1069). Referred to the Committee of the Whole House on the State of the Union.

Mr. THOMPSON: Committee on House Administration. H.R. 11983. A bill to amend the Federal Election Campaign Act of 1971

to extend the authorization of appropriations contained in such act; with amendment (Rept. No. 95–1070). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Small Business. H.R. 11713. A bill to create a solar and renewable energy sources loan program within the Small Business Administration; with amendment (Rept. No. 95–1071). Referred to the Committee of the Whole House on the State of the Union.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ASPIN (for himself, Mr. AMMERMAN, Mr. BLANCHARD, Mr. CLAY, Mr. CONYERS, Mr. CORNELL, Mr. DOWNEY, Mr. DRINAN, Mr. FORD of Michigan, Mr. GAYDOS, Mr. GOLDWATER, Mr. HANLEY, Ms. KEYS, Mr. LEDERER, Mr. LENT, Mr. LUKEN, Mr. MCFALL, Mr. MARKEY, Mrs. MEYNER, Ms. MIKULSKI, Mr. MURPHY of Pennsylvania, Mr. O'BRIEN, and Mr. PATTERSON of California):

H.R. 12218. A bill to amend the Communications Act of 1934 to prohibit making unsolicited commercial telephone calls to persons who have indicated they do not wish to receive such calls; to the Committee on Interstate and Foreign Commerce.

By Mr. ASPIN (for himself, Mr. GREEN, Mr. RANGEL, Mr. RUSSO, Mr. RYAN, Mr. SOLARZ, Mr. STEIGER, Mr. WALGREN, Mr. WEISS, Mr. WHALEN, Mr. CHARLES WILSON of Texas, Mr. WOLFF, and Mr. CORNWELL):

H.R. 12219. A bill to amend the Communications Act of 1934 to prohibit making unsolicited commercial telephone calls to persons who have indicated they do not wish to receive such calls; to the Committee on Interstate and Foreign Commerce.

By Mr. BROWN of California (for himself, Mr. BONIOR, Mr. GLICKMAN, Mr. KILDEE, and Mr. MANN):

H.R. 12220. A bill to amend section 162 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. CHAPPELL:

H.R. 12221. A bill to amend the Rail Passenger Service Act, to extend the authorizations of appropriations for an additional fiscal year, to provide for public consideration and implementation of a rail passenger service study, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ZABLOCKI (for himself, Mr. FASCELL, Mr. DIGGS, Mr. NIX, Mr. FRASER, Mr. ROSENTHAL, Mr. HAMILTON, Mr. WOLFF, Mr. BINGHAM, Mr. HARRINGTON, Mr. RYAN, Mrs. COLLINS of Illinois, Mr. SOLARZ, Mrs. MEYNER, Mr. BONKER, Mr. STUDDS, Mr. PEASE, Mr. BEILENSON, Mr. CAVANAUGH, Mr. FINDLEY, Mr. BUCHANAN, Mr. WHALEN, Mr. WINN, and Mr. GILMAN):

H.R. 12222. A bill to amend the Foreign Assistance Act of 1961 to authorize development and economic assistance programs for fiscal year 1979, to make certain changes in the authorities of that act and the Agricultural Trade Development and Assistance Act of 1954, to improve the coordination and administration of U.S. development-related policies and programs, and for other purposes; to the Committee on International Relations.

By Mr. HAGEDORN (for himself and Mr. FINDLEY):

H.R. 12223. A bill to limit the authority of the Secretary of Agriculture to restrict or prohibit the use of nitrites or nitrates as preservatives in meat products for a period of 2 years, and for other purposes; to the Committee on Agriculture.

By Mr. HAGEDORN (for himself and Mr. BYRON):

H.R. 12224. A bill to amend the Davis-Bacon Act, and for other purposes; to the Committee on Education and Labor.

By Mr. HAGEDORN (for himself, Mr. HARSHA, Mr. CLEVELAND, Mr. STANGELAND, and Mr. STUMP):

H.R. 12225. A bill to amend the Federal Water Pollution Control Act relating to clean lakes; to the Committee on Public Works and Transportation.

By Mr. HOWARD (for himself, Mr. NATCHER, Mr. WHITTEN, Mrs. HECKLER, Mr. SIKES, Mr. LATTA, Mr. BYRON, Mr. FINDLEY, Mr. FUQUA, Mr. ANDREWS of North Dakota, Mr. BAUCUS, Mr. HILLIS, Mr. CEDERBERG, and Mr. CARTER):

H.R. 12226. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and in rural areas, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. McCORMACK (for himself, Mr. TEAGUE, Mr. GOLDWATER, Mr. UDALL, Mr. FASCELL, Mr. DRINAN, Mr. MOAKLEY, Mr. CORNWELL, Mr. FLORIO, Mr. EDWARDS of California, Mr. EDGAR, Mr. FRASER, Mr. SEIBERLING, Mr. LAFALCE, Mr. LENT, Mr. SEBELIUS, Mr. MITCHELL of New York, Mr. PATTISON of New York, Mr. HUGHES, Mr. RICHMOND, Mr. NOLAN, Mr. LEHMAN, Mr. PATTERSON of California, Mr. STANGELAND, and Mr. BOB WILSON):

H.R. 12227. A bill to provide for an accelerated program of research, development and demonstration for solar photovoltaic energy technologies leading to early competitive commercial applicability of such technologies to be carried out by the Department of Energy, with the support of the National Aeronautics and Space Administration, the National Bureau of Standards, the General Services Administration, and other Federal agencies; to the Committee on Science and Technology.

By Mr. McCORMACK (for himself, Mr. TEAGUE, Mr. GOLDWATER, Mr. WINN, Mr. KRUEGER, Mr. GAMMAGE, Mr. CARTER, Mr. TRAXLER, Mr. WHITEHURST, Mr. HEFTEL, Mr. CARR, Mr. STUDDS, Mr. CORCORAN of Illinois, Mr. MILLER of California, Mr. PEASE, Mr. KILDEE, Mr. CEDERBERG, Mr. WHALEN, Mr. ABDNOR, Mr. CLEVELAND, Mr. SIMON, Mr. FOWLER, Mr. GIBBONS, Mr. MAGUIRE, and Mr. BEDELL):

H.R. 12228. A bill to provide for an accelerated program of research, development and demonstration of solar photovoltaic energy technologies leading to early competitive commercial applicability of such technologies to be carried out by the Department of Energy, with the support of the National Aeronautics and Space Administration, the National Bureau of Standards, the General Services Administration, and other Federal agencies; to the Committee on Science and Technology.

By Mr. MARRIOTT (for himself, Mr. ARMSTRONG, Mr. BAUMAN, Mr. EDWARDS of Oklahoma, Mr. HANSEN, Mr. JOHNSON of Colorado, Mr. KAZEN, Mr. LUJAN, Mr. MURPHY of Pennsylvania, Mr. RHODES, Mr. RONCALIO, Mr. RUDD, Mr. RUNNELS, Mr. SKUBITZ, Mr. SYMMS, and Mr. WEAVER):

H.R. 12229. A bill to provide grants to States for the restoration of abandoned uranium mill sites and to require the Secretary of Energy to restore such sites if the States fail to do so; jointly, to the Committee on Interstate and Foreign Commerce and Interior and Insular Affairs.

By Mr. WOLFF (for himself, Mr. ROSENTHAL, and Mr. DOWNEY):

H.R. 12230. A bill to authorize the establishment of the Long Island Sound Heritage in the States of Connecticut and New York; to the Committee on Interior and Insular Affairs.

By Mr. CARTER (for himself and Mr. GILMAN):

H.R. 12231. A bill to amend title VIII of the Public Health Service Act to extend for 2 fiscal years the program of assistance for nurse training; to the Committee on Interstate and Foreign Commerce.

By Mr. CORMAN (for himself and Mr. BAFALIS):

H.R. 12232. A bill to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation, and for other purposes; to the Committee on Ways and Means.

By Mr. HEFTEL (for himself, Mr. MEEDS and Ms. OAKAR):

H.R. 12233. A bill to establish a Department of Education, and for other purposes; to the Committee on Government Operations.

By Mr. JENKINS:

H.R. 12234. A bill to amend title 38, United States Code, to exclude certain periods from the absence counting requirements for veterans and eligible persons enrolled in courses not leading to a standard college degree; to the Committee on Veterans' Affairs.

By Mr. LEACH:

H.R. 12235. A bill to authorize an intermediate term Commodity Credit Corporation credit program for the purpose of financing the sale and export of agricultural commodities produced in the United States; jointly, to the Committee on Agriculture, and International Relations.

By Mr. PURSELL (for himself, Mr. JEFFORDS, Mr. HOLLENBECK, Mr. SARASIN, Mr. WHITEHURST, Mr. BEVILL, Mr. PRITCHARD, Mr. CONTE, Mr. STUMP, Mr. YOUNG of Alaska, Mr. CORCORAN of Illinois, and Mr. MURPHY of Pennsylvania):

H.R. 12236. A bill to establish a Department of Education; to the Committee on Government Operations.

By Mr. STANGELAND (for himself, Mr. JOHNSON of Colorado, and Mr. HAGEDORN):

H.R. 12237. A bill to amend title 23 of the United States Code, relating to highways, to authorize a program to separate rail and highway crossings in certain energy impacted cases; to the Committee on Public Works and Transportation.

By Mr. VOLKMER:

H.R. 12238. A bill to bolster farm income by providing emergency assistance for producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes; to the Committee on Agriculture.

By Mr. ABDNOR:

H.R. 12239. A bill to improve the inspection and labeling of imported meat and to enhance the stability in meat supplies and prices, for the benefit of domestic producers and consumers; jointly, to the Committees on Agriculture and Ways and Means.

By Mr. BOLAND:

H.R. 12240. A bill to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S.

Government, the Intelligence Community Staff, the Central Intelligence Agency Retirement and Disability System, and for other purposes; to the Select Committee on Intelligence.

By Mr. BRINKLEY (for himself, Mr. RISENHOOVER, Mr. MCCORMACK, Mr. CAVANAUGH, Mr. SEBELIUS, Mr. STANGELAND, Mr. BYRON, Mr. KOSTMAYER, Mr. FITHIAN, Mr. MIKVA, Mrs. BOGGS, Mr. PRICE, Mr. HAMILTON, Mr. PEPPER, Mr. SIKES, and Mr. PATTEN):

H.R. 12241. A bill to incorporate the Gold Star Wives of America; to the Committee on the Judiciary.

By Mr. HOLLAND (for himself, Mr. BROYHILL, Mr. WAMPLER, Mr. MCCORMACK, Mr. KETCHUM, Mr. JONES of North Carolina, Mr. COTTER, Mr. FOUNTAIN, Mr. PREYER, Mr. RANGEL, Mr. DICKINSON, Mr. JOHN T. MYERS, Mr. GUDGER, Mr. PATTEN, Mr. SIKES, Mr. LE FANTE, Mr. COUGHLIN, Mr. MONTGOMERY, Mr. BYRON, Mr. BOWEN, Mr. BURLISON of Missouri, Mr. HARRINGTON, and Mr. MOFFETT):

H.R. 12242. A bill to amend the Trade Act of 1974; to the Committee on Ways and Means.

By Mr. HOLLAND (for himself, Mr. BROYHILL, Mr. HOLLENBECK, Mr. MICHAEL O. MYERS, Mr. COCHRAN of Mississippi, Mr. HUGHES, Mr. MURTHA, Mr. ADDABBO, Mr. RAHALL, Mr. DENT, Mr. RISENHOOVER, Mr. FLOOD, Mr. MARTIN, Mr. BEVILL, Mr. D'AMOURS, Mr. GARCIA, Mr. BOLAND, Mr. BIAGGI, Mrs. CHISHOLM, Mr. ANNUNZIO, Mr. EDGAR, Mr. FISH, Mr. AMMERMAN, Mr. DOWNEY, and Mr. MOAKLEY):

H.R. 12243. A bill to amend the Trade Act of 1974; to the Committee on Ways and Means.

By Mr. MOFFETT:

H.R. 12244. A bill to amend the Social Security Act to require physicians to accept assignment under part B of the medicare program with respect to services they furnish in medicare-participating hospitals; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. STANGELAND (for himself, Mr. KINDNESS, Mr. HYDE, and Mr. HAGEDORN):

H.R. 12245. A bill to carry out the recommendations of the Presidential Task Force on Women's Rights and Responsibilities, and for other purposes; jointly, to the Committees on the Judiciary, Armed Services, Ways and Means, and Post Office and Civil Service.

By Mr. MAHON:

H.J. Res. 859. Joint resolution making supplemental appropriations for the United States Railway Association for the fiscal year ending September 30, 1978, and for other purposes; to the Committee on Appropriations.

By Mr. MANN (for himself, Mr. BEARD of Rhode Island, Mr. BEVILL, Mr. BONIOR, Mr. BOWEN, Mr. BRECKINRIDGE, Mr. CLEVELAND, Mr. COHEN, Mr. DAN DANIEL, Mr. DERRICK, Mr. EDGAR, Mr. EILBERG, Mr. EVANS of Georgia, Mr. GUYER, Mr. HAGEDORN, Mr. HEFTEL, Mr. HUCKABY, Mr. JENRETTE, Mr. MARTIN, Mr. MOAKLEY, Mr. NOLAN, Mr. PREYER, Mr. SYMMS, Mr. VANDER JAGT, and Mr. WAGGONNER):

H.J. Res. 860. Joint resolution designating the pine tree as the national arboreal emblem of the United States; to the Committee on Post Office and Civil Service.

By Mr. MURPHY of New York (for himself, Mr. AUCOIN, Mr. BEARD of Tennessee, Mr. BENJAMIN, Mr. BROOKS, Mr. CORNELL, Mr. ROBERT W. DANIEL, Jr., Mr. EDWARDS of Alabama, Mr. EMERY, Mr. FITHIAN, Mr. FLOOD, Mr. GAMMAGE, Mr. HAWKINS, Mr. LONG of Louisiana, Mr. MARKEY, Mr. JOHN T MYERS, Ms. MIKULSKI, Ms. OAKAR, Mr. PATTEN, Mr. PURSELL, Mr. REUSS, Mr. ROGERS, Mr. ROSE, Mr. VANDER JAGT, and Mr. WON PAT):

H.J. Res. 861. Joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the 7 calendar days beginning September 17, 1978, as "National Port Week"; to the Committee on Post Office and Civil Service.

By Mr. MANN (for himself and Mr. CORCORAN of Illinois):

H. Res. 1141. Resolution relative to customs duties on textile, apparel, and fiber products; to the Committee on Ways and Means.

By Mr. MOAKLEY:

H. Res. 1142. Resolution to establish a Select Committee on Arson; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BREAUX:

H.R. 12246. A bill to direct the Secretary of the department in which the U.S. Coast Guard is operating to cause the vessel *Widow Maker* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade; to the Committee on Merchant Marine and Fisheries.

By Mr. WRIGHT:

H.R. 12247. A bill for the relief of Jan Kutina; to the Committee on the Judiciary.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

443. By the SPEAKER: Petition of the Colorado Commission of Indian Affairs, Denver, Colo., relative to Native American self-government and treaty rights; to the Committee on Interior and Insular Affairs.

444. Also, petition of the Pearl River County Development Association, Inc., Picayune, Miss., relative to the water flow of the East Pearl River; to the Committee on Interior and Insular Affairs.

445. Also, petition of the city commission, Margate, Fla., relative to U.S. policy toward Israel; to the Committee on International Relations.

## AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11302

By Ms. HOLTZMAN:

Page 3, line 14, delete "$930,000" and insert in lieu thereof "$2,500,000".

H.R. 11504

By Mr. CARTER:

Page 3, line 15, after the first period insert the following new sentences: "In the case of applicants who are individuals and do not meet the requirement of clause (4), such applicants shall be deemed to meet such requirement if they are in severe financial difficulty because of drought, flood, or other natural disaster, or other condition beyond their control. In making loans under this section and section 303, preference shall be given to young farmers and ranchers.".

Page 9, line 17, after the period insert the following new sentence: "In making loans under this section, preference shall be given to young farmers and ranchers.".

Page 12, line 3, after the first period insert the following new sentences: "In the case of applicants who are individuals and do not meet the requirement of clause (4), such applicants shall be deemed to meet such requirement if they are in financial difficulty because of drought, flood, or other natural disaster, or other condition beyond their control. In making loans under this subsection for any purpose described in section 312(a) (other than a purpose described in paragraph (5) of such section), preference shall be given to young farmers and ranchers.".

Page 13, line 23, after the period insert the following new sentence: "In making loans under this paragraph for any purpose described in section 312(a) (other than a purpose described in paragraph (5) of such section), preference shall be given to young farmers and ranchers.".

By Mr. GILMAN:

Page 16, after line 5 insert the following new subsection:

(b) Section 324(a) of the Consolidated Farm and Rural Development Act is amended—

(1) by striking out "that prevailing in the private market for similar loans, as determined by the Secretary" in the first sentence and inserting in lieu thereof the following: "the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum per annum as determined by the Secretary"; and

(2) by adding at the end of such section the following new sentences: "With respect to any loan made or insured under this subtitle after the date of enactment of the Agricultural Credit Act of 1978, the Secretary shall make on behalf of the borrower all payments of principal which become due on such loan during the first one-fourth of the repayment period of such loan and the borrower shall make all payments of interest which become due on such loan during the first one-fourth of such repayment period. The borrower shall repay, without charge for interest and within such repayment period, the Secretary for any payment made on behalf of the borrower under the preceding sentence.".

Page 16, line 1, insert "; Interest Rates on Emergency Loans; Suspension of Certain Principal Payments" after "Loan Rates".

Page 16, lines 1 and 2, insert "(a)" before "Section 324".

Page 20, after line 4, insert the following new section:

SEC. 121. CREDIT ELSEWHERE REQUIREMENT.—The Consolidated Farms and Rural Development Act is amended by adding at the end thereof new section 348 to read as follows:

"SEC. 348. An applicant for any loan under this title shall be deemed to meet the eligibility requirement that he be unable to obtain sufficient credit elsewhere to finance his actual needs at reasonable rates, taking into consideration prevailing private and cooperative rates in the community in or near which the applicant resides for loans for similar purposes and periods of time, if, at the time the applicant applies for such loan under this title, such prevailing private and cooperative interest rates are more than the prevailing interest rate in the private market for similar purposes and periods of time, as determined by the Secretary.".

Page 20, after line 4, insert the following new section:

SEC. 122. USE OF QUALIFIED PERSONNEL BY THE DEPARTMENT OF AGRICULTURE.—It is the sense of Congress that, in carrying out the provisions of the Consolidated Farm and Rural Development Act, the Secretary of Agriculture should ensure—

(1) that only officers and employees of the Department of Agriculture who are adequately prepared to understand the particular needs and problems of farmers in an area be assigned to such area; and

(2) that a high priority is placed on keeping existing farm operations operating.

By Mr. GLICKMAN:

On page 8 after line 19 insert the following:

"SEC. 109B. The Consolidated Farm and Rural Development Act is amended by adding at the end of section 310C the following:

"(c) Notwithstanding any other provision of law, any person who would be eligible for a guarantee of a mortgage under section 1709(b) of title 12, United States Code, shall be eligible for a loan guarantee under section 1487 of title 42, United States Code, under terms and restrictions no less favorable to the borrower and in amounts at least equal to those provided under said section 1709(b) of title 12. *Provided however,* That such guarantee shall apply to a mortgage on a dwelling in a "rural area", as defined herein."

By Mr. HARKIN:

Page 23, line 25, strike out "thirty" and insert in lieu thereof "forty".

Page 24, line 6, strike out the colon and all that follows through the period in line 12 and insert in lieu thereof a period.

Page 24, line 15, strike out the colon and all that follows through the period in line 19 and insert in lieu thereof a period.

By Mr. JONES of Tennessee:

Insert at the end of the bill the following new title:

TITLE IV—EMERGENCY CONSERVATION MEASURES PROGRAM ACT OF 1978

SEC. 401. The Secretary of Agriculture is authorized to make payments to agricultural producers who carry out emergency measures to control wind erosion on farmlands or to rehabilitate farmlands damaged by wind erosion, floods, hurricanes, or other natural disasters when, as a result of the foregoing, new conservation problems have been created which, (1) if not treated, will impair or endanger the land, (2) materially affect the productive capacity of the land, (3) represent damage which is unusual in character and except for wind erosion, is not the type which would recur frequently in the same area, and (4) will be so costly to rehabilitate that Federal assistance is or will be required to return the land to productive agricultural use.

SEC. 402. The Secretary of Agriculture is authorized to make payments to agricultural producers who carry out emergency water conservation or water enhancing measures during periods of severe drought as determined by the Secretary.

SEC. 403. The Secretary of Agriculture is authorized to make payments to agricultural producers to carry out emergency measures for runoff retardation and soil erosion prevention to safeguard lives and property from floods, drought, and the products of erosion on any watershed whenever fire or any other natural occurrence has caused a sudden impairment of that watershed.

SEC. 404. There are authorized to be appropriated such funds as may be necessary to carry out the purpose of this title. Such funds shall remain available until expended.

SEC. 405. The provisions of this title shall be effective October 1, 1978.

By Mr. WEAVER:

Section 201: Page 20, line 7, insert "and Commercial Fishing" and "Agricultural."

Section 202:

Page 20, line 11, strike out "and ranchers" and insert in lieu thereof ", ranchers, or commercial fishermen".

Page 20, line 12, strike out the comma and insert "or commercial fishing".

Page 20, line 14, insert "or fishing" before "cooperatives".

Page 20, line 16, insert "or commercial fishing" before "and, in".

Page 20, line 19, insert "or commercial fishing" before the colon.

Page 20, line 24, insert "or commercial fishing" after "production".

Page 21, line 2, insert "or fishing" after "agricultural".

Page 21, line 4, insert ", including fish" before the period.

Section 203:

Page 21, line 11, insert "commercial fishing vessels," after the second comma.

Page 21, line 13, insert "or fishing" after "farming".

Page 21, line 16, insert "or commercial fishing equipment" before the first comma.

Page 21, line 17, insert "or commercial fishing supplies" after "farm supplies".

Page 21, line 18, insert "or commercial fishing" after "farm".

Page 21, line 19, insert "(or commercial fishing)" after "farm".

Page 22, line 13, insert "or commercial fishing" after "agricultural".

Page 22, line 15 insert "or commercial fishing" after "farm".

Page 22, line 16, insert "or commercial fishing supplies" after "farm supplies".

Page 22, line 17, insert "or commercial fishing" after "farm".

Page 22, line 18, insert "or commercial fishing" after "farm".

Page 22, line 24, insert "or [family] fishing operations" after "family farms".

Page 22, line 25, insert "or fishing" after "farm".

Page 23, line 2, insert "or fishing operation" after "farms".

Page 23, line 5, insert "or commercial fishing" before the period.

Section 204:

Page 24, line 1, insert "or commercial fishing vessels" after "real estate".

Section 205:

Page 25, line 5, insert "or commercial fishing" before the comma.

Page 25, line 14, insert "or commercial fishing" before the comma.

Page 25, line 22, insert "in the case of farmers and ranchers," after "(1)".

Section 212:

Page 29, strike out lines 4 through 8 and insert in lieu thereof the following:

The Secretary shall report—

(1) to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate on the effectiveness of this title; and

(2) to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the effectiveness of commercial fishing loans made under this title;

not later than January 1, 1979. The Secretary shall include [in the report referred to in paragraph (1)] the number of loan

Page 29, line 10, strike out "and ranchers" and insert in lieu thereof ", ranchers, and commercial fishermen".

Page 29, line 12, strike out "and ranchers" and insert in lieu thereof ", ranchers, and commercial fishermen".

Page 29, line 15, strike out "and ranchers" and insert in lieu thereof ", ranchers, and commercial fishermen".

Page 29, line 16, insert "or commercial fishing" after "agriculture".

# EXTENSIONS OF REMARKS

## IOWA VFW ESSAY WINNER

### HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. LEACH. Mr. Speaker, Sheryl Lynn Tudeen of Bettendorf, Iowa, was recently named the winner of the Veterans of Foreign Wars "Voice of Democracy Essay Competition" for the State of Iowa. This year, the theme for this outstanding contest was "My Responsibility to America." I am very pleased and honored to share with my colleagues her moving essay—an essay written by one who obviously cares very deeply about her country and its future:

V.F.W. VOICE OF DEMOCRACY SCHOLARSHIP PROGRAM IOWA WINNER

(By Sheryl Lynn Tudeen)

In the childrens story of The Little Red Hen, the hen experiences trouble in getting the other animals to help her in making bread, they refuse to help her cut the wheat, grind the wheat or help in the baking process, but when all the work is done and the delicious bread is made, then they are all very willing to help her eat it.

Can this type of situation be applied to our country? Do we all expect the advantages that America can give us, but don't feel it necessary to work for them in return? It is difficult for me to believe this—in fact, I refuse to. Others must THINK as I do. I feel that I have a certain responsibility toward our country, if I want to continue to reap the benefits it can offer me.

The benefits I speak of are mainly freedoms, freedoms our ancestors thought were important enough to fight and die for. And so my responsibility is basically one to the future generations, and yet I must work for it now, in order to insure that they can obtain all the rights and freedoms I enjoy today.

Our forefathers got a good start on the individual rights issue when they wrote in the Constitution that all men are created equally. They did this much for us, now it is up to me to see that all men are treated equally, that one person is not superior to another simply because of his race, sex, religion or financial status. That is my first responsibility, one that will benefit us today and in the future.

Our environment and beautiful countryside are other things I can appreciate now. America has such a variety of terrain, each region is unique, but they are all beautiful in their own way. It is obvious to me, however, that the snowy mountains, the great forests or the golden deserts cannot remain

in their majestic condition without some help. Thus, I have to make an effort to keep them that way.

Lastly, and most importantly though, is my responsibility in maintaining the principles of democracy that this country was founded on. Our predecessors gave us a say in our government so that we could voice our preferences and problems. We are one of the few countries fortunate enough to have this. As one of the lucky individuals who live here, I have a responsibility in preserving this type of government.

I realize that by myself I probably cannot change things greatly, but that does not mean that I will quit. Willard Wirty summed up my philosophy on working for what you want when he said that "those who want by the yard, but try by the inch should be kicked by the foot".

I expect great things from America because I know that they exist. It is up to me to insure that they continue to do so.

It is easy for us to answer such questions as: Who wants to live in a clean environment? Who wants to eliminate prejudice among men? and Who wants to keep his freedom? The hard part comes in as it did in the story of The Little Red Hen in who's willing to work for all this. The answer is, I am, because that is MY responsibility to America.●

## LAND CONSERVATION IN ALASKA

### HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ASHLEY. Mr. Speaker, on March 21, 1978, the Committee on Interior and Insular Affairs voted 32 to 13 to recommend passage of a revised version of H.R. 39, the Alaska National Interest Lands Conservation Act, sponsored by Chairman UDALL and a great many others.

This bill, which was originally considered and revised by the Subcommittee on General Oversight and Alaska Lands, represents the most important land conservation measure which will come before the House in this century As reported by the Interior Committee, it represents a painstaking balance between the interests involved—between the importance of developing the riches of Alaska for the benefit of Alaskans and the rest of the country, and the importance of acting to insure the protection of unmatched scenic, wildlife, geological, natural, scientific, and wilderness values of these lands which are the property and the heritage of all the American people.

I support the revised version of H.R. 39 as reported, and I compliment the committee on arriving at this excellent balance of interests. I would be remiss if I did not pay special tribute to the role of my friend and Ohio colleague, JOHN SEIBERLING, for his invaluable contributions in this effort.

Mr. Speaker, I believe that the Toledo Blade, in a recent editorial, accurately assessed this measure as reported by the Interior Committee when it said that—

The measure approved by the House Interior Committee is an appropriate vehicle for protecting the last major areas of unspoiled wilderness still left to the stewardship of the American people. There may not be such an opportunity in the future.

For the benefit of all our colleagues, Mr. Speaker, I am here offering for the RECORD the Blade's editorial, "Save Alaskan Heritage":

SAVE ALASKAN HERITAGE

Rarely is a happy balance struck between those who desire to preserve large natural tracts absolutely undisturbed by the works of man and those who wish to exploit primitive areas for private or even public gain. One such opportunity, however, is within the nation's grasp.

The House Interior Committee has approved a bill which would add about 95 million acres to the national parks, wildlife refuges, and scenic river systems of Alaska—a figure smaller than the 115 million acres proposed by Rep. Morris Udall of Arizona and considerably larger than the 33 million acres favored by those who place greater emphasis on development of Alaskan mineral and timber resources.

The size of the preserves should make it possible to protect entire ecosystems from destruction, a lesson which was learned only belatedly and at great cost in the case of the California redwoods.

Sponsors of the bill recognize Alaska's role as "both oil barrel to the nation and national park to the world," as Alaskan Gov. Jay Hammond once described it. If the House measure became law, it would foreclose mineral development and timbering in the one-fifth of Alaska's 375 million acres that would be designated as wilderness areas. However, the bill would permit future exploration and development of petroleum and mineral resources on millions of acres of public land which would not have wilderness status. Concessions also have been made to the lumber industry in order to guarantee that no jobs will be lost, particularly in southeast Alaska. Furthermore, the bill takes a reasonable attitude toward hunting and other activities enjoyed by Alaskan sportsmen and viewed as essential by the native population.

The compromise bill, much of which represents the work of Ohio Congressman John Seiberling, would create 10 new parks and 14 refuges to preserve terrain and wildlife species, some of which are unique to Alaska.

Of course, setting aside massive tracts of land is made easier in Alaska by the fact that the Federal Government still holds title to much of the state, stemming from the purchase of "Seward's Folly" for $7 million in 1867. Also, the population pressures on the park areas are as yet not very great in most of Alaska, which has a population smaller than that of Lucas County. That fact, however, is offset by the fragile nature of the Alaskan wilderness, it cannot withstand the pressures placed on parks in more temperate latitudes.

Carter administration officials, who support the park proposal, point out that even if some of the lands to be protected do contain valuable resources, they will not be lost to the country if the need to recover them should become evident at a later date.

No doubt the temptation will be great, as Congress works on the bill, to reduce the size of the areas to be protected and the scope of that protection—some Alaskans would favor that, for instance. But that temptation should be resisted. The measure approved by the House Interior Committee is an appropriate vehicle for protecting the last major areas of unspoiled wilderness still left to the stewardship of the American people. There may not be such an opportunity in the future.●

## TUITION TAX CREDITS

### HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. GRADISON. Mr. Speaker, on April 12, the House Ways and Means Committee, on which I serve, approved H.R. 12050, the Tuition Tax Credit Act of 1978, by a vote of 23 to 14. The bill as amended by the committee would allow a tax credit equal to 25 percent of the postsecondary tuition expenses incurred by a taxpayer, spouse, or dependent up to a maximum credit of $100 per student between August 1 and December 31, 1978. The maximum credit would increase to $150 in calendar 1979 and to $250 in 1980, when the legislation would expire unless Congress continued it.

Although I supported the bill passed by Ways and Means, I would have preferred the original version which included a tax credit that would have covered all levels of education. I opposed the amendment offered by Representative WAGGONNER in committee which eliminated the credit for elementary and secondary students from the bill. The Waggonner amendment narrowly carried by a vote of 20 to 16.

Nevertheless, I voted in favor of this bill because it would provide some tax relief for families who need help. Educational expenses have skyrocketed in recent years. Costs for public 4-year colleges have risen 57.2 percent in the last 6 years, while private 4-year college expenses have increased 63.2 percent during the same period. The burden is particularly heavy on middle-class Americans. Families in the $15,000 to $25,000 income range make too much money to qualify for student assistance grants, but not enough to pay the educational costs at the college of their choice. We are rapidly approaching a situation in our country where only the affluent, the very poor, or the very bright will be able to attend college.

When the full House considers the Tuition Tax Credit Act of 1978, I plan to support an amendment which will place the credit for elementary and secondary students back in the bill. Costs for elementary and secondary education have increased substantially in the last few years and I feel that families with students at all levels of education should be provided with some tuition relief.

Several tuition relief proposals have circulated around the House including the President's plan which calls for the expansion of existing student grant and loan programs. I am convinced that the tuition tax credit approach is the simplest, most direct, and most effective means of providing assistance for families that need help. With a tax credit, the benefits would accrue directly to the taxpayer without bureaucratic redtape and with less cost to the taxpayer. In addition to being needed, these tax credits are simple, straightforward and above all, fair.●

## IF YOU'RE NOT FOR US, YOU'RE AGAINST US

### HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

Mr. DOWNEY. Mr. Speaker, on February 11 Mr. Eugene Hugo, a Washington correspondent for the South African newspaper the Johannesburg Star was recalled. Subsequent to Mr. Hugo's orders to return to South Africa he reported in a very factual manner that representatives of the Washington Embassy of the Republic of South Africa and representatives of the official lobbyist for that country attended closed, members and staff only, meetings of the Ad Hoc Monitoring Group on South Africa.

I am the coordinator of this 35-member congressional group which seeks to move South Africa toward peaceful majority rule and monitor the fate and treatment of various political prisoners in South Africa.

Tomorrow the House Committee on Banking, Finance, and Urban Affairs will consider an amendment to the Export-Import Bank Act of 1945 which would end U.S. Export-Import Bank loan guarantees to U.S. industrial ventures in South Africa until the Vorster government's racial policies change.

I would also submit that press freedom in South Africa is essential as a moderating influence. I ask that an article which appeared in the Washington Journalism Review be included in the RECORD:

IF YOU'RE NOT FOR US, YOU'RE AGAINST US

(By Rick Zimmerman)

To call Eugene Hugo "a courageous South African reporter," as Jack Anderson did in a recent column, is somewhat of an exaggeration. Hugo simply is a journeyman who couldn't pass up a good story when he saw one. He also is a South African who has a well developed conscience and a propensity to express his national outrage to anyone who will listen.

Whether it was Hugo's pursuit of a story or his midnight cries of anguish to the wrong person that did him in is a matter of conjecture. It was probably both. In any event, Hugo was abruptly recalled from his post as Washington correspondent for the *Johannesburg Star* and other South African Argus group papers in February, 11 months before his two-year tour of duty was scheduled to end.

At the time of his recall Huge was being subjected to a personal attack in *Die Vaderland*, an influential, Afrikaans-language daily, and in *The Citizen*, a shrill, english-language tabloid. Both papers are stridently pro-government.

On February 14, under the headline "Questions About Star Man in Washington," *Die Vaderland* reported on its front page "the belief is that Mr. Hugo is more than just a journalist and is working with certain members of Congress and the State Department . . . in a way that is not well-intended toward South Africa."

What had annoyed Die Vaderland was Hugo's series of stories detailing how representatives of the South African government had wormed their way into two presumedly closed meetings of the congressional Ad Hoc Committee on South Africa. The charge that Hugo was involved in some sort of a conspiracy with U.S. officials was prompted by the fact he obtained a copy of a strong letter of protest from the committee to the South African ambassador before it had arrived at the embassy—hardly an unusual feat for an enterprising newsman.

The Citizen joined the assault on Hugo the next morning with a story headlined "'Fascist' jibe in Washington: Probe on Newsman." That afternoon Die Vaderland followed up with a story headlined: "Argus Man Works Against S.A. in the Outside World."

Both of these stories were based on a 50-minute, midnight phone call Hugo made on January 31 to Donald Dekieffer, a high-priced Washington lawyer who lobbies for South Africa. According to The Citizen, Hugo, upset over what he considered to be heavy-handed lobbying by Dekieffer, called South Africa's Nationalist government "that pack of fascists," among other things.

Hugo admits making the midnight call to Dekieffer, although he says he does not recall using such vivid language. But those who know how deeply Hugo feels about what is happening in his country can believe he may have been somewhat intemperate during what he considered a private conversation.

The managing director of the Argus group, in announcing that Hugo was being recalled to an uncertain fate in Johannesburg, claimed the decision was made, but not announced, several weeks before Hugo was portrayed as disloyal in the pro-government press. Hugo is contemplating bringing legal action against his tormentors under South Africa's tough press laws.

## REFLECTIONS ON YUGOSLAVIA

### HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. CHAPPELL. Mr. Speaker, upon his return from a visit to Yugoslavia, Mr. Albert W. Zeller, Jr., wrote to me describing living conditions and current political trends in that country. He has provided a thoughtful analysis of life in a Communist nation.

Mr. Speaker, I want to share his findings with my colleagues, in order that they might be further enlightened as to conditions in Eastern Europe.

Letter follows:

JACKSONVILLE, FLA.

DEAR CONGRESSMAN: Economically, there is no longer any advantage in Yugoslavia. With inflation still about 20 percent and the exchange still 18 Dinars to $1.00, it now costs about twice as much for general living items as it does in Florida (wages there are frozen).

Unemployment is officially listed at 15 percent and rising. Workers are being sent home to Germany, France, and Switzerland.

The result is that police are maintaining a "hard line." Speaking against the "system" is good for four years in prison (first offense).

The free university system is causing a big problem already felt in Italy, where riots are occurring.

It's simply that the Yugoslav economy cannot absorb these graduates. They either take menial jobs or remain unemployed. As most of these graduates come from the villages, it creates a big social problem in the cities.

There is no "welfare" as we know it, and no unemployment insurance. Television is devoted to the glories of socialism, but it's getting harder for people who can't exist to accept any more dogma.

I don't see any sign of the "system" breaking up. The police and Army see to that.

The university group favor Western ideas and wear sweaters with American university names stenciled on them.

Americans who advocate more socialism for us ought to go to these socialist countries and live for awhile. Heavy taxation is causing Sweden, England, even West Germany and others to take another look at socialism.

There's a bright side. There's a rightist movement in France, West Germany, and Italy. They realize that socialism and communism take away more than they offer.

Tito's wife has disappeared from the "scene." The strongest rumor in Yugoslavia is that she sided with a faction that opposed some of Tito's policies and is under "house arrest." Whatever—there are definite signs of opposition to "what is"—what "might be" will probably have to wait until he dies. He's 85 now.

After looking around, there's no "system" that comes close to ours. I hope *our* socialists don't louse it up.

I realize that this session of Congress is very hectic, but I'm sure that you have the support of all of us in the District.

Best regards to you, your family, and your staff.

Sincerely,

ALBERT.●

## WE MUST END THE TURKISH EMBARGO

### HON. DAVID C. TREEN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. TREEN. Mr. Speaker, I have addressed the subject of the arms embargo against Turkey several times, urging that we take action to repair the great damage that we have done to the southern flank of the NATO alliance. I am most pleased that the administration has taken action to lift the embargo and I pray that Congress will respond favorably.

The Times-Picayune, the morning newspaper of the Metropolitan New Orleans area, supports the lifting of the embargo. I am inserting its April 6 editorial for the benefit of my colleagues:

ARMS FOR TURKEY AFTER ALL

It has been three years since Congress disappointed the Ford administration by embargoing arms shipments to Turkey until Turkey moved to break the logjam on Cyprus. This policy, set not by then Secretary of State Henry Kissinger, who was attempting to work out a Cyprus settlement by courting both Greece and Turkey, nor by his successors, but by a Congress influenced by the Greek lobby, has never worked. It didn't work when Turkey was under the more autocratic Demirel regime any more than it has worked under the more pro-Western Bulent Ecevit regime.

It had begun to appear that unless the United States scrapped that policy, Turkey might further loosen its ties to NATO, close U.S. bases permanently, boycott the Atlantic summit meeting in May, perhaps adopt a

more neutral policy in the eastern Mediterranean. Fearing those developments, the administration has urged an end to the arms embargo.

If arms aid to Turkey is restored, the hope is that the Ecevit government can be brought to work realistically with Greece to thaw out the Cyprus dispute. Linking military aid to resolution of the Cyprus problem would no longer be the U.S. stance.

The president is asking Congress to approve $225 million in military aid to Turkey, and the administration will rewrite a four-year $1 billion defense accord signed in 1976 but never approved by Congress. It seemed easier to ask Congress to approve an end to the embargo alone rather than to seek approval of the aid package as well.

The 25 American bases in Turkey have been in limbo these three years. Turkey has not been asked to make any public pledges regarding their reopening, any more than on the Cyprus issue, in order to qualify for arms credits, but the understanding is clear. At the same time, the administration is asking $140 million—up from an original $122 million—in military credits to Greece, and keeping its fingers crossed.

Three years was a long enough trial for a policy that never budged Ankara an inch. We need this ally on NATO's eastern flank, and better treatment should fetch better results.●

## ADDENDUM TO STATEMENT OF YESTERDAY ON SOVIET THREAT TO PANAMA CANAL

### HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. DORNAN. Mr. Speaker, yesterday was giveaway day. To mark that day, I included in the RECORD an address by Ambassador Spruill Braden on the "Soviet Threat to the Panama Canal."

Although I agree with every fact and inference which the late Ambassador included in that address, it has occurred to me that one passage in that statement might be misinterpreted by some who read it as an endorsement by me of a theory to which I do not adhere. Toward the end of his remarks, the Ambassador stated:

> The comintern's leaders—perhaps due to blood and inheritance—possesses a strain of Oriental innate cruelty, dishonesty and shrewd depravity.

Mr. Speaker, I do not believe that any one race has cornered the market on cruelty, dishonesty and depravity. But some who read my insertion of yesterday might interpret that passage as meaning just that.

Anyone who reads history or who has read a newspaper recently cannot honestly believe that interpretation of the passage. Germans by the thousands killed their Jewish brothers by the millions. Iraqi's kill Kurds. Turks committed wholesale genocide on Armenia (no longer on our maps). The British invented the concentration camp in the South Africa Boer war. And my own Irish cousins are shooting off kneecaps and executing their brothers.

To merely pronounce the name "Cambodia" today is to call to mind a Stalin-like slaughter taking place at this very instant. The TV series "Roots" documented the horrors of slavery North American style, and the 4-day series "Holocaust" is a nightmare to watch. I believe that all men have the potential to be as brutal as the Soviet Communists are and as all races in history have been * * * just as they all possess the potential to produce saints and humanitarians. I believe in universal original sin.

And the beat goes on. Saints and sinners come from every corner of history, every corner of the world, in all colors and sizes. The best of families can have a member opt for evil. That's what free will is all about. No "yellow peril," no Red menace, just the tragic routine mans inhumanity, to man. Thank God, there is a God.●

## HUBERT H. HUMPHREY—CHARACTER OF THE HAPPY WARRIOR

### HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. VENTO. Mr. Speaker, Minnesota Viking Carl Eller and I recently participated in a benefit concert program for the Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota.

Eller, a longtime friend of the late Senator, read a poem by William Wordsworth entitled "Character of the Happy Warrior." Because the poem so well suits the life and philosophy of Hubert Humphrey, I would like to make it part of the CONGRESSIONAL RECORD:

Who is the happy Warrior? Who is he
That every man in arms should wish to be?
—It is the generous Spirit, who, when brought
Among the tasks of real life, hath wrought
Upon the plan that pleased his boyish thought:
Whose high endeavors are an inward light
That makes the path before him always bright:
Who, with a natural instinct to discern
What knowledge can perform, is diligent to learn;
Abides by this resolve, and stops not there,
But makes his moral being his prime care;
Who, doomed to go in company with Pain,
And Fear, and Bloodshed, miserable train!
Turns his necessity to glorious gain;
In face of these doth exercise a power
Which is our human nature's highest dower;
Controls them and subdues, transmutes, bereaves
Of their bad influence, and their good receives:
By objects, which might force the soul to abate
Her feeling, rendered more compassionate;
Is placable—because occasions rise
So often that demand such sacrifice;
More skilled in self-knowledge, even more pure,
As tempted more; more able to endure,
As more exposed to suffering and distress;
Thence, also, more alive to tenderness.
—'Tis he whose law is reason; who depends
Upon that law as on the best of friends;
Whence, in a state where men are tempted still
To evil for a guard against worse ill,
And what in quality or act is best
Doth seldom on a right foundation rest,
He labours good on good to fix, and owes
To virtue every triumph that he knows;
—who, if he rise to station of command
Rises by open means; and there will stand
On honourable terms, or else retire,
And in himself possess his own desire;
Who comprehends his trust, and to the same
Keeps faithful with a singleness of aim;
And therefore does not stoop, nor lie in wait
For wealth, or honours, or for worldly state;
Whom they must follow; on whose head must fall,
Like showers of manna, if they come at all;
Whose powers shed round him in the common strife,
Or mild concerns of ordinary life,
A constant influence, a peculiar grace;
But who, if he be called upon to face
Some awful moment to which Heaven has joined
Great issues, good or bad for human kind,
Is happy as a Lover; and attired
With sudden brightness, like a Man inspired;
And, through the heat of conflict, keeps the law
In calmness made, and sees what he foresaw;
Or if an unexpected call succeed,
Come when it will, is equal to the need:
—He who, though thus imbued with a sense
And faculty for storm and turbulence,
Is yet a Soul whose master-bias leans
To homefelt pleasures and to gentle scenes;
Sweet images! which, wheresoe'er he be,
Are at his heart; and such fidelity
It is his darling passion to approve;
More brave for this, that he hath much to love:—
'Tis, finally, the Man, who, lifted high,
Conspicuous object in a Nation's eye,
Or left unthought-of in obscurity,
Who, with a toward or untoward lot,
Prosperous or adverse, to his wish or not—
Plays, in the many games of life, that one
Where what he most doth value must be won:
Whom neither shape of danger can dismay,
Nor thought of tender happiness betray;
Who, not content that former worth stand fast,
Looks forward, persevering to the last,
From well to better, daily self-surpast:
Who, whether praise of him must walk the earth
For ever, and to noble deeds give birth,
Or he must fall, to sleep without his fame,
And leave a dead unprofitable name—
Finds comfort in himself and in his cause;
And, while the mortal mist is gathering draws
His breath in confidence of Heaven's applause:
This is the happy Warrior; this is He
That every Man in arms should wish to be.●

## A STORY OF ONE MAN'S TERROR AT THE HANDS OF THE BRITISH IN NORTHERN IRELAND

### HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. BIAGGI. Mr. Speaker, as chairman of the Ad Hoc Congressional Committee for Irish Affairs, and one who has long been active in the struggle for Irish freedom, I am ever mindful of daily instances of severe deprivation of the basic human rights of people in Northern Ire-

land, which violations are perpetrated by the British troops there.

Those who are victims in the North are usually silenced by force, censorship, or fear. Some do escape the clutches of British oppression. Some may be fortunate enough to come to America where liberty as an ideal can be realized.

For the benefit of my colleagues, so they may be properly informed and reflect, I am submitting for the RECORD a letter from, and an article written by, one such young victim of British atrocities, and who later came to America and spoke of his ordeal. Personal references have been removed because our subject may have to return to Northern Ireland, where his family remains.

I urge my colleagues to take good notice of the circumstances described herein. For this story presents but yet another "human" example of the flagrant offenses against basic human rights in Northern Ireland, and the daily horror Irish people are subject to by British intervention.

It presents evermore the urgency and a justification for Britain to move to withdraw its troops from Northern Ireland. It again highlights the need for the Congress to hold hearings on the proposals for peace. How many more people will have to suffer before enough concerned officials and humanitarians take appropriate action. The time to move for peace must be now.

The letter reads as follows, and I quote:

DEAR MR. BIAGGI: I arrived in this country in ——, supposedly for a three week holiday, from Belfast, N. Ireland. After about a week here I decided to make an effort to stay longer as I was under severe pressure from the British Army in my native homeland.

As I had an older brother interned and another a political prisoner, my home was constantly raided and ransacked. Although I myself was never a member of any illegal organization I was branded as such automatically. I am 18 years of age now and for about the last two years I spent in Ireland I was subject to constant beatings both on the streets of Belfast and in their interrogation centres. I have survived attempts on my life and my life has been threatened dozens of times by different regiments of the British Army and members of the Royal Ulster Constabulary.

In —— I was held for three days in Castlereaght interrogation centre, this I can inform you was the worst in their campaign against me. I enclose a mild account of what happened as published in the Irish People February 4th. I am writing to you as I have heard of your constant work on behalf of the Irish people. I can't tell you how much I appreciate your help for a long suffering people. I wish you every success and I hope you keep in touch with developments. Very truly yours ——— (signed).

This young man's article to the editor of the Irish People appeared in the February 4 edition as follows:

[From The Irish People, Feb. 4, 1978]

IRISH YOUTH HAILS THE LAND OF THE FREE!

*Dear Editor:*

As the new year comes into being I would ask your readers to cast their thoughts to the plight of the Irish people.

I arrived in this county four months ago from Northern Ireland but only after being detained twice by the British authorities while passing through England. They had no charges against me. My only crime, I was carrying an Irish passport. I came to America with the intention of staying for a three week holiday—but on discovering the freedom the people of this great nation enjoy, I decided to make an effort to stay, as I got nothing but harassment and torture while trying to go about making a living in my native homeland, Ireland.

I have met a lot of people here and I'm usually asked, "Do you come from that part of Ireland where that terrible war is going on between the Protestants and the Catholics?" It really hurts me to think this is what most Americans think is happening. With most news concerning the events in the north coming through Britain I can understand how Americans see the terrible torture and harassment of my people as being a religious war with our friendly neighbor, Britain, sending in troops to keep the peace. What I can't understand is why the Americans are getting only the British side. I am sure that if the freedom loving, God-fearing American people knew the truth instead of being misled by the malicious distortion of the facts by Britain, they would speak out in the thousands against the hypocrisy of the English Government which stands on its high platforms and screams about the injustice to the Blacks in Rhodesia and of what President Amin is doing in Uganda while they themselves have been found guilty of what President Amin is said to be doing in Uganda while they themselves have been found guilty in the European courts at Strasbourg of using sophisticated methods which are degrading and inhuman which amounts to torture whatever way you put it.

This torture has not stopped. In fact, when I left the north, the use of torture on Irish civilians was more widespread than ever.

I was ten years old when the present troubles erupted. I lived in the heart of the Falls road, a deeply Republican, Nationalist area of west Belfast. I watched the ordinary, everyday people erect barricades at the entrances to their streets and fight to repulse attacks being made on their homes and their children by the B Specials, the Loyalist pro-British police force.

When the British army arrived the people were in a state of confusion and at first, welcomed them, but it wasn't long before the people realized that this foreign army was as bigoted as were their ancestors. The British Army started to impose curfews on the Nationalist areas under the pretense of searching for arms. They began to shoot volleys of C.S. gas into groups of women and children and attack people in their homes.

Then came Internment. In the summer of 71, every pro-Irishman between the ages of 16 and 60 was imprisoned in a concentration camp and held for up to five years without charge or trial. At the age of 13, I watched two of my brothers dragged off to concentration camps where both were held for three years without being charged with any crime. In Northern Ireland it is considered illegal, in the eyes of the British government to call yourself an Irishman, and not a loyal British subject.

One night in 1973, I left my fourteen year old friend at the foot of the street where I lived. Before I got in the front of our house, he had been shot dead by the British army.

I watched my home being ransacked by British soldiers who burst in at 4:00 in the morning, fully armed and with blackened faces. Screaming obscenities at my elderly parents they dragged my brothers and me from our beds by the hair, holding guns to our heads. We were dragged out into the street and made to lie down on the floor of an armored tank outside my home. We were then driven to the Interrogation Center with the soldiers standing on us the whole way there.

My brothers were finally released from the concentration camps and within a year they both married and moved to neighboring districts so whenever my home was raided, I was arrested and brutally beaten as I was the only one left.

In March 1977, I celebrated my 18th birthday. Three weeks later I was dragged from my home in the early hours of the morning by the British Army and taken to the notorious Castlereagh Torture Center. The three days I was held there can only be described as a living hell. I will tell briefly what happened to me so you can get an idea of what degree the British Government is prepared to go to hold on to one of her last colonies.

I was arrested at 6:00 A.M. and arrived at Castlereagh at 7:00 A.M.

From then to 9:00 A.M. I was photographed and fingerprinted. All my belongings were taken from me—keys, money, comb and rings were taken so I didn't try to kill myself by swallowing them and choking. My boot laces were taken so I wouldn't try to hang myself. After this, I was put in a cell which was seven feet by four feet. There was a hard bed and a chair. As there was no window and the light was on constantly I soon lost track of time and didn't know whether it was day or night. The light also had a humming sound to it that made sleeping impossible. Their object seemed to be to keep my mind in a state of utter confusion.

All through the first day I was kicked and punched for about three hours, put in my cell for an hour, then kicked and punched again for three hours. This routine was kept up for some 30 hours. In between beatings I was offered food that was cold and completely inedible.

On the second day the torture became more intense. They told me they would kill me if I didn't sign a confession to a serious crime. I wouldn't, since I didn't know anything about the crime, so they threatened to kill my elderly parents if I didn't confess. After I still refused to sign their false statement they did barbaric things to me that are unprintable.

After this session of beating, I tried to hang myself in my cell as I just couldn't take any more beatings and didn't want to be the cause of my parents' death. Even after I attempted suicide, I was still severely beaten. I was one of the lucky ones, however, I took their three days of hell and still refused to sign any confession to their false charges. Other people who were also tortured signed anything that was put in front of them, anything if it would only stop the beatings.

When they were releasing me, they put me in a room with another person who was also being released. After a while, I recognized the badly beaten person slumped over the table beside me. He was my best friend. Two policemen escorted us to the front gates with a policeman holding each arm. At the gates stood our parents. The policemen let go of our arms about ten feet from them. I was able to walk to my father but my friend collapsed after walking a few feet and we had to carry him to a waiting car.

The American people don't hear of this sort of thing because Britain makes it a point for them to be kept in the dark so the next time you read the paper or listen to the media about events in Northern Ireland, remember it is probably Britain telling you what they want you to hear.

I feel at times that I'm a traitor for leaving my country in its hour of need. I think of my friends who aren't as lucky as I who haven't any relatives in this great and free country to help them to try to make a new life. But what can one person do? The Irish people are in their greatest hour of need and not many people outside Ireland seem to realize it. Only when Britain gets out of Ireland forever will there ever be any peace. "America 1776, Ireland?" that is my motto.

I am now searching for a job so I won't be sent back to Ireland and so far, have been

unsuccessful, but I think of my friends who are much worse off than I. On this, my four months in America, I still have nightmares about escaping from British concentration camps, my family and I being tortured at the hands of the British Army and other horrors I have seen. I try to put it out of my mind but it isn't easy.

Although I am now thousands of miles from Ireland I will never forget her and hope to go back in better times. What has happened to me and my family is not much compared to the torture and harassment a lot of other families have had and still have to endure. So if this letter helps even one person understand what is happening in Northern Ireland then I feel that I have done something to help my people.

[Name withheld for obvious reasons.]●

## MAN AND WOMAN OF THE YEAR AWARDS TO MRS. CHARLES (GOLDIE) TEWINKLE AND LESLIE MILLER

### HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. BADHAM. Mr. Speaker, public service to one's community has always been considered by me to be the highest form of selfless dedication toward the benefit of our fellow man.

Therefore, I would like to invite the attention of my colleagues to two such people, who are being honored on April 28, 1978, by the Costa Mesa Chamber of Commerce, an important organization in the 40th Congressional District.

To be honored by the chamber of commerce on the occasion of the annual "Man and Woman of the Year" awards luncheon are Mrs. Charles "Goldie" TeWinkle, wife of the first mayor of the city, and Leslie Miller, one of the area's outstanding educators.

Mrs. TeWinkle was born in New York and came to California with her family in 1904 and was married to Charles TeWinkle in San Bernardino in 1913.

In 1920 the family arrived in the area now known as Costa Mesa after living in several California cities. At that time the city was known as Harper. The TeWinkles bought the only grocery store in the community and Goldie TeWinkle became postmistress. Later, they sold the store and bought the only hardware store in town, which they operated until 1941.

Mrs. TeWinkle is a charter and life member of the Women's Club of Costa Mesa, has been active in the girls club, boys club, historical society, Costa Mesa Tomorrow, and is a member of the chamber of commerce.

Leslie Miller, a native of Missouri, is a graduate of Baker University in Kansas and received his masters degree from the University of Iowa. After teaching and coaching for a number of years in the Midwest, Mr. Miller came to California in 1943 to teach and coach at Newport Harbor High School. Later he was administrative assistant to the superintendent, principal for 5 years of Costa Mesa High School and then closed out his distinguished career as a teacher at the Davis Middle School.

Along the way, Leslie Miller has been active in many organizations, including those connected with education. He was president of the Costa Mesa-Newport Harbor Lions Club, district governor of Lions, a ruling elder of St. Andrews Presbyterian Church, member of the Costa Mesa United Fund, member of CHART, and chairman of the education committee of the Costa Mesa Chamber of Commerce.

It is with great pleasure and pride that I rise in this honorable body to pay tribute to Goldie TeWinkle and Leslie Miller as examples of the great public service these two people have provided for the community and city of Costa Mesa over the many years that they have seen fit to give of themselves for the betterment of their fellow citizens.●

## ARTICLE ILLUSTRATES THE IMPORTANCE OF WHISTLEBLOWERS TO OUR GOVERNMENT AND POINT TO THE NEED FOR PROTECTIVE LEGISLATION FOR THEM

### HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. UDALL. Mr. Speaker, ethical whistleblowing is a valuable tool to increasing accountability in government. Unfortunately, the Federal employee who reveals waste or corruption is seldom rewarded by the bureaucracy, but rather he or she is usually intimidated by it. Several legislative proposals have been introduced in an attempt to provide protection for these individuals of conscience who, at the risk of losing their careers, financial security, and reputation, attempt to protect us from the excesses and negligences of government.

The following article illustrates the importance to whistleblowers to our Government and point to the need for protective legislation for them:

[From the New York Times Magazine, Oct. 30, 1977]

THE PRICE OF BLOWING THE WHISTLE

(By Helen Dudar)

(These former Government officials have two things in common: They didn't keep quiet when they believed the taxpayers interests were in jeopardy. Then, suddenly, they lost their jobs.)

In the spring of 1974, Dr. Stanley Mazaleski, a Government scientist, began complaining about the sluggish pace at which his agency had set about designing safety standards for industrial workers exposed to carcinogenic chemicals. The following winter, Mazaleski's criticisms were leaked to the newspapers. Within a few months he was fired. And last May, after a two-year fight for reinstatement, he won a court decision ordering the Public Health Service to hold a new hearing. It was a modest victory, just enough to allow his attorney to try to open negotiations with the agency. After a while, the lawyer called with the report that he had been in touch with the agency's general counsel to no avail. "They said you're guilty," he told Mazaleski. "Guilty of what?" Mazaleski asked. "I don't know—they just said you're guilty."

Mazaleski's belief in his righteousness is whole and complete. He is driven by a fearsome persistence and by a myopic refusal to acknowledge that the system can possibly be as "unfair" as it has so far been to him. He is a "whistleblower"—a rather casual term for a risky business. Mazaleski belongs to a haunted little tribe of Federal employees who have transgressed against the bureaucracy—who, having seen something seriously wrong in a Government operation, made a noise about it.

The penalty for going public, for telling Congress or a reporter or even a superior a few steps up the chain of command can be harsh. Mazaleski lost his position at an agency hearing which he was not even invited to attend. A more sophisticated way of dealing with the overzealous bureaucrat is to have his job abolished. If the dissident is too well known to be dismissed, he can be "promoted" into another section of the agency where his expertise is useless. If he is obscure but likely to make a public fuss, he can be effectively immobilized by demotion to a lesser, lower-paying job where his expertise is also wasted. On the other hand, it may be decided that his behavior has been erratic. In that event, his superior may insist that he consult a psychiatrist in the expectation that he will be found to be unstable and thereby eligible for a disability discharge. Of course, he can refuse to submit to an examination. But then he may be fired for insubordination.

Theoretically, a bureaucrat who testifies before Congress is automatically protected from reprisal. Firing him is literally a crime. In practice, the system is "unenforceable," according to an aide for a powerful Senator. "What would you have the Senate do when a Pentagon employee testifies and is punished?" he asked. "Hold the Secretary of Defense in contempt?" A bureaucrat with a dismissal slip is entitled to a Civil Service hearing, but there the cards may be stacked, too.

The bureaucracy is a Goliath, and the machinery available to enforce its will is immense. Moreover, its will often extends far beyond its boundaries. A civil servant who has lost a post in a conflict that reached the press usually becomes unemployable. Advertised jobs in other Federal agencies prove to be illusory the day he applies; promising offerings in private enterprise that are dependent on the kindness of Government agencies vanish overnight. It takes merely a phone call to a former boss to learn that the applicant is considered just a trifle hard to get along with.

Most people have neither the heart nor the means to begin a fight that may last for years. They quietly resign, they accept early retirement, they shut up. A. Ernest Fitzgerald, a Defense Department cost analyst who eight years ago went before a Congressional committee and testified that a Lockheed cargo plane was costing $2 billion more than the contracted price, is perhaps the best known of contemporary whistleblowers. He has been battling the Pentagon for eight years and is a one-man advisory committee to scores of Federal employees who consider doing what he did in the interests of exposing waste and corruption. People go to him for guidance all the time. "I never advise them," he says. "I just tell them the probable consequences of going public. Most of them never do." Those who stay the course seem, on casual encounter, to be quite nondescript, the sort of people Fitzgerald is fond of assigning to mainstream America. They wear lapel flags, he says, lift weights and belong to the National Rifle Association. They are special, he goes on, because they can't stand stealing. Experience has transformed some of them into cranks—rather exalted cranks who can be nagging, verbose, obsessed and sometimes difficult to be with and yet who are wholly admirable in their gritty stubborn-

ness. What sets them apart and gives them distinction is a sublime innocence, a pure and compelling attachment to schoolroom lessons in morality. It is wrong to cheat. It is a sin to lie. There is no compromise with evil. Deceivers will be punished. Good will triumph.

Once in a while it does. But the process is so long and so lonely and so consuming and the psychic pain is so profound that nothing finally can obliterate the scars. Friends are lost and careers are blighted. In suburban precincts where every other homeowner can be a Federal employee, neighbors cruelly cease to be neighborly. How do you explain to a 5-year-old child why he's the only kid on his Oak Ridge block who wasn't invited to the Easter-egg hunt? On occasion, even reason is forfeited. "I cringe when they come to see me," says a Congressional staff man who has tried to help some victims. "They are walking wounds."

The quality of the damage is discoverable when the clan assembles in one place, an event that occurred early this year in Washington. For almost two years, the Institute for Policy Studies, a well-known haven for respectably leftish thinkers and doers, has been working on a program to develop legislative, legal and financial protection for the civil servant who steps out of line in the provable interests of the public good. Last June, I.P.S. organized a two-day conference of whistleblowers. Two hundred came. Some of them merely have personal grudges against agency supervisors but many of them had, in Fitzgerald's felicituous phrase, "committed truth" and had suffered for it. According to several accounts, the sessions took place in an atmosphere of such raging anger and bitterness they could have been recorded as peaks and valleys on a seismograph. Moreover, the sense of futility projected by the conferees was almost gaudy in its intensity. Yet these people came and they stayed out of some freakishly inexhaustible hope that injustices could be remedied and that the system could be made to work.

What sustains that hope is unfathomable. The qualities they have in common hardly seem significant enough to illuminate any corner of their experiences. They all apparently tend to be careful with money, if not downright cheese-paring. Their politics seem mostly centrist and nonideological, and they are engagingly oblivious to the irony of receiving the support of a leftist organization on the order of I.P.S. While not necessarily formally religious, many of them count themselves believers. With some exceptions, they share a certain lack of imagination. It did not, at the outset, occur to most of them to anticipate the fury of official vengeance.

The sign over Ernest Fitzgerald's door at the Pentagon reads "Deputy for Productivity Management." What, I ask, does a productivity manager do? Whatever he can, the best he can, enough to earn his $47,900 wage, he answers, but nothing like what he could do if he were allowed to exercise his skill and experience as a weapons cost analyst for the Air Force. Fitzgerald is, of course, a legend, the dean of Washington whistleblowers and folk hero to Federal employees who would like to emulate him. Shortly after he testified about how the military patronage system wastes great sums of money on its munitions and aerospace purchases, his job was abolished. And the Civil Service Commission—the court of last resort within the Government—ruled he was not a victim of reprisal.

What followed was nearly four years of legal battles, protracted by Government delays and by its appeals at every point. Finally, in 1973, a U.S. District Court ordered his reinstatement. By then, Fitzgerald, who had kept busy lecturing, writing a book and working for the Congressional committees, figured the fight could cost him $400,000 in legal fees. He sued to collect. In 1976, a Federal judge ruled that the Government must bear the cost of a "blatantly improper action" against Fitzgerald. Last May, the U.S. Court of Appeals agreed that the law requires that a wrongfully dismissed Federal employee be made "whole again" but does not permit the Government to pay his lawyers' bills. Fitzgerald, an industrial engineer who comes from Birmingham, Ala., is a remote but affable and jaunty-spirited man. However, difficult these years have been, he has resisted any sense of martyrdom. He loved his work and was good at it. But he observes that the 1969 dismissal "effectively ended my career" as if he were commencing on the high price of dry cleaning. What he does now is "baby" stuff, the kind of assignments he worked on when he was just out of college. "That's sad," I commented. "That's bad," he corrected me.

Why stay? Where would he go? Subconsciously, he supposes he knew that his decision to testify could abort his career, "but I hadn't really prepared for it." When he was fired, Fitzgerald went job hunting and found he had speedily been marked "a bad guy." As time went on, the labeling became more imagnitive. Eventually, he was to learn that the dossier the department had been building on him proposed that he was simultaneously a womanizer and a homosexual.

A registered democrat, Fitzgerald described his ideology as "tightwadded." He has a wife who he says has been unstintingly supportive and three children who he believes have not suffered unduly from his career problems.

But "The Case," a multimillion-dollar damage suit against Defense Department officials responsible for the loss of his job eight years ago, occupies a good deal of his time. Luckily for Fitzgerald, he finds life irrepressibly comic. Late last winter, he was invited to address a gathering of Defense rank-and-file employees. The Defense supergrader, with his G–17 rating, faced 100 members of the American Federation of Government Employees who would normally see him as management. They loved him, they cheered him and they gave him an award—a silver whistle. Fitzgerald was enormously pleased. But he noticed that it had been mounted on a plaque, and thereby rendered inoperable.

Stanley Mazaleski's wife, Charlotte, tells him he can't win; his adversary is too powerful. Sometimes, Mazaleski thinks she may be right, but he can't give up. He really believes that "the truth will win out." It has been more than two years since he was fired from his $17,800-a-year job with the Public Health Service, and his life is a shambles. A Ph.D. in preventice medicine, he could not find work in his field for 17 months. For a period, he worked nights as a security guard near his home in Monrovia, Md., and his teenage daughter, eldest of his four children, took a job in a Hot Shoppe to help support the family. Last winter, money was so short that the family lived mostly on potatoes, which Mazaleski, a farm boy from Pennsylvania, had grown in the garden. The debts have piled up, and his creditors are pressing for payments he cannot make; the bank is threatening to foreclose the mortgage on his four-bedroom house; his marriage is desperately strained; friends have fallen away and relatives in Government service who are apparently nervous about their social connections exclude him from family gatherings.

In January, Mazaleski finally found work in Washington with the Environmental Protection Agency, but it is temporary and likely to end any day now. He writes letters incessantly to officials in and out of Government, beseeching help which never comes.

A large, genial, sad-eyed man, Mazaleski went to work for the National Institute of Occupational Safety and Health, a P.H.S. agency, four years ago. His job was to write reports on a variety of dangerous and possibly carcinogenic chemicals used in industry and to develop standards, required by new legislation, for protecting the health of workers exposed to these materials.

Before the year was out, Mazaleski was in trouble. He insisted, against considerable resistance by the medical authorities over him, that the chemical cadmium may cause prostate cancer. A year later, the professional literature proved him right. He said the industry should be required to keep medical records for 20 years on workers exposed to chloroform, a suspected cause of cancer and birth defects; over his protest, the N.I.O.S.H. management reduced the period to a worthless five years. He filed a grievance against a superior who had dealt rudely with him. He complained to superiors that evidence he needed for his work was being withheld. He wrote letters to Congressmen bemoaning delays for setting safety standards, delays that probably made life easier for industry but surely imperiled the health of millions of workers. His criticism found its way into The New York Times early in 1975.

In March 1975, he was fired for "marginal and substandard performance" and for "insubordination." Mazaleski's fate, said Albert R. Lauderbaugh, a senior P.H.S. official who tried to help settle the affair before it reached the firing stage, was "an almost classic example of management's reaction to an internal critic." Mazaleski's former boss, Dr. John May, insists, "His charges have no validity whatsoever. He was fired because he didn't do his job."

What is so bewildering to Mazaleski is that he had spent a lifetime doing the right thing. When the Korean War began, he was about to enter college and he gave up a scholarship to enlist in the Navy. After four years of service, he came home and worked hard on his father's farm, spending six years in evening studies to earn a college degree. He has always been a popular and successful student. He is 44, an exceedingly earnest man who believes in God, the Constitution and conservative government. Sitting in a cramped little office we had borrowed for the interview. I wondered aloud whether Mazaleski was the kind of householder who regularly hung out the American flag on patriotic holidays. Yes, yes, he did. And on Veterans Day, he related, he always took the family on a pilgrimage to Gettysburg National Park. Abruptly, Mazaleski's eyes filled with tears and for several minutes he could not talk.

In the spring of 1976, after President Ford said he wanted every man, woman and child in the country vaccinated against swine flu, the only scientific voice raised against the program belonged to Dr. J. Anthony Morris, a virologist. Even in intimate conversation, the voice is lecture-hall loud; the speech is fluent and precise, the tone self-confident, the inflections an echo of his boyhood in Maryland. Tony Morris, a Ph.D., is a vaccine specialist and he is especially knowledgeable about flu vaccine. He has worked productively and successfully for the Government for most of his life and he has been in trouble with the bureaucracy before for protesting rather insistently that there is no such thing as an effective flu shot—a judgment that could only bring unhappiness to the businesses that make flu vaccines and the doctors who inject them by the millions each year. Taking on the bureaucracy is, at best, risky; tangling with an entire administration is an act of breathtaking nerve. In his zeal to alert the public last year, Morris had seminars on the N.I.H. campus in Bethesda, Md., sent letters to newspapers and Federal

health officials and talked to reporters. His message was that no evidence whatsoever existed that swine flu embodied the virulence of the 1918 pandemic and that, in any event, the vaccine on hand was totally worthless. Most serious of all, it was certainly dangerous. Morris could not predict that it would paralyze and kill anybody, but he did know and warn that it could cause a hypersensitivity in some people that would trigger a whole range of grave illnesses.

That is precisely what happened the following December. By then, Morris, at 58, had been fired from his $32,000 research job at the Bureau of Biologics by Food and Drug Administrator Alexander Schmidt. Schmidt found him guilty of "insubordination and inefficiency." Moreover, his behavior toward his colleagues and superiors "directly challenged the integrity of scientific progress." The Civil Service Commission has upheld the insubordination charge even while acknowledging that Morris's science was sound, and the case is now on its way into the courts.

In 35 years of Government service, Morris has prudently put away money for his retirement, savings that were to have financed travels with his wife. It's almost all gone. He is inflexibly cheerful about all this. Morris says he would rather have his problems than carry on his conscience the burden of people killed or crippled as a result of a staggering sweep of official stupidity.

An extremely reticent man, Morris does not like to talk about his experience in personal terms. But he was willing, finally, to share one lasting lesson of his life. "In 1940, I went to work for one of the truly great men of science, Joe Smadel." After training under Smadel, Morris moved on to other jobs, until Smadel called him back. Smadel had become associate director of the National Institutes of Health.

But Smadel had changed. He had been a dedicated and important advocate of polio vaccine since its release. But a research worker at N.I.H. discovered that the monkey kidney tissue in which polio vaccine had been propagated contained a virus called SV–40 which caused tumors in hamsters. There was no way of knowing whether medical science had conquered polio at the risk of provoking a new affliction. "Joe Smadel couldn't believe it. It was a frightening thing. It's still frightening. That information was held up for two years before it was made public, and I saw Joe Smadel fall apart under the pressure of keeping it quiet. He had gotten himself into a tremendous intellectual box. I said then that never, if I had anything to do about it, would I be caught in an intellectual box like Joe found himself in."

"I get a kick out of outfoxing the bastards. Where else could I be such a son of a bitch and be on the right side?" If there is an ideal position from which to pursue whistleblowing as a steady avocation, Dr. John Nestor occupies it. For 16 years, he has been bedeviling the Food and Drug Administration, which employs him. Since he is a bachelor, there is no family to worry about. He has a crusty self-assurance reminiscent of all the authoritative older-doctor roles Lionel Barrymore used to play. Rude, abrasive, difficult, obstreperous, rigid, inflexible—Nestor has been called all that and more. He will obligingly recite the complaints, observing that none of these flaws is as grievous as the official mendacity he sees all the time.

Nestor, now nearing 65, went to work for F.D.A. in 1961 as a reviewer of drugs for heart and kidney ailments. Nestor was not at F.D.A. long before he concluded that the agency was and had always been the captive of the industry it is supposed to regulate and so he has testified in numerous appearances at Congressional hearings.

In 1972, Nestor was "promoted" into the F.D.A. Office of Compliance—which oversees industry compliance with agency rules—an activity for which he had neither the appetite nor the experience. He has been kicking and fussing ever since. Three years ago, he and a dozen other F.D.A. employees appeared at a hearing before an inquiry conducted by Senator Edward Kennedy and offered testimony charging the agency with corrupt practices in drug approval and with the harassment of dissident employees. The complaints have been investigated, most recently by a special panel which delivered a 766-page report last April. It concluded that the charges were accurate. It also said that officials had lied. The report said Nestor was owed a formal apology, payment of his legal costs and a new position where his talents would be used. He is still waiting.

Nestor is an assiduous leaker. What he knows and what other agency employees feed him (Ernest Fitzgerald calls them "closet patriots") finds its way steadily into the files of Congressional investigators, consumer advocates and media folk. "Let me tell you," he commented over a beer, "the Freedom of Information Act hasn't opened up the Government. The duplicating machine has. I have kept very busy."

Al Louis Ripskis, a slender, mild-mannered bachelor of 40, now has the routine job of program analyst at the Department of Housing and Urban Development. "Paper-shuffling," he calls it contemptuously. The job has no psychic rewards, a dreary state of affairs for a man who went to Federal housing 16 years ago with more idealism than was good for him. But Impact fills the need.

Impact is a "leaksheet," neatly mimeographed, $5-a-year report of almost everything that can go wrong at one public agency. Ripskis writes it with the help of anonymous regional correspondents, and on publication morning, before he signs in for work, he is to be found brashly hawking it on the sidewalk in front of H.U.D. Its subscribers include H.U.D. employees, some high agency officials he hopes to alert to the latest criticism, muckraking reporters in and out of Washington, the Office of Management and Budget and the Library of Congress. The H.U.D. Secretary gets one free. Ripskis says he is out of pocket about $3,000 a year on production costs.

In five years of publication, he has chronicled mismanagement, incompetence, waste and stupidity at his agency, assembling in print the kind of details that rarely get beyond the gossip hour around the water cooler. He flashily reported that a new housing project in Minneapolis lacked adequate elevators but had a brothel and that a high-ranking H.U.D. official seldom traveled anywhere without his mistress. In recent years, he has nagged at H.U.D. for its neglect of the lead-paint problems in housing. In the middle of President Ford's drive against inflation, Impact was reporting that H.U.D. Secretary Carla Hills had spent $82,000 for new air-conditioning for a conference room.

Born in Lithuania, Ripskis spent four years in a D.P. camp in Germany, and remembers it all; the dirt, the crowding, the lack of privacy. As a refugee in America, he lived in Chicago tenements. Out of school, Ripskis got a job with the Public Housing Administration in 1961, planning to stay no longer than two years. "It was to be my own domestic Peace Corps effort." But he began moving up the bureaucratic ladder and he was full of widely admired and widely ignored ideas for making public housing look more like homes than barracks. In 1965, after H.U.D. had become the umbrella agent for housing, Ripskis's innovative approaches carried him to Washington into a key task force called Social Concerns of H.U.D. The notion was that this time the Government was really going to build human concerns into public housing. Ripskis remembers that period as a wonderful time. The group, he says, wrote a wonderful report. And, in the end, it was interred wherever good Government reports go to die.

That and the fate of a H.U.D. co-worker laid the groundwork for impact. The newsletter's predecessor was Quest, an in-house underground journal published by a friend who, as a result, was briefly exiled to Alaska. Setting out on his own soon after, Ripskis planned the way with canny caution. "I have managed to survive with a minimum of harassment, and it was not by accident. The critical choices came in the beginning. If they decide to fire you at the start, it's hard to reverse the bureaucracy once it gets rolling. But I started muckraking and kicking up a lot of publicity, and I became well known, so the department knew it would be bloody if they canned me."

Ripakis's modest success is instructive. The whistleblower must not only be strong and knowledgable, but exceptionally careful. Most people who wind up in the fraternity begin almost accidentally, expecting gratitude and encountering indeed, a stone wall of either indifferences or hostility.

Some people have mused that that the hazards were so great it might be sensible for the public-spirited bureaucrat to stay on the job, stay anonymous and simply "leak for life." That choice, of course, is made daily by hundreds of middle-management employees who become regular and protected sources for reporters and Congressional investigators. It's one way to serve the public interest without pain and intense public drama. What would recent American history have been, for example, without those grand panjandrums of whistleblowing. Daniel Ellsberg, who xeroxed the Pentagon Papers, and Victor Marchetti, the first to tell us how the C.I.A. really works.

On the other hand, nothing about the activity guarantees it will fill a real need or gain wide public support. One of the celebrated whistleblowers of the early 1960's was Otto Otepka, the chief of security at the State Department who earnestly believed subversive held down Government jobs in his agency. He leaked confidential loyalty files to the Senate Internal Security subcommittee, which was still pursuing "Reds" in Government. Otepka was demoted, wiretapped and harassed in other illegal ways. In that case, it was not the advocates of free speech or open government who came to his support; Otepka found his modest constituency in the John Birch Society.

As it stands now, the civil servant who squawks is apt to be regarded at worst as a Judas, at best as a foolish aberration. One of the main priorities of the I.P.S. Project for Government Accountability is to institutionalize whistleblowing, to create a climate where it is easier and even commonplace for a public servant to deliver up to the public details of waste and deceit in his agency.

"We don't want saints and heroes," says Ralph Stavins, an I.P.S. fellow who heads the project. "We want this made automatic and procedural."

The I.P.S. literature on the subject includes a flashy red-white-and-blue brochure with a cover exhorting Federal workers to "Point Out Illegality, Inefficiency and Waste." Its final words are from one of President Carter's campaign speeches. Ten days before the election, Carter declared, "I intend to seek strong legislation to protect our Federal employees from harassment and dismissal if they find out and report waste or dishonesty by their supervisors or others.

The Fitzgerald case, where a dedicated civil servant was fired from the Defense Department for reporting cost overruns, must never be repeated."

A number of people including Fitzgerald took heart from that notice, but not much has happened lately to suggest a safer future. Carter's Civil Service Commission chairman, Alan Campbell, went to the conference and brought greetings from the President and extremely cautious expression of his own sympathies.

When I talked to him a few weeks later, Campbell said no legislation was ready and none likely to be until early next year. Moreover, while the Administration might eventually offer some protection to future whistleblowers, retroactivity for those who had suffered penalties was unlikely. But he felt it important to stress a new spirit in the commission demonstrated by a recent in-house inquiry. An investigation had just concluded that two officials in the General Services Administration in Philadelphia had been improperly demoted after protesting Nixonian abuses of the merit system. Exoneration had required a four year fight. Campbell hopes the whole process can be accelerated.

Campbell's views on the entire subject are clearly divided. On the one hand, he has the Sisyphean job of getting the bureaucracy functioning more efficiently, on the other hand, he seems to see the task as separate from and possibly complicated by the problems of an individual bureaucrat who protests inefficiencies that make it hard to work efficiently. He had just come back from a tour of regional offices where he found middle-level management personnel complaining they were stifled by restrictions against penalizing employees. "If anything," he said, "one can argue that the system is too cumbersome if what you are concerned with is getting on with the job. A whistleblower may be a perfectly straight and absolutely right person or he may be a troublemaker. One can't assume."

In Campbell's view, there are "Inevitable limitations" on employees' rights to speak out. After all, a middle-management executive in private industry who peaches on his boss can expect immediate dismissal. As an example of the Government's right to curtail free speech where it interferes with policy, he cites the Carter recall of General Singlaub from Korea. Campbell says he sees no real difference between a U.S. Army general objecting to the removal of U.S. troops from Korea and a Pentagon cost analyst telling Congress about a gross waste of public funds. But there is a difference: A general in the United States, by tradition, is forbidden to make foreign-policy statements. A competent and honest bureaucrat is a permanent public servant who owes his allegiance to the Government and, beyond that, the taxpayer.

Campbell is thinking of moving the Civil Service appeals procedure into a separate agency so that the commission is no longer in the position of both making the rules and judging whether they have been violated. Otherwise, he is not entirely sure that any new law can be composed that would provide better protection than now exists. Congress does not entirely agree. At the most recent count, at least six legislators were considering new approaches to the problem. One is an I.P.S. model bill called "Openness in Government," which not only would pay legal costs to the wronged civil servant but would also punish his punisher.

A controversial proposal in the bill would set up an Office of Administrative Oversight, an ombudsman agency that would advise whistleblowers and investigate complaints of unfair, punitive treatment. Of course, that would mean yet another bureaucracy. And there is no telling how long it would be before some civil servant from the Office of Administrative Oversight blew the whistle on the ombudsman for whistleblowers ●

## A GIANT STEP FOR CLEVELAND

### HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Ms. OAKAR. Mr. Speaker, in our continuing quest for scientific and technological advancement, permit me to share with you one of the newest sources of pride in my 20th District in Ohio.

On Monday, the Lewis Research Center of the National Aeronautics and Space Administration will be dedicating its new Visitor Information Center. This impressive undertaking not only opens up new educational horizons for visitors from and to the greater Cleveland area, but more importantly, it is a sign of progress and stability for one of our greatest assets that can now be shared.

The same space age imagination that propelled our dramatic manned flights to the moon is the very foundation of NASA. Spirits of workers at NASA's 11 centers and stations should be bouyed by the dedication of this new facility. It is a sign of our commitment to the steady pursuit of advancements in aeronautical and space research to enhance the quality of life for us all. It also is a positive indicator following months of negative comments since the Office of Budget and Management last fall proposed across-the-board personnel cuts for NASA. We cannot and should not cripple our research efforts, as I have pointed out to NASA officials from both Washington headquarters and Lewis Research Center.

The New Visitor Center is a step toward strengthening our efforts as we stress the usefulness of NASA research to all of those who will partake of this new service.

This giant step at Lewis Research Center in Cleveland is, in fact, a giant step for mankind. I share with you NASA's own description of this new Visitor Information Center:

Six years in the making, the new Lewis Visitor Information Center is one of the more unusual facilities of its kind in the country. It is not so much a museum as a living reflection of today and tomorrow in the world of space, air travel, and terrestrial applications of space, with the emphasis on Cleveland Lewis' continuing contributions to these programs. There are 10,000 square feet of exhibit area, hundreds of working models and striking graphics, a 150-seat theater, and a Resource Library filled with audio visuals of all kinds primarily for educators. The Visitor Information Center is at one and the same time a lasting tribute to the skills and imagination of the men and women of the Lewis Research Center and a rich community asset of which every Greater Cleveland can be proud.●

## AGRICULTURAL EXPORTS REPORT

### HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. HAGEDORN. Mr. Speaker, in the long run, it will be expanded market development, rather than expanded governmental programs, that will provide the key to farmer prosperity. For this reason, it is some concern that the volume of U.S. agricultural exports declined in 1977 for the first time since 1974, falling from 104 million tons in 1976 to 99 million tons in 1977. Particularly hard hit were wheat and feedgrain exports which declined in volume by 8 and 6 percent respectively, and whose total export value dropped 23 percent from $10.1 to $7.8 billion.

Despite this, higher aggregate farm prices, particularly in the first half of the year, resulted in record values for U.S. farm exports reaching $23.7 billion. Soybean and cotton exports were major contributors to this situation. Although agricultural imports rose by $2.5 billion during this period from $11 billion to $13.5 billion, the U.S. agricultural surplus of $10.2 billion represented the fourth consecutive year in which this surplus exceeded $10 billion.

I would like to include in the RECORD at this point a summary of the agricultural export situation in 1977 published in Foreign Agriculture by Sally B. Byrne, an economist with the Department of Agriculture:

HIGHER PRICES PUSHED 1977 U.S. FARM EXPORTS TO RECORD VALUE

(By Sally B. Byrne)

The value of U.S. agricultural exports continued to rise in calendar 1977, reaching $23.7 billion.

Higher prices created the gain. Export volume fell from 104 million tons to 99 million.

The export price index averaged well above the 1976 level, although prices dropped after peaking in May.

Except for feedgrains and wheat, exports of most agricultural commodities rose in both volume and value during 1977.

Because of lower prices and reduced volume, the value of wheat and feedgrain exports dropped by $2.3 billion.

The largest export value gains were made by cotton, soybeans, animal fats, vegetable oils, and prepared feeds and fodders.

The export unit value for wheat averaged more than a fifth below that of 1976, and the feedgrain unity value was down more than a tenth.

However, export prices averaged higher in 1977 for most other commodities, including oilseeds and products, cotton, tobacco, rice, cattle hides, and animal fats.

The value of U.S. agricultural imports jumped from $11 billion to $13.45 billion in 1977. Much of the increase was a result of higher prices for tropical products—cocoa, tea, and spices, as well as coffee.

Imports of green and processed coffee were up 49 percent to $4.24 billion in 1977. Imports of meats and vegetable oils declined in volume. U.S. sugar imports increased 27 percent in volume, but the lower import unit value offset that rise.

The U.S. agricultural trade surplus totaled $10.2 billion in 1977, while the overall U.S. trade deficit in that year was $27 billion.

U.S. agricultural exports to developed countries rose 6 percent to $14.6 billion in 1977. Larger values were recorded for shipments to Japan, Western Europe, and Canada.

Exports to developing countries were higher by 8 percent to $7.4 billion in value. Strong growth occurred in exports to the Middle East, Latin America, Africa, and the Far East.

However, shipments to South Asia dropped by almost half. That region is benefiting from good crops and expanded food supplies.

Exports to the centrally planned countries dropped significantly in 1977. The value of shipments to the USSR declined from $1.49 billion to $1.04 billion.

Direct shipments to Eastern Europe fell from $927 million to $604 million. In addition, a significant volume of grains and oilseeds is transshipped through Western Europe to Eastern Europe.

U.S. GRAIN SHIPMENTS

U.S. exports of wheat and wheat products declined 8 percent in volume during 1977 to the lowest level since 1972.

The export unit value averaged $115 per ton, down from $147 per ton in 1976. World wheat harvests and exportable supplies have been large in both 1976/77 and 1977/78.

Japan remained the largest U.S. wheat market during 1977, with shipments totaling 3.32 million metric tons.

Exports to the USSR rebounded to 3.02 million tons. Sharp increases were made in shipments to Iran, Portugal, Mexico, and Taiwan. Exports to Egypt rose 4 percent in volume.

The decline in U.S. wheat exports was concentrated in a few areas of substantial reductions—the European Community (EC), Eastern Europe, South Asia, and Brazil. Exports to Korea fell 5 percent to 1.80 million tons.

Large world coarse-grain crops reduced U.S. feedgrain and product exports in 1977. Although 6 percent below the 1976 level, 1977 exports were the second largest on record. The export unit value dropped from $114 per ton to $101.

Much of the decline in U.S. feedgrain exports was recorded in shipments to the EC, the USSR, Eastern Europe, and Spain. Exports also declined to Canada and Egypt.

U.S. feedgrain exports to Japan rose 17 percent to 10.3 million tons. Exports were sharply higher to Portugal, South Korea, Taiwan, Greece, and Israel.

In 1977, U.S. rice exports rose 11 percent in volume to 2.27 million tons—a new calendar-year high. Iran became the largest market for U.S. rice, taking 477,000 tons (up from 239,000 tons in 1976). Exports rose 241 percent to Nigeria and 466 percent to Saudi Arabia. Shipments to the Soviet Union, Canada, and South Africa also increased significantly.

U.S. rice exports to India, Bangladesh, and South Korea dropped sharply in 1977. Exports to Indonesia fell 36 percent to 250,000 tons. Volume declines were recorded for exports to West Germany, Portugal, and the Netherlands.

SOYBEAN EXPORTS CLIMB

U.S. exports of soybeans and soybean meal combined topped the 1976 record of 21.5 million tons (soybean basis).

Larger bean exports offset a reduction for soybean meal. The increase demonstrates the strength of foreign demand for U.S. soybeans.

U.S. supplies were low following the short 1976 crop, and prices were sharply higher.

The export unit value reached a high of $352 per ton in May, and averaged $271 per ton for the year, compared with $216 in 1976. The meal export unit value was up a fourth.

U.S. soybean exports to the EC were up 4 percent to 7.51 million tons. Exports to Japan were up 11 percent to 3.42 million tons.

Shipments to Spain and Taiwan dipped marginally. Exports to the USSR totaled 565,000 tons, just below 1976's 571,000.

U.S. oilmeal exports to the EC, Eastern Europe, and Spain dropped substantially in 1977. Larger shipments were made to Japan and Canada.

U.S. exports of vegetable oils and waxes increased 30 percent in volume and 42 percent in value in 1977.

Soybean oil exports were up 52 percent in volume and cottonseed oil exports were up 40 percent. Exports of peanut and other oils declined.

Total U.S. fats and oils export to India rose from 70,000 tons to 252,000 tons in 1977.

Exports to Egypt rose 36 percent to 207,000 tons. Substantial gains occurred in shipments to Latin America, the Netherlands, and Iran.

Sharp reductions were recorded in U.S. vegetable oil exports to Pakistan, Bangladesh, and Japan.

U.S. cotton exports (excluding linters) rebounded in 1977, rising 30 percent above 1976's depressed volume. The unit value averaged $344 per 480-pound bale, up from $306.

South Korea was the largest market for U.S. cotton, with shipments of 933,000 bales, 12 percent above the 1976 level.

Exports to Japan rose 9 percent to 906 million bales. Significant volume increases were recorded for exports to Hong Kong, Taiwan, Indonesia, and Western Europe. Exports to India totaled 137,000 bales, and those to Egypt, 110,000 bales.

TOBACCO EXPORTS $1 BILLION FOR FIRST TIME

U.S. exports of unmanufactured tobacco (including bulk smoking tobacco) increased 8 percent in volume in 1977. Value jumped to $1.11 billion, exceeding $1 billion for the first time.

Developing countries provided the expansion in tobacco exports. Shipments to developing countries rose 25 percent to 75,000 tons in 1977. Egypt and Taiwan were two of the fastest growing markets.

Exports to the EC were about unchanged in 1977. The 35 percent reduction in exports to the United Kingdom was offset by larger exports to Denmark, the Netherlands, Italy, and West Germany.

U.S. exports of animals and animal products rose 12 percent in value during 1977. The growth was shared among many products.

Led by a 27 percent volume increase for nonfat dry milk, dairy product exports rose 28 percent in value.

Inedible tallow exports jumped 24 percent in volume to a record 1.31 million tons in 1977. The value increased 34 percent to $504 million.

U.S. AGRICULTURAL EXPORTS: VALUE BY COMMODITY, CALENDAR 1974–77

| Commodity | Millions of dollars | | | | 1975/76 change (percent) |
|---|---|---|---|---|---|
| | 1974 | 1975 | 1976 | 1977 | |

## UNILATERAL UNARMAMENT: THE UTGOFF UNPRINCIPLE

### HON. WILLIAM L. DICKINSON

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. DICKINSON. Mr. Speaker, I stood in the well of this House on Thursday afternoon, April 13, to warn my colleagues of the primrose-path approach to national security and national survival the Carter administration was taking. In this morning's Washington Post—April 17—Evans and Novak discuss in great detail a principal author of the "unilateral unarmament" negative philosophy. The National Security Council does not preach unilateral disarmament because that would be too obvious. But let every strategic system decay or become highly vulnerable—that is OK. Give your policemen guns, but no bullets. When you try to stop a miscreant under such circumstances—that is, Angola, Somalia, Rhodesia—your only threat is "Halt! Or I'll click my trigger!"

The "Utgoff principle"—as explained to Evans and Novak by the NSC deep thinkers—sounds suspiciously like the situation wherein one finds oneself only a "little bit pregnant." To quote:

While determined the United States should never be inferior, Utgoff added he equally feared being superior because it might encourage irresponsible U.S. conduct. An NSC go-between explained to us that Utgoff meant that if either Washington or Moscow thought it had strategic advantage, high-risk confrontation might result.

Mr. Speaker: Every day it becomes more obvious why the U.S. Navy is in deep trouble, why Minuteman will soon be at the mercy of Soviet ICBMs, with no alternative in sight, why there is no B–1, why the B77 bomb was eliminated. A few more cost problems and the Trident will probably be scrapped. Mr. Speaker, we are fast approaching the degredation of the Triad into a "Duad," then into a Monad and probably a "Nonad." Why must this happen? Because the NSC staff does not understand the world in which it is trying to survive. Let us take one very clear example—the enhanced radiation decision. We have been led to believe that the President hopes to use the production or nonproduction of ER weapons as a bargaining chip. How did the Soviets react? The Washington Post of April 17, today, has the AP clip from Moscow:

PRAVDA ON NEUTRON BOMB

Moscow.—The Soviet Union said yesterday that the U.S. decision to delay production and deployment of the neutron bomb will be a useless "trump card" in arms negotiations. "It is perfectly clear that the neutron bomb is not a subject in the discussions now under way between the U.S.S.R. and the U.S.A.," said Yuli Yakhontov in a Pravda commentary three days before the arrival of Secretary of State Cyrus R. Vance.

Evans and Novak conclude their article by referring to unknown, but obviously powerful, policymaking middle-level staffs:

For Utgoff is not unique. Middle-level officials, seared by the flame of Vietnam, cannot trust their country to handle power responsibly. They incline to Pogo's Vietnam slogan, posters of which have adorned the walls of the U.S. Arms Control Agency: "I have met the enemy and he is us!"

The Utgoff principle raises doubt whether officials carrying that national self-image can effectively negotiate with an adversary not similarly burdened.

Mr. Speaker, the last sentence is the key to all of the problems today in the SALT negotiations—the U.S. negotiators. Let me remind my distinguished colleagues that Genghis Khan was an early ancestor of the Russians. The following quote attributed to Genghis Khan is from Lynn Montross' book, "War Through the Ages," page 144:

The greatest happiness is to vanquish your enemies, to chase them before you, to rob them of their wealth, to see those dear to them bathed in tears, to clasp to your bosom their wives and daughters.

Mr. Speaker, are we in danger of losing our Democracy?

The referred-to article follows:

THE UTGOFF PRINCIPLE

One of Zbigniew Brzezinski's key technical advisers, privately addressing fellow arms specialists over two months ago, propounded this principle: Better that this country not enjoy a clear arms superiority over the Soviet Union for fear we would sometimes misuse it.

Victor A. Utgoff, director of policy analysis on Brzezinski's National Security Council staff, thereby set off spirited debate within the small, contentious community of strategic experts. Although he complains off-the-record comments are being taken out of context, the Utgoff principle explains much about national security policy in the Carter administration.

His remarks reflect self-distrust among middle-level officials. Fearful that the United States will make no more principled use of military power than the Soviet Union, they are concerned not only about deterrence in Moscow but also self-deterrence in Washington. That mind-set among technical advisers may explain why even nontechnician Brzezinski, traditionally a hard-liner, has not escaped charges of softness toward the Kremlin.

Utgoff addressed 840 weapons experts in Monterey, Calif., Feb. 1 at a conference sponsored by the American Institute of Aeronautics and Astronautics. He refused to talk to us or give us the text of his speech. However, NSC staffers have corrected and amplified accounts given us by those present.

In no sense did Utgoff advocate unilateral disarmament. Describing the Carter administration's commitment to strategic arms control as an "article of faith," he called for "strategic equality . . . through adequately, verifiable arms-control agreements." If that is "impossible," he advocated "whatever programs are necessary for our national security," adding, "We'll pay whatever price it takes."

What followed, however, began to raise eyebrows: "We cannot afford to allow ourselves to drift into significant strategic inferiority," Utgoff said. But what is "significant" inferiority? He soon argued that superiority is no blessing.

Losing superiority would "not be the end of the world," he said. "Some of our advantages are fading, and in some cases, it might be to our advantage to allow U.S. superiority to fade away," Utgoff said. Why? NSC staffers told us Utgoff feels losing U.S. superiority in submarine-based missiles might induce the Soviets toward fewer land-based missiles—a highly debatable proposition.

Utgoff's speech reaches the heart of what bothers him about U.S. weapons superiority. "I suspect we would occasionally use it as a way of throwing our weight around in some very risky ways." That is the essence of self-deterrence. If we do not have mobile missiles, neutron warheads and a superior Navy, we cannot be tempted to use them.

Those attending Utgoff's speech were instructed it was strictly off the record. Nevertheless, a set of surreptitious notes soon circulated in Washington, and was read at a conference at the Army-Navy Club here March 21. While those nonverbatim notes are incomplete, they do not differ in substance from the NSC official version given us.

Utgoff, 39, holds a doctorate in electoral engineering and was known as an advocate of "minimum deterrence" as a systems analyst at the Center of Naval Analysis before joining this administration. His newness to high-level policymaking explains what colleagues call his outrage that his speech (delivered to 840 people) leaked out. NSC officials told us Utgoff was "brainstorming," an unusual description for a prepared speech.

Nevertheless, he was back propounding the Utgoff principle March 27 in private conversation with a naval officer. While determined the United States should never be inferior, Utgoff added he equally feared being superior because it might encourage irresponsible U.S. conduct. An NSC go-between explained to us Utgoff meant that if either Washington or Moscow thought it had a strategic advantage, high-risk confrontation might result.

Utgoff's speech was not cleared by superiors and is not government policy, the NSC spokesman told us. Surely, it does not reflect the world view of Brzezinski. But as a non-expert in the mysterious world of arms control, Brzezinski depends on technicians who share the considerably different world-view of Vic Utgoff.

For Utgoff is not unique. Middle-level officials, seared by the flame of Vietnam, cannot trust their country to handle power responsibly. They incline to Pogo's Vietnam slogan, posters of which have adorned the walls of the U.S. Arms Control Agency. "I have met the enemy and he is us" (posters of which have adorned walls of the U.S. Arms Control Agency). The Utgoff principle raises doubt whether officials carrying that national self-image can effectively negotiate with an adversary not similarly burdened.●

## THE CAUSE OF INFLATIONARY BUDGET DEFICITS

### HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Ms. HOLT. Mr. Speaker, we recently received a letter from two colleagues who advised us that proposed tax reductions are responsible for the 1979 inflationary budget deficit.

The authors are suggesting that we ignore the record of Congress in recent years, forget that the Federal budget is out of control, and pretend that runaway spending is not occurring.

To remind everybody of that record, I am submitting for your consideration a comparison of actual 1973 Federal out-

lays with the outlays proposed for 1979 by the House Budget Committee. The chart shows the percentage increase in each function and the total percentage increase in the budget. You will see that the Federal budget will have doubled in just 6 years if we accept the House Budget Committee's recommendation.

Taxpayers around the country are steaming angry about that record, and I share their anger. Here is the truth about the cause of wildly inflationary budget deficits:

FEDERAL BUDGET DOUBLES IN 6 YEARS

[Outlays in millions of dollars]

| | Function | Fiscal year 1973 | Budget Committee fiscal year 1979 | Change, 1973 to 1979 (percent) |
|---|---|---|---|---|
| 050 | National defense | 74,541 | 115,679 | 55 |
| 150 | International Affairs | 4,036 | 6,600 | 64 |
| 250 | General science, space, and technology | 4,030 | 5,027 | 25 |
| 270 | Energy | 1,180 | 9,252 | 684 |
| 300 | Natural resources and environment | 4,714 | 12,013 | 155 |
| 350 | Agriculture | 4,855 | 12,188 | 151 |
| 370 | Commerce and housing credit | 860 | 3,700 | 330 |
| 400 | Transportation | 9,070 | 17,809 | 96 |
| 450 | Community and regional development | 4,593 | 10,291 | 124 |
| 500 | Education, training, employment and social services | 12,735 | 31,429 | 147 |
| 550 | Health | 18,832 | 49,550 | 163 |
| 600 | Income security | 72,958 | 159,339 | 118 |
| 700 | Veterans benefits and services | 12,013 | 20,471 | 70 |
| 750 | Administration of justice | 2,131 | 4,214 | 98 |
| 800 | General government | 2,682 | 4,059 | 51 |
| 850 | General purpose fiscal assistance | 7,351 | 9,237 | 26 |
| 900 | Interest | 22,813 | 47,000 | 106 |
| 920 | Allowances | | 1,000 | |
| 950 | Undistributed offseting receipts | −12,318 | −17,500 | |
| | Total | 247,074 | 501,358 | 103 |

●

## FLORIDA POWER CORP. PIONEERS NEW FUEL SOURCE

### HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. FUQUA. Mr. Speaker, it gives me a great deal of pleasure to bring to the attention of the Congress a bold and innovative program in the field of energy being carried out by the Florida Power Corp. in my great State.

The program combines a scarce resource, oil, with a bountiful one in this Nation, coal.

By pulverizing the coal and mixing it with oil, a very acceptable fuel is developed for use in present oil-burning plants.

It goes without saying that it can have tremendous impact on the energy picture throughout this great Nation.

Florida Power Corp. customers in the 32 west-central Florida counties served by the company have been the first consumers in the United States to receive this commercially produced electricity from a powerplant burning this fuel.

The composite fuel, sometimes called "coil," was first used at the company's Crystal River unit 1 on January 25, 1978. On that date, over 1 million kilowatt-hours of electricity were generated using the new fuel, lighting lights, and heating water in homes and businesses from Apalachicola to St. Petersburg. Totally, the company has generated approximately 3.6 million kilowatt-hours from "coil"—enough power to serve 4,075 average households for 1 month.

The concept of mixing coal and oil is not new, dating back to World War I days. However, what Florida Power and its partner in the composite fuel project, the Dravo Corp. of Pittsburgh, have done has attracted national and international attention. By pulverizing coal to face-powder fineness, they have managed to keep it in suspension in the oil for extended periods of time. Experiments in the past of others involved continuous stirring of the mixture to keep the coal particles from settling.

And, the early programs were limited somewhat by the small amount of coal content to the total composition, the Crystal River project has seen ratios of 33/67, by weight, of coal to oil successfully produced and burned. Before the research project's end in late April, Florida Power hopes to have increased that ratio to 50/50.

The composite fuel is made at the Crystal River plant site at the rate of up to 1,000 barrels daily. It is stored in a fuel barge until it is used in the powerplant.

The project has broad implications for a nation heavily reliant on imported petroleum.

First, it shows how the country's most abundant fuel supply—coal—can be utilized in many existing, oil-burning plants. Just as important, the project abundant fuel supply—coal—can be burned in existing plants without modification of burners, boilers or other components thus presenting a potential savings of millions of dollars in capital investment to convert oil fired plants to totally coal fired units.

Among the several other advantages of the composite fuel are:

It can be produced, transported, stored as a concentrate and then diluted before use;

It can be used as either a primary or secondary source of fuel in any oil burning plant and, possibly, in those that now burn natural gas; and

Environmentally, it is a much "cleaner" fuel than coal alone.

This project is one in which I take great pride and commendation is due those who are carrying it forward, particularly the employees at the Crystal River plant. It is already a great success and its implications will be far reaching when other coal burning plants adopt this concept.

It seems to me that this is a prime example of how this Nation, through innovation, can better utilize its dwindling supply of oil as well as cutting out dependence on imports and the consequent drain in our balance of payments with other nations. ●

## UNIVERSITY TO INAUGURATE PRESIDENT, DEDICATE INSTITUTE THIS MONTH

### HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. QUILLEN. Mr. Speaker, the remainder of April is going to be especially noteworthy in the First District of Tennessee, particularly on the campus of East Tennessee State University.

Two events of vital importance to the growth and development of the university will occur within days of each other. One is the April 20 dedication of the Institute for Appalachian Affairs, a newly established entity that symbolizes the dedication of the university to providing educational opportunities for the people of Appalachia, throughout its existence.

The second is the April 28 inauguration of the new president of East Tennessee State University, Dr. Arthur H. DeRosier, Jr.—a man who is the personification of energy, enthusiasm, and erudition.

East Tennessee State University enrolls over 10,000 undergraduate and graduate students annually, with admissions growing each fall. It was founded in 1911 as a normal school for training public school teachers to serve the Appalachian area.

It has grown steadily in scope and quality, until today it offers a wide variety of programs in the arts and sciences, business, technology, and education.

The East Tennessee State University College of Medicine, created with the help of Federal funds from the Teague-Cranston Act, will be admitting its first class of students this fall, and already is serving as a magnet attracting much-needed family physicians to the Appalachian area.

Dr. Art DeRosier will be the fifth president to guide the university in its growth. He is a dynamic educator and administrator who has served on the faculties of the Citadel, Converse College, the University of Southern Mississippi, the University of Oklahoma, and East Tennessee State University. He has been the assistant dean of the graduate school of the University of Oklahoma, as well as dean of the graduate school and vice president for administration of East Tennessee State University. Prior to returning to the Johnson City campus last year, he served as vice chancellor of academic affairs and vice chancellor of the University of Mississippi.

Born in Norwich, Conn., on February 18, 1931, Dr. DeRosier served in the U.S. Air Force from 1948 to 1952. He earned his baccalaureate in history with high honors from the University of Southern Mississippi. His M.A. and Ph. D. in history are from the University of South Carolina.

A Phi Beta Kappa, Dr. DeRosier has authored several scholarly works, including "The Removal of the Choctaw In-

dians," which was published by the University of Tennessee Press and Harper Torchbooks.

In the 9 months since he assumed the duties of the presidency, Dr. DeRosier already has begun a new development program emphasizing private giving, contracts, and grants. A new academic reorganization promises the university even greater potential for meeting the needs of the Appalachian region in coming years, under the leadership of Dr. Arthur H. DeRosier, Jr.

It is, therefore, fitting that his inauguration and the dedication of the Institute for Appalachian Affairs be conducted contiguously.

Though the university historically has worked with many agencies concerned with regional development, there has never been a single academic entity concerned with assisting the people of the region in solving their problems and preserving their culture.

The institute will endeavor to act as a clearinghouse, matching resources with development problems. From a cultural standpoint, the institute will strive to maintain and preserve cultural identity through the sponsorship of regionally oriented festivals and shows. Academically, the institute will take the lead in allying various university offerings into a degree program in Appalachian studies. These pursuits will be broadened with the addition of conferences, workshops, and the encouragement of publications dealing with Appalachian affairs.

April traditionally is a month of awakening, revitalization, and increased awareness of the world around us.

Therefore, it is particularly fitting that the House pause to note the events taking place this month, for they are symbolic, not only of what is happening on the university campus, but in the Appalachian region as a whole.●

## DO ALASKANS SUPPORT H.R. 39?

### HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. YOUNG of Alaska. Mr. Speaker, numerous claims have been made that the people of Alaska support H.R. 39, the Alaska National Interest Lands Act, which was reported out of the Interior Committee this month. These claims are evidently based on letters received from a rather vocal minority of the residents of Alaska, many of whom have spent only a short time in the State.

I have recently entered into the RECORD copies of letters from the Governor of Alaska and the Fairbanks North Star Borough Assembly, both of which opposed enactment of this bill. I would like to add to this list a letter received from Igloo No. 4 of the Pioneers of Alaska. The Pioneers are a civic group open to membership to all Alaskans with a 30-year continuous residency, and therefore this group represents the feelings of long-term Alaskan residents. I hope that the Members of the House will take these views into account when voting on this legislation.

Text of the letter follows:

PIONEERS OF ALASKA,
IGLOO, No. 4,
*Fairbanks, Alaska, March 24, 1978.*

Hon. DON YOUNG,
*United States Representative, Longworth House Office Building, Washintgon, D.C.*

DEAR DON: The accompanying article appeared in the Daily News-Miner, Fairbanks, Alaska, Monday, March 20, 1978.

Discussion of the article was brought to the floor at a meeting of Igloo No. 4, Pioneers of Alaska, held in Fairbanks on March 20, 1978. A motion was made and unanimously passed that Mr. Kevin Harun's letter in regards to HB39 does not express their thoughts on the land lockup. Further, a check with the Fairbanks North Star Borough shows that Mr. Harun did not represent the Borough Assembly in his statement.

For your information, Igloo No. 4, Pioneers of Alaska (Fairbanks) is one of 15 Igloos in the State. It has a membership of 690. One of the requirements for membership is 30 years continuous residence in Alaska and some of its members are 3rd generation Alaskans. As a result, the opinion expressed by this group is based on a long living experience in Alaska. They have had to make their living in Alaska and are well aware of the need for job opportunities that come directly or indirectly from resource development.

They love Alaska and its environment. The fact that so many people want to come to Alaska points out the sound job that early-day pioneers have done in making the State so enticing. It is their contention that people who are tied to the land respect the land, the rights of people, and the wildlife. To deprive the people of land and resources is deeply resented. The growing tendency to empower governmental agencies with the right to plan the development and manage the life style of people residing in a hostile environment repulses imagination, creativity, and initiative.

On the other hand, Mr. Harun, a young man who has been in Alaska for only a few years, is enjoying the benefits and pleasures created through honest toil by those who have gone before and recently he has been employed by the Fairbanks Environmental Center.

We hope you introduce this letter into the Congressional Record and thereby make the thoughts of these long-time Alaskans better known.

Sincerely,

DONALD H. DINKEL,
*President.*●

## WHITE HOUSE HIGH SCHOOL BAND IN CHERRY BLOSSOM PARADE

### HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. GORE. Mr. Speaker, I want to bring to the attention of the Congress the fact that the 88-member marching White House High School band was chosen to represent Tennessee in the Cherry Blossom Festival parade recently held in Washington and did so in superb style.

This band is from White House, Tenn., and is directed by James Story, a 1977 graduate of Tennessee Tech University, Cookeville, Tenn. In his first year as band director at White House, he was singled out for this honor on the basis of his music ability and style, and the excellence of the performing band.

This band has won honors in competition in Nashville, Tenn., at Middle Tennessee State University, Murfreesboro, Tenn., at Tennessee Tech University, Cookeville, Tenn., and in this year's Cherry Blossom parade where it placed third in the class A competition.

Mr. Speaker, there were only 9 winners out of 41 bands. You can readily see, therefore, what a distinction this is. I am proud to extend my congratulations to Mr. Story and to all the members of the White House High School band for winning third place honors in the Cherry Blossom parade. A salute for a job well-done.●

## INTRODUCTION OF AGRICULTURAL EXPORT CREDIT ACT

### HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. LEACH. Mr. Speaker, I am today introducing the Intermediate Term Agricultural Export Credit Act of 1978 as a means of assisting developing nations in meeting the growing demand for wholesome, nutritious food while at the same time boosting the exports of U.S. farm products.

This legislation creates an intermediate Commodity Credit Corp. Credit program which provides loan terms of from 5 to 10 years to develop foreign markets for agricultural commodities including breeding livestock.

Currently the CCC provides only short term loans of 6 months to 3 years under a program begun in 1956 to give the United States a more competitive position with other exporting nations around the world.

This type of legislation not only provides assistance in an area where our farmers are particularly hard pressed but does so at no cost to the taxpayer. These loans would be repaid with interest at a rate of one-half of one percent above the average costs of funds borrowed by the CCC from the U.S. Treasury.

The longer term loans provided by this bill will allow importing nations to utilize the funds for trade and market development activities. For example, a country could use a medium term loan to buy grain and then might use domestic funds which otherwise would have been devoted to purchase the grain to construct local grain storage and unloading facilities while repaying the loan over a 5- to 10-year period.

A 1976 study conducted by the General Accounting Office called attention to the tremendous losses of food in needy countries due to lack of effective unloading and storage facilities. Billions of dollars of food is spoiling without reaching empty stomachs because adequate transportation and storage simply does not

exist. Food losses will multiply unless developing countries and donors of economic assistance concentrate on establishing and maintaining adequate facilities for unloading, transporting and storing food commodities.

Such facilities would accrue to the benefit of the people seeking our food, to the benefit of the American farmer through the foreign nation's increased capability for future purchases, and to the benefit of the entire U.S. economy in assisting our balance-of-payments problem.

Given the competitive disadvantage and the Government restrictions that the United States now labors under in terms of agricultural exports, we are often the residual supplier rather than the first supplier of grain. This bill should help reverse that unacceptable situation.

In 1977 the U.S. portion of the world wheat and coarse grain sales declined. The superior marketing efforts of Canada and Australia accounted for much of this loss. It is clear we need to provide comparable incentives in this country to regain our competitive position. This legislation is a needed step in that direction.●

## LIFT THE EMBARGO

### HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. FINDLEY. Mr. Speaker, Widespread support exists in the United States for the repeal of our arms embargo against Turkey. One demonstration of this support is the large number of newspapers across the country which have given their editorial encouragement to Congress to lift the embargo.

These editorials rightly argue that:

The embargo has not worked.

Instead, the embargo has impeded rather than promoted a settlement on Cyprus.

Continuation of the embargo would undermine fundamental U.S. security interests in the Mediterranean. These are interests we share with all members of the North Atlantic Alliance, Greece and Turkey included.

I urge my colleagues to consider the views represented in these editorials when deciding their vote on the embargo repeal. A sample of these editorials, ordered chronologically, follows:

[From the Washington Post, Mar. 29, 1978]

A NEW LOOK AT CYPRUS

Isn't it time to set the Cyprus issue to one side in the tangled affairs of the eastern Mediterranean and to get on with restoring firm American ties with Turkey and Greece? Does not this approach promise better results in Cyprus itself than four years of direct diplomatic assault have produced?

We think so. We think that few American policies have been more earnestly motivated, and more throughly discredited, than the failed effort to force Turkey to roll back its invasion of Cyprus by imposing an arms embargo. Cyprus has received no benefit whatsoever from it. The American position in that strategic corner has steadily deteriorated. Two American presidents have been undercut.

The congressional "Greek lobby," which has dominated successive administrations on this issue, remains unreconstructed. It holds that the best way to pry the Turkish army off the island and bring a settlement is to keep the pressure on Ankara. Increasingly, however, other legislators, including now a House International Relations Committee majority, suspect that the embargo merely humiliates Turkey and that the Turks—curse them as you will—will not budge on Cyprus while this embargo stays in effect. We agree.

Deputy Secretary of State Warren Christopher is in Ankara today. If he is not trying to see whether Turkey, in the event that the embargo were lifted, would move promptly on its own toward a fair Cyprus settlement, he has wasted a trip. Great delicacy is required. The Turks can't countenance being seen to be acting under pressure. The Greek government must not be exposed to opposition charges that, for the sake of NATO, Greek interests on Cyprus are being sold out. But perhaps a bargain can be struck.

Cyprus is not, after all, the issue it was. Greek Cypriots, foresaking the Palestinian example of the open wound, have built a successful new life in the south. They want only some territory in the north, a federal system that would leave the Turkish Cypriot minority well protected, and an end to the Turkish occupation and to the specter it raises of an eventual Turkish grab of the whole island. Surely the new Turkish government of Bulent Ecevit, a fair-minded man, can grant as much—if the embargo's affront to Turkish nationalism is eased.

A settlement on Cyprus would warm the climate in which Athens and Ankara could tackle their difficult Aegean Sea dispute. It could repair the American position in a valid region But it cannot even be considered if the Congress will not grant that the time for a new look is at hand.

[From the Christian Science Monitor, Apr. 3, 1978]

REALISM ON ARMS FOR TURKEY

President Carter's decision to urge Congress to end the arms embargo against Turkey has far more than a narrow, bilateral dimension. It reflects a growing concern that Turkey's estrangement from the United States is dangerously weakening the southeastern flank of the NATO alliance and indeed handing to the Soviet Union gratis another potential advantage in the whole strategic confrontation between East and West.

The President is absolutely right. The United States cannot afford to toy with its security interests for political reasons. To deliberately drive a strong, democratic ally away from NATO toward neutrality is shortsighted folly and we are glad to see the administration moving vigorously now to repair the damage.

It ought to be clear to Congress that it has only made matters worse in the past three years by linking arms aid for Turkey with Turkish concessions on the Cyprus issue. This quid pro quo has made the Turks more adamant; they are an independent, proud people who refuse to be seen bending to foreign pressure.

Prime Minister Ecevit has stated, however, that he intends to do something about Cyprus and there is strong reason to believe him. He is generating an encouraging new momentum. Only in office a short time, he already has exercised vigorous leadership by clamping down on leftist demonstrators, holding a summit meeting in Greece, and securing an agreement with the International Monetary Fund. If he can soon point to a lifting of the American embargo—which will enable Turkey to buy military equipment it sorely needs—he should be in a strong position to take a more conciliatory stand on a Cyprus agreement.

Hence it is to be hoped the American lawmakers will view what is happening in the broadest possible context instead of trying to please their Greek-American constituents. They might reflect on the fact that Greece, too, is beginning to see the importance of shoring up NATO. If Turkey—legitimately annoyed that it cannot buy American arms even though it maintains the second largest standing army in NATO after the United States—were to pull out of the alliance and become nonaligned, how would this help Greece?

This is not to close one's eyes to the need for Turkish flexibility on the issue of Cyprus. The world community cannot accept a situation where Turks control 40 percent of the island even though the Turkish Cypriot population is only 18 percent. This imbalance must be redressed. But surely each side realizes that "face" is an important element in negotiation and should be willing to let the other side come to terms without loss of national pride. Bulent Ecevit, who headed the government when Turkey invaded Cyprus, is an independent-minded, able leader; he above all ought to be given the chance now to live up to his words.

[From the Baltimore Sun, April 5, 1978]

TURKEY AND CONGRESS

Opponents of arms for Turkey are preparing to do battle with President Carter's request to lift the embargo that Congress imposed in 1975. Merely reiterating the original justification of that embargo will not do. Turkey's misuse of American arms in its 1974 invasion of Cyprus was impressive justification in 1975. When Congress legislates the specifics of aid and sales, however, it is not just taking stands but making foreign policy which is ongoing. Policy needs perpetual review. When it fails to work as intended, it needs revision.That is why foreign policy works best as an executive function.

The arms embargo was meant to inspire Turkey to give back more of Cyprus to Greek Cypriots and to reach agreement on a fair regime for Cyprus. Demonstrably it has not had that effect. Rather, in the context of stalemated Turkish politics, it has stiffened Turks of all parties against making concessions they know to be right. Instead of expediting the restoration of human rights to Greek Cypriots, the embargo is helping to delay it.

The embargo works against American interests in a strong Western alliance. Prime Minister Bulent Ecevit is threatening to make permanent the eviction of Americans from intelligence bases in Turkey which monitor Soviet missiles. He may boycott the May NATO summit. Turkey links the arms issue to its liability in harboring anti-Soviet bases, not to good behavior on Cyprus. Mr. Ecevit is holding the administration responsible for passively accepting congressional continuance of the embargo. That explains why President Carter has picked a foreign policy fight with congressional Democrats that he does not need and may well lose.

The best argument for the embargo as policy is its positive effect on relations with Greece and (Greek) Cyprus. The United States needs Greek as well as Turkish enthusiasm for NATO. President Carter's attempt to conciliate Turkey before Turkey conciliates Greece and Cyprus makes life harder for the Caramanlis government in Athens and easier for his anti-American opposition.

Mr. Carter's new policy is no longer to plump for acceptance of the 1976 arms agreement between the Ford administration and Turkey. Rather he wants the embargo dropped on principle first, and a new agree-

ment negotiated. In other words, while the progress on Cyprus was being ostensibly unlinked from arms, Congress could see whether progress was subsequently made before acting on new arms sales. The first act of conciliation would be taken by the United States. Even Turks would see that the next step was up to Turkey.

The policy adopted should balance all American interests, rather than just one of them. The administration is being tested. So is the responsibility of congressmen and senators in their relatively new role of actively shaping foreign policy.

---

[From the Los Angeles Times, April 5, 1978]

ARMS: TIME TO TALK TURKEY

The quarrels between Greece and Turkey over Cyprus have resulted in a tragic and seemingly endless routine that has seriously undermined the effectiveness of the North Atlantic Treaty Organization.

It's about time to break the impasse. An opportunity to do so will come Thursday, when the House International Relations Committee takes up President Carter's proposal to lift the 1975 arms boycott against Turkey.

The committee should pave the way for Congress to sweep away the arms restrictions imposed in retaliation for Turkey's use of American weapons in its 1974 invasion of Cyprus—an invasion provoked by Greek Cypriot moves to unite the independent island with Greece.

The boycott has failed in its aim to induce Turkish concessions on the island. It has failed to alleviate the sufferings of Greek Cypriots resulting from the latest manifestation of ancient regional quarrels between Greeks and Turks.

On a larger scale, it has weakened the West's main line of defense against the Soviet-led Warsaw Pact nations in a critical region at a time when NATO should be strengthened rather than crippled. The boycott has turned Turkey, which has been an ardent and military powerful ally of the West, into an estranged and resentful associate.

Approval of the President's proposal could break the stalemate growing out of Greek insistence that the boycott remain in effect so long as Turkey refuses to make territorial concessions on Cyprus, and Turkish insistence that it will make no such move under the duress of an arms embargo.

What's more, the President's proposal is not all that much of a departure from the present arms-supply program for Turkey.

Under a modification of the embargo, Congress has permitted Turkey to buy up to $175 million worth of arms each year. The President's proposal would authorize military sales in the same amount for fiscal 1979, with an additional $50 million loan that Turkey could use for either military or civilian purposes. It would also free $85 million more in military aid that was in the pipeline to Turkey when the embargo was imposed.

Lifting of the boycott should sweep away any Turkish excuses for continuing a refusal to come up with meaningful proposals for a permanent Cyprus settlement. And if removal of the boycott did not work, the United States would still retain a powerful inducement: Carter's proposal calls for renegotiation of the four-year, $1 billion arms-aid package for Turkey. Its intransigence on Cyprus could adversely affect its interests in the aid package.

In any case, the removal of the arms boycott should not be viewed as an appeasement of Turkey. A militarily strong and cooperative Turkey is in the interest of the United States, Greece and all other members of NATO.

[From the San Diego Union April 5, 1978]

AN EMBARGO IS NOT FRIENDLY

Defense planners in the North Atlantic Treaty Organization are concentrating on a build-up of forces in central Europe because that area would bear the brunt of an attack from the East.

That might make sense from a strategic standpoint, but it is no comfort to people on the so-called flanks of NATO, especially in the Mediterranean where the 1974 war on Cyprus left a serious wound in the alliance.

There is no little satisfaction, then, in the prospect that Greece and Turkey may be composing their differences enough to give their responsibilities as NATO members the attention they deserve.

At their recent meeting in Switzerland, Prime Minister Bulent Ecevit of Turkey and Prime Minister Constantine Karamanlis of Greece opened the way for a negotiated settlement of their differences over the future of Cyprus and territorial claims in the Aegean Sea.

What remains is for the United States to mend its own relations with Turkey, and the Carter Administration is making progress in that direction. It is asking Congress to lift the embargo on arms shipments to Turkey, imposed in the wake of the Turkish invasion of Cyprus, and is proposing new military aid packages for both Turkey and Greece.

Whatever that embargo might have accomplished—and it is doubtful it accomplished anything constructive—the time has come to lift it.

Turkey and Greece appear now to see the folly of trying to settle their differences with force. Prolonged denial of military aid to an ally as important as Turkey is folly on our part.

---

[From the Washington Star, Apr. 5, 1978]

ENDING THE TURKISH ARMS BAN

The Carter administration's decision to seek an end of the arms embargo against Turkey, without prior Turkish concessions on Cyprus, is in keeping with the U.S. interest in preserving the Western alliance. The move is also better calculated than the embargo to permit progress on a Cyprus settlement. Congress should be able to see these truths through the expected smoke-screen of ethnic politicking on the issue.

The three-year-old embargo was ill-advised from the start. The purpose was to punish Turkey for violating the terms of U.S. arms sales and aid by its use of American weapons in the 1974 invasion off northern Cyprus.

What Congress actually did was tilt to the Greek and Greek-Cypriot side in the conflict because that was what the heavier ethnic lobbying called for. Greece and its American spokesmen want to continue the embargo as a bargaining advantage over Turkey, on Cyprus and other Greek-Turkish issues.

The United States' overriding interest, however, is in ending the embargo now. This would stop the alienation of a strong and demonstrably faithful NATO ally. NATO unity is not served by treating Turkey as an outcast. Turkey's wholehearted participation, and a restored U.S. presence at bases in Turkey, are important to anchor the alliance in the eastern Mediterranean. Turkey is dependent on U.S. arms for resupplying and modernizing its forces (as is Greece, another NATO member, which suspended its military participation in the alliance because NATO did not prevent the Turks' partial occupation of Cyprus). The end of the embargo would open the way to a refurbished agreement with Turkey on arms and U.S. use of Turkish bases.

The embargo, besides, has proved to be no promoter of Turkish concessions on Cyprus. The reason is Turkish pride—and a powerful pride it is. Resentment of the linkage of U.S. arms supplies and Turkish policy on Cyprus runs deep. Ankara's elected government, under whatever party sponsorship, cannot afford to be seen knuckling under to pressure at the possible expense of the Turkish minority on Cyprus. At the same time the new Turkish government under Premier Bulent Ecevit has promised a fresh set of Cyprus peace proposals.

Discussion of the issue on Capitol Hill is likely to become entangled with understandable Greek-American emotions (numerically more convincing than the Turkish-American variety). But these considerations of ethnic loyalty are based to an important extent on old grievances between the Aegean neighbors, the rehashing of which serves no purpose. It is necessary to see past the atrocity stories with which each side is depressingly well supplied.

Is it in Greek, Turkish or American interests to let NATO's southern wing disintegrate? Is it better, for a Cyprus settlement, to keep trying to pressure the stubborn Turks, or to see what can be gained from Mr. Ecevit's sense of fairness and his desire for better relations with Greece? Will it help Greek-Turkish friendship to push the Turks out of the Western alliance? What would the Russians like to see happen in this strategically important region?

President Carter should be able to make a case for the West's need to promote Turkish-Greek amity. An arms embargo against our Turkish allies is no way to go about it.

---

[From the New Orleans Times-Picayune, March 6, 1978]

ARMS FOR TURKEY

If arms aid to Turkey is restored, the hope is that the Ecevit government can be brought to work realistically with Greece to thaw out the Cyprus dispute. Linking military aid to resolution of the Cyprus problem would no longer be the U.S. stance.

The president is asking Congress to approve $225 million in military aid to Turkey, and the administration will rewrite a four-year $1 billion defense accord signed in 1976 but never approved by Congress. It seemed easier to ask Congress to approve an end to the embargo alone rather than to seek approval of the aid package as well.

The 25 American bases in Turkey have been in limbo these three years. Turkey has not been asked to make any public pledges regarding their reopening, any more than on the Cyprus issue, in order to qualify for arms credits, but the understanding is clear. At the same time, the administration is asking $140 million—up from an original $122 million—in military credits to Greece, and keeping its fingers crossed.

Three years was a long enough trial for a policy that never budged Ankara an inch. We need this ally on NATO's eastern flank, and better treatment should fetch better results.

---

[From the Pittsburgh Press, April 7, 1978]

SENSE ON TURKEY

President Carter is on sound ground in urging Congress to lift its embargo on U.S. military aid to Turkey.

The embargo voted by Congress in 1975 was an ill-considered move. It was meant to force Turkish concessions in the Cyprus dispute, but it has become dangerously counterproductive.

Congress means to "punish" Turkey for its 1974 invasion of Cyprus, acting as if only the Turks were to blame. In fact, they invaded only after a Greek-supported coup on the island had put Turkish Cypriots in peril.

Instead of bending to the will of Congress, Turkey has closed 25 American military bases on its soil.

In armed forces, which guard a frontier against Russia, have begun to deteriorate. So it is thinking of looking for weapons elsewhere, cutting its ties with the American-led NATO alliance, and adopting a neutral stance between East and West.

Such a shift would be a gratuitous present to the Soviet bloc. Congress can avoid this by permitting Turkey, the only American ally singled out for an arms embargo, to resume purchasing needed military equipment here.

Incidentally, the Turks—who refuse to be bullied—have indicated that once the embargo is ended they will offer concessions on Cyprus and reopen U.S. bases in Turkey. It is time for Congress to think of more than the pro-Greece lobby and to place the national interest above all else.

---

[From the Wall Street Journal, April 7, 1978]

MENDING THE TURKISH RIFT

Naturally a big fight is building over the Carter administration's lurch toward unilateral disarmament, but amid the melee over the neutron bomb and the Navy a few words need to be said in support of the administration's initiatives toward Turkey. Few steps would be more important in solidifying NATO and strengthening the U.S. military position.

Mr. Carter and Turkish Prime Minister Bulent Ecevit have agreed on a new arms and military bases pact; the key point is that the U.S. administration will propose repeal of the three-year-old congressional arms embargo against Turkey. The embargo resulted from Turkish invasion of Cyprus and continuing occupation of some 40% of the island. Sen. Paul Sarbanes, Rep. John Brademas and other members of the congressional Greek lobby are already mobilizing an assault on the proposal.

Greece is a lovely land with lovely people, but we cannot entirely ignore the consideration that Turkey is one of the world's most strategic pieces of real estate. There is of course the Dardanelles, the ancient objective of the Czars. There is also the Turkish army, the largest in NATO, its equipment now decaying because of the embargo. There are the posts for electronic monitoring of Soviet missile tests and such, now closed because of the rift. There is the instructive fact that Turkey was the base for Eisenhower's enormously successful excursion into Lebanon, and would be similarly handy in the event of, say, an attempted coup in Saudi Arabia.

All of this, though, pales beside one other strategic consideration: overflight rights. If Soviet land-based aircraft can overfly Turkey unopposed, the U.S. Mediterranean fleet is out of business. A military investment in Turkish air defense, and a political investment in its willingness to threaten its use, would be one of the soundest steps the U.S. could take to preserve a military presence either in the event of a new Arab-Israeli war or a conflict between or within the oil states.

Nor, if you lay aside the one issue of Cyprus, is there any case for turning Turkey into a pariah state. It is in fact the only democratic government in the Islamic world. The Turks long ago cast their lot with Western modernization, and understandably resent that the West automatically sides against them in disputes with the Greeks, even Greek colonels who initiate hostilities in Cyprus. Even in closing U.S. bases they have kept NATO facilities open and stayed within the NATO command structure, while Greece has more or less withdrawn.

The Turkish attachment to the West and to NATO is slowly ebbing. Turkey is also the largest recipient of economic aid from the Soviet Union, and just this week signed a new trade pact to buy Soviet civil aircraft. If something is not done to break the current impasse, it will surely slip toward neutralism, if not worse.

Which brings us to the Cyprus dispute. Even Rep. Brademas concedes that the Turks were fully justified, under international treaties, in invading Cyprus after Greece intervened in July of 1974. What Rep. Brademas wants to argue about is the further operations in August of 1974, when the Turks expanded their sector of the island, asserting that Turkish Cypriots were being killed in the Greek sector. Turkey now holds 40% of the island, though Turks account for 18% of the population.

With the irritants of the Greek colonels and Cypriot Archbishop Makarios now both gone from the scene, it's not hard to imagine the Turks becoming willing to negotiate some adjustment. Mr. Ecevit actually sat down in Bern a month ago with Greek Premier Constantine Caramanlis to talk about Cyprus, but broke off the talks after Secretary of State Vance publicly linked the outcome of those talks with the arms embargo. Having digested this lesson, the State Department is now passing the word that the Turks will move so long as the duress of the embargo is lifted.

Sen. Sarbanes and Rep. Brademas may win points with their constituents with their stiff-necked refusal to take the first step, but they are severely crippling the U.S. national security position. Given the possibility that a move now could unblock the dispute, the essential ambivalence of the Cyprus issue, and Turkey's huge strategic importance, on this issue there is an overwhelming case for following Mr. Carter's leadership.

---

[From the Omaha World Herald Apr. 9, 1978]

LITTLE CHOICE ON TURKEY

Turkey has pushed the United States into a corner on arms aid.

The U.S. suspended the delivery of $1 billion in military hardware after Turkey invaded Cyprus in 1974.

While the U.S. has tried to make settlement of the Cyprus issue a condition for restoring the flow of arms, Prime Minister Ecevit has angrily rejected this approach.

Ecevit is hinting that he may go to Moscow if the United States won't lift the embargo. He also is threatening to close U.S. military bases and to reduce his country's participation in the North Atlantic Treaty Organization (NATO).

Ecevit, to back up his threats, has accepted an invitation to visit the Soviet Union this summer, possibly to sign a treaty of "friendship and cooperation."

Western officials don't think Turkey would actually pull out of NATO because of traditional hostility between the Turks and the Russians. But Ecevit is using the situation to Turkey's advantage.

That is why President Carter is recommending that the arms ban be ended and that $225 million in military assistance credits for Turkey be granted for the next fiscal year.

The package also would include $140 million for Greece. But the Greeks want no part of that deal.

Secretary of Defense Harold Brown said that unless Turkey gets U.S. arms, "nationalistic pressures" will cause that nation to look elsewhere.

The defense secretary said the U.S. would prefer that a Cyprus agreement come first.

"But we cannot stand back and allow the risks to democratic government and to collective security in the eastern Mediterranean to grow while settlement efforts continue," he said.

It doesn't appear that the U.S. has much choice in the matter. The southern flank of NATO must be preserved.●

## TRIBUTE TO KATHARINE WRIGHT

---

## HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Ms. OAKAR. Mr. Speaker, as the only woman from Ohio in the U.S. Congress, it is with pride and appreciation that I pay tribute to a woman who next week will be honored by the International Women's Air and Space Museum in Dayton, Ohio.

As a member of the advisory board of this museum, I share the anticipation that comes with our movement toward making this unique cultural center for women aviators a reality.

Next week the name of Katharine Wright will be submitted as this year's nominee at the International Women's Air and Space Museum annual board meeting. I submit that Katharine Wright, the sister of Wilbur and Orville Wright, is a worthy candidate because of the major role she played in the success of the first flight of a heavier-than-air craft on December 17, 1903. The craft's name: *Kitty Hawk*, in honor of Katharine Wright.

Although a congressional medal was proposed for Katharine Wright, the honor was never bestowed. That is why I believe it appropriate, especially now in connection with her nomination, to acknowledge the importance of the work she executed in my home State of Ohio that gave way to "wings for the entire world."

Acording to Webster's Dictionary, a martyr is one who sacrifices his or her life, station, and so forth, for the sake of principle. Thus, in a very true sense, Katharine Wright is a martyr to the cause of aviation, sacrificing her own teaching profession and her own personal life to assist her brothers in their historic contribution to aviation.

At the age of 15, Katharine lost her mother and began to care for her father and four brothers. While accepting the challenge as the head of the household, she also later assumed a leadership role in her Oberlin College class of 1898. Yet it took Katharine less than a decade to sacrifice her own teaching career to answer the call from her brothers to help them in their quest for a "flying machine."

Fifty years ago, on the 25th anniversary of their success, the Plain Dealer, Ohio's largest newspaper based in my home district, editorialized "there would have been no *Kitty Hawk* without Kitty Wright" and "the brothers have testified to the vast assistance rendered by their sister."

She contributed both brains and brawn for all Wright family endeavors, from setting print for their tiny newspaper to putting together "Wright Special" bicycles. But family expertise in kite making, coupled with intrigue created with their father's gift of a working toy helicopter, gave way to family flying experiments even before the turn of the century.

By 1903, the newest invention was complete. Katharine had labored at her

mother's old treadle sewing machine to carefully stitch the craft's wing coverings and the now famous brothers were off to the sand dunes of the Carolinas to conduct their experiments.

History was made on December 17, 1903, with Wilbur Wright as the pilot, Orville on the ground beneath, and Katharine miles away in Ohio waiting for word. Word came in a telegram. Katharine read of their success and was instructed by her brothers to "inform press."

Now as the Wright Brothers press secretary, she again followed orders, but newspapers of the day did not grasp the significance of the news that was buried on inside pages.

On these pages then, today we praise Katharine for her work on the "Kitty Hawk," the nursing of her brother Orville after an unpublicized but serious flying accident, and her help in advising our Army officials during early flying attempts by our Government. Katharine was one of a handful of women in the world to ever ride in a flying machine. Her unswerving devotion to her brothers in their mutual quest for flight was not broken until Katharine turned 52 and finally decided to marry. The marriage was postponed until long after her brother Wilbur's death and without shared joy by Orville, who interpreted the vows as abandonment after a lifetime of devotion. The wedding to a man Katharine had known since college, a man who by then was the respected editor of the Kansas City Star, abruptly ended with her death 3 years later.

Katharine Wright, the silent partner of the Wright Brothers, a martyr to aviation because she believed in her brothers and the idea of flight for all the world, merits our belated respect and thanks.●

## TWELVE STATE GOVERNORS ENDORSE "NATIONAL PORT WEEK"

### HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. MURPHY of New York. Mr. Speaker, to date, I have received correspondence from 12 Governors expressing their State's support for "National Port Week". While Indiana, South Carolina, Florida, Virginia, Alaska, New Jersey, and South Dakota have already issued State proclamations, the Governors of Illinois, Vermont, Mississippi, Oklahoma, and Rhode Island have expressed to me their intention to issue similar resolutions coinciding with "National Port Week" Slated for the week beginning September 17. On behalf of our ports I would like to thank them for their support.

In addition to the growing list of States sponsoring "National Port Week", we now have, with the following Members listed below, 121 of the necessary 217 cosponsors. I thank all of them, and urge the remaining Members to join with us in recognizing the important achievements made by our ports to the health and vitality of our country today. The list of cosponsors for this resolution is as follows:

Mr. AUCOIN, Mr. BEARD, of Tennessee, Mr. BENJAMIN, Mr. BROOKS, Mr. CORNELL, Mr. ROBERT W. DANIEL, Jr., Mr. EDWARDS of ALABAMA, Mr. EMERY, Mr. FITHIAN, Mr. FLOOD, Mr. GAMMAGE, Mr. HAWKINS, Mr. LONG of Louisiana, Mr. MARKEY, Mr. JOHN T. MYERS, Ms. MIKULSKI, Ms. OAKAR, Mr. PATTEN, Mr. PURSELL, Mr. REUSS, Mr. ROGERS, Mr. ROSE, Mr. VANDER JAGT, and Mr. WON PAT.●

## CONGRESSIONAL SALUTE TO THE REVEREND EDWARD DAVEY, ESTEEMED PASTOR, OUR LADY OF THE VALLEY CHURCH, WAYNE, N.J., UPON THE 25TH JUBILEE ANNIVERSARY OF HIS ORDINATION

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ROE. Mr. Speaker, on Sunday, April 23, residents of my hometown of Wayne, congressional district, and State of New Jersey will assemble with the associate pastor, Rev. James Rugel, and members of the congregation of Our Lady of the Valley Church, Wayne, to give testimony to an exemplary clergyman, esteemed pastor, outstanding community leader, and good friend, Rev. Edward Davey, as we celebrate the 25th anniversary of his consecration into the Sacrament of Holy Orders.

Mr. Speaker, Father Davey has maintained the highest standards of excellence throughout his lifetime and we are pleased to share the pride of his many, many friends and parishioners in his distinguished achievements, so unselfishly dedicated to the betterment of mankind. His devoted service to God and country are mirrored in the happiness and security he has provided our people in his steadfast quest for the religious, educational, recreational, and cultural enrichmemnt of all of our citizens, young and adults alike.

Mr. Speaker, there is so much that can be said of the love, affection, and reverence with which Father Davey is held by all of us who have had the good fortune to know him. Having been born and raised in the State of New Jersey, he has truly endeared himself as a special family member to all of us.

Father Davey was born in Newark, N.J., and educated at the Blessed Sacrament Elementary School, Newark, N.J. He completed his high school studies at Seton Hall Prep, South Orange, N.J.; attained his college degree at Seton Hall University, South Orange, N.J.; pursued his theological studies at St. Mary's Seminary, Morristown, N.J.; and was ordained at St. Mary's Church, Newark, N.J., on April 22, 1953.

His first ecclesiastical assignment after ordination commenced as a young curate at the Sacred Heart Church, Elizabeth, N.J. He subsequently ministered to the spiritual needs of our people with the highest standards of excellence at St. Joseph's Church, Maplewood, N.J., Notre Dame Church, Cedar Knolls, N.J.; Our Lady of Consolation, Wayne, N.J.; and since 1975 at Our Lady of the Valley, Wayne, N.J., where we now salute him as the revered pastor of Our Lady of the Valley Church.

Mr. Speaker, the quality of Pastor Davey's leadership, the richness of his wisdom, his dedication and devotion to our people have been an inspiration to all of us. In his personal commitment to the Almighty and to our people he has nourished and nurtured the minds and hearts of our young people, developing strength of character and a reservoir of knowledge as an educator, and has made a significant contribution to the quality of the way of life of all of our people as a spiritual adviser and community leader.

He was a member of the faculty and business manager of St. Benedict's Prep School, Newark, N.J., and served as Catholic Chaplain at Elizabeth, N.J., General Hospital. He was chaplain of Marion Council (Pompton Lakes, N.J.) and the Wayne, N.J., Council of the Knights of Columbus. He has also served as chaplain of Alps Manor Nursing Home, Wayne, N.J., and youth director of Our Lady of the Valley Church.

Mr. Speaker, in reflecting upon the history of America and the good deeds of our people that have placed our representative democracy second to none among all nations throughout the world, I am pleased and privileged to call your attention to the outstanding good works of this esteemed member of our clergy which have truly enriched our community, State and Nation.

As Father Davey celebrates the 25th anniversary—a quarter of a century—of his ordination to the priesthood, I know that you and all of our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations for the excellence of his service to his church, our Nation, and all mankind. We do indeed salute the Right Reverend Edward Davey, esteemed pastor, outstanding educator, community leader and great American.●

## INTRODUCING H.R. 12239, PERTAINING TO MEAT IMPORTS

### HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ABDNOR. Mr. Speaker, today I have introduced legislation to improve the inspection and labeling of imported meat and to enhance the stability in meat supplies and prices, for the benefit of domestic producers and consumers.

The bill, which is reprinted elsewhere in today's RECORD, was drafted by the National Association of Meat Promoters, headquartered in Bison, S. Dak. It evolved from the association's expertise and experience gained in petitioning the U.S. International Trade Commission for relief from imports.

While the USITC failed to recommend such relief because it did not agree imports are the major cause of injury to the

industry, in the course of the investigation it became apparent there are a number of flaws in the existing laws governing meat imports.

I addressed these flaws in my statements to the USITC on September 20, 1977, and would like to have those remarks reprinted here for the benefit of my colleagues:

STATEMENT OF JAMES ABDNOR

Mr. Chairman and members of the Commission, I am pleased to finally have this opportunity to appear before you to express my views on the issue of livestock and meat imports. As you may recall, I had intended to appear at your initial hearings in June held in Rapid City, which is in my Congressional district. My statement was placed on the record but, unfortunately, I was prevented from presenting it personally due to a last minute legislative scheduling conflict which required my presence on the floor of the House.

Since my statement is on the record, I will not take much of your time. I did want to make you fully aware of my deep, personal interest in this matter by my appearance before you this morning, however, and I would also like to reiterate and emphasize the major points of my statement, which as you will recall dealt primarily with flaws in the Meat Import Act of 1964. (A copy of my statement is attached for your ready reference.)

Although I identified fourteen more-or-less distinct problems with the '64 Act, they can be summarized basically as errors of concept, omission, and administration.

First, the concept of an import quota which increases as domestic production does is faulty in that it ignores the cyclical nature of the industry. Second, omitting live animals, meat of certain livestock, and processed meats of all kinds ignores the interrelated nature of these products with those subject to the quota and invites circumvention. Third, the inadequate protection afforded in light of the errors of concept and omission inherent in the '64 Act is further diminished by the manner in which the law has been administered.

Mr. Chairman, I believe these issues can and should be addressed in the context of amendments to the 1964 Meat Import Act. I also believe and urge that all imported meat products should be subject to health and sanitation requirements which are equal to those placed upon domestic production and, finally, that imported meat products should be identified as such to the ultimate consumer.

Mr. Chairman and members of the Commission, you can be certain these issues will continue to have my attention as long as the dire financial condition of the livestock industry prevails. As you can appreciate, however, in an urban dominated Congress the efforts of rural members like myself and the others who appear before you today will continue to be futile unless we have the understanding, concern, and support of officials such as yourselves.

With that thought in mind, I thank you for your consideration.●

## JACK ANDERSON WARNS DEMOCRATS ON TAXES

### HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. KEMP. Mr. Speaker, yesterday's column by Jack Anderson should be of great interest to all my colleagues—particularly those in the majority party.

Anderson says that a tax revolt is gathering steam in this country and that it may create big problems for the Democrats in November, since the Democratic Party is seen—quite rightly—as the party of big spending and, therefore, higher taxes.

I agree entirely with this analysis. I believe that the extraordinary support for such things as the tuition tax credit, a rollback of social security taxes, and the Jarvis-Gann initiative in California are all ample evidence of this trend. Furthermore, I do not believe there is any constituency in the country for so-called tax reforms. What the people want are straight, across the board tax rate reductions, and if the Congress does not see this the majority party will indeed suffer at the polls this fall.

Lastly, I believe Jack Anderson is absolutely correct when he says:

Probably the best thing that could happen to the Federal income tax system would be to scrap it altogether. The same amount of revenue could be raised, the experts tell us, by charging a simple, across the board 12 percent income tax, without exceptions, exemptions or loopholes, except for the genuinely poor. This would put the tax accountants, tax attorney's and three-fourth of the Internal Revenue force out of business. But it would save the average tax payer a bundle and eliminate overnight the inequities of the tax laws.

I sincerely wish the Congress would take such a proposal seriously and I applaud Mr. Anderson for making it.

The article follows:

[From the Washington Post, Apr. 18, 1978]

A MIDDLE-CLASS TAX REVOLT IS GROWING

(By Jack Anderson)

Those silent Americans, who used to grit their teeth, pay their taxes and bear it, are beginning to make themselves heard. We have warned in past columns that a quiet tax revolt is gathering steam. It may gain enough momentum by November to sweep the big spenders out of Congress.

It's a revolt of the middle classes, who pay the greatest share of the nation's taxes. They are not deprived people seething against an oppressive government, but they are frustrated by unfair taxes and increased living costs.

They will express their anger, if our soundings are correct, at the polls in November. This could be grim news for the Democrats who are associated in the public's minds with government spending. The public is angry at an income tax system that has become incomprehensible. The annual ritual of rendering unto Caesar has become so encumbered with regulations that it takes an attorney or an accountant to fill out the average tax form. Even the tax experts are apt to stumble over some unseen regulation submerged somewhere in the public prints.

The public is angry at an Internal Revenue Service that changes the rules arbitrarily and ignores the intent of Congress. The tax agency is supposed to enforce the tax laws, not write them. But if Congress won't change the laws to suit the enforcers, IRS simply writes new regulations and issues new directives to accomplish the same result. Agents are now hounding taxpayers whose tax practices used to be considered perfectly legal. The laws haven't been changed; the agents have merely been given new marching orders. The main result is that IRS is creating millions of dollars in new business for accountants, lawyers and itself.

The public is angry at a tax system that discriminates against the middle classes. The poor are granted exemptions and the rich are provided loopholes. It used to be that the inequities could be covered up by the sheer complexities of the tax laws. But the middle classes have caught on. If they are going to submit willingly to being plucked like a chicken, they want to be sure their fellow citizens get the same treatment.

Probably the best thing that could happen to the federal income tax system would be to scrap it altogether. The same amount of revenue could be raised, the experts tell us, by charging a simple, across-the-board 12 percent income tax, without exceptions, exemptions or loopholes, except for the genuinely poor. This would put the tax accountants, tax attorneys and three-fourths of the Internal Revenue force out of business. But it would save the average taxpayer a bundle and eliminate overnight the inequities in the tax laws.●

## THE HOLOCAUST AND CAMBODIA—LEST WE FORGET

### HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. HYDE. Mr. Speaker, the television portrayal of the Holocaust reminds us of a lesson we want too much to forget—that the veneer of civilization is thin indeed.

Lest we consider it an isolated aberration in the sad history of inhumanity, I commend the following article by Chicago Tribune columnist, Michael Kilian. As usual, he says so well what needs to be said:

THE NAZIS' REAL HORROR: THEY WERE NOTHING NEW

(By Michael Kilian)

A man I know in Washington—a man of demonstrably liberal persuasions complained to me recently about foreigners moving into his neighborhood in Virginia.

Vietnamese.

If he had used the words "black" or "Jew" instead of Vietnamese, he would have sounded the most wretched bigot and racist. But these are not Jews or blacks. They are merely Vietnamese.

This week, the nation is witness to an extraordinary television production entitled "Holocaust," a four-day dramatization of the unspeakable horrors inflicted upon mankind some four decades ago by what had been considered one of the world's most advanced and civilized nations.

Those horrors and the global conflict of which they were a part are depicted with uncompromising reality. We are exposed to horror organized as an institution. We see how it was possible for a single government to systematically bring about the slaughter of 5.7 million Jews and 14 million non-Jews in a colossal failure of civilization.

It is a numbing experience—numbing to see it on the screen, numbing to know that it actually happened.

It is also troubling. For it is too neat. For it deals only with Germans.

The message thrust forth is "Never Again." The strong impression is made that this was an aberration. That the Nazis—the quintessential evil—were an anomaly. That the holocaust was a temporary lapse from which civilization has long since recovered.

This is a false impression. History is a grim and melancholy book. Perhaps the most horrible thing about the Nazis is that they were nothing new.

Glance at random at the ledger of mankind's savagery. The hordes of Attila the Hun, Genghis Kahn, and Tamerlane slaughtering whole peoples before them. The Albigensians of 13th Century France, believing material goods to be sinful, were massacred man, woman, and child because a ruthless pope would not tolerate such heresy.

More than 1.5 million Armenians were "eradicated" by the Turks in 1915 and 1916.

World War II, that most moral of wars, eradicated the Nazis but remedied nothing. Because they were our allies—our brothers of convenience—we have tended to ignore the unspeakable horrors visited upon Eastern Europe by the Russians. How they massacred thousands of Poles. How they stood back to allow the Nazis to wipe out the Warsaw Ghetto. How after the war they filled hundreds of concentration camps.

Now, so selective in our morality, we ignore another holocaust of our own making. The Vietnamese in northern Virginia are irritating, for they refused to linger and enjoy the totalitarianism we brought upon them.

The Cambodians are not so irritating. They are dead, and cannot move into the suburbs of Virginia. According to reports supported by French and Yugoslavian Communist observers, more than 1 million Cambodians have been slaughtered by the Khmer Rouge in the last three years.

British journalist Martin Woollacott wrote in the Manchester Guardian of "the heads of 40 young women, buried up to their necks and then knifed in the throat, sticking up out of the ground like a crop of cabbages."

The words "Never Again" appear on our television screens. The gods of irony will be amused that there are no longer any television sets in Cambodia.●

## WORLD REFUGEE REPORT SURVEYS REFUGEE SITUATION IN ASIA

### HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. DRINAN. Mr. Speaker, an urgent need for resettlement of refugees from Indochina continues. Particularly critical is the situation of the "boat cases"—those refugees primarily from Vietnam who escaped by boat and were picked up at sea or made their way despite great hardship to various countries on the South China sea. France, Australia, and Canada have joined the United States in resettling these families. However the State Department has stated that a buildup of these cases will continue as well as the cases of land refugees from Indochina who have no other offer of resettlement assistance.

The World Refugee Report points out that in Asia not a single country has ratified either the 1951 United Nations Convention or the 1967 Protocol concerning protection of refugees.

Following is a segment of the 1978 World Refugee Report which focuses on the refugee situation in Asia:

ASIA

General Developments

The World's attention continue to focus on human rights violations and resulting refugee problems on the Indochina peninsula, where thousands continue to flee repressive conditions under the Democratic Republic of Vietnam, the Lao People's Republic and the Democratic Republic of Kampuchea (Cambodia.)

Most of the Indochina refugees have fled to Thailand, where the refugee population has swelled to ninety thousand. Vietnamese refugees, known as "boat people" continue to risk the perils of the South China Sea in small, leaky boats, rather than remain in their country. The majority of South Asian nations offer only temporary asylum to these refugees and some continue to turn them away. Western nations, such as France and the United States, have been the principal countries of resettlement.

Aggravating the problems of the Indo-China Peninsula is the border war between Cambodia and Vietnam, which may have resulted in the deaths of thousands of persons and is sure to cause further displacements of people.

Taiwan, a country where official broadcasts deplore conditions of people living in China or Vietnam, has ironically refused to admit 10,000 ethnic Chinese currently living in Saigon, holding Taiwanese passports; many have obtained exit visas. The Vietnamese reportedly consider them troublesome foreigners, and are anxious for them to leave. The Chinese, many of them former merchants, have lost their means of livlihood since the change of government, and have appealed to relatives and friends outside Vietnam for help. Reportedly, Taiwanese authorities maintain they cannot process the Saigon Chinese applications for entry permits because they are living in a communist country with which Taiwan has no diplomatic relations. But the unofficial reason given is that they fear some of the Chinese from Vietnam might be spies or pose a great economic burden on the densely populated island.

In other parts of Asia, Amnesty International has noted a "progressive erosion of fundamental liberties." In Malaysia and Singapore, Amnesty International has expressed concern, noting an increasing number of arrests of political prisoners and "confessions" required of some detainees prior to their release, containing allegations which may be used by the governments to justify the arrest of the detainee's associates.

Under a decree by President Park of South Korea, criticism of his regime is forbidden. Such severe repression has greatly minimized the observance of basic human rights in South Korea. In April of 1977, there was a wave of arrests of persons who had supported a public statement calling for the release of political prisoners and the restoration of basic civil liberties. The victims included clerics, journalists, students and relatives of those already imprisoned for making the March, 1976 declaration. Human rights violations have been clearly documented by a number of highly respected organizations. Under the Carter Administration, the United States, a close ally of South Korea, has become more concerned with human rights a major factor in its relations with that country.

Although it is widely believed that human rights violations occur frequently in North Korea, no organization has been able to document violations in that country because of its strict censorship policy.

It is believed that the Indonesian Government is holding more political prisoners without trial than any other government in the world. There are reportedly 55,000 to 100,000 political prisoners living under harsh conditions in island prison camps. These prisoners have been held without charge or trial since an abortive communist coup in 1965. In December of 1977, President Suharto announced the release of 10,000 political prisoners and pledged the release of 10,000 more in 1978 and 9,791 in 1979. But some Western observers believe that the prisoners the government has planned to release will be forced to settle in new camps which are reportedly being built for former detainees.

After an eleven-month cease fire between the Philippine government and Moslem forces on Mindanao, fighting has again broken out.

The Philippine government estimates that some 50,000 persons have been killed in the fighting and one million people are homeless. Large areas of Mindanao appear to be firmly controlled by insurgent forces.

The war has its roots in traditional animosity between the Moros—the Moslems of the southern Philippines—and the Central Government. The Moros resisted the Spanish conquest of the Philippines in the mid sixteenth century, U.S. control after 1898, the Japanese occupation during World War II and the independent Philippine government after the war. Currently the Moslems constitute three million of the Philippines' population of forty-four million, most of whom are Catholic. Tension has resulted from the arrival of affluent Christians in Mindanao, who have gained control of the best land. After President Ferdinand Marcos declared martial law in 1972, and ordered Moslems to turn in their guns (signalling an end to their hopes for autonomy) war broke out.

On several occasions, Marcos has announced the surrender of rebel commanders, but has not shown any willingness to grant the rebels the political autonomy they have been fighting for.

In addition to the fighting in Mindanao, the status of human rights in the Philippines has caused great concern. There are an estimated 2,000 political prisoners being held on suspicion of subversion, and it has been reported that torture is widely used in the prisons. In September of 1977, thousands demonstrated against the Marcos regime, protesting five years of martial law in the Philippines. The regime has announced that elections will be held in April of 1978 for an interim National Assembly. However, the continued detention of Senator Benigno Aquino, a leading opponent of Marcos who has been sentenced to death, raises doubts about the government's sincerity.

In China, Amnesty International has shown deep concern for that country's use of the death penalty—both for criminal offenders and those charged with "political crimes." Concerning freedom of movement, the Chinese Government has promised to ease travel restrictions on Chinese who wish to travel abroad. The relaxation of restrictions also applies to an estimated 40 million Chinese who live outside the People's Republic who wish to visit relatives in China.

The flow of refugees from the People's Republic of China continues at an estimated rate of 80 persons a day. The British Government continues its policy of returning escapees caught at the border or trying to swim to Hong Kong—the so-called "freedom swimmers."

One bright note for human rights in Asia is the return of democracy in India after persecution of political opponents under the State of Emergency imposed by Indira Ghandi in 1975. In March of 1977, between 40,000 and 100,000 political prisoners were released by the new Desai government after being detained without trial under the state of emergency.

In December of 1977, the New York Times reported an estimated 400,000 Biharis living in 11 refugee camps under squalid conditions in Bangladesh. These non-Bengali speaking Moslems fled to East Pakistan during the 1947 bloody communal riots in Hindu-dominated India. During the 1971 Indian-Pakistani war, which led to the birth of Bangladesh, formerly East Pakistan, the Biharis supported the Pakistani army against the Bengalis. At the end of the war, a massive airlift exchanged 107,000 Biharis for

171,000 Bengalis. But when the airlift ceased, some 400,000 Biharis remained in Bangladesh, unwanted in a society that regards them as enemies of liberation. Reportedly, Pakistan has agreed to accept an additional 25,000 Biharis.

INDOCHINA

The so-called "boat people" presently escaping from Vietnam in small fishing boats bought from fishermen or covertly from government officials on the coast, provide the most dramatic and often tragic examples of the continuing refugee flow out of Indochina.

In 1975, those who were connected with the American involvement, or who had high positions in the government in one of the three countries, fled with American forces if they were lucky enough to get on an American helicopter or boat. Now, however, there are few escape routes left for those whose involvement with the American missions or with an American backed regime, make them suspect to the new regimes. Those persecuted for past affiliations, level of education, or vocation must now make a much more hazardous journey to escape Indochina.

To leave Laos, refugees must cross the Mekong River at night, quietly slipping past border patrols, into Thailand. Those fleeing the massive reorganization and reported mass executions, in the Democratic Republic of Kampuchea (Cambodia), must traverse mine fields and elude armed border patrols to get into Vietnam or Thailand. Capture by Cambodian border guards results in summary execution. Escape from Vietnam requires patience, some money for bribes, and good fortune. Assuming a refugee can buy, stock and sail a boat, he must escape detection by coastal patrols, avoid starvation, dehydration, illness and bad weather in order to get to Thailand or into the shipping lanes where there is a chance of being picked up by passing freighters.

However, being sighted by a freighter does not always mean that refugees will be picked up. Contrary to the customs of the sea, some freighters are now refusing to pick up the refugees in their leaking, overcrowded boats. Many ports now refuse to let freighters call until they assure national governments that the refugees on board will leave the harbor with the ship. One Israeli ship which aided refugees was forced to return with them to Israel, where they were housed and given jobs in a textile factory, because no Asian port would allow them safe haven.

Though Indochinese refugees arrive in many South-East Asian countries, most first begin their new lives in Thailand. Laotians, crossing the Mekong, arrive in northeastern Thailand where they find government camps set up for each Laotian ethnic group: Lao, Meo, and Tai Dam. In this same area, there are also 50,000 Vietnamese who migrated here after the French Indochina War which ended in 1954.

Refugees from Kampuchea arrive in Thailand and find camps set up just across the border. From there, they, like Laotians, must seek third countries of asylum.

Most refugees from Vietnam, escaping by boat, land near the port of Songkhla on the Malay Penninsula. There, they live on the beach or in small huts, awaiting resettlement in a third country.

The Thai government originally set up fourteen camps as temporary shelters for people thinking that the refugees would eventually return to their own countries. By 1978, however, these camps are becoming permanent homes for many refugees and new camps are being built. Several organizations share in the running of these camps. The Thai government and UNHCR share in the provision of food and shelter for the refugees The UNHCR budget for the program in Thailand is 12.5 million dollars, most of which is spent on food for the camps.

The UNHCR also helps to locate third countries willing to take the refugees for resettlement. The International Rescue Committee provides a program for medical care in the camps and conducts a training program to help the refugees provide themselves with simple medical care. The Intergovernmental Committee for European Migration has worked with the U.S. and other countries to provide transportation for the refugees to third countries for permanent resettlement.

Though the U.S. has accepted the largest number of refugees, and plans to accept an additional 7,000 in 1978, many other countries have provided resettlement opportunities for Indochinese people. One of the largest is France, which is now accepting 1,000 refugees a month, and has approximately 27,000 Indochinese refugees in the country. Other countries which have accepted significant numbers of Indochinese refugees are Canada, Australia, Belgium and Malaysia.

The U.S. Office of Refugee Operations and the Immigration and Naturalization Service, operating in Thailand, select and assist those refugees who will enter the United States. Refugees qualify for entry under four basic categories: 1) those with close relatives in the U.S.; 2) those who worked with American forces or missions; 3) those who worked for Americans in meaningful positions; and 4) those with distant relatives in the U.S. or those to be considered on humanitarian grounds.

Although the categories seem fairly clear-cut, immigration officials, officials from the Refugee Operations Office and former Peace Corps Volunteers attached to the Office of Refugee Operations, have spent hundreds of hours interviewing, checking and assisting refugees who wish to emigrate to the U.S.

Those who are allowed to emigrate to the U.S., or another Western country, are seen as fortunate by their compatriots still in Thailand. Yet, once in the U.S. or France, life becomes incredibly complex. While they no longer live in fear of reprisals or repatriations, they face a bewildering change of life style, values, and complex new mechanisms which make up daily life in the West.

In the United States, the Indochina Refugee Task Force, under the Department of Health, Education and Welfare, assumes overall direction of domestic refugee programs for the Indochinese. It provides cash assistance, training programs to give refugees new skills, educational programs, foster parent programs for children without relatives in the U.S., legal aid, and mental health programs to help refugees adjust to the strains engendered by cultural disorientation.

The Task Force also works with nongovernmental agencies which help find suitable living situations in communities throughout the United States. These organizations include the United States Catholic Conference, the International Rescue Committee, Church World Service, the Lutheran Immigration and Refugee Services, HIAS Inc., the Tolstoy Foundation, Inc., the American Council for Czechoslovak Refugees, International Social Services, and the Church of Jesus Christ of Latter Day Saints.

In spite of the assistance hitherto rendered, the refugee problem is an ongoing one. Refugees continue to leave Indochina at the rate of a thousand a month. Unable to get jobs due to past affiliations, unable or unwilling to fit into the new social structures of the new Communist regimes in Indochina, or seeking unification with family, relatives, and friends in other countries, these people are willing to risk leaking boats, land mines, and border patrols to leave. In addition to the 90,000 refugees in Thailand from the Indochina War, there are another 80,000 refugees residing in Vietnam from Kampuchea, and 7–8,000 in other South-East Asian countries.

In August 1977, the Attorney General of the United States, with the concurrence of Congress, used his parole authority to admit 7,000 "boat cases" and 8,000 Laotians to the U.S. This action, and the recent addition of 7,000 cases to be paroled, will help relieve some of the problem particularly in those situations where refugees have been granted only temporary asylum in South-East Asian nations. However, considering the magnitude of the continuing outflow from Indochina, further action by the U.S., Thailand and other concerned nations will be necessary in order to deal with the problem in 1978.

There is some hope that some of the refugees may eventually be allowed to settle in northern Thailand. The Thai government is considering a proposal to let the Meo tribesmen, approximately half the refugee population, settle there. However, the Thai people can only accept so many refugees, and third countries of resettlement must be found for the ones who cannot stay in Thailand.●

## SUPPORT FOR AMENDMENTS TO THE MEAT IMPORT ACT

### HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ABDNOR. Mr. Speaker, the President's Council of Economic Advisors recently recommended allowing more imported meat into the United States to combat increasing retail prices. In doing so, CEA has inadvertently provided price support for the argument that the Meat Import Act should be amended.

Indeed, it is not much of an argument. The act currently requires a reduction in the import quota when domestic production is low and prices can be expected to be high and, conversely, an increase in the quota when domestic production is high and prices low. If anyone can justify that by some logical argument, he must be quite a debator. Clearly, it is in the interests of both consumers and producers to reverse the process.

The South Dakota Legislature spoke to this and other problems with the law in House Concurrent Resolution No. 1011, the text of which follows:

HOUSE CONCURRENT RESOLUTION No. 1011

A concurrent resolution, requesting Congress to restrict imports of foreign beef

Whereas, beef producers have been experiencing severe economic hardship; and

Whereas, beef imports have a very serious negative economic impact on livestock producers; and

Whereas, the quality of foreign beef is traditionally often less desirable than that of domestically produced meat; and

Whereas, it is currently often difficult for the consumer to determine whether beef is foreign or domestic; and

Whereas, the United States International Trade Commission (ITC) held hearings in mid-1977 on the impact of foreign beef on domestic beef prices; and

Whereas, objective International Trade Commission studies indicate that had imports not been allowed to double from 1964 to 1976, beef producers would have received from $1.5 to $1.8 billion more for their cattle in 1976; and

Whereas, the hearings demonstrated a need to amend the Meat Import Act of 1964 in the interests of American beef producers and to assure the consumer a quality product:

Now, therefore, be it resolved, by the House of Representatives of the Fifty-third Legislature of the state of South Dakota, the Senate concurring therein, that the state of South Dakota supports amending the Meat Import Act of 1964 as follows:

1. To incorporate a counter-cyclical quota formula;

2. To extend coverage to all beef and veal products;

3. To reduce the trigger level from 110 to 100 percent of the quota level; and

4. To prohibit the President from suspending quotas at the expense of American producers; and

Be it further resolved, that the Congress of the United States be requested to pass legislation to improve the inspection and labeling of imported beef and veal as follows:

1. By requiring that foreign beef and veal be labeled as such;

2. By increasing the percentage of meat randomly sampled;

3. By increasing the frequency of inspection of foreign plants; and

4. By requiring foreign meat to have the same restrictions as to feed additives, pesticides, etc. as domestic beef; and

Be it further resolved, that copies of this Resolution be sent to President Carter, Secretary of Agriculture Bob Bergland, the Chief Clerks of the United States House of Representatives and Senate and the South Dakota Congressional Delegation.

Virtually every farm organization will recognize and support the need for changes in the 1964 Act. The American Farm Bureau Federation, the nation's largest farm organization, for example, has spoken out on this issue. The resolution adopted at its 59th Annual Meeting in January follows:

MEAT IMPORT ACT

We recommend that the Meat Import Act of 1964 be amended so that all meats, whether fresh, chilled, frozen, canned, cooked, or cured, irrespective of packaging or processing, will be regulated by the Act and subject to quotas. The Act should be revised to provide an inverse relationship between domestic production and imports. Quotas should be revised on a quarterly basis rather than an annual basis.

The legislation I have introduced today and which is reprinted elsewhere in the RECORD addresses each of these points. It also provides for an upgrading of inspection of imported meat for the more complete labeling—both of which should be of interest to consumers.

The bill I have introduced is not the only legislative proposal for correcting the deficiencies in existing law. We have reviewed others, however, and have concluded the language in this measure offers the best and most balanced opportunity to amend the Meat Import Act of 1964 in the interests of both producers and consumers.●

## GUN CONTROL AND CRIME: A REALISTIC VIEW

### HON. J. KENNETH ROBINSON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ROBINSON. Mr. Speaker, periodically, we witness the surfacing of attempts to restrict the right of Americans to own firearms. Proponents use the tired old argument that gun control is equivalent to crime control. Despite the fact that they have not proved their case, certain individuals and groups persist in pushing restrictions on the right to own guns as the best solution to our national problem of crime. It is a too simple solution for a very complex issue.

Dr. Don Kates, an associate professor of law at St. Louis University in Missouri, wrote an informative article entitled "Reflections on the Relevancy of Gun Control." The article was published in the March 1978 issue of World Research INK, a monthly publication of World Research, Inc., Campus Studies Institute Division. Professor Kates has had experience in the areas of civil rights, civil liberties, and poverty law.

The article is a well-reasoned discussion of the fallacies inherent in the arguments of the pro-gun-control group. Professor Kates makes one comment related directly to the question of violence and the availability of guns:

Violence can get eliminated or reduced only by sweeping changes in the institutions, social and economic relationships, and the ideologies and mores, which produce a violence-inclined people. Gun control efforts are fundamentally obstructive, because they divert attention from this arduous task by promising a simple mechanical solution at the cost only of an easily vilified group, gun owners.

I urge my colleagues to read this entire article carefully for a very lucid view of gun control efforts and the failure to achieve the desired results.

REFLECTIONS ON THE RELEVANCY OF GUN CONTROL

(By Don Kates)

To many, handgun prohibition provides a simple and obvious partial solution to our society's remarkable capacity for producing violent people. Unfortunately this cannot be validated by crime studies either in Britain or in this country.

Seven American jurisdictions have, for over 25 years, required a permit to purchase or possess a handgun, or both. Five different criminological studies have compared the per capita homicide and violent crime rates of these jurisdictions to those for the states which allow handguns. The conclusion of each study (based on FBI Uniform Crime Reports for the years 1959, 1966, 1968, 1970 and 1972–1974) is that, taken together, the handgun-prohibiting jurisdictions have consistently higher homicide and violence rates.

Stated without further elaboration, these results might seem subject to the objection that the handgun prohibiting jurisdictions may simply be much more crime-prone than the allowing jurisdictions. Even accepting this hypothesis, however, one must inevitably draw the conclusion that the violence reducing effect of handgun prohibition has not been significant enough to overcome these demographic differences. But in fact these higher homicide and violence rates cannot be attributed to demographic differences. Taken together the handgun-prohibiting jurisdictions are not markedly different in demographic characteristics which we associate with high crime than the handgun-allowing states, taken together. Four of the handgun-prohibiting jurisdictions are comparatively rural, non-urbanized and unindustrialized. But, in general, all the handgun-prohibiting states exhibit substantially higher homicide and violence rates than their demographically similar neighbors or other demographically similar states.

The most massive, extensive and sophisticated study ever done of gun control potential for reducing violence was carried out under federal funding at the University of Wisconsin in 1974–1975. This computerized analysis took into account every demographic variable which was found to have any statistically significant impact upon a comparison of states with differing gun laws. With demographic bias thus absolutely nullified, the Wisconsin report finds: ". . . the conclusion is, inevitably, that gun control laws have no individual or collective effect in reducing the rates of violent crime."

In addition, this study went beyond previous ones to examine not only the effectiveness of extant handgun prohibitions, but their underlying theory, i.e., that the availability of handguns promotes homicide and/or violence. Comparing rates of handgun ownership to homicide and violence rates nationally, the Wisconsin study found no correlation. In other words, homicide and violence rates do not increase as rates of handgun ownership increase, nor do they decrease as rates of handgun ownership decrease.

The Wisconsin findings also refute the "adjacent state" explanation that has greeted previous studies showing handgun-prohibiting states with higher homicide rates. This explanation postulated that state handgun prohibitions were not reducing homicide, because those desiring pistols could buy them in adjacent states. But if there is no correlation between rates of handgun ownership and rates of violence or homicide, how many people have pistols or how they acquire them becomes irrelevant.

Moreover the adjacent state argument has always been inconsistent with the stated purposes of handgun prohibition. Sophisticated proponents of prohibition have never argued that assassins, revolutionaries, terrorists, organized crime or even individual habitual criminals can be disarmed. Rather they argue that greatly reducing the rate of handgun ownership in the general population will greatly reduce homicide, since most murders are committed by ordinarily law-abiding citizens in the heat of a sudden rage. But in the jurisdictions—particularly New York—which have handgun prohibitions, rates of ownership in the law-abiding populace have been radically reduced. Most law-abiding New Yorkers do not risk federal and state felony charges by buying across state lines or on the black market. If the drastic reduction of handgun ownership rates in New York over sixty-five years has not been accompanied by a similar reduction in homicide—while no correlation is anywhere observed between high levels of handgun ownership and of homicide—handgun prohibition would seem to be irrelevant, if not downright counterproductive.

Handguns predominate in American violence not because they are necessarily the only or most effective of weapons, but because our culture perceives them as such. There is much criminological evidence that, in the absence of firearms, the enraged householder will prove just as deadly with any of the other lethal instruments our environment abounds in—although at least one study concludes that Americans are much deadlier with handguns than with knives. Americans may perform less well with knives because of purely cultural factors, particularly a hesitation to rely upon a medium which our culture does not perceive as a pre-eminent weapon or one which adequately guarantees safety to the user. No such hesitation appears to afflict the violent in cultures where the knife in hand-to-hand combat is still regarded as the ultimate weapon. Mexican and Puerto Rican handgun prohibitions are very strict and are augmented by levels of poverty which make handguns virtually unavailable to vast portions of the population. Nevertheless Puerto Rico (the only American region which also

prohibits rifles and shotguns) had a murder rate second only to Georgia in 1974. And the Mexican knife homicide rate was more than three times the American rate for all homicides in the last year in which figures were available.

More important, effective handgun prohibition would turn those desiring weapons not to knives, but to long guns, which are far more deadly than either knives or handguns. How much more is suggested by comparing the commonest long guns to even uncommonly powerful handguns? A 12-gauge shotgun fires a slug which is more than twice the diameter and three times the weight of that of a .357 magnum—or nine pellets, each comparable to a .25 handgun bullet. The common 30–30 or 30–06 hunting rifles fire bullets weighing approximately the same as a .357, but at 2–3 times the velocity. At these velocities a rifle bullet not only penetrates flesh and bone, but creates waves of hydrostatic shock which crush vital organs far removed from its path. Unless a rifle bullet destroys the body by tumbling end-over-end, it is far more likely to travel through, endangering others at a substantial distance beyond.

Eighty-five percent of those shot by San Francisco's Zebra killers—and public figures like Gov. Wallace, Sen. Stennis and Premiers Tojo and Verwoerd—recovered from multiple handgun wounds in the head or chest, which undoubtedly would have been fatal if inflicted with even a sawed-off long gun.

The only disadvantage of the long gun to prospective criminals is its lesser concealability. This may be important to the armed robber, assassin, etc. But it is generally conceded that these types will be least affected by handgun prohibition. To the extent that they are affected, they will probably cut long guns down to conveniently concealable size, thereby increasing the danger to their victims.

As to homicide, concealability is largely irrelevant. Most homicides are committed in a momentary rage by law-abiding citizens who are normally not carrying a concealed weapon. For their purposes, the long gun in an adjacent bedroom or nearby automobile is fully as accessible (but far more deadly) than the similarly situated handgun. This goes a long way toward explaining why American handgun-prohibiting jurisdictions (which drive those desiring weapons to long guns) consistently have higher homicide rates. In Britain, where far more "crimes of passion" are committed with long guns than in this country, the recovery rate from shooting is much lower.

The only in-depth study of British gun control concludes, incidentally, that it has had no ascertainable effect upon violence. Done by a high-ranking British police officer for Cambridge University in 1970–71, this study notes: that Britain was very peaceful before prohibition was adopted in 1920, although until then it had literally no laws curtailing ownership or carrying of firearms; obeyed the prohibition only because England is so safe that firearms are not deemed necessary for self-defense; and that British criminals have retained illegally at least the same number of firearms they possessed in 1920. It appears that violent crime is comparatively rare, because the highly civilized, homogeneous, closely-knit British society better imposes cultural restraint against violence, upon even its criminals, than do we.

Gun control is irrelevant to the real determinant of violence, which is not the availability of firearms but the inclination toward use of weapons at all in interpersonal relations. Contrast the phenomenally high Mexican homicide rate with very unsophisticated weapons to the phenomenally low homicide rate in Switzerland, where every man of military age owns a fully automatic rifle. (Such weapons, which are forbidden in this country, are widely available also in Denmark, Israel and Finland, all countries with very low homicide rates.)

Violence can be eliminated or reduced only by sweeping changes in the institutions, social and economic relationships, and the ideologies and mores, which produce a violence-inclined people. Gun control efforts are fundamentally obstructive, because they divert attention from this arduous task by promising a simple mechanical solution at the cost only of an easily vilified group, gun owners. Americans must choose either to experiment with painful and difficult institutional change or to accept and live with the inevitability of continued violence.●

## BUDGET LIMITATION ACT

### HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. HAGEDORN. Mr. Speaker, whatever benefits have accrued from the new budgetary process—and it has provided the opportunity to assess the budget in a more coordinated manner—fiscal discipline is not one of them.

Fiscal year 1979 is the fourth year of the budget process, with fiscal year 1976 having been a trial run in most respects. During this time (assuming the eventual acceptance of budget figures contained in the first fiscal year 1979 House budget resolution), Congress will have run up more than $230 billion in new budget deficits, and will have increased total outlays by more than 50 percent or $175 billion.

TABLE I.—BUDGET RECEIPTS AND OUTLAYS: 1975–79

[In millions of dollars]

| Fiscal year | Receipts | Outlays | Deficit |
|---|---|---|---|
| 1975 | 280,997 | 326,092 | 45,095 |
| 1976 | 299,197 | 365,643 | 66,446 |
| TQ | 81,687 | 94,657 | 12,970 |
| 1977 | 356,861 | 401,902 | 45,040 |
| 1978 estimate | 400,500 | 450,970 | 50,470 |
| 1979 estimate | 443,279 | 501,385 | 58,079 |

Source: Office of Management and Budget, Executive Office of the President. Fiscal year 1978 current estimates. Fiscal year 1979 first concurrent House budget resolution.

Including outlays of off-budget Federal entities, the new deficit created will be more than $270 billion, equally levels of total outlays for fiscal year 1974.

TABLE II.—OFF-BUDGET OUTLAYS: 1975–79

[In millions of dollars]

| Fiscal year | Outlays of off-budget Federal entities | Total outlays | Total deficit |
|---|---|---|---|
| 1975 | 8,054 | 334,145 | −53,149 |
| 1976 | 7,211 | 372,854 | −73,657 |
| TQ | 1,770 | 96,427 | −14,740 |
| 1977 estimate | 8,693 | 410,594 | −53,733 |
| 1978 estimate | 11,514 | 473,748 | −73,361 |
| 1979 estimate | 12,538 | 512,712 | −73,124 |

Source: Office of Management and Budget, Executive Office of the President.

Federal expenditures have continued their long-term trend of growing faster than the economy as a whole, reflective of the state of public expenditures at all levels of Government.

TABLE III.—THE FEDERAL BUDGET AND THE GNP

[Dollar amounts in billions]

| Fiscal year | Gross national product | Budget receipts | | Outlays | | Surplus/deficit | | High employment surplus/deficit[1] | Off-budget Federal outlays | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Amount | Percent of GNP | Amount | Percent of GNP | Amount | Percent of GNP | | Amount | Percent of GNP |
| 1965 | $657.1 | $116.8 | 17.8 | $118.4 | 18.0 | | | | | |
| 1966 | 721.1 | 130.9 | 18.1 | 134.7 | 18.7 | | | | | |
| 1967 | 774.4 | 149.6 | 19.3 | 158.3 | 20.4 | | | | | |
| 1968 | 829.9 | 153.7 | 18.5 | 178.8 | 21.5 | | | | | |
| 1969 | 903.7 | 187.8 | 20.8 | 184.5 | 20.4 | | | | | |
| 1970 | 959.0 | 193.7 | 20.2 | 196.6 | 20.5 | | | | | |
| 1971 | 1,019.3 | 188.4 | 18.5 | 211.4 | 20.7 | | | | | |
| 1972 | 1,110.5 | 208.6 | 18.8 | 232.0 | 20.9 | | | | | |
| 1973 | 1,237.5 | 232.2 | 18.8 | 247.1 | 20.0 | | | | 0.1 | 0.01 |
| 1974 | 1,359.2 | 264.9 | 19.5 | 269.6 | 19.8 | | | | 1.4 | .1 |
| 1975 | 1,454.6 | 281.0 | 19.3 | 326.1 | 22.4 | | | | 8.0 | .6 |
| 1976 | 1,625.4 | 299.2 | 18.4 | 365.6 | 22.5 | | | | 7.2 | .4 |
| 1977 | 1,838.0 | 356.9 | 19.4 | 401.9 | 21.9 | | | | 8.7 | .5 |
| 1978 (estimate) | 2,043.2 | 400.4 | 19.6 | 462.2 | 22.6 | | | | 11.5 | .6 |

Source: Derived from data in U.S. Department of Commerce, "The National Income and Product Accounts of the United States, 1929–74," tables 1.1, 1.9, and 3.1; "Survey of Current Business," July 1977, same tables; and, for defense expenditures for 1929–38, Solomon Fabricant, "The Trend of Government Activity in the United States since 1900" (New York: National Bureau of Economic Research, 1952), pp. 240–241. The data on defense expenditures last mentioned are given by Fabricant for fiscal years. They have been converted into estimates for calendar years through linear interpolation. "Growth of Government in the West," G. Warren Nutter (American Enterprise Institute for Public Policy Research, 1978).

To fill a gap in the budget process, I and 14 of my colleagues (Representatives DAN DANIEL, EDWARDS of Oklahoma, GOODLING, ICHORD, KINDNESS, JEFFORDS, LAGOMARSINO, QUALE, SCHULZE, STANGELAND, SYMMS, TREEN, and WHITEHURST) have introduced legislation which would amend the Congressional Budget Act of 1974 and require that, except during times of war, annual increases in levels of budget outlays and budget authority could not exceed the average annual percentage increase in the GNP during the 3 calendar years preceding.

The 3-year requirement is designed to permit some measure of flexibility in dealing with expenditures, such as food stamps and unemployment benefits, highly dependent upon and inversely related to levels of economic growth.

Not only would this legislation establish broad limits to the proportion of the GNP that could be consumed by the Federal Government, but it would also affect sharply the character of the pressures that influence budget formation. Special interests would no longer be competing with the taxpayer to raise the total ante in the budget; instead they would be competing with each other to increase their relative share of a fixed ante.

As Nobel Laureate Economist Milton Friedman, among others, has noted, one of the paradoxes of the public budget process—at all levels, not simply the Federal level—is that the incentives for participation in individual budgetary decisions are far greater for those who want to spend public money than for those who do not wish it to be spent.

In lobbying legislative bodies for an expenditure or subsidy of some sort, the special interest group that stands to gain by that expenditure or subsidy will normally be intense and passionate in support of that legislation. Their interest will be such that their electoral support or opposition for a candidate may hinge solely upon his vote on that single issue.

Meanwhile, those who stand to suffer as a result of the expenditure or subsidy—the taxpayer—is normally unable to muster a similarly intense and focused opposition effort. Individually, no taxpayer stands to lose very much as a result of each individual expenditure or subsidy. And no taxpayer is likely to rest his electoral support or opposition on the basis of legislation costing him only pennies.

It is only when these individual programs are aggregated that the taxpayer feels the pinch. By the time he recognizes that he has been nickeled and dimed to the poorhouse, it is too late.

The Budget Limitation Act would make clear to the tax spenders that, jointly, they could not bid up the Federal budget to levels limited only by their perseverance and ingenuity. They would be faced, instead, with a budget ceiling within which they would have to grapple with each other for their share. Their new competition would be with other tax spenders rather than with the taxpayer.

Congress would be forced to establish spending priorities. Nothing, of course, would prevent Congress from setting outlay and authority levels below the statutory limit—and I would certainly hope that it would—but, in no event, could a profligate Congress exceed those levels.

The following chart gives a brief picture of the impact that this amendment would have had upon the budget if it had been contained in the original Congressional Budget Act.

TABLE V—IMPACT OF BUDGET LIMITATION ACT

[In billions of dollars]

| Fiscal year | Actual outlays | Maximum outlays under act | Difference | Cumulative difference |
|---|---|---|---|---|
| 1976 | 366.5 | 358.6 | 7.9 | 7.9 |
| 1977 | 409.2 | 391.1 | 18.1 | 26.0 |
| 1978 | 451.0 | 426.6 | 31.9 | 57.9 |
| 1979 | 501.3 | 477.8 | 22.8 | 80.7 |

The budget limitation concept has captured increasing interest among the States in the form of tax limitation. Because the Federal Government alone is not constrained in its ability to spend by the amount of revenues available to it, I believe that a spending limitation is more appropriate at the Federal level.

The tax limitation concept has gained approval in Tennessee, while having been defeated by narrow margins in such States as California and Michigan. In one form or another, it is likely to be on the ballot in several more States this year, including California and Michigan (again), and Massachusetts.

Mr. Speaker, there are two important pieces of legislation that Congress could realistically pass that would insure that future growth in this country does not come predominantly from the public sector. The first is the budget limitation legislation which would insure that Federal spending does not increase as a proportion of the economy. The second would be the so-called indexing of the Internal Revenue Code, adjusting income brackets, deductions, and exemptions to account for changes in the cost-of-living, which would insure that taxes do not increase as a proportion of the economy.

Although it would represent a significant first step, I do not believe ultimately that we should be satisfied simply in maintaining public spending at a fixed proportion of the economy. There are two primary reasons for this. First, presumably as the economy grows, there should be a diminished need for many of the transfer payments that make up such a large share of the Federal budget. Our country's goal should be the reduction of social welfare spending as a proportion of the economy. As the economy grows, the need for such spending should concomitantly decline.

Secondly, since much of the Federal budget consists of expenditures for items—such as national defense—which are essentially fixed cost items, these

functions should be expected to decline as a proportion of a growing economy.

Unless we are willing to make genuine reforms in the areas of spending and taxes, and correct the in-built pressures that currently work to distort the Federal budget process, we are going to continue to witness the growth of government in this country. As in the past, this growth will continue to come at the expense of real economic growth, an improved standard of living, and individual freedom.

## THE PEOPLE UNDERSTAND BETTER THAN MANY IN CONGRESS THE IMPORTANCE OF MARGINAL TAX RATES

### HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. KEMP. Mr. Speaker, two recent articles in Business Week and the Buffalo Evening News point out the fact that workers are greatly distressed over high marginal tax rates and are altering their work decisions accordingly.

As Business Week notes, a major thrust of union negotiating in recent years has been toward obtaining more time off in lieu of higher wages. This is quite clearly a method of increasing one's aftertax income, in effect. Obviously, if your weekly pay stays the same but you work fewer hours, your hourly income will have increased without pushing you into a higher tax bracket. Similarly, workers are demanding more fringe benefits, such as pensions, in lieu of higher wages, since such benefits are not taxed.

The Buffalo Evening News has also taken note of workers' increased sensitivity to marginal tax rates. In a story about the Brock family of Tonowanda, N.Y., the news quoted Mrs. Brock as saying it was reaching the point where she could no longer afford to work because of high State and Federal tax rates.

I suggest that the Congress note these trends when considering the President's tax package which would raise, rather than lower, marginal tax rates.

The articles follow:

[From the Buffalo Evening News, Apr. 9, 1978]

FAMILY'S INCOME IS ABSORBED BY MULTIPLE TAXES

(By Lee Coppola)

The average middle-income family in Erie County, according to economists, shells out 30 cents of every dollar earned for some sort of taxes.

In some cases, as with cigarettes, gasoline, alcohol and tires, the taxes involve taxes on taxes—sales tax tacked to other taxes already included in the purchase price.

In other cases, where a variety of taxes have been hidden in the cost of the item, it's impossible to fully calculate the tax burden.

Mr. and Mrs. Alan Brock of Springfield Avenue in the Town of Tonawanda agreed to outline their spending in 1977 to allow The Buffalo News to illustrate the typical tax burden.

"The middle-class American, who is trying to make ends meet and work hard, is being taxed to death," Mrs. Brock, a part-time nurse, said, after tallying her family's expenses.

Mrs. Brock, 45, earned $7,919 in 1977. Her husband, 46, a sheetmetal worker, earned $19,856, along with $1,851 from a union trust fund.

By far the couple's largest tax slice was the $5,358.20 in state and federal income tax on their wages.

But their real tax outlay, a conservative estimate that does not include sales taxes from forgotten purchases, totaled roughly $8,670.

The Brocks live in a modest ranchstyle home that cost them $13,000 22 years ago.

They have four children, three teen-agers that attend public schools and a 20-year-old daughter enrolled at Cornell University.

Mr. Brock drives an 11-year-old Plymouth station wagon with an odometer making a second pass at 100,000. Mrs. Brock gets back and forth to work in a 1974 Ford compact.

Their concessions to luxury include an above-ground swimming pool in their backyard, a couple of air conditioners and two color TV sets.

The Brocks take no vacations, since Mr. Brock does not get paid for time off or when he calls in sick.

So where does their money go? A sizable chunk, as Mrs. Brock detailed goes to some form or another of taxes.

To live in their house, the Brocks' records showed, they paid a moderate $585 in property and school taxes in 1977. Taxes on utilities were $120.16, and home upkeep, including $30 for paint and about $225 for other items, figured out to $17.85 in sales taxes.

To clothe themselves and their four children, Mrs. Brock estimated she and her husband spent $900 during the year, which cost them $63 in sales taxes.

But that does not tell the entire story of their clothing tax costs. The $63 fails to reflect, for instance, the tax on imported clothing, the Social Security taxes the garment manufacturer paid for his employees or the highway taxes paid by the trucking company that shipped the goods.

All, of course, were included in the price of the item before the sales clerk added on the 7 percent sales tax.

The Brock's major purchases for the year included $100 for a cover for the swimming pool, $214 for a bedroom rug, $350 for a freezer, $200 for an air conditioner and $410 for a color television Mrs. Brock bought her husband as a Christmas present. Total sales tax—$89.18.

For fuel for their cars, the Brocks spent $135 in sales taxes, as culled from a federal tax chart based on miles driven. The tax bite does not include the 4 cents federal and 8 cents state tax that goes along with every gallon of gasoline.

Their cars also cost them $21 in sales tax on an estimated $300 in repairs. And, in another example of tax-on-tax, they purchased six new tires and paid $16.80 in sales tax—plus an equal amount in federal excise taxes.

Taxable grocery items, including food for the family's dog, cat and two hamsters, also up the Brocks' hidden tax total.

Mrs. Brock figures she spends roughly $40 a week on other taxable items such as paper towels, soap and toothpaste, for a sales tax contribution of $145.60.

The Brocks seldom buy liquor, but Mr. Brock drinks a 12-pack of beer a week. That's roughly $14 in sales tax and $17 in federal beer tax annually, figured at $9 per barrel.

The Brocks both smoke heavily, buying three cartons of cigarettes a week. Their smoking habit comes to about $709 a year, but $408 of the total represents taxes, including 15-cents-a-pack state tax, 8-cents-a-pack federal tax and 7 percent sales tax, not only on the cigarettes but also on the taxes they bear.

The family doesn't entertain often or go for lavish restaurant meals. But, for $7 a week, the Brocks enjoy a Friday fish fry and figure they spend another $8 a week in fast-food restaurants. Mr. Brock in 1977 bought his lunch every day, and Mrs. Brock purchased hers in the hospital cafeteria, for another $20 a week in eating-out costs. So, along with their meals, they also paid $127.40 in sales tax.

Mr. Brock's union has a small pension fund based on his hourly wages, but he also contributed $965 in Social Security taxes, while Mrs. Brock added another $463 to the federal coffers.

The tax bite gets so bad Mrs. Brock now thinks about refusing to work extra days. "I bring home $40 a day if I work three days but $35 a day if I work an extra day," she said.

[From the Business Week Apr. 24, 1978]

UNIONS CAMPAIGN TO SHRINK WORK TIME

Two events in the past week pointed up a seeming incongruity in U.S. attitudes about the issue of working time. Last week President Carter signed a bill raising the mandatory retirement age to 70, thus enabling workers to stay longer on the job. This week a newly formed union organization, supported by such powerful unions as the United Auto Workers and the United Steelworkers, kicked off a campaign to reduce working time, with the goal of a shorter work week.

Shrinking the work week—or shortening the work year—will probably have a much greater impact over the next decade than lengthening work life. Only about 200,000 workers are expected to choose to work beyond age 65 in the first year of the newly amended Age Discrimination Act. In contrast, the average retirement age will continue to decline, while workers are demanding more and more time off the job.

SEEKING SUPPORT

A new union group, the All Unions Committee to Shorten the Work Week, hopes to strengthen that trend by whipping up rank-and-file support for shorter work-time demands in collective bargaining. Some 700 delegates from 21 unions met this week in Dearborn, Mich., and laid plans for "a national movement to create jobs by reducing the hours of labor." The organizer and head of the committee is Frank Runnels, president of the UAW's 10,000-member Cadillac Local 22 in Detroit and a longtime advocate of a shorter week for the UAW.

The new committee has the support of top officials of many unions, including the Machinists, Electrical Workers, Meatcutters, and others. While a week of fewer than 40 hours is unlikely to become the standard soon, unions are clearly moving in that direction. "The American worker is going to have a four-day week," UAW President Douglas Fraser told the Dearborn meeting. "The only question is how soon."

Ever since the 40-hour week was established by the Fair Labor Standards Act in 1938, organized labor has perennially demanded a further reduction. Until recently these demands were only perfunctory, largely because rank-and-file workers preferred to get higher wages and more benefits instead of additional time off. But the recession of 1974–75 revived interest in spreading the work, and enhancing the security of workers who had jobs, by reducing work time.

At the same time, the generation of workers born in the postwar "baby boom" period, now dominant in the labor force, has indicated more interest in leisure time than older generations. Through increased vacations, sick leaves, holidays, and a variety of "go-to-hell" days, the work year has declined markedly. The UAW estimates that average annual

hours worked by manufacturing employees dropped 3%, to 1,920 hours last year from 1,980 hours in 1960.

A HARD FIGHT

The fact that workers in heavy industry increasingly want less time on the job shows up in the declining retirement age. The average age of hourly employees retiring at General Motors Corp. dropped to 58 in 1975 from 70 in 1950. Moreover, the UAW says that more than 30% of its members who are eligible for "30-and-out"—retirement after 30 years' service, regardless of age—are choosing to retire. And although average weekly hours worked in manufacturing have stayed constant at around 40, AFL–CIO economist John Zalusky points out that "scheduled" hours of work have gone down.

Despite the convergence of these trends, organized labor will not easily win a four-day week. Managment, worried about the inflationary impact of large boosts in paid-time off the job, will resist the shorter-time demands. And other bargaining priorities may suddenly take precedence. Richard A. Belous, a research associate at George Washington University's Center for Social Policy Studies, says that workers now appear to be relatively satisfied with their real earning power. "If there is double-digit inflation, however, there will be no massive trend toward more time off," he cautions.

If the work-time demands materialize, they will most probably chip away at the length of the work year rather than attempt to reduce the work week in one fell swoop. The model could be the UAW's program, under which auto workers next year will receive seven paid personal holidays, in addition to regular holidays. This is the equivalent of seven 4-day weeks per year. "We're not advocating a 30- or 32- or 35-hour work week," Runnels says. "We are leaving the various unions the flexibility to do it in a manner that meets their own industry's circumstances . . . and we don't expect to do it overnight."●

## STATEMENT OF CHAIRMAN ULLMAN, COMMITTEE ON WAYS AND MEANS, WITH RESPECT TO THE RULES TO BE REQUESTED ON H.R. 11711, TO IMPROVE THE OPERATION OF THE ADJUSTMENT ASSISTANCE PROGRAMS FOR WORKERS AND FIRMS UNDER THE TRADE ACT OF 1974

### HON. AL ULLMAN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ULLMAN. Mr. Speaker, on Tuesday, April 18, 1978, the Committee on Ways and Means favorably reported H.R. 11711 to the House. The bill would increase the accessibility for firms and workers to apply for adjustment assistance; improve the delivery of assistance; increase benefits for job relocation and training; and increase the maximum on direct loans and loan guarantees.

I take this occasion to advise my Democratic colleagues as to the nature of the rule that I will request for consideration of H.R. 11711 on the floor of the House. The Committee on Ways and Means specifically instructed me to request the Committee on Rules to grant a modified closed rule for consideration of H.R. 11711 which would provide for amendments relating only to chapters 2, 3, and 5 of title II of the Trade Act of 1974, the trade adjustment assistance provisions of the act; 1 hour of general debate, to be equally divided; waiving all necessary points of order, and with one motion to recommit with or without instructions.

It is our intention to request a hearing before the Committee on Rules as expeditiously as possible.●

## THE WARSAW GHETTO UPRISING ANNIVERSARY

### HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. GILMAN. Mr. Speaker, today is the 35th anniversary of one of the saddest events in human history, unparalleled before, and indelibly etched in the memories of its survivors and witnesses. In 1943, residents of the Warsaw Ghetto staged an uprising which lasted for several weeks—a courageous uprising which tragically ended in the liquidation of the entire ghetto on May 16.

Mere words do not suffice to describe such an atrocity. The words "tragic," inhuman," or "despicable" come to mind, but the stark reality is that words cannot adequately describe the horror that was experienced there and which is relived daily in the minds and hearts of the survivors of the Holocaust.

While it is difficult to express the anguish and despair that was felt in Warsaw, the utterance of such abominable places as Auschwitz, Treblinka, and Vilna raise immediate images—haunting pictures of Jews being "systematically destroyed," in an explosion of primal slaughter, rows upon rows being gunned down and bodies slumped in ditches, the bulging eyes of starving mothers and children, the brittle bones of prisoners protruding through their skin. The phrase "the living dead" was used to describe the condition of these thousands of inmates and victims as they hung onto the brink between death and life, victims condemned to living out the day-to-day existence that proved more torturous than quick death.

There are several ways to deal with the Holocaust: The first is apathy and a loss of memory—allowing the gruesome horrors and subhuman treatment of 6 million people to remain buried in a past chapter of history, an event which has nothing to do with life today. Another course one might take is to remember the Holocaust, to teach it to our young and to work towards the prevention of another Holocaust. The lessons learned from the Holocaust are many. The human suffering and disgrace are universal emotions and are universal symbols of man's struggle against oppression and evil.

Teaching the Holocaust to our young children and to others who have not experienced the massive dehumanization is not an easy task. It must be done with sensitivity and our feelings in retrospect should be directed towards the creation of a future atmosphere of freedom and tolerance. But it is imperative to remember the Holocaust and tragic events such as the Warsaw Ghetto massacre because each of us gains some strength from the examples offered in resistance against the enemy, and each of us learns to appreciate and love life—the gift of life—even more. And we must learn to forgive, but that does not mean to forget; for it is in a spirit of reconciliation—not resignation—that one learns to "pick up the pieces" and to continue the traditions and rites which are ours by birth.

Surviving the Holocaust is an irony simply because survival is sometimes as much a burden as death. Survivors still document their terror at the sound of a gunshot, the dreams that haunt them nightly, and even in their sleep, they return to the concentration camps and are witness to the horror which lingers in their subconscious. And right before their eyes they are reliving it again, even 35 years later, in the faces and cruelty of the intolerant, in the persecution and terror which has become a way of life in the seventies. No one believes that it will ever happen again—it is too horrible to happen again—and most close their eyes to it.

Perhaps it does take nearly four decades to be able to fully comprehend these events and to understand what they represent. It is certainly commendable that a major television network in adapting a family's story of the Holocaust, has allowed all Americans to experience the barbarous, and sadistic actions which took place in Nazi Germany and which spread inevitably across Europe. For many Americans, this documentation of pain is the first introduction to the events in Nazi prison camps, and for many it will be a startling experience. But it is a necessary, important experience—one which will hopefully, jar families and individuals into action against intolerance, ignorance, and bigotry.

In one vivid scene in NBC's "Holocaust" there are two young Jews who have escaped from the death lines, and who have chosen to face the day-to-day threats which they encounter in their flight to freedom. In their escape, they witness a scene which is terrifying and gruesome—a firing squad mowing down long lines of Jewish inmates one by one. Their bodies tumble into newly dug graves, and machinegun bullets riddle their bodies. The hidden observers are stunned in stark disbelief. One says to the other "No one will ever believe this. Human beings don't do this to other human beings."

But the tragic fact is that yes, they did do this to other human beings and mankind is still inflicting acts of inhumanity on other human beings. Six million human beings perished through mass gassings, mass shootings, by being worked to death and by starvation. And the inevitable excuse, the justification for all this was that the officers were "just following orders."

We too have our orders, orders from the pages of history, from the lips of the innocent dead and the basic notions of right and wrong which are inherent in all of us. These orders tell us to instruct the world of the possibilities and stark realities of Holocaust, and to imprint the picture of human suffering on

each man and woman who has the gift of life. Each of us—each man and woman has a responsibility to every other human being on earth, a responsibility which transcends distance and different cultures. It is our obligation to speak up against inhumane acts, against torture and suffering wherever it may be—in all parts of the world, and to try to alleviate that pain and suffering. We must not turn our backs, nor can we allow the rest of the world to turn its back on us.

In remembering the Holocaust, let us not be blind to its lessons. It is a condemnation of apathy—it is a call to action. We have been given the gift of life and the lessons of history, let us use them well to teach and to learn.●

## INTRODUCING H.R. 12239, PERTAINING TO MEAT IMPORTS

### HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ABDNOR. Mr. Speaker, following is the text of a bill I have introduced today:

H.R. 12239

A bill to improve the inspection and labeling of imported meat and to enhance the stability in meat supplies and prices, for the benefit of domestic producers and consumers

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. This Act may be cited as "The Beef Act of 1978."

SEC. 2. Section 20(a) of the Federal Meat Inspection Act (21 U.S.C. 620(a)) is amended by inserting "(1)" after "(a)", and by adding at the end thereof the following:

"(2) The Secretary shall, with respect to any carcass, part of a carcass, meat or meat food product of a cow, sheep, swine, goat, horse, mule, or other equine which is capable of use as human food and which is imported into the United States, require by regulation or otherwise that any such article, or any product made in whole or in part from any such article if capable for use as human food, or that the package or container of such article or product, be labeled or otherwise marked in such manner as the Secretary determines practicable to inform the retail consumer of such article or product at the time of purchase that such article or product was imported, in whole or in part, as the case may be, into the United States.

"(3) No carcasses, parts of carcasses, meat or meat products of cattle, sheep, swine, goats, horses, mules, or other equines which are capable of use as human food shall be imported into the United States unless—

"(A) tests have been conducted on the carcasses, parts of carcasses, and meat and meat food products, including internal organs, of the animals from which such articles came, to determine whether such articles (i) contain any substance, as defined in paragraph (5), and (ii) contain a level of any such substance in excess of the maximum level permitted by law or regulation;

"(B) such tests have been conducted, in the country from which such articles are being imported, by persons who have been initially certified (and subsequently recertified) in the same or similar manner and under the same criteria as persons who are initially certified (and subsequently recertified) by the Department of Agriculture to conduct such tests on articles of animals produced in the United States; and

"(C) the appropriate government official of the country from which any such article is being imported has certified to the Secretary that such article has been tested in accordance with regulations issued by the Secretary and that such article does not contain any substance as defined in paragraph (5) or contain a level of any such substance in excess of the maximum level referred to in paragraph (5), as appropriate.

"(4) In order to verify the accuracy of testing required for substances, as defined in paragraph (5), the Secretary shall conduct a program under which inspectors of the Department of Agriculture take, from time to time, samples of carcasses, parts of carcasses, and meat and meat food products of animals referred to in paragraph (5) which are intended for export to the United States, including the internal organs of the animals from which such carcasses and meat and meat food products came, and send such samples to the United States for appropriate testing.

"(5) As used in paragraphs (3) and (4) of this subsection, the term "substance" means any chemical matter for which the Department of Agriculture conducts tests on carcasses, parts of carcasses and meat and meat food products, including the internal organs, of cattle, sheep, swine, goats, horses, mules, or other equines which are capable of use as human food, for the purpose of determining whether residues of such chemical matter are present in such articles or to determine whether the residues of such chemical matter present in such articles exceed levels authorized by law or regulation.

"(6)(A) The Secretary shall prescribe such assessments and fees on imported meat and meat food products as he determines necessary to cover the costs of inspections, certifications, testing, and labeling (or other marking) required under this section.

"(B) In establishing the level or rate of assessments and fees to be imposed under this title, the Secretary shall take into consideration the volume of imports, the value thereof, and such other factors as he deems appropriate in order to achieve a fair and equitable allocation of such assessments and fees among importers.

"(C) The Secretary shall have authority to suspend or revoke the privilege of any importer of meat or meat food products to import such products into the United States if such importer fails to pay the assessments or fees which he is required to pay under this paragraph."

SEC. 3. Subsection (a) of section 2 of the Act entitled "An Act to provide for the free importation of certain wild animals; and to provide for the imposition of quotas on certain meat and meat products" (78 Stat. 594; 19 U.S.C. 1202), hereinafter referred to as the "Quota Act," is amended to read as follows:

"SEC. (a)(1) It is the policy of the Congress, except as provided in paragraph (2), that—

"(A) The aggregate quantity of the articles specified in items 106.10 (relating to fresh, chilled, or frozen cattle meat) and 106.20 (relating to fresh, chilled, or frozen meat of goats and sheep) (except lambs) of the Tariff Schedules of the United States which may be imported into the United States in any calendar year beginning after December 31, 1978, shall not exceed 652,860,000 pounds;

"(B) The aggregate quantity of the articles specified in items 106.80, 106.85, 107.20, 107.2520, 107.40, 107.45, 107.48, 107.50, 107.52, 107.55, 107.60, 107.70, 107.7540 and 107.7560 (relating to prepared or preserved beef and veal) of the Tariff Schedules of the United States which may be imported into the United States in any calendar year beginning after December 31, 1978, shall not exceed 80,000,000 pounds;

"(C) The aggregate quantity of the articles specified in items 100.40, 100.43, 100.45, 100.50, 100.53, and 100.55 (relating to live cattle) of the Tariff Schedules of the United States which may be imported into the United States in any calendar year beginning after December 31, 1978, shall not exceed 400,000 head or 200,000,000 pounds;

"(2) An 'aggregate quantity,' as stated in subparagraphs (A), (B) and (C) of paragraph (1), shall be—

"(A) increased or decreased for any calendar year by the same percentage that estimated average annual domestic commercial production of the articles described in subparagraph (A) of paragraph (1) in that calendar year and the two preceding calendar years increases or decreases in comparison with the average annual domestic commercial production of those articles during the years 1959–1963, inclusive, and

"(B) further increased or decreased by multiplying the 'adjusted base quota,' resulting from the adjustment in subparagraph (A) of this paragraph, by the fraction having as its numerator the ten-year moving average of per capita commercial cow beef production and as its denominator the average of the estimated per capita commercial cow beef production for the quota year under consideration and the actual per capita commercial cow beef production for the previous year.

"(3) Notwithstanding any other provision of law, the limitations imposed by this section shall apply with respect to articles imported into the United States, whether or not such articles are shipped directly into the United States or transshipped through foreign trade zones into the United States."

SEC. 4. Subsection (b) of the Quota Act is amended to read as follows:

"(b) The Secretary of Agriculture, for each calendar year after 1978, shall estimate and publish—

(1) before the beginning of such calendar year, the aggregate quantities prescribed for such calendar year by subsection (a), and

(2) before the first day of each calendar quarter in such calendar year, the aggregate quantities of the articles described in subsection (a)(1)(A), (B), and (C), which (but for this section) would be imported in such calendar year.

In applying paragraph (2) for the second or any succeeding calendar quarter in any calendar year, actual imports for the preceding calendar quarter or quarters in such calendar year shall be taken into account to the extent data is available."

SEC. 5. Subsection (c) of the Quota Act is amended by striking out "110" each place it appears and inserting in lieu thereof "105."

SEC. 6. Subsection (d) of the Quota Act is amended by inserting "domestic cattle raisers are operating at a reasonable level of profitability, and that" after "if he determines and proclaims that."

SEC. 7. Notwithstanding any other provisions contained herein, the President may prohibit or curtail the importation of any of the articles defined in paragraph (a)(1) of Section 2 if he determines and proclaims that such action is required by overriding economic or national security interests of the United States, giving special weight to the importance to the Nation of the economic well-being of the domestic livestock industry.●

## DEPARTMENT OF ENERGY'S BUDGET

### HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. KETCHUM. Mr. Speaker, recently I received a letter from a former constit-

uent of mine who forwarded me a copy of a circular which has been sent to interested parties from Western Crude Oil. The subject matter deals with the annual budget accorded the Department of Energy. Although I realize that there are those who grimace over remarks made by oil concerns about the centralized government regulator, I do feel that the concerns raised are significant as well as timely. Consequently, I would like to take this opportunity to quote the article in full:

Last year, Western Crude Oil distributed a fact sheet which quoted a Washington Post headline: "HILL APPROVES DEPARTMENT OF ENERGY STAFF OF 20,000, BUDGET OF $10 BILLION." That fact sheet compared the DOE's 19,767 employees and 1978 budget of $10.6 billion to certain aspects of the oil industry, and concluded that "If you believe this budget won't increase next year, you'd better look under your pillow—someone may have left you a quarter."

Alas, the tooth fairy did not come, but the 1979 DOE budget did—and how! $12.6 billion; an increase of almost 20%! To put the new budget in perspective, some of the comparisons made last year are restated below. (Last year's comparative numbers are in parentheses.)

1. It represents $637,000 ($500,000) per DOE employee (assuming the same number of employees).
2. It represents over $59 ($50) for each and every member of the U.S. population (212 million).
3. It represents $316,878 ($266,871) for each of the 39,763 wells drilled in 1976.
4. It represents $4.27 ($3.59) for each barrel of domestic crude oil production in 1976.
5. It represents $1.99 ($1.67) for every barrel of petroleum products consumed in 1976.
6. It represents almost $0.12 ($0.10) for every gallon of gasoline consumed in 1976.
7. It represents $0.41 ($.34) on every barrel of proven crude oil reserves as of December 31, 1976 (30.9 billion barrels).

To put the DOE's new budget in another perspective, it is approximately double the 1976 earnings of the seven largest oil companies and exceeds the 1976 net income of the top 20 oil companies by almost $2 billion—profits which were characterized as "obscene".●

## ACTION REQUIRED ON HUMAN RIGHTS PROBLEM IN CAMBODIA

### HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. SOLARZ. Mr. Speaker, this week marks the third anniversary of the fall of the Cambodian Government. Last September 27 this body without dissent passed a resolution offered by me and cosponsored by Representatives DERWINSKI, FRASER, HARRINGTON, and GOODLING, which expressed deep concern over the continuing disregard for basic human rights of the Cambodian people by the Government of democratic Kampuchea and called on the President to make every effort to bring the flagrant violations of human rights to an end.

Unfortunately, the situation only seems to have deteriorated in recent months, and there is no end in sight to the mass killings. Reliable estimates of the situation in Cambodia indicate that since the fall of Phnom-Penh in April 1975, over 1 million of the Cambodian people have been slaughtered by their own government. What we see in Cambodia is something almost unprecendented in the annals of human history—the slaughter of a people by its own people, a phenomenon Jean Lacoutre has labeled as autogenocide.

Mr. Speaker, this week all of us in Congress are engrossed in studying the Holocaust—which destroyed 6 million European Jews during World War II. Many of us wonder how the world was silent, and others ask, "Could it happen again?" But while we ask these questions, we have only to look at the behavior of the world's international organizations today to realize that the world can be silent while it indeed happens again.

In order that our children not look back at us in horror once again, I urge all the Members of this body to redouble their efforts to bring public opinion to bear on the Khmer Rouge regime, and I urge that the President do everything in his power to bring the killings to an end.

Mr. Speaker, I ask that the following two items be inserted at this point in the RECORD. The first is a statement by Mr. Chhang Song, former minister of information of the Cambodian Government, in which he calls for an international conference to deal with the Cambodian problem. The second is a letter to the editor of the New York Times by Prof. Joseph W. Eaton which suggests an emergency procedure for dealing with genocide.

The items follow:

HOLOCAUST IN CAMBODIA

The word "holocaust" has come into vogue here in America. The word has the dictionary definition of "great and wholesale destruction." The word "holocaust" is the title of an immensely-popular television documentary film series highlighting the systematic and terrible execution of six million Jews by the Nazis during the World War II era.

Today, I would like to call your attention to another holocaust which has been taking place, virtually unnoticed, during the past three years.

In a recent speech in Phnom Penh commemorating the third anniversary of the communist takeover in Cambodia, one of Cambodia's new rulers, Khieu Samphan, told his audience that "there has been progress" in agriculture, public health and education. In contrast with these, his signposts of progress, I would like you to picture a land:

Where there are not cities; where all the urban dwellers have been driven like animals into the countryside where they live and toil in guarded village concentration camps;

Where more than one million persons have been systematically slaughtered for the crime of having a relationship, however remote, with the old regime; another million appear to have perished from disease and starvation;

Where organized religion, Christian, Buddhist, and Muslim, have been destroyed and relegated to the dustbin of history;

Where schools and universities and the entire educational structure have been torn down;

Where the economy has been reduced to the lowest level of subsistence agriculture and the currency abolished;

Where men, women and children toil like animals from dawn to nightfall, seven days a week without relief;

Where love, joy, beauty, and hope, those precious qualities of human existence, have been banished as undesirable;

Where death, for many, comes as a welcome release from odious, terrible toil and suffering;

Where the word "Angkar," meaning "the organization," strikes terror in the hearts of the bravest, for it gives the lowliest communist Khmer Rouge soldier the power of life and death over the capture citizenry.

And the recent Vietnamese invasion of Cambodia is the latest and final assault on the crumbling Khmer civilization.

This, I submit, Ladies and Gentlemen, is the meaning of the word "holocaust" in Cambodia. What we are looking at is the death of the ancient and proud Khmer civilization. This has gone too long unnoticed and ignored by the so-called "civilized world." It is time to put an end to these terrible crimes against humanity. I appeal to the conscience and sense of justice of the American people and the American Government to seek the means to bring pressure to bear on the Government of Democratic Kampuchea and to put an end to crimes that fly in the face of each and every clause of the United Nations' Universal Declaration on Human Rights.

As a first step towards accomplishing this end, I propose an international conference of all those nations concerned with justice and human rights to be convened at the earliest opportunity. At the same time, I would like to thank Congressman Solarz, Senator Dole and those other Congressmen and Senators, and men of good will whose hearts have been touched by the Cambodian tragedy. I am indebted to them for all their valiant efforts to assist me in bringing to the attention of the American people the terrible plight of the long-suffering people of Cambodia.

Ladies and Gentlemen, it is too late to bring back from the dead the hundreds of thousands of victims in Cambodia. It is not too late to remember the lessons from history we learned when the world chose to ignore the appeals for help from those millions of victims of "that other holocaust" in Hitler's Germany. Now I am ready for your questions.

[From the New York Times, April 19, 1978]

35 YEARS AFTER WARSAW, AND GENOCIDE IS THRIVING

*To the Editor:*

Thirty-five years ago, on April 19, 1943, German forces entered the Warsaw Ghetto. Jews from all over Poland had been shipped there for the "final solution," crowded more than 13 per room. It was to be another "routine" roundup of a new quota of Jews to be processed in gas chambers into recovered gold fillings, soap and ashes. Only this time there was stiff resistance. German troops had to withdraw with heavy losses. The Ghetto Uprising had begun. The battle continued until June 19, when the remaining 50 ghetto fighters were able to escape into nearby forests. There had been 400,000 Jews in Warsaw before the Nazis conquered Poland—a third of the city's population.

April 19 is an ordinary day at the United Nations. Next to nothing is being done about the ongoing massive genocide in Cambodia. A combined humanitarian effort by the Soviet Union and China could probably end it. Post-World War II genocidal campaigns in Brazil, Burundi, Iraq, Indonesia and elsewhere were played down or ignored in barely embarrassed official silence. Idi Amin, Uganda's reincarnation of Adolph Hitler, was actually elected head of the Organization of African Unity. Fellow heads of state, with some note-worthy exceptions, kept a "polite" silence about Amin's personal involvement in the execution of 150,000 to 300,000 of his countrymen. An SS-type police continues to spill black blood with unrestrained sadism.

Around 50,000 Christians and Moslems butchered each other in Lebanon's civil war, while the Arab League and the United Na-

tions were passive or quietly rooted for the excesses of one or the other side. Nearly 750,000 blacks, Christians and animists were put to death in the southern Sudan before an internal settlement was negotiated by its present Government. While Pakistani troops systematically killed many of the Bengali educated elite, the world powers competed with each other in supporting either side in the war, which ultimately led to the emergence of Bangladesh.

The human rights issue has become a victim of the cold war. The genocide convention notwithstanding third-world and Eastern bloc nations claim that for "political reasons" it is morally defensible to ignore torture, terrorism and mass murder, unless it occurs in a country not aligned with them. When genocide is begun, nothing will help other than an airlift, a threat of intervention plus large numbers of neutral observers, empowered to report and capable of protecting themselves. There is no time for days of consultation and months of sterile so-called "diplomatic" negotiations. Authority is needed to organize an emergency procedure, much like what can be mobilized to relieve victims of some other catastrophe.

As a young man, Secretary General Waldheim had to watch helplessly as his Jewish acquaintances in Austria were sent to their death. He was passive then. He need not be passive now. He has a leadership position from which he could lobby for an active policy of deterrence.

During World War II, neither the West nor the Soviet Union came to the aid of the beleaguered Warsaw Ghetto. Let us be more timely the next time when mass murder is planned and executed.

JOSEPH W. EATON.

Pittsburgh, April 4, 1978.

NOTE: The writer is a professor at the University of Pittsburgh's Graduate School of Public and International Affairs.)●

## ALCOHOL: THE FUEL OF THE FUTURE

### HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for April 19, 1978, into the RECORD:

ALCOHOL: THE FUEL OF THE FUTURE

As the supply of oil and natural gas dwindles and the price of these fuels continues to rise, people in ever greater numbers are looking to alternative sources of energy to meet our growing needs. One alternative source—alcohol—is attracting considerable attention, and there is a special interest in an alcohol fuel known as "gasohol", a mixture of alcohol and gasoline. A good many energy experts, farmers and environmentalists think that alcohol is the fuel of the future.

Unlike some of the more exotic alternative sources, alcohol has been tried successfully many times. Some of Henry Ford's first "horseless carriages" ran on it, and some of our parents and grandparents remember Agrol, an alcohol-gasoline mixture that was marketed in the Midwest in the 1930s. One of the most extensive uses of alcohol fuel took place in the final stages of World War II when the German Army relied an gasohol to keep its vehicles moving. People are surprised to learn that alcohol fuel is being used on a large scale today, but Brazil has launched a major drive to promote it. This year, a budget of $500 million will raise the alcohol content of Brazilian gasoline to 20%, reducing that country's oil imports by 10% and saving Brazil about $400 million on its oil import bill.

Alcohol is not the cure for all our energy ills, but it could help. Because alcohol can be made from renewable raw materials such as farm produce, wood and waste, we would not have to worry about depletion of this energy source. We could make alcohol virtually on demand. Furthermore, the alcohol would be produced here in the United States. Domestic control would allow us to be less dependent on unreliable foreign sources of energy. Finally, we could save billions on oil imports. In the process, our trade account could be balanced, the dollar strengthened and American jobs preserved.

Besides its beneficial effects in the area of energy, the use of alcohol as a fuel would go to the heart of another serious national problem: the depressed state of American agriculture. Experts have noted that producers of alcohol fuel have the potential to be the largest new market for our farmers. The existence of this new market could eliminate surpluses in the future even if more land were brought under cultivation. Farmers would always have someplace to go with their produce and they would enjoy an unprecedented stability in prices. They could even sell agricultural refuse such as corn stalks, distressed grains and other spoiled or damaged crops to make alcohol. Yet another benefit to our farmers would be the increased availability of distiller's grain, a protein-rich by-product of the conversion of grain to alcohol. With additional quantities on the market, it might cost farmers less to feed their animals.

The use of alcohol fuel would be very helpful to us in energy and agriculture, but its benefits are not confined to these areas alone. Environmentalists are excited about alcohol fuel, as well they might be. Since alcohol can be generated from the millions of tons of waste that are now being used in landfills or are being dumped into rivers and coastal waters, we have a ready solution to the many problems of waste disposal. There are important consequences for air quality, too. Although knowledgeable sources are divided on just how cleanburning alcohol fuel is, they generally agree that its increased use would lower concentrations of one dangerous pollutant—carbon monoxide—in a significant way.

We should not overlook the stake rural America has in this alternative source of energy. Alcohol fuel would spawn industry principally in the farm and forest states, close to supplies of raw materials. And since the production of alcohol is very much a "backyard technology," any small town, company or cooperative could profit by generating alcohol from locally available farm produce or wood. In the final analysis, economic development would be spurred all across rural America.

The main problem with alcohol fuel is its cost. Under present conditions it costs more to produce a gallon of alcohol than a gallon of gasoline, so any alcohol-gasoline mixture is bound to be more expensive than pure gasoline at the service station. However, many members of the Congress—myself included—have introduced legislation to overcome the cost problem. The Congress is now considering changes in the tax laws to make alcohol more competitive with gasoline, and with oil prices rising alcohol is looking better every day. Mass production of alcohol could also help to make it cheaper in the future. But regardless of the present cost of alcohol, we should not forget that American taxpayers and consumers pay out immense sums of money every year to import oil, help the farmer and get rid of waste. Any additional use of alcohol fuel would reduce these taxpayer and consumer payments to more reasonable levels.●

## PHILADELPHIA ONE OF FIRST CITIES WITH INNOVATIVE ENVIRONMENT IDEA

### HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. EILBERG. Mr. Speaker, I am proud to advise my colleagues that the city of Philadelphia will be one of the first cities in the United States to respond to a new Federal law rewarding local communities for innovative ideas.

According to City Managing Director Hillel S. Levinson, Philadelphia ultimately might receive millions of additional dollars in Federal grants as a result of a new technique being tested by the water department.

The technique is sewage treatment being tested at the city's northeast water pollution control plant.

It was conceived by Water Commissioner Carmen F. Guarino.

The water department has been operating 22 large polyethylene cylinders, called "Surfact" units, in two aeration bays at the northeast plant. These cylinders, 25 feet in length and 12 feet in diameter, rotate through the sewage flow and are powered by air supplied to the tanks.

As the cylinders rotate, they pick up a film on which aerobic bacteria grow. The bacteria then oxidize the sewage, converting it into other hamless elements.

Although variations of such cylinders are used by some other communities, Philadelphia is the first city to adapt them to aeration tanks and to power them by air already supplied to the tanks rather than by additional direct electrical power.

Noting that this technique saves huge amounts of electricity with minimal capital investment, Levison said that Guarino's idea will:

Make it possible to upgrade old sewage plants rapidly at moderate cost;

Save Philadelphia $17 million (28 percent of the projected $160 million capital cost for expanding the Northeast sewage plant to secondary treatment levels;

Reduce amortization costs for a new Northeast plant by $1.6 million a year;

Save $850,000 yearly in power costs for a new and upgraded Northeast Plant, as compared with any close alternative method for improving sewage treatment;

Significantly reduce the level of maintenance required as compared to other conventional treatment methods;

Create other design savings in the construction of a new Northeast Plant;

Produce comparable savings on power, capital investment, and amortization at the Southeast sewage plant, if the technique is eventually applied there;

Potentially increase Federal funding for the construction of new sewage plants in Philadelphia from 75 to 85 percent of total cost as reward, under the law, for an innovative idea.

Besides increasing Federal grants, Levinson said that the new technique will increase pollution removals from

sewage (as measured by biochemical oxygen demand) from the present 65 percent to better than 90 percent at the Northeast plant. This will result in the discharge of a cleaner effluent to the Delaware River.

The technique also has the advantage of producing less sludge than conventional treatment systems.

The managing director said Guarino made use of available equipment in developing his idea for the new technique.

Although Guarino has an agreement on the commercial market relating to a patent for the idea, the agreement—at Guarino's request—exempts the city of Philadelphia from payment of any royalties for use of the process "now or in the future." This could save the city at least $190,000, at the Northeast plant alone, Levinson added.

Levinson said that the idea has wakened interest in Japan and has potential for other countries. He added:

For America, there will be important spinoff benefits. At a time when the cost of energy is rising and there is a threat of an energy scarcity, the new process will help American communities save large amounts of energy, while solving some of their water pollution control problems more quickly. Commissioner Guarino and the Water Department should be congratulated for this significant contribution.●

## OPEN DATING: A FORMULA FOR FRESHNESS

### HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ROSENTHAL. Mr. Speaker, the Consumer Research Institute and the USDA's Economic Research Service conducted a study in 1971 to determine consumer attitudes toward the freshness of the food they buy and whether the open (noncoded) dating of food products would have any effect on buying practices and retail store operations.

The findings were significant. The open dating system—as opposed to coding which cannot be easily understood by the average consumer, or many retailers, for that matter—reduced by 50 percent the number of consumer complaints about buying spoiled or stale food. Store losses also were generally reduced after the introduction of open dating. The conclusion reached was that dating foods in easily understandable terms instead of indecipherable codes may well be advantageous to both consumer and retailer.

That was 7 years ago, Mr. Speaker, and still open dating has not been universally adopted. Consumer complaints of premature food spoilage continue, and the vast majority of products on supermarket shelves today still bear untranslatable date codes.

The New York State Consumer Protection Board today is filing a petition with the Food and Drug Administration requesting the Agency to replace its current regulation regarding the "code" dating of canned and packaged foods with a new rule requiring the same packaging information to be expressed in commonly used and easily understandable abbreviations.

I am writing to the FDA today to express my support for the petition and to urge its swift approval. The spirit of this proposal is consistent with provisions of H.R. 42, the Consumer Food Labeling Act, which I introduced and is cosponsored by 46 of our colleagues. Both seek to insure that the consumer will know exactly what he is getting in the products he buys. Both offer intelligent, workable solutions to a serious problem. States the petition:

Consumers purchasing food or food products have found it difficult, if not impossible, to find out the freshness of foods being sold.

One of the most important criteria in purchasing one product over another is its freshness. But the coding system has constantly kept the consumer in the dark as to the age of the food he wants to buy, and this can be harmful to his health.

Despite the popular myth that canned foods are good indefinitely, studies by the Department of the Army, among others, have shown that some packaged and canned foods have comparatively short shelf lives. Some products, such as canned meats, may have a limited shelf life of only a few months. Poor handling, storage, and environmental changes also contribute to the decline of the value of food products. The aesthetic and nutritional quality of these foods will inevitably deteriorate with time. Many retailers are themselves not aware or not familiar with the coding system and, therefore, cannot rotate shelved products according to their freshness. And even in cases where a noncoded system is used, consumers often have a hard time trying to determine which date means what because of inconsistent dating practices. We need not only mandatory open dating, but also a uniform, consistent dating procedure that consumers can easily understand and use. Open dating is not only good health and good sense, but also is good business.

The buyer, for health reasons, has a right to know the freshness of the food he is purchasing. Declares the petition:

Without a comprehensible "pack date" the consumer is forced to play a guessing game with his money and his health.

(The "pack date" is the date on which the product was actually packed. An alternative form would be the "pull date" which is the last date a product should be sold at the retail level, but without enough "freshness" to be good for a reasonable additional time in the home.) It is important that in addition to pack dates, the manufacturer should include instructions on the label for proper home care and storage, so that the consumer will not see food spoil on the home shelf.

Mr. Speaker, the American consumer wants and needs a uniform open dating system. One clear illustration of this is the tremendous number of requests for the Consumer Board's booklet, "Blind Dates: How to Break the Codes on the Food You Buy." Several manufacturers and retailers have voluntarily instituted their own open dating system and have found it helpful both for the consumer and for themselves. They are to be commended. The vast majority of manufacturers and packers have the necessary equipment to make the changeover to open dating, so the inconvenicnce and cost to them would be negligible.

But it is the health of the consuming public—not the convenience of the manufacturer—which must be the primary concern of the FDA. I believe that the proposal outlined in this petition will go a long way to promote the interests and well-being of the American consumer, and I urge its prompt and favorable consideration. I am inserting at this point the petition and my letter of support to the FDA, so that my colleagues may also benefit from the information:

WASHINGTON, D.C., *April 19, 1978.*

HEARING CLERK,

*Food and Drug Administration, Department of Health, Education, and Welfare, Rockville, Md.*

DEAR SIR: I am writing in support of the citizen petition filed by the New York State Consumer Protection Board on April 19, 1978, which requests the FDA to replace its current regulation regarding the "code" dating of canned and packaged foods with a new regulation—which would require the same packing information to be expressed in commonly used and easily understandable abbreviations.

As one who for many years has supported and worked for a uniform system of food labeling which provides thorough, accurate and understandable information for consumers, I am in complete agreement with the interest of this petition. It seeks to redress a legitimate complaint of America's consumers that the present packing "codes" cannot be easily understood and, therefore, do not aid the buyer in determining the freshness of many canned or packaged foods.

Consumers have become increasingly concerned—and rightfully so—about the waste of valuable dollars on bad food due to the inability to determine the freshness of products on the supermarket shelf. Studies have shown that the nutritional and aesthetic value of many canned foods deteriorates with time. The average consumer should not be forced to buy food of a poorer quality simply because of an inability to translate the manufacturer's or packer's dating codes.

The primary concern of the Food and Drug Administration must be the health and well-being of the consuming public, not the convenience of the packer. Therefore, I feel that the acceptance of this proposal would go far to insure that Americans receive the protection and information they need and deserve in the marketplace. I strongly urge favorable consideration of this petition.

Sincerely,

BENJAMIN S. ROSENTHAL,
*Member of Congress.*

CITIZEN PETITION

The undersigned, New York State Consumer Protection Board, submits this petition pursuant to § 1455(a) of the Fair Packaging and Labeling Act (15 USCA § 1455(a)) to request the Commissioner of Food and Drugs to amend the following regulation, in accordance with 21 CFR §§ 10.20—10.30.

A. Action Requested—

1. The present regulation (21 CFR § 113.60 (c)) and the proposed regulation are as follows:

(a) *Present Regulation*: Coding. Each hermetically sealed container of low-acid processed food shall be marked with an identifying code which shall be permanently visible to the naked eye. Where the container does not permit the code to be embossed or inked, the label may be legibly perforated or otherwise marked, provided that the label is securely affixed to the product container. The required identification shall identify in code the establishment

where packed, the product contained therein, the year packed, the day packed and the period during which packed. The packing period code shall be changed with sufficient frequency to enable ready identification of lots during their sale and distribution. Codes may be changed on the basis of one of the following: Intervals of every four to five hours, personnel shift changes, or batches, provided the containers comprising such batch do not extend over a period of more than one personnel shift.

(b) *Proposed change:* [Coding] *Labeling.* Each hermetically sealed container of low-acid processed food shall be marked with an identifying [code] *notation* which shall be permanently visible to the naked eye. Where the container does not permit [the code] *the notation* to be embossed or inked, the label may be legibly perforated or otherwisen marked, provided that the label is securely affixed to the product container. The required identification shall identify [in code] the establishment where packed, the product contained therein, the year packed, *the month packed,* the day packed and the period during which packed. *The packing dates shall be expressed in commonly used and easily understood abbreviations for the month of the year, the day of the year and the year and shall be prefaced by the words* "Packed On." The packing period [code] *notation* shall be changed with sufficient frequency to enable ready identification of lots during their sale and distribution. [Codes] Notations may be changed on the basis of one of the following: intervals of every four to five hours, personnel shift changes or batches, provided the containers comprising such batch do not extend over a period of more than one personnel shift.

(Explanation: Matter in italic is new; matter in brackets is old language to be omitted.)

B. Statement of Grounds—

Rosemary S. Pooler, the Exexcutive Director of the New York State Consumer Protection Board, requests that the regulation for labeling hermetically containers of thermally processed low-acid foods with the date of packing in code be modified to require that the pack date be in a form easily comprehensible to the average consumer of these foods. The New York State Consumer Protection Board is the New York State agency responsible for representing the interests of consumers before federal administrative and regulatory agencies (NY Exec. L., § 553).

1. CONSUMERS OF GOODS WANT AND NEED TO KNOW THE FRESHNESS OF THEIR FOOD

The consumer of food products has a right to know the age and consequently the freshness of the food he or she purchases or stores. The federal and state governments and the food manufacturing industry, have recognized the obligation to provide consumers with nutritional information, e.g., ingredient labeling. (21 CFR 101.9). More than 21 states and local jurisdictions have enacted some form of open dating for perishable foods. Furthermore, over 60 major food chains and co-ops have also instituted open dating programs with some perishable foods, e.g., milk, bread, ice cream, eggs, and fresh and processed meats. However, there is a need for purchasers to know the freshness of many other foods.

Consumers are becoming increasingly and justifiably concerned about the unnecessary waste of their food-buying dollars on bad food. Consumers purchasing food or food products have found it difficult, if not impossible, to find out the freshness of foods being sold. A January 1973 study conducted by the U.S. Department of Agriculture revealed that over 20 percent of the shoppers interviewed in a 12-month period reported purchasing stale food. ("Food Dating: Shoppers' Reactions and the Impact on Retail Food Stores", USDA Economic Research Service). In a follow-up study by the USDA of 13,000 shoppers in chain stores which tested an open dating program using pack and pull dates, the incidence of complaints regarding spoiled or stale food was reduced by half. It was stated in the report that "[s]hoppers benefited two ways from the experiment: They had date information available for their own use, and they were more confident of getting high quality food as a result of the improved handling practices by the store." ("What is Open Dating?", USDA Economic Research Service, February 1974.)

One of the major problems with the present open dating done on a limited basis has been the variety of dates used with different meanings. The variation in the meaning of dates used, from packing dates to expiration dates, has caused a great deal of confusion among shoppers.[1] This was demonstrated in a nationwide sample of 250,000 shoppers in 1971, which revealed that 89% of those sampled favored an easy to understand system.[2]

Further evidence of the consumer demand for a comprehensible dating system has been demonstrated by the overwhelming number of requests for the Petitioner New York State Consumer Protection Board's booklet, *Blind Dates: How to Break the Codes on the Foods You Buy.* This booklet, released in August, 1977, decodes the dating systems of thirty-seven major food companies. The New York State Consumer Protection Board has received more than 130,000 requests for *Blind Dates* from throughout the nation.

The pack date is a vital part of any freshness dating system. Carole Bisogni, Assistant Professor in the Division of Nutritional Sciences of Cornell University, stated that "[p]acking dates . . . are more suitable for foods not classified as perishables or semi-perishables, such as canned goods, where the quality deterioration is relatively slow and there is little health hazard in prolonged storage if the product has been processed adequately and not damaged. . . . (A) packing date . . . would help the consumer rotate these products in the home without imposing a rigid time frame."[3]

The importance of knowing the pack date is increased when it is realized that canned goods often lose a good part of their shelf life before reaching the dinner table.

There is evidence that many canned goods remain stored in warehouses and stockrooms for periods of a year or more before they are put on the retailers' shelves.[4] Many people buy in bulk, especially now with the advent of warehouse food stores where items are sold by the case. These items are then stored in the consumer's home for prolonged periods of time. Finally, many retailers, especially smaller ones, do not rotate their stock on a regular basis; in fact, many could not do so for they themselves often do not understand the code.

The effect of understandable pack dating would be to give consumers information about a product's freshness by giving them knowledge of the food's age. With time, consumers' knowledge of the expected shelf life would increase based on education and first-hand experience and consumers would be able to make more informed purchasing decisions.

A federal regulation which mandates the use of a pack date in clear, understandable language would serve as a basis for a uniform dating system throughout the United States upon which consumers could readily rely.

2. FOOD LOSES NUTRITIONAL VALUE AND QUALITY WITH TIME

The "pack date" informs purchasers of the age of the food being purchased or stored, a vital piece of information in assessing the nutritional value of food.

The Department of the Army has conducted in-depth studies to calculate the storage life of semi-perishable, perishable, and frozen foods.[5] These and other tests have shown that food quality does alter and deteriorate with time.[6] Not only are there changes in the flavor, color or texture that can be detected by the naked eye, but changes also occur that cannot be readily detected. Over periods of time, nutrient values decline, especially vitamins and protein.[7] Vitamin C and thiamin (Vitamin B) show the greatest decrease because they can most easily leach out of the product into the surrounding liquid, which is usually thrown away.[8]

A report by the Institute of Food Technologists' Expert Panel on Food Safety and Nutrition and the Committee on Public Information (August 1974, Food Technology) stated that "major areas involved in a food's shelf life include:

Loss of nutrient value, such as vitamin loss and protein break down.

Spoilage by micro-organisms, enzymatic action or insect infestation.

Loss of aesthetic qualities, such as color, flavor, aroma, texture or general appearance.

Loss of functional properties, such as leavening activity in baking powder, thickening power in sauce mixes, or the set in instant puddings."[9]

The report commented further that an "inadequate shelf life will lead to consumer dissatisfaction or complaints. At best, such dissatisfaction will eventually affect the acceptance and sales of brand name products. At worst, it can lead to malnutrition and illness."

Without a comprehensible "pack date," the consumer is forced to play a guessing game with his money and his health.

Poor handling and storage are also important factors in the quality of a food product. Environmental changes, such as variations in temperature, can drastically affect the nutritional quality by accelerating nutrient loss. Also, the handling to which the containers are often subjected can result in dents and breaks which affect the contents. The longer the container is on the shelf, the longer it will be exposed to these hazards and to the chances of damage to the contents with subsequent deterioration.

Cans have a limited shelf life. Manufacturers recognize this and customize their cans to conform to an estimate of the shelf

life of the contents, usually adding an extra year for good measure.[10]

The original "tin can" no longer exists. Most cans are now steel or iron-tin alloys with a tin coating. This coating corrodes to the point where eventually the steel is completely exposed and is then rapidly attacked by the can contents.[11] This often leads to swelling, leaking, and sometimes bursting of cans. Unfortunately, this corrosion is usually discovered after the consumer has purchased the item, not before.

Furthermore, some responsible food manufacturers recognize the importance of knowing the age of food and the limited shelf life of food by voluntarily marking foods with removal dates. Unfortunately, these dates are sometimes in a form not readily understandable to the average consumer and are used mainly as guides by retail merchants and sales representatives.

3. REQUIRING CODED PACK DATES TO BE PRINTED IN PLAIN LANGUAGE IS NOT BURDENSOME NOR EXPENSIVE TO PACKERS

Food processors have already conceded the feasibility of disclosing pack dates by their conduct. All food processors who would be affected by this petition already disclose a pack date on their food products in coded form pursuant to FDA regulation (21 CFR § 113.60(c)). A few food processors have also instituted open dating on a voluntary basis.[13]

Furthermore, in most cases, decoding of pack dates would be simple because the imprinting equipment already in use can be converted by rearranging the stamping or embossing digits.[14]

However, many processors argue that the change over would be prohibitively expensive. This has not been shown to be the case in instances of voluntary open dating.

It is also alleged that more food will be wasted by consumers choosing goods stamped with later dates in preference to those with earlier ones. This also has been shown to be a minor problem. Surveys of retailers who use some form of open dating have shown that little food is wasted because rotation is done more efficiently with quick turnover. As the consumer specialist for Giant Foods stated, "We haven't found much incidence of food wastage. Only the most savvy consumers will reach to the back of the shelf . . ."[15]

In a study conducted by the U.S. Department of Agriculture, it was found that "the closer attention to handling encouraged by open dates helped keep losses under better control and more than compensated for changeover costs." Consumers' selective purchasing was not shown to add to store costs.[16]

CONCLUSION

There is a strong interest and need for an understandable dating system on food, including goods packaged in cans and glass jars. The regulations of the Food and Drug Administration already provide for positive identification of food products by the use of a pack date, as well as other identification. The simple modification of the FDA regulation (21 CFR § 113.60(c)) to require the coded pack date to be put in plain language and to be identified as the pack date will provide purchasers of food vital information necessary to purchase nutritious and fresh food.

C. Environmental Impact—

An environmental impact analysis report is attached.

The undersigned certifies that, to the best of her knowledge and belief, this petition includes all data, information, and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition.

Very truly yours,

ROSEMARY S. POOLER,
*Executive Director, New York State Consumer Protection Board.*

---

ENVIRONMENTAL IMPACT ANALYSIS REPORT, ALBANY, N.Y.

Date: March 31, 1978.

Name of Applicant: New York State Consumer Protection Board.

Address: 99 Washington Avenue, Albany, N.Y. 12210.

1. Description of proposed action: To amend the regulation pertaining to coding of food products for human use to provide for the use of simple language dating.

2. Probable impact: We do not believe there will be any impact of an environmental nature as amending the regulation to require plain language would require simply modifying machinery already in use and equipped to handle the proposed changes.

3. Probable unavoidable adverse environmental impacts: None.

4. Alternatives: The only alternative would be to leave the labeling in coded form which has proven unsatisfactory.

5. Relationship between local short-term uses of the environment with respect to the proposed action and the maintenance and enhancement of long-term productivity: Not applicable.

6. Any irreversible and irretrievable commitment of resources involved in the proposed action if implemented: None.

7. Objectives (sic) raised by other agencies, organizations, or individuals which are known to the applicant: None.

8. If proposed action should be taken prior to 90 days from the circulation of a draft environmental impact statement or 30 days from the filing of a final environmental impact statement, explain why: Not applicable.

9. Analyze whether the benefit to the public of the proposed action will outweigh the action's potential risks to the environment: there are no known potential risks to the environment.

## LET US NEVER FORGET

---

### HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. DELANEY. Mr. Speaker, I think it quite fitting that we take a moment today to remember the horror of the holocaust of European Jewry during the Nazi era, and particularly to salute the courage and spirit of the defenders of the Warsaw ghetto whose uprising began on this day 35 years ago.

After the conquest of Poland and the establishment of control over the rest of continental Europe, the Nazis systematically and cold-bloodedly began to implement their plan for a "New Order" in Europe, an essential facet of which was what came to be the final solution to the Jewish question. A first step toward this solution was the segregation of the Jews in hermetically sealed ghettos in many of the major cities of Europe. The Warsaw ghetto was one such place; crammed with more than half a million Jews by the beginning of 1943:

The Jews, especially in the big Ghettos, suffered from overcrowding, hunger and disease. The Jews were given starvation rations . . . Because of the overcrowding and the shortage of food and fuel for heating, there were outbreaks of infectious diseases in the larger concentrations; the Warsaw Ghetto in particular became a focus of typhus. For a time there was a feeling among the Jews that the Nazis were set on wiping out the Jews by means of starvation and intolerable living conditions."

Incredibly, even that tragic prediction turned out to be too civilized an opinion regarding Nazi methods. They soon began to ship out quotas of Jews to extermination camps outside the city under the pretext of transferring them to labor camps. The ultimate horror of what the Nazis had in store for them slowly became clear to the Jews trapped in the Warsaw ghetto, and the decision to fight was made.

When the Nazi SS Troopers ringed the ghetto early in the morning on April 19, 1943, and prepared to seize more Jews to fill the death quota, the Jewish Combat Organization commanded by Mordechai Anielewicz was waiting. The Nazis arrogantly marched into the ghetto only to be met by fierce organized resistance. By the time they retreated hours later, the Germans had left behind hundreds of killed and wounded.

During the next several weeks German planes and tanks repeatedly attacked the underground bunkers where the resistance was holed up. Ultimately, it required the complete devastation of 800 acres of the ghetto to end the resistance. Perhaps more important, the Warsaw ghetto uprising proved to be the signal which inspired similar revolts in other Jewish concentrations in the ghettos and the camps, such as those in Vilna and Bialystok later that same year.

The spirit, courage, and tenacity of the Jewish fighters in the Warsaw ghetto which we are commemorating today will always remain an inspiration to people everywhere who believe in freedom and democracy. Let us never forget those brave souls, or the responsibility each of us has to defend the rights which have cost so much because, as one writer put it—

It is in the nature of things that a combat like this, destined to express human solidarity and to make manifest supreme values, would find only a few capable of waging it.●

## NEW YORK STATE LEGISLATURE SUPPORT OF "MEALS ON WHEELS"

### HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. WOLFF. Mr. Speaker, I would like to bring to the attention of my colleagues a resolution recently adopted by the New York State Legislature concerning H.R. 6337, the Home-Delivered Meals for the Elderly Act. Commonly known as "meals on wheels," this bill would provide for the total preparation and delivery of one hot, balanced meal for the elderly 5 days a week. Presently, the resources for the program are so severely restricted that the aged are only assisted in shopping and food preparation. This legislation is clearly needed to insure that the needs of the homebound are fully met.

The New York State Legislature has taken an interest in this bill because they have recognized the inherent nationwide need for the program. I am sure that there are many homebound elderly that are excluded from the program, despite their demonstrated need for the services. I sincerely hope that my colleagues will act quickly and favorably on this much needed legislation:

LEGISLATIVE RESOLUTION SENATE NO. 168

Legislative resolution urging the Committee on Labor and Education of the House of Resolved, That this Legislative Body report H.R. 6337 to the full House and memorializing the Congress of the United States to pass this legislation

Whereas, The plight of the elderly has been recognized and alleviated by several packages of legislation whose source was this legislative Body; and

Whereas, Under existing Federal law, Title 6 of the Older Americans Act, the resources available to supply the homebound elderly are severely limited so that present care is constrained to assistance to the homebound elderly in shopping and food preparation only; and

Whereas, The existing Federal program in the Bronx, New York (Project RAIN) is attempting to serve the needs of more than fifty homebound elderly above that Project's federally-funded allowance; and

Whereas, H.R. 6337, The Federal, often referred to "meals-on-wheels", legislation would afford the homebound elderly previously prepared, nutritionally balanced, full meals delivered directly to their homes instead of mere assistance in food preparation; and

Whereas, The House Subcommittee on Labor and Education has already recognized this great need of the homebound elderly by sending H.R. 6337 to the full House Committee on Labor and Education, when it now reposes; now, therefore, be it

Resolved, That this Legislative Body respectfully urges the House Committee on Labor and Education to favorably report H.R. 6337 to the floor of the House of Representatives and memorializes the Congress of the United States to pass this legislation; and be it further

Resolved, That copies of this resolution, suitably engrossed, be transmitted to the House Committee on Labor and Education, to the Speaker of the House of Representatives of the United States, to the President Pro Tempore of the Senate of the United States and to each Member of the Congress of the United States from the State of New York.●

## EMERGENCY AGRICULTURE ACT

### HON. DAVE STOCKMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. STOCKMAN. Mr. Speaker, last week this House rejected the conference report on the Emergency Agricultural Act by a substantial margin. While I joined the majority of my colleagues in defeating what I viewed to be an ineffective means of dealing with the current farm crisis, I wish to remind by colleagues that the current troubles on the farm will not simply go away if the House fails to act further.

For this reason, Mr. Speaker, I would like to share with my colleagues the results of my own research into agricultural problems. It is my belief that by demonstrating why the Dole bill would not solve the problem of low farm prices, I will be able to illustrate the sort of policies which are needed to provide for stable and continued growth of our agricultural economy. For this reason, I would first like to review with my colleagues the basic conclusions I reached about the so-called flexible parity set-aside program:

* * * * *

*(1) The Dole bill was wrong in principle*

Its supporters claimed that the Dole bill was a "voluntary" solution to the problem of low farm prices. Close inspection shows that it was really an effort to fix prices, rig market supply and demand, and deprive the individual producer of the right to compete in an open market. Admittedly, many natural defects—and significant government interference—make existing farm markets less than perfect. But from the beginning I have worked to remove existing market distortions, not to create new ones. Moreover I have spent the past year fighting for less government interference in many other areas—energy, surface transportation, the auto industry, and other areas in which federal government involvement has placed intolerable burdens on our economy. On principle alone I could not support an effort to replace the market system in farm commodities with politically inspired government controls on supplies, prices, and profits.

*(2) The Dole bill was based on an obsolete concept: Strict parity prices*

I believe very strongly that farmers have a right to expect fair rates of return on their investments—particularly the long hours of labor that go into producing every crop. Many of my colleagues here in the Congress do not realize that today's farmer must be a skilled business manager with training and experience in marketing, finance, and scientific production methods, and therefore has a right to expect a return on his labor commensurate with these skills.

But the concept of a fair rate of return cannot simply be translated into one nationwide price for each commodity. Because of the tremendous variations in the cost of planting an acre that exist even within the same geographic region, one man's break-even price can send another into bankruptcy. There are, for example, great differences in the age and cost of equipment; in the purchase price of land; and in the taxes and mortgage interest rates for that land. Differences in conditions and farm management practices can lead to great differences in the mix of seed, fertilizer, herbicide, and pesticides used for a crop.

Another major cost factor that varies enormously from farm to farm is irrigation. Factors such as the cost of water and equipment, the intensity of application, and the effectiveness in raising yields all make a tremendous difference in the cost of production.

Even after taking into account the great differences in cost of production that arise because of factors within the control of the producer, factors such as weather during the growing season and insect and weed conditions can also lead to large variations in yield that change the price necessary to achieve a fair rate of return.

Finally, yield and cost of production per acre will not provide a true measure of the farmer's return. Transportation distance to markets and the time at which the crop is sold can lead to still more variation in the producer's final return.

The official parity base in law—the ratio of costs to farm prices in the 1914 marketing year—completely ignores all of these factors in establishing a national average return on investment. Over time, as vast improvements in yields have been realized due to improved technology and tremendous advances in agricultural chemicals, the legal parity base has become more and more unrealistic. The world of 1914 is very different from that of 1978.

For example, in 1914 the national average yield for corn was just 23 bushels per acre. Today, some producers in irrigated areas of Branch and St. Joseph counties achieve yields of up to 190 bushels per acre. In 1914, 167 bushels of corn were produced per agricultural worker. Today, that ratio has risen to over 1,400 bushels per worker. Considering the differences between tools available in 1914—horse-drawn single-bottom plows and hand picking—and today's irrigators, row harvestors, hybrid seed and herbicides, it is impossible to compare cost factors in 1914 with 1978.

Despite the continuing shift in production methods, the techniques used to measure the 1914 parity ratio in current prices have been updated only three times. Even since the last revision, which was over ten years ago, production methods have changed considerably. A further fundamental problem with the 1914 parity ratio is that at best it is a national average. Because it fails to account for individual and regional variations, efforts to establish prices at any percentage of parity cannot guarantee any particular rate of return for the majority of American farmers. In all, while the idea of a single parity price for all producers may sound attractive, it is not useful as a mechanism for determining what constitutes a fair return on investment and labor for our agricultural producers. Adopting a government-imposed farm control and management program based solely on this obsolete concept is bound to produce inequities in farm markets.

*(3) The Dole bill would not raise market prices*

The sole justification for the Dole bill was that it would raise market prices by reducing production. Yet the way in which the bill was written made significant supply reductions impossible. Because it was tied to the programs authorized in the 1977 Farm Bill, its leaky loophole-ridden acreage con-

trol provisions made it possible for some producers to actually increase their planted acreages of corn, wheat and cotton and still be guaranteed parity profits. Nationwide, this would have led to significant diversion of acreage into the very crops the bill sought to cut back, and produced serious market dislocations in the crops not covered by the bill, such as soybeans, from which acreage would have been diverted.

The table below shows the trend in acreage nationwide between soybeans, corn and cotton:

| Crop | 1957 | 1977 |
|---|---|---|
| Soybeans: | | |
| Acres | 23,349,000 | 50,327,000 |
| Percent | 19 | 34 |
| Corn: | | |
| Acres | 82,742,000 | 84,121,000 |
| Percent | 69 | 58 |
| Cotton: | | |
| Acres | 15,833,000 | 11,656,000 |
| Percent | 13 | 8 |
| Total: | | |
| Acres | 121,924,000 | 146,104,000 |
| Percent | 100 | 100 |

The major shift from corn and cotton to soybeans over the past twenty years as the result of *price* movements. As more uses for soybeans over the past twenty years is the for soybeans created sharp upward price movements. Before 1960, the season average price for soybeans never broke $2.00. Since 1971, the price has never fallen below $4.00, and in fact has peaked over $10.00 in some spot periods in recent years. It is only natural that producers devoted all suitable land to the production of beans. Even increases in corn acreage caused by that upward price movement of the 1973–74 period did not shift the percentage balance between these crops, because soybeans also rose in balance.

The problem with the Dole bill is that it only covered two of the commodities—corn and cotton—and would have drastically altered prevailing price relationships between covered and uncovered crops—a 30–40% increase in corn and cotton parity target prices and no change for soybeans. Given the overlap of cotton-soybean and corn-soybean acreage in many areas of the country, the result would have been a substantial shift of acreage out of soybeans into cotton and corn—with the ironic consequence of worsened supply/demand and price conditions for the commodity we were trying to help and an even stronger market for soybeans which did not need help.

*(4) The Dole bill could not possibly have been just a "one-year" bill*

Current levels of world and U.S. cotton and grain stocks are so high, and the cutbacks which the bill would have encouraged so small, that at the end of one year under the Dole bill farmers would have been faced with nearly the same supply/demand/price conditions that created the current distress. One year under high levels of support subsidies could not have solved these market imbalances. It could only have paved the way for a return to permanent USDA control of the American farm.

*(5) One subsidy does not justify another*

I can understand the dismay of many farmers who have for years supported through their taxes the many subsidy schemes the federal government has sponsored: loans to New York City, maritime subsidies, make-work government jobs, welfare, subsidized barge lines and railroads, and countless other give-aways. Yet granting a matching subsidy to the American farmer is no answer. I have dedicated my energies since coming to Congress to eliminating the contribution these subsidies make to the continuing federal deficit. I have worked hard to reduce the excessive burden of taxation. While I am painfully aware of the crisis condition of many of our farms, I could hardly support a bill which offered over $5 billion in government handouts without offering any relief from the underlying problem—low prices in the open market

*(6) The Dole bill would have led agricultural policy in the wrong direction*

When Earl Butz was Secretary of Agriculture, USDA policy shifted away from its sorry 40-year history of controlling, managing, and curtailing supply toward a policy based on expanding world-wide demand for American farm products. The goal was to match U.S. production to the growing sectors of world demand in food and feedstuffs. Since coming to Congress, I too have worked to further this goal by sponsoring legislation that would make improved foreign market information available to the American farmer, as well as legislation to reduce the remaining barriers to free agricultural trade. My aim has been to expand the American agricultural pie, not merely to slice up a stagnant or shrinking pie. In my view, it would be a drastic mistake to start back down the road toward subsidies and controls.

II. THE CAUSES OF THE CURRENT FARM CRISIS

When faced with a serious problem, Congress has a tendency to slap a band-aid on its symptoms, rather than probing the underlying causes and developing a systematic solution. The Dole bill, as drafted by the House-Senate Conference Committee, was no exception to this rule. In its efforts to artificially manipulate the market, it failed to respond to the three basic factors contributing to the low grain prices of the last few years: government pressures on the costs paid by producers, the rapidly-growing productivity of the American farmer, and the failure to adequately expand world markets.

*(1) Government-induced cost increases*

Government pressures on the cost of farm production go far beyond adding to inflation by deficit spending. The farmer has borne more than his share of the tremendous increase in government regulation.

Every year, new varieties of federal bureaucrats and inspectors descend upon the American farm. The Occupational Safety and Health Administration (OSHA) has been in the lead wave of the federal invasion.

Originally, OSHA was created by Congress to encourage improved health and safety for employees in the industrial workplace. Once established, however, it followed the pattern of all bureaucracies in relentlessly working to expand its jurisdiction. Even though the farmer is primarily a businessman and employer, the OSHA bureaucrats were soon devising new and costly ways to "protect" the farmer from himself.

In crowded industrial workyards or minesites, it may make sense to attach warning devices to heavy machinery in order to alert workers to the dangers involved when such equipment moves or backs up. Yet many farmers have been forced to attach costly warning devices to their farm equipment, even though it is used by the farmer himself in an open field.

In fields well away from farm buildings and structures, it may make sense for farmers who employ large numbers of migrant or temporary workers to provide sanitary facilities in the field. Yet a few years ago OSHA proposed a rule requiring that portable toilets be placed so that the workers are never farther than 600 feet from one of these facilities. When it was pointed out by angry farmers that this regulation would have required placement of at least fifteen such facilities on the average 400 acre farm regardless of how many worked there, OSHA scaled back its demands. Nevertheless, it is just this sort of mindless regulation which dramatically increases costs for farm producers without contributing one bushel to a farm's production.

In the past year, the Environmental Protection Agency (EPA) has been turned loose on the many chemicals that farmers need to make a living in today's markets. Because of the Toxic Substances Control Act, EPA will conduct an exhaustive study of farm chemicals, most of which have already been approved by another government agency. Such heavily tested and proven chemicals as Benomyl are now proposed for extensive retesting at the taxpayer's expense. Never mind that years of use of these chemicals have failed to indicate any problems.

Nor is EPA the only agency which comes down heavily on farm chemicals. The Food and Drug Administration (FDA) has launched a two-pronged attack on antibiotics in animal feeds and preservatives. Concerned that continued use of antibiotics in animal feeds may increase the resistance of meat consumers to antibiotics, the FDA announced last year that it was placing heavy restrictions on the use of penicillin and tetracyclines, despite the protests of both scientists and producers that the move was premature. Scientists are greatly divided on whether antibiotics in feeds have anything to do with increasing resistance to antibiotics in humans. Producers are concerned that heavy reductions in the use of antibiotics will open up a Pandora's Box of potential public health hazards. It is ironic that the FDA may find itself having to provide new regulatory "cures" for the hazards it may well be creating.

Similarly, the FDA has become concerned about the use of nitrites in meat curing, alleging, as in so many cases, that they pose a potential threat of cancer. Now, nitrogen-oxygen compounds have been used in the curing of meats for literally thousands of years. Nitrate is usually present in natural salt, the original meat-curing agent, and scientific evidence has demonstrated that it is the nitrate, rather than the salt compound itself, which did the curing. Nitrites, which are more commonly used today, are used precisely because they provided greater protection and fewer potential hazards than natural nitrate salt. To ban the use of these chemicals could create a severe threat of new outbreaks of botulism and other diseases which are carried in imperfectly-cured meats. The alternative—eliminating the sale of pork, ham and bacon—seems hardly superior, and would cause a disaster in both the livestock and the feedgrains sectors.

In all, the endless stream of excessive regulations flowing from the agencies of the federal government constitutes the single largest factor in the cost crunch faced by the American farmer today. At almost every turn, from minimum wage legislation to mandatory unemployment insurance coverage, truck mileage standards and cost penalties for energy conservation, the farmer is faced with rising costs imposed by federal bureaucrats. Yet efforts to relieve the farmer of this enormous cost pressure were conspicuously absent from both the Dole bill and the 1977 Farm Bill which preceded it.

*(2) The rising productivity of the American farmer*

Amazingly, in the face of all of these constraints, the productivity of the American

farm has risen faster than any other major American industry. In the manufacturing sector, significant improvements in tools and equipment and a better trained workforce have increased industrial output per man-hour by almost 45 percent in the last twenty years. In the same period, yields per acre for wheat have risen 50 percent, while yields for corn have risen nearly 80 percent! When viewed in these terms, the scientifically-managed American farm may be the most efficient productive enterprise on Earth.

*(3) Artificial constraints inhibit the growth of world markets*

The rapid growth of the world's population has led to an ever-increasing demand for food supplies. The American producer, as the world's most cost-efficient grower of food and feedstuffs, should be able to profitably tap this virtually unlimited market for agricultural products. But political actions designed to provide short-sighted protection for many of the world's least efficient producers have inhibited the growth of overseas markets for American farm products.

The policies of Japan are a classic example of harmful agricultural protectionism. Japan, as a heavily-populated island nation with limited land resources, is heavily dependent on imports to feed her people. Since World War II, the Japanese import market has been rapidly expanding to accommodate the demand of its affluent population for more and better food.

Sadly, actions of the United States government are in large part responsible for Japan's current high level of import barriers. Faced with a shortfall of oil-producing crops in 1973 and 1974, the federal government announced an export embargo on soybeans during the summer of 1974. Japan, as the leading buyer of U.S. soybeans in international markets, was badly scared by this embargo, even though it effectively lasted only six weeks and resulted in little disruption of soybean deliveries. To combat what they viewed to be a threat of increasing dependence on increasingly unreliable U.S. exports, they announced a massive program designed to make them self-sufficient in food by 1985.

They are finding, however, that this task is immensely costly, if not impossible. While they have an agricultural workforce of roughly the same size as ours (4 million), our producers have 35 times the arable land that Japanese producers do. In order to encourage high levels of production on these limited lands, they have had to resort to massive subsidies to domestic producers. By 1977, although their agricultural industry comprises only 4 percent of their national production, more than 10 percent of their national budget had been committed to pay out these subsidies.

This level of cost is not surprising when one look at the level at which they must support prices in order to encourage production. For the 1977 crop year, the Japanese established price supports for wheat at $12.50 per bushel, while their support price for soybeans is a whopping $17.50 per bushel. In order to protect these high prices in the marketplace, they have applied an ad valorem tariff to ensure that their domestic production will not be significantly undersold.

Since only 3 percent of all Japanese land is arable, it is not surprising that it costs them nearly $18 per bushel to grow soybeans up the side of a mountain. But this policy places a tremendous burden on the Japanese economy. By paying two to three times the price for domestically-produced foodstuffs that they would have to pay for food in world markets, they are robbing their people of the opportunity to pay significantly reduced prices for food—prices at which American producers could still make a healthy profit.

Nor are soybeans the only example of ways in which the Japanese shackle their entire economy in their attempt to achieve the impossible objective of food self-sufficiency. Japanese policy toward beef imports is a clear example of the massive market dislocations that result from attempting to support domestic production at prices above world market levels.

The traditional Japanese diet of fish and rice is significantly different than that of Western societies. The Japanese agricultural industry has, for centuries, centered on efficient production of these products. But increasing imports of other foods began a shift toward a more typically Western diet after World War II. In particular, Japanese consumers now demand far more meat products.

The Japanese government is determined to prevent this shift from occurring in order to protect its agricultural industry from declining domestic demand for its products. The result has been heavy import controls on meat, particularly beef.

A limited domestic beef industry in Japan produces Kobe beef from mountain-ranged cattle. This industry is small, however, and even with a recent shift toward feedlot methods has been unable to keep up with rising domestic demand for better-quality cuts. Because of their excessive protection of domestic producers of feed grains, the Japanese have placed themselves in the ironic position of pricing their own beef industry out of the market. In an attempt to prevent this from happening, they have slapped both quotas and heavy tariffs on beef imports.

Tariff and quota barriers are particularly stringent for chilled or frozen cuts of better quality beef—the market sector in which U.S. producers have the greatest competitive advantage and opportunity for expansion. In addition to annual quotas which limit imports of these cuts (from all nations) to 20,000 metric tons for 1978, a 25 percent ad valorem duty is placed on beef imports. To further insure that imported beef does not undersell domestic producers, an additional $1.43 per pound "surcharge" is levied on the best hindquarter cuts.

The predictable result is that beef in the market—when it can be had—sells to the consumer for a price of $7–11.00 per pound, with prime cuts of sirloins and filets reaching $15.00 per pound.

Similarly, Japanese policies on food grains are designed to protect their domestic rice production industry. Rice is the only major crop in which Japan is self-sufficient. But to protect this industry from competition with wheat and flour, the Japanese are forced to restrict wheat imports and control millers and flour users.

In the final analysis, the Japanese policy of self-sufficiency places an unbearable burden on their agricultural economy, as well as on their overall economic health. They pay two to three times more for food than would be necessary if they purchased food in world markets.

Experience has shown, however, that internal Japanese politics will prevent any significant opening of the market unless significant pressure is brought to bear from the outside. I believe that it is imperative that the United States take the lead in bringing Japanese trade barriers down. Only by making it clear that continued access to U.S. markets for manufactured imports is contingent on major concessions on agricultural imports can we hope to break the strangling tariffs and barriers which inhibit U.S. agricultural trade with Japan.

Japan is not the only nation that erects barriers against U.S. agricultural products. The European Common Market has an equally elaborate scheme of tariffs and domestic production subsidies to prevent its farmers from being undersold by more efficient U.S. producers. A system of "variable levy" tariffs ensures that even increased efficiency by U.S. producers will not permit them to penetrate European markets. Under the variable levy system, the tariff is raised whenever importers lower their prices. This creates a high floor price under which the less-efficient European producers can compete. Even at this higher price level, domestic price supports are necessary to ensure that producers can recoup their extremely high production costs, which otherwise would make them uncompetitive in world markets.

Other countries have similar policies. These two examples only illustrate the problem in world markets. The problem is not a general excess of world supply over demand in agricultural products. As we have documented, in many cases actual demand exceeds the supply available at the world price. The problem is that there is an excess of high-cost, non-U.S. supply that results from inefficient production behind the protective walls of price supports, trade barriers, and other restrictions.

If we were able to negotiate a reduction in this protection of inefficient foreign agriculture in exchange for continued access to the U.S. for industrial products, the supply of inefficient high-cost grains produced abroad would shrink significantly and the demand for U.S. agricultural exports would rise markedly. While this course would result in higher prices for U.S. producers, it would also result in cheaper food for the world's hungry nations. In view of this double benefit, it is irresponsible to allow these barriers to stand in the way of opening world markets. Yet the Congress has consistently shied away from a determined attack on these foreign controls. The farm legislation passed or proposed in this Congress has been no exception.

III. AMERICAN FARMERS NEED A BETTER ANSWER—NOW

Based on my studies of world farm markets, it is clear that any farm policy which fails to seek expanded markets for American farm products will ultimately fail to provide the continued growth and stable markets which American farmers need. Failure to come to grips with this problem has been the chief contributor to the major price swings which have plagued the farm community. It is also a controlling factor in the current serious price slump.

But policies directed toward exports alone will not bring relief soon enough to solve the problems of the current crisis. This crisis, which is caused by problems which develop when crop prices are on the *high* side, is due to what I call the "ratchet effect."

Worldwide crop failures, low world stocks and below-normal U.S. production contributed to a major farm price surge in 1973 and 1974. Within three years, season average prices for wheat rose over 300%, from $1.34 per bushel to over $4.00. During the same period, season average corn prices jumped from $1.08 to $3.03.

These prices produced record profits while they lasted, but they also had major negative effects. The price of farmland—both for purchase and for rent—rose right along with commodity prices as producers sought to expand their production. Yet when this greater

production built up world stocks and prices moved lower, these high land costs did not go away. Those who acquired mortgages on land purchased during the boom found themselves still having to pay these inflated mortgage costs even after commodity prices moved back down to previous levels—below $3.00 for wheat and $2.00 for corn. Tax assessments, which never seem to go down, continued to be based on the inflated land values of the 1973–74 period. Many farmers subsequently found that land costs which were reasonable when they were grossing $200–$300 per acre were impossible to manage when falling prices brought returns of only $150 or less per acre.

Even national average statistics bear out this land cost crunch. Current ASCS estimates show that the average of producing a bushel of corn, on an acquisition or equivalent rental cost basis, to be $2.12, based on nationally average yields of 91 bushels to the acre. When we add in current costs of land, which include interest and taxes on recently purchased land, the total cost to produce a bushel of corn rises to $2.50. In today's market, then, it is precisely these current costs which make the difference between success and failure.

Now, the United States Congress can not be expected to roll back the cost of land already purchased, or to lower property taxes assessed by state and local governments. Yet to the extent that these current cost problems are credit problems, I believe that the Congress can and should make assistance available to those who have been hardest hit by the current cost squeeze.

Existing farm credit programs, administered through the Farmers Home Administration, were never designed to deal with problems of this magnitude. For this reason, the Committee on Agriculture in the House is now finishing work on emergency credit legislation that would establish a new credit program with FmHA. This program would offer loans of the size currently available only from commercial lenders. By providing either direct re-financing or loan guarantees to those farmers who need immediate assistance with their current land costs, such a program can provide a safety net under producers until markets rise and the net is no longer needed. In comparison to the mass disbursement of "deficiency payments" under a high target price scheme, this approach is targeted at the very real problems faced by those producers in the greatest difficulty.

IV. PROGRESSIVE LONG-TERM POLICIES ARE ESSENTIAL TO THE HEALTH OF THE AGRICULTURAL COMMUNITY

The federal government can and must take positive steps to ensure the short-term survival of our hardest-hit producers. But without immediate steps to formulate and implement an aggressive market expansion policy, no amount of short-term cures can stabilize the agricultural economy. Programs to adjust domestic supply and demand by major government controls over farm production have simply not worked. Even the approach embodied in the Dole bill would have been woefully insufficient to stabilize prices. This is not because restricting supplies won't raise prices. It is because the Dole approach had no hope of restricting supplies enough to make any difference.

As the major supplier of grains to the world market, the United States price is fixed more by world supply conditions than it is by short-term or regional variations in domestic stocks and production. The U.S. accounts, for instance, for less than 20 percent of world wheat production. A careful study of world open market price trends in the past years indicates the size of world production cutbacks necessary to create large upward price movements. From 1972 to 1973, world carry-over stocks declined as open market demand grew faster than world production. When major world-wide crop failures hit in 1973–74, world stocks were unusually low.

In response, season average prices for wheat and corn broke record levels, at $4.00 and $3.00, respectively. At peak points, due to harvest lags throughout the year and regional supply variations, monthly averages went about $1.00 higher for both commodities, and in rare circumstances spot prices were still higher.

World supply conditions today are very different from 1974, however. World-wide stocks of wheat and corn are almost back to the heavy surplus levels of 1967–72. Average stocks of wheat for that period were 89 million tons, compared to 85 million tons today. These levels are considerably different from the 1973–74 period, when world stocks were about 40% lower.

As a result, even huge U.S. productions cuts today would not substantially reduce world stocks and raise prices unless accompanied by another major world-wide crop failure—a contingency on which we cannot depend as the basis for a farm program. Without lower production outside the U.S., it would take a cut of over 40 million tons of wheat—or nearly 70% of total U.S. production—to move U.S. market prices to a season average level of $5.00, the target sought by the Dole bill.

The situation in corn is slightly less rigid since the U.S. produces over half the total world production of feedgrains. Yet based on a similar analysis, it would take an actual production cut of at least 30% to move the price toward the $3.45 level guaranteed producers under the Dole bill.

*(1) The Dole bill would not have produced effective production cutbacks*

Based on this analysis, I became convinced early that the Dole bill's promise of $5.00 wheat in the marketplace was an empty one. The maximum 33% set-aside would not approach the 70% cutback needed to bring prices up to that level. It did seem possible to me at first that the Dole bill might actually achieve the necessary production cuts in corn.

Closer analysis of the bill's set-aside program indicated that corn production cuts under the Dole bill would also be insufficient. There are two reasons for this. While the Dole bill promised parity profits only in return for a 50% cut in production, in actuality this guarantee was based on setting aside an amount of land equal to 50% of what the farmer actually planted. This means that at most acreage must be cut by 33% in order to be given the parity profit guarantee.

Even a 33% acreage cut, though, does not guarantee a 33% production drop. Officials of the ASCS have informed me that at least half of the land placed into set-aside programs in the past had been in wet areas or land infested by quack grass. When the least productive land is set aside, even substantial acreage cuts do not guarantee substantial production cuts.

The second and more serious problem with the version of the Dole bill passed by the Senate, however, was that it contained a loophole which would have allowed many farmers to increase their corn acreage and still be guaranteed parity profits.

Unlike price support loans or the diversion payment program which requires acreage cuts for eligibility, the set-aside program in the Dole bill used the farmer's total Normal Crop Acreage (NCA) for all crops in computing set-asides. As long as a farmer set aside 5 acres within the NCA for every 10 acres he planted, he would have been eligible for the $3.45 price guarantee for corn.

For the farmer who planted only corn last year, only a real acreage cutback would have entitled him to the parity guarantee, since all of his NCA is composed of corn land. But the farmer with a mixed crop acreage last year would have been able to set aside soybean land (for example) from within his total NCA in order to qualify for the set-aside under the corn program. In fact, the Dole bill would have encouraged him to do this, because of the high profit guaranteed on every acre of corn planted.

As an example, let us look at the case of a farmer with 1,000 acres of land. Let us suppose that in 1977 he planted 500 acres in corn and 500 acres in soybeans. Under the Dole bill, he would be presented with several options for 1978. He could cut out corn planting altogether, betting on the soybean market. Based on national average costs of production for beans and the current futures price of $6.20 for soybeans, he could plan on net revenues of $21,000 prior to fixed costs for land, taxes, and other overhead. If he studied the bill carefully, though, he would learn that he could do much better than that.

By planting only 500 acres of beans and taking the set-aside of 50% for corn, he could plant 333 corn acres and set aside 167. Since he would receive a guaranteed parity profit equivalent to $3.45 corn prices in the market, he could expect net revenues of $22,464 prior to fixed costs.

He would soon find, however, that his best deal would be to eliminate soybeans altogether and plant the maximum possible amount of the profit-guaranteed corn. Since his NCA for 1977 was 1,000 acres, he could plant 667 acres of corn and still qualify for the parity profit guarantee if he set aside the balance. In this case, his net revenue goes up to $36,283!

I have never met a farmer who did not pursue his own best advantage as he saw it in the market. I do not believe that the Dole bill would have changed that. The result, in many cases, would be a significant diversion of acres into the crops eligible for guaranteed parity prices.

Admittedly, this loophole would not have encouraged large increases in corn production nationwide. Many farmers, who were ready to plant beans before the bill was considered, would not have been in a position to switch to corn. Then, too, the chance that soybean prices would rise dramatically might keep some farmers in soybeans, hoping that everyone else switches to corn.

When all planting was finally done, however, the result would have been that there would have been very little, if any, reduction in total corn acreage, and little increase in the market price for corn.

What would go up would be the deficiency payments promised under the bill for the difference between parity guarantees and market prices. A study which included the likely effects of this set-aside loophole concluded that the federal Treasury would pay out nearly $6 billion in direct subsidy payments to producers. Of these recipient producers, the largest 5% would have received 35%—or $2 billion—of these subsidy payments. The smallest producers, many of whom are in the most severe trouble, would have received the smallest amount of help.

V. THE BETTER ANSWER: LESS GOVERNMENT, MORE MARKETS

As a result of my analysis of all of these factors, I have reached the conclusion that *any* farm program designed to restrict U.S. production can *never* be a longterm means of encouraging stability and growth in the American agricultural economy. Only by eliminating the restrictive policies of gov-

ernments around the world—including our own—can we hope to open up world markets to the level of agricultural trade necessary to achieve our twin goals of stability and continued growth.

Stated in these general terms, the task may seem hopelessly large, and the influence of the American farm community too little to achieve it. I am convinced, however, that by harnessing the influence of the United States government for *constructive* purposes we can make major strides toward tearing down the barriers to agricultural prosperity that exist in the world today.

(1) *The immediate program: returning control of the farm to the farmer*

As with any effort to make improvements, the task begins at home. We must act *now* to roll back the excessive interference of the federal government in the agricultural economy, and in other areas where short-sighted federal policies inhibit productivity and increase the costs of the American farmer.

First and foremost, we must examine the role of federal regulatory agencies in raising costs for American farmers.

The Occupational Health & Safety Act must be amended to clearly protect the farmer, as a businessman and employer, from regulations designed to protect employees. I do not mean to suggest that reasonable safety standards for equipment are not important in farming. Certainly, farm machinery and farm buildings pose potential hazards for those who work with them. As businessmen and individuals, farmers naturally take precautions against these hazards. The problem is that, by setting standards which are at best arbitrary, OSHA has attempted to enforce an unreasonable set of standards for farm operations. This authority should be severely limited.

Similarly, we need legislation which constrains the scope of FDA and EPA witchhunts against proven agricultural chemicals. While I share the desire for a clean environment and safe food, these goals must be balanced against the costs of excessive regulation. In their zeal to protect consumers from any risk whatsoever, regardless of cost, these agencies have not limited their regulation to those areas in which the costs match the benefits obtained. Congress can no longer avoid its responsibility to settle this matter for the American people. By placing precise limits on these agencies in cost-benefit terms, I believe we will sharply curtail their excessive—and costly—interference in the farm economy.

The efforts of some government agencies must be reinforced, however. In particular, I believe that the President's recently-proposed cuts in agricultural research move in precisely the wrong direction. While the major thrust of such research is in productivity enhancement, there is a growing body of research in cost control. We cannot allow this vital research to be discontinued. We must expand its role in assisting the individual farmer in applying cost-saving methods of production.

Many other federal policies, written to affect the economy as a whole, hit the farmer particularly hard. Despite efforts to reduce the burden of estate taxes on farm property, the fact of the matter is that inheritance taxes have increasingly made it impossible for farms to be retained within a family for more than one generation. Another problem is the move to force farmers to use accrual methods of accounting. This could deprive them of the flexibility to represent each crop year as a separate business venture and thereby produce serious cash flow and credit problems. The Congress must ensure that this year's tax law changes do not deprive the farmer of the ability to respond to changes in the market by selling his crop at the best time.

Federal restrictions and requirements also place a heavy burden on export markets. Due to pressure from maritime unions for example, Congress has established requirements that all sales under either government farm export programs or sales agreements negotiated with other nations must make heavy use of the high-cost U.S.-flag shipping. Even with massive government subsidies, these transports are the most inefficient and expensive in the world, since the high costs of labor for constructing and operating them under excessive maritime union contracts have been locked into the subsidy schemes.

It has been estimated that cargo preference requirements such as these can add as much as 25c per bushel to the cost of American grains shipped overseas, over and above what would have been paid if competitive foreign-flag transports could be used. This price differential places us in an extreme competitive disadvantage with countries such as Canada and Australia, who do not have similar restrictions. These cargo preference provisions must be repealed at once.

Similarly, extended dock strikes can tie up American export goods indefinitely, raising serious questions about our ability to deliver on foreign markets. This uncertainty has diminished our ability to land overseas commodity sales contracts. We must establish requirements for binding arbitration of these strikes, to ensure that they do not cripple our efforts to expand overseas markets.

The most damaging way in which our government intervenes in our export markets, however, is by placing embargoes on sales of U.S. commodities. In efforts to "protect" consumers from rising farm prices, the government has often limited or closed overseas sales at the peak of the marketing year. Congress should completely eliminate the President's authority in this area.

(2) *The continuing program: Aggressive expansion of export markets*

Reducing internal restrictions alone will not produce an automatic expansion of American farm markets. It is essential that the federal government initiate a policy of aggressively promoting American interests in world commodity markets. In my view, there are three essential elements of such a policy: an all-out campaign against foreign trade restrictions, a vastly improved system of providing American producers with information about foreign demand trends, and a hard-hitting marketing effort which promotes American farm products abroad and provides the financial assistance which our producers and their customers need to ensure a continuous flow of U.S. agricultural products abroad.

(a) Bringing Down Trade Barriers

The United States is currently involved in a series of multi-lateral negotiations on the terms of the General Agreement of Trades and Tariffs (GATT), the major world treaty on trade. This treaty is, as its name suggests, of a general nature. Rather than specifying actual trade agreements, it merely lays out the rules which signatories must follow in establishing their trade policies.

The Administration is also involved in a series of talks with Japan and other Asian countries concerning their trade policies. In my view, U.S. efforts in both of these negotiations are moving in the wrong direction. By concentrating on limiting imports into the United States from these nations, they fail to realize our potential for using U.S. imports as a lever to increase U.S. exports to these nations. The Administration is selling short the potential of American agricultural products to lead the way in increasing *exports* as a means of restoring the trade balance.

This needed expansion of export markets cannot be accomplished by jawboning nations assembled at a conference into minor trade concessions. I believe that it is necessary for the United States to initiate a series of trade agreement negotiations with major producers of U.S. industrial and consumer product imports, in which it is made very clear that continued access to the U.S. market depends completely on their willingness to eliminate barriers to exports of our farm products. Unilateral retaliatory trade barriers cannot possibly enhance the growth of our economy. But carefully negotiated item-for-item agreements on minimum levels of purchases of foreign manufactured products in return to U.S. access to foreign agricultural markets are essential to stabilize commodity prices in world markets and provide a basis for continued growth.

At its recent convention, the AFL–CIO announced that it would work diligently to frustrate any such effort, claiming a threat to jobs for its members. They fail to realize that a healthy farm community which can purchase the products manufactured by AFL–CIO members is even more essential to the ultimate safety of their jobs. I believe that it is imperative that the Congress reject any and all efforts to respond to foreign trade barriers with barriers of our own. To do so would be to throw away the bargaining chips which we desperately need to bring down foreign barriers to U.S. farm products. And I believe that the Congress must firmly direct the President to initiate treaty negotiations immediately with those nations which, in attempting to protect inefficient domestic farm producers, unreasonably bar access of their citizens to efficiently-produced American farm products.

(b) Improving Market Information for American Producers

Under every farm program run by USDA since the 1930's, production targets and regional production allocations have been made based on woefully inadequate information on world marketing and production trends. As a result, American farm producers have been left holding the bag when USDA recommendations produce unmarketable surpluses. While the Foreign Agricultural Service (FAS) of USDA is empowered to conduct continuing market research, its staff is so small and its information base so limited that it is unable to provide the kind of specific, reliable data that American producers need to make planting decisions.

To take best advantage of world markets, American producers need to know the specific markets in order to carefully match their production to world commodity needs. For this reason, the FAS must be charged with the task of providing in-depth analysis of major agricultural market areas on at least an annual basis. But even this effort would be insufficient to generate all of the required information for U.S. producers. The FAS must also be provided with the resources necessary to enable it to identify new markets for American products.

Many countries do not currently provide the U.S. with access to information about their growing areas or consumer markets. A significant amount of world agricultural data must now be generated through clandestine CIA surveillance. The recent seriously mistaken estimate of Soviet wheat production highlights the short-comings of this method. By relying on intelligence sources for agricultural data, we run the risk of being mislead by counter-intelligence methods such

as those used this year by the Russians to conceal the pending wheat shortfall.

It is ridiculous that the U.S. must depend on cloak-and-dagger methods to gather information that is so vital to the stability of U.S. agriculture. This matter must be seriously addressed by treaty. As part of either bi-lateral trade agreements or through separate agreements, we must ensure that the American agricultural researchers have guaranteed access to the data base needed to make intelligent market forecasts.

No amount of sophisticated market information can be of any value unless American producers use it in making planting decisions. In recent years, the American farmer has come to distrust USDA demand forecasts, largely because of their sorry track record. Once our research capability has been augmented to the point that it becomes a viable forecasting system, producers and their organizations should be given a role at the national level in interpreting and disseminating market forecasts. Only in this way can we restore the confidence necessary to ensure most effective use of the improved world market information system.

*(3) Providing assistance to producers and their customers*

Even if the stage is set for expanded export markets through trade agreements and improved market information, there will still be obstacles to overcome in matching foreign customers to U.S. producers. Foreign customers must be made aware of U.S. production capabilities, sales agreements involving different languages and varying currencies must be negotiated, transportation arrangements must be made, and financing must often be available to enable foreign customers to complete purchases. An expanded Foreign Agricultural Service, working in conjunction with the Commodity Credit Corporation, can be of considerable assistance in providing the promotional, marketing, transport and financing assistance necessary to enhance the flow of U.S. goods overseas.

Currently, FAS maintains agricultural attaches within U.S. embassies around the world. It is a mistake to tie agricultural marketing efforts too tightly to the overall U.S. diplomatic efforts, lest temporary foreign policy differences prove disruptive to agricultural trade. By establishing separate offices for an upgraded FAS agricultural marketing service in foreign capitals and major cities, we would be able to reinforce a link between foreign customers and the private American producers who supply them that would be less susceptible to the winds of diplomacy.

Such offices could provide a central clearinghouse in major marketing areas for the research, promotion and marketing efforts necessary to provide a comprehensive package of services. There may well be other benefits to be derived from these offices. If they come to symbolize a new American effort to make foreign nations partners in an expanded level of world trade through links between the private citizens of both nations, they could actually enhance America's diplomatic presence in these countries.

In backing up these offices from the United States, our existing agricultural trade institutions must be significantly improved. In addition to expanding the role of the Foreign Agricultural Service as the central research and marketing arm of the U.S. agricultural trade effort, we must provide additional resources to the Commodity Credit Corporation to finance world commodity sales.

Currently, the CCC is the financing arm of the U.S. grain reserve program, both for CCC-held and on-farm storage loan programs. In addition, it administers both concessional sales and emergency food aid programs under the Food for Peace program. Yet budgetary limitations and the pre-eminent position of domestic reserve programs severely limit the effectiveness of the CCC in providing the assistance necessary to support the level of sales needed to significantly expand U.S. exports.

As part of an expanded export assistance program, legislation is needed to give the CCC more flexibility in providing long-term loans and concessional loan terms. Export programs must be made the primary mission of the CCC, with budgetary authority to match this expanded role. Consideration must also be given to expanding grants of food and feedstuffs as part of the overall American foreign aid effort.

In all, we can no longer expect that world markets will take care of themselves while we go our own way. The growing dependence of the American agricultural economy on export sales and increasing protectionism in world agricultural markets means that the federal government must take a leading role in expanding sales of our farm products abroad. An ambitious program of the magnitude I have outlined here is the minimum necessary to ensure the markets American farmers need to stabilize prices, increase their income, and exploit their potential for maximum efficiency and future growth.

Mr. Speaker, in the near future I will introduce legislation to provide the needed authority to embark on this aggressive program. At the same time, I urge my colleagues to join me in passing legislation to roll back the excessive burden placed on the farm economy by misguided tax and regulatory policies. I hope I can count on your support in working toward these vital objectives. Policies which reward the productive potential of American agriculture, rather than seek to restrict it, are long overdue. Working together, we can finally make these policies a reality.●

## JOHN DAVENPORT ON RHODESIA

### HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. ASHBROOK. Mr. Speaker, John Davenport, author of U.S. Economy and former editor of Barron's and Fortune, has written a most perceptive article in the April 14, 1978, issue of National Review. In his usual careful and factual manner, Mr. Davenport outlines the tragedy of our Rhodesian policy. As a Member of Congress who was always pro-Rhodesia I find his article most timely.

It is a sad day when our President and his emissary, Andrew Young, side with the terrorists against a free and peaceful government. The irony of their position is that they now say we must bring about a coalition with the guerrilla forces in Rhodesia to prevent the Soviets from becoming involved. Anyone who knows anything about Rhodesia knows full well that it is the other way around. The Soviets are involved with the terrorist forces and our Government appears bent on forcing an accommodation to the Soviet-backed forces in Rhodesia.

Mr. Davenport's article is worth the close consideration of every member and I include it at this point:

AN AMERICAN-RHODESIAN PERSPECTIVE

(By John Davenport)

I first met Ian Smith in the autumn of 1966, and I recall that his first question to me as we sat in his office off Cecil Square, Salisbury, was a quizzical: "Are you another American intellectual seeking to reform us?" From this inauspicious beginning, conversation turned amicably to Rhodesia's chances of surviving world ostracism and UN sanctions imposed as the result of its breakaway from the apron strings of the British Empire in the previous year. At the time, Smith was fairly sanguine about the prospects—a prognosis confirmed by my subsequent tour of Rhodesia's farms, mines, and factories, and by its remarkable development from 1966 onward.

But when I visited Rhodesia just a decade later, and again saw Smith, those euphoric years had drawn to a close. Soldiers in battle dress slipped in and out of the Meikles Hotel, and an ambitious project for enlarging that hostelry, plus other projects, remained uncompleted. The economy was obviously hurting, partly as the result of sanctions, much more because Western diplomacy had encouraged the Soviet-armed terrorist war, then lapping across Rhodesia's northern and eastern frontiers. In view of that worsening war and the fall of Angola, Henry Kissinger had engaged in his famous shuttling, and in September of 1976 had offered Smith his bottom-line terms: Let Rhodesia finally accept the slippery and ill-defined principle of "majority rule" for its six million black inhabitants, and the U.S. would lift sanctions and use its good offices to wind down the terror.

Since Smith had not yet publicly accepted the package, and since my invitation to his home at Number 8 Chancellor Avenue was specifically "for a drink not an interview," conversation at first turned to trivia. Nursing a light scotch-and-water, Smith, grayer and even thinner than when we had first met, and tired from weeks of negotiation, allowed that he yearned for his ranch in Rhodesia's Midlands where, as he observed, "The cows don't ask questions." It was only as my wife and I prepared to leave that he probed the basic issue of detente in the face of mounting Soviet aggression. "I suppose that's my trouble," he said softly, "is that I do not understand the West." The words hung in a peculiar way in the airy living room. It was almost as if he had asked: "Is there any longer a West to believe in?"

Many times since that evening I have asked myself the same haunting question. For the conduct of the West toward Rhodesia over the years has been quite incredible, and never more so than in recent months, when Smith in his own way and in his own time has been seeking to fulfill the basic terms of the Kissinger agreement by effecting with moderate black leaders an "internal solution" to Rhodesia's problems, rather than turning the country over to Communist-dominated terrorists. One woud have assumed that the West in general and the U.S. in particular would embrace such a solution with open arms. Instead there has been constant bickering in Washington and the United Nations based to no small degree on the assumption that anything Ian Smith touches must be a racist "contrivance" and that the man himself, in the unguarded lan-

guage of a senior State Department official "reminds one of Thomas Jefferson—an agrarian who kept slaves!"

Two transient meetings and occasional brief correspondence with this soft-spoken and controversial man are obviously not enough to support more than an impression of his honesty and sincerity. But if one puts that impression together with first-hand observation of his country, with impressions of those who have known him, and with the unexpungeable record of political events in Rhodesia and Washington over recent years, one comes out with a picture very different from that usually painted. Ian Douglas Smith, born of Scottish parents in the pioneering town of Selukwe, Rhodesia on April 8, 1919, may not be the paragon of all virtues. But when the petty bureaucrats of Britain, the U.S., and the UN are forgotten, history may well mark him as the man who helped save the West from many of its emotional follies.

Fighting for what he considers to be the values of Western civilization is in any case not new to Ian Smith, which is one reason why today he walks with a slight limp, and why his face has a certain immobile quality, and why, if you look closely, there is a slight droop in one of his keen grey eyes. These physical scars were inflicted during World War II. While in his first year at Rhodes University in South Africa, he enlisted (at age 23) in the Rhodesian Squadron of the British Royal Air Force. In 1943 he was assigned as a fighter pilot to Egypt. Taking off in the pre-dawn darkness for patrol over the Mediterranean, a fellow pilot recalls seeing the exhaust glow of Smith's Hurricane flare out; on returning from the mission, he saw wreckage—guns, radio set, and engine—strewn across the rough flying field. Smith had in fact tripped a bunker and, despite a flying harness with a breaking point of one ton, was flung head first against the instrument panel of his plane. Smith's superb physical condition pulled him through, and skillful facial surgery in Cairo's Scottish Hospital repaired, or nearly repaired, the damage.

For most volunteers this would have been enough, but Smith on recuperation rose to fight another day. In early 1944 he was assigned to strafing the German retreat up the Italian peninsula, this time in a Spitfire instead of a Hurricane. While on a near-ground-level strafing mission, Smith's plane was riddled by ack-ack fire and, as he has recalled, "There was only one thing I could do. I stepped out of the thing and landed in the Ligurian mountains." For a while he lived with Italian partisans and then, with three companions, made his way through the German positions and crossed the Alps in midwinter on foot to find refuge within the American lines. There followed a "refresher" course in Shropshire, England, and Smith was off again to see service over Norway, Denmark, and Germany till the guns along the Western front fell silent.

Such a man does not give in easily. If today Smith is counted as a stubborn fellow by his critics, perhaps we could do with a little more of such stamina and stubbornness in war and in politics. As to the latter, Smith had spent many a long evening in the barracks chewing over with his companions what might be the future of the pioneer country they had left behind them, but these were little more than diversions. At the end of the war he returned to Rhodes University, took his degree in economics in 1946, was married to Janet Watt (a former South African schoolteacher and sister to the wife of Owen Horwood, currently South Africa's Minister of Finance), and settled down to what he thought would be the permanent life of a rancher.

But not for long. Rhodesia's politicians were at the time on the lookout for fresh talent and had marked Smith's war record and his quiet capacity for leadership. He was persuaded to run for Parliament on the Liberal ticket and won handsomely. In the next ten years, in various capacities and under various party labels, Smith made his way up the political ladder and in the process came to grips with the two main issues that had and have increasingly agitated his country. The first was how a minority of white settlers, today numbering no more than 270,000, should deal with an ever-growing black population which in its turn was sharply divided between the urbanized blacks and the much larger tribal communities, and between the two great tribes, the Mashona and the Matabele peoples. The second and interlocking issue was relations with the British Crown.

On the first of those questions, Smith grew up like most British settlers with the vague idea that privileged position entailed the duty to launch blacks into the twentieth century. Bit by bit this presumption hardened into the idea that political emancipation of the blacks must be evolutionary, not revolutionary. But on one point Smith has never wavered: whatever the racial solution, the shots should be called by those who know the country and its inhabitants, not by distant bureaucrats and politicians.

Rhodesia, founded in the 1890s by Cecil Rhodes' British South African Company, had become a self-governing British colony in 1923, with defense and internal security firmly lodged in Salisbury, and enjoyed all but Dominion status. At the end of World War II, Rhodesia could have had that status or even full independence for the asking had she not been diverted into an ill-advised attempt to federate with Northern Rhodesia (now Zambia) and with Nyasaland (now Malawi). When that federation flew to pieces in 1963, while Britain, responding to the "winds of change," was giving most of her colonies independence, Rhodesia looked for the same treatment. It was not to be. By then Britain was responding to the clamor from Commonwealth countries and the UN that white rule should end in all of Africa. In the case of Rhodesia, Britain made independence contingent on "enlargement" of the franchise, which in turn gradually hardened toward the mystic formula of "majority rule." In the lexicon of liberals, Ian Smith is a man who cannot be trusted to keep his word. In point of fact, it was Britain—first under Conservative leadership and then under Labor's loquacious Harold Wilson—which welched on implied promises. In November 1965 the sands of negotiation ran out. Despite frantic telephone cal's from London, Ian Smith, by then Prime Minister, signed Rhodesia's fateful unilateral declaration of independence (UDI).

Critics there are who believe that this ultimate plunge with all its consequences could have been avoided with a little more dickering and patience. Smith himself has never subscribed to that view. The choice, in his judgment, lay between a kind of second-class independence and the real article, and between internal evolution toward a multiracial society and an externally imposed settlement with perhaps revolutionary consequences. "UDI," he has said, "gave us the best ten years of our life." And so matters at first proved, politically and economically, despite Britain's waspish declaration of economic war against Rhodesia and her appeal to the United Nations for succor in putting down what she termed a "rebellion," against which she herself had no handy Redcoats to send, as she had had in the case of the American Colonies in 1776. It did not take the Babel beside the East River long to come to Britain's rescue by declaring that Rhodesia's insurrection constituted a "threat to the peace:" hence she merited ostracism and universal sanctions against her commerce. In vain the late Dean Acheson pointed out to members of the American Bar Association: "It will surprise some of my fellow citizens, though hardly anybody here, to be told that the United States is today engaged in an international conspiracy, instigated by Britain and blessed by the United Nations, to overthrow the government of a country that has done us no harm and threatens no one. *This is bare-faced aggression unprovoked and unjustified by a single legal or moral principle.*"

Meanwhile, in Salisbury, Smith and his government stuck to legal and moral principles as they saw them Rhodesia's new constitution included most of the provisions of the constitution of 1961, negotiated by Britain, which while restricting the franchise made no mention of race, creed, or color, and might have drawn plaudits from a Madison or a Jefferson. In 1969 that constitution was amended along more racial lines, with blacks voting for blacks and whites for whites. Yet as late as 1977 there were four black tribal leaders in Ian Smith's cabinet, and equal number of blacks and whites in Rhodesia's Senate, and 16 blacks v. fifty whites in Rhodesia's Assembly, with provision that black representation would advance at least to parity as the contribution of blacks to the national income rose (thanks to rising productivity and the spread of education).

This was surely not simon-pure democracy, but it was a far cry from the standard caricature of Rhodesia as a land where a rascist minority grinds blacks under its heel. Moreover, economically speaking, the proof of the pudding lay in the eating. Between 1965 and 1975 Rhodesia staged a spectacular comeback which surprised her friends and excited the envy of her foes. In this period Rhodesia's GNP expanded on the average by 7 percent per year, or faster than that of the U.S., as a consequence of the diversification of her agriculture from tobacco to maize, cotton, and cattle breeding, as well as heavy investment in mining, light industry, roads, public housing, and education. The result is that Rhodesia's literacy rate is the highest in all of Africa (except South Africa); and there are more blacks than whites in the fully integrated University of Rhodesia. As of today, blacks constitute over two-thirds of Rhodesia's fighting forces.

What ended these "best ten years of our life" was an event which neither Ian Smith nor other leaders in southern Africa could have averted—the collapse of Portugal's empire in 1974–75, with the rapid loss of its African possessions, Mozambique and Angola, to Communist domination, and the concomitant stepping up of external aggression across Rhodesian borders. Such attacks had begun in a small way in the early Seventies, when certain Rhodesian nationalist leaders, operating from Zambia, turned to terrorist tactics. The loss of Mozambique now exposed Rhodesia's long eastern flank to similar inroads, besides cutting her direct rail connection to the sea via Beira, which now became a port of entry for Soviet bazookas and other equipment destined to sustain "freedom fighters." Their notion of freedom was to kill Rhodesia's farmers and missionaries and, perhaps saddest of all, her black farm workers in their exposed "homelands." As Senator-Chiefs Jeremiah Chirau

and Kayisa Ndiweni—leaders, respectively, of Rhodesia's great Mashona and Matabele tribes—put it: "There is no race war within Rhodesia . . . The fight is between decent Rhodesians, black and white, and terrorists who are being directed and used by the forces of Communism."

The fall of Angola, though more distant geographically, brought less predictable but in the end no less untoward results. For it was the Russian-Cuban attack on Angola that persuaded the U.S. State Department, and specifically Henry Kissinger, that something more was required in Africa than a balancing act wherein the U.S. sought to appease black African sentiment with sanctions against Rhodesia while treating the rest of the continent with benign neglect. In Salisbury there were no doubt high hopes that this "something more" would be a direct confrontation with the Soviets—the cutting off of U.S. grain and high-technology sales to Russia, for instance, or at least open encouragement for South Africa, whose troops late in 1975 were within striking distance of Angola's capital, Luanda, to march in and finish the job. Nothing remotely like this happened. In Washington, when he asked for aid for Angola, Kissinger was decisively turned down by a Congress still smarting from defeat in Vietnam. That tore it. Word flashed to South Africa that its veterans in Angola had best stand down, and presently they began their two-thousand-mile retreat to their camps in South West Africa. Concomitantly, the State Department dusted off a new, or as it turned out very old, tactic for holding states like Zaire and Zambia in the reputedly pro-Western camp. In the spring of 1976 Kissinger journeyed to Zambia, savored the spray of Victoria Falls, and then let go at Rhodesia: No mention of Rhodesia's economic and political progress from 1965 forward. No condemnation of terrorist atrocities. Instead his blunt warning was that Rhodesia must bow to black African demands for "majority rule" here and now or suffer slow strangulation.

However unfairly, the American giant had spoken, and in the next several months rhetoric was translated into action. In a whirlwind series of conferences Kissinger persuaded Prime Minister Vorster that South Africa's own self-interest lay in achieving peace without honor in Rhodesia. South Africa, itself threatened by UN sanctions, withdrew its helicopters from the Rhodesian front and, while purporting to follow strict and technically correct neutrality, put pressure on Smith to settle. When, on Saturday, September 18, Smith flew from Salisbury to Pretoria, ostensibly to watch a rugger match he held few cards.

Next morning, as Sunday church bells chimed out in South Africa's capital, Smith and Kissinger met at the residence of the American Ambassador. On one account, Kissinger opened the meeting with a jocular, "Mr. Smith, I understand you are a slippery man," a sally that drew laughter from all parties. Smith himself recalls that at some point in the day's proceedings Kissinger graciously allowed that he had come "on the most unpleasant diplomatic mission of my life." In any case his technique was faultless:

A painstaking analysis based on U.S. and South African intelligence estimates as to where Rhodesia would find herself six months or a year hence if the terrorist war continued;

The promise of lifted sanctions and American good offices if the principle of "majority rule" were accepted;

A more or less detailed written plan as to how a transition could be made to a new constitution, democratic elections, and full independence;

And the assurance that all this had been cleared with the so-called "front-line presidents of neighboring states, notably Kenneth Kaunda of Zambia and Julius Nyerere of Tanzania. Smith listened somberly and asked for time to mull over the "package." Toward dusk he and Kissinger met again, this time with Vorster at the latter's official home, Libertas, on the low hills overlooking the city. Smith, on one reliable British report, came swiftly to the point: "All I have to offer is my own head on a platter."

But not quite all. For in the hours of discussion Smith managed to insert into the package certain provisions which would make it more palatable to his constituency back home—specifically, that in the transition government whites would temporarily hold the key portfolios of internal security and defense. Moreover, it was agreed that after returning to Salisbury and consulting with his party, he should announce his rejection or acceptance of the agreement and should spell out its terms. This he did at the end of the week in a low-keyed television address to his country, stressing that his acceptance of the proposal was made on condition that Britain and the U.S. fulfill their part of the bargain as regards the lifting of sanctions. By then Kissinger, having touched base again with Rhodesia's bellicose neighbors, was in full flight over the western Atlantic toward Washington. As Smith's flat voice came over the scratchy radio, younger members of Kissinger's entourage cheered and ordered an extra drink. The Secretary himself remained peculiarly solemn and impassive—a scowling Buddha—perhaps because, more than most men, Kissinger knew that in the case of Rhodesia he was tampering with an outpost of civilization; perhaps for more mundane reasons.

His reserve in any case was fully justified. Forty-eight hours after the broadcast the front-line presidents, under powerful pressure from the Soviets, let go a broadside of criticism, and in effect reneged on whatever they had agreed to during Kissinger's shuttling. Britain, and later the State Department, allowed that most of the terms of the agreement were "negotiable" at a conference to be held outside of Rhodesia. With that, the whole package unraveled. There followed the abortive Geneva conference, where it turned out that the black "nationalist" Rhodesian leaders were themselves hopelessly split as between the forces of the moderate Bishop Muzorewa, and those of the "Patriotic Front" of Joshua Nkomo and the implacable Robert Mugabe, a self-admitted Marxist, who claimed control of most of the terrorist forces in Mozambique. There followed, too, the futile efforts of the pipe-smoking British ambassador to the UN, Ivor Richards, to put Humpty Dumpty back on the wall. Finally, in September of 1977, a new British-American "initiative" was announced. In effect it asked for the capitulation of the "illegal" Smith regime. A British administrator, Lord Carver, would be moved into Salisbury until a new Rhodesian constitution could be adopted; his regime would be bolstered by a United Nations peace-keeping force (presumably consisting largely of Nigerians). Meanwhile Rhodesia's own armed forces would somehow be integrated with those of the terrorist, with the latter, on the word of Britain's Foreign Secretary David Owen, holding the upper hand.

Predictably, Smith received this "initiative" cooly, and presently wrote it off as "mad," since it would give the terrorists precisely what they wanted—a takeover of the country. Already he was working on a better way to solve his country's difficulties, an "internal settlement" based on the unwavering conviction that any settlement must be made "by and for Rhodesians." Such Rhodesians were by now at hand, though their combination under the pressure of war and necessity made for strange bedfellows: the diminutive Bishop Muzorewa, with whom Smith had vainly negotiated in the Sixties, but who now commands by far the largest black following in Salisbury; the Reverend Sithole, once accused of plotting Smith's death, but who is now violently opposed to the terrorists; and finally, the towering Chief Chirau, who had served in Smith's cabinet and now heads an independent party of his own, and who may well become the anchor-man in Rhodesia's politics despite jibes from critics that he is no more than an "Uncle Tom" (a cross which our own Booker T. Washington had to learn to bear). Bit by bit these negotiators found common ground.

Early last month a final settlement was signed which followed closely the terms of the Kissinger proposal: it called for a transitional interim government ruled by an Executive Council consisting of Smith and the three black leaders, with chairmanship rotating, plus a racially mixed cabinet of ministers. A promised constitution provided universal suffrage and, indeed, one-man/one-vote, but also gave the white minority certain political protections for the next ten years. Free elections were to be held as soon as possible, with the provision that the Patriotic Front could participate in the elections if they renounce their terrorist tactics. In the meantime, control of Rhodesia's fighting forces would rest in the hands of the interim government.

What more, asks Smith, can the West want?—a good question. Incredibly, London and Washington hesitated and dithered. For one thing, there are those in Whitehall and Foggy Bottom who make it their business to distrust "Smithie." For another, the internal settlement caused a furor in the United Nations, which has already passed a resolution condemning it out of hand. The third and more rational explanation for Washington's hesitancy is that since the Salisbury accord was made without, and in defiance of, the terrorist leaders, it will not put an end to the war. This is probably true as far as it goes, but it overlooks the fact that the way to deal with bandits is not necessarily to admit them into the house. It also overlooks the fact that the U.S. could deflate the terrorist cause by halting its decade-long "aggression" (Dean Acheson's term) against Rhodesia and unilaterally lifting sanctions against Salisbury. But Cyrus Vance and Jimmy Carter have brushed aside this obvious option. Behind their hesitancy it is not difficult to perceive fears that if the U.S. dealt thus justly with Rhodesia, Russia might throw in fresh armament and Cuban troops, leading to outright confrontation. In the days of Neville Chamberlain there was a word for such poltroonery, namely, appeasement.

All this may change, but today's U.S. policy toward Rhodesia troubles many Americans. It is likewise troubling, we may be sure, to the ex-fighter pilot from Selukwe, who confesses that he does not "understand" the West. What, in conclusion, of him?

When the accord with the black moderates was signed in Salisbury under the portrait

of Cecil Rhodes, it was noticeable that Smith was stony-faced, spreading his hands out in a gesture of resignation rather than celebrating the victory with the jubilation of the rest of the participants. In a subsequent interview he stated flatly: "I have come to this solution because I had no other option." From which critics might deduce that Smith is still their much maligned "racist" at heart, who now concludes his career as no better than a political trimmer.

Such evaluation will really not do. Smith is scarcely one to underrate the importance of race in shaping human destiny. But over the years he has sought to disentangle that thorny issue from popular liberal slogans that have in fact little to do with it and have worked great harm. He is still a believer in the qualified franchise for blacks and whites alike, for the same reasons the founders of the American Republic, believed in it. His frequent sallies against the panacea of "one-man/one-vote" rest on the conviction that what matters in politics is not the counting of heads but what goes on in the heads counted. He is that strange phenomenon in our day—a man who believes that the test of government is not just how it is elected but whether it is capable of ruling for good or ill. He perhaps came closest to expressing his ideal when he termed it "meritocracy," where men are judged not by the color of their skin but by what they stand for and how they conduct themselves. In short, for him politics cannot be divorced from standards and the maintenance of civilized values.

But politics is the art of the possible, and, given the world as it is, not as it might be, the possible is not always, indeed is rarely, synonymous with the best. In shaping his course Smith has had to adapt not only to the realities of his own country—tribal differences and suspicions not least among them—but also to the realities of the wider world. In beating down opposition within his own party from die-hards and men of the extreme Right, Smith recently reminded his hearers that anyone who thinks that the Rhodesia of the Seventies can be the Rhodesia of the Fifties and Sixties is living in a fairyland and needs his head examined. Smith will have no truck with Communism, which he believes is out to subvert most of Africa. By its very location, trade connections, and human relations, Rhodesia can prosper only as a member of the community of Western nations from which it was born. When that community, through Kissinger, demanded a New Deal in Rhodesia, Smith accepted the verdict, asking only that the West fulfill solemn commitments made. If that happens, if sanctions are promptly lifted with the formation of a new interim government, Smith may well have turned necessity into opportunity. For Rhodesia has one thing going for it that is lacking in other African states which have confused justice for blacks with the questionable doctrine of one-man/one-vote; namely, long years of fairly relaxed racial relations and the fact that whites and blacks have been fighting shoulder to shoulder against a common enemy. As a result, the new Zimbabwe, if backed by the West, may show the way to something new under the African sun, a stable society where both races find their common homeland.

A political trimmer? Maybe. But maybe, too, the celebrated aphorism of Lord Halifax applies: "I trim as the temperate zone trims between the climate in which men are roasted and the climate in which they are frozen." As it happens, Rhodesia, and specifically Selukwe, to which Smith will one day be returning, is endowed with precisely that climatic blessing.●

## FAIRER INVESTIGATIONS NEEDED

### Hon. Theodore M. (Ted) Risenhoover

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. RISENHOOVER. Mr. Speaker, a series of stories in Traffic World deeply concern me. Since they have not been published elsewhere, I wish to call this matter to the attention of my colleagues.

The April 18 issue of Daily Traffic World carries the following story:

TRANSPORT LAW PROFESSOR'S TESTIMONY IN MOTOR CARRIER RATE PROBE REJECTED

Kennedy Panel Again Rebuffs Witness, Who, While Advocating Motor Carrier Reforms, Supports Continued Existence of Rate Bureaus. New Hearing Date Set. ICC Commissioners Queried

(By Don Byrne)

A professor of transportation law at the University of Denver College of Law offered testimony to the Senate subcommittee investigating ratemaking or procedures in the motor carrier industry only to have it rejected, apparently because parts of it supported the position that motor carrier rate bureaus should not be abolished.

This latest incident in the investigation of the motor carrier industry by the antitrust and monopoly subcommittee of the Senate Judiciary Committee is the third uncovered in recent weeks by *Traffic World* in which either questions and answers were prepared for a witness or testimony was rejected because it did not agree with the subcommittee staff's thinking on how the investigation should proceed.

The latest incident involves Dr. Andrew F. Popper, assistant professor of law at the University of Denver, who holds the professorial chair in transportation law in the University's Law College.

The subcommittee held hearings on the ratemaking issue in Chicago on March 23 and then moved on to Denver the next day. Prior to this, after discussion with Jay Steptoe of the subcommittee staff, Dr. Popper had prepared testimony particularly with reference to court decisions supporting ICC rulings which would no longer allow rate bureaus to protest independent actions by their members, prohibit shipper-affiliated motor carriers from serving on rate bureau boards of directors and prohibit rate bureaus from operating as profit-making entities.

Professor Popper's testimony explored both sides of those decisions and added testimony calling on the committee to launch a full-scale investigation of regulation and deregulation and the ICC.

But then he added:

"I do not advocate the total abolition of regulation in the motor carrier field. I do not advocate the destruction of rate bureaus for collective ratemaking. I do most strenuously advocate a complete study of all the component parts of regulation, this being vital to the public interest as well as the interest of the motor carrier industry."

Professor Popper told *Traffic World* that after his meeting with the staff, including Jay Steptoe and Jeff Stone, on the day before the Denver hearing, "it appeared to me the staff didn't want to hear what I wrote."

The April 10 issue of Traffic World reported:

KENNEDY PANEL DISALLOWS TESTIMONY FAVORABLE TO RATE BUREAU PROCESSES

Nationwide Traffic Service Bureau Official Abruptly Canceled Out of Ratemaking Hearing After Requested Testimony He Submits Points Out Tariff Problems That Would Exist Without Rate Bureaus

(By Don Byrne)

The Senate subcommittee investigating ratemaking in the motor carrier industry sought testimony from an expert in the field because of his ". . . knowledge and experience with motor carrier ratemaking practices and processes . . ." and then rejected the testimony, apparently because it was favorable to the rate bureau process.

This came to light after *Traffic World* reported that there was evidence of rigged testimony in a hearing on trucking industry ratemaking practices March 23 in Chicago.

On March 7 Senator Edward M. Kennedy (D-Mass.), chairman of the antitrust and monopoly subcommittee of the Judiciary Committee, wrote to Jack F. Steuber, Sr., vice-president—sales and consulting for Nationwide Traffic Service Bureau, Inc., in North Miami, Fla., asking him to appear before the subcommittee on March 13 saying, "In view of your knowledge and experience with motor carrier ratemaking practices and processes, we ask that you appear before the subcommittee to give testimony. The hearing will begin at 9:30 a.m., on Monday, March 13. . . ."

That same day, a subcommittee staff member, Jeff Stone, also called Nationwide and spoke with Al Jensen, executive vice-president of Nationwide, in Mr. Steuber's absence. He requested Nationwide to present the subcommittee with an in-depth background on the company, the typeof cilentele and other pertinent information. He also requested that Nationwide submit a list of questions it would like the subcommittee to ask, Mr. Steuber said.

In a letter to Senator Kennedy and other members of the subcommittee dated April 4, Mr. Steuber describes what then happened:

"Your letter requested testimony based on my knowledge and experience on federal regulation of ratemaking in the motor carrier industry and the ratemaking practices and processes. My prepared statement included background on Nationwide and testimony on collective ratemaking.

"Five copies were sent to Mr. Stone on Thursday, March 9 and were in his hands the following day. All arrangements were made for me to be in Washington, Monday, March 13, 1978, to give testimony. Late Friday evening, March 10, Mr. Stone telephoned my office and again talked to Al Jensen. Mr. Jensen was informed by Mr. Stone, that due to the resumption of the Panama Canal Treaty hearings, cancellations were necessary. I was one of the cancellations. This was understandable due to the circumstances.

"Mr. Stone also stated to Al Jensen during the Friday evening telephone conversation, that I did a '180 degree turn' on my testimony. He said that all he wanted was information on Nationwide Traffic Service Bureau and its clients, as stated previously herein. Mr. Stone said that the committee had enough testimony on collective ratemaking. He further stated that if we wished to change our testimony, indicating that we limit it to our services, etc., that we could resubmit it when the hearings resume sometime in April.

"Senator, this disturbs me greatly. Your letter contained nothing requesting background on Nationwide Traffic Service Bureau. The contents of your letter spe-

cifically requested testimony on motor carrier ratemaking and federal regulations of ratemaking. Why should we have to change our testimony in order to have it entered in the record of future hearings? I feel sure that you and your committee want to be made aware of all of the thinking of the transportation industry and the shipping public, regardless of which side of the issue a particular piece of testimony may fall."

On April 3, from Chicago, the following was published in Traffic World:

"RIGGED" TESTIMONY GIVEN IN CHICAGO HEARING CONDUCTED BY SEN. KENNEDY

Document Obtained by Traffic World Shows That Illinois State Legislator Used Question-and-Answer Document Prepared for Him Beforehand by Subcommittee staff

(By Elleen Kelliher)

Evidence of rigged testimony and hand-picked witnesses surfaced in a U.S. Senate subcommittee hearing on trucking industry ratemaking practices, March 23, in Chicago. Conducting the hearing was Senator Edward M. ("Ted") Kennedy (D-Mass.), who is chairman of the Senate Judiciary Committee's subcommittee on antitrust and monopoly.

The hearing was one in a series held by the subcommittee, supposedly for the purpose of determining whether a need exists for enactment of proposed legislation to remove the motor carriers' right, under the Interstate Commerce Act, to make rates collectively, through their rate bureaus.

Inquirers learned that the subcommittee staff had made contact, prior to the hearing in Chicago, with all the witnesses who testified in the hearing. Tom Sussman, general counsel for the subcommittee, said that it is "standard procedure" to interview prospective witnesses.

Of the 10 persons who were "invited to testify," only the three who represented the motor carrier industry spoke in favor of collective ratemaking. Of the remaining seven witnesses, four were self-described "consumer advocates," two were shipper representatives, and one was a state legislator from Chicago who opposed collective ratemaking by motor carriers.

Minutes before the hearing began, *Traffic World* obtained a copy of a document indicating that Illinois State Representative William A. Marovitz gave testimony prepared for him by subcommittee staff.

The document was titled "Questions for Marovitz." It contained four questions with lengthy answers that were designed to show that rate bureau ratemaking is no longer necessary; that it's partly to blame for higher truck rates; that it hurts the consumers, and that it eliminates competition in the trucking industry.

Mr. Marovitz, the first to testify, said in a brief statement that "the public needs to be aware of the inflationary effect price-fixing in the trucking industry has on the price of consumer goods."

Then, Senator Kennedy asked Mr. Marovitz each of the four questions and the young attorney, a Democrat who represents a district on Chicago's South Side, read off the answers nearly word for word as they appeared on the document held by Traffic World.

The subcommittee's counsel, Mr. Sussman, verified that "Questions for Marovitz" had been prepared by a subcommittee staff aide.

"When Senator Kennedy asks questions he likes to know what the answers will be," Mr. Sussman said.

While I do not pretend to set standards of conduct for the other body, I have concern about investigative methods reported by this respected publication. All three stories reflect a pattern of witnesses being selectively picked and, worse, allegations that testimony was rigged by staffers of a committee in the other body.

Congress has a responsibility to get facts. But, we should set a standard of fairness, balance, and objectivity. When we fall short of these minimums, we all are poorer.●

## GEORGE WASHINGTON HONOR MEDAL AWARDED FOR SERMON

### HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, April 19, 1978*

● Mr. BENJAMIN. Mr. Speaker, I am delighted to inform my colleagues that Rev. Jack H. Barrell, pastor of the First Presbyterian Church of Hammond, Ind., will, in the near future, be awarded, for the third time, the George Washington Honor Medal for his outstanding sermon entitled "One Nation Under God—Who Needs Him?" This sermon was delivered on the occasion of George Washington's Birthday, 1977.

The Freedoms Foundation has previously awarded this medal to Pastor Barrell in 1973 and 1977 in honor of his outstanding contribution to the understanding of the American way of life. These annual awards have been presented to worthy individuals and organizations since 1949.

Pastor Barrell will also be distinguished by Hanover College, Hanover, Ind., after he preaches the baccalaureate sermon on Sunday, May 28, 1978. At that time, Hanover College will present to Pastor Barrell a doctor of divinity degree honoring his dedicated service to his community.

The First Presbyterian Church of Hammond has, under the extremely competent direction of Reverend Barrell, grown and expanded. During the week of April 23–30, 1978, Pastor Barrell and his congregation will celebrate the dedication of the new sanctuary and fellowship hall, the service of dedication taking place on "Dedication Sunday," Sunday, April 30.

I know my colleagues share my admiration for Rev. Jack H. Barrell's selfless and dedicated work. His being so honored is a great tribute to his untiring efforts to constantly improve the quality of life for every man, woman, and child.

Mr. Speaker, colleagues, I am extremely pleased to have this opportunity to recognize, congratulate, and praise Reverend Barrell for a job well done. This praise has been echoed countless times by all those people he has aided, and many times without acclaim. I know that his recognitions will continue to grow because he will never stop growing and giving as long as there is a person in need.●

## SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meeting as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, April 20, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 21

9:00 a.m.

Agriculture, Nutrition, and Forestry

Foreign Agricultural Policy Subcommittee

To hold hearings on S. 2278, S. 2641, and S. 2869, the International Emergency Food Reserves Act.
